Whereas, in the United States, recycling is an industry valued at approximately \$200,000,000,000;

Whereas diverting 75 percent of waste in the United States from landfilling and incineration to recycling by 2030

would result in the creation of approximately 2,300,000 recycling jobs, nearly 2 times the number of recycling jobs that existed in the United States in 2008;

Whereas the 2016 Recycling Economic Information Report by the Environmental Protection Agency found, using 2007 as a base year, that recycling and reuse activities—

(1) accounted for approximately 757,000 jobs, 0.52 percent of all jobs in the United States;

(2) produced approximately \$36,600,000,000 in wages, 0.62 percent of total wages paid in the United States; and

(3) produced approximately \$6,700,000,000 in tax revenue, 0.90 percent of total tax revenue in the United States;

Whereas recycling conserves natural resources and fresh water;

Whereas recycling prevents waste and discarded materials from ending up in oceans and waterways and harming water and wildlife;

Whereas, in 2015, approximately 67,800,000 tons of municipal solid waste were recycled, in contrast with 137,700,000 tons of municipal solid waste that were landfilled; and

Whereas, with respect to the 67,800,000 tons of municipal solid waste that were recycled, paper and paperboard accounted for 67 percent, metals accounted for 12 percent, and glass, plastic, and wood accounted for between 4 and 5 percent: Now, therefore, be it
