CLERK'S NOTE

This committee print provides a compilation of the enacted text and applicable explanatory material for the Consolidated Appropriations Act, 2020 (H.R. 1158, P.L. 116–93).

This Act is the product of negotiations between the House and Senate Appropriations Committees on final fiscal year 2020 appropriations for all 12 annual appropriations bills.

For purposes of final passage, the 12 appropriations bills were enacted using two vehicles: H.R. 1158 and H.R. 1865.

H.R. 1158 consists of four divisions related to Appropriations matters (divisions A through D), and includes the front section, which contains provisions applicable to the entire Act. The legislative text was submitted by Chairwoman Nita Lowey of the House Committee on Appropriations as a House amendment to the Senate amendment to an unrelated bill pending in the House, H.R. 1158. The House agreed to the measure on December 17, 2019, and the Senate agreed to the measure on December 19, 2019.¹ The President signed the legislation on December 20, 2019 and it became Public Law 116–93.

Because an “amendments-between-the-Houses” process was used instead of a conference committee, there is no conference report and no “joint Explanatory Statement of the managers” for H.R. 1158. An Explanatory Statement relating to the House amendment to H.R. 1158 was filed by Chairwoman Lowey in the Congressional Record on December 17, 2019.² Section 4 of the Act provides that this Explanatory Statement “shall have the same effect with respect to the allocation of funds and implementation of divisions A through D of this Act as if it were a joint explanatory statement of a committee of conference.”

For the convenience of users, the legislative text of each appropriations division is paired with the applicable section of the Explanatory Statement.

¹ The House agreed to the amendment by a vote of 280–138 (Roll Call No. 690). The Senate agreed to the amendment by a vote of 81–11 (Roll Call Vote No. 428).

² The Explanatory Statement appears on pages H10613–H11059 in Book II of the December 17, 2019 Congressional Record.

GENERAL PROVISION—THIS TITLE

SEC. 10001. Notwithstanding any other provision of law, funds made available under each heading in this title shall only be used for the purposes specifically described under that heading.

This division may be cited as the “Department of Defense Appropriations Act, 2020”.

[CLERK'S NOTE.—Reproduced below is the material relating to division A contained in the Explanatory Statement regarding H.R. 1158, the Consolidated Appropriations Act, 2020.¹]

DIVISION A—DEPARTMENT OF DEFENSE APPROPRIATIONS ACT, 2020

The following is an explanation of the effects of this Act, which makes appropriations for the Department of Defense for fiscal year 2020. Unless otherwise noted, references to the House and Senate reports are to House Report 116–84 and Senate Report 116–103, respectively. The language contained in the House and Senate reports warrant full compliance and carry the same weight as language included in this explanatory statement unless specifically addressed to the contrary in the bill or this explanatory statement. While repeating some language from the House or Senate reports for emphasis, this explanatory statement does not intend to negate the language referred to above unless expressly provided herein.

DEFINITION OF PROGRAM, PROJECT, AND ACTIVITY

For the purposes of the Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99–177), as amended by the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987 (Public Law 100–119), and by the Budget Enforcement Act of 1990 (Public Law 101–508), the terms “program, project, and activity” for appropriations contained in this Act shall be defined as the most specific level of budget items identified in the Department of Defense Appropriations Act, 2020, the related classified annexes and explanatory statements, and the P–1 and R–1 budget justification documents as subsequently modified by congressional action.

The following exception to the above definition shall apply: the military personnel and the operation and maintenance accounts, for which the term “program, project, and activity” is defined as the appropriations accounts contained in the Department of Defense Appropriations Act.

At the time the President submits the budget request for fiscal year 2021, the Secretary of Defense is directed to transmit to the congressional defense committees budget justification documents to be known as the “M–1” and the “O–1” which shall identify, at the budget activity, activity group, and sub-activity group level, the amounts requested by the President to be appropriated to the Department of Defense for military personnel and operation and maintenance in any budget request, or amended budget request, for fiscal year 2021.

¹ This Explanatory Statement was submitted for printing in the Congressional Record on December 17, 2019 by Mrs. Lowey of New York, Chairwoman of the House Committee on Appropriations. The Statement appears on page H10613 of Book II.

REPROGRAMMING GUIDANCE FOR BASE AND OVERSEAS CONTINGENCY OPERATIONS FUNDING

The Secretary of Defense is directed to continue to follow the reprogramming guidance for acquisition accounts as specified in the report accompanying the House version of the Department of Defense Appropriations bill for Fiscal Year 2008 (House Report 110–279). The dollar threshold for reprogramming funds shall be \$10,000,000 for military personnel; operation and maintenance; procurement; and research, development, test and evaluation.

Also, the Under Secretary of Defense (Comptroller) is directed to continue to provide the congressional defense committees annual DD Form 1416 reports for titles I and II and quarterly, spreadsheet-based DD Form 1416 reports for Service and defense-wide accounts in titles III and IV of this Act. Reports for titles III and IV shall comply with guidance specified in the explanatory statement accompanying the Department of Defense Appropriations Act, 2006. The Department shall continue to follow the limitation that prior approval reprogrammings are set at either the specified dollar threshold or 20 percent of the procurement or research, development, test and evaluation line, whichever is less. These thresholds are cumulative from the base for reprogramming value as modified by any adjustments. Therefore, if the combined value of transfers into or out of a military personnel (M–1); an operation and maintenance (O–1); a procurement (P–1); or a research, development, test and evaluation (R–1) line exceeds the identified threshold, the Secretary of Defense must submit a prior approval reprogramming to the congressional defense committees. In addition, guidelines on the application of prior approval reprogramming procedures for congressional special interest items are established elsewhere in this statement.

FUNDING INCREASES

The funding increases outlined in the tables for each appropriation account shall be provided only for the specific purposes indicated in the tables.

CONGRESSIONAL SPECIAL INTEREST ITEMS

Items for which additional funds have been provided or items for which funding is specifically reduced as shown in the project level tables or in paragraphs using the phrase “only for” or “only to” are congressional special interest items for the purpose of the Base for Reprogramming (DD Form 1414). Each of these items must be carried on the DD Form 1414 at the stated amount, as specifically addressed in the explanatory statement.

CLASSIFIED ANNEX

Adjustments to classified programs are addressed in the accompanying classified annex.

JOINT ENTERPRISE DEFENSE INFRASTRUCTURE

The agreement notes that the Chief Information Officer of the Department of Defense has provided the report required in House Report 116–84 regarding the Department’s plans to transition to a

multi-cloud environment and satisfied the conditions that prohibited the obligation and expenditure of funds to migrate data and applications to the Joint Enterprise Defense Infrastructure cloud.

The agreement retains a requirement in House Report 116–84 requiring the Chief Information Officer of the Department of Defense to submit quarterly reports on the implementation of its cloud strategy.

MILCLOUD 2.0

It is understood that the Department of Defense is currently operating milCloud 2.0, a commercially-owned and operated cloud that is housed in two Defense Information Systems Agency data centers, that offers cloud-based infrastructure, platform, and software as-a-service solutions. In May 2018, the Chief Information Officer of the Department of Defense distributed a memorandum directing all Fourth Estate agencies to migrate to milCloud 2.0. Per this direction, the Department of Defense is encouraged to complete migration to milCloud 2.0 by the end of fiscal year 2020.

SPECIAL OPERATIONS COMMAND OBLIGATION AND EXPENDITURE PLANS

The existing budget justification and quarterly execution data lack certain details to analyze trends and program office performance. To facilitate appropriate oversight, the Commander of the United States Special Operations Command is directed to provide the House and Senate Appropriations Committees detailed spend plans at the project level for the procurement and research and development appropriations accounts. The spend plans shall include all active fiscal years, with monthly obligation and target benchmarks. The first spend plan should be provided not later than 45 days after the enactment of this Act, and subsequent spend plans should be provided annually with the submission of the budget request.

CIVILIAN PAY RAISE

The agreement recognizes the value of the Department of Defense civilian workforce and acknowledges the 3.1 percent federal pay raise for all federal civilian employees.

F–15EX

The agreement includes \$1,052,900,000 for eight F–15EX fighters and transfers \$364,400,000 from Aircraft Procurement, Air Force to Research, Development, Test and Evaluation, Air Force for the procurement of two test aircraft and half of the requested amount for non-recurring engineering. Of the funds provided in Aircraft Procurement, Air Force for the remaining six F–15EX aircraft, no more than \$64,800,000 for long-lead materials may be obligated until the Secretary of the Air Force submits a report to the congressional defense committees with the following documentation, or the milestone C-equivalents under Section 804 middle tier acquisition authority, to include an approved program acquisition strategy; a capability production document; a life-cycle cost estimate; a life-cycle sustainment plan; a test and evaluation master plan; and

a post-production fielding strategy. Additionally, the Secretary of the Air Force is directed to include F-15EX program updates and progress towards critical milestones in the Section 804 triannual reports to Congress. Finally, the Secretary of the Air Force is directed to submit to the congressional defense committees not later than 60 days after the enactment of this Act a report with a comprehensive review of options to address the Air Force fighter capacity shortfall. This language replaces the language under the heading “F-15EX” in Senate Report 116-103.

TITLE I—MILITARY PERSONNEL

(INCLUDING BASE AND OVERSEAS CONTINGENCY OPERATIONS FUNDING)

The Secretary of Defense is directed to submit the Base for Reprogramming (DD Form 1414) for each of the fiscal year 2020 appropriations accounts not later than 60 days after the enactment of this Act. The Secretary of Defense is prohibited from executing any reprogramming or transfer of funds for any purpose other than originally appropriated until the aforementioned report is sub-

MILITARY PERSONNEL SPECIAL INTEREST ITEMS

Items for which additional funds have been provided or have been specifically reduced as shown in the project level tables or in paragraphs using the phrase "only for" or "only to" in the explanatory statement are congressional special interest items for the purpose of the Base for Reprogramming (DD Form 1414). Each of these items must be carried on the DD Form 1414 at the stated amount as specifically addressed in the explanatory statement. Below Threshold Reprogrammings may not be used to either restore or reduce funding from congressional special interest items as identified on the DD Form 1414.

OPERATION AND MAINTENANCE SPECIAL INTEREST ITEMS

Items for which additional funds have been provided or have been specifically reduced as shown in the project level tables or in paragraphs using the phrase “only for” or “only to” in the explanatory statement are congressional special interest items for the purpose of the Base for Reprogramming (DD Form 1414). Each of these items must be carried on the DD Form 1414 at the stated amount as specifically addressed in the explanatory statement. Below Threshold Reprogrammings may not be used to either restore or reduce funding from congressional special interest items as identified on the DD Form 1414.

90/10 RULE

The agreement adopts the reporting requirements contained under the heading “90/10 Rule” in House Report 116–84 but changes the submission date to not later than 180 days after the enactment of this Act. Further, the Secretary of Defense is directed to work collaboratively with the Secretaries of Education and Veterans Affairs on an authoritative data set that includes the total funding level to each for-profit institution for the most recent academic year from all sources provided by the Departments of Education, Veterans Affairs, and Defense to more accurately derive estimates for the reporting requirement to the congressional committees.

DEFENSE PERSONAL PROPERTY PROGRAM

The agreement supports the desire and commitment of the United States Transportation Command (USTRANSCOM) to improve the current system for the movement of personal effects within the Department of Defense. However, concerns over USTRANSCOM’s plan to award a single source contract remain. Therefore, in addition to any other requirements, this agreement directs that no such single source award may be signed before April 1, 2020; and before the Commander of USTRANSCOM has provided the congressional defense committees with a description of anticipated cost savings broken out by Service across the Future Years Defense Program.

WIND ENERGY

The agreement does not adopt the language under the heading “Wind Energy” in House Report 116–84.

PRIVATE CONTRACTED SHIP MAINTENANCE

The agreement includes a pilot program to fund the private contract ship maintenance planned for the Pacific Fleet in fiscal year 2020 in Other Procurement, Navy, as proposed in Senate Report 116–103. The funding in Other Procurement, Navy line 23x Ship Maintenance, Repair and Modernization shall only be for such activities executed in the United States and is hereby designated a congressional special interest item. The Secretary of the Navy shall provide the congressional defense committees the following in relation to the pilot—

1. An execution plan for the funding in Other Procurement, Navy line 23x, Ship Maintenance, Repair and Modernization. This shall be submitted to the congressional defense committees prior to the execution of funding and shall include the following data points for each ship included in the pilot program:

- a. Ship class, hull number and name of each ship;
- b. Type of availability;
- c. Location of the work;
- d. Execution plan start date;
- e. Execution plan end date; and
- f. Execution plan funded amount (in thousands).

2. Not later than 15 days after the end of each fiscal quarter, an updated plan to the first report showing:

- a. Ship class, hull number and name of each ship;
- b. Type of availability;
- c. Location of the work;
- d. Actual or current estimate of start date;
- e. Actual or current estimate of end date;
- f. Actual funded amount and estimate to complete (in thousands);

and

the quarterly update shall also include an execution review of the funding in line 1B4B Ship Depot Maintenance in Operation and Maintenance, Navy.

ANALYSIS OF AIRCRAFT CARRIER, SURFACE SHIP, AND SUBMARINE MAINTENANCE DELAYS

Completing maintenance on time is integral to supporting fleet readiness, meeting strategic and operational requirements, and ensuring the Navy's ships reach their expected service lives. From numerous reports, the Navy continues to face persistent maintenance delays that affect the majority of its maintenance efforts and threaten its attempt to restore readiness. Since fiscal year 2014, Navy ships have spent over 27,000 more days in maintenance than expected, with 70 percent of maintenance periods on average experiencing delays. There is some preliminary evidence that the Navy has begun pilot efforts to analyze maintenance challenges for some elements of the fleet. However, these efforts are not comprehensively examining the root causes of delays across the entire fleet. Further, absent such an analysis, the Navy is not well positioned to develop a plan to address its persistent maintenance delays.

To address these issues, the Secretary of the Navy is directed to assign responsibility to conduct a comprehensive and systematic analysis to identify the underlying causes of aircraft carrier, sur-

face ship, and submarine maintenance delays and submit a report on its findings not later than 180 days after the enactment of this Act to the congressional defense committees and to the Government Accountability Office. This report shall incorporate results-oriented elements, including analytically-based goals; metrics to measure progress; and the identification of required resources, risks, and stakeholders to achieve those goals. The Secretary of the Navy shall update the congressional defense committees annually thereafter on its progress to achieve the goals set forth in the plan. Further, the Comptroller General of the United States is directed to submit a review of the report to the congressional defense committees not later than 90 days after receiving the report from the Navy.

JET NOISE

Communities situated around military installations with airfields have expressed concerns of the negative effects that jet noise may have on them. It is acknowledged that modeling aircraft noise, as opposed to measuring it, provides the most accurate assessment of impacts on a community. Therefore, the Secretary of the Navy is directed to model the level of jet noise generated by Navy aviation assets and to make that data available to the public.

DEFENSE LANGUAGE AND NATIONAL SECURITY EDUCATION OFFICE

The Defense Language and National Security Education Office provides critical college accredited training for service members and government officials in a number of languages and strategic cultures in partnership with universities across the country. A report provided by the Department of Defense in response to language included in the report accompanying the Department of Defense Appropriations Act, 2019 (Public Law 115–245) regarding the Department's ability to fill positions requiring high level strategic language capability reflects the clear and demonstrable need for increased resources. The Secretary of Defense is encouraged to place a higher priority on the Language Training Centers and the Language Flagship strategic language training program. The agreement designates the funding included in the fiscal year 2020 budget request for the Language Training Centers as a congressional special interest item.

It is further noted that funding for the Language Flagship program has not been increased since its inception in 2003 and the Secretary of Defense is urged to provide additional resources to the Language Flagship program that ensure both military and civilian personnel receive the language and culture training needed to effectively complete missions. Additionally, the Secretary of Defense is directed to identify additional resources that may be required to address existing shortfalls in this skillset.

SECURITY ASSISTANCE PROGRAMS

Prior to the initial obligation of funds made available in Title II and Title IX of this Act for the Defense Security Cooperation Agency (DSCA), the Director of DSCA is directed to submit a spend plan by budget activity and sub-activity to the House and Senate Appropriations Committees. For funds planned for the Security Cooperation Account, the Director shall, in coordination with the geographic combatant commanders, include amounts planned for each combatant command and country, and a comparison to such amounts provided in the previous three fiscal years. Amounts in the plan shall only reflect those amounts designated in the fiscal year 2020 budget justification materials and modified by fiscal year 2020 appropriations adjustments in this Act and in the table under this heading for DSCA. The plan shall be updated and submitted to the House and Senate Appropriations Committees upon notification of funds under this heading to include a justification for changes made. A similar plan shall be provided to such Committees outlining funds requested for fiscal year 2021 with the submission of the fiscal year 2021 budget request.

INDO-PACIFIC STRATEGIC FRAMEWORK AND PLAN

The Secretary of Defense is directed to submit a copy of the Indo-Pacific Strategic Framework and the Indo-Pacific Implementation Plan to the congressional defense committees not later than 30 days after the enactment of this Act.

REPROGRAMMING GUIDANCE FOR ACQUISITION ACCOUNTS
(INCLUDING BASE AND OVERSEAS CONTINGENCY OPERATIONS
FUNDING)

The Secretary of Defense is directed to continue to follow the reprogramming guidance as specified in the report accompanying the House version of the Department of Defense Appropriations bill for Fiscal Year 2008 (House Report 110-279). Specifically, the dollar threshold for reprogramming funds shall be \$10,000,000 for procurement and research, development, test and evaluation.

Also, the Under Secretary of Defense (Comptroller) is directed to continue to provide the congressional defense committees quarterly, spreadsheet-based DD Form 1416 reports for Service and defense-wide accounts in titles III and IV of this Act. Reports for titles III and IV shall comply with the guidance specified in the explanatory statement accompanying the Department of Defense Appropriations Act, 2006. The Department shall continue to follow the limitation that prior approval reprogrammings are set at either the specified dollar threshold or 20 percent of the procurement or research, development, test and evaluation line, whichever is less. These thresholds are cumulative from the base for reprogramming value as modified by any adjustments. Therefore, if the combined value of transfers into or out of a procurement (P-1) or research, development, test and evaluation (R-1) line exceeds the identified threshold, the Secretary of Defense must submit a prior approval reprogramming to the congressional defense committees. In addition, guidelines on the application of prior approval reprogramming procedures for congressional special interest items are established elsewhere in this statement.

FUNDING INCREASES

The funding increases outlined in these tables shall be provided only for the specific purposes indicated in the tables.

PROCUREMENT SPECIAL INTEREST ITEMS

Items for which additional funds have been recommended or items for which funding is specifically reduced as shown in the project level tables detailing recommended adjustments or in paragraphs using the phrase “only for” or “only to” in the explanatory statement are congressional special interest items for the purpose of the Base for Reprogramming (DD Form 1414). Each of these items must be carried on the DD Form 1414 at the stated amount, as specifically addressed elsewhere in the explanatory statement.

JOINT STRIKE FIGHTER PRIOR YEAR SAVINGS

The recent Lot 12-14 contract agreement for procurement of the F-35 Joint Strike Fighter resulted in substantial savings from prior year appropriations due to declining unit costs. The agreement preserves \$250,400,000 of this savings within the Aircraft Procurement, Navy and Aircraft Procurement, Air Force accounts for fiscal years 2018 and 2019 in order to fund the alternate sourcing of F-35 parts manufactured in the Republic of Turkey. In addition, the agreement preserves \$322,563,000 in the same ac-

counts for reinvestments identified by the Director of the F-35 Joint Program Office to support future cost reductions and more efficient sustainment and to convert F-35As, previously designated for Turkey, for United States Air Force use.

JOINT STRIKE FIGHTER SPARES DATA

The agreement provides \$757,471,000 in additional spares for all three variants of the Joint Strike Fighter. The Secretary of Defense is directed to not obligate or expend more than 50 percent of these funds until 15 days after the Director of the F-35 Joint Program Office submits to the congressional defense committees a certification that the Department of Defense has submitted a formal request for proposal (RFP) for provisioning and cataloguing data to the F-35 prime contractor, and that the RFP has been coordinated with the prime contractor for delivery of a proposal by the end of calendar year 2020. Additionally, the Secretary of Defense is further directed to include the costs of acquiring these data, as applicable, in future budget exhibits and briefing materials for the congressional defense committees beginning with the fiscal year 2021 budget submission. This language replaces the language under the heading "Positioning the F-35 Program for Continued Success" in House Report 116-84.

FFG(X) FRIGATE PROGRAM

There remain concerns with the dependence of the Department of the Navy to source surface ship components from foreign industry partners rather than promote a robust domestic industrial base. The agreement amends a legislative provision included in H.R. 2740 to allow the Secretary of the Navy to procure certain components for the FFG(X) Frigate program from non-United States suppliers with the direction that United States manufactured propulsion engines and propulsion reduction gears must be incorporated into the program not later than with the eleventh ship of the Frigate class.

Furthermore, the Secretary of the Navy is directed to conduct a study on the impacts of incorporating United States manufactured propulsion engines and propulsion reduction gears into the FFG(X) Frigate program prior to the eleventh ship, and to submit the study to the congressional defense committees not later than 180 days after the contract award of the FFG(X) Frigate. The study shall include estimates of potential changes to the acquisition schedule and any associated costs with incorporating domestically produced propulsion equipment into the FFG(X) Frigate program with the fourth, sixth, eighth, tenth, and eleventh ship of the program.

Additionally, the Secretary of the Navy is encouraged to support a robust domestic industrial base with more stringent contract requirements in future surface ship classes.

REPROGRAMMING GUIDANCE FOR ACQUISITION ACCOUNTS
(INCLUDING BASE AND OVERSEAS CONTINGENCY OPERATIONS
FUNDING)

The Secretary of Defense is directed to continue to follow the reprogramming guidance as specified in the report accompanying the House version of the Department of Defense Appropriations bill for Fiscal Year 2008 (House Report 110-279). Specifically, the dollar threshold for reprogramming funds shall be \$10,000,000 for procurement and research, development, test and evaluation.

Also, the Under Secretary of Defense (Comptroller) is directed to continue to provide the congressional defense committees quarterly, spreadsheet-based DD Form 1416 reports for Service and defense-wide accounts in titles III and IV of this Act. Reports for titles III and IV shall comply with the guidance specified in the explanatory statement accompanying the Department of Defense Appropriations Act, 2006. The Department shall continue to follow the limitation that prior approval reprogrammings are set at either the specified dollar threshold or 20 percent of the procurement or research, development, test and evaluation line, whichever is less. These thresholds are cumulative from the base for reprogramming value as modified by any adjustments. Therefore, if the combined value of transfers into or out of a procurement (P-1) or research, development, test and evaluation (R-1) line exceeds the identified threshold, the Secretary of Defense must submit a prior approval reprogramming to the congressional defense committees. In addition, guidelines on the application of prior approval reprogramming procedures for congressional special interest items are established elsewhere in this statement.

FUNDING INCREASES

The funding increases outlined in these tables shall be provided only for the specific purposes indicated in the tables.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION SPECIAL INTEREST
ITEMS

Items for which additional funds have been recommended or items for which funding is specifically reduced as shown in the project level tables detailing recommended adjustments or in paragraphs using the phrase "only for" or "only to" in the explanatory statement are congressional special interest items for the purpose of the Base for Reprogramming (DD Form 1414). Each of these items must be carried on the DD Form 1414 at the stated amount, as specifically addressed elsewhere in the explanatory statement.

JOINT HYPERSONICS TRANSITION OFFICE

Hypersonic weapons pose a dangerous new class of threat to national security. They operate at exceptionally high speeds and can maneuver unpredictably, making them challenging to track and difficult to intercept. Potential adversaries, such as Russia and China, have recognized the value of hypersonic weapons to offset United States military capabilities and hold United States forces at risk. Adversaries have made alarming progress in developing and

demonstrating such weapons, far outstripping the pace of United States advancements. The agreement supports efforts aimed at developing capabilities to hold adversaries at risk, as well as capabilities to defend against growing hypersonic threats.

The agreement strongly supports increased emphasis on research, development, testing, and demonstration of hypersonics technologies and systems. However, there are concerns that the rapid growth in hypersonic research has the potential to result in stove-piped, proprietary systems that duplicate capabilities and increase costs.

The agreement includes \$100,000,000 for the Joint Hypersonics Transition Office to develop and implement an integrated science and technology roadmap for hypersonics and to establish a university consortium for hypersonics research and workforce development to support Department efforts to expedite testing, evaluation, and acquisition of hypersonic weapons systems, and to coordinate current and future research, development, test, and evaluation programs across the Department of Defense.

The Under Secretary of Defense (Research and Engineering) is directed to submit a report to the congressional defense committees not later than 90 days after the enactment of this Act, and quarterly updates thereafter, on its integrated science and technology roadmap describing the short-term, mid-term, and long-term goals of the Department; progress toward achieving the goals; associated investment needed to achieve the goals; and plans for a university consortium.

TELECOMMUNICATIONS COMPONENTS SUPPLY CHAIN

The Under Secretary for Defense (Acquisition and Sustainment) is directed to provide a report to the congressional defense committees not later than 180 days after the enactment of this Act which evaluates the risk to the supply chain for fiber and related optical telecommunications components, and if appropriate, recommends risk mitigation strategies for Department of Defense acquisition programs.

OPTIONALLY MANNED FIGHTING VEHICLE

The agreement provides \$205,620,000 for the Optionally Manned Fighting Vehicle (OMFV), a reduction of \$172,780,000 from the budget request. It is directed that none of the funds provided may be obligated for middle tier acquisition rapid prototyping until the Secretary of the Army has provided a brief to the congressional defense committees which includes the results of the source selection process; an explanation of how program requirements were built, their traceability to the national defense strategy and multi-domain operations, and the capability gaps they address; and an updated acquisition strategy and program schedule. Given the significance of the OMFV program in support of Army modernization, it is imperative that the congressional defense committees receive timely schedule and cost information in order to make informed decisions.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION, NAVY

The agreement provides \$20,155,115,000 for Research, Development, Test and Evaluation, Navy, as follows:

LARGE UNMANNED SURFACE VESSELS

The agreement recommends \$209,200,000 to fully fund two Large Unmanned Surface Vessels (LUSVs), as requested in the fiscal year 2020 budget. The Secretary of the Navy is directed to comply with the full funding policy for LUSVs in future budget submissions. Further, the agreement recommends \$50,000,000 for the design of future LUSVs without a vertical launch system capability in fiscal year 2020. Incremental upgrade capability for a vertical launch system may be addressed in future fiscal years. It is directed that no funds may be awarded for the conceptual design of future LUSVs until the Assistant Secretary of the Navy (Research, Development and Acquisition) briefs the congressional defense committees on the updated acquisition strategy for unmanned surface vessels.

COMBAT RESCUE HELICOPTER

The agreement provides \$247,047,000, the same as the budget request, for the continued development of the Combat Rescue Helicopter. It is noted that the Air Force will use some of the funds provided to procure an additional test asset to support a modernization program that includes upgrades to address an evolving threat environment. The Secretary of the Air Force is directed to modify future budget exhibits and briefings to the congressional defense committees to clearly separate and identify funding for the modernization program and provide greater detail on both modernization requirements and the planned use of funds.

NEXT GENERATION OVERHEAD PERSISTENT INFRARED

The agreement retains language included in Senate Report 116-103 which designates the Next-Generation Overhead Persistent Infrared program as a congressional special interest item. The Secretary of the Air Force is directed to provide quarterly reports to the congressional defense committees on the program.

OVERHEAD PERSISTENT INFRARED ENTERPRISE ARCHITECTURE

The Department of Defense lacks consensus on its space architecture plans to meet requirements for strategic and tactical missile warning, missile defense, and battlespace awareness mission areas. Currently, the Air Force, Missile Defense Agency, Space Development Agency, and others, are planning to spend tens of billions of dollars pursuing various potential satellite constellations, with a variety of sensor types, constellation sizes, and orbits ranging from proliferated low-earth to geosynchronous and others. The Department has yet to synchronize or harmonize these proposals into a clearly articulated executable and affordable integrated enterprise space architecture.

While the Air Force's Next-Generation Overhead Persistent Infrared Block 0 is an important near-term step for the missile warning mission area, an enterprise architecture strategy is needed to inform decisions on plans, programs, and investments to address the spectrum of overhead persistent infrared mission areas. Without such an enterprise architecture strategy there is potential for inefficiencies, duplication, and unnecessary overlap. The lack of an integrated strategy also risks missing opportunities to integrate sensors and capabilities to increase performance and improve survivability against increasing threats.

Therefore, the Secretary of Defense is directed to develop an integrated overhead persistent infrared enterprise architecture strategy to carry out these mission areas. The strategy shall define the Department's proposed reference architecture, acquisition strategy, identification of lead agency or Service for each element, estimated cost, schedule of key milestones, and transition plans. The Secretary of Defense is directed to provide the strategy to the congressional defense committees not later than 270 days after the enactment of this Act.

WEATHER ENTERPRISE STRATEGY

The agreement notes concerns about the Air Force's weather acquisition strategy and commitment to provide accurate and timely weather data, a mission with a profound impact on daily worldwide military operations. Therefore, the Secretary of the Air Force is directed to provide the congressional defense committees, not later than 180 days after the enactment of this Act, with a strategy, including proposed acquisition plans, estimated cost, and schedule of key milestones, for a weather enterprise architecture to meet all twelve validated space-based environmental monitoring requirements and related Joint Requirements Oversight Council requirements though at least 2030.

LOW COST ATTRITABLE AIRCRAFT TECHNOLOGY

The agreement provides an additional \$100,000,000 to further develop Low Cost Attritable Aircraft Technology (LCAAT). The Secretary of the Air Force is directed to submit to the congressional defense committees a spend plan for this additional funding, plus any LCAAT funding in the underlying fiscal year 2020 budget request, not later than 90 days after the enactment of this Act.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION,
DEFENSE-WIDE

The agreement provides \$25,938,027,000 for Research, Development, Test and Evaluation, Defense-Wide, as follows:

REDESIGNED KILL VEHICLE PROGRAM TERMINATION AND UNITED
STATES HOMELAND DEFENSE

Subsequent to the submission of the fiscal year 2020 budget request, the Under Secretary of Defense (Research and Engineering) terminated for convenience the Redesigned Kill Vehicle (RKV) program. It is noted that the Administration is evaluating several potential interceptor options for improving the Nation's homeland defense, to include a Next Generation Interceptor (NGI) that would field several years from now. Therefore, the agreement recommends several adjustments, as delineated in the project level tables in this explanatory statement, to initiate the competitive development of NGI while maintaining and enhancing existing homeland defense capabilities against near- and mid-term threats prior to the fielding of NGI.

It is expected that with submission of the fiscal year 2021 budget request, the Administration will have concluded its evaluation of interceptor options. Therefore, the Director of the Missile Defense Agency (MDA) is directed to submit to the congressional defense committees, with the submission of the fiscal year 2021 budget request, MDA's strategy for the Nation's homeland defense in the near-, mid-, and far-term, to include acquisition strategies for each element of the architecture, manufacturing and technology readiness levels, contract-type determinations and rationales therefor, plans for technical data management, sustainment strategies, integrated master test plans and integrated master schedules, as well as cost estimates.

Further, the Secretary of Defense is directed to select an appropriate entity outside the Department of Defense to conduct an independent review and assessment of the current and planned United States homeland defense architecture against near-, mid-, and far-term threats. At a minimum, such review shall address operational effectiveness and reliability of the current system; force structure and inventory levels necessary to achieve the planned capabilities; the strategy for the development, production, testing, deployment, modernization and sustainment of the architecture; technology and manufacturing readiness levels required to implement the architecture; and industrial base readiness to support this architecture. It is further directed that such review shall be submitted to the congressional defense committees not later than 180 days after the enactment of this Act. In addition, the Director, Cost Assessment and Program Evaluation is directed to submit to the congressional defense committees an independent cost assessment of this architecture not later than 30 days after submission of the review to the congressional defense committees.

This language replaces language under the header "Redesigned Kill Vehicle Program Termination and Development of Next Generation Interceptor" in Senate Report 116-103.

REPROGRAMMING GUIDANCE FOR THE DEFENSE HEALTH PROGRAM
(INCLUDING BASE AND OVERSEAS CONTINGENCY OPERATIONS
FUNDING)

The agreement directs that the In-House Care and Private Sector Care budget sub-activities remain designated as congressional special interest items. Any transfer of funds into or out of these sub-activities requires the Secretary of Defense to follow prior approval reprogramming procedures. The Secretary of Defense is further directed to provide a report to the congressional defense committees not later than 30 days after the enactment of this Act that delineates transfers of funds and the dates any transfers occurred from the Private Sector Care budget sub-activity to any other budget sub-activity in fiscal year 2019.

The Assistant Secretary of Defense (Health Affairs) is directed to provide quarterly briefings to the congressional defense committees on budget execution data for all of the Defense Health Program budget activities not later than 30 days after the end of each fiscal quarter and to adequately reflect changes to the budget activities requested by the Services in future budget submissions.

The agreement recognizes the shortfall in excess of \$700,000,000 experienced in the execution of Private Sector Care in fiscal year 2019 and consequently includes only modest reductions to the fiscal year 2020 Private Sector Care budget request. This language replaces the language under the headings "Reprogramming Guidance for the Defense Health Program" in House Report 116-84 and "Defense Health Program Reprogramming Procedures" in Senate Report 116-103.

The additional funding provided under the peer-reviewed medical research program shall be devoted only to the purposes listed above.

ELECTRONIC HEALTH RECORDS

The agreement highlights legislative language directing the Secretary of Defense to provide quarterly reports to the congressional defense committees on the status of the deployment of the electronic health record. These reports, directed to be submitted not later than 30 days after the end of each fiscal quarter, shall include the cost and schedule of the program, to include milestones, knowledge points, and acquisition timelines, as well as quarterly obligation reports. These reports should also be provided to the Government Accountability Office. It is expected that the House and Senate Appropriations Committees continue to receive briefings on a quarterly basis, coinciding with the report submission.

The agreement includes legislative language requiring the Secretary to notify the congressional defense committees on any delays to the proposed timeline for deployment. Legislative language directing the Comptroller General to continue quarterly performance reviews of the deployment of MHS GENESIS is also included. It is expected that the Program Executive Officer, Defense Healthcare Management Systems (PEO DHMS) will facilitate quarterly performance reviews by providing the Comptroller General with regular and in-depth access to the program.

The Under Secretary of Defense (Acquisition and Sustainment) is directed to brief the congressional defense committees not later than 30 days after the full deployment decision on the results of the Full Operational Test and Evaluation. Additionally, the PEO DHMS is directed to provide monthly reports not later than 15 days after the end of each month to the congressional defense committees on the status of all open incident reports, as well as high priority incident reports, in order to better track the progress of resolving the issues identified in the initial deployment of MHS GENESIS.

AIR FORCE FLYING HOUR FUNDING EXECUTION FOR OVERSEAS
CONTINGENCY OPERATIONS

The review of the fiscal year 2020 budget request uncovered some disturbing data points that have called the budget formulation process for flying hours in the overseas contingency operations (OCO) request into question. Budget execution data revealed that the Air Force moved approximately \$594,000,000 in fiscal year 2018 and \$695,000,000 in fiscal year 2019 from OCO flying hours to other OCO expenses. It is acknowledged that budgetary requirements change, perhaps even more so with the dynamic nature of overseas contingency operations. Accordingly, the House and Senate Appropriations Committees provide flexibility for these emerging requirements by providing procedures on how the Services are able to make budgetary realignments. However, the Air Force has chosen to apply these procedures differently than intended. This means that over \$1,289,000,000 of OCO funding has been spent by the Air Force over the past two fiscal years on unbudgeted expenses. Frustratingly, it was only after the fact that the congressional defense committees found out what was purchased with the asset provided from the flying hour account.

The fact that the Air Force has moved roughly 25 percent from the OCO flying hour funding request for each of the past two years indicates more of a fundamental issue with the initial request as opposed to an anomaly. Therefore, the agreement includes a new reduction to the Air Force OCO flying hours funding request to more closely align with historical execution.

COUNTER-ISIS TRAIN AND EQUIP FUND

The agreement continues support under this heading for the Iraqi Security Forces, Kurdish Peshmerga, and the Syrian Democratic Forces to participate in activities to counter ISIS and their associated groups. The agreement does not include funding for Iraqi security forces that are not engaged in such activities and continues the requirement that the Secretary of Defense ensure elements are appropriately vetted and receiving commitments from them to promote respect for human rights and the rule of law.

The Secretary of Defense has not fully complied with the quarterly reporting requirements under this heading in the Department of Defense Appropriations Act, 2019 (division A of Public Law 115—245) and is directed to submit all overdue reports not later than 45 days after the enactment of this Act.

JORDAN

The agreement includes funding at levels consistent with prior years for Jordan.

PROCUREMENT

NATIONAL GUARD AND RESERVE EQUIPMENT

The agreement provides \$1,300,000,000 for National Guard and Reserve Equipment. Of that amount \$395,000,000 is designated for the Army National Guard; \$395,000,000 for the Air National Guard; \$205,000,000 for the Army Reserve; \$75,000,000 for the Navy Reserve; \$25,000,000 for the Marine Corps Reserve; and \$205,000,000 for the Air Force Reserve.

This funding will allow the reserve components to procure high priority equipment that may be used for combat and domestic response missions. Current reserve component equipping levels are among the highest in recent history, and the funding provided by the agreement will help ensure component interoperability and sustained reserve component modernization.

The Secretary of Defense is directed to ensure that the account is executed by the Chiefs of the National Guard and reserve components with priority consideration given to the following items: acoustic hailing devices; cold weather and mountaineering gear and equipment, including small unit support vehicles; counter-UAS systems; crashworthy, ballistically tolerant auxiliary fuel systems; detect and avoid systems for MQ-9 aircraft; MQ-9 deployable launch and recovery element mission support kits; modular small arms range simulators; radiological screening portals; solar mobile power systems; and training systems and simulators.

TITLE I

DEPARTMENT OF COMMERCE

INTERNATIONAL TRADE ADMINISTRATION

OPERATIONS AND ADMINISTRATION

The agreement includes \$521,250,000 in total resources for the International Trade Administration (ITA). This amount is offset by \$11,000,000 in estimated fee collections, resulting in a direct appropriation of \$510,250,000.

The agreement provides no less than \$333,000,000 for Global Markets and includes \$500,000 for the rural export assistance activities referenced in the Senate report. The agreement does not assume House levels for Industry and Analysis, Enforcement and Compliance, and Executive Direction and Administration. However, ITA is directed to take steps to fill important vacancies across the agency in support of trade promotion, facilitation, and enforcement, as well as additional staff to support the Committee on Foreign Investment in the United States and the new Anti-Circumvention and Evasion Unit.

Quarterly Updates.—The agreement adopts both House and Senate report language on quarterly briefs updating the Committees on ongoing enforcement work as well as prior quarter expenditures and obligation plans, including current staffing levels, due not later than 30 days after the end of each quarter.

SelectUSA.—Senate report language on Foreign Business Investment in the United States is not adopted. The agreement stipulates that up to \$10,000,000 is provided for SelectUSA, provided that ITA includes a detailed accounting of this spending, by object class, as part of its fiscal year 2020 spending plan.

Office of Inspector General Management Alert.—ITA is directed to address the issues raised by the Department of Commerce Office of Inspector General in its memorandum dated November 7, 2019 (OIG–20–005–M), in particular the issue of securing sensitive information.

BUREAU OF INDUSTRY AND SECURITY

OPERATIONS AND ADMINISTRATION

The agreement includes \$127,652,000 for the Bureau of Industry and Security (BIS) and does not adopt House report language re-

garding the division of funds between Export Administration, Export Enforcement, and Management and Policy Coordination.

ECONOMIC DEVELOPMENT ADMINISTRATION

The agreement includes \$333,000,000 for the programs and administrative expenses of the Economic Development Administration (EDA). Section 521 of this Act includes a rescission of \$17,000,000 in Economic Development Assistance Programs balances. Such funds shall be derived from recoveries and unobligated grant funds that were not appropriated with emergency or disaster relief designations.

ECONOMIC DEVELOPMENT ASSISTANCE PROGRAMS

The agreement includes \$292,500,000 for Economic Development Assistance Programs. House language on coal-fired plants is modified to encourage EDA to consider projects to repurpose abandoned coal-fired plants. The agreement modifies House language on climate change resiliency to direct EDA to encourage applicants to submit proposals that are resilient to climate change or incorporate green infrastructure solutions. Funds are to be distributed as follows; any deviation of funds shall be subject to the procedures set forth in section 505 of this Act:

EDA Programs and Impoverished Communities.—In lieu of House report language regarding EDA scoring of competitive grant applications, the agreement directs EDA to expand outreach and technical guidance to prospective grantees with the goal of ensuring increased quality and quantity of applications for assistance aimed at benefitting residents of persistent poverty counties or high-poverty areas, as defined in the House language. The agreement further modifies this language to direct the Government Accountability Office (GAO), in coordination with EDA, to provide a report to the Committees on the percentage of funds allocated by each program in fiscal years 2017, 2018, and 2019, and estimates for fiscal year 2020, to serve populations living in persistent poverty counties and high-poverty areas. Such report shall be delivered no later than 180 days after enactment of this Act.

SALARIES AND EXPENSES

The agreement includes \$40,500,000 for EDA salaries and expenses.

MINORITY BUSINESS DEVELOPMENT AGENCY

MINORITY BUSINESS DEVELOPMENT

The agreement includes \$42,000,000 for the Minority Business Development Agency (MBDA), an increase of \$2,000,000 above the fiscal year 2019 level. The agreement directs MBDA to allocate \$26,500,000 of its total appropriation toward cooperative agreements, external awards, and grants, including not less than \$14,000,000 to continue MBDA's traditional Business Center program and Specialty Project Center program. The agreement provides \$7,000,000 for the Broad Agency Announcements (BAA) program. Senate language on BAAs is not adopted. However, the Committees are concerned about the scope of the 2019 BAA topic areas and direct MBDA to submit a spend plan, which includes the topic areas for fiscal year 2020, to the Committees for these funds 30 days prior to soliciting applications for the fiscal year 2020 awards.

ECONOMIC AND STATISTICAL ANALYSIS

SALARIES AND EXPENSES

The agreement includes \$107,990,000 for Economic and Statistical Analysis. The agreement assumes full funding for the Bureau of Economic Analysis' (BEA) efforts to produce annual Gross Domestic Product (GDP) statistics for Puerto Rico, as requested, and includes no less than \$1,500,000 for the Outdoor Recreation Satellite Account.

Income Growth Indicators.—The agreement provides \$1,000,000 to develop income growth indicators and further directs BEA to report the latest available estimates of these measures in calendar year 2020, as described in the Senate report.

BUREAU OF THE CENSUS

The agreement includes \$7,558,319,000 for the Bureau of the Census ("the Bureau").

Puerto Rico and U.S. Territories.—In lieu of House report language regarding Puerto Rico and the U.S. territories, the Committees direct the Bureau to develop an implementation plan to include all residents of the United States, including those in Puerto Rico and the U.S. territories, in the total resident and total population size totals, while maintaining integrity of data sets. Such plan shall be delivered to the Committees no later than 120 days after the date of enactment of this Act.

In lieu of House report language regarding the Bureau's anticipated report on the feasibility of including Puerto Rico in additional surveys and Bureau of Justice Statistics data products, submitted to the Committees on November 26, 2019, the agreement directs the Bureau to provide a supplement to this report, not later than 90 days after enactment of this Act, containing an overall cost estimate and implementation plan for Puerto Rico's inclusion in

these surveys and products. The Bureau is further directed to work with the communities and stakeholders in Puerto Rico, while conducting the Puerto Rico Community Survey, to better understand Puerto Rico's data needs.

CURRENT SURVEYS AND PROGRAMS

The bill provides \$274,000,000 for the Current Surveys and Programs account of the Bureau of the Census, to include funds to continue the level of effort for the Survey of Income and Program Participation, as described in the House report. The agreement does not adopt House report language on the division of funds within the appropriation.

PERIODIC CENSUSES AND PROGRAMS

(INCLUDING TRANSFER OF FUNDS)

The bill provides \$7,284,319,000 for the Periodic Censuses and Programs account of the Bureau of the Census. The agreement does not adopt the House report language on the division of these funds at the Program, Project, and Activity (PPA) level.

2020 Decennial Census.—In July 2019, the Census Bureau provided an update to the Committees on its 2020 Census Life Cycle Cost Estimate. While the total estimates for the overall Decennial costs remain unchanged, the Census Bureau assumes efficiencies in the program allow for a greater contingency reserve to support potential risks. The agreement provides \$6,696,000,000 for the Decennial Census and does not adopt House recommended levels for the key operational frames, as described in the House report. The agreement includes \$669,000,000 dedicated towards Secretarial contingency needs that may arise during the Census operation such as major disasters or other unforeseen risks realized, and \$263,000,000 in additional sensitivity risks to support additional pay increases and any reduction in self-response rates beyond the current projections of the Census Bureau. The agreement clarifies a previous requirement regarding the notification to the Committees on the obligation of funds within the Bureau's contingency reserve and directs the Census Bureau to report to the Committees no later than 15 days after any obligation of such funds. Such report shall include a description of the work funded from this reserve during the fiscal year. The agreement also supports no less than the level of effort for outreach and communications that was utilized in preparation for the 2010 Decennial Census, adjusted for inflation.

Mobile Questionnaire Assistance Centers.—Within funds provided, the agreement directs the Census Bureau to support this new initiative aimed at increasing response in historically undercounted and hard to count communities. As part of the report on outreach activities in hard to count communities as directed by the House, the Census Bureau shall include details on how the Mobile Questionnaire Assistance Centers will be utilized as a part of these efforts.

Quarterly Briefing.—The agreement continues the requirement for quarterly updates from the Census Bureau to ensure the Committees are regularly apprised of the status of the 2020 Decennial

operations, Census systems readiness, Census Enterprise Data Collection and Processing, implementation of GAO recommendations, and the American Community Survey. As part of these briefings, the Census Bureau should also include updates on actions it is taking, along with the Department of Homeland Security, to secure the online platform and personal data, as described in the House report, as well as work the agency has done to mitigate risks identified by GAO, as referenced in the Senate report.

NATIONAL TELECOMMUNICATIONS AND INFORMATION ADMINISTRATION

SALARIES AND EXPENSES

DOJ shall include in its fiscal year 2020 spending plans for DOJ components details on non-appropriated funds with regard to the Working Capital Fund, retained earnings and unobligated transfers, and civil debt collection proceeds, at the level of detail specified in the Consolidated Appropriations Act, 2019 (Public Law 116–6), and in House and Senate reports.

The agreement is \$109,559,000 above the fiscal year 2019 enacted level and equal to the budget request. Within the funding provided, EOIR shall continue all ongoing programs, and shall comply with House and Senate report language that is not explicitly rescinded or amended below.

Immigration Adjudication Performance and Reducing Case Backlog.—The Department shall continue efforts to accelerate the hiring and deployment of Immigration Judge (IJ) teams, giving priority to the highest workload areas, and improving coordination with the Department of Homeland Security, to institute fair and efficient court proceedings in detention facilities and ensure court appearances by non-detained individuals. EOIR shall continue to hire the most qualified IJs from a diverse pool of candidates to ensure the adjudication process is impartial and consistent with due process. In lieu of the House language on alternatives to detention programs, the Committees believe that consistent policies regarding docket management and case adjudication will reduce the impending backlog. EOIR is directed to continue to prioritize cases that are scheduled on the detained docket.

EOIR shall continue to submit monthly performance and operating reports detailing the backlog of cases and the hiring of new IJ teams in the same format and detail provided in Senate Report 115–275 and codified in Public Law 116–6. These reports shall continue to include statistics regarding the number of cases where visa overstay is a relevant factor and the median days pending for both

detained and non-detained cases. These reports shall also list IJs who are temporarily deployed away from their permanent courtrooms, noting the permanent and temporary duty stations of each IJ and the length of such temporary duty assignments. To the extent that EOIR has adopted new performance measures related to the efficient and timely completion of cases and motions, statistics reflecting those measures shall be included in the report. Finally, these reports shall now also include the cost break out for IJ teams, as detailed in the Senate report.

Videoteleconferencing (VTC) Data and Reporting.—The Committees direct EOIR to collect real-time data indicating each time a master calendar or individual merits hearing is conducted via VTC to allow for better statistical data collection to help determine whether VTC has an outcome determinative impact. This information is to be provided in the quarterly reports submitted to the Committees and should include the number and type of hearings conducted by VTC, including data on appeals cases related to the use of VTC, and the number of in-person hearing motions filed. EOIR shall make publicly available all policies and procedures related to EOIR's use of VTC, including policies and procedures for EOIR's new immigration adjudication centers. Any deviations from EOIR's VTC standard policy and procedures shall be noted and justified in the EOIR's quarterly report to the Committees.

Restrictions on OVW Grants.—It was incredibly troubling to learn about the new restriction to not fund more than two discretionary awards to one entity as either the lead or sub-recipient grantee as part of OVW's grant solicitations for fiscal year 2020. This change will severely disadvantage small states; rural communities; tribal communities; and organizations providing services to specialized populations, which could limit access to critical victim services. While the Department has been directed to reduce program duplication, this restriction is not the appropriate way to accomplish that goal, and OVW is directed to rescind this restriction.

There is concern with the continuing lack of availability of investment interest received from the Trust Fund for quarterly disbursements to the Challenger Center for Space Science Education. The agreement directs NASA to work with the Office of Management and Budget to secure the release of amounts previously withheld from the Trust Fund that were intended to support the continuity of the Trust Fund. NASA should work with the Department of the Treasury Fiscal Service to invest the Trust Fund corpus in par-value securities, as may be necessary, to ensure that NASA continues to meet the mandate to provide a minimum of \$1,000,000 in annual payments to the Challenger Center for Space Science Education from interest earned.

Section 504 provides that if any provision of this Act or the application of such provision to any person or circumstance shall be held invalid, the remainder of this Act and the application of other provisions shall not be affected.

Section 505 prohibits a reprogramming of funds that: (1) creates or initiates a new program, project, or activity; (2) eliminates a pro-

[CLERK'S NOTE.—Reproduced below is the material relating to division C contained in the Explanatory Statement regarding H.R. 1158, the Consolidated Appropriations Act, 2020.¹]

DIVISION C—FINANCIAL SERVICES AND GENERAL GOVERNMENT APPROPRIATIONS ACT, 2020

The joint explanatory statement accompanying this division is approved and indicates congressional intent. Unless otherwise noted, the language set forth in House Report 116–122 and Senate Report 116–111 carries the same weight as language included in this joint explanatory statement and should be complied with unless specifically addressed to the contrary in this joint explanatory statement. While some language is repeated for emphasis, it is not intended to negate the language referred to above unless expressly provided herein.

Reports.—Where the House or Senate has directed submission of a report, that report is to be submitted to the Committees on Appropriations of the House and Senate. Agencies funded by this Act that currently provide separate copies of periodic reports and correspondence to the chairs and ranking members of the House and Senate Appropriations Committees and Subcommittees on Financial Services and General Government are directed to use a single cover letter jointly addressed to the chairs and ranking members of the Committees and Subcommittees of both the House and the Senate. To the greatest extent feasible, agencies should include in the cover letter a reference or hyperlink to facilitate electronic access to the report and provide the documents by electronic mail delivery. These measures will help reduce costs, conserve paper, expedite agency processing, and ensure that consistent information is conveyed concurrently to the majority and minority committee offices of both chambers of Congress.

Pursuant to section 608, agencies funded by this bill are required to consult the Committees on Appropriations of the House and the Senate prior to any significant reorganization, restructuring, relocation, or closing of offices, programs, or activities. These decisions have the potential to impact funding needs in future years and may conflict with the rationale behind the appropriated levels in the current year; therefore, these actions, particularly those that entail out-year impacts, merit advanced engagement with the Committees. Should any questions arise relating to the applicability of these provisions to a potential action or decision, agencies are expected to confer with the Committees on Appropriations of the House and Senate prior to completing the decision-making process. The agreement also clarifies that reorganizations or consolidations

of programs or offices that entail relocating a material number of employees to a different locality pay area are significant for the purposes of section 608.

The agreement notes concerns regarding excessive spending on Federal furniture in previous fiscal years by executive agency heads without proper notification to the Committees on Appropriations of the House and the Senate. Federal agencies are expected to comply with the provisions in section 710 of this bill.

TITLE I—DEPARTMENTAL MANAGEMENT, OPERATIONS, INTELLIGENCE, AND OVERSIGHT

OFFICE OF THE SECRETARY AND EXECUTIVE MANAGEMENT

OPERATIONS AND SUPPORT

The agreement includes an increase for Operations and Support of \$27,498,000 above the budget request, including increases of: \$2,900,000 for the Office for Civil Rights and Civil Liberties for the Compliance Branch; \$7,500,000 for the Office of Strategy Policy and Plans for a community awareness and training program and activities related to targeted violence and terrorism prevention grants funded through Federal Assistance; \$10,000,000 for the establishment of a new Office of Immigration Detention Ombudsman; and \$7,548,000 to sustain fiscal year 2019 operational levels, including adjusted personnel costs and the Immigration Data Integration Initiative.

Chief Medical Officer (CMO).—As the primary DHS medical authority, the CMO has oversight responsibility for the Department's medical and public health policies and operations. As such, DHS is directed to ensure that the CMO reviews all contracts that broadly impact how the Department delivers healthcare to individuals in its custody and to departmental personnel. In coordination with operational components, the CMO shall develop departmental requirements for medical services, to include professional healthcare system administration; disease surveillance, reporting, and outbreak response; and measurable performance standards for current and future healthcare record systems. The CMO, in conjunction with operational component leadership as appropriate, is directed to brief the Committees within 90 days of the date of enactment of this Act on these efforts.

Medical Strategy.—In fiscal year 2019, nearly 1,000,000 migrants were apprehended by U.S. Customs and Border Protection, resulting in an unprecedented medical screening and healthcare crisis. As the Department responded, it became clear that a more cohesive strategy was necessary to address emergent medical conditions of detainees, as well as the health of its own workforce. Based on lessons learned from this experience, the Secretary shall develop a DHS-wide medical response strategy for emergent circumstances, including surges in migration, National Special Security Events, Special Event Assessment Rating events, and Stafford Act-declared disasters. The strategy should also clarify the roles and responsibilities of DHS medical personnel; the need for any new legal authorizations; and any reorganization requirements, as appropriate.

Office of Immigration Detention Ombudsman.—The agreement establishes an Immigration Detention Ombudsman position and provides \$10,000,000 for an Office of Immigration Detention Ombudsman, as described in the House Report. The bill withholds \$500,000 from the Office of the Secretary for Executive Management (OSEM) until the Secretary approves the Ombudsman.

Office of Strategy, Policy, and Plans.—The agreement includes a realignment of \$2,800,000 from the Office of Partnership and Engagement for the new Office of Terrorism Prevention Partnerships (OTPP). OTPP is directed to brief the Committees within 30 days of the date of enactment of this Act on its programs and activities, including its plans for carrying out local community awareness and training, and for the use of funding provided under Management Directorate—Federal Assistance for targeted violence and terrorism prevention grants.

Public Complaint and Feedback System Working Group.—The Department has not fulfilled a requirement in House Report 116–9 to provide semi-annual updates to the Committees on the Public Complaint and Feedback System Working Group. The Department is directed to begin providing such updates not later than 60 days after the date of enactment of this Act. The bill withholds \$500,000 from OSEM until the Department provides the first such update, which must address the requirements detailed in House Report 114–668.

FEDERAL ASSISTANCE

(INCLUDING TRANSFER OF FUNDS)

The agreement provides \$10,000,000 for targeted violence and terrorism prevention grants, to be transferred to the Federal Emergency Management Agency for purposes of administration.

MANAGEMENT DIRECTORATE

OPERATIONS AND SUPPORT

The agreement includes an increase for Operations and Support of \$6,152,000 above the budget request to sustain fiscal year 2019 operational levels, including personnel cost adjustments.

The Department is directed to refrain from initiating new PPAs for which funds have not been provided in an appropriations act, either explicitly or based on a funding request, if such PPAs would have significant resource requirements beyond the budget year. When emergent circumstances otherwise require the initiation of significant PPAs, the Department is directed to provide advance notification to the Committees, along with a detailed justification for why they are required.

PROCUREMENT, CONSTRUCTION, AND IMPROVEMENTS

The agreement provides the requested appropriation for the proposed activities under Procurement, Construction, and Improvements.

INTELLIGENCE, ANALYSIS, AND OPERATIONS COORDINATION

OPERATIONS AND SUPPORT

The agreement provides an increase of \$7,500,000 above the budget request for election security. A total of \$68,579,000 is available until September 30, 2021.

OFFICE OF INSPECTOR GENERAL
OPERATIONS AND SUPPORT

The agreement includes an increase for Operations and Support of \$20,000,000 above the budget request for increased monitoring and oversight of border security and immigration enforcement activities.

TITLE I—ADMINISTRATIVE PROVISIONS

Section 101. The agreement continues a provision requiring the Inspector General to review grants and contracts awarded by means other than full and open competition and report the results to the Committees.

Section 102. The agreement continues a provision requiring the Chief Financial Officer to submit monthly budget execution and staffing reports within 30 days after the close of each month.

Section 103. The agreement continues a provision directing the Secretary to require contracts providing award fees to link such fees to successful acquisition outcomes.

Section 104. The agreement continues a provision requiring the Secretary, in conjunction with the Secretary of the Treasury, to notify the Committees of any proposed transfers from the Department of Treasury Forfeiture Fund to any agency at DHS. No funds may be obligated prior to such notification.

Section 105. The agreement continues a provision related to official travel costs of the Secretary and Deputy Secretary.

Section 106. The agreement includes a provision establishing an Immigration Detention Ombudsman.

Section 107. The agreement continues a provision requiring the Secretary to submit a report on visa overstay data and to post border security metrics on the Department's website.

U.S. CUSTOMS AND BORDER PROTECTION

OPERATIONS AND SUPPORT

The agreement provides \$12,735,399,000 for Operations and Support of U.S. Customs and Border Protection (CBP), which includes \$203,000,000 of prior year emergency funding and of which \$500,000,000 is available until September 30, 2021. This emergency funding is fully offset by the rescission of unneeded prior year balances of emergency funding. The bill includes increases above the budget request, including the following: \$99,774,000 to sustain prior year initiatives and for personnel cost adjustments; \$13,000,000 for Border Patrol Processing Coordinator positions; \$56,656,000 for Office of Field Operations staff; \$19,651,000 for agriculture specialists; \$25,000,000 for innovative technology; \$1,500,000 for comprehensive testing of imported honey; \$5,000,000 for tribal roads; \$2,000,000 for rescue beacons; \$2,000,000 for enterprise geospatial improvement services; \$20,000,000 for port of entry technology; \$3,000,000 for trade enhancements; \$2,000,000 for NAFTA Centers; \$5,000,000 to increase Air and Marine flight hours, bringing the total to \$15,000,000 and to include the use of

contracted pilots; and \$21,000,000 for body worn cameras. The agreement includes a reduction below the request of \$45,000,000 associated with administrative contract savings for Enterprise Services, \$82,218,000 for humanitarian care to be offset with prior year emergency funding and provides no funding for additional Border Patrol agents.

The account total reflects a rescission and re-appropriation of prior year discretionary and emergency funds, which shall be obligated for humanitarian care, to include consumables and medical care, electronic health records, and to address health, life and safety issues at existing Border Patrol facilities, including construction and for improved video recording capabilities.

The agreement includes technical budget realignments, as requested by DHS.

Border Patrol Processing Coordinators.—The bill includes \$13,000,000 for Border Patrol processing coordinators. Prior to the execution of funds, CBP shall brief the Committees on the training requirements for these new positions, which should include but not be limited to emergency medical and mental health care; migrant legal rights; Trafficking Victims Protection Reauthorization Act requirements; and how to identify child abuse and neglect. The briefing should also address the total cost of such training and identify the location where training will occur.

Custody and Transfer Metrics.—The agreement requires data reporting on migrants in CBP custody, including data on utilization rates for all short term holding facilities and on the designated removal mechanisms for migrants. CBP shall publish on a publicly accessible website the following on a semimonthly basis: the number of migrants detained in CBP facilities broken out by sector, field office, temporary spaces, humanitarian care centers, and central processing centers; and the utilization rates of all such facilities. On a monthly basis, CBP shall publish the number of migrants transferred out of CBP custody, delineated by transfer destination and, in the case of removal, the removal mechanism.

Electronic Visa Update System (EVUS).—The bill restores \$13,850,000 of the \$27,661,000 reduction in the budget request to EVUS. CBP is strongly encouraged to work with the appropriate authorizing committees to get fee authority for EVUS. Non-immigrant visa holders who benefit from this program, not U.S. taxpayers, should pay for EVUS.

Gordie Howe International Bridge.—The funding level for Gordie Howe International Bridge is funded at the requested level, and shall be obligated as proposed in the request, in the Operations and Support account and in Procurement, Construction, and Improvements.

Innovative Technology.—At least 15 days prior to the obligation of funds for innovative border security technology, CBP is directed to brief the Committees on the planned obligation of funds. The briefing shall also identify the component sponsor and plans for transitioning technologies to the field. Funding in the bill for such technology shall not exceed \$5,000,000 for any individual project.

Intelligent Enforcement and Opioids.—The funding levels for Intelligent Enforcement and opioids are funded at the requested levels and shall be obligated as proposed in the budget request.

Medical Guidance.—The CBP Commissioner issued an interim directive on enhanced medical care to help address the growing influx of migrants crossing the southern border. In conjunction with the DHS CMO, CBP is directed to issue a permanent medical directive and implementing guidance, which shall include the following:

- Clear definitions, metrics, automated reporting requirements, and formal mechanisms for coordinating with the CMO on making determinations that conditions at the border constitute a public health crisis, which should take into consideration: time in custody; holding facility capacity limits; emerging disease outbreaks, such as influenza; and the readiness of each U.S. Border Patrol and Office of Field Operations facility. These metrics shall be reported on a common operating picture such as the Unified Immigration Portal;
- Response plans for public health crisis conditions that include: a convalescence center concept, executed in concert with the CMO and the U.S. Public Health Service; the provision of vaccinations when deemed appropriate by the CMO; and emergency mechanisms to address overcrowding at Border Patrol and port of entry facilities through custodial transfers to Immigration and Customs Enforcement, and the Office of Refugee Resettlement, as appropriate; and
- A peer review process for deaths in custody, including: first level review by the CBP Senior Medical Advisor; second level review convened by the CMO; and external review, as appropriate through an enterprise-level contract executed by the CMO.

Not later than 90 days after the date of enactment of this Act, the CMO, in conjunction with appropriate CBP leadership, shall brief the Committees on an implementation plan for the permanent directive. Additionally, the final guidance and associated implementing guidance shall be made available on a publicly accessible website not later than 15 days after such guidance is finalized.

Migrant Protection Protocols (MPP).—DHS shall establish goals and metrics for assessing the effectiveness of the MPP Program. Metrics shall include the following daily data for migrants entering the United States, by location: the total number of entering migrants apprehended or deemed inadmissible; the number of such migrants amenable to MPP; the number of amenable migrants who assert a fear of returning to Mexico; the number of migrants assigned to MPP appearing at a port of entry to attend immigration adjudication proceedings and the outcomes of such proceedings, including data on the number of removals ordered in absentia; the number of migrants assigned to MPP who remain overnight in the United States; and the number of adults and Unaccompanied Alien Children entering without inspection subsequent to being returned to Mexico through MPP.

Other Reporting.—The briefing on CBP-wide workload, capabilities, assets, and human resource gaps, as described in the Senate Report, shall be provided quarterly. The pilot project on the use of community oriented policing teams, as detailed in the Senate Report 116–125, shall be briefed within one year of the date of enactment of this Act.

Office of Field Operations Staffing.—The agreement includes \$104,377,000 to support over 800 new positions in the Office of

Field Operations to include 610 additional Officers and Agriculture Specialists. CBP is again encouraged to utilize fee funding to hire up to a total of 1,200 CBP Officers and 240 Agriculture Specialists during fiscal year 2020.

Video Monitoring.—Any failure of closed caption television and associated storage equipment in excess of 120 hours at any CBP facility that detains migrants must be reported to the Office of Professional Responsibility. Such reporting shall be updated weekly.

PROCUREMENT, CONSTRUCTION, AND IMPROVEMENTS

The agreement provides \$1,904,468,000 for Procurement, Construction, and Improvements, which includes \$30,000,000 of prior year emergency funding. This emergency funding is fully offset by the rescission of unneeded prior year balances of emergency funding.

The agreement includes the following increases above the request: \$20,000,000 for innovative technology, of which not more than \$5,000,000 may be available for any single project; \$15,000,000 for rapidly deployable next generation mobile surveillance systems, including currently deployed light truck based systems; \$10,000,000 for Automated Commercial Environment enhancements; \$28,383,000 for one additional Multi-Role Enforcement Aircraft with a Dismounted Moving Target Indicator; \$32,500,000 for lightweight helicopters; and \$9,000,000 for expansion at the Advanced Training Center. Facilities.—The agreement includes \$25,000,000 for construction of the Papago Farms Forward Operating Base and for facilities improvements to protect life and improve safety.

The systems shall be adaptable to component operational environments and be interoperable with other departmental systems, as appropriate, and with the National Emergency Medical Services Information System. The agreement provides direct funding of \$207,600,000 above the request in lieu of the proposed use of Immigration Examination User Fee revenue to partially offset costs for eligible activities in this account due to concerns with the impact to U.S. Citizenship and Immigration Services operations and the growing backlog in applications for immigration benefits.

Consistent with the funding recommendations in the House and Senate Reports, the agreement does not include \$700,786,000 that was requested to sustain prior year initiatives that were not funded in the fiscal year 2019 appropriation, nor does it include \$298,973,000 in requested funding for additional staffing.

Of the amount provided, \$53,696,000 is available until September 30, 2021, to include: \$13,700,000 for the Visa Security Program; \$32,996,000 to support the wiretap program; and \$7,000,000 for the Office of Detention Oversight.

The Department and ICE have failed to comply with any of the requirements set forth in the explanatory statement accompanying Public Law 116-6 regarding detailed operational and spending plans for fiscal year 2019 for ICE Operations and Support. The Department and ICE are again directed to execute such requirements for fiscal year 2020.

Enforcement and Removal Operations

Alternatives to Detention (ATD).—For the report required in the Senate Report regarding an analysis of each active ATD program within the last five years, the Secretary shall also submit this report to GAO for review. GAO shall review the reliability and accuracy of data in the report and provide a preliminary briefing to the Committees on its review within 120 days of receipt. GAO shall also conduct a review of the ATD program and report its findings to the Committees on a date agreed to at the time of the preliminary briefing.

Immigration Enforcement at Sensitive Locations.—ICE is directed to follow its policy regarding enforcement actions at or near sensitive locations and is encouraged to review the scope of the category to areas not previously included where community impacts could be better balanced against ICE law enforcement requirements.

Further, ICE is directed to provide its officers with guidance and training for engaging with victims of crime and witnesses of crime, and to clarify policy guidance on enforcement actions in or near sensitive locations in order to minimize any effect that immigration enforcement may have on the willingness and ability of victims and witnesses to pursue justice.

PROCUREMENT, CONSTRUCTION, AND IMPROVEMENTS

The agreement includes \$47,270,000 for procurement, construction, and improvements, consisting of \$10,300,000 to accelerate modernization of ICE's immigration information technology systems, data platform, and reporting and analytics capabilities; and \$36,970,000 for construction and facilities improvements to address major projects on ICE's facilities maintenance and repair backlog list.

OPERATIONS AND SUPPORT

The agreement includes an increase of \$565,370,000 above the budget request, including an increase of \$93,382,000 for personnel cost adjustments. The agreement rejects the airline passenger fee increase proposed by TSA, which would have offset the total appropriation by an estimated \$550,000,000, thus making the net increase in discretionary spending above the request \$1,115,370,000.

Aviation Screening Operations

The agreement includes an increase of \$415,633,000 above the request for Aviation Screening Operations, including the following increases: \$25,378,000 to fully fund fiscal year 2020 Screening Partnership Program requirements; \$46,416,000 to fully fund retention incentives for TSA employees; and \$63,351,000, including \$14,023,000 requested in PC&I, to fully fund fiscal year 2020 screening technology maintenance requirements.

The agreement sustains the following initiatives funded in fiscal year 2019: \$77,764,000 for additional transportation security officers and associated training and support costs to address the continued growth in passenger volume at airports; \$83,511,000 to maintain existing TSA staffing at airport exit lanes in accordance with section 603 of Public Law 113-67; \$7,000,000 to maintain Screening Partnership Program requirements; \$13,341,000 for canine teams to support increased passenger screening requirements; \$6,220,000 for screening requirements associated with the FAA Reauthorization Act of 2018; \$10,440,000 for additional program management staffing to support new technology acquisitions; \$4,280,000 to continue procurement of Credential Authentication Technology units; and \$3,590,000 to support rent increases in the field.

This amount is in addition to funds available from the Aviation Security Capital Fund and will support the acquisition and installation of 320 units. The agreement also includes increases above the request of \$1,500,000 to advance CT algorithm development and \$40,000,000 for TSA to continue reimbursement of airports that incurred costs associated with the development of a partial or completed in-line baggage system prior to August 3, 2007.

Section 223 of the bill provides direction for capital investment plan requirements in lieu of language included in the House Report.

RESEARCH AND DEVELOPMENT

The agreement provides an increase of \$2,000,000 above the request for design and development activities for small CT machines, as described in the Senate Report.

PROCUREMENT, CONSTRUCTION, AND IMPROVEMENTS

The agreement provides an increase of \$537,850,000 above the request, including the following: \$13,500,000 for In-Service Vessel Sustainment; \$260,000,000 for a total of four FRCs; \$100,000,000 for long lead time materials for a second Polar Security Cutter; \$105,000,000 for the HC-130J aircraft program; \$130,000,000 to

The agreement includes \$77,550,000 for Major Construction; Housing; Aids to Navigation; and Survey and Design and provides \$122,100,000 for Major Acquisition Systems Infrastructure. Projects on the UPL described in the Senate Report are supported within these funding levels, including land acquisition, as necessary.

The agreement includes \$2,000,000 to establish a major acquisition program office to enhance icebreaking capacity on the Great Lakes within 180 days of the date of enactment of this Act. An additional \$2,000,000 is included under Operations and Support for recurring program support. The agreement also includes \$10,800,000 for the two Maritime Security Response Teams to procure vessels currently in production and used by Department of Defense teams that are capable of operating in contested, near shore environments.

Elizabeth City Air Station.—The bill does not provide funding for enhancements to the runway at the Elizabeth City Coast Guard Air Station. The Coast Guard has estimated the total project cost would exceed \$23,000,000, far above the level recommended in the Senate bill. The Coast Guard shall work with state and local partners, including institutions of higher learning, to determine the full scope and cost of mutually beneficial enhancements to Runway 1/19, and explore the potential for sharing costs necessary to ensure the project is completed in an efficient manner. The Coast Guard shall brief the Committees within 120 days of the date of enactment of this Act on the scope, costs, and benefits of the project, including the viability of a financial partnership with non-federal stakeholders.

OPC Program.—The contract awarded to construct the OPC was recently amended to address increased cost estimates after the Acting Secretary determined that relief permitted under Public Law 85-804 was appropriate and necessary to the national defense. An associated delay in delivery of the first two hulls reduced the fiscal year 2020 requirement for the OPC by \$145,000,000. Funds included in the agreement continue necessary program requirements. The agreement maintains the commitment to ensuring the Coast Guard can continue the program of record for these critical vessels. As a condition of the granted relief, the vendor will be subject to increased oversight, including additional scrutiny of the costs borne by the Coast Guard. The Coast Guard shall brief the Committees quarterly on the metrics used to evaluate adherence to production timelines and costs, including those attributed to reestablishing the production line and maintaining the skilled workforce required to ensure contract performance.

Subtotal, Federal Assistance	\$2,480,015,000	\$3,188,467,000

Continuing Training Grants.—The agreement includes \$8,000,000 for Continuing Training Grants to support competitively-awarded training programs to address specific national preparedness gaps, such as cybersecurity, economic recovery, housing, and rural and tribal preparedness. Of this amount, not less than \$3,000,000 shall be prioritized to be competitively awarded for Federal Emergency Management Agency-certified rural and tribal training.

U.S. Fire Administration.—Of the total provided for the U.S. Fire Administration, the agreement includes full funding for State Fire Training Grants, in addition to the funding direction provided in the Senate Report. Not later than 180 days after the date of enactment of this Act, FEMA shall brief the Committees on a plan for awarding such grants.

Urban Area Security Initiative (UASI).—Consistent with the Implementing Recommendations of the 9/11 Commission Act, the

agreement requires FEMA to conduct risk assessments for the 100 most populous metropolitan statistical areas prior to making UASI grant awards. It is expected that UASI funding will be limited to urban areas representing up to 85 percent of the cumulative national terrorism risk to urban areas and that resources will continue to be allocated in proportion to risk.

DISASTER RELIEF FUND

The agreement provides \$17,863,259,000, which is \$3,313,575,000 above the request. Of the total, \$17,352,112,000 is provided through the budget cap adjustment for major disaster response and recovery activities and \$511,147,000 is for base DRF activities.

Disaster Readiness and Support.—After the fiscal year 2020 President's budget was submitted, a request was made to realign FEMA funding for facilities that directly support disaster response and recovery operations. The realignment of \$33,463,000 from Operations and Support and \$3,000,000 from Procurement, Construction, and Improvements (PC&I) to the DRF base is reflected in the bill. With the exception of this purpose, FEMA is directed to continue to adhere to the direction in House Report 114–215 with regard to the purposes of the Operations and Support and DRF base accounts.

FEMA is directed to submit a report to the Committees not later than 60 days after the date of enactment of this Act, documenting the criteria and guidance for determining when an expense should be charged to the DRF base, to Operations and Support, or to another account for future years. The report shall also include amounts by fiscal year and by account for all activities described in House report 114–215 related to these disaster related activities since fiscal year 2016. The purpose of this information is to facilitate oversight by enabling cost comparisons in future years.

Predisaster Hazard Mitigation.—FEMA is directed to brief the Committees not later than 30 days after the date of enactment of this Act on the implementation of programs under section 203 of the Stafford Act. The briefing shall include: the status of transitioning the Predisaster Mitigation Grant Program (PDM) to National Public Infrastructure Pre-Disaster Mitigation Assistance (NPIPMA) program; a schedule for implementing and awarding such grants not later than the end of fiscal year 2020; how input provided by SLTT has been incorporated; how the needs of mitigation partners will be met; and how innovation and incentives will be incorporated into the program. Further, the briefing shall include a timeframe for documenting a clear policy on how FEMA will account for variations in funding levels based on the nature of NPIPMA being a percentage of disaster spending. The policy should ensure SLTT can plan for effective projects by avoiding disruptive fluctuations in funding levels. Last, the briefing shall include a clear plan for how FEMA can best use funds recovered from previous PDM projects, with a clear description of the amount and source of the funds.

NATIONAL FLOOD INSURANCE FUND

The agreement includes an increase of \$616,000 above the budget request for personnel cost adjustments.

The briefing shall include the following data, where applicable, on the immigration status of the petitioner (U.S. citizen or legal permanent resident); nationality of the applicant; processing time; and field office or service center to which the application was assigned. The briefing will also include reasons for delays in processing applications and petitions, including employment authorizations, and what steps USCIS is taking to address the delays.

Fee Waivers.—USCIS is encouraged to continue the use of fee waivers for applicants who demonstrate an inability to pay the naturalization fee, and to consider, in consultation with the Office of the Citizenship and Immigration Services Ombudsman (CIS Ombudsman), whether the current naturalization fee is a barrier to naturalization for those earning between 150 percent and 200 percent of the federal poverty guidelines and who are not currently eli-

gible for a fee waiver, and provide a briefing to the Committees within 60 days of the date of enactment of this Act.

Further, USCIS is encouraged to refrain from imposing fees on any individual filing a humanitarian petition, including, but not limited to, individuals requesting asylum; refugee admission; protection under the Violence Against Women Act; Special Immigrant Juvenile status; a T or U visa; or requests adjustment of status or petitions for another benefit after receiving humanitarian protection. USCIS shall consult with the CIS Ombudsman on the impact of imposing such fees and provide a briefing to the Committees within 60 days of the date of enactment of this Act.

In addition, USCIS continues to have the authority to accept private donations to support this program. The Science and Technology Directorate is directed to consider projects referenced in the House and Senate Reports and brief the Committees not later than 30 days after the date of enactment of this Act on the proposed allocation of Research and Development funds by project and to subsequently update the Committees on any changes from the planned allocation. The intent of Senate language on Software Assurances is to support self-adapting security mechanisms that can quickly respond to cyberattacks by deploying countermeasures to increase system resiliency.

COUNTERING WEAPONS OF MASS DESTRUCTION OFFICE

The agreement provides \$179,467,000 for Operations and Support, including an increase of \$841,000 for personnel cost adjustments.

Section 405. The agreement continues a provision directing the FLETC Accreditation Board to lead the federal law enforcement training accreditation process to measure and assess federal law enforcement training programs, facilities, and instructors.

Section 406. The agreement continues a provision allowing the acceptance of transfers from government agencies into “Federal Law Enforcement Training Centers—Procurement, Construction, and Improvements”.

Section 407. The agreement continues a provision classifying FLETC instructor staff as inherently governmental for certain considerations.

TITLE V—GENERAL PROVISIONS

(INCLUDING RESCISSIONS OF FUNDS)

Section 501. The agreement continues a provision directing that no part of any appropriation shall remain available for obligation beyond the current year unless expressly provided.

Section 502. The agreement continues a provision providing authority to merge unexpended balances of prior appropriations with new appropriation accounts, to be used for the same purpose, subject to reprogramming guidelines.

Section 503. The agreement continues a provision limiting reprogramming authority for funds within an appropriation and providing limited authority for transfers between appropriations. All components funded by the Department of Homeland Security Appropriations Act, 2020, must comply with these transfer and reprogramming requirements.

The Department must notify the Committees on Appropriations prior to each reprogramming of funds that would reduce programs, projects, activities, or personnel by ten percent or more. Notifications are also required for each reprogramming of funds that would increase a program, project, or activity by more than \$5,000,000 or ten percent, whichever is less. The Department must submit these notifications to the Committees on Appropriations at least 15 days in advance of any such reprogramming.

For purposes of reprogramming notifications, “program, project, or activity” is defined as an amount identified in the detailed funding table located at the end of this statement or an amount directed for a specific purpose in this statement. Also, for purposes of reprogramming notifications, the creation of a new program, project, or activity is defined as any significant new activity that has not been explicitly justified to the Congress in budget justification material and for which funds have not been appropriated by the Congress. For further guidance when determining which movements of funds are subject to section 503, the Department is reminded to follow GAO’s definition of “program, project, or activity” as detailed in the GAO’s *A Glossary of Terms Used in the Federal Budget Process*. Within 30 days of the date of enactment of this Act, the Department shall submit to the Committees a table delin-

eating PPAs subject to section 503 notification requirements, as defined in this paragraph.

Limited transfer authority is provided to give the Department flexibility in responding to emerging requirements and significant changes in circumstances, but is not primarily intended to facilitate the implementation of new programs, projects, or activities that were not proposed in a formal budget submission. Transfers may not reduce accounts by more than five percent or increase accounts by more than ten percent. The Committees on Appropriations must be notified not fewer than 30 days in advance of any transfer.

To avoid violations of the Anti-Deficiency Act, the Secretary shall ensure that any transfer of funds is carried out in compliance with the limitations and requirements of section 503(b). In particular, the Secretary should ensure that any such transfers adhere to the opinion of the Comptroller General's decision in *the Matter of: John D. Webster, Director, Financial Services, Library of Congress, dated November 7, 1997*, with regard to the definition of an appropriation subject to transfer limitations.

The Department shall submit notifications on a timely basis and provide complete explanations of the proposed reallocations, including detailed justifications for the increases and offsets, and any specific impact the proposed changes would have on the budget request for the following fiscal year and future-year appropriations requirements. Each notification submitted to the Committees should include a detailed table showing the proposed revisions to funding and FTE – at the account, program, project, and activity level – for the current fiscal year, along with any funding and FTE impacts on the budget year.

The Department shall manage its programs, projects, and activities within the levels appropriated, and should only submit reprogramming or transfer notifications in cases of unforeseeable and compelling circumstances that could not have been predicted when formulating the budget request for the current fiscal year. When the Department submits a reprogramming or transfer notification and does not receive identical responses from the House and Senate Committees, it is expected to reconcile the differences before proceeding.

The Department is not to submit a reprogramming or transfer notification after June 30 except in extraordinary circumstances that imminently threaten the safety of human life or the protection of property. If an above-threshold reprogramming or a transfer is needed after June 30, the notification should contain sufficient documentation as to why it meets this statutory exception.

Deobligated funds are also subject to the reprogramming and transfer limitations and requirements set forth in section 503.

Section 503(f) authorizes the Secretary to transfer up to \$20,000,000 to address immigration emergencies after notifying the Committees of such transfer at least five days in advance.

Section 504. The agreement continues a provision by reference, prohibiting funds appropriated or otherwise made available to the Department to make payment to the WCF, except for activities and amounts allowed in the President's fiscal year 2020 budget request. Funds provided to the WCF are available until expended. The Department can only charge components for direct usage of the WCF

and these funds may be used only for the purposes consistent with the contributing component. Any funds paid in advance or for reimbursement must reflect the full cost of each service. The Department shall submit a notification prior to adding a new activity to the fund or eliminating an existing activity from the fund. For activities added to the fund, such notifications shall detail the source of funds by PPA. In addition, the Department shall submit quarterly WCF execution reports to the Committees that include activity level detail.

Section 505. The agreement continues a provision providing that not to exceed 50 percent of unobligated balances from prior-year appropriations for each Operations and Support appropriation, shall remain available through fiscal year 2021, subject to section 503 reprogramming requirements.

Section 506. The agreement continues a provision that deems intelligence activities to be specifically authorized during fiscal year 2020 until the enactment of an Act authorizing intelligence activities for fiscal year 2020.

Section 507. The agreement continues a provision requiring notification to the Committees at least three days before DHS executes or announces grant allocations; grant awards; contract awards, including contracts covered by the Federal Acquisition Regulation; other transaction agreements; letters of intent; task or delivery orders on multiple contract awards totaling \$1,000,000 or more; task or delivery orders greater than \$10,000,000 from multi-year funds; or sole-source grant awards. Notifications shall include a description of the project or projects or activities to be funded and the location, including city, county, and state. If the Secretary determines that compliance would pose substantial risk to health, human life, or safety, an award may be made without prior notification but the Committees shall be notified within 5 full business days after such award or letter is issued.

Section 508. The agreement continues a provision prohibiting all agencies from purchasing, constructing, or leasing additional facilities for federal law enforcement training without advance notification to the Committees.

Section 509. The agreement continues a provision prohibiting the use of funds for any construction, repair, alteration, or acquisition project for which a prospectus, if required under chapter 33 of title 40, United States Code, has not been approved.

Section 510. The agreement continues a provision that includes and consolidates by reference prior-year statutory provisions related to a contracting officer's technical representative training; sensitive security information; and the use of funds in conformance with section 303 of the Energy Policy Act of 1992.

Section 511. The agreement continues a provision prohibiting the use of funds in contravention of the Buy American Act.

Section 512. The agreement continues a provision regarding the oath of allegiance required by section 337 of the Immigration and Nationality Act.

Section 513. The agreement continues a provision that precludes DHS from using funds in this Act to carry out reorganization authority. This prohibition is not intended to prevent the Department from carrying out routine or small reallocations of personnel or

functions within components, subject to section 503 of this Act. This section prevents large-scale reorganization of the Department, which should be acted on legislatively by the relevant congressional committees of jurisdiction. Any DHS proposal to reorganize components that is included as part of a budget request will be considered by the Committees.

Section 514. The agreement continues a provision prohibiting funds for planning, testing, piloting, or developing a national identification card.

Section 515. The agreement continues a provision directing that any official required by this Act to report or certify to the Committees on Appropriations may not delegate such authority unless expressly authorized to do so in this Act.

Section 516. The agreement continues a provision prohibiting the use of funds for the transfer or release of individuals detained at United States Naval Station, Guantanamo Bay, Cuba into or within the United States.

Section 517. The agreement continues a provision prohibiting funds in this Act to be used for first-class travel.

Section 518. The agreement continues a provision prohibiting the use of funds to employ illegal workers as described in Section 274A(h)(3) of the Immigration and Nationality Act.

Section 519. The agreement continues a provision prohibiting funds appropriated or otherwise made available by this Act to pay for award or incentive fees for contractors with below satisfactory performance or performance that fails to meet the basic requirements of the contract.

Section 520. The agreement continues a provision prohibiting the use of funds to enter into a federal contract unless the contract meets requirements of the Federal Property and Administrative Services Act of 1949 or chapter 137 of title 10 U.S.C., and the Federal Acquisition Regulation, unless the contract is otherwise authorized by statute without regard to this section.

Section 521. The agreement continues a provision requiring DHS computer systems to block electronic access to pornography, except for law enforcement purposes.

Section 522. The agreement continues a provision regarding the transfer of firearms by federal law enforcement personnel.

Section 523. The agreement continues a provision regarding funding restrictions and reporting requirements related to conferences occurring outside of the United States.

Section 524. The agreement continues a provision prohibiting funds to reimburse any Federal department or agency for its participation in a National Special Security Event.

Section 525. The agreement continues a provision requiring a notification, including justification materials, prior to implementing any structural pay reform that affects more than 100 FTPs or costs more than \$5,000,000.

Section 526. The agreement continues a provision directing the Department to post on a public website reports required by the Committees on Appropriations unless public posting compromises homeland or national security or contains proprietary information.

Section 527. The agreement continues a provision authorizing minor procurement, construction, and improvements under Operations and Support accounts.

Section 528. The agreement continues a provision related to the Arms Trade Treaty.

Section 529. The agreement continues a provision to authorize discretionary funding for primary and secondary schooling of dependents in areas in territories that meet certain criteria. The provision provides limitations on the type of eligible funding sources.

Section 530. The agreement continues a provision providing \$41,000,000 for “Federal Emergency Management Agency—Federal Assistance” to reimburse extraordinary law enforcement personnel overtime costs for protection activities directly and demonstrably associated with a residence of the President that is designated for protection.

Section 531. The bill continues and modifies a provision extending other transaction authority for the Department through fiscal year 2020.

Section 532. The agreement includes and modifies a provision regarding congressional visits to detention facilities.

Section 533. The agreement includes a provision prohibiting the use of funds to use restraints on pregnant detainees in DHS custody except in certain circumstances.

Section 534. The agreement continues a provision prohibiting the use of funds for the destruction of records related to the sexual abuse or assault of detainees in custody.

Section 535. The agreement continues a provision prohibiting funds for the Principal Federal Official during a Stafford Act declared disaster or emergency, with certain exceptions.

Section 536. The agreement continues a provision concerning offsets for fee increase proposals.

Section 537. The agreement includes a new provision rescinding emergency supplemental funding.

Section 538. The agreement includes a provision rescinding unobligated balances from specified sources.

Section 539. The agreement includes a provision rescinding lapsed balances pursuant to Section 505 of this bill.

Section 540. The agreement includes a provision rescinding unobligated balances from the Disaster Relief Fund.
