**GOVERNMENT FUNDING**

Mr. BENNET. Mr. President, over the weekend, as you may have heard, our government set a new record. It wasn't for the number of roads being built or repaired in this country. It wasn't for higher math scores or graduation rates for kids in the United States of America. It wasn't for passing the most bills or investing the most dollars in our future. It wasn't for paying attention to the next generation of Americans. It was for the longest shutdown in the history of the United States—a selfish act taken by partisan politicians that

is an embarrassment to our country and to our future.

It has been 24 days. We have Federal employees all over the State of Colorado and I am sure the State of Alaska, the Commonwealth of Virginia, as we heard before, who are out of work because of what Washington has done to them. It is nothing they have done. They have fulfilled their end of the bargain. But because we have a screw loose around here because we are the only modern, industrialized country in the world that shuts down its government for politics—our allies don't shut down their government for politics, and our foes don't shut down their government for politics. No local government shuts down its government for politics. No school district shuts down its government for politics. No State would ever think of doing it. No elected official at any level of those governments would show their face in the grocery store on the weekend after they shut down the government and said to the citizens of Alamosa or the citizens of Durango or the parents in Denver public schools: Sorry. Your kids can't come to school today because we are shutting down the government for politics.

It is ridiculous.

I met an air traffic controller today who got her check on Friday after she worked through the entire holiday. She had a kid. I don't know how old he was, but he was a baby who had to be carried. She worked the entire holiday, was separated from her family, got her check on Friday, and it was for 77 cents. The people in this body might as well be standing outside and lifting their middle finger at her and at the TSA workers who were there today at Denver International Airport making sure that we were safe, that the traveling public was safe, and who were not getting paid, unlike the people here during this shutdown.

By the way, that airport, which we are very proud of in Denver and in Colorado, the Denver International Airport, is the newest airport that has been built in the United States of America, and it was built almost a quarter of a century ago because we are not making the investments that anybody else in the world is making.

As I said, no other advanced country in the world shuts down its government for politics. I expect us to have disagreements. We should have disagreements, but we shouldn't shut down the government over this disagreement. It has been 24 days.

While we were shut down, other countries were actually investing in their future.

In the last 24 days, South Korea broke ground on an expanded bullet train outside their capitol of Seoul.

While we were shut down, Canada announced support for a new 5-megawatt geothermal plant—the first of its kind in that country.

India issued tenders to set up 7.5 gigawatts of new solar capacity.
