

The President has also decided to cut or delay \$3.6 billion in military construction projects. The President might not think these projects are timely or important, but it was just weeks or months ago when the administration said just the opposite and asked Congress to appropriate money—examples: \$800 million for essential training facilities like the National Guard readiness centers, simulators and firing ranges in the States of Alaska, Arizona, Colorado, and Montana, to name a few; \$1.4 billion worth of maintenance-related projects such as aircraft hangars and vehicle maintenance shops in Arkansas, Indiana, Missouri, and Oklahoma, not to mention many other States affected; \$1 billion worth of projects for medical and dental care facilities for the men and women in uniform; schools for military families, military barracks, and other essential facilities in Arizona, Missouri, Texas, and beyond.

Fort Campbell, KY, needs a new middle school for military children. The current building dates back to 1967 and is in serious disrepair. We were told that was a priority, but it could be stopped, cut, and eliminated if we are not careful to build this wall.

Also on this list is a new rifle range at Parris Island, SC, a training base for 20,000 new Marines every single year.

There is a new training center at Fort Bragg, NC, to provide top-notch training and prevent injuries among our Special Forces. They are using an old warehouse right now, and they want a modern facility. If it were your son or daughter serving our military at Fort Bragg, you would give them nothing less. The list goes on and on.

Are we really going to tell our military—the very people who are protecting and defending this Nation—that the needs they have identified and we have appropriated money for are going to be put on hold because President Trump made a campaign promise that he can't keep—that the Mexicans were going to build the wall?

Republicans and Democrats in the Senate should join the House in rejecting the President's emergency declaration. The Senate should reject any effort by the President to take money from our troops, from the military—from the Marines, from the Air Force, the Navy, the Army, the National Guard units—to build this wall. We may not agree on much, but we used to agree on fundamental things. The Department of Defense was a priority. The men and women serving there deserve not only our gratitude but the investment in their training, operations, readiness, and a way of life that shows our respect for what they are doing in service to this country. We can do nothing less.

When we face the vote—quite likely a week from today or tomorrow—on whether we agree with the House, I hope that the Senate, Democrats and Republicans, will put the national defense of our Nation first and our mili-

tary first and vote no on President Trump's effort to extend this emergency designation and to try to assume constitutional responsibilities beyond what is already written.

We are a branch of government—article I of the Constitution. Our responsibility is to appropriate funds. When we give away that responsibility, we walk away from the reason we were elected. I hope that Members on both sides of the aisle will consider that as we face this historic vote.

I yield the floor.

The PRESIDING OFFICER. The Senator from Michigan.

NOMINATION OF CHAD A. READLER

Mr. PETERS. Mr. President, I rise in opposition to the nomination of Mr. Chad Readler to the U.S. Sixth Circuit Court.

There are certainly many reasons to oppose Mr. Readler's nomination. His track record paints a very clear picture of what he values and what he does not. Mr. Readler fought to uphold President Trump's travel ban that targets people because of their religion. He has argued in favor of a business turning away customers simply because they are LGBT. He worked to unravel programs made during the past administration that would ensure low-income workers would actually receive their hard-earned benefits. Of the things that Mr. Readler values, protecting Americans from wrongful acts of discrimination is clearly not among them.

Yet it still remains difficult for me to understand why Mr. Readler—and any of my colleagues who choose to advance his nomination today—would support going back to an era when health insurance companies are allowed to discriminate against people with preexisting health conditions. I have heard plenty of my colleagues from across the aisle make public statements in favor of preexisting coverage protections. That is probably because they hear, like I do, from people all across my State who fear losing coverage as a result of having that pre-existing condition.

What are preexisting conditions? Well, it is things like diabetes, asthma, or even high blood pressure, and they are a reality for over 4 million Michiganders. This range of fairly common to fairly complex conditions is experienced by one in every four children, over half of the female population, and 84 percent of adults in their late fifties and in their sixties.

Today, there is a broad consensus that we need a Federal law in place that prevents insurance companies from denying coverage or jacking up prices based on someone's health status, their age, or their gender. We have a law on the books right now that protects people with preexisting conditions, but this law must be defended, not undermined.

I worked hard to pass this important coverage during my first term in the Congress, and I have fought to preserve it every day since then. Although this

fight has been successful so far, it is based on the premise that the laws passed and upheld by Congress will be defended in court. Yet the Department of Justice Civil Division, under Mr. Readler's leadership, decided not to do so. His actions fit into the story of the Trump administration's ongoing partisan efforts to sabotage our healthcare system and dismantle strategies that would lower premiums and expand quality, affordability, and coverage, generally. The President is constantly looking for ways that he can sidestep Congress and attack legislation that has brought health insurance to over 20 million Americans and cut Michigan's uninsured rate in half.

We should not be advancing a Federal court nominee whose disregard for the rule of law comes at the expense of the health and the financial stability of millions of Americans. I urge my colleagues to vote no on Mr. Readler's nomination and his track record of promoting discrimination.

Thank you, Mr. President.

I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. BOOZMAN). Without objection, it is so ordered.

THE GREEN NEW DEAL

Mr. GRASSLEY. Mr. President, I appreciate my colleague from Iowa, Senator ERNST, for organizing this opportunity for several of us in the Senate to discuss the Green New Deal and to do it this week.

To put it mildly, the Green New Deal is ambitious. To frame it more accurately, it is an unworkable, pie-in-the-sky attempt to reshape every aspect of everyday Americans' lives.

First, let me say that I am proud of my record in successfully advancing the availability and affordability of renewable energy. Many have called me the father of the Wind Energy Incentives Act. I suppose after—what?—probably 26 years, that makes me the grandfather of the Wind Energy Incentives Act. My legislation sought to give this alternative energy source the ability to compete against traditional, finite energy sources. At that time, we never knew about fracking for natural gas and for oil. We thought we were going to be completely dependent upon Saudi Arabia for our energy. Now we know that is not true, but back in 1992 and before, we did everything to think up every alternative energy we could in order to be less dependent upon the Saudis. One of those acts that I was involved in was wind energy.

The wind energy bill—now law—has been extremely successful. Iowa supplies more than 35 percent of its own electricity from wind. We were the first State in the country to generate more

than one-third of its electricity from wind. Wind energy employs approximately 7,000 Iowans, and the nearly 3,000 wind turbines in Iowa generate millions of dollars in economic activity. So I want to make it very clear that I am speaking as someone who has a very successful track record of advancing clean energy.

Think about what the Green New Deal is about. Presumably, they don't know we have been this successful because the Green New Deal, on the other hand, is nothing more than a grab bag of vague aspirations. In fact, the Green New Deal was initially introduced in the House and Senate by its authors as a nonbinding, symbolic resolution—in other words, a lot of hot air. That means that even if it were to pass as introduced, it would not become law. I am glad that Senate Majority Leader MCCONNELL reintroduced the text in a format that could become law so we Senators could go on record as to whether we would want to make this the policy of the United States.

It would be one thing if the policy and goals remained on topic—namely, reducing pollution and cutting our Nation's carbon emissions. Those are worthy goals. Yet the resolution reads like a utopian manifesto that seeks to implement every liberal policy priority from the past many decades.

We have seen extreme leftwing agendas that rely on the power of the State and that usurp the role of individuals. How will those policies turn out? We have plenty examples. Look at the former Soviet Union. Look at Cuba over the last 60 years. Look at what has happened to Venezuela in the last 15 years. It has gone from the richest country in South America to a destitute country in which they die of malnutrition and people can't get medicine. In more instances than in the three I have just given you, these utopian ideas never turn out very well.

Sure, the Green New Deal includes goals that are related to energy and the environment, but for the most part, they are wholly unrealistic. For example, their calling for the upgrading of all existing buildings or, in another statement, their meeting 100 percent of the power demands of the United States through clean, renewable, zero-emission energy sources—all within the next 10 years—is simply not feasible.

Of course, no concrete proposals are put forward on how this is to be achieved. The Green New Deal just leaves us scratching our heads thinking about how all this would work.

There are a lot of questions. Would it require the government to mandate that every building owner in the United States make costly building improvements to meet national standards set here in Washington, DC?

Another question is, would every homeowner have to submit to government inspection to ensure that his or her home meets the standards dictated by the government?

Another question is, what government expenditures would have to be made, assuming all of this is even technologically possible, to go from about 17 percent of U.S. electricity generation coming from renewables today to a total 100 percent in 10 years?

The last question I will raise is, are the backers of the Green New Deal willing to support nuclear energy as a means to reach their goal? On this last point, I would conclude that a summary of the Green New Deal initially put out by the chief author in the House suggests a lack of support for nuclear energy.

As I have said before in my remarks today, I have been a leader on renewable energy production for decades, not just wind, as I have said, but geothermal, solar, biofuels, et cetera. So I am not just talking about being the author of the wind energy production tax credit.

During my leadership of the Senate Finance Committee in the 2000s, when I was chairman there, I oversaw the establishment, the enhancement, and renewal of numerous tax incentives that promote everything from wind and solar to renewable fuels like biodiesel, to energy-efficient homes, buildings, and appliances.

Unlike the unrealistic goals of the Green New Deal, these initiatives I just read are not only law, but they are real, proven, bipartisan actions that I shepherded into law to make the United States more energy independent and also, at the same time, improve our environment. Unfortunately, many of these key energy incentives I just mentioned are currently expired, and some of them have been expired for more than a year.

We had a real opportunity to extend these energy incentives as part of the appropriations deal reached earlier this month, but that was ultimately blocked by House Democrats—probably some of the same people who are promoting the Green New Deal. They seem overly focused on the lofty goals of the Green New Deal or, as Speaker PELOSI called the Green New Deal, “The green dream or whatever they call it, no one knows what it is.”

The House Democrats could not be bothered a month ago with extensions of existing and successful provisions that incentivize the type of investment they claim to have backed and not only tend to incentivize, actually have incentivized alternative energy over the last two and one-half decades—provisions that support millions of jobs for people who are actually willing to work.

Perhaps this just shows that the Green New Deal is less about tackling energy and environmental issues and more about remaking America into a dreamy new progressive paradise.

No sector of the economy is left unchecked by the Green New Deal—make no mistake about thinking otherwise. The authors of the Green New Deal are intent on reshaping every aspect of

American life through a “national, social, industrial, and economic mobilization,” and those last six words are in quotations.

Shaping American life through “national, social, industrial, and economic mobilization” that is eerily reminiscent of the 5-year plans of the former Soviet Union or of the Great Leap Forward under Chairman Mao of China.

Even the family farmer is not spared from its grand plans. The Green New Dealers want to remove what they call pollution and greenhouse gas emissions in agriculture through sustainable farming and building a more sustainable food system that ensures universal access to healthy food. Now, I am not against farmers taking actions to prevent soil erosion and minimizing pollution because we farmers do that already. We have been doing it for decades.

The recently passed farm bill invests more in conservation programs than any farm bill before. I trust that farmers know more and have more common sense about how to take care of their land than some bureaucrat in Washington, DC, or politicians from New York City. We all know Washington, DC, is an island surrounded by reality. So you put forth legislation like this, and it is just like 535 Members of Congress have all the knowledge in the world to tell 310 million other people what they ought to be doing.

I don't believe all those smarts rest in the Congress of the United States or even the bureaucracy of this government. Over the last several years, when it comes to farming, we have seen farmers readily adopt the use of cover crops to prevent nutrient runoff and to sequester carbon in the soil through what we call minimum or no tillage.

Today farmers may go down as the first group in history to leave the land better than they found it for future generations. Moreover, every indication is that these calls for sustainable farming and a sustainable food system go well beyond farmers being good stewards of our natural resources. It appears to be intent on changing everything from how we farm to what we farm.

A fact sheet released by the House author, shortly after introduction, made this perfectly clear. It notes a desire—now, listen to this—it notes a desire to rid the planet of methane gas-emitting cows. In case the authors are unaware, all cows and all people emit methane. It is part of the natural digestive process. The only way to stop these emissions is to ban animal agriculture. That proposal couldn't be more disconnected or out of touch with Americans.

That is what makes the taxpayers feel there is nobody in Washington, DC, who has any common sense, but don't worry. According to the authors of the Green New Deal in the House, “It is not to say you get rid of agriculture or force everybody to go vegan.” This doesn't instill much confidence in the

farmer about the real intentions behind the Green New Deal.

I am amazed by the scope of what the authors would have the government impose on the American people.

I will end by noting that I am interested in working with my colleagues on sensible policies to secure our energy independence and improve our environment, but I fear this will not be possible as long as my Democratic colleagues remain intent on handing over the country to the government to remake it in Washington, DC's, image.

I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Ms. CORTEZ MASTO. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### NOMINATION OF CHAD A. READLER

Ms. CORTEZ MASTO. Mr. President, I rise to speak in opposition to the nomination of Chad Readler to the Sixth Circuit Court of Appeals.

This nomination, if confirmed, would be advanced without the support of one of his home State Senators, and it deliberately ignores Senate precedent that has historically respected Senators' ability to identify nominees that best fit the needs of their State.

In his current position at the Department of Justice, Chad Readler led the legal briefs for some of the Department's most extreme positions.

He defended President Trump's travel ban, led efforts to end DACA, supported the inclusion of a citizenship question on the 2020 census, suggested that the structure of the CFPB was unconstitutional, and argued that businesses should be able to refuse services to same-sex couples.

Mr. Readler also led the DOJ's legal brief for the Texas v. U.S. lawsuit, arguing against the Affordable Care Act's protections for people with preexisting conditions, even while three other career attorneys at the DOJ refused to do so.

Think about that for a second. This nominee took up his pen and drafted a legal opinion at the Department of Justice that stated it was fine for his Department not to defend the law—a law that protects millions of Americans' access to the critical healthcare they need.

If that weren't enough to shock the conscience, Mr. Readler's nomination to the Sixth Circuit judgeship was announced the same day the brief was filed.

Is that a coincidence? Maybe, but since three other career lawyers at the Department of Justice resigned rather than draft this brief and violate their duty to the law, I think it is fairly obvious.

This administration has made it crystal clear that Mr. Readler was chosen because of his willingness to dis-

mantle the ACA and completely eliminate critical protections that ensure seniors, kids, and families in Nevada and across this country are able to get health insurance, regardless of whether they have a previous medical condition. For many Americans, denying vital healthcare protections and access to care is truly a matter of life and death.

President Trump and Republican leaders have promised to sabotage our healthcare from day one, and this nomination is another example in a long line of legislation, nominations, and Executive actions aimed at ripping away healthcare coverage from hard-working families in Nevada and across the country.

The Affordable Care Act is, quite simply, the law of the land. Its patient protections have wide bipartisan support, as evidenced by Congress's inability to pass ACA repeal. Since its inception, over 400,000 Nevadans have gained healthcare coverage, including 158,000 children. Tens of million more Americans across the country have gained access to affordable health insurance, prescription drug coverage, mental health services, and preventive care.

The ACA's provisions have also guaranteed that over 1.2 million Nevadans with preexisting conditions will not be denied coverage because insurance companies deem them "too risky" to cover.

We cannot go back to the day when women, veterans, cancer survivors, and children with disabilities were charged more for healthcare or were flatout denied coverage.

Americans need us to work together to defend their access to quality and affordable healthcare, not just in Nevada but across this country. Yet Mr. Readler has shown us that he would instead take us backward, unravelling more than a decade of progress and wreaking potential havoc on our economy.

This nominee has demonstrated that he is willing to carry water for this President's political interests and not serve in the best interest of Americans.

I oppose Mr. Readler's nomination because Americans deserve a judge who respects the rule of law and interprets the law based on statute, not the political needs of this or any administration.

I oppose this nominee because Senate Republican leaders are trying to jam him through without the support of one of his home State Senators, which is a direct attack on our constitutional role as U.S. Senators to advise and consent.

I want my colleagues to know that a vote in support of his nomination is a vote in support of unleashing chaos on the American health system, eliminating preexisting condition protections, and one that would result in millions more uninsured.

Mr. Readler is a dangerous choice, who has a long track record of supporting the most extreme legal posi-

tions, which makes him unfit to sit on any court, much less one whose decisions will impact millions of Americans.

Thank you.

I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Ms. ERNST. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### THE GREEN NEW DEAL

Ms. ERNST. Mr. President, I rise today to join over 10 colleagues to speak in opposition to the so-called Green New Deal.

Merriam-Webster defines a deal as "a bargain" or "an agreement for mutual advantage." By its name, you would think that Americans are going to derive some benefit from it, but this couldn't be further from the truth.

The truth is that this proposal is a raw deal for America, especially our rural communities.

As many of you know, every month I give out a Squeal Award, which draws attention to outrageous examples of wasteful and reckless spending of taxpayer money.

With a \$93 trillion—trillion with a "t"—pricetag, which is roughly \$10 trillion more than the entire recorded spending of the U.S. Government since 1789, this month's Squeal Award goes to the Green New Deal, which, again, I think is kind of a raw deal.

Just think about that number—\$93 trillion. To fund this radical government takeover, every American family would have to pay about \$65,000 annually. Folks, that is more than most Iowa households bring in in a year.

The ideas presented in the Green New Deal used to garner support only from the furthest fringes of the political left—the furthest fringes. Concepts like rebuilding every building in the country, outlawing fossil fuels, and guaranteed jobs would never have made their way into mainstream discourse just a few years ago. Now our Democratic colleagues are trying to make them mainstream.

In fact, 100 of the 282 Democratic Members of the House and Senate have signed on to support this plan. This is the creep of socialism into America.

If you work in a part of the energy industry that has fallen out of favor, your job has no place in the country. That is what is envisioned by the Democrats.

The Green New Deal states that one of its goals is to meet "100 percent of the power demand in the U.S. through clean, renewable, and zero-emission energy sources."

Don't get me wrong, folks—don't get me wrong—increasing our reliance on renewables is a good goal and one that I support, but we have to be realistic about our current energy capabilities and our needs.
