

about this because this one is really disruptive, but it is worth the thought experiment.

For anyone who might be watching or having an interest in this Google, “photosynthesis 40 percent”. Read the complete articles that have been written.

Madam Speaker, you remember your high school biology class talking about plants and plant cells having a certain inherent inefficiency, where there is a flaw that has been there for millions and millions of years where it reaches out and grabs the oxygen molecule when it should have grabbed the carbon molecule.

Through some synthetic biology they fixed the inefficiency. It now will reach over and grab the carbon molecule every time. All of a sudden it means a 40 percent efficiency in growth.

So, what happens tomorrow when crops require 40 percent less water, 40 percent less land, and 40 percent less fuel?

What does it mean to the world?

Thought experiment: I need you to take it a step further. World agriculture represents 2.2 times the total greenhouse gases of every automobile on Earth. Just adopting this plant technology in our agriculture equals removing every car off the face of the Earth.

As this rolls out, how fast would it take to change the seed stock around the world?

There are solutions, and they are not always a linear thought. They sometimes require some creativity. Let’s face it. We work in a math-free zone that also lacks creativity. This exists. This is rolling out. It is a revolution.

Yes, it is going to be incredibly disruptive to agriculture around the world. It is going to be incredibly disruptive.

At the same time, what happens when you want to plant trees and you can grow them 40 percent more efficiently, and they are just little carbon capture machines?

This is here. We should be excited about it.

The last one is just more of the thought experiment of trying to say, if we really care, we need to stop the theater that seems to be what happens behind these microphones and actually understand the problem, understand the math, and then focus on that solution. Because often around here I believe a solution is a problem for us because the very thing that we got elected on, that we love coming and complaining about, oh, dear heaven, what happens if we solve it?

So let’s actually talk about something that is part of our pop culture right now, but it is a real issue. For someone like myself, I grew up scuba diving. I love scuba diving, and I have been blessed to do it in a lot of really neat places. Ninety percent of the plastic in the world’s oceans come from 10 rivers. Eight of these rivers are in Asia, and two of those rivers are in Africa.

Ninety percent of the plastic in the ocean comes from 10 rivers. If you give a darn about plastic in the ocean, banning straws in your community is theater. It is absurd math. It may make you feel better and get you in the local newspaper, but you didn’t do anything.

This body here immediately should figure out what aid programs we have, what research, what we can do to go to those 10 rivers that are 90 percent of the plastic in the ocean and help, instead of complaining about it and instead of doing a nice video of going out and saying, I am going to pick up plastic off a beach.

No. If you care, it is 10 rivers, we know where the problem is. If you really want to have an impact, go where it is coming from. This is a simple example of we talk, talk, talk, talk, and talk around this place, but if we solve it, then we don’t get to actually talk about it. But solving is the most ethical thing we can do as a body.

Policy that is made with math and policy that is made with facts can do amazing things for our country, my 3-year-old little girl, and for this world. Policy around here that is done by folklore, by an anecdote, and by feelings, time and time again, when we look back, it may have been well-intended, but ultimately it hurts people.

If we get our math right, if we actually understand the underlying basis of a problem, figure out an honest solution that continues to grow our economy and continues to provide opportunities instead of this sort of constant Malthusian echo around here that says that we can’t grow anymore, we can’t do this—they are wrong, and the folks who embrace that philosophy have been wrong for centuries now.

There are technology breakthroughs happening all around us. You actually saw the latest one on this. Finally, we have broken the code on a plastic that truly breaks down. Let’s incentivize that. There are solutions. This body is an honorable body, but it needs to become one about solutions instead of theatrics.

Madam Speaker, I yield back the balance of my time.

PUBLICATION OF BUDGETARY MATERIAL

REVISION TO THE AGGREGATES, ALLOCATIONS, AND OTHER BUDGETARY LEVELS FOR FISCAL YEAR 2020

HOUSE OF REPRESENTATIVES,  
COMMITTEE ON THE BUDGET,  
Washington, DC, May 15, 2019.

MADAM SPEAKER: Pursuant to the Congressional Budget Act of 1974 (CBA), the Balanced Budget and Emergency Deficit Control Act of 1985 (BBEDCA), and H. Res. 293 (116th Congress), I hereby submit for printing in the Congressional Record a revision to the aggregates and allocations set forth in the Statement of Aggregates, Allocations, and Other Budgetary Levels for Fiscal Year 2020 published in the Congressional Record on May 3, 2019.

This revision is for allowable adjustments for amounts for program integrity initiatives and Overseas Contingency Operations

pursuant to section 251(b) of BBEDCA. These amounts are contained respectively in the text of H.R. 2740, the Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 2020, and of H.R. 2745, the Military Construction, Veterans Affairs, and Related Agencies Appropriations Act, 2020, as reported by the Committee on Appropriations.

Accordingly, I am revising aggregate spending levels for fiscal year 2020 and the allocation for the House Committee on Appropriations for fiscal year 2020. For purposes of enforcing titles III and IV of the CBA and other budgetary enforcement provisions, the revised aggregates and allocation are to be considered as aggregates and allocations included in the budget resolution, pursuant to the Statement published in the Congressional Record on May 3, 2019.

Questions may be directed to Jennifer Wheelock or Raquel Spencer of the Budget Committee staff.

JOHN YARMUTH.
