

first landed humankind on the Moon. As we all know, aboard this mission were American heroes: Neil Armstrong, Buzz Aldrin, Jr., and Michael Collins.

When Neil Armstrong first set foot on the Moon on July 20, 1969, he secured a place in a long, proud line of Ohioans who have performed aviation firsts. Beginning with the Wright brothers and continuing today with the fine scientists at NASA's Glenn Research Center, generations of Ohioans have consistently led and driven innovation in our country. For centuries, Ohio has been on the forefront of new technologies and always pushed the boundaries of mankind in the name of exploration.

I would be remiss if I did not personally thank those brave astronauts who led the *Apollo 11* mission 50 years ago for putting their lives on the line in service to their country. When Commander Armstrong took his first steps onto the Moon, surely, he couldn't have known that a 7-year-old boy from his home State of Ohio was watching in amazement with his whole life ahead of him.

May our country always remember how profound the *Apollo 11* Moon landings were, and still are. May we always honor the crew members, backup crew, support crew, capsule communications, and flight directors who made this mission a success and may the United States of America forever remain not only the first, but the principal nation of space exploration.

50TH ANNIVERSARY OF "APOLLO 11"

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from California (Ms. HILL) for 5 minutes.

Ms. HILL of California. Mr. Speaker, today I rise to honor the 50th anniversary of the *Apollo 11* series.

When I think of *Apollo 11*, I am reminded of a feeling that many of us have forgotten in this current time of divisiveness and anger. *Apollo 11* reminds me of an America that pulled together; a time when America prioritized impossible dreams, because impossible dreams were what built this country; a time when we understood that achieving those impossible dreams was a way to make every child feel prouder to be an American and every adversary feel that our Nation loomed larger than they could hope to surmount.

As Americans, we work hard, we get better, then we become the best.

At its core, space exploration and the Moon landing were rooted in the American Dream, and I believe that dream is still worth dreaming today.

Fifty years later, the *Apollo* series and the space exploration of that time remind us that we are part of something bigger than ourselves. I stand here today as the congresswoman of a district that is incredibly proud of our contributions to space technology, flight, and exploration. Really, our

contributions to bringing that dream to life.

My district is home to many of the Edwards Air Force Base workers who are critical to our country's defense and service. We often say that the Antelope Valley is actually the aerospace valley because of how much testing, research, and development takes place in our community.

The NASA Armstrong Flight Research Center at Edwards Air Force Base made countless contributions to the NASA human spaceflight program during the sixties, from the X-15 rocket plane hypersonic research program to the lunar landing research vehicle, both of which had a direct impact on the Apollo missions. In fact, the first flight of a lunar landing research vehicle was in 1964 at Edwards Air Force Base. These vehicles were later used at Ellington Air Force Base to train the Apollo flight crew, including Neil Armstrong.

For my constituents and so many others across the Nation, the celebration of the Apollo mission is the celebration of our history. It is the celebration of people like my grandfather, who worked on the thrusters for the lunar lander. From 1961 to 1970, he was involved with Apollo service module rocket development, qualification, and production.

In talking with my grandfather, I have seen how much of a catalyst this work is for our identity as Americans. The Moon shot gave so many of us something to believe in, and that belief paid off in its enduring impact to scientific discovery and commercial applications. We need to realize that triumph in this generation of Americans.

My work on the House Armed Services Committee has also shown me that the military and our defense capabilities simply don't work any longer without a mastery of space. Our adversaries are on their way to the Moon, and we have no choice but to be there, as well. That is a vital part of how we maintain our status as the global leader that we have always been. To keep our strongest position, we have to have a plan and a strategy for space.

In doing so, we will inspire a generation of STEM workers, many of them young women, people of color, and first-generation college students, to be part of something great, something that defines our identity as Americans. We will stimulate our economy, innovate products that stretch beyond use in space, and contribute to our comfort and well-being here in America.

On the 50th anniversary of Apollo, I am honored to champion a program that unlocked so much American greatness. I am even more honored to stand with the knowledge that greater things are yet to come. Together, we can do so much and go so far, further than we have ever gone before. Because we can. Because we have to. Because our security demands it. Because, without doing so, we will never know what is possible. And as humans, as Ameri-

cans, we will not let the impossible stop us.

RECESS

The SPEAKER pro tempore. Pursuant to clause 12(a) of rule I, the Chair declares the House in recess until approximately noon today.

Accordingly (at 11 o'clock and 25 minutes a.m.), the House stood in recess.

□ 1200

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at noon.

PRAYER

Reverend John P. Fitzgibbons, S.J., Regis University, Denver, Colorado, offered the following prayer:

Most Holy God, please unite and guide the leaders in this House to recognize, to speak for, and to safeguard the vulnerable and the marginalized in all corners of our Nation.

Help us to hear and to champion the rights of dreamers of all colors, all contexts, and all ages, especially the young, whose ardent desire is to know and to build a better society.

Help us to illuminate the path and to advocate for our country's learners and their teachers so that access to education and the power of knowledge will continue to produce servant leaders committed to democracy, equality, and justice.

Help us to unite our hearts and our minds, to share freely of our gifts, to reflect critical thought and responsible action on moral and ethical issues, and to be men and women for others that both You and our constituents expect and deserve.

Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House her approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER. Will the gentleman from Illinois (Mr. GARCÍA) come forward and lead the House in the Pledge of Allegiance.

Mr. GARCÍA of Illinois led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

WELCOMING REVEREND JOHN P. FITZGIBBONS, S.J.

The SPEAKER. Without objection, the gentleman from California (Mr. CISNEROS) is recognized for 1 minute.
