

armed men holding Austin. This was the last information received from the captors.

Although Austin Tice has spent far too many days, months, and years in captivity, crucially the United States government believes Austin is alive. The FBI is offering a one-million-dollar reward for information leading directly to his safe location and return. His parents, Debra and Marc Tice, have been consistent beacons of hope throughout Austin's captivity, working passionately for his release, and never losing hope for their son's safe return. Their love for their son has had the power to mobilize a large, bipartisan, bicameral group of Members of Congress from all over the country. I was proud to join my colleagues this September in a letter to President Trump calling for him to use the full weight of his national security team to bring Austin home, and I renew that call now.

Austin Tice has been separated from his family, friends, and loved ones for far too long. He has spent too many birthdays in captivity. I join my colleagues in calling upon those who are keeping him in Syria to let Austin Tice go. Let him return safely to his family and his country.

HONORING THE WATER REPLENISHMENT DISTRICT OF SOUTHERN CALIFORNIA

HON. LINDA T. SÁNCHEZ

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 19, 2019

Ms. SÁNCHEZ. Madam Speaker, I rise to honor one great agency in my district. On November 17, 2019, the Water Replenishment District celebrated its 60th Anniversary.

The Water Replenishment District (WRD) is a groundwater management agency that has developed innovative projects and programs for locally sourced, sustainable water to replenish two of the most utilized urban groundwater basins in the United States. WRD was established in 1959 in response to unregulated and unmanaged over-pumping of our aquifers which caused many drinking water wells to go dry.

Located in Lakewood, California, WRD is the largest groundwater agency in the State of California. The district's service area covers a 420-square-mile region of southern Los Angeles County, the most populated county in the United States. They provide half of the drinking water for 43 cities and over 4 million people. Due to WRD's hard work, that water is now completely locally sustainable.

These efforts include programs like Water Independence Now (WIN) and new facilities like the Albert Robles Center for Water Recycling and Environmental Learning (ARC) in the City of Pico Rivera. WRD has shown a dedication to sustainability and a commitment to providing safe drinking water to residents in its service area, which includes the majority of the 38th Congressional District of California.

I am honored to represent districts like WRD and look forward to what the next 60 years have in store.
