

"It's local, and I know the people who make it," said Elaina Lefevre, 27, who regularly buys Ms. Marvin's loaf for her young daughter at the Hannaford supermarket in Morrisville, Vt. "Five ingredients or less on a label is what I aim for."

Bread is among the simplest and most mundane things humans eat. It's in our prayers: Give us this day our daily bread. It's in our wallets: our bread and butter.

But bread has also been a catalyst for change. In 1789, the high price of bread brought angry protesters to the streets of Paris. In 2011, it did again, in Cairo's Tahrir Square.

"There's nothing more revolutionary than bread," Dr. Jones said. "But there's also nothing more mundane or pedestrian than bread. It's who we are."

Dr. Jones often works in an apron branded with a skull and the words "White Sliced Death," armor in his crusade for whole grains. Still, his no-hostages approach to white flour and regional grains has earned him the respect of many in the local-food movement.

"I think what we're doing is radical," Mr. Prager said. "It's radical to make good, organic, clean food affordable to more people."

The collective has a point. It is a curious quirk of contemporary America that a 6-year-old from Burlington, Vt., and a 6-year-old from Burlington, Wash., can eat entirely identical sandwiches for lunch. Once, that would have been impossible. Vermont bread was made with Vermont wheat, and Washington bread was made with Washington wheat, made from local grains ground in local mills.

But in the late 19th century, a new technology arrived from Europe, changing American flour: roller mills, which separate the bran—the "whole" part of whole wheat—from the kernel. Without the bran's oils and proteins, the chalky "all-purpose flour" that most Americans would recognize today is inert and easier to preserve.

Although it keeps longer, white flour is less nutritious, as the bran holds most of the kernel's fiber. Dr. Jones also thinks it is wasteful in an agricultural system struggling to adapt to climate change.

"If you're a farmer and you grow 100 pounds of wheat, only 70 of it is going to be made into food," Dr. Jones said. "If you wanted to raise the yield of wheat tomorrow, just eat the whole kernel."

Without added chemicals to keep the bread soft and mold-free, the approachable loaf has a shelf life of about a week before it goes stale. This requirement also helps ensure that the bread stays local; any time spent traveling to a store would waste precious freshness.

"There's no reason that bread should keep for this long," said Dr. Jones, shaking a mass-produced loaf with a sell-by date of June 2018 that is still soft. He keeps it in the lab to help make his case.

Today, after millennia as a daily staple, good bread has almost become a luxury item. Whole-wheat flour can be expensive, especially if it's organic. Loaves baked by hand cost more, as bakers need to be paid for their time and labor.

Even \$6 for the approachable loaf can be a steep price for many families. But though it's not as cheap as Wonder Bread, the loaf is close in price to most other whole-wheat options sold in supermarkets. Members of the collective hope that, together, they get Americans to take bread more seriously.

"People care about their hops and their cheese and their coffee and their dairy and their meat, but they don't even think twice about their grains," Ms. Marvin said. "But bread is the most broken."

ADDITIONAL STATEMENTS

TRIBUTE TO CAPTAIN JOSEPH VICTOR SHELDON III

• Mr. CASSIDY. Madam President, today, I would like to recognize Capt. Joseph Victor Sheldon III, command chaplain, 4th Marine Division, for his 32 years of service in the U.S. Navy as he approaches his retirement ceremony. Captain Sheldon will be dearly missed by those who served with him, and our country thanks him for his dedicated service.

Captain Sheldon served in a unique and critically important role as a chaplain in the U.S. Navy. His recognition of the importance of this role allowed him to effectively serve the soldiers he served with, as well as their families and civilian military workers. Military chaplains are also charged with forging relationships with their counterparts around the world when they serve abroad. Captain Sheldon took this responsibility in stride and provided a blueprint on how military chaplains should build relationships with their religious counterparts.

His service included time in the Middle East following 9/11, Germany, the Pentagon, as well as serving as the Director of Religious Affairs of the Combined Joint Task Force in the Horn of Africa, CJTF-HOA. Louisiana and the entire Nation are grateful for Captain Sheldon's life of service to our great country.●

RECOGNIZING MINOT, NORTH DAKOTA

• Mr. CRAMER. Madam President, I rise today to recognize the city of Minot. It has been 60 years since the U.S. Air Force and Minot began working together to establish the Minot Air Force Base in northwestern North Dakota. This was in the late 1950s, when Minot leaders stepped up to buy the land where the air base now stands. Throughout the ensuing decades of growth and change in the Minot community and the base itself, this co-operation has continued.

This year, the Air Force Global Strike Command has recognized this solid partnership by awarding its Barksdale Trophy to the city of Minot. This honor is given to the community providing the most outstanding support to one of its bases. Minot Air Force Base's 5th Bomb Wing and 91st Missile Wing support the Air Force Global Strike Command. The trophy is awarded by Shreveport and Bossier, LA, which are home to the command and the Barksdale Air Force Base.

The Minot Area Chamber of Commerce submitted the city's nomination for this award and in it detailed many notable projects and partnerships over the years. This includes a community auction, which for 30 years has raised \$800,000-plus for programs supporting the morale of those at the base. Another 30-year event is a Military Ball,

bringing airmen and their spouses and area residents together for a special evening. A favorite holiday tradition is the thousands of home-baked cookies delivered to airmen who are spending their first year in Minot and are unable to be home for Christmas. Those stationed at the base and their families reciprocate by volunteering to help with Minot's many programs and annual events, including the North Dakota State Fair and the Norsk Hostfest.

In North Dakota, we take pride in the two Air Force bases within our borders that help to safeguard world peace. The support we give to those who call North Dakota home while stationed at these bases is not done for recognition nor awards. Yet, receiving the Barksdale Trophy is a well-deserved nod to North Dakota's legendary hospitality and its steadfast support of the Minot Air Force Base.

Mr. President, I congratulate the residents of the Minot area for being awarded this prestigious Barksdale Trophy. On behalf of all North Dakotans, I thank them for their support of our Nation's military and for welcoming those who are called to serve in this noble mission.●

TRIBUTE TO TERRY HILL

• Mr. INHOFE. Madam President, I am speaking today to highlight a service-disabled veteran and my constituent, Terry Hill, who is the CEO and co-founder of Rapid Application Group, an additive manufacturing facility just outside of my hometown of Tulsa in Broken Arrow, OK. Mr. Hill is a hero who served his Nation nobly as a UH-60 Black Hawk medical evacuation pilot, flying more than 750 combat missions serving in the U.S. Army.

Due to Mr. Hill's experience, he knows better than anyone just how essential the technology of additive manufacturing can be in the field to support nonflight-critical parts to increase the overall readiness and force of our military. Additive manufacturing has improved military readiness and enabled the military services to be more self sustainable. Continued advancement in this area will further improve our military's readiness and overall ability to accomplish the mission at hand.

When Mr. Hill returned home and started his business, he continued to serve our Nation by taking care of his fellow veterans. He is committed to hiring veterans to work in his facility and is known within our community for seeking out opportunities to help those who have worn the uniform. I take this opportunity today to highlight and thank Mr. Hill for his service in the U.S. Army, but also for his continued service in delivering needed tools to the warfighter and for supporting our veterans.●
