## SUBMITTED RESOLUTIONS

SENATE RESOLUTION 546—RECOGNIZING THE WEEK OF MARCH 15 THROUGH MARCH 21, 2020, AS "NATIONAL POISON PREVENTION WEEK" AND ENCOURAGING COMMUNITIES ACROSS THE UNITED STATES TO RAISE AWARENESS OF THE DANGERS OF POISONING AND PROMOTE POISONING PREVENTION

Mr. BROWN (for himself and Mr. SCOTT of South Carolina) submitted the following resolution; which was referred to the Committee on Health, Education, Labor, and Pensions:

S. RES. 546

Whereas the designation of National Poison Prevention Week was first authorized by Congress and President Kennedy in 1961 in Public Law 87-319 (75 Stat. 681);

Whereas National Poison Prevention Week occurs during the third full week of March each year;

Whereas the American Association of Poison Control Centers (referred to in this preamble as the "AAPCC") works with the 55 poison control centers in the United States—

(1) to track more than 1,000 commonly used household and workplace products; and

(2) to track poisonings and the sources of those poisonings;

Whereas 2,000,000 people call the poison help line annually to reach a poison control center;

Whereas, as reported to the AAPCC, more than 90 percent of poison exposures reported to local poison control centers occur in the home;

Whereas local poison control centers save the people of the United States \$1,800,000,000 in medical costs per year;

Whereas the AAPCC and poison control centers partner with the Centers for Disease Control and Prevention, the Food and Drug Administration, and State and local health departments to monitor occurrences of environmental, biological, and emerging threats in communities across the United States, including food poisoning, botulism, and vaping-associated lung injury;

Whereas, in the United States—

(1) more than 300 children 19 years of age and younger are treated in emergency departments for poisoning every day; and

(2) 980 children 19 years of age and younger die as a result of being poisoned each year;

Whereas children younger than 6 years of age constitute nearly 1/2 of all poison exposures each year;

Whereas, from 2010 to 2018, data from poison control centers revealed a significant increase of 9.9 percent in the number of intentional suicide patients who were adolescents 10 to 19 years of age, and that increase disproportionately occurred among females;
