

EXTENSIONS OF REMARKS

SUPPORT FOR THE GABRIELLA MILLER KIDS FIRST RESEARCH ACT 2.0

HON. JENNIFER WEXTON

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 21, 2020

Ms. WEXTON. Madam Speaker, I rise in strong support of the Gabriella Miller Kids First Research Act 2.0, a bipartisan bill that I introduced on Friday, April 17th. If enacted, this bill would make great strides to fund the fight against childhood cancer, birth defects, and other rare pediatric diseases.

Cancer is the single leading cause of death among American children of any disease. The U.S. is rapidly approaching 16,000 children diagnosed with cancer annually, and the incidence of childhood cancer has been steadily increasing over time. Additionally, one in 33 babies born in the U.S. are affected by a birth defect, and birth defects are the leading cause of death among infants. These pediatric diseases are still poorly understood, and additional funding is greatly needed to augment existing research to promote new discoveries for children affected by them.

In an effort to uncover new insights into the biology of pediatric disease, Congress passed the Gabriella Miller Kids First Research Act in 2014, which established a Ten-Year Pediatric Research Initiative Fund within the National Institutes of Health's (NIH) Common Fund. The law authorized \$12.6 million in funds annually for pediatric disease research through the Gabriella Miller Kids First Pediatric Research Program, commonly known as Kids First. Since the original law was enacted, Kids First has sequenced more than 20,000 samples from childhood cancer and structural birth defect cohorts. Most recently the program initiated the Gabriella Miller Kids First Data Resource Center—a comprehensive integrated data resource for research and patient communities meant to advance discoveries.

The Gabriella Miller Kids First Research Act 2.0 builds off the important progress made by the 2014 Gabriella Miller Kids First Research Act by providing a new source of funding for the Kids First Research Fund. Specifically, the bill would redirect civil monetary sanctions levied against pharmaceutical manufacturers by the U.S. Securities and Exchange Commission for violation of the Foreign Corrupt Practices Act. By diverting penalties from pharmaceutical companies that break the law, the bill would sustain Kids First's critical childhood disease research for generations to come.

The 2014 law and the bill I introduced Friday is named to honor 10-year-old Gabriella Miller who passed away from an inoperable brain tumor. She was a fierce advocate for childhood cancer research, and her efforts to boost awareness of pediatric cancer helped raise funds for children's cancer charities. I would like to thank Gabriella's mother and my constituent, Ellyn Miller, for her tireless advocacy on behalf of children with cancer through

Smashing Walnuts. I am honored to have worked closely with Ellyn on the Gabriella Miller Kids First Research Act 2.0.

I introduced this bill to find treatments and cures so that our nation's children will have a fighting chance to survive cancer and other rare disease. The Gabriella Miller Kids First Research Act 2.0 will reaffirm our strong commitment to finding cures for pediatric diseases.

HON. ADAM B. SCHIFF

Tuesday, April 21, 2020

Mr. SCHIFF. Madam Speaker, last year I introduced H.R. 3494, the Damon Paul Nelson and Matthew Young Pollard Intelligence Authorization Act for Fiscal Years 2018, 2019, and 2020. The IAA was included in the Fiscal Year 2020 National Defense Authorization Act, which became Public Law 116-92.

Section 6412, a provision that I authored and that first passed the House as part of the IAA, authorizes the Director of the CIA to provide enhanced injury benefits to a covered employee and/or qualifying dependents who suffer an injury overseas due to war, insurgency, hostile act, or terrorist activities.

I rise today to clarify the intent of Congress on one point: due to the unique and limited circumstances under which these benefits are authorized, and for the purposes of Section 104 of the Internal Revenue Code of 1986, all amounts paid pursuant to Section 6412 should be treated as amount paid under chapter 81 of

title 5, United States Code, regardless of whether the recipient would otherwise qualify for workmen's compensation.

**INTRODUCTION OF THE ROBUST
INTERNATIONAL RESPONSE TO
PANDEMIC ACT**

HON. JESÚS G. "CHUY" GARCÍA

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 21, 2020

Mr. GARCÍA of Illinois. Madam Speaker, I rise today to introduce the Systemic Risk Mitigation Act with my colleagues, Representative JAN SCHAKOWSKY of Illinois and Representative MARK TAKANO of California.

As COVID-19 devastates nearly every country in the world, it is more important than ever to affirm that the United States will support developing countries in getting the help they need from International Financial Institutions (IFIs) like the World Bank and International Monetary Fund (IMF). This bill accomplishes that by: Instructing U.S. representatives to the IFIs to support a suspension of debt payments to those institutions during the COVID-19 pandemic; Instructing U.S. representatives to the IFIs to oppose programs that undermine countries' ability to respond to COVID-19, such as those that encourage cuts to public health spending; Instructing the U.S. representative to the IMF to support issuing 3 trillion "Special Drawing Rights."

The issuance of "Special Drawing Rights" will help countries avoid depleting their reserves during the turbulent economic times ahead; 3 trillion SDR's will help all of us—and especially emerging markets and developing economies—avoid financial catastrophe.

I urge this body to advance this legislation.
