LEGISLATIVE SESSION

The PRESIDING OFFICER. The Senate will now resume legislative session.

ORDER OF PROCEDURE

Mr. McCONNELL. Mr. President, I ask unanimous consent that at 11:45 a.m. tomorrow, all debate time with respect to the Schatz amendment No. 2252 and the Inhofe amendment No. 2411

expire and the Senate vote in relation to those amendments in that order. I further ask that at 4 p.m. tomorrow, all debate time with respect to the Shaheen amendment No. 1729 and Cornyn amendment No. 2244 expire and the Senate vote in relation to those amendments in that order, with all other provisions under the order of July 2 remaining in effect with respect to these amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

COMMISSIONING OF THE USS “ST. LOUIS” (LCS-19)

● Mr. BLUNT. Mr. President, today I stand to recognize a historic milestone for the U.S. Navy and for the remarkable city of St. Louis, MO. I am proud that the brandnew USS *St. Louis* (LCS-19) will be commissioned August 8, 2020, and begin service as the Navy’s newest littoral combat ship.

The USS *St. Louis* will be the seventh U.S. Navy ship named for the city of St. Louis, which is known as the Gateway to the West and serves as an enduring symbol of our country’s westward expansion. From the early days of American expansion through the Cold War, ships carrying the name *St. Louis* have supported U.S. naval operations in many major conflicts. Historic ships named for the city of St. Louis include an ironclad gunboat in the Civil War, a troop transport and protected cruiser during World War I, a light cruiser during World War II, and an amphibious cargo ship during the Cold War era.

It seems only fitting that the very first USS *St. Louis*, which dates back to 1828, was a sail-powered sloop-of-war designed to protect the United States in its littoral zone. Similarly, today’s USS *St. Louis*, a Freedom-Class littoral combat ship, boasts the unique capability to operate in near-shore littoral environments as well as blue-water missions. In addition to her operational flexibility, the USS *St. Louis* has reconfigurable payloads known as mission modules that can be quickly changed to adapt to shifting requirements. These mission modules, in combination with crew detachments and air assets, make littoral combat ships like the USS *St. Louis* the Swiss Army knives of the Navy. This ship’s innovative technological advances will enhance our Navy’s ability to project power into the littoral regions of the world in defense of U.S. interests. President Truman, a Missouri native, once said, “Carry the battle to them. Don’t let them bring it to you.” The USS *St. Louis* will enable the Navy to do just that.

The USS *St. Louis* also reflects the extraordinary amount of time, expertise, and craftsmanship necessary to produce this great marvel of technology and symbol of American freedom. The defense industrial base,
