

worked for the Shelby County general sessions court clerk, the general sessions criminal court judges' office, and then the general sessions civil court judges' office, where she will retire after 17 years of faithful service to these judges.

In 2019, Shelby County Mayor Lee Harris awarded Suzette with the Shelby County Shining Star Award. This award is given to someone who has shown exemplary dedication to their job within Shelby County government, and this award was much deserved.

I know I speak on behalf of all of Memphis and Shelby County, and the judges, when I thank Suzette for her service to our community. When I think of true public servants, we talk about people like Suzette.

I wish her and her husband, Derrick, the best in their retirement.

HONORING VETERANS COMMUNITY LIVING CENTER AT FITZSIMONS

The SPEAKER pro tempore. The Chair recognizes the gentleman from Colorado (Mr. CROW) for 5 minutes.

Mr. CROW. Mr. Speaker, I rise today to recognize the staff and residents of the Veterans Community Living Center in Aurora, Colorado. This Colorado veterans home has cared for veterans, veteran spouses, and Gold Star parents for over 18 years.

The staff at Fitzsimons has acted heroically during this pandemic, risking exposure, facing fears, and continuing to show up for their residents and co-workers. Since March, 26 employees have tested positive, and most have returned to work.

This dedicated team has pioneered new ways of connecting veterans to their communities, including drive-by vintage car shows and coordinating phone calls and Skype visits with family and friends.

We do mourn the loss of 25 veterans who lost their lives to the virus and celebrate the lifetime of selfless service all veterans who live at Fitzsimons have made.

It is with pride that I recognize the staff and residents at the Veterans Community Living Center at Fitzsimons.

RECOGNIZING SALUD FAMILY HEALTH CENTERS' 50TH ANNIVERSARY

Mr. CROW. Mr. Speaker, I rise today to recognize the Salud Family Health Centers on its 50th anniversary.

Salud was founded in 1970 to serve the migrant and seasonal farmworker population living and working in and around Fort Lupton, Colorado. Today, Salud operates 13 clinics and a mobile unit in 10 predominantly rural communities throughout northern and south-eastern Colorado, serving over 82,000 patients annually.

Salud has grown to provide medical, dental, behavioral health, women's care, pediatric care, and on-site pharmacy services. Prior to COVID, Salud also operated 11 school-based sites to

better serve the needs of the community.

Salud's mobile unit travels mostly rural areas during the evenings to provide quality healthcare to seasonal and migrant workers. In its 50 years, Salud has served 2 million patients.

I am proud to have Salud Family Health Centers serving the people of the Sixth Congressional District.

APPLAUDING AURORA MOBILE FOOD PANTRY

Mr. CROW. Mr. Speaker, I rise today as we observe Hunger Action Month throughout September to applaud the work of the Aurora Mobile Food Pantry.

While the food pantry is a crucial support system to our community at the best of times, it has been a lifeline to those experiencing hunger during the COVID-19 pandemic.

This summer, Aurora Mobile Food Pantry and its community partners, along with over 750 volunteers, provided more than 475,000 meals to our community. In addition to providing healthy food, more than 30,000 community members who visited the mobile food pantry received 37,000 pounds of pet food, 2,800 books for children, 5,400 water bottles, and \$47,000 worth of diapers and baby wipes.

All told, the Aurora Mobile Food Pantry has provided more than \$1 million in food to our community during COVID-19. It serves as a reminder of what can happen when Coloradans come together to support one another in times of need.

RECOGNIZING HEROISM OF MANJIT SINGH

Mr. CROW. Mr. Speaker, I rise today to recognize Manjit Singh.

Manjit Singh immigrated to my district from India in 2018 in search of the American Dream. On Wednesday, August 5, Manjit died a hero.

After his first day of truck driving school, Manjit was with his family and friends at Reedley Beach near his new home in California. He saw three children caught in the current of the Kings River and selflessly rushed in to help them.

Manjit did not know how to swim, but he knew bravery. Witnesses say he helped pull one of the three children to safety and endeavored to assist another.

While all of them have recovered, an 8-year-old girl named Samantha would later lose her life. I grieve for her and her family.

I stand amazed by Manjit's sacrifice, and I am grateful to his community for recognizing the heroism he demonstrated that day. I am inspired by the humanity and compassion that link all of us together.

DELAYED DIAGNOSIS DUE TO COVID-19 PANDEMIC

The SPEAKER pro tempore. The Chair recognizes the gentleman from Pennsylvania (Mr. JOYCE) for 5 minutes.

Mr. JOYCE of Pennsylvania. Mr. Speaker, during the coronavirus pan-

demic, American doctors, nurses, technicians, and first responders have cared for patients day in and day out. On the front lines, medical teams have worked tirelessly to care for the coronavirus patients under extraordinary circumstances.

Across the country, we formed a united front against an invisible enemy as medical professions of all stripes pitched in to help, from volunteering their time to donating valuable personal protective equipment to the emergency rooms, the hospitals, and the organizations that needed it the most.

As Americans were asked to stay at home, teams quickly transitioned to telemedicine to provide vital care to vulnerable populations. They took the initiative and developed creative solutions to ensure that patients could receive the care that they so much need.

During this crisis, America's medical community has stepped up during and throughout to provide care and save lives. They truly, too, are heroes.

Now, the work continues. We must acknowledge a secondary healthcare crisis that is occurring in our Nation.

Beginning in March, many hospitals, under the direction of national, State, and local authorities, postponed elective procedures with the goal of slowing the spread of the virus and saving the precious PPE and supplies for those who needed it the most.

Americans, following stay-at-home orders, delayed important medical care, and subsequently, too many have suffered negative healthcare outcomes that could have been prevented.

Earlier this spring, I wrote a letter to Pennsylvania Governor Tom Wolf, urging him and his administration to prioritize the comprehensive health needs of all Pennsylvanians during this crisis.

In my experience alone, I have heard tragic stories from colleagues whose patients have died from cardiac emergencies, from drug overdoses, and from other negative outcomes that could have been prevented.

Six months into this crisis, we are facing an imminent need to restore America's full access to care, including preventive screenings.

My good friend and colleague, Dr. Bruce Waldholtz, is a gastroenterologist and also a longtime volunteer leader of the American Cancer Society. Dr. Waldholtz, as a cancer survivor himself, understands firsthand that a doctor, a patient, needs preventative healthcare.

As he told me this week: "Due to the COVID restrictions, all nonemergency colonoscopies were canceled for several months. Literally, hundreds of patients in our practice had their colonoscopies canceled. This delay, compounded nationally, will result in less screening and an increase in colon cancer cases right now and in years ahead."

Colonoscopies and other preventative screenings save lives. Elective procedures are not unnecessary, and in

many cases, they find disease early before they can become metastatic and cancerous and spread.

Today, many doctors are playing catch-up as they seek to safely provide care to their patients. As I said, the work continues.

I urge Americans: Talk to your doctors and schedule the lifesaving screenings that can definitely make a difference in your healthcare.

As we continue to combat the coronavirus crisis and its many ramifications, I thank our medical teams for their unwavering dedication to American patients. Despite the obstacles we face, together, we can improve Americans' access to the quality healthcare and, together, we can save lives.

□ 0930

RECOGNIZING TOM SEAVER

The SPEAKER pro tempore. The Chair recognizes the gentleman from California (Mr. COSTA) for 5 minutes.

Mr. COSTA. Mr. Speaker, I rise today to pay tribute to one of the greatest baseball players to ever play the game, "Tom Terrific" Seaver, a member of the Miracle Memorale Mets championship season in 1969 that won the World Series. He passed away peacefully earlier this month.

A native of my hometown, Fresno, California, that has had a lot of terrific baseball players, no one ever played the game any better than Tom Terrific. He was a graduate of Fresno High and Fresno City College. During that time, he became a first-round draft pick in 1966. But in between that time, he served in the United States Marine Corps.

Of the many seasons that he played in baseball, he had 12 All-Star appearances, won multiple Cy Young Awards, and was voted into the Baseball Hall of Fame when he first became available on a near-unanimous decision—a gifted and once-in-a-lifetime player.

As I said, he served honorably in the Marine Corps.

Last year, he retired from public life after being diagnosed with dementia. His passing has been a terrible loss for the community of Fresno and all baseball fans across the country.

Please join me in celebrating the life and career of one good person, Tom Seaver.

DEVASTATING CALIFORNIA WILDFIRES

Mr. COSTA. Mr. Speaker, I also rise today to draw attention to the devastating wildfires burning in the West, throughout Washington, Oregon, and California, and other Western States, and, more precisely, this fire, the Creek fire, that is burning near my district in the central Sierra Nevada.

Let me first salute the incredible men and women, the firefighters, the first responders, all of those volunteers who are doing their best, over 14,000 of them throughout California, and many more throughout Western States. They

are putting their lives on the line trying to protect us and trying to protect our forests.

Last Friday, I toured the devastation firsthand and spent 6 hours in the southern perimeter of the Creek fire in the Shaver and Huntington Lake areas. I witnessed the devastating damage that has been done, not only in this picture that is illustrated here, but the many homes that have been lost, as you see here, 1400-degree tornado firestorms that literally melted homes, such as this one here, and many, many other structures.

This summer alone, clearly, has indicated that the numbers of fires that we see, not only in California, but throughout the West, are growing both in quantity and the scope of the devastation. This summer alone, with record heat and extreme conditions made worse by climate change, California has experienced 6 of the largest 20 wildfires in its history—and, sadly, most of those wildfires are still burning.

In the foothills in the high Sierra Nevada outside my home in Fresno, California, the Creek fire continues to grow, and we only have, as of today, about 15 percent containment. But that is similar not only in California but Oregon and Washington and other States, and it is making the air quality something that you have to see to understand and believe. When I left Monday, the air index was 304.

So, what must we do?

We must learn the lessons from these devastating fires, these wildfires. And I think, first of all, it requires much better forest management. We have tried to make changes within the U.S. Forest Service, but much more needs to be done in terms of resources to better manage our forest.

We also must do better land management planning. We have hundreds and thousands of people in the last 30 years living where they didn't live before, and it requires better land use planning.

And, finally, we must address the issues of climate change. When we have extended draught periods and dry conditions, the beetle bark and other factors play into a situation which, in California, from Lassen down to Lake Isabella, we have over 100 million dead trees, and that creates the fuel that adds to the problem.

These are among the lessons that we must learn to better manage our forests for future generations to come.

TREES ARE TRULY AMAZING

The SPEAKER pro tempore. The Chair recognizes the gentleman from Arkansas (Mr. WESTERMAN) for 5 minutes.

Mr. WESTERMAN. Mr. Speaker, I rise today on behalf of the trees, the forest they call home, and all Americans who live near there.

In the words of the poet Joyce Kilmer:

I think that I shall never see
A poem as lovely as a tree.
A tree whose hungry mouth is pressed
Against the Earth's sweet flowing breast.
A tree that looks at God all day
And lifts her leaf-filled arms to pray.
A tree that may in summer wear
A nest of robins in her hair.
Upon whose bosom snow has lain,
Who's intimately lived with rain.
Poems are made by folks like me,
But only God can make a tree.

Mr. Speaker, trees are truly amazing. Through the remarkable process of photosynthesis, trees take in carbon dioxide. They store the carbon in the wood, and they release the oxygen back for us to breathe. Trees provide us with clean air.

But just as important as clean air, trees provide us with clean water. Their roots hold the soil together, and as water percolates through, they clean the water.

Forests also provide wildlife habitat. They provide us places for outdoor recreation. Trees provide amazing green building products, like mass timber. Trees provide packaging for shipping. And let us not forget where toilet paper comes from.

No wonder trees are so admired, as they should be. However, our beloved trees and forests in the West have a different image today, one not of grandeur and amazing beauty, but one of fuel in an apocalyptic inferno that is killing people, destroying homes and property, and leaving barren landscapes below and choking smoke above.

Mr. Speaker, unlike the mythical Ents of middle-earth in the "Lord of the Rings," our trees cannot speak for themselves. I don't claim to be Dr. Seuss' Lorax, but if trees could talk, I believe they would be crying out: Hey, humans, stop loving us to death. Hey, humans, we need some relief, and you are supposed to be taking care of us. Hey, Congress, you are killing us, and if we die, you die. Please work together and apply your husbandry skills to give us a chance. When trees win, humans win.

Mr. Speaker, even as the climate changes and fire threats increase in the West, there is hope if we will just do the right thing. That right thing is forest management, and it looks different on different sites.

Here is an example of how it looks in my home State of Arkansas. This is the Felsenthal National Wildlife Management area. You can see an unmanaged forest, the control site. You see the thick underbrush, the midstory and the understory that is too thick. You see the simple management practices of thinning out the understory, doing controlled burns, and at the bottom you see what a beautiful, healthy forest looks like.

Here is an example of how it looks in California. This is an aerial shot from the devastating Camp fire near Paradise. This red hatched area, that is where the fire burned. This dark red line, that is where the fire was stopped.

You can see this little band right here. That was actually a firebreak
