Whereas estuary regions cover only 13 percent of the land area in the continental United States but contain nearly 43 percent of the population, 40 percent of the jobs, and nearly 50 percent of the economic output of the United States;

Whereas the oceans, estuaries, and Great Lakes of the United States continue to fuel economic growth across the United States, which is evidenced by the fact that, by 2016—

(1) employment levels in economic sectors relating to oceans and estuaries had increased by 14.5 percent from employment levels in those sectors in 2007, before the Great Recession; and

(2) the average employment level of the entire economy of the United States had increased by 4.8 percent from that employment level in 2007, before the Great Recession;

Whereas, between 2015 and 2016, economic sectors relating to estuaries, oceans, and Great Lakes in the United States—

(1) created 85,000 new jobs;

(2) employed 3,300,000 individuals; and

(3) contributed \$124,000,000,000 to the gross domestic product;

Whereas, by 2018, the ocean economy supported 2,300,000 jobs in the United States, and the compensation paid to employees in such sector was \$161,900,000,000;

Whereas the commercial and recreational fishing industries support more than 1,740,000 jobs in the United States;

Whereas, in 2017—

(2) many species that are listed as threatened or endangered species;

Whereas estuaries provide critical ecosystem services that protect human health and public safety, including water filtration, flood control, shoreline stabilization, erosion prevention, and the protection of coastal communities during hurricanes, storms, and other extreme weather events;

Whereas, by the 1980s, the United States had already lost more than 50 percent of the wetlands that existed in the original 13 colonies;

Whereas some bays in the United States that were once filled with fish and oysters

have become dead zones filled with excess nutrients, chemical waste, and marine debris;

Whereas section 320 of the Federal Water Pollution Control Act (33 U.S.C. 1330) (commonly known as the “Clean Water Act”) authorizes the development of comprehensive conservation and management plans to ensure that the designated uses of estuaries are protected and to restore and maintain—

(1) the chemical, physical, and biological integrity of estuaries;

(2) water quality;

(3) a balanced indigenous population of shellfish, fish, and wildlife; and

(4) recreational activities in estuaries;

Whereas 29 coastal and Great Lakes States and territories of the United States operate or contain a National Estuary Program or a National Estuarine Research Reserve;

Whereas scientific study leads to a better understanding of the benefits of estuaries to human and ecological communities;

Whereas the Federal Government, State, local, and Tribal governments, national and community organizations, and individuals work together to effectively manage the estuaries of the United States;

Whereas estuary restoration efforts restore natural infrastructure in local communities in a cost-effective manner, helping to create jobs and reestablish the natural functions of estuaries that yield countless benefits; and

Whereas the week of September 19 through September 26, 2020, is recognized as “National Estuaries Week” to increase awareness among all people of the United States, including Federal Government and State, local, and Tribal government officials, about the importance of healthy estuaries and the need to protect and restore estuaries: Now, therefore, be it
