

(2) end any ongoing administrative actions that weaken—

(A) existing regulations that were promulgated under the Federal Water Pollution Control Act (33 U.S.C. 1251 et seq.); and

(B) other requirements protecting the waters of the United States; and

(3) initiate actions to reverse any administrative actions that have already been completed that weaken the implementation by the Federal Government of—

(A) the Federal Water Pollution Control Act (33 U.S.C. 1251 et seq.); and

(B) other requirements that protect the waters of the United States.

SENATE CONCURRENT RESOLUTION 46—TO CORRECT THE ENROLLMENT OF S. 2330

Mr. BLUMENTHAL (for himself and Mr. MORAN) submitted the following concurrent resolution; which was considered and agreed to:

S. CON. RES. 46

Resolved by the Senate (the House of Representatives concurring). That in the enrollment of S. 2330, an Act to amend the Ted Stevens Olympic and Amateur Sports Act to provide for congressional oversight of the board of directors of the United States Olympic and Paralympic Committee and to protect amateur athletes from emotional, physical, and sexual abuse, and for other purposes, the Secretary of the Senate shall—

(1) in subsection (b)(2)(D) of section 220504 of title 36, United States Code, as amended by section 6(b)(2) of the Act, strike “percent”;

(2) in subsection (a)(1)(H) of section 220541 of title 36, United States Code, as added by section 8(a)(1)(B) of the Act, strike “in a manner than” and insert “in a manner that”;

(3) in subsection (f)(4)(B) of section 220541 of title 36 United States Code, as added by section 8(a)(1)(E) of the Act, insert “and the Committee on the Judiciary” after “the Committee on Energy and Commerce”;

(4) amend paragraph (1) of section 220541(g) of title 36, United States Code, as added by section 8(a)(1)(E) of the Act, to read as follows:

“(1) MANDATORY PAYMENTS.—

“(A) FISCAL YEAR 2021.—On January 4, 2021, the corporation shall make a mandatory payment of \$20,000,000 to the Center for operating costs of the Center for fiscal year 2021.

“(B) SUBSEQUENT FISCAL YEARS.—For fiscal year 2022 and each fiscal year thereafter, the corporation shall make a mandatory payment of \$20,000,000 to the Center not later than the close of business on the first regular business day in January.”; and

(5) in subsection (h)(2)(C)(iii) of section 220541 of title 36, United States Code, as added by section 8(a)(1)(E) of the Act, insert “and the Committee on the Judiciary” after “the Committee on Energy and Commerce”.

SENATE CONCURRENT RESOLUTION 47—RECOGNIZING THAT THE CLIMATE CRISIS IS DISPROPORTIONATELY AFFECTING THE HEALTH, ECONOMIC OPPORTUNITY, AND FUNDAMENTAL RIGHTS OF CHILDREN, EXPRESSING THE SENSE OF CONGRESS THAT RENEWED LEADERSHIP BY THE UNITED STATES IS NEEDED TO ADDRESS THE CLIMATE CRISIS, AND RECOGNIZING THE NEED OF THE UNITED STATES TO DEVELOP A NATIONAL, COMPREHENSIVE, AND SCIENCE-BASED CLIMATE RECOVERY PLAN TO PHASE OUT FOSSIL FUEL EMISSIONS, PROTECT AND ENHANCE NATURAL SEQUESTRATION, AND PUT THE UNITED STATES ON A PATH TOWARD STABILIZING THE CLIMATE SYSTEM

Mr. MERKLEY (for himself, Mr. BOOKER, Mr. MARKEY, Mr. WYDEN, Mr. VAN HOLLEN, Mrs. MURRAY, Mr. HEINRICH, and Mr. WHITEHOUSE) submitted the following concurrent resolution; which was referred to the Committee on Environment and Public Works:

S. CON. RES. 47

Whereas a stable climate system at the founding of the United States allowed human life and human civilization to flourish;

Whereas the United States was founded on the deeply rooted principle of securing “the Blessings of Liberty to ourselves and our Posterity”;

Whereas the Constitution of the United States protects the fundamental rights to life, liberty, property, and equal protection of the laws;

Whereas a climate system capable of sustaining human life—

(1) is fundamental to a free and ordered society; and

(2) is preservative of fundamental rights, including the rights to life, liberty, property, personal security, family autonomy, bodily integrity, and the ability to learn, practice, and transmit cultural and religious traditions;

Whereas the Federal Government sets the energy policy of the United States, which has resulted in a national energy system in which approximately 80 percent of the energy in the United States comes from fossil fuels;

Whereas the national fossil fuel-based energy system has led to carbon dioxide emissions from the United States constituting more than ¼ of cumulative global carbon dioxide emissions;

Whereas the United States is the largest producer of oil and gas in the world, due in substantial part to the Federal Government—

(1) opening up Federal public land and water for fossil fuel extraction; and

(2) actively supporting fossil fuel energy;

Whereas there is an overwhelming scientific consensus that—

(1) human-caused climate change is occurring; and

(2) the rate of global heating and ocean acidification as of September 2020 is a result of the buildup of atmospheric greenhouse gas emissions, primarily carbon dioxide emissions, largely from the combustion of fossil fuels;

Whereas atmospheric carbon dioxide levels of over 400 parts per million as of September 2020 have caused a dangerous planetary en-

ergy imbalance, equivalent to the quantity of energy of exploding more than 400,000 atomic bombs of the kind dropped on Hiroshima, Japan, per day, 365 days per year, across the planet;

Whereas the latest climate science and real-world observations of that energy imbalance demonstrate that the approximately 1 degree Celsius of warming that has already occurred as a result of human-caused climate change is already dangerous and negatively affecting all aspects of society and the economy of the United States;

Whereas the last time that atmospheric concentrations of carbon dioxide were over 400 parts per million—

(1) the seas were 70 to 90 feet higher;

(2) Greenland had no ice; and

(3) coral reefs suffered a major extinction;

Whereas similar conditions will result if the United States does not drastically reduce carbon dioxide emissions and naturally sequester excess concentrations of atmospheric carbon dioxide during the 21st century;

Whereas climate change is a threat to national security, as climate change contributes to and exacerbates global instability and conflict;

Whereas the generation of today’s children was born into a climate system made hazardous to their health and well-being because of human-caused climate change;

Whereas children are uniquely vulnerable to human-caused climate change because of their developing bodies, higher exposure to air, food, and water per unit of body weight, unique behavior patterns, dependence on caregivers, and longevity on the planet;

Whereas human-caused climate change is a public health emergency that is adversely impacting the physical and mental health of children through—

(1) extreme weather events;

(2) rising temperatures and increased heat exposure;

(3) decreased air quality;

(4) altered infectious disease patterns;

(5) food and water insecurity; and

(6) other effects;

Whereas infant mortality increases 25 percent on extremely hot days, with the first 7 days of life representing a period of critical vulnerability;

Whereas heat illness is a leading cause of death and illness in high school athletes, with nearly 10,000 episodes of heat illness occurring annually;

Whereas 8.4 percent of children suffer from allergic rhinitis, and the ragweed pollen season in North America has grown 13 to 27 days longer since 1995 due to higher temperatures and greater atmospheric carbon dioxide levels;

Whereas children exposed to wildfires suffer substantial—

(1) eye symptoms; and

(2) upper and lower respiratory symptoms that lead to increased rates of asthma-related hospitalizations and emergency room visits;

Whereas extreme weather events can negatively impact the mental health of children due to—

(1) family loss or separation;

(2) school interruption;

(3) scarcities of food, water, and shelter; and

(4) public service outages;

Whereas, without immediate steps to address human-caused climate change, the health effects of climate change on children will—

(1) increase in severity and in terms of the number of children impacted; and

(2) cost the United States billions of dollars per year by the end of the 21st century;

Whereas children will largely shoulder the costs of human-caused climate change;
