

Ms. KUSTER of New Hampshire. Mr. Speaker, today I rise to speak in support of legislation we considered earlier this week, the Scarlett's Sunshine on Sudden Unexpected Death Act.

More importantly, today I rise in the memory of my great-niece, Lia, who died from AIDS just 2 years ago. As her mother and grandmother, my sister, said: Our family will never be the same.

Lia is with me in my heart and in the work we do in Congress every day. She turned out to be a formidable advocate at just 6 months of life.

Each year, roughly 3,500 infants tragically die from sudden unexpected death in the United States, impacting families across this country in unimaginable ways.

While the incidence of AIDS has declined by more than 50 percent since the 1990s, we still have so much work to do to better understand the cause of sudden unexpected death syndrome and advance research that can develop prevention strategies and further reduce infant mortality in America.

The bipartisan legislation that the House passed this week, the Scarlett's Sunshine on Unexpected Death Act, is a comprehensive approach to improving national guidelines and data consistency for sudden infant death and sudden unexpected death for children.

It also offers support for the families grieving their loss and supports evidence-based approaches for outreach to decrease risk factors.

I am a proud sponsor of this bill for my great-niece Lia, and I am pleased to see the House advance this important legislation this week.

HONORING SUPREME COURT JUSTICE RUTH
BADER GINSBURG

Ms. KUSTER of New Hampshire. Mr. Speaker, today I rise to honor and commemorate the life of Ruth Bader Ginsburg, the "Notorious RBG."

As Americans across the country mourn this tremendous loss, we look back on an amazing life and an extraordinary career that so clearly shaped the world we live in today.

Ruth Bader Ginsburg was a trailblazer for gender equality, a brilliant jurist who wrote some of our country's most important legal opinions, and a fierce defender of women's rights. Her presence, her grace, indeed, her courage on the Court will be missed by all who cherished her advocacy.

As only the second woman to serve on the highest court in the land, Justice Ginsburg inspired a generation of women—my generation—to join her efforts in creating a more perfect union and combating injustice that lurked in every corner of our country.

From authoring the Court's opinion in landmark cases that struck down laws discriminating against women to issuing blistering dissent in cases like *Ledbetter v. Goodyear*, where she believed the Court was failing to address pay discrimination in the workplace, Justice Ginsburg's voice on the Supreme Court represented the life experiences of so many American women.

Justice Ginsburg led a full and meaningful life, and her chapter in American history will be earmarked for generations to come. It is now up to all of us to complete the work unfulfilled and, in her words: "Fight for the things you care about, but do it in a way that will lead others to join you."

Justice Ginsburg has passed the torch, and now it is up to us.

RESTORE, REBUILD, RENEW

The SPEAKER pro tempore. The Chair recognizes the gentleman from Pennsylvania (Mr. THOMPSON) for 5 minutes.

Mr. THOMPSON of Pennsylvania. Mr. Speaker, our country has undoubtedly been rocked by coronavirus. The pandemic has put a strain on our physical, mental, and financial health.

As time has passed, it has been easy to focus on the negative; however, I am encouraged by the work I have seen from my House Republican colleagues.

Instead of playing partisan politics, I have seen a commitment to America. I have seen a concerted effort to renew the American Dream, restore our way of life, and rebuild the greatest economy ever.

America is worth fighting for, and while the pandemic is currently at the forefront of our minds, there is a bright future ahead of us all. We will rise from this crisis thanks to the resiliency, the grit, and the determination of the American people.

Renewing the American Dream can mean a lot of different things. To me, it starts with two things: broadband connectivity and a capable, trained workforce.

In 21st century America, reliable connectivity is something many of us take for granted. Just like flipping the switch to turn on your lights, we have come to expect reliable, fast, uninterrupted access to the internet.

Still, many communities across the country don't have reliable broadband connectivity, particularly in rural America.

In time, the coronavirus will be a thing of the past, but our national need for reliable broadband connectivity is not going anywhere. Connectivity impacts every aspect of our lives: commerce, education, healthcare, precision agriculture, and more. We can and must invest in this critical infrastructure.

We must also invest in career and technical education opportunities.

Just prior to the pandemic, there were nearly 7 million job openings across the country. Contrasting that figure with the potential of our Nation's learners, whether they are entering the workforce for the first time, learning a new skill, or reentering the workforce after some time away, there is an obvious disconnect. This is often referred to as the "skills gap," and CTE is a proven way to bridge this divide.

A one-size-fits-all approach to education is not an effective way to prepare students for the workforce, and CTE should not be viewed as plan B. It is a valuable educational option that empowers learners of all ages to take control of their personal and their professional futures.

Restoring our way of life includes defeating this virus and keeping America healthy. Thanks to President Trump's leadership, Operation Warp Speed has placed us light-years ahead in researching, developing, and, soon, administering a coronavirus vaccine. The President has unleashed the power of the private sector to partner with the Department of Health and Human Services, as well as the Department of Defense, to help eradicate the virus.

Prior to the pandemic, we had built the greatest economy this country has ever seen, and we will rebuild it. We have done it once, and we can do it again with America-first trade policies and by strengthening our supply chain—that means a strong manufacturing sector that helps America stay competitive—and supporting legislation that strengthens the supply chain and bolsters our Nation's potential for a prosperous future by keeping good-paying, family-sustaining jobs right here at home.

Now I am confident that we can and will defeat this virus and renew the American Dream, restore our way of life, and rebuild our economy.

JUSTICE FOR BREONNA TAYLOR

The SPEAKER pro tempore. The Chair recognizes the gentleman from Texas (Mr. GREEN) for 5 minutes.

Mr. GREEN of Texas. Mr. Speaker, and still I rise.

Mr. Speaker, and still I rise in the name of justice for Breonna Taylor.

Mr. Speaker, it has been widely reported that the death of Breonna Taylor is a tragedy. Her death is being reported as a tragedy: a tragedy because she was innocent, she committed no crime; a tragedy because it happened in her home in the midnight hour; a tragedy because she was unarmed. It has been reported that her death was a tragedy.

But there is a question, Mr. Speaker, about her death that we have to ask that few want to hear, because few want to consider the answer. But this is the preeminent question as it relates to her death, a question that will haunt us because of the history that we have with race relations in this country.

We have to ask the question. It is a question that the status quo doesn't want to hear, because the status quo is concerned about the answer. It is a question that deals with systemic discrimination.

Today I ask the question: If Breonna Taylor were a 26-year-old innocent White woman—innocent White woman, innocent White woman—who was killed in the middle of the night when Black police officers intruded into her home,
