During the pandemic, the Stanley Marketplace team has gone above and beyond to support its community of small business owners, helping them weather the continued challenges of COVID-19.

Stanley Marketplace is guided by a document they call the Stanifesto, which includes these lines:

We believe the best rules are simple and clear: Love your neighbor. Leave each place better than you found it. Be good and do good.

I congratulate the Stanley team on their ongoing work to support our neighbors and locally owned small businesses.

HONORING THE TIRELESS WORKERS IN COLORADO DURING THE 2020 CENSUS

Mr. CROW. Mr. Speaker, it is my honor today to recognize the accomplishments of organizations in my district that have worked tirelessly to promote and ensure their communities are counted in the 2020 Census.

With over 800,000 citizens and 160 languages spoken in my district, making sure that every single resident is counted is difficult work. With the help of many hardworking organizations, Colorado's Sixth District has a self-response rate of 76.5 percent, surpassing its 2010 rate and surpassing the State average of 69.5 percent. In fact, it holds the highest response rate of any Colorado congressional district.

I would particularly like to acknowledge the following 11 organizations for their help in spreading awareness: Together We Count, the Asian Pacific Development Center, the Oromo Community of Colorado, The ARC of Aurora, the Aurora Economic Opportunity Coalition, the Mosaic Church of Aurora, the African Chamber of Commerce in Colorado, the Village Exchange Center, the City of Aurora, Arapahoe County, and Mi Pueblo Market.

These organizations truly make a difference in my district for their tireless work in the 2020 Census.

HONORING MARY HODGE ON HER RETIREMENT

Mr. CROW. Mr. Speaker, it is my honor today to recognize the accomplishments of Mrs. Mary Hodge, a former State legislator and current Adams County commissioner, and congratulate her on her upcoming retirement.

Commissioner Hodge is a Colorado native, who has dedicated her career to making an impact in her home State. Mary, among many things, is a former State representative in the Sixth District of Colorado and a county commissioner. Mary has also taught first grade in Greeley and preschool in Greenwood Springs.

Mary went on to own and operate a motel in Wyoming and worked for several businesses. Her public service began in 2000, when she was elected as a Colorado State representative.

As a servant leader, Commissioner Hodge is a tireless champion for education and small businesses. I com-

mend Mary for her support for the Colorado Air and Space Port. Her steadfast advocacy was integral in bringing that project to fruition.

Commissioner Hodge's diverse professional background and leadership experience has benefited our community for many years.

I congratulate Commissioner Mary Hodge on her retirement and thank her for her service to our community and to Adams County.

ESSENTIAL MEDICAL INNOVATION AND MANUFACTURING MUST COME HOME TO AMERICA

The SPEAKER pro tempore. The Chair recognizes the gentleman from Pennsylvania (Mr. JOYCE) for 5 minutes.

Mr. JOYCE of Pennsylvania. Mr. Speaker, in 2020, America is facing significant threats to our health, to our values, and to our national security. The Chinese Communist Party has attempted to exert control over every facet of America's economy and industry, and even our health and safety.

The coronavirus has exposed that much of America's medical supply chain, as it currently stands, runs directly through China. This should concern every American. Why would we trust a regime that lies about a pandemic to control our access to healthcare?

As a physician, I have long been concerned about the Chinese Communist Government's near monopoly on the manufacturing of generic medicines. And that threat doesn't stop there. We cannot allow the Chinese Communist Party to control our access to prescription drugs and the vital materials that are used in healthcare equipment, not to mention PPE.

For the sake of American patients and our national security, we must correct course and return the essential medical innovation and manufacturing home to America and away from this hostile regime.

For months, the China Task Force has been working to identify realistic and achievable solutions to secure our medical supply chain and ensure that Americans are never beholden to the Chinese Communist Party for our medicines and for our healthcare equipment. We are taking a comprehensive approach to end America's reliance on China and bring jobs home to America.

Our supply chain challenges extend beyond the healthcare regime. From technology to manufacturing, too many materials that we rely on every day are sourced from China.

Earlier this year, I introduced legislation that seeks to end America's dependence on China for rare earth elements and other critical minerals—these are essential, and they are used in the manufacturing of medical supplies, defense technology, and high-tech products—by establishing a supply chain for these materials here in the

United States. It is important for our survival into the upcoming technology advancements that our country is so dependent on. It also requires the Department of Defense to source these materials from America.

Pennsylvania, my home, is home to a dedicated and highly skilled workforce, and I am working on a plan to incentivize companies to bring their research, the development, and the production of materials back home.

As President Trump said earlier this month: "We want to build factories in Baltimore, not Beijing. We want to make our products in Chicago, not Shanghai." And, I might add, we want to make medicines in Chambersburg, not China.

Mr. Speaker, this is the fight of our lives, and we have a real opportunity to make a difference. There is nothing partisan about securing America's place as a leader in the 21st century. There is nothing partisan about bringing jobs home to America. There is nothing partisan about combating a hostile regime's overreach into American lives.

This is not about Republicans or Democrats; this is about Americans. I urge my colleagues from across the political spectrum to get behind our commonsense solutions to counter the Chinese Communist Party and protect our Nation.

It is simple. We must secure our supply chains. We must defeat China in the race to the next-generation technology. We must prepare Americans to succeed in the years to come.

From strengthening our supply chains and bringing jobs home to America and to our allies, countering Chinese interference in our educational institutions, we must take action. We must continue fighting to defend the American people and equip America to lead the way in the 21st century.

As I have said before on this floor, this is the fight of our lifetime, and it is one that we certainly can win.

HONORING HEALTHCARE HEROES

The SPEAKER pro tempore. The Chair recognizes the gentleman from Texas (Mr. BABIN) for 5 minutes.

Mr. BABIN. Mr. Speaker, it is an honor to stand here today and recognize a handful of remarkable individuals from my congressional district for their exceptional contributions to the health and safety of communities across southeast Texas since the outbreak of the COVID-19 virus.

I have seen people come together like never before to help and support each other throughout this unprecedented time. People from all walks of life and from different backgrounds and ideologies have put their own needs aside to respond to the crisis at hand without hesitation.

Today I wish to personally honor and say thank you to our frontline healthcare workers. You have selflessly put yourselves in the path of the virus
