POLICY JUSTIFICATION

Taipei Economic and Cultural Representative Office in the United States (TECRO)—MS-110 Recce Pod System

TECRO has requested to buy six (6) MS-110 Recce Pods; three (3) Transportable Ground Stations; one (1) Fixed Ground station; spare and repair parts; repair and return; site surveys; integration and test equipment; system support and equipment; personnel training and training equipment; publications and technical documentation; U.S. Government and contractor engineering, technical, and logistical support services; and other related elements of logistical and program support. The total estimated program cost is \$367.2 million.

This proposed sale is consistent with U.S. law and policy as expressed in Public Law 96-8.

This proposed sale serves U.S. national, economic, and security interests by supporting the recipient's continuing efforts to modernize its armed forces and to maintain a credible defensive capability. The proposed sale will help improve the security of the recipient and assist in maintaining political stability, military balance, economic and progress in the region.

This proposed sale will improve the recipient's capability to meet current and future threats by providing timely Intelligence,

Surveillance, and Reconnaissance (ISR), capabilities for its security and defense. The enhanced capability is a deterrent to regional threats and will strengthen the recipient's self-defense. The recipient will have no difficulty absorbing these systems into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Collins Aerospace, Westford, MA. The purchaser typically requests offsets. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to the recipient.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

TRANSMITTAL NO. 20-75

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex Item No. vii

(vii) Sensitivity of Technology:

1. The MS-110 is a Non-Program of Record electro-optic and infrared airborne reconnaissance system with long range, day/night, multi-spectral sensor technology. The multi-spectral sensor lets the end user see color and better distinguish subtle features that traditional gray-scale imagery cannot. The pod can transmit imagery via a datalink to ground-stations for near-real time analysis and exploitation.

2. The highest level of classification of information included in this potential sale is UNCLASSIFIED.

3. If a technologically advanced adversary were to obtain knowledge of the hardware and software elements, the information could be used to develop countermeasures or equivalent systems, which might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that the recipient can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been authorized for release and export to the recipient.

ARMS SALES NOTIFICATION

Mr. RISCH. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive prior notification of certain proposed arms sales as defined by that statute. Upon such notification, the Congress has 30 calendar days during which the sale may be reviewed. The provision stipulates that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Senate Foreign Relations Committee.

In keeping with the committee's intention to see that relevant information is available to the full Senate, I ask unanimous consent to have printed in the RECORD the notifications which have been received. If the cover letter references a classified annex, then such annex is available to all Senators in the office of the Foreign Relations Committee, room SD-423.

There being no objections, the material was ordered to be printed in the RECORD, as follows:

The proposed sale will help improve the security of the recipient and assist in maintaining political stability, military balance, economic and progress in the region.

The recipient will use this capability as a deterrent to regional threats and to strengthen homeland defense. Acquisition of HIMARS will contribute to the recipient's goal of updating its military capability while further enhancing interoperability with the United States and other allies. The recipient will have no difficulty absorbing these systems into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The prime contractor will be Lockheed Martin Missile and Fire Control, Grand Prairie, TX. The purchaser typically requests offsets. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will require the assignment of U.S. Government and U.S. contractor representatives in-country; seven (7) U.S. Government and thirteen (13) U.S. contractor representatives for a period of 1 month; two (2) U.S. Government and seven (7) U.S. contractor representatives for a period of two months; and five (5) U.S. contractor representatives for a period of one year.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

TRANSMITTAL NO. 20-77

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex Item No. vii

(vii) Sensitivity of Technology:

1. The M142 High Mobility Artillery Rocket System (HIMARS) is a C-130 transportable wheeled launcher mounted on a 5-ton Family of Medium Tactical Vehicles truck chassis. HIMARS is the modern Army-fielded version of the Multiple Launch Rocket System (MLRS) M270 launcher, and can fire all of the MLRS Family of Munitions (FOM) including

Guided Multiple Launch Rocket System (GMLRS) variants and the Army Tactical Missile System (ATACMS). Utilizing the MLRS FOM, the HIMARS can engage targets between 15 and 300 kilometers with GPS-aided precision accuracy.

2. The M57 Army Tactical Missile System (ATACMS)—Unitary is a conventional, semi-ballistic missile that utilizes a 500-pound high explosive warhead. It has an effective range of between 70 and 300 kilometers, and has increased lethality and accuracy over previous versions of the ATACMS due to a GPS/Precise Position System (PPS) aided navigation system.

3. The International Field Artillery Tactical Data System is the international export version of the Army's Advanced Field Artillery Tactical Data System (AFATDS). It provides networked and fully automated support for the planning, coordination, control, and execution of fires and effects such as mortars, field artillery, rockets and missiles, and close air support. International versions are developed for each customer unique to the weapon and targeting systems in their inventory.

4. The M1152A1 High Mobility Multipurpose Wheeled Vehicle (HMMWV) is a two-man wheeled vehicle primarily used for the transport of personnel or as a shelter carrier.

5. The M240B Machine Gun is a family of belt-fed gas-operated medium machine guns that chamber the 7.62x51 mm NATO cartridge. It has been used extensively by the U.S. Army in infantry companies and as a mounted weapon on ground vehicles.

6. The highest level of information required to facilitate sale, training, operation, and maintenance of these systems is classified SECRET.

7. If a technologically advanced adversary were to obtain knowledge of the hardware and software elements, the information could be used to develop countermeasures or equivalent systems, which might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

8. A determination has been made that the recipient can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

9. All defense articles and services listed in this transmittal have been authorized for release and export to the recipient.
