## PURPOSE OF THE BILL

The purpose of H.R. 2199 is to designate certain Federal land in the State of California as wilderness, and for other purposes.

## BACKGROUND AND NEED FOR LEGISLATION

H.R. 2199, as reported, protects approximately 322,000 acres of federal public lands and 159 miles of free-flowing rivers in Central California, primarily in the Carrizo Plain National Monument (CPNM) and the Los Padres National Forest (LPNF). These protections are achieved with the designation of approximately 244,000 acres as new or expanded wilderness areas, 43,400 acres as potential wilderness, and 34,800 acres as scenic areas. The river miles are protected through a combination of wild, scenic, and recreational designations as components of the National Wild and Scenic River System (NWSRS).

California’s Central Coast is home to some of North America’s most diverse habitats and ecosystems. The LPNF, California’s second largest national forest, provides habitats for more than 460 species of wildlife,<sup>1</sup> and the CPNM supports an incredible diversity of wildlife, including several threatened and endangered species. In addition, due to extensive development throughout the Central Coast, the CPNM holds some of the few remaining grassland and alkali wetland ecosystems in the region—supporting many rare plant and animal species critical for the “long-term conservation of

<sup>1</sup>*Los Padres National Forest—About the Forest*, U.S. FOREST SERV., [https://www.fs.usda.gov/detailful/lpnf/about-forest/?cid=FSM9\\_034061](https://www.fs.usda.gov/detailful/lpnf/about-forest/?cid=FSM9_034061) (last visited Jan. 23, 2020).

the dwindling flora and fauna characteristic of the San Joaquin Valley region.”<sup>2</sup> These public lands also provide invaluable resources for local communities, including watershed protection, clean drinking water, unparalleled opportunities for outdoor recreation, and significant Native American cultural sites.

Unfortunately, the resources protected in the LPNF and CPNM are currently under threat by the Trump administration, which seeks to open this area to oil and gas development. In 2018, the Bureau of Land Management approved a new oil well and pipeline inside the CPNM and recently announced its plans to offer new oil and gas leases on 1.6 million acres in the area.<sup>3</sup>

In contrast to the administration’s preference for pollution-intensive development, H.R. 2199 supports California’s growing recreation and tourism economy by protecting critical habitats as well as existing and future outdoor recreation opportunities.<sup>4</sup> In California, outdoor recreation is estimated to contribute \$92 billion in annual consumer spending, 691,000 direct jobs, \$30.4 billion in wages and salaries, and \$6.2 billion in state and local tax revenue each year.<sup>5</sup>

H.R. 2199 is the product of years of discussion and collaboration with business leaders, conservationists, elected officials, ranchers, mountain bikers, and other stakeholders with a shared interest in providing long-term protections for these iconic lands in California’s Central Coast. The bill also responds to United States Forest Service (USFS) recommendations made in the 2005 Los Padres Forest Plan, adding to the Dick Smith, San Rafael, and Matilija Wilderness areas and to the Sespe Creek and Piru Creek NWSRS components.

The bill also requires a study regarding, and subsequent designation of, the approximately 400-mile long Condor Trail as a National Scenic Trail, connecting the northern and southern portions of the LPNF by a single hiking route. These designations safeguard clean water for California communities, promote public lands recreation, bolster local economies, and preserve critical wildlife habitats.

H.R. 2199 enjoys broad support from nearly 500 Central Coast landowners, businesses, elected officials, farmers, ranchers, civic leaders, wineries, recreationalists, and outfitters. The bill also includes a provision that guarantees tribal access to wilderness areas for cultural and religious purposes.

<sup>4</sup>A table outlining the outstanding remarkable values for river segments designated as wild and scenic by H.R. 2199 is included at the end of this section.

<sup>6</sup>The river segments listed here (and in Section 6 of the bill as reported) add up to approximately 231 miles. Common practice when Congress designates new river segments is for the new designations to include existing areas on the same river segments, which is called redesignation. A redesignation can recategorize an existing designation (e.g., redesignating an existing scenic river as a wild river), or it can simply restate the existing designation while expanding the covered river segment. Of the approximately 231 miles of river segments included in H.R. 2199, approximately 72 miles are redesignations that are already components of the NWSRS.

## HEARINGS

For the purposes of section 103(i) of H. Res. 6 of the 116th Congress—the following hearing was used to develop or consider H.R. 2199: legislative hearing by the Subcommittee on National Parks, Forests, and Public Lands held on July 10, 2019.

## COMMITTEE OVERSIGHT FINDINGS AND RECOMMENDATIONS

Regarding clause 2(b)(1) of rule X and clause 3(c)(1) of rule XIII of the Rules of the House of Representatives, the Committee on Natural Resources' oversight findings and recommendations are reflected in the body of this report.

## COMPLIANCE WITH HOUSE RULE XIII AND CONGRESSIONAL BUDGET ACT

1. *Cost of Legislation and the Congressional Budget Act.* With respect to the requirements of clause 3(c)(2) and (3) of rule XIII of the Rules of the House of Representatives and sections 308(a) and 402 of the Congressional Budget Act of 1974, the Committee has received the following estimate for the bill from the Director of the Congressional Budget Office:

U.S. CONGRESS,  
CONGRESSIONAL BUDGET OFFICE,  
*Washington, DC, February 4, 2020.*

Hon. RAÚL M. GRIJALVA,  
*Chairman, Committee on Natural Resources,  
House of Representatives, Washington, DC.*

DEAR MR. CHAIRMAN: The Congressional Budget Office has prepared the enclosed cost estimate for H.R. 2199, the Central Coast Heritage Protection Act.

If you wish further details on this estimate, we will be pleased to provide them. The CBO staff contact is Janani Shankaran.

Sincerely,

PHILLIP L. SWAGEL,  
*Director.*

Enclosure.

<b>H.R. 2199, Central Coast Heritage Protection Act</b>			
As ordered reported by the House Committee on Natural Resources on November 20, 2019			
By Fiscal Year, Millions of Dollars	2020	2020-2025	2020-2030

* = between zero and \$500,000.			

H.R. 2199 would designate roughly 320,000 acres of federal land in and near the Los Padres National Forest in California for wilderness and scenic purposes and would add 160 miles of river segments to the National Wild and Scenic Rivers System. The bill would generally withdraw those areas from entry under hardrock mining laws and mineral and geothermal leasing, subject to valid existing rights. That is, the bill would not allow new hardrock mining claims or mineral and geothermal leases on that land.

For this estimate, CBO assumes that the legislation will be enacted in fiscal year 2020. Under that assumption, the federal government could incur some costs in 2020, but CBO expects that most of the costs would be incurred in 2021 and later.

Using information from the Forest Service, CBO estimates that the agency would incur upfront costs of about \$3 million to implement the wilderness, scenic area, and wild and scenic river designations. That amount includes costs to develop and update management plans and conduct boundary surveys. H.R. 2199 also would establish a new trail and would authorize the Forest Service to reroute a few existing trails to accommodate the new wilderness areas. Using information from the agency, CBO estimates that those costs would total \$2 million over the 2020–2025 period. Finally, we estimate that the Forest Service would spend less than \$500,000 annually for additional rangers. In total, implementing H.R. 2199 would cost \$7 million over the 2020–2025 period; such spending would be subject to the availability of appropriated funds.

Income from mineral leasing is classified in the budget as offsetting receipts, or reductions in direct spending. Under H.R. 2199, the federal government would forgo receipts because land would be withdrawn from mineral leasing. However, CBO estimates that any increases in direct spending would be insignificant over the 2020–2030 period.

The CBO staff contact for this estimate is Janani Shankaran. The estimate was reviewed by H. Samuel Papenfuss, Deputy Director of Budget Analysis.

2. *General Performance Goals and Objectives.* As required by clause 3(c)(4) of Rule XIII, the general performance goals and objectives of this bill are to designate certain Federal land in the State of California as wilderness.

#### EARMARK STATEMENT

This bill does not contain any Congressional earmarks, limited tax benefits, or limited tariff benefits as defined under clause 9(e), 9(f), and 9(g) of rule XXI of the Rules of the House of Representatives.

#### UNFUNDED MANDATES REFORM ACT STATEMENT

This bill contains no unfunded mandates.

#### EXISTING PROGRAMS

This bill does not establish or reauthorize a program of the federal government known to be duplicative of another program.

APPLICABILITY TO LEGISLATIVE BRANCH

The Committee finds that the legislation does not relate to the terms and conditions of employment or access to public services or accommodations within the meaning of section 102(b)(3) of the Congressional Accountability Act.

PREEMPTION OF STATE, LOCAL, OR TRIBAL LAW

Any preemptive effect of this bill over state, local, or tribal law is intended to be consistent with the bill's purposes and text and the Supremacy Clause of Article VI of the U.S. Constitution.

CHANGES IN EXISTING LAW MADE BY THE BILL, AS REPORTED

In compliance with clause 3(e) of rule XIII of the Rules of the House of Representatives, changes in existing law made by the bill, as reported, are shown as follows (existing law proposed to be omitted is enclosed in black brackets, new matter is printed in italic, and existing law in which no change is proposed is shown in roman):

Such studies shall be made in consultation with the heads of other Federal agencies administering lands through which such additional proposed trails would pass and in cooperation with interested interstate, State, and local governmental agencies, public and private organizations, and landowners and land users concerned. The feasibility of designating a trail shall be determined on the basis of an evaluation of whether or not it is physically possible to develop a trail along a route being studied, and whether the development of a trail would be financially feasible. The studies listed in subsection (c) of this section shall be completed and submitted to the Congress, with recommendations as to the suitability of trail designation, not later than three complete fiscal years from the date of enactment of their addition to this subsection, or from the date of enactment of this sentence, whichever is later. Such studies, when submitted, shall be printed as a House or Senate document, and shall include, but not be limited to:

(1) the proposed route of such trail (including maps and illustrations);

(2) the areas adjacent to such trails, to be utilized for scenic, historic, natural, cultural, or developmental purposes;

(3) the characteristics which, in the judgment of the appropriate Secretary, make the proposed trail worthy of designation as a national scenic or national historic trail; and in the case of national historic trails the report shall include the recommendation of the Secretary of the Interior's National Park System Advisory Board as to the national historic significance based on the criteria developed under the Historic Sites Act of 1935 (49 Stat. 666; 16 U.S.C. 461);

(4) the current status of land ownership and current and potential use along the designated route;

(5) the estimated cost of acquisition of lands or interest in lands, if any;

(6) the plans for developing and maintaining the trail and the cost thereof;

(7) the proposed Federal administering agency (which, in the case of a national scenic or national historic trail wholly or substantially within a national forest, shall be the Department of Agriculture);

(8) the extent to which a State or its political subdivisions and public and private organizations might reasonably be expected to participate in acquiring the necessary lands and in the administration thereof;

(9) the relative uses of the lands involved, including: the number of anticipated visitor-days for the entire length of, as well as for segments of, such trail; the number of months which such trail, or segments thereof, will be open for recreation purposes; the economic and social benefits which might accrue from alternate land uses; and the estimated man-years of civilian employment and expenditures expected for the purposes of maintenance, supervision, and regulation of such trail;

(10) the anticipated impact of public outdoor recreation use on the preservation of a proposed national historic trail and its related historic and archeological features and settings, including the measures proposed to ensure evaluation and preservation of the values that contribute to their national historic significance; and

(11) to qualify for designation as a national historic trail, a trail must meet all three of the following criteria:

(A) It must be a trail or route established by historic use and must be historically significant as a result of that use. The route need not currently exist as a discernible trail to qualify, but its location must be sufficiently known to permit evaluation of public recreation and historical interest potential. A designated trail should generally accurately follow the historic route, but may deviate somewhat on occasion of necessity to avoid difficult routing through subsequent development, or to provide some route variation offering a more pleasurable recreational experience. Such deviations shall be so noted on site. Trail segments no longer possible to travel by trail due to subsequent development as motorized transportation routes may be designated and marked onsite as segments which link to the historic trail.

(B) It must be of national significance with respect to any of several broad facets of American history, such as trade and commerce, exploration, migration and settlement, or military campaigns. To qualify as nationally significant, historic use of the trail must have had a far-reaching effect on broad patterns of American culture. Trails significant in the history of native Americans may be included.

(C) It must have significant potential for public recreational use or historical interest based on historic interpretation and appreciation. The potential for such use is generally greater along roadless segments developed as historic trails, and at historic sites associated with the trail. The presence of recreation potential not related to historic appreciation is not sufficient justification for designation under this category.
