1 **SEC. 2. FINDINGS.**

2 Congress finds that—

3 (1) infrastructure plays a vital role in the lives  
4 of all people in the United States;

5 (2) the aging infrastructure of the United  
6 States is in need of a significant investment to re-  
7 pair, rebuild, and modernize, and in the process, the  
8 Federal Government can take necessary steps to ad-  
9 dress economic and racial injustices that have lim-  
10 ited opportunities for far too many people of the  
11 United States;

12 (3) decades of disinvestment and exclusionary  
13 policies have isolated many people of color, low-in-  
14 come people, and disabled individuals in the United  
15 States from opportunity across the urban centers,  
16 deindustrialized cities, rural regions, and Tribal  
17 areas of the United States, including horribly inad-  
18 equate investment to ensure universal access to  
19 clean air and water, safe and reliable transportation,  
20 affordable housing, quality living wage jobs, high-  
21 speed internet, modernized schools, and parks and  
22 community facilities;

23 (4) while the construction of the National High-  
24 way System remains one of the most transformative

1 achievements in the history of the United States, it  
2 came at the expense of many low-income commu-  
3 nities as well as minority neighborhoods of all in-  
4 come levels that were destroyed by the construction  
5 and isolated from the broader community and from  
6 economic opportunity;

7 (5) investing in repairing, rebuilding, and mod-  
8 ernizing the infrastructure of the United States pre-  
9 sents an opportunity to learn from the mistakes of  
10 the past and reimagine how communities can design  
11 and build infrastructure to be more equitable, help-  
12 ing to address structural inequities faced by  
13 marginalized communities nationwide, including a  
14 lack of good paying jobs, affordable, accessible, and  
15 inclusive housing, decaying roads, bridges, and  
16 schools, inadequate access to technology, and expo-  
17 sure to toxic emissions and poisoned water;

18 (6) accessibility to quality infrastructure, train-  
19 ing, and jobs is an issue across the United States,  
20 spanning from rural and Tribal areas to urban and  
21 suburban areas;

22 (7) transportation infrastructure has a signifi-  
23 cant impact on access to jobs, education, healthcare,  
24 healthy foods, and other essential services;

1           (8) accessibility to essential services is defined  
2           not only by speed, but also by ease of access, which  
3           includes the ability to safely and conveniently access  
4           services by all modes of travel;

5           (9) with a shortage of construction firms that  
6           are ready and able to take on the large-scale infra-  
7           structure projects the United States demands, the  
8           close to 478,000 specialty trade contractors in small-  
9           er minority, women, and disadvantaged businesses  
10          could be supported to meet this demand;

11          (10) small businesses and under-represented  
12          contractors, including minority-, women-, veteran-  
13          owned businesses, and businesses owned by disabled  
14          individuals should have the opportunity to rebuild  
15          their communities and employ hardworking people of  
16          the United States along the way;

17          (11) as of 2018, about  $\frac{1}{4}$  of the infrastructure  
18          workforce is projected to retire or permanently leave  
19          their jobs over the next decade, compounding the in-  
20          frastructure crisis in the United States;

21          (12) as of 2019, the Board of Governors of the  
22          Federal Reserve System finds that skilled trades and  
23          many occupations that do not require a 4-year de-  
24          gree are not considered to be at significant risk of  
25          automation;

1           (13) infrastructure jobs include a wide range of  
2           employment opportunities in both the public and pri-  
3           vate sectors, including design, manufacturing, con-  
4           struction, operation, governance, and maintenance of  
5           infrastructure assets in the United States;

6           (14) more than 1 in 10 jobs in the United  
7           States is a transportation- or infrastructure-related  
8           job;

9           (15) many infrastructure jobs provide competi-  
10          tive wages with low barriers to entry, many of which  
11          require on-the-job training in lieu of formal 4-year  
12          degree higher education programs;

13          (16) in spite of rising income inequality, infra-  
14          structure jobs paid approximately 30 percent more  
15          to low income individuals than other occupations in  
16          2018;

17          (17) women, people of color, and particularly  
18          women of color are underrepresented in construction  
19          jobs;

20          (18) while women across all occupations cur-  
21          rently make up about 50 percent of the workforce,  
22          women in construction and extraction occupations  
23          has hovered around 3 percent for the last 3 decades;

24          (19) while Black Americans make up about 12  
25          percent of the overall workforce, Black Americans

1 only represent 7 percent of construction and extrac-  
2 tion occupations;

3 (20) by focusing on improving workforce devel-  
4 opment systems through targeted employment strat-  
5 egies, the Federal Government can improve the qual-  
6 ity of future projects and better ensure that all com-  
7 munities benefit from investments that—

8 (A) protect workers;

9 (B) expand opportunities for advancement;

10 (C) establish strong labor standards; and

11 (D) redress discriminatory policies that  
12 have unfairly burdened low-income communities  
13 and communities of color with pollution and ge-  
14 ographic isolation; and

15 (21) the Federal Government should make con-  
16 certed efforts to close the workforce gap, through co-  
17 ordination with States and units of local govern-  
18 ment, workforce development agencies, national and  
19 regional nonprofit intermediaries, labor organiza-  
20 tions, and institutions of higher education and other  
21 educational institutions, including historically Black  
22 colleges and universities and Hispanic-serving insti-  
23 tutions, to recruit, train, and retain the next genera-  
24 tion of infrastructure workers in the United States,  
25 with a focus on—

1 (A) achieving gender, ethnic, racial, and  
2 ability diversity; and

3 (B) recruiting and training individuals  
4 from communities with high unemployment  
5 rates, including African-American communities,  
6 Hispanic communities, Indian Tribes, the dis-  
7 abled community, and the LGBTQ community.
