11 outcomes in humans.

12       “(2) Upon receipt of evidence suggesting that pre-

13          this title—

14               “(1) to conduct research regarding the health  
15               effects related to a case of toxic exposure; or

16               “(2) to evaluate evidence regarding the periods  
17               and locations of exposure covered by an existing pre-  
18               sumption of service connection.

19           “(b) EVIDENCE, DATA, AND FACTORS.—The Sec-

6                   “(A) the level of disability and mortality  
7                   caused by the health effects related to the case  
8                   of toxic exposure being evaluated;

9                   “(B) the level of assistance required to re-  
10                  main in the community because of such health

6                   “(B)(i) evaluates the likelihood that a positive  
7                   association exists between an illness and a toxic ex-  
8                   posure while serving in the active military, naval,  
9                   air, or space service; and

10                  “(ii) assesses the toxic exposures and illnesses  
11                  and determines whether the evidence supports a  
12                  finding of a positive association between the toxic  
13                  exposure and the illness.

14                  “(2) In carrying out paragraph (1)(B)(ii), a formal  
15                  evaluation under subsection (a) shall include reviewing all  
16                  relevant data to determine the strength of evidence for a  
17                  positive association based on the following four categories:

18                  “(A) The ‘sufficient’ category, where the evi-  
19                  dence is sufficient to conclude that a positive asso-  
20                  ciation exists.

21                  “(B) The ‘equipoise and above’ category, where  
22                  the evidence is sufficient to conclude that a positive  
23                  association is at least as likely as not, but not suffi-  
24                  cient to conclude that a positive association exists.

1           “(C) The ‘below equipoise’ category, where the  
 2           evidence is not sufficient to conclude that a positive  
 3           association is at least as likely as not, or is not suffi-  
 4           cient to make a scientifically informed judgment.

5           “(D) The ‘against’ category, where the evidence  
 6           suggests the lack of a positive association.

7           “(d) RECOMMENDATION FOR RULEMAKING.—Not  
 8           later than 120 days after the date on which a formal eval-  
 9           uation is commenced, the element of the Department that  
 10          conducts the evaluation shall submit to the Secretary a  
 11          recommendation with respect to establishing a presump-  
 12          tion of service connection for the toxic exposure and ill-

 14          nection, covered by the evaluation.

 21          title—

22               “(1) if the Secretary determines that the pre-  
 23               sumption, or modification, is warranted, the Sec-

7       retary shall publish in the Federal Register a notice  
8       of the determination, including the reasons sup-  
9       porting the determination.

10       “(b) REMOVAL OF PRESUMPTION.—(1) The Sec-  
11      retary may issue regulations to remove an illness from a  
12      presumption of service connection previously established  
13      pursuant to a regulation issued under subsection (a).

14       “(2) Whenever an illness is removed from regulations  
15      pursuant to paragraph (1), or the periods and locations  
16      of exposure covered by a presumption of service connection  
17      are modified under subsection (a)—

18               “(A) a veteran who was awarded compensation  
19      for such illness on the basis of the presumption pro-
