

117TH CONGRESS
1ST SESSION

H. RES. 755

Expressing support for the 2021 United Nations Climate Change Conference in Glasgow and reaffirming the United States commitment to international cooperation combating climate change.

IN THE HOUSE OF REPRESENTATIVES

OCTOBER 28, 2021

Mr. SCHNEIDER (for himself, Mr. KEATING, Mr. MEEKS, Ms. ADAMS, Mr. ALLRED, Ms. BASS, Mrs. BEATTY, Mr. BERA, Mr. BEYER, Mr. BLUMENAUER, Ms. BLUNT ROCHESTER, Ms. BONAMICI, Mr. BOWMAN, Mr. BRENDAN F. BOYLE of Pennsylvania, Mr. BROWN, Ms. BROWNLEY, Mr. CÁRDENAS, Mr. CARSON, Mr. CARTWRIGHT, Mr. CASE, Mr. CASTEN, Ms. CHU, Mr. CICILLINE, Ms. CLARK of Massachusetts, Ms. CLARKE of New York, Mr. CLEAVER, Mr. COHEN, Mr. CONNOLLY, Mr. COOPER, Mr. COSTA, Mr. COURTNEY, Mr. CRIST, Ms. DAVIDS of Kansas, Mr. DANNY K. DAVIS of Illinois, Mr. DEFazio, Ms. DEGETTE, Ms. DELBENE, Mrs. DEMINGS, Mr. DESAULNIER, Mr. DEUTCH, Ms. BARRAGÁN, Mrs. DINGELL, Mr. DOGGETT, Mr. MICHAEL F. DOYLE of Pennsylvania, Ms. ESHOO, Mr. ESPAILLAT, Mr. EVANS, Mr. FOSTER, Ms. LOIS FRANKEL of Florida, Mr. GALLEGO, Mr. GARCÍA of Illinois, Mr. GRIJALVA, Mrs. HAYES, Mr. HIGGINS of New York, Mr. HIMES, Ms. NORTON, Mr. HORSFORD, Ms. HOULAHAN, Mr. HUFFMAN, Ms. JAYAPAL, Mr. JOHNSON of Georgia, Ms. KAPTUR, Ms. KELLY of Illinois, Mr. KHANNA, Mr. KILMER, Mr. KIND, Mr. KRISHNAMOORTHY, Mr. LANGEVIN, Mr. LARSON of Connecticut, Mrs. LAWRENCE, Ms. LEE of California, Ms. LEGER FERNANDEZ, Mr. LEVIN of California, Mr. LEVIN of Michigan, Mr. LIEU, Mr. LOWENTHAL, Mr. MALINOWSKI, Mrs. CAROLYN B. MALONEY of New York, Ms. MANNING, Ms. MATSUI, Ms. MCCOLLUM, Mr. MCEACHIN, Mr. MCGOVERN, Mr. MCNERNEY, Ms. MENG, Mr. MFUME, Ms. MOORE of Wisconsin, Mr. MOULTON, Mrs. MURPHY of Florida, Mr. NADLER, Mrs. NAPOLITANO, Mr. NEGUSE, Ms. NEWMAN, Mr. O'HALLERAN, Ms. OMAR, Mr. PANETTA, Mr. PERLMUTTER, Mr. PETERS, Mr. PHILLIPS, Ms. PINGREE, Ms. PORTER, Mr. PRICE of North Carolina, Mr. QUIGLEY, Mr. RASKIN, Miss RICE of New York, Ms. ROSS, Mr. RUPPERSBERGER, Mr. RUSH, Mr. SABLAN, Ms. SÁNCHEZ, Ms. SCHAKOWSKY, Mr. SCHIFF, Mr. SCOTT of Virginia, Ms. SEWELL, Mr. SHERMAN, Mr. SIRES, Mr. SMITH of Washington, Mr. SOTO, Ms. SPANBERGER, Ms. SPEIER, Mr. STANTON, Ms. STEVENS, Ms. STRICKLAND, Mr. SUOZZI, Mr. SWALWELL, Mr. TAKANO, Mr. THOMPSON of California, Mr. THOMPSON of Mississippi,

Ms. TITUS, Mr. TONKO, Mr. TORRES of New York, Mr. VARGAS, Mr. VEASEY, Ms. VELÁZQUEZ, Ms. WASSERMAN SCHULTZ, Mrs. WATSON COLEMAN, Mr. WELCH, Ms. WILD, Ms. WILLIAMS of Georgia, Ms. WILSON of Florida, Mr. YARMUTH, Mr. AUCHINCLOSS, and Mr. SARBANES) submitted the following resolution; which was referred to the Committee on Foreign Affairs, and in addition to the Committee on Energy and Commerce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned

RESOLUTION

Expressing support for the 2021 United Nations Climate Change Conference in Glasgow and reaffirming the United States commitment to international cooperation combating climate change.

Whereas global climate change is an immediate threat to the United States national security, public health, national economy, and the legacy we will leave to our children;

Whereas leaders of the world's religious communities recognize the grave threat to humanity posed by climate change and our moral obligation to protect the Earth and its people publicly have called upon politicians, business leaders, and the faithful to take action to address climate change;

Whereas the most vulnerable communities, including communities of color, women, children, the elderly, persons with disabilities, low-income communities, and those with underlying health conditions, face even greater health risks as a result of climate change;

Whereas the United States is already seeing climate change exacerbate extreme weather events, with 2020 seeing the most active Atlantic hurricane season on record with 30

named storms and six major hurricanes, the 2019 issuance of the first-ever Extreme Red Flag Warning for wildfires, hundreds of thousands of acres in the Western United States currently or recently experiencing devastating wildfires, and communities around the country regularly facing “100-Year Floods”;

Whereas there is expert-level consensus within the Federal Government, from the intelligence community and Department of Defense to the Department of Agriculture, Department of Transportation, and the National Oceanic and Atmospheric Administration, that climate change is real, currently impacting the United States, and poses a dire threat to our well-being and national security if left unaddressed;

Whereas, on November 23, 2018, the United States Global Change Research Program, a collaboration of thirteen Federal agencies, released volume II of its fourth National Climate Assessment outlining the impact climate change will have on human and societal welfare, increased major severe weather events, adverse impacts on national infrastructure, and significant consequences for human health, in the face of Federal inaction toward combating climate change;

Whereas, on August 6, 2021, the United Nations Intergovernmental Panel on Climate Change (IPCC) released its Working Group I report which found that, unless immediate and broad reductions in greenhouse gas emissions are made by the international community, it will be impossible to limit global warming to 2 degrees Celsius, the warming level which the scientific community believes will precipitate catastrophic climate-related consequences;

Whereas the IPCC Working Group I report found that continued global warming will cause increasingly intense rainfall, flooding, and droughts, sea levels rising and more severe coastal flooding, and further melting of glaciers and ice sheets;

Whereas, on September 29, 2021, the United States Fish and Wildlife Service proposed the removal of 23 species from the Federal Lists of Endangered and Threatened Wildlife due to extinction, listing climate change as a central variable driving the increased extinction of a variety of species;

Whereas, on May 6, 2019, the United Nations Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services (IPBES) released its updated Global Assessment, which found that approximately one million species, 1 in 4, are at risk of extinction as a direct result of climate change;

Whereas the United Nations Secretary-General António Guterres stated that the IPCC Working Group I report is a “code red for humanity . . . [G]reenhouse-gas emissions from fossil-fuel burning and deforestation are choking our planet and putting billions of people at immediate risk,” and that “[g]reenhouse gas concentrations are at record levels. Extreme weather and climate disasters are increasing in frequency and intensity. That is why this year’s United Nations climate conference in Glasgow is so important”;

Whereas the United Nations Environment Program (UNEP) Emissions Gap Report 2020, released in December 2020, highlighted that, while the COVID–19 has caused a slight reduction in carbon emissions, reduction targets will not be met “unless countries pursue an economic re-

covery that incorporates strong decarbonization,” and that “[i]t is not too late to seize future opportunities” in order for emissions reduction targets under the Paris Agreement to be met;

Whereas the UNEP Emissions Gap Report 2020 also highlights the important role of nature-based solutions such as large-scale landscape restoration and reforestation, both in the United States and around the world, in order to meet the climate goals of the Paris Agreement;

Whereas the United Nations Program on Reducing Emissions from Deforestation 2020 Annual Report highlights the critical role of continued and sustained reduction in deforestation and forest degradation around the world, the difficulties the COVID–19 pandemic has presented in slowing deforestation, and the central role that this effort has in combating climate change;

Whereas, in September 2021, the Department of Defense released its Climate Adaptation Plan highlighting climate change’s significant threat to American national security and identifying ways climate change impacts the United States defense posture, including climate-related vulnerabilities of American defense installations, the role of climate change as a threat multiplier driving regional conflict, the potential for disruptions in the defense supply chain, and substantial ongoing operational challenges due to climate change;

Whereas, in September 2021, the Department of Homeland Security released its Climate Action Plan addressing climate change’s impact on domestic security, identifying the potential for weather events to disrupt emergency communications infrastructure, the expected increasing of severe domestic weather events driving loss of life and

property while straining Federal resources, and the potential for climate-related phenomena to drive regional migration;

Whereas investing in energy efficiency and clean energy technologies is an extraordinary job creation opportunity for the United States that already employs more than 3 million people, with solar and wind technicians being among the fastest growing jobs in the entire United States economy;

Whereas the United States can lead the world in innovation and manufacturing clean energy technologies, creating good-paying jobs, modernizing the energy grid, and growing new companies that will be the titans of a new, clean energy economy;

Whereas domestic clean energy jobs continue to be among the fastest growing occupations despite a temporary setback from the COVID–19 pandemic;

Whereas President Joseph R. Biden announced his intent to rejoin the Paris Agreement on January 20, 2021, reaffirming the United States commitment to fight against climate change and to collectively work with the international community toward that goal;

Whereas the Paris Agreement is an international accord that aims to limit the increase in global temperatures to less than two degrees Celsius and urges efforts to limit the increase to one and a half degrees Celsius above preindustrial levels;

Whereas the Paris Agreement highlights the importance of environmental justice and equity in our climate solutions, particularly in light of the impact climate change is ex-

pected to have on vulnerable communities around the globe;

Whereas 195 parties are signatories and 191 are officially party to the Paris Agreement, including the largest emitters of carbon pollution, China, the European Union, and India;

Whereas the 2021 United Nations Climate Change Conference (COP26) is scheduled to be held in Glasgow, Scotland, between October 31 and November 12, 2021;

Whereas the goals of COP26 are to—

(1) secure global net-zero by 2050 and work together to ensure the 1.5 degrees Celsius global warming threshold is not exceeded;

(2) facilitate all countries to protect and restore ecosystems already impacted by climate change, and to enhance our resiliency and adaptation towards the future expected impacts of climate change;

(3) work to ensure international financial contributions toward climate are mobilized; and

(4) work to finalize the Paris rulebook to make the Paris Agreement operational and work to accelerate global action on climate through mobilization of government, businesses, and civil society; and

Whereas the United States, historically as one of the world's top emitters of carbon pollution, has an obligation to actively participate in global efforts to curb climate change: Now, therefore, be it

1 *Resolved*, That the House of Representatives—

2 (1) applauds the Biden administration for re-

3 affirming United States commitment to the Paris

1 Agreement specifically and to our collective responsi-
2 bility to globally combat climate change;

3 (2) encourages the Biden administration to im-
4 plement specific measures to ensure global climate
5 change remains a top priority for this and future ad-
6 ministrations and to cement the United States as a
7 global leader in the fight to mitigate its most severe
8 consequences;

9 (3) voices our strong commitment as legislators
10 toward achieving the climate goals of the Paris
11 Agreement, fulfilling the forthcoming pledges from
12 the COP26 in Glasgow, and advancing other inter-
13 national efforts to keep global warming to no more
14 than 1.5 degrees Celsius and realize global net-zero
15 carbon emissions by 2050 using a whole-of-govern-
16 ment approach; and

17 (4) recognizes the critical responsibility of the
18 United States and other developed nations to ensure
19 all societies have the capabilities to transition to a
20 clean energy economy, the resources to protect
21 against climate-induced disasters, and the necessary
22 assistance to endure climate-related challenges to
23 food security, regional migration, and public health.
