1 SEC. 2. FINDINGS.

Congress makes the following findings:

(1) The People’s Republic of China (PRC) is leveraging its political, diplomatic, economic, military, technological, and ideological power to become a strategic, near-peer, global competitor of the United States. The policies increasingly pursued by the PRC in these domains are contrary to the interests and values of the United States, its partners, and much of the rest of the world.

(2) The current policies being pursued by the PRC—

(A) threaten the future character of the international order and are shaping the rules, norms, and institutions that govern relations among states;

(B) will put at risk the ability of the United States to secure its national interests; and
(C) will put at risk the future peace, prosperity, and freedom of the international community in the coming decades.

(3) After normalizing diplomatic relations with the PRC in 1979, the United States actively worked to advance the PRC’s economic and social development to ensure that it participated in, and benefitted from, the free and open international order. The United States pursued these goals and contributed to the welfare of the Chinese people by—

(A) increasing the PRC’s trade relations and access to global capital markets;

(B) promoting the PRC’s accession to the World Trade Organization;

(C) providing development finance and technical assistance;

(D) promoting research collaboration;

(E) educating the PRC’s top students;

(F) permitting transfers of cutting-edge technologies and scientific knowledge; and

(G) providing intelligence and military assistance.

(4) It is now clear that the PRC has chosen to pursue state-led, mercantilist economic policies, an increasingly authoritarian governance model at home
through increased restrictions on personal freedoms, and an aggressive and assertive foreign policy. These policies frequently and deliberately undermine United States interests and are contrary to core United States values and the values of other nations, both in the Indo-Pacific and beyond. In response to this strategic decision of the CCP, the United States has been compelled to reexamine and revise its strategy towards the PRC.

(5) The General Secretary of the Chinese Communist Party and the President of the People’s Republic of China, Xi Jinping, has elevated the “Great Rejuvenation of the Chinese Nation” as central to the domestic and foreign policy of the PRC. His program demands—

(A) strong, centralized CCP leadership;

(B) concentration of military power;

(C) a strong role for the CCP in the state and the economy;

(D) an aggressive foreign policy seeking control over broadly asserted territorial claims; and

(E) the denial of any universal values and individual rights that are deemed to threaten the CCP.
(6) The PRC views its Leninist model of governance, “socialism with Chinese characteristics”, as superior to, and at odds with, the constitutional models of the United States and other democracies. This approach to governance is lauded by the CCP as essential to securing the PRC’s status as a global leader, and to shaping the future of the world. In a 2013 speech, President Xi said, “We firmly believe that as socialism with Chinese characteristics develops further . . . it is . . . inevitable that the superiority of our socialist system will be increasingly apparent . . . [and] our country’s road of development will have increasingly greater influence on the world.”.

(7) The PRC’s objectives are to first establish regional hegemony over the Indo-Pacific and then to use that dominant position to propel the PRC to become the “leading world power,” shaping an international order that is conducive to the CCP’s interests. Achieving these objectives requires turning the PRC into a wealthy nation under strict CCP rule by using a strong military and advanced technological capability to pursue the PRC’s objectives, regardless of other countries’ interests.
(8) The PRC is reshaping the current international order, which is built upon the rule of law and free and open ideals and principles, by conducting global information and influence operations, seeking to redefine international laws and norms to align with the objectives of the CCP, rejecting the legitimacy of internationally recognized human rights, and seeking to co-opt the leadership and agenda of multinational organizations for the benefit of the PRC and other authoritarian regimes at the expense of the interests of the United States and the international community. In December 2018, President Xi suggested that the CCP views its “historic mission” as not only to govern China, but also to profoundly influence global governance to benefit the CCP.

(9) The PRC is encouraging other countries to follow its model of “socialism with Chinese characteristics”. During the 19th Party Congress in 2017, President Xi said that the PRC could serve as a model of development for other countries by utilizing “Chinese wisdom” and a “Chinese approach to solving problems”.

The PRC is promoting its governance model and attempting to weaken other models of governance by—

(A) undermining democratic institutions;
(B) subverting financial institutions;
(C) coercing businesses to accommodate the policies of the PRC; and
(D) using disinformation to disguise the nature of the actions described in subparagraphs (A) through (C).

The PRC is close to its goal of becoming the global leader in science and technology. In May 2018, President Xi said that for the PRC to reach “prosperity and rejuvenation”, it needs to “endeavor to be a major world center for science and innovation”. The PRC has invested the equivalent of billions of dollars into education and research and development and established joint scientific research centers and science universities.

The PRC’s drive to become a “manufacturing and technological superpower” and to promote “innovation with Chinese characteristics” is coming at the expense of human rights and long-standing international rules and norms with respect to economic competition, and presents a challenge to
United States national security and the security of allies and like-minded countries. In particular, the PRC advances its illiberal political and social policies through mass surveillance, social credit systems, and a significant role of the state in internet governance. Through these means, the PRC increases direct and indirect government control over its citizens’ everyday lives. Its national strategy of “civil-military fusion” mandates that civil and commercial research, which increasingly drives global innovation, is leveraged to develop new military capabilities.

(13) The PRC is using legal and illegal means to achieve its objective of becoming a manufacturing and technological superpower. The PRC uses state-directed industrial policies in anticompetitive ways to ensure the dominance of PRC companies. The CCP engages in and encourages actions that actively undermine a free and open international market, such as intellectual property theft, forced technology transfers, regulatory and financial subsidies, and mandatory CCP access to proprietary data as part of business and commercial agreements between Chinese and foreign companies.

(14) The policies referred to in paragraph (13) are designed to freeze United States and other for-
eign firms out of the PRC market, while eroding competition in other important markets. The heavy subsidization of Chinese companies includes potential violation of its World Trade Organization commitments. In May 2018, President Xi said that the PRC aims to keep the “initiatives of innovation and development security . . . in [China’s] own hands”.

(15) The PRC is advancing its global objectives through a variety of avenues, including its signature initiative, the Belt and Road Initiative (referred to in this section as “BRI”), which is enshrined in the Chinese Constitution and includes the Digital Silk Road and Health Silk Road. The PRC describes BRI as a straightforward and wholly beneficial plan for all countries. Eventually, it seeks to advance an economic system with the PRC at its center, making it the most concrete geographical representation of the PRC’s global ambitions. BRI increases the economic influence of state-owned Chinese firms in global markets, enhances the PRC’s political leverage with government leaders around the world, and provides greater access to strategic nodes such as ports and railways. Through BRI, the PRC seeks political deference through economic dependence.
(16) The PRC is executing a plan to establish regional hegemony over the Indo-Pacific and displace the United States from the region. As a Pacific power, the United States has built and supported enduring alliances and economic partnerships that secure peace and prosperity and promote the rule of law and political pluralism in a free and open Indo-Pacific. In contrast, the PRC uses economic and military coercion in the region to secure its own interests.

(17) The PRC’s military strategy seeks to keep the United States military from operating in the Western Pacific and erodes United States security guarantees.

(18) The PRC is aggressively pursuing exclusive control of critical land routes, sea lanes, and air space in the Indo-Pacific in the hopes of eventually exercising greater influence beyond the region. This includes lanes crucial to commercial activity, energy exploration, transport, and the exercise of security operations in areas permitted under international law.

(19) The PRC seeks so-called “reunification” with Taiwan through whatever means may ultimately be required. The CCP’s insistence that so-
called “reunification” is Taiwan’s only option makes this goal inherently coercive. In January 2019, President Xi stated that the PRC “make[s] no promise to renounce the use of force and reserve[s] the option of taking all necessary means”. Taiwan’s embodiment of democratic values and economic liberalism challenges President Xi’s goal of achieving national rejuvenation. The PRC plans to exploit Taiwan’s dominant strategic position in the First Island Chain and to project power into the Second Island Chain and beyond.

(20) In the South China Sea, the PRC has executed an illegal island-building campaign that threatens freedom of navigation and the free-flow of commerce, damages the environment, bolsters the PLA power projection capabilities, and coerces and intimidates other regional claimants in an effort to advance its unlawful claims and control the waters around neighboring countries. Despite President Xi’s September 2015 speech, in which he said the PRC was not militarizing the South China Sea, during the 2017 19th Party Congress, President Xi announced that “construction on islands and reefs in the South China Sea have seen steady progress”.

(21) The PRC is rapidly modernizing the PLA to attain a level of capacity and capability superior to the United States in terms of equipment and conduct of modern military operations by shifting its military doctrine from having a force “adequate [for] China’s defensive needs” to having a force “commensurate with China’s international status”. Ultimately, this transformation could enable China to impose its will in the Indo-Pacific region through the threat of military force. In 2017, President Xi established the following developmental benchmarks for the advancement of the PLA:

(A) A mechanized force with increased informatized and strategic capabilities by 2020.

(B) The complete modernization of China’s national defense by 2035.

(C) The full transformation of the PLA into a world-class force by 2050.

(22) The PRC’s strategy and supporting policies described in this section undermine United States interests, such as—

(A) upholding a free and open international order;
(B) maintaining the integrity of international institutions with liberal norms and values;
(C) preserving a favorable balance of power in the Indo-Pacific;
(D) ensuring the defense of its allies;
(E) preserving open sea and air lanes;
(F) fostering the free flow of commerce through open and transparent markets; and
(G) promoting individual freedom and human rights.

(23) The global COVID–19 pandemic has intensified and accelerated these trends in the PRC’s behavior and therefore increased the need for United States global leadership and a competitive posture. The PRC has capitalized on the world’s focus on the COVID–19 pandemic by—

(A) moving rapidly to undermine Hong Kong’s autonomy, including imposing a so-called “national security law” on Hong Kong;
(B) aggressively imposing its will in the East and South China Seas;
(C) contributing to increased tensions with India; and
(D) engaging in a widespread and government-directed disinformation campaign to obscure the PRC Government’s efforts to cover up the seriousness of COVID–19, sow confusion about the origination of the outbreak, and discredit the United States, its allies, and global health efforts.

(24) In response to the PRC’s strategy and policies, the United States must adopt a policy of strategic competition with the PRC to protect and promote our vital interests and values.

(25) The United States policy of strategic competition with respect to the People’s Republic of China is part of a broader strategic approach to the Indo-Pacific and the world which centers with United States allies and partners to advance shared values and interests and to preserve and enhance a free, open, democratic, inclusive, rules-based, stable, and diverse region.

(a) OBJECTIVES.—It is the policy of the United States, in pursuing strategic competition with the PRC, to pursue the following objectives:

(1) The United States global leadership role is sustained and its political system and major foundations of national power are postured for long-term political, economic, technological, and military competition with the PRC.

(2) The balance of power in the Indo-Pacific remains favorable to the United States and its allies. The United States and its allies maintain unfettered access to the region, including through freedom of navigation and the free flow of commerce, consistent with international law and practice, and the PRC neither dominates the region nor coerces its neighbors.

(3) The allies and partners of the United States—

(A) maintain confidence in United States leadership and its commitment to the Indo-Pacific region;

(B) can withstand and combat subversion and undue influence by the PRC; and

(5) The United States leads the free and open international order, which is comprised of resilient states and institutions that uphold and defend principles, including sovereignty, rule of law, individual freedom, and human rights. The international order is strengthened to defeat attempts at destabilization by illiberal and authoritarian actors.

(b) Policy.—It is the policy of the United States, in pursuit of the objectives set forth in subsection (a)—

(1) to strengthen the United States domestic foundation by reinvesting in market-based economic growth, education, scientific and technological innovation, democratic institutions, and other areas that improve the United States ability to pursue its vital economic, foreign policy, and national security interests;

(2) to pursue a strategy of strategic competition with the PRC in the political, diplomatic, economic, development, military, informational, and techno-
logical realms that maximizes United States strengths and increases the costs for the PRC of harming United States interests and values of those of United States allies and partners;

(3) to lead a free, open, and secure international system characterized by freedom from coercion, rule of law, open markets and the free flow of commerce, and a shared commitment to security and peaceful resolution of disputes, human rights, and good and transparent governance;

(4) to strengthen and deepen United States alliances and partnerships, prioritizing the Indo-Pacific and Europe, by pursuing greater bilateral and multilateral cooperative initiatives that advance shared interests and values and bolster partner countries’ confidence that the United States is and will remain a strong, committed, and constant partner;

(5) to encourage and aid United States allies and partners in boosting their own capabilities and resiliency to pursue, defend, and protect shared interests and values, free from coercion and external pressure;

(6) to pursue fair, reciprocal treatment and healthy competition in United States-China economic relations by—
23

ulations as necessary to prevent the PRC’s at-
tempts to harm United States economic com-
petitiveness;

ment and advance capacity-building initiatives
that are grounded in the rule of law;

(D) uphold a free press and fact-based reporting;

(14) to demonstrate effective leadership at the United Nations, its associated agencies, and other multilateral organizations and defend the integrity of these organizations against co-optation by illiberal and authoritarian nations;

(15) to prioritize the defense of fundamental freedoms and human rights in the United States relationship with the PRC;

(16) to cooperate with allies, partners, and multilateral organizations, leveraging their significant and growing capabilities to build a network of like-minded states that sustains and strengthens a free and open order and addresses regional and global challenges to hold the Government of the PRC accountable for—

(B) restrictions on religious practices; and,

(C) undermining and abrogating treaties,
other international agreements, and other inter-
national norms related to human rights;

(17) to expose the PRC’s use of corruption, re-
ression, coercion, and other malign behavior to at-
tain unfair economic advantage and deference of
other nations to its political and strategic objectives;

(18) to maintain United States access to the
Western Pacific, including by—

(A) increasing United States forward-de-
deployed forces in the Indo-Pacific region;

(B) modernizing the United States military
through investments in existing and new plat-
tforms, emerging technologies, critical in-theater
force structure and enabling capabilities, joint
operational concepts, and a diverse, operation-
ally resilient and politically sustainable posture;
and

(C) operating and conducting exercises
with allies and partners—

(i) to mitigate the PLA’s ability to
project power and establish contested zones
within the First and Second Island Chains;
(ii) to diminish the ability of the PLA to coerce its neighbors;

(iii) to maintain open sea and air lanes, particularly in the Taiwan Strait, the East China Sea, and the South China Sea; and

(iv) to project power from the United States and its allies and partners to demonstrate the ability to conduct contested logistics;

(19) to deter the PRC from—

(A) coercing Indo-Pacific nations, including by developing more combat-credible forces that are integrated with allies and partners in contact, blunt, and surge layers and able to defeat any PRC theory of victory in the First or Second Island Chains of the Western Pacific and beyond, as called for in the 2018 National Defense Strategy;

(B) using gray-zone tactics below the level of armed conflict; or

(C) initiating armed conflict;

(20) to strengthen United States-PRC military-to-military communication and improve de-escalation procedures to deconflict operations and reduce the
risk of unwanted conflict, including through high-
level visits and recurrent exchanges between civilian
and military officials and other measures, in align-
ment with United States interests; and

(21) to cooperate with the PRC if interests
align, including through bilateral or multilateral
means and at the United Nations, as appropriate.

SEC. 5. SENSE OF CONGRESS.

It is the sense of Congress that the execution of the
policy described in section 4(b) requires the following ac-
tions:

(1) Strategic competition with the PRC will re-
quire the United States—

(A) to marshal sustained political will to
protect its vital interests, promote its values,
and advance its economic and national security
objectives for decades to come; and

(B) to achieve this sustained political will,
persuade the American people and United
States allies and partners of—

(i) the challenges posed by the PRC;

and

(ii) the need for long-term competition
to defend shared interests and values.
(2) The United States must coordinate closely with allies and partners to compete effectively with the PRC, including to encourage allies and partners to assume, as appropriate, greater roles in balancing and checking the aggressive and assertive behavior of the PRC.

(3) The President of the United States must lead and direct the entire executive branch to make the People’s Republic of China as the greatest geopolitical and geoeconomic challenge for United States foreign policy, increasing the prioritization of strategic competition with the PRC and broader United States interests in the Indo-Pacific region in the conduct of foreign policy and assuring the allocation of appropriate resources adequate to the challenge.

(4) The head of every Federal department and agency should designate a senior official at the level of Under Secretary or above to coordinate the department’s or agency’s policies with respect to strategic competition with the PRC.

(5) The ability of the United States to execute a strategy of strategic competition with the PRC will be undermined if our attention is repeatedly diverted
to challenges that are not vital to United States economic and national security interests.

(6) In the coming decades, the United States must prevent the PRC from—

(A) establishing regional hegemony in the Indo-Pacific; and

(B) using that position to advance its assertive political, economic, and foreign policy goals around the world.

(7) The United States must ensure that the Federal budget is properly aligned with the strategic imperative to compete with the PRC by—

(A) ensuring sufficient levels of funding to resource all instruments of United States national power; and

(B) coherently prioritizing how such funds are used.

(8) Sustained prioritization of the challenge posed by the PRC requires—

(A) bipartisan cooperation within Congress; and

(B) frequent, sustained, and meaningful collaboration and consultation between the executive branch and Congress.
(9) The United States must ensure close integration among economic and foreign policymakers, the private sector, civil society, universities and academic institutions, and other relevant actors in free and open societies affected by the challenges posed by the PRC to enable such actors—

(A) to collaborate to advance common interests; and

(B) to identify appropriate policies—

(i) to strengthen the United States and its allies;

(ii) to promote a compelling vision of a free and open order; and

SEC. 133. FINDINGS ON CHINESE INFORMATION WARFARE AND MALIGN INFLUENCE OPERATIONS.

(a) FINDINGS.—Congress makes the following findings:

(1) In the report to Congress required under section 1261(b) of the John S. McCain National Defense Authorization Act for Fiscal Year 2019 (Pub-
lic Law 115–232), the President laid out a broad range of malign activities conducted by the Government of China and its agents and entities, including—

(A) propaganda and disinformation, in which “Beijing communicates its narrative through state-run television, print, radio, and online organizations whose presence is proliferating in the United States and around the world’’;

(B) malign political influence operations, in which “front organizations and agents which target businesses, universities, think tanks, scholars, journalists, and local state and Federal officials in the United States and around the world, attempting to influence discourse’’; and

(2) Chinese information warfare and malign influence operations are ongoing. In January 2019, the Director of National Intelligence, Dan Coats, stated, “China will continue to use legal, political, and economic levers—such as the lure of Chinese markets—to shape the information environment. It is also capable of using cyber attacks against systems in the United States to censor or suppress viewpoints it deems politically sensitive.”

(3) In February 2020, the Director of the Federal Bureau of Investigation, Christopher Wray, testified to the Committee on the Judiciary of the House of Representatives that the People’s Republic of China has “very active [malign] foreign influence efforts in this country,” with the goal of “trying to shift our policy and our public opinion to be more pro-China on a variety of issues”.

(4) The People’s Republic of China’s information warfare and malign influence operations continue to adopt new tactics and evolve in sophistication. In May 2020, the Special Envoy and Coordinator of the Global Engagement Center (GEC), Lea Gabrielle, stated that there was a convergence of Russian and Chinese narratives surrounding COVID–19 and that the GEC had “uncovered a new
network of inauthentic Twitter accounts” that it as-

sessed was “created with the intent to amplify Chi-

nese propaganda and disinformation”. In June

2020, Google reported that Chinese hackers at-

tempted to access email accounts of the campaign

staff of a presidential candidate.

(5) Chinese information warfare and malign in-

fluence operations are a threat to the national secu-

rity, democracy and the economic systems of the

United States, its allies and partners. In October

2018, Vice President Mike Pence warned that “Bei-

jing is employing a whole-of-government approach,

using political, economic, and military tools, as well

as propaganda, to advance its influence and benefit

its interests in the United States.”.

(6) In February 2018, the Director of the Fed-

eral Bureau of Investigation, Christopher Wray, tes-

tified to the Select Committee on Intelligence of the

Senate that the People’s Republic of China is taking

advantage of and exploiting the open research and

development environments of United States institu-

tions of higher education to utilize “professors, sci-

entists and students” as “nontraditional collectors”

of information.

(b) PRESIDENTIAL DUTIES.—The President shall—
(1) protect our democratic institutions and processes from malign influence from the People’s Republic of China and other foreign adversaries; and

(2) consistent with the policy specified in paragraph (1), direct the heads of the appropriate Federal departments and agencies to implement Acts of Congress to counter and deter Chinese and other foreign information warfare and malign influence operations without delay, including—

(A) section 1043 of the John S. McCain National Defense Authorization Act for Fiscal Year 2019 (Public Law 115–232), which authorizes a coordinator position within the National Security Council for countering malign foreign influence operations and campaigns;

(B) section 228 of the National Defense Authorization Act for Fiscal Year 2020 (Public Law 116–92), which authorizes additional research of foreign malign influence operations on social media platforms;

(C) section 847 of such Act, which requires the Secretary of Defense to modify contracting regulations regarding vetting for foreign ownership, control and influence in order to mitigate risks from malign foreign influence;
(D) section 1239 of such Act, which re-
quires an update of the comprehensive strategy
to counter the threat of malign influence to in-
clude the People’s Republic of China;

(E) section 5323 of such Act, which au-
thorizes the Director of National Intelligence to
facilitate the establishment of Social Media
Data and Threat Analysis Center to detect and
study information warfare and malign influence
operations across social media platforms; and

(F) section 119C of the National Security
Act of 1947 (50 U.S.C. 3059), which authorizes
the establishment of a Foreign Malign Influence
Response Center inside the Office of the Direc-
tor of National Intelligence.

SEC. 134. AUTHORIZATION OF APPROPRIATIONS FOR THE
FULBRIGHT-HAYS PROGRAM.

There are authorized to be appropriated, for the 6-
year period beginning on September 30, 2021,
$105,500,000, which shall be expended to promote edu-
cation, training, research, and foreign language skills
through the Fulbright-Hays Program, in accordance with
section 102(b) of the Mutual Educational and Cultural
Exchange Act of 1961 (22 U.S.C. 2452(b)).
SEC. 135. SENSE OF CONGRESS CONDEMNNG ANTI-ASIAN

RACISM AND DISCRIMINATION.

(a) FINDINGS.—Congress makes the following findings:

(1) Since the onset of the COVID–19 pandemic, crimes and discrimination against Asians and those of Asian descent have risen dramatically worldwide. In May 2020, United Nations Secretary-General Antonio Guterres said “the pandemic continues to unleash a tsunami of hate and xenophobia, scapegoating and scare-mongering” and urged governments to “act now to strengthen the immunity of our societies against the virus of hate”.

(2) Asian American and Pacific Island (AAPI) workers make up a large portion of the essential workers on the frontlines of the COVID–19 pandemic, making up 8.5 percent of all essential healthcare workers in the United States. AAPI workers also make up a large share—between 6 percent and 12 percent based on sector—of the biomedical field.

(3) The United States Census notes that Americans of Asian descent alone made up nearly 5.9 percent of the United States population in 2019, and that Asian Americans are the fastest-growing racial
group in the United States, projected to represent 14 percent of the United States population by 2065.

(b) SENSE OF CONGRESS.—It is the sense of Con-
gress that—

(1) the reprehensible attacks on people of Asian
descent and concerning increase in anti-Asian senti-
ment and racism in the United States and around
the world have no place in a peaceful, civilized, and
tolerant world;

(2) the United States is a diverse nation with
a proud tradition of immigration, and the strength
and vibrancy of the United States is enhanced by
the diverse ethnic backgrounds and tolerance of its
citizens, including Asian Americans and Pacific Is-
landers;

(3) the United States Government should en-
courage other foreign governments to use the official
and scientific names for the COVID–19 pandemic,
as recommended by the World Health Organization
and the Centers for Disease Control and Prevention;

and

(4) the United States Government and other
governments around the world must actively oppose
racism and intolerance, and use available and appro-
priate tools to combat the spread of anti-Asian rac-
ism and discrimination.

SEC. 136. SUPPORTING INDEPENDENT MEDIA AND COUN-
TERING DISINFORMATION.

(a) FINDINGS.—Congress makes the following find-
ings:

(1) China is increasing its spending on public
diplomacy including influence campaigns, adver-
tising, and investments into state-sponsored media
publications outside of China. These include, for ex-
ample, more than $10,000,000,000 in foreign direct
investment in communications infrastructure, plat-
forms, and properties, as well as bringing journalists
to China for training programs.

(2) The PRC, through the Voice of China, the
United Front Work Department, and UFWD’s
many affiliates and proxies, has obtained unfettered
access to radio, television, and digital dissemination
platforms in numerous languages targeted at citi-
zens in other regions where China has an interest in
promoting public sentiment in support of the Chi-
inese Communist Party and expanding the reach of
its misleading narratives and propaganda.

(3) Even in Western countries, China spends
extensively on influence operations, such as a
$500,000,000 advertising campaign to attract cable
viewers in Australia and a more than $20,000,000
campaign to influence United States public opinion
via the China Daily newspaper supplement.

(b) The United States Agency for Global
Media.—The United States Agency for Global Media
(USAGM) and affiliate Federal and non-Federal entities
shall undertake the following actions to support inde-
pendent journalism, countering disinformation, and break-
ing the firewall and combatting surveillance in countries
where the Chinese Communist Party and other malign ac-
tors are promoting disinformation, propaganda, and ma-
nipulated media markets:

(1) Radio Free Asia shall expand domestic cov-
erage and digital programming for all RFA China
services and other affiliate language broadcasting
services.

(2) USAGM shall increase funding for Radio
Free Asia’s Mandarin, Tibetan, Uyghur, and Can-
tonese language services.

(3) Voice of America shall establish a real-time
disinformation tracking tool similar to Polygraph for
Russian language propaganda and misinformation.

(4) USAGM shall expand existing training and
partnership programs that promote journalistic
standards, investigative reporting, cybersecurity, and

Subtitle B—International Security Matters

Sec. 221. Definitions.

In this subtitle:

(1) Appropriate congressional committees.—The term “appropriate congressional committees” means—

(A) the Committee on Foreign Relations, the Select Committee on Intelligence, and the Committee on Appropriations of the Senate; and

(B) the Committee on Foreign Affairs, the Permanent Select Committee on Intelligence, and the Committee on Appropriations of the House of Representatives.
(2) COMPANY.—The term “company” means any corporation, company, limited liability company, limited partnership, business trust, business association, or other similar entity.

(3) OTHER SECURITY FORCES.—The term “other security forces”—

(A) includes national security forces that conduct maritime security; and

(B) does not include self-described militias or paramilitary organizations.

SEC. 222. FINDINGS.

Congress makes the following findings:

(1) The People’s Republic of China aims to use its growing military might in concert with other instruments of its national power to displace the United States in the Indo-Pacific and establish hegemony over the region.

(2) The military balance of power in the Indo-Pacific region is growing increasingly unfavorable to the United States because—

(A) the PRC is rapidly modernizing and expanding the capabilities of the PLA to project power and create contested areas across the entire Indo-Pacific region;
(B) PLA modernization has largely focused on areas where it possesses operational advantages and can exploit weaknesses in the United States suite of capabilities; and

(C) current United States force structure and presence do not sufficiently counter threats in the Indo-Pacific, as United States allies, bases, and forces at sea in the Indo-Pacific region are concentrated in large bases that are highly vulnerable to the PRC’s strike capabilities.

(3) This shift in the regional military balance and erosion of conventional deterrence in the Indo-Pacific region—

(A) presents a substantial and imminent risk to the security of the United States; and

(B) left unchecked, could embolden the PRC to take actions, including the use of military force, to change the status quo before the United States can mount an effective response.

(4) The PRC sees an opportunity to diminish confidence among United States allies and partners in the strength of United States commitments, even to the extent that these nations feel compelled to bandwagon with the PRC to protect their interests.
The PRC is closely monitoring the United States reaction to PRC pressure and coercion of United States allies, searching for indicators of United States resolve.

(5) Achieving so-called “reunification” of Taiwan to mainland China is a key step for the PRC to achieve its regional hegemonic ambitions. The PRC has increased the frequency and scope of its exercises and operations targeting Taiwan, such as amphibious assault and live-fire exercises in the Taiwan Strait, PLA Air Force flights that encircle Taiwan, and flights across the unofficial median line in the Taiwan Strait. The Government of the PRC’s full submission of Hong Kong potentially accelerates the timeline of a Taiwan scenario, and makes the defense of Taiwan an even more urgent priority.

(6) The defense of Taiwan is critical to—

(A) defending the people of Taiwan;

(B) limiting the PLA’s ability to project power beyond the First Island Chain, including to United States territory, such as Guam and Hawaii;

(C) defending the territorial integrity of Japan;
(D) preventing the PLA from diverting military planning, resources, and personnel to broader military ambitions; and

(E) retaining the United States credibility as a defender of the democratic values and free-market principles embodied by Taiwan’s people and government;

(7) The PRC capitalized on the world’s attention to COVID–19 to advance its military objectives in the South China Sea, intensifying and accelerating trends already underway. The PRC has sent militarized survey vessels into the Malaysian Exclusive Economic Zone, announced the establishment of an administrative district in the Spratly and Paracel Islands under the Chinese local government of Sansha, aimed a fire control radar at a Philippine navy ship, encroached on Indonesia’s fishing grounds, sunk a Vietnamese fishing boat, announced new “research stations” on Fiery Cross Reef and Subi Reef, landed special military aircraft on Fiery Cross Reef to routinize such deployments, and sent a flotilla of over 200 militia vessels to Whitsun Reef, a feature within the exclusive economic zone of the Philippines.
(8) On July 13, 2020, the Department of State clarified United States policy on the South China Sea and stated that “Beijing’s claims to offshore resources across most of the South China Sea are completely unlawful”.

(9) These actions in the South China Sea enable the PLA to exert influence and project power deeper into Oceania and the Indian Ocean. As Admiral Phil Davidson, Commander of Indo-Pacific Command, testified in 2019, “In short, China is now capable of controlling the South China Sea in all scenarios short of war with the United States.”.

(10) The PLA also continues to advance its claims in the East China Sea, including through a high number of surface combatant patrols and frequent entry into the territorial waters of the Senkaku Islands, over which the United States recognizes Japan’s administrative control. In April 2014, President Barack Obama stated, “Our commitment to Japan’s security is absolute and article five [of the U.S.-Japan security treaty] covers all territory under Japan’s administration, including the Senkaku islands.”.

(11) On March 1, 2019, Secretary of State Michael R. Pompeo stated, “As the South China Sea
is part of the Pacific, any armed attack on Philip-
ippine forces, aircraft, or public vessels in the South
China Sea will trigger mutual defense obligations
under Article 4 of our Mutual Defense Treaty.”.

(12) The PLA is modernizing and gaining crit-
ical capability in every branch and every domain, in-
cluding—

(A) positioning the PLA Navy to become a
great maritime power or “blue-water” navy that
can completely control all activity within the
First Island Chain and project power beyond it
with a fleet of 425 battle force ships by 2030;

(B) increasing the size and range of its
strike capabilities, including approximately
1,900 ground-launched short- and intermediate-
range missiles capable of targeting United
States allies and partners in the First and Sec-
ond Island chains, United States bases in the
Indo-Pacific, and United States forces at sea;

(C) boosting capabilities for air warfare,
including with Russian-origin Su–35 fighters
and S–400 air defense systems, new J–20 5th
generation stealth fighters, advanced H–6
bomber variants, a long-range stealth bomber,
and Y–20 heavy lift aircraft; and
(D) making critical investments in new domains of warfare, such as cyber warfare, electronic warfare, and space warfare.

(13) The PRC is pursuing this modernization through all means at its disposal, including its Military-Civil Fusion initiative, which enlists the whole of PRC society in developing and acquiring technology with military applications to pursue technological advantage over the United States in artificial intelligence, hypersonic glide vehicles, directed energy weapons, electromagnetic railguns, counter-space weapons, and other emerging capabilities.

(14) The United States lead in the development of science and technology relevant to defense is eroding in the face of competition from the PRC. United States research and development spending on defense capabilities has declined sharply as a share of global research and development. The commercial sector’s leading role in innovation presents certain unique challenges to the Department of Defense’s reliance on technology for battlefield advantage.

(15) The PRC has vastly increased domestic research and development expenditures, supported the growth of new cutting-edge industries and tapped
into a large workforce to invest in fostering science and engineering talent.

(16) The PRC is increasing exports of defense and security capabilities to build its defense technology and industrial base and improve its own military capabilities, as well as its influence with countries that purchase and become dependent on its military systems.

SEC. 223. SENSE OF CONGRESS REGARDING BOLSTERING SECURITY PARTNERSHIPS IN THE INDO-PACIFIC.

It is the Sense of Congress that steps to bolster United States security partnership in the Indo-Pacific must include—

(1) supporting Japan in its development of long-range precision fires, munitions, air and missile defense capacity, interoperability across all domains, maritime security, and intelligence, and surveillance and reconnaissance capabilities;

(2) launching a United States-Japan national security innovation fund to solicit and support private sector cooperation for new technologies that could benefit the United States and Japan’s mutual security objectives;
(3) promoting a deeper defense relationship between Japan and Australia, including supporting reciprocal access agreements and trilateral United States-Japan-Australia intelligence sharing;

TITLE IV—INVESTING IN OUR ECONOMIC STATECRAFT

SEC. 401. FINDINGS AND SENSE OF CONGRESS REGARDING THE PRC’S INDUSTRIAL POLICY.

(a) FINDINGS.—Congress makes the following findings:

(1) The People’s Republic of China, at the direction of the Chinese Communist Party, is advancing an ecosystem of anticompetitive economic and industrial policies that—

(A) distort global markets;

(B) limit innovation;
(C) unfairly advantage PRC firms at the expense of the United States and other foreign firms; and

(D) unfairly and harmfully prejudice consumer choice.

(2) Of the extensive and systemic economic and industrial policies pursued by the PRC, the mass subsidization of Chinese firms, intellectual property theft, and forced technology transfer are among the most damaging to the global economy.

(3) Through regulatory interventions and direct financial subsidies, the CCP, for the purposes of advancing national political and economic objectives, directs, coerces, and influences in anti-competitive ways the commercial activities of firms that are directed, financed, influenced, or otherwise controlled by the state, including state-owned enterprises, and ostensibly independent and private Chinese companies, such as technology firms in strategic sectors.

(4) The PRC Government, at the national and subnational levels, grants special privileges or status to certain PRC firms in key sectors designated as strategic, such as telecommunications, oil, power, aviation, banking, and semiconductors. Enterprises receive special state preferences in the form of favor-
able loans, tax exemptions, and preferential land access from the CCP.

(5) The subsidization of PRC companies, as described in paragraphs (3) and (4)—

(A) enables these companies to sell goods below market prices, allowing them to outbid and crowd out market-based competitors and thereby pursue global dominance of key sectors;

(B) distorts the global market economy by undermining longstanding and generally accepted market-based principles of fair competition, leading to barriers to entry and forced exit from the market for foreign or private firms, not only in the PRC, but in markets around the world;

(C) creates government-sponsored or supported de facto monopolies, cartels, and other anti-market arrangements in key sectors, limiting or removing opportunities for other firms; and

(D) leads to, as a result of the issues described in paragraphs (A) through (C), declines in profits and revenue needed by foreign and private firms for research and development.

(6) The CCP incentivizes and empowers Chinese actors to steal critical technologies and trade
secrets from private and foreign competitors operating in the PRC and around the world, particularly in areas that the CCP has identified as critical to advancing PRC objectives. The PRC, as directed by the CCP, also continues to implement anti-competitive regulations, policies, and practices that coerce the handover of technology and other propriety or sensitive data from foreign enterprises to domestic firms in exchange for access to the PRC market.

(7) Companies in the United States and in foreign countries compete with state-subsidized PRC companies that enjoy the protection and power of the state in third-country markets around the world. The advantages granted to PRC firms, combined with significant restrictions to accessing the PRC market itself, severely hamper the ability of United States and foreign firms to compete, innovate, and pursue the provision of best value to customers. The result is an unbalanced playing field. Such an unsustainable course, if not checked, will over time lead to depressed competition around the world, reduced opportunity, and harm to both producers and consumers.

(8) As stated in the United States Trade Representative’s investigation of the PRC’s trade pra-
ties under section 301 of the Trade Act of 1974 (19 U.S.C. 2411), conducted in March 2018, “When U.S. companies are deprived of fair returns on their investment in IP, they are unable to achieve the growth necessary to reinvest in innovation. In this sense, China’s technology transfer regime directly burdens the innovation ecosystem that is an engine of economic growth in the United States and similarly-situated economies.”.

(9) In addition to forced technology described in this subsection, the United States Trade Representative’s investigation of the PRC under section 301 of the Trade Act of 1974 (19 U.S.C. 2411) also identified requirements that foreign firms license products at less than market value, government-directed and government-subsidized acquisition of sensitive technology for strategic purposes, and cyber theft as other key PRC technology and industrial policies that are unreasonable and discriminatory. These policies place at risk United States intellectual property rights, innovation and technological development, and jobs in dozens of industries.

(10) Other elements of the PRC’s ecosystem of industrial policies that harm innovation and distort global markets include—
(A) advancement of policies that encourage local production over imports;

(B) continuation of policies that favor unique technical standards in use by Chinese firms rather than globally accepted standards, which often force foreign firms to alter their products and manufacturing chains to compete;

(C) requirements that foreign companies disclose proprietary information to qualify for the adoption of their standards for use in the PRC domestic market; and

(D) maintenance of closed procurement processes, which limit participation by foreign firms, including by setting terms that require such firms to use domestic suppliers, transfer know-how to firms in the PRC, and disclose proprietary information.

(11) The Belt and Road Initiative (BRI) and associated industry-specific efforts under this initiative, such as the Digital Silk Road, are key vectors to advance the PRC’s mercantilist policies and practices globally. The resulting challenges do not only affect United States firms. As the European Chamber of Commerce reported in a January 2020 report, the combination of concessional lending to Chinese
state-owned enterprises, nontransparent procurement and bidding processes, closed digital standards, and other factors severely limit European and other participation in BRI and make “competition [with Chinese companies] in third-country markets extremely challenging”. This underscores a key objective of BRI, which is to ensure the reliance of infrastructure, digital technologies, and other important goods on PRC supply chains and technical standards.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the challenges presented by a nonmarket economy like the PRC’s economy, which has captured such a large share of global economic exchange, are in many ways unprecedented and require sufficiently elevated and sustained long-term focus and engagement;

(2) in order to truly address the most detrimental aspects of CCP-directed mercantilist economic strategy, the United States must adopt policies that—

(A) expose the full scope and scale of intellectual property theft and mass subsidization of Chinese firms, and the resulting harm to the
United States, foreign markets, and the global economy;

(B) ensure that PRC companies face costs and consequences for anticompetitive behavior;

(C) provide options for affected United States persons to address and respond to unreasonable and discriminatory CCP-directed industrial policies; and

(D) strengthen the protection of critical technology and sensitive data, while still fostering an environment that provides incentives for innovation and competition;

(3) the United States must work with its allies and partners through the Organization for Economic Cooperation and Development (OECD), the World Trade Organization, and other venues and fora—

(A) to reinforce long-standing generally accepted principles of fair competition and market behavior and address the PRC’s anticompetitive economic and industrial policies that undermine decades of global growth and innovation;

(B) to ensure that the PRC is not granted the same treatment as that of a free-market economy until it ceases the implementation of laws, regulations, policies, and practices that
provide unfair advantage on PRC firms in furtherance of national objectives and impose unreasonable, discriminatory, and illegal burdens on market-based international commerce; and

(C) to align policies with respect to curbing state-directed subsidization of the private sector, such as advocating for global rules related to transparency and adherence to notification requirements, including through the efforts currently being advanced by the United States, Japan, and the European Union; and

(4) the United States and its allies and partners must collaborate to provide incentives to their respective companies to cooperate in areas such as—

(A) advocating for protection of intellectual property rights in markets around the world;

(B) fostering open technical standards;

and

(C) increasing joint investments in overseas markets.

TITLE V—ENSURING STRATEGIC
SECURITY

SEC. 501. FINDINGS ON STRATEGIC SECURITY AND ARMS
CONTROL.

Congress makes the following findings:

(1) The United States and the PRC have a
shared interest in strategic security through enforce-
able arms control and non-proliferation agreements.

(2) The United States has long pursued and
continues to seek effective, verifiable, and enforce-
able arms control and non-proliferation agreements
that support United States and allied security by—
(A) controlling the spread of nuclear materials and technology;

(B) placing limits on the production, stockpiling, and deployment of nuclear weapons;

(C) decreasing misperception and miscalculation; and

(D) avoiding destabilizing nuclear arms competition.

(3) In May 2019, Director of the Defense Intelligence Agency Lieutenant General Robert Ashley stated, “China is likely to at least double the size of its nuclear stockpile in the course of implementing the most rapid expansion and diversification of its nuclear arsenal in China’s history.”. The PLA is building a full triad of modernized fixed and mobile ground-based launchers and new capabilities for nuclear-armed bombers and submarine-launched ballistic missiles.

(4) In June 2020, the Department of State raised concerns in its annual “Adherence to and Compliance with Arms Control, Nonproliferation, and Disarmament Agreements and Commitments” report to Congress that the PRC is not complying with the “zero-yield” nuclear testing ban and ac-
cused the PRC of “blocking the flow of data from
the monitoring stations” in China.

(5) The Department of Defense 2020 Report on
Military and Security Developments Involving the
People’s Republic of China states that China “in-
tends to increase peacetime readiness of its nuclear
forces by moving to a launch on warning posture
with an expanded silo-based force”.

(6) The Department of Defense report also
states that, over the next decade, China’s nuclear
stockpile—currently estimated in the low 200s—is
projected to least double in size as China expands
and modernizes its nuclear force.

(7) The PRC is conducting research on its first
potential early warning radar, with technical co-
operation from Russia. This radar could indicate
that the PRC is moving to a launch-on warning pos-
ture.

(8) The PRC plans to use its increasingly capa-
ble space, cyber, and electronic warfare capabilities
against United States early warning systems and
critical infrastructure in a crisis scenario. This poses
great risk to strategic security, as it could lead to
inadvertent escalation.
(9) The PRC’s nuclear expansion comes as a part of a massive modernization of the PLA which, combined with the PLA’s aggressive actions, has increasingly destabilized the Indo-Pacific region.

(10) The PLA Rocket Force (PLARF), which was elevated in 2015 to become a separate branch within the PLA, has formed 11 new missile brigades since May 2017, some of which are capable of both conventional and nuclear strikes. Unlike the United States, which separates its conventional strike and nuclear capabilities, the PLARF appears to not only co-locate conventional and nuclear forces, including dual-use missiles like the DF–26, but to task the same unit with both nuclear and conventional missions. Such intermingling could lead to inadvertent escalation in a crisis. The United States Defense Intelligence Agency determined in March 2020 that the PLA tested more ballistic missiles than the rest of the world combined in 2019.

(11) A January 2021 report from the Institute for Defense Analysis found that many United States and international observers viewed China’s no first-use policy with skepticism, especially in the wake of the expansion and modernization of its nuclear capabilities.
The long-planned United States nuclear modernization program will not increase the United States nuclear weapons stockpile, predates China’s conventional military and nuclear expansion, and is not an arms race against China.

The United States extended nuclear deterrence—

(A) provides critical strategic security around the world;

(B) is an essential element of United States military alliances; and

(C) serves a vital non-proliferation function.

As a signatory to the Treaty on the Non-Proliferation of Nuclear Weapons, done at Washington, London, and Moscow July 1, 1968, the PRC is obligated under Article Six of the treaty to pursue arms control negotiations in good faith.

The United States has, on numerous occasions, called on the PRC to participate in strategic arms control negotiations, but the PRC has thus far declined.

The Governments of Poland, Slovenia, Denmark, Norway, Latvia, Lithuania, Estonia, the Netherlands, Romania, Austria, and Albania, as well
as the Deputy Secretary General of the North Atlantic Treaty Organization, have all encouraged the PRC to join arms control discussions.

SEC. 502. COOPERATION ON A STRATEGIC NUCLEAR DIALOGUE.

(a) STATEMENT OF POLICY.—It is the policy of the United States—

(1) to pursue, in coordination with United States allies, arms control negotiations and sustained and regular engagement with the PRC—

(A) to enhance understanding of each other’s respective nuclear policies, doctrine, and capabilities;

(B) to improve transparency; and

(C) to help manage the risks of miscalculation and misperception;

(2) to formulate a strategy to engage the Government of China on relevant bilateral issues that lays the groundwork for bringing the People’s Republic of China into an arms control framework, including—

(A) fostering bilateral dialogue on arms control leading to the convening of bilateral strategic security talks;

(B) negotiating norms for outer space;
(C) developing pre-launch notification regimes aimed at reducing nuclear miscalculation; and

(D) expanding lines of communication between both governments for the purposes of reducing the risks of conventional war and increasing transparency;

(3) to pursue relevant capabilities in coordination with our allies and partners to ensure the security of United States and allied interests in the face of the PRC’s military modernization and expansion, including—

(A) ground-launched cruise and ballistic missiles;

(B) integrated air and missile defense;

(C) hypersonic missiles;

(D) intelligence, surveillance, and reconnaissance;

(E) space-based capabilities;

(F) cyber capabilities; and

(G) command, control, and communications;

(4) to maintain sufficient force structure, posture, and capabilities to provide extended nuclear deterrence to United States allies and partners;
(5) to maintain appropriate missile defense capabilities to protect threats to the United States homeland and our forces across the theater from rogue intercontinental ballistic missiles from the Indo-Pacific region; and

(6) to ensure that the United States declaratory policy reflects the requirements of extended deterrence, to both assure allies and to preserve its non-proliferation benefits.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) in the midst of growing competition between the United States and the PRC, it is in the interest of both nations to cooperate in reducing risks of conventional and nuclear escalation;

(2) a physical, cyber, electronic, or any other PLA attack on United States early warning satellites, other portions of the nuclear command and control enterprise, or critical infrastructure poses a high risk to inadvertent but rapid escalation;

(3) the United States and its allies should promote international norms on military operations in space, the employment of cyber capabilities, and the military use of artificial intelligence, as an element
of risk reduction regarding nuclear command and control; and

(4) United States allies and partners should share the burden of promoting and protecting such norms by voting against the PRC’s proposals regarding the weaponization of space, highlighting unsafe behavior by the PRC that violates international norms, such as in rendezvous and proximity operations, and promoting responsible behavior in space and all other domains.

**SEC. 503. REPORT ON UNITED STATES EFFORTS TO ENGAGE THE PEOPLE’S REPUBLIC OF CHINA ON NUCLEAR ISSUES AND BALLISTIC MISSILE ISSUES.**

(a) Report on the Future of United States-China Arms Control.—Not later than 180 days after the date of the enactment of this Act, the Secretary of State, in coordination with the Secretary of Defense and the Secretary of Energy, shall submit to the appropriate committees of Congress a report, and if necessary a separate classified annex, that examines the approaches and strategic effects of engaging the Government of China on arms control and risk reduction, including—

(1) areas of potential dialogue between the Governments of the United States and the People’s Re-
public of China, including on ballistic, hypersonic
glide, and cruise missiles, conventional forces, nu-
clear, space, and cyberspace issues, as well as other
new strategic domains, which could reduce the likeli-
hood of war, limit escalation if a conflict were to
occur, and constrain a destabilizing arms race in the
Indo-Pacific;

(2) how the United States Government can
incentivize the Government of China to engage in a
constructive arms control dialogue;

(3) identifying strategic military capabilities of
the People’s Republic of China that the United
States Government is most concerned about and how
limiting these capabilities may benefit United States
and allied security interests;

(4) mechanisms to avoid, manage, or control
nuclear, conventional, and unconventional military
escalation between the United States and the Peo-
ple’s Republic of China; and

(5) opportunities and methods to encourage
transparency from the People’s Republic of China.

(b) REPORT ON ARMS CONTROL TALKS WITH THE
RUSSIAN FEDERATION AND THE PEOPLE’S REPUBLIC OF
CHINA.—Not later than 180 days after the date of the
enactment of this Act, the Secretary of State, in consulta-
tion with the Secretary of Defense and the Secretary of Energy, shall submit to the appropriate committees of Congress a report that describes—

(1) a concrete plan for arms control talks that includes both the People’s Republic of China and the Russian Federation;

(2) if a trilateral arms control dialogue does not arise, what alternative plans the Department of State envisages for ensuring the security of the United States and its allies security from Russian and Chinese nuclear weapons;

(3) effects on the credibility of United States extended deterrence assurances to allies and partners if the United States is faced with two nuclear-armed peer competitors and any likely corresponding implications for regional security architectures;

(4) efforts at engaging the People’s Republic of China to join arms control talks, whether on a bilateral or multilateral basis; and

(5) the interest level of the Government of China in joining arms control talks, whether on a bilateral or multilateral basis.

(e) APPROPRIATE COMMITTEES OF CONGRESS DEFINED.—In this section, the term “appropriate committees of Congress” means—
(1) the Committee on Foreign Relations, the Committee on Armed Services, and the Committee on Energy and Natural Resources of the Senate; and

(2) the Committee on Foreign Affairs, the Committee on Armed Services, and the Committee on Energy and Commerce of the House of Representatives.
