IN THE SENATE OF THE UNITED STATES

FEBRUARY 3, 2021

Mr. WYDEN (for himself and Mr. MERKLEY) introduced the following bill; which was read twice and referred to the Committee on Energy and Natural Resources

A BILL

To amend the Wild and Scenic Rivers Act to designate certain river segments in the State of Oregon as components of the National Wild and Scenic Rivers System, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “River Democracy Act
5 of 2021”.

6 **SEC. 2. FINDINGS.**

7 Congress finds that—

1 (1) on October 2, 2019, Senator Ron Wyden
2 announced a statewide public process to collect
3 nominations from residents of the State of Oregon
4 for Oregon rivers to be designated as components of
5 the National Wild and Scenic Rivers System;

6 (2) over a period of less than 90 days, more
7 than 2,200 residents of the State of Oregon sub-
8 mitted more than 15,000 nominations of free-flowing
9 stream segments for designation as components of
10 the National Wild and Scenic Rivers System, dem-
11 onstrating a deep love and support for components
12 of the National Wild and Scenic Rivers System;

13 (3) components of the National Wild and Scenic
14 Rivers System enhance and protect community
15 drinking water, recreation opportunities, and wildlife
16 habitat;

17 (4) the free-flowing streams of the State of Or-
18 egon are an unparalleled resource for the residents
19 of the State of Oregon and all people of the United
20 States;

21 (5) the residents of the State of Oregon—

22 (A) are proud of and cherish the natural
23 heritage of wild and scenic rivers in the State;
24 and

1 (B) wish to expand the legacy of wild and
2 scenic rivers for the benefit of future genera-
3 tions of residents of the State of Oregon and
4 people of the United States;

5 (6) there are 110,994 miles of rivers and
6 streams in the State of Oregon, but only 2,173 miles
7 of streams were previously included as components
8 of the National Wild and Scenic Rivers System;

9 (7) existing and proposed components of the
10 National Wild and Scenic Rivers System in the
11 State of Oregon range from remote wilderness land
12 to developed recreation areas readily accessible by
13 roads and trails;

14 (8) components of the National Wild and Scenic
15 Rivers System in the State of Oregon and the out-
16 door recreation economy benefit local communities
17 and businesses in rural Oregon and across the State
18 of Oregon, generating \$15,600,000,000 in consumer
19 spending and more than 224,000 jobs in 2019, in-
20 cluding jobs relating to hunting, fishing, rafting, and
21 guiding;

22 (9) components of the National Wild and Scenic
23 Rivers System provide essential habitat for—

24 (A) elk, deer, and other game animals; and

1 (B) species affected by climate change, in-
2 cluding—

3 (i) salmon, steelhead, lamprey, and
4 the Lost River and shortnose sucker;

5 (ii) cutthroat, rainbow, redband, and
6 bull trout (including the Lahontan cut-
7 throat trout); and

8 (iii) numerous other wildlife species;

9 (10) components of the National Wild and Sce-
10 nic Rivers System are important to Indian Tribes
11 because the components—

12 (A) conserve resources for Tribal use; and

13 (B) preserve the cultural history of Indian
14 Tribes dating back more than 10,000 years;
15 and

16 (11) the components of the National Wild and
17 Scenic Rivers System within the State of Oregon
18 have the outstandingly remarkable value of land-
19 scape connectivity, with the components serving as
20 habitat corridors that facilitate the vital movements
21 of animals, plants, genes, water, and energy between
22 and within ecosystems.
