IN THE SENATE OF THE UNITED STATES

SEPTEMBER 28, 2021

Mrs. SHAHEEN (for herself and Mr. PORTMAN) introduced the following bill; which was read twice and referred to the Committee on Foreign Relations

A BILL

To prioritize the efforts of, and to enhance coordination among, United States agencies to encourage countries in Central and Eastern Europe to improve the security of their telecommunications networks, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Transatlantic Tele-
5 communications Security Act”.

1 **SEC. 2. SENSE OF CONGRESS; STATEMENT OF POLICY.**

2 (a) SENSE OF CONGRESS.—It is the sense of Con-
3 gress that—

4 (1) fifth generation (5G) telecommunications
5 networks in allied and partner countries based on
6 common, secure, transparent, democratic standards
7 have the potential to increase cultural, political, and
8 economic exchanges leading to mutual job creation,
9 closer citizen relations, and stronger democratic in-
10 stitutions;

11 (2) the United States has national security and
12 economic interests in assisting Central and Eastern
13 European countries to improve the security of their
14 telecommunications networks by—

15 (A) reducing their dependence on covered
16 telecommunications equipment or services that
17 are often offered with predatory economic in-
18 ducements; and

19 (B) replacing such equipment or services
20 with secure telecommunications equipment or
21 services;

22 (3) the People’s Republic of China’s Belt and
23 Road Initiative and the 17+1 Initiative seek to un-
24 dermine Central and Eastern Europe’s infrastruc-
25 ture resilience and sovereignty through predatory in-
26 ducements from state-linked providers of tele-

1 communications equipment or services, such as
2 Huawei Technologies Company and ZTE Corpora-
3 tion;

4 (4) the United States must assemble a coalition
5 of democratic and like-minded allies and partners—

6 (A) to counter the rise of global malign ac-
7 tors, such as the People’s Republic of China
8 and the Russian Federation; and

9 (B) to build resilience in Central and East-
10 ern Europe against malign influences; and

11 (5) in order to ensure robust military coordina-
12 tion and interoperability with the North Atlantic
13 Treaty Organization (referred to in this Act as
14 “NATO”) and transatlantic allies and partners, the
15 United States should ensure that allies’ and part-
16 ners’ telecommunications networks are secure and
17 free from potential threats in accordance with
18 NATO’s December 2019 London Declaration.

19 (b) STATEMENT OF POLICY.—It is the policy of the
20 United States—

21 (1) to strengthen the transatlantic alliance
22 based on shared values in the face of rising malign
23 influence from the Russian Federation and the Peo-
24 ple’s Republic of China, which seek to undermine
25 democratic institutions and values;

1 (2) to encourage public and private sector in-
2 vestment in European telecommunications infra-
3 structure projects—

4 (A) to ensure secure telecommunications;

5 and

6 (B) to catalyze economic advancement
7 through the highest standards of transparency,
8 accessibility, and competition;

9 (3) to provide economically feasible alternatives
10 to financing from providers of covered telecommuni-
11 cations equipment or services;

12 (4) to engage in diplomacy with European allies
13 and partners to strengthen United States and Euro-
14 pean private sector efforts—

15 (A) to develop common telecommunications
16 technology and industry standards; and

17 (B) to promote them globally;

18 (5) to support the Three Seas Initiative orga-
19 nized by 12 Central and Eastern European countries
20 of the European Union to increase infrastructure re-
21 siliency and reduce reliance on malign actors, includ-
22 ing in the telecommunications space; and

23 (6) to support the people of Ukraine, Moldova,
24 and the Western Balkan countries in their desire for
25 integration into euro-Atlantic institutions and econo-

1 mies through enhanced cross-border telecommuni-
2 cations infrastructure connectivity.
