1ST SESSION

S. 613

To direct the Secretary of Veterans Affairs to carry out a pilot program on dog training therapy and to amend title 38, United States Code, to authorize the Secretary to provide service dogs to veterans with mental illnesses who do not have mobility impairments.

IN THE SENATE OF THE UNITED STATES

MARCH 5, 2021

Mr. TILLIS (for himself, Ms. SINEMA, Mr. CRAMER, and Mrs. FEINSTEIN) introduced the following bill; which was read twice and referred to the Committee on Veterans' Affairs

A BILL

To direct the Secretary of Veterans Affairs to carry out a pilot program on dog training therapy and to amend title 38, United States Code, to authorize the Secretary to provide service dogs to veterans with mental illnesses who do not have mobility impairments.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Puppies Assisting
5 Wounded Servicemembers for Veterans Therapy Act” or
6 the “PAWS for Veterans Therapy Act”.

1 **SEC. 2. FINDINGS.**

2 Congress makes the following findings:

3 (1) According to the analyses of veteran suicide
4 published by the Department of Veterans Affairs in
5 August 2016 and titled “Suicide Among Veterans
6 and Other Americans” and in June 2018 and titled
7 “VA National Suicide Date Report”—

8 (A) an average of 20 veterans died by sui-
9 cide each day in 2014;

10 (B) mental health disorders, including
11 major depression and other mood disorders,
12 have been associated with increased risk for sui-
13 cide;

14 (C) since 2001, the proportion of users of
15 health care from the Veterans Health Adminis-
16 tration with mental health conditions or sub-
17 stance use disorders has increased from ap-
18 proximately 27 percent in 2001 to more than
19 40 percent in 2014; and

20 (D) overall, suicide rates are highest
21 among patients with mental health and sub-
22 stance use disorder diagnoses who are in treat-
23 ment and lower among those who received a
24 mental health diagnosis but were not at risk
25 enough to require enhanced care from a mental
26 health provider.

1 (2) The Department of Veterans Affairs must
2 be more effective in its approach to reducing the
3 burden of veteran suicide connected to mental health
4 disorders, including post-traumatic stress disorder
5 (in this section referred to as “PTSD”), and new,
6 rigorous scientific research provides persuasive
7 weight to the growing anecdotal evidence that serv-
8 ice dogs ameliorate the symptoms associated with
9 PTSD, and in particular, help prevent veteran sui-
10 cide.

11 (3) Several organizations have proven track
12 records of training service dogs for veterans with se-
13 vere PTSD and dramatically improving the quality
14 of life, ability to re-enter society, and, most impor-
15 tantly, the chances of survival of those veterans.
