Congressional Record

PROCEEDINGS AND DEBATES OF THE 117th CONGRESS, SECOND SESSION

Vol. 168

WASHINGTON, WEDNESDAY, SEPTEMBER 28, 2022

No. 157

House of Representatives

The House met at noon and was called to order by the Speaker pro tempore (Mr. CASTEN).

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,
September 28, 2022.

I hereby appoint the Honorable SEAN CASTEN to act as Speaker pro tempore on this day.

NANCY PELOSI,
Speaker of the House of Representatives.

MORNING-HOUR DEBATE

The SPEAKER pro tempore. Pursuant to the order of the House of January 10, 2022, the Chair will now recognize Members from lists submitted by the majority and minority leaders for morning-hour debate.

The Chair will alternate recognition between the parties, with time equally allocated between the parties and each Member other than the majority and minority leaders and the minority whip limited to 5 minutes, but in no event shall debate continue beyond 1:50 p.m.

RECOGNIZING SAMANTHA GONZALEZ

The SPEAKER pro tempore. The Chair recognizes the gentleman from Illinois (Mr. BOST) for 5 minutes.

Mr. BOST. Mr. Speaker, I rise today to celebrate the service of one of my staffers on the Committee on Veterans' Affairs.

Ms. Samantha Gonzalez has dedicated over 10 years of her career to our Nation's veterans, their families, and their survivors. She started on the committee as an intern and has worked her way up to being the communica-

tions director and senior health policy adviser.

Samantha helped craft messages and advance a number of bills supporting veterans and their families—notably, the Choice and VA MISSION Acts, the Commander John Scott Hannon Veterans Mental Health Care Improvement Act, the PACT Act, and so many more landmark pieces of legislation.

There is no doubt that the entire veteran community is better off because of her tireless work on their behalf.

I thank Samantha for her commitment to America's veterans, and wish her the best of luck in her next adventure. She will be missed.

NATIONAL SUICIDE PREVENTION AWARENESS MONTH

Mr. BOST. Mr. Speaker, I rise today to remind everyone that while National Suicide Prevention Awareness Month is concluding, we cannot afford to lower our guard. It dismays me that still so many veterans take their lives every day.

In 2020, approximately 16 veterans died by suicide daily, another year with more than 6,000 veteran suicide deaths. We must stay vigilant.

It took an incredible amount of work to get the Staff Sergeant Parker Gordon Fox Suicide Prevention Grant Program passed in legislation through Congress. I am pleased that the first grants were awarded just last week.

Now, 80 community-based organizations in 43 States, D.C., and American Samoa will receive funding to provide or coordinate suicide prevention services for veterans and their families where and when they need it.

Many veterans either cannot or will not access the VA, but their community knows how to find them, how to get them out of isolation and out of trouble and get them the care that can save their lives and offer them a future of hope. I am excited to see just what these grants can do.

CELEBRATING THE LIFE OF RICHARD MARTIN

Mr. BOST. Mr. Speaker, I rise today to celebrate the life of Richard Martin, a good friend and great man who passed suddenly this week.

You get to know people very closely in stressful conditions. Well, many of you know that I was a professional firefighter, and Richard always had my back.

Richard and I both served on the Murphysboro Fire Department. Richard served with the department for 32 years, from 1984 until 2016. During that time, he was a member of the Firefighters Pension Board and served as the treasurer and president of the Murphysboro Firefighters Local 3042.

Never fully retiring, he went on to become the southern district's legislative representative for the Associated Fire Fighters of Illinois.

Richard was dedicated to his family, his friends, his career of service, our hometown, Murphysboro, and the community. Our prayers are with his family, including daughter Olivia and sons Eli and Zeke during this difficult time.

He was a close friend. He will be missed tremendously. His ability to teach others the art of fighting fire and doing it safely and the number of lives that he saved and the amount of property he saved will not be forgotten.

MESSAGE FROM THE SENATE

A message from the Senate by Ms. Byrd, one of its clerks, announced that the Senate has passed without amendment a bill of the House of the following title:

H.R. 468. An act to amend title 49, United States Code, to permit the use of incentive payments to expedite certain federally financed airport development projects.

The message also announced that the Senate has passed a bill of the following title in which the concurrence of the House is requested:

S. 4673. An act to reauthorize the National Computer Forensics Institute of the United

States Secret Service, and for other purposes.

SLAVERY REMEMBRANCE DAY

The SPEAKER pro tempore. The Chair recognizes the gentleman from Texas (Mr. GREEN) for 5 minutes.

Mr. GREEN of Texas. Mr. Speaker, and still I rise, a proud descendant of the enslaved people who made cotton king and America great; the enslaved people who had a hand in the construction of this Capitol, who had a hand in the construction of the White House; the enslaved people who constructed roads and bridges across the length and breadth of this country, who worked for more than 200 years without a payday. They made the difference for what we call the United States of America on the global scene at the time.

I am honored to be a descendant, and I am honored to say also that this House, on July 27, took the historic step of according them Slavery Remembrance Day, a day to remember their lives and commemorate their accomplishments.

It is important that we do this because, for too long, we have reviled the slaves and revered the enslavers. For too long, we have placed them in such a position as to cause the people who are the very descendants to be ashamed of who they were associated with, with reference to their heritage.

I am proud that this House has taken this important historic step with Slavery Remembrance Day, but I am also proud to say that at 2 o'clock tomorrow in Room 145A at the Washington Convention Center, we will continue to talk about this piece of legislation that we passed, H. Res. 517, the Original Slavery Remembrance Day Resolution.

We will talk about this. We will give a legislative update. The Reverend Al Sharpton will be there, and he will give insightful information on this very topic.

I am just proud that we no longer fear having those persons who made this country great recognized by this Congress, and that had been the case in the past.

I thank all the Members of the Congress, 218 of whom who voted for this legislation. I thank the President, who recognized Slavery Remembrance Day. I thank all of the leadership for allowing this resolution to come to the floor.

I thank Ms. ELIZABETH WARREN, the Senator who supported it, and I thank Mr. HOYER. Mr. HOYER was a man of his word, a person of his word. He said this resolution would come to the floor for a vote. He supported it, and it came to the floor for a vote.

I thank you for the courage that you showed, Mr. HOYER, and the judicious insight that you utilized to make sure that we had this opportunity.

Tomorrow, we continue what I cannot finish today at the convention center, 2 o'clock, Room 145A.

STANDING WITH IRANIAN WOMEN

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from California (Mrs. KIM) for 5 minutes.

Mrs. KIM of California. Mr. Speaker, I rise today to support the people of Iran protesting the ayatollah's regime after a 22-year-old young woman, Mahsa Amini, died after being detained by Iran's morality police for allegedly incorrectly wearing a hijab.

Iranians are standing up to the ayatollah's regime's oppression of women by cutting their hair, burning their hijabs, and demanding freedom.

The Iranian Government began a violent crackdown on the protests that have resulted in dozens of protesters being killed, including women and teenagers.

I want Iranian women to know that the United States stands with you in your fight against the ayatollah's oppression and that the Iranian people have our support in your fight for freedom.

Mr. Speaker, I urge my colleagues to join me in amplifying our voices for the people of Iran and holding the regime accountable.

BRETT FAVRE CONTROVERSY

The SPEAKER pro tempore. The Chair recognizes the gentleman from New Jersey (Mr. PAYNE) for 5 minutes.

Mr. PAYNE. Mr. Speaker, I rise today to discuss an issue that is very troubling. It is an issue that needs to be addressed.

You see, I rise today because of the outrage and shock that Brett Favre stole money that was supposed to be used to buy formula for babies in Mississippi to build a volleyball stadium at the school his daughter played at.

Today, I join the calls of millions of Americans demanding that he and the corrupt Mississippi Republican Governor be held accountable for this action.

Brett Favre is a millionaire. In a 20-year football career, he made over \$100 million. It would take an average Mississippian 20 years to make just \$1 million.

Instead of coming out of his own pocket, he used his power, influence, and relationships with corrupt Republican lawmakers to steal the money from those in Mississippi who need it the most. His actions were criminal, shameful, reckless, and irresponsible.

Brett Favre is from Mississippi. One might think he should have cared that his home State is one of the poorest in the Nation and suffers from one of the highest rates of child poverty in this country.

He should have cared that one in every five Mississippians lives in extreme poverty. One might think that he should have cared that in Jackson, Mississippi, the capital, almost 25 percent of the households depend on minimum wage. In these families, most earn less than \$15,000 a year.

One might think he should have cared that hundreds of thousands of Mississippians often have to boil their water due to the corruption and the neglect by the leadership in Mississippi, the Republican leadership, neglect that Brett Favre was a key and influential factor of, neglect that he and the corrupt Governor benefited from, but Brett didn't care.

In July 2019, Brett texted Governor Bryant, telling him how much he loved Nancy New and John Davis for what they did for him and Southern Miss.

□ 1215

He called the theft of funds amazing. Governor Bryant knew that the money could have been used to provide thousands of low-income families with a year's worth of rent. He knew that it could have covered the cost of their electricity and their childcare bills. He knew that it could have provided thousands of Mississippi families with as many as nine meals a day.

But they didn't care. They didn't care that year after year many of Mississippi's most vulnerable people can't shower, cook, or bathe for weeks on end due to the systemic neglect in their water system.

In a report released earlier this month by Vox, Benji Jones explained the water crisis in Jackson, Mississippi, perfectly. He wrote: "However, infrastructure is often poorly maintained or intentionally overlooked in particular places, leading to a lack of access, affordability, and safety for many communities of color."

Brett and Governor Bryant intentionally overlooked the needs of Mississippi's poor people for a volleyball stadium. Perhaps this New York Times headline says it best: Brett Favre's most memorable stat may now be the \$8 million he helped steal from the poor.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. PAYNE. Mr. Speaker, this is a travesty in this country to take from the poorest of the poor and to neglect what they have done. Brett Favre and that government should atone and pay for what they have done.

The SPEAKER pro tempore. The gentleman is no longer recognized.

REPUBLICAN COMMITMENT TO AMERICA

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from North Carolina (Ms. FOXX) for 5 minutes.

Ms. FOXX. Mr. Speaker, the American people are at their wits' end.

They fear that our great country has fallen into a state of disrepair the likes of which have never been seen before.

They have watched as our time-tested institutions have become engulfed by a smog of bureaucratic rot.

They have gathered at their kitchen tables for nights on end wondering how much further they could stretch their budgets to support their families.

All the while, Washington has trudged onward with more spending schemes and irresponsible policies that are poisoning America.

Mr. Speaker, I cannot overstate the severity of the catastrophes that this administration has created. From the southern border being overrun to inflation that has robbed hardworking Americans and their families, no matter where you turn, the carnage is palpable.

Republicans are taking a stand to end this madness and move America in the right direction. That starts with our Commitment to America. The American people deserve an economy that is strong, a Nation that is safe, a future built on freedom, and a government that is accountable.

These are the tenets of the Commitment to America.

Mr. Speaker, let me be clear, the American people can no longer afford one-party Democrat rule in Washington.

Under one-party rule, Americans are bearing the brunt of 40-year high inflation.

Crime has exploded in major cities across the entire country.

Millions of illegal aliens have poured across the southern border.

Gas and grocery prices are growing by leaps and bounds.

The list goes on and on. Mr. Speaker, there is no denying that.

Americans are not witnessing progress under one-party rule, they are watching our Republic crumble by the second.

It is time for a serious change in leadership in Washington.

No more reckless spending. No more policies that are antithetical to the will of the American people.

No more bureaucratic assaults on the freedoms and values that this country was built upon.

Mr. Speaker, the American people deserve much better than the hand that Washington Democrats have dealt them. In a few short weeks, Americans across the country will make their voices heard, and I can guarantee you that they will not speak softly.

The disarray, incompetence, and negligence in Washington must be put to an end. It is time that Washington truly delivers on the priorities of hardworking taxpayers and families across our country. There is not a second to lose.

NEW SAVINGS FOR MEDICARE PART B

The SPEAKER pro tempore. The Chair recognizes the gentleman from Connecticut (Mr. COURTNEY) for 5 minutes.

Mr. COURTNEY. Mr. Speaker, a couple days ago, Medicare beneficiaries all across America received very welcome news. For 2023, Medicare announced that the part B premiums, which are deducted from seniors' Social Security checks, will actually be reduced by \$6 a

month. That is the first time in 11 years that the Medicare program has actually cut the premiums that erode month by month Social Security checks.

There is a reason for this, which is that last year there was a spike in terms of the part B premiums. It was driven by the fact that a new drug, Aduhelm, was approved just about the same time the actuaries were calculating the part B premiums.

Aduhelm's cost, when it was initially approved by FDA, was about \$58,000 per patient. That one medication resulted in half of the increase last year in terms of Medicare part B premiums. There was a hue and cry about the cost of that drug after the new premium had kicked in. They cut the price from \$58,000 per patient to \$26,000. Medicare also limited the use of that drug in terms of experimental, controlled settings because it was so brand new.

Unfortunately, the premium had already kicked in, and a number of us were working with the Department of Health and Human Services saying that the premium should be adjusted because it was based on data which had been overtaken by events. At that point, it was too late for Medicare to readjust the premium in the last calendar year, 2022, but next year they will make the adjustment, and those premiums will go down.

In about a week or so, the government is going to be announcing the COLA for Social Security for 2023 for seniors, which is obviously a very intensely watched event. Right now, the projection, based again on the market-basket system that they use to calculate COLA, looks like it is going to be an 8 percent increase for Social Security for 2023.

Mr. Speaker, I think it is important to note that in past years some of those COLA increases have been eroded, as I mentioned earlier, by increases in the part B premium. In 2023, the opposite is going to happen. There will actually be, not only a COLA increase but a reduction in the premium, and that means more money in the pockets of seniors and people on disability.

Again, this is very welcome news. Obviously, inflation has been really tough for a lot of families, and particularly seniors on fixed incomes, but in 2023 there is going to be, again, more relief coming their way.

It also coincides with the new Inflation Reduction Act, which will be capping the cost of insulin, starting in January, at \$35 a month. For seniors who are on Medicare today who need insulin, which is a life or death drug, insulin roughly costs about \$160 per month.

There will be savings, not only in terms of a new COLA and a reduced part B premium, but also the cost of insulin will be capped at \$35 a month. In 2024 and 2025, under the Inflation Reduction Act, because of savings resulting from price negotiation, which the bill finally enabled and empowered, we

are going to see an overall cap on out-of-pocket costs for prescription drugs at \$2,000 for seniors through the part D program.

If you talk to anybody who has an MS condition or an MS patient in someone's family, the mere infusion of a monthly MS treatment basically forces most seniors onto Medicaid because it is thousands of dollars per treatment.

Starting with this new program, their overall cap for a year will be \$2,000. That is why the Multiple Sclerosis Society endorsed this bill, as did many other patient advocacy groups. As valuable as Medicare was for prescription drugs, the existing system still is way too expensive.

With the Inflation Reduction Act, we are going to cap insulin, we are going to cap the overall cost of medications. Unbelievably, just a few days ago, the minority came out with their commitment for America where they actually want to repeal the law on which the ink is barely dry, that is going to provide a ray of hope for seniors to pay for the cost of lifesaving drugs. We can't let that happen.

Starting in January, we are going to see the real benefits of that law, as well as welcome news in terms of a higher COLA and a smaller part B premium.

RESIDENCY AND RURAL HOSPITALS

The SPEAKER pro tempore. The Chair recognizes the gentleman from Pennsylvania (Mr. JOYCE) for 5 minutes.

Mr. JOYCE of Pennsylvania. Mr. Speaker, today, fourth-year medical students submitted their applications to residency programs across our country, preparing to enter the workforce as surgeons, specialists, and family doctors.

As these students begin the process of choosing the hospitals where they will work, I urge them to consider working in rural communities. Working in facilities that are struggling right now to recruit new physicians, and these new medical students—these new, highly-trained individuals—will be able to serve communities that desperately need them.

For too long, a lack of doctors has been a significant barrier to care for families in rural Pennsylvania. To address this critical shortage, I am proud to have created the Homegrown Healthcare Initiative, which pairs third- and fourth-year medical students with hospitals across Pennsylvania's 13th Congressional District.

So far we have been able to place nearly 30 students in hospitals in Blair, Cambria, Fulton, and Franklin counties. It is time to ensure the students who were raised in rural communities return to these communities to live, to work, and to practice medicine.

To all of the medical students applying for residency today, good luck, and

I thank them for all the work that they will do on behalf of their patients.

OUT OF CONTROL INFLATION

Mr. JOYCE of Pennsylvania. Mr. Speaker, today, we recognize the problems that we are facing with a country that has spiraling out of control inflation. We have an opportunity with the Republican Commitment to America, the commitment that the Republican Party has put forward, to make a Nation that is safe, to make a Nation that is accountable.

As Republicans, we have brought forth a four-part statement that will have the necessary oversight to control and have the citizens have the ability to have their voices heard.

The Commitment to America is the path forward throughout this spiraling inflation that is affecting each and every American today.

Mr. Speaker, I urge all Americans to look at this valuable commitment that we as Republicans will bring forward.

HAWAIIAN HISTORY MONTH

The SPEAKER pro tempore. The Chair recognizes the gentleman from Hawaii (Mr. KAHELE) for 5 minutes.

Mr. KAHELE. Mr. Speaker, I rise today to continue to honor September as Hawaiian History Month in my home State of Hawaii.

Today, in "olelo Hawaii", "Hawaiian language", I will honor Joseph Kaho'oluhi Nawahi.

Joseph Kaho'oluhi Nāwahīkalani'ōpu'u was born on January 13, 1842 in Kaimū, Puna on the Island of Hawai'i.

Keaweolalo was his true mother. Nāwahīkalani'ōpu'u was his true father. Joseph Pa'akaula was his foster father. Joseph Pa'akaula was a teacher at Ke Kula 'Aiakalā.

Nāwahī attended 4 schools, Ke Kula 'Aiakalā, Ke Kula Hānai O Hilo, Ke Kulanui O Lahainaluna and ke Kula Ali'i O Kahehuna.

Ua hānau 'ia 'o Iosepa Kaho'oluhi Nāwahīkalani'ōpu'u ma ka lā 'umikūmūākolū o Ianuali makahiki 'umikāmāwalu kanahākūmālua ma Kaimū, Puna, Moku o Keawe.

'O Keaweolalo kona lūau'i makuahine. 'O Nāwahīkalani'ōpu'u kona lūau'i makua kāne. 'O Iosepa Pa'akaula kona makua hānai. He kumu 'o Iosepa Pa'akaula ma ke Kula 'Aiakalā.

'Ehā kula a Nāwahī i komo ai. 'O Ke Kula 'Aiakalā, Ke Kula Hānai O Hilo. Ke Kulanui O Lahainaluna a me Kula Ali'i O Kahehuna.

Mr. Speaker, these words that I just shared are a simple recitation of biographical facts regarding Joseph Kaho'oluhi Nāwahīkalani'ōpu'u, who was a Native Hawaiian nationalist leader, legislator, lawyer, newspaper publisher, and painter.

This speech has been memorized by hundreds of elementary school students—my own keiki included—who attend the Hawaiian language immersion school, Ke Kula 'o

Nāwahīkalani'ōpu'u. These keiki not only honor these Native Hawaiian heroes but ensure that their names are heard, and their work lives on through them for generations to come. "E ola kou inoa e Nawahi."

The SPEAKER pro tempore. The gentleman from Hawaii will provide a translation of his remarks to the Clerk.

□ 1230

SHOULD WE HAVE RURAL TOWNS

The SPEAKER pro tempore. The Chair recognizes the gentleman from California (Mr. LAMALFA) for 5 minutes.

Mr. LAMALFA. Mr. Speaker, I am pointing to a map here showing the several fires we have had in Northern California. This is only a small snippet. There is much more besides that that I could show you.

This is mostly in my district, the First District of Northern California here over several years. The Dixie fire being the big one here last year, about a million acres. The Camp fire that a lot of people have heard about that consumed the town of Paradise back in 2018; but there are many others.

So what am I talking about here today? The idea that rural America isn't worth saving; isn't worth having. So as we contemplate fire after fire and the recovery from there, there are those who are questioning should we have rural towns anymore; should we have people living in them; should we help them recover?

I go back to the root of the problem. First, I think the answer is yes because we need rural towns. We need people out there that are the productive people that used to do amazing things before regulations and environmental groups shut them down; we would not have the products that come from these areas.

So, not only rebuild them, but let's do the things that help them to thrive. Because it isn't just about some jobs in a rural town, it is also about everybody in this country prospering from the products that come from there.

What am I talking about? In this area, timber, lumber products, paper products. Heaven knows, we use a lot of paper around here. Do we want that to come from the United States, from our workers, from our productive lands, or do we want to continue as the United States, for some reason, is the Number 2 importer of wood products in the world. And yet, we are burning millions of acres across the West every year. Why is that?

I could also say mining used to occur more heavily here and in other parts, anywhere from Minnesota all through the Western States, as well.

And farming, which is under attack. The water is being taken away from many of the farmers in my district and in California in general because it is going for environmental purposes.

So yes, rural America feels under attack. So a recent Los Angeles Times article comes out saying, should billions continue to be spent rebuilding burned towns? This is the case for calling it quits.

I appreciate the L.A. Times is covering the fires that affected California; most recently, the Dixie fire in the town of Greenville, which is 75 percent wiped out from that fire; the town of Paradise 4 years before, 90 percent wiped out.

But I wish they would tell the whole story. They didn't tell my part of the story. Yes, it is difficult to keep asking for money back in D.C. to come help, whether it is one of my disasters—I am sure my colleagues in the South like right now are dealing with in Florida. Do they enjoy having to come back to help get rebuild money for Florida after the hurricanes they are dealing with, or flood or what have you?

No, they don't enjoy that, and I don't think we want to have to ask taxpayers for it.

But fire is something we can manage. We can't manage the weather. We can't stop hurricanes. We can't stop other things like that. But do we have the ability to manage our forests in such a way that towns would not be subject so much to immediate wildfire; harvesting buffers around them; putting fire breaks up, things like that.

And then when you do rebuild the town, they are building them with newer, better materials for the housing and things like that. There are underground power lines, so it is not going to be the same town that went up a hundred years ago that started out as a timber town, as a mining town, or even an ag town.

So it does improve. It does get better. It is worth the value because, the bottom line is, even though we want to blame climate change and say that is the big problem, we have got to kick people out of rural areas; we have got to kick them out of these communities because of climate change.

Well, if the climate is changing, then what are we going to do about it? Are we going to not have timber products? Are we going to not ensure the safety of those areas? Because we still need these people out there producing these products. If you want to have electric cars, someone has got to do some mining somewhere, right?

And the mandate keeps coming down the pike in my own State and more and more around the country, and we are not going to have those products. We are not going to have wood and timber products, paper products coming from somewhere besides being imported; and you know what happens when we get too dependent on import. Ask anybody getting natural gas in Europe what that looks like.

Our food; everybody is seeing food prices skyrocketing at the shelves, and sometimes that very shelf is empty. With all the acres that got left out because the water got taken away this

year in California, food shelves are going to be even more empty and prices even higher.

Someone in rural America has to be producing something. So for people to say that well, climate change, times are changing, we have to shift in a new direction, and we don't need these people there, and we don't need these towns there, we do need these towns. We need them there, and we need to help them to thrive by letting them manage the timber to begin with.

DISASTER RELIEF IN PUERTO RICO

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from Puerto Rico (Miss GONZÁLEZ-COLÓN) for 5 minutes.

Miss GONZÁLEZ-COLÓN. Mr. Speaker, earlier this month, we were thinking about the 5 years since Hurricane Maria, and 5 years felt like nothing. Maria was one of our greatest natural disasters, causing collapse of all of the essential infrastructure in Puerto Rico. We still see the effects linger.

My colleagues in Congress came with me to the Island and responded with funding for recovery. Staff from FEMA and other agencies have been working hard, but the effects have been slow to be seen. Major obligations for permanent infrastructure rebuilding began only in late 2020.

Meanwhile, challenges continued: Earthquakes, COVID, supply chain crisis, a power grid that remains unreliable, uncertainty about the continuity of Medicaid and nutritional assistance funds. The people were exhausted and stressed.

Then came Hurricane Fiona. Fiona did not bring Category 4 or Category 5 winds but, instead, rainfall like never before, up to 30 inches in some locations. It was raining 2 days before the hurricane and 2 days after the hurricane.

Fiona caused a lot of flooding. It was historic and, in many places in the south of the Island, and the West, and the central mountains, beyond what was experienced for Maria. Thousands of families needed to be moved from flood waters in places like Salinas, leaving behind everything.

In rural areas like Arecibo, San Lorenzo, Orocovis, Utuado, Barranquitas, bridges that had been repaired or replaced after Maria, and roads that had been cleared and repaved, are again washed out, damaged, and blocked by landslides.

Housing and transportation work done after the last disaster, some even barely finished, now needs to be addressed again.

The power system again fell into a blackout. Although a majority is back up, it is still shaky. More than 70 percent of the Island now has power. Plants at Aguirre and Costa Sur are running available units at the edge of capacity; distribution networks at Aguadilla, San Sebastian, and Baya-

mon needed to be attended by local governments. This slow-down recovery of the water system is a problem for citizens needing life support devices, and keeps businesses closed.

Although there are sufficient fuel and supplies in the depots, communities have difficulty receiving enough because of transportation problems at a time of increased demand.

The agricultural sector, that was expecting finally the first normal productive year after devastation of Maria, lost everything again. We lost 90 percent of our agriculture in plantains, bananas, and many others; back to square one. Across the land, in Lares, Patillas, Aibonito, Guanica, mostly small or family farms now are at risk of simply never coming back; a lot from damage, and others from heartbreak.

Our low-income families face faster depletion of the funds for Medicaid and for nutritional assistance programs. It is not just a matter of more eligibility but continuity of the funding.

A real answer to this would be true permanent equal treatment for Puerto Rico in these Federal programs, instead of a special provision over and over every year.

I have engaged the President and many Federal agencies on this and other issues, to seek the needed support for the Island at this moment.

Some Members of Congress, of this House, are traveling to Puerto Rico after Fiona, and I am, again, inviting all my colleagues who want to come and join me to see the need directly and hear from those who can tell you what is really happening.

Today, we watch Florida also face a major disaster, and knowing firsthand what that means, I keep the people of Florida in my heart. Take care, and God bless and keep you in this time.

I am sure that both Florida and Puerto Rico, we will come back from this disaster, and, as Americans, we must all stand together, in a bipartisan way, to make sure the rebuilding happens visibly and promptly.

HONORING THE SERVICE OF CHAD ROBICHAUX AND STAFF SERGEANT DENNIS PRICE

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from Missouri (Mrs. HARTZLER) for 5 minutes.

Mrs. HARTZLER. Mr. Speaker, I rise today to honor the extraordinary heroism of Chad Robichaux and Staff Sergeant Dennis Price during the Afghanistan evacuation last year. Their selfless actions evacuating tens of thousands of Afghan interpreters and their families, vulnerable women and children, persecuted Christians, and American citizens, represents the highest levels of patriotism.

I met Chad through his work supporting our Nation's veterans as the founder of the Mighty Oaks Foundation, a leading nonprofit serving the

military, veteran, and first responder communities around the world. Through faith-based combat trauma and resiliency programs, Chad has been instrumental in ensuring our brave warriors are supported when they return home from the battlefield.

Chad's work doesn't stop there. He is also the co-founder of Save Our Allies, a nonprofit focused on the evacuation and recovery of Americans, our allies, and the most vulnerable people trapped in Afghanistan. Save Our Allies began as a personal quest for Chad, as he set out to rescue his longtime friend and Afghan interpreter. However, the mission quickly evolved because of Chad's compassion for all people and his servant's heart.

While the U.S. military held the Kabul airport in Afghanistan, the Save Our Allies Task Force successfully extracted approximately 17,000 evacuees in a period of 10 days. Despite these courageous efforts, a report from the U.S. Joint Chiefs of Staff estimated over 142,000 vulnerable Afghans remained in the country following the exit from Kabul.

With the complete takeover of Afghanistan by the Taliban, the report projected 20 million women would be vulnerable to sexual abuse and slavery; Christians would be persecuted and executed; Afghan interpreters and their families would be hunted down and killed; children would be abused through religious manipulation; and the 1,000-plus Americans left behind would be killed or held hostage for ransom.

Understanding the ruthlessness of the Taliban as a former Force Recon Marine, Chad Robichaux knew the rescue mission had to continue. In response, Save Our Allies launched several operations to explore new ways for extractions. Robichaux and his team first identified possible ground evacuations that could be feasible by cross-border movements into Tajikistan and quickly planned a reconnaissance operation. Robichaux hand-selected Staff Sergeant Dennis Price, a Force Recon Marine and Scout Sniper, to take part in the mission.

I want to share two stories from that mission to highlight their incredible acts of sacrifice, service, and bravery. Early in the mission, Staff Sergeant Price sought a higher vantage point to evaluate a potential river crossing area. Upon his ascent up a mountain, he came under sniper fire two separate times, pushing him back to return to the safe house to reconvene with Robichaux and discuss moving forward with the operation.

These two brave men humbly discussed their families, loved ones, and all that would be left behind should they not make it out of this mission ahead. Still, both men agreed to continue their mission of building safe passage for American and Afghan evacuees.

During day 3 of the mission, and upon confirmation of possible river crossing,

Staff Sergeant Price found himself 10 feet away from an armed Chinese militant hiding in the bushes, utilizing the vegetation as concealment.

□ 1245

Robichaux, using his uncanny observation and combat skills, noticed the looming threat and physically ushered Staff Sergeant Price into a nearby vehicle before he could be captured or killed, ultimately saving his life. Because of this heroic act, the two men were able to continue providing real-time information to American intelligence agencies.

During their 10-day operation, Robichaux and Price were able to cover 90 miles of border between Afghanistan and Tajikistan, remaining undetected by countless Tajik, Russian, and Chinese military patrols, all while avoiding Taliban-infested areas and checkpoints.

These examples, and countless others that cannot be shared due to their sensitive nature, underscore the exemplary efforts undertaken by both Americans behind enemy lines to collect the critical information needed to bring so many to safety.

Mr. Speaker, I am humbled to stand before the House to honor their courageous bravery and willingness to sacrifice their lives for their fellow man. The mission that these men completed has saved and will continue to save hundreds and possibly thousands of lives.

On behalf of a grateful Nation, I express my sincere gratitude. God bless Chad Robichaux and Staff Sergeant Price for their service to our country.

RECOGNIZING NATIONAL CLEAN ENERGY WEEK

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from Iowa (Mrs. MILLER-MEEKS) for 5 minutes.

Mrs. MILLER-MEEKS. Mr. Speaker, I rise today to recognize National Clean Energy Week and the benefits of alternative energy sources.

National Clean Energy Week is a time to recognize and celebrate innovative policies that allow the United States to limit greenhouse gas emissions.

Iowa leads the Nation in clean energy production, and Iowans are constantly seeking ways to make clean energy more affordable, accessible, and abundant. Just last year, the American Clean Power Association reported that over 50 percent of Iowa's electricity is generated by renewable sources, ranking it highest in the United States.

Clean energy sources, including renewable fuels, organic materials, wind, and solar, create affordable electricity and power our transportation sector. Additionally, alternative energy sources bring jobs and revenue while allowing the United States to remain a global leader in energy production.

Since taking office, I have advocated for conservative, climate-friendly leg-

islation that promotes alternative forms of energy. Consumers should always be provided with choices as it promotes competition for businesses and lowers the cost of goods and services, which is crucial now with record-high inflation.

I have also introduced bipartisan legislation, such as the Biochar Research Network Act of 2022, to expand clean energy in the United States. This bill would create a national biochar research network, where the benefits of biochar can further be tested and explored. Research would include how well biochar works to sequester carbon, how biochar increases crop production, improves marginal soil health, improves water quality, and reduces the amount of fertilizers and pesticides regularly used. I was proud that Senator GRASSLEY introduced the same bill in the U.S. Senate last week.

Additionally, I have supported numerous bills, such as the Lower Food and Fuel Costs Act, which expands year-round E15, and the Home Front Energy Independence bill, which would prohibit the imports of petroleum from Russia while expanding production and availability of biofuels.

Increasing domestic energy production and the use of biofuels would also help our allies around the world wean off from Russia's dirty oil and cut off the funding for the Russian war machine.

Iowa's vast farmland is why alternative forms of energy like biofuels and wind and solar are successful. However, when determining our Nation's energy strategy, we must analyze geographic composure and natural resources in the area. Different geographical features allow for clean energy to succeed, such as solar in the Southwest, natural gas in Texas, hydropower in the Pacific Northwest, or nuclear energy in the South.

As we continue pursuing clean energy production, I hope my colleagues will look to Iowa as an example of an any- and all-of-the-above approach. In order to leave a healthier planet for our children and grandchildren, we must enact policies that benefit a wide variety of energy sources where they work best and flexibility within the States to do so.

I also wish a happy birthday to Kendyl Willox, who is an amazing health policy portfolio manager in our office. Happy birthday to Kendyl.

FARM OVERTIME WAGE THRESHOLD

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from New York (Ms. TENNEY) for 5 minutes.

Ms. TENNEY. Mr. Speaker, I rise today to highlight a looming catastrophe for New York farmers, farmworkers, and consumers across New York State and the country.

On September 6, the New York State Farm Laborers Wage Board voted to advance a proposal to lower the State's

overtime wage threshold for farm laborers from 60 to 40 hours per week, despite overwhelming opposition to the recommendation.

During the public comment period, farmers, farmworkers, and consumers all turned out in droves to oppose the recommendation. Farmers, who are struggling with inflation already, are now very worried about keeping up with yet another price hike. Farmworkers are gravely concerned about the possible lost hours on the job, cutting their wages. Consumers should fear even higher increases to food costs, which have already increased 11.4 percent over the last year, the biggest increase since 1979, with prices continuing to go up.

Their fears are real. Cornell University's College of Agriculture and Life Sciences projected that the overtime rule's implementation could force two-thirds of dairy farmers to make significant changes to their operations, including, and dramatically bad, leaving the industry or investing in other States.

New York State already leads the Nation in the highest out-migration of people and jobs. This would be a disaster for our agricultural community.

Cornell University Ag Sciences also found that half of New York's fruit and vegetable farmers likely would have to reduce operations or leave the industry altogether. The second largest apple-producing county in the entire Nation is Wayne County, located in upstate New York.

Despite all this, the board still voted to advance the recommendation anyway. We are incredibly disappointed that the board ignored such compelling input from important stakeholders, worsening the already difficult headwinds for New York's agriculture industry. The board ultimately decided to undermine the very industry and workers they are supposed to be serving.

This week, I joined upstate farmers for a roundtable discussion hosted by Dale Hemminger and his son, Clay, at Hemdale Farms in Seneca Castle, New York. The feedback from the farmers was unanimous: Lowering the overtime threshold will devastate New York's agricultural industry and have a critically difficult impact on the future of family farms in New York and could leave New York as one of the few States in the country with such an onerous and unreasonable restriction on family farms.

Family farms, large and small, are the lifeblood of New York's economy. Everyone thinks it is New York City. It is actually agriculture.

Now, the recommendation is with the State labor commissioner, Roberta Reardon. I have and continue to urge her to reject this change and maintain the current 60-hour threshold. New York family farms and consumers simply cannot bear any further price increases.

I have also joined my other New York colleagues, Representatives ELISE

STEFANIK and CHRIS JACOBS, in introducing legislation in Congress known as the Protect Local Farms Act to stop this misguided policy from taking effect.

If there are no farms, there will be no nutritious food to feed our State, our Nation, and, yes, the world, as we face a potential food shortage worldwide.

REDESIGNING THE MARKETPLACE OF IDEAS

The SPEAKER pro tempore. The Chair recognizes the gentleman from Rhode Island (Mr. LANGEVIN) for 5 minutes.

Mr. LANGEVIN. Mr. Speaker, I rise today because Americans are divided. Our public discourse is broken. Instead of fostering open and honest political debate, our flawed information environment creates echo chambers and partisan silos.

At times, it feels like the very fabric of our Nation is being torn at the seams. This toxic polarization has infected the Capitol, too, where it is becoming increasingly difficult to get things done in a bipartisan manner.

The nonstop outrage and anger must end.

To begin solving some of these issues, I propose an idea, which I developed in partnership with my former science and technology policy adviser, Eric Saund, a phenomenal cognitive science and artificial intelligence researcher. Together, we call for redesigning what is popularly described as the “marketplace of ideas.”

As economists point out, markets are information systems. The invisible hand of supply and demand discovers the value of goods and services, and the equal access to information in a market yields collective efficiency.

Now, imagine a market where suppliers or, in this case, speakers of ideas hawk their wares in a public square, while consumers, or listeners, sample and choose the news, stories, and opinions they prefer. The best ideas would win by virtue of the audience's discernment and collective wisdom, right?

But what if the market's information architecture, the modes and pathways of information exchange and processing, is fundamentally broken? Just like a market wouldn't function properly if the vendors' loudspeakers and telephones were damaged, the algorithms, programmatic methods, and platform designs that govern our marketplace of ideas are clearly not working. When a market is broken, it is the responsibility of government to act.

How do we fix it? We start by leveling the playing field and modifying the shape, not the content, of our ideas marketplace to facilitate healthy exposure and competition among all ideas within our political discourse.

As it currently stands, our marketplace has been distorted to resemble a dome-like shape in which discourse is driven to the extremes of each side. Instead, we propose bending the dome

shape of our marketplace into a bowl shape, encouraging people to seek common ground and creating space for productive conversation among ideological foes and compatriots alike.

By leveling the playing field through tweaks to both the supply and demand side, we can create a marketplace of ideas where fairness and civility are rewarded and extremism is discouraged.

On the demand side, we can invest in civics education initiatives that teach children critical reading, listening, and thinking skills, like how to spot disinformation on social media. Adults, too, can lose awareness of how their buttons are being pushed by sophisticated propagandists.

As our Founders recognized, our democracy requires an educated citizenry. However, the demands of our modern media environment require our education system to grow and adapt accordingly.

We could borrow from the playbooks of other countries, like Finland and the Baltic states, which have developed robust civil defenses against insidious disinformation campaigns emanating from neighboring Russia. We can even motivate public awareness and engagement through playful, competitive, and financial incentives to reward people for knowing basic civics and following factual, unbiased news and information sources. We should encourage participation in nonpolitical areas of life, such as sports, hobbies, recreation, civics projects, and family activities, to reinforce the common bonds between us.

Solutions arise on the supply side, as well. In a traditional public square, each speaker's identity is known and thereby can be held accountable for their speech. But on social media, phony accounts and troll farms can spread lies, disinformation, and distorted narratives without consequence. A solution may be found in modern technologies for digital identity tools, which can ensure that every social media account is held by a unique, real human being.

Congressman BILL FOSTER's Improving Digital Identity Act of 2021, of which I am a proud cosponsor, advances associated frameworks and standards and promotes the adoption of privacy-preserving digital identity technologies.

This is a complicated issue, but I think it is worth giving thought to.

RECESS

The SPEAKER pro tempore. Pursuant to clause 12(a) of rule I, the Chair declares the House in recess until 2 p.m. today.

Accordingly (at 12 o'clock and 59 minutes p.m.), the House stood in recess.

□ 1400

AFTER RECESS

The recess having expired, the House was called to order by the Speaker pro tempore (Mr. CUELLAR) at 2 p.m.

PRAYER

The Chaplain, the Reverend Margaret Grun Kibben, offered the following prayer:

Almighty and powerful God, our creator and defender, we call upon You this day to speak into the whirlwind of the life-threatening storm surge and catastrophic winds that now bombard the Florida peninsula and have left behind unfathomable destruction in Cuba.

As Hurricane Ian rages, those who are caught in its ravages are filled with dread. Their personal calamity is its own whirlwind around them. In their distress and anguish, they—and we on their behalf—pray to You for their safety and refuge.

For You alone have the power with but a word to cause the tempest to still and the wind and waves to be hushed. Speak Your word. Shine Your light into the darkness of these days.

Listen to these fervent prayers. Deliver the thousands of evacuees from their plight. Lead them to find shelter in You from all that threatens them this day.

And for all the National Guardsmen, first responders, and those who will provide security and offer assistance for yet another natural disaster, we pray for their strength and fortitude. Use them to bring Your hope to those who cannot see their way through the destruction of their homes and their lives.

In Your sovereign and saving name, we pray.

Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1 of rule I, the Journal of the last day's proceedings is approved.

PLEDGE OF ALLEGIANCE

The SPEAKER pro tempore. Will the gentleman from Utah (Mr. OWENS) come forward and lead the House in the Pledge of Allegiance.

Mr. OWENS led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 4 of rule I, the following

enrolled bill was signed by Speaker pro tempore RASKIN on Tuesday, September 27, 2022:

S. 2293, to amend the Robert T. Stafford Disaster Relief and Emergency Assistance Act to provide certain employment rights to reservists of the Federal Emergency Management Agency, and for other purposes.

CONCERNS ABOUT OUR STRATEGIC PETROLEUM RESERVE

(Mr. LAMALFA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LAMALFA. Mr. Speaker, as Hurricane Ian barrels toward the Florida coast, residents are boarding up their homes, packing up their families, and rushing to evacuate.

Across the State, FEMA is unloading barrels of fuel from our Strategic Petroleum Reserve on evacuation routes to help those leaving to fuel up. That is the correct intent of our Strategic Petroleum Reserves, to help people in the event of a severe weather event or other disaster.

But there is reason to be concerned now that the SPR, as it is known, is now at its lowest point since 1984 because of President Biden's policy. For nearly 2 years he has been halting leases for domestic oil and gas production, paused pipeline development, and launched a regulatory assault on U.S. energy development and financing, all while releasing our strategic reserves in order to combat rising prices—thinking that amount is really going to do so. They have been shipped overseas in some cases.

This is unconscionable. We are in the middle of a hurricane season. What will we do when our reserves are eventually depleted and people are actually stranded?

In my district in northern California we don't have hurricanes, but we are too familiar with natural disasters. Each summer residents are forced to flee due to catastrophic wildfires, and this winter they were even trapped in their homes without electricity due to snowstorms.

We need plentiful electricity: natural gas and oil. It is a matter of life and death for many, and SPRs need to be used properly.

BIOSCIENCE INDUSTRY IN UTAH

(Mr. OWENS asked and was given permission to address the House for 1 minute.)

Mr. OWENS. Mr. Speaker, on December 2, 1982, the medical team from the University of Utah successfully implanted the first permanent artificial heart in the world.

Forty years later, Utah remains a trailblazer in healthcare innovation. Over the past 2 years, I had the pleasure of visiting many Utah businesses at the forefront of the healthcare industry. Ortho Development Corporation,

Xenter, Canyon Labs, and Ultradent are among the leading biotech firms that call Utah home.

BioHive, a collaboration of 1,100 companies representing Utah's life science and healthcare innovative ecosystem is the driving force behind the Beehive State's success.

Additionally, the bioscience industry in Utah supports 130,000 local jobs, accounts for 8 percent of GDP, and produces hundreds of patents for lifesaving medical devices.

Behind these extraordinary accomplishments are the pioneering spirit, grit, and kindness of Utahns. I am proud to represent my State and know that we will continue to lead the Nation.

WJAG'S 100TH ANNIVERSARY

(Mr. FLOOD asked and was given permission to address the House for 1 minute.)

Mr. FLOOD. Mr. Speaker, I rise today to honor one of America's first radio stations, WJAG-AM, licensed to Norfolk, Nebraska. It is celebrating 100 years this year.

In 1922, radio pioneer Gene Huse established WJAG as one of the first radio stations west of the Mississippi River.

The station became and remains an important part of everyday life for Nebraskans. Gene Huse realized that most people did not own a radio, so he printed instructions in his local newspaper on how to build one. Many more went to the movie theater or the fire station to hear play-by-play of the World Series, dance to music, and receive agricultural news.

Today, his grandson, Bill Huse, continues the tradition of service. WJAG has been owned by the same family since its start in 1922. The station is an American original.

On behalf of the First District of Nebraska, I congratulate WJAG on 100 years of service and wish those at the station another 100 years of success.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 8446.

Ms. MCCOLLUM. Mr. Speaker, I ask unanimous consent to remove the gentleman from Texas (Mr. PFLUGER) as cosponsor of H.R. 8446.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, the Chair will postpone further proceedings today on motions to suspend the rules on which the yeas and nays are ordered.

The House will resume proceedings on postponed questions at a later time.

SBIR AND STTR EXTENSION ACT OF 2022

Ms. VELÁZQUEZ. Mr. Speaker, I move to suspend the rules and pass the bill (S. 4900) to reauthorize the SBIR and STTR programs and pilot programs, and for other purposes.

The Clerk read the title of the bill.

The text of the bill is as follows:

S. 4900

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "SBIR and STTR Extension Act of 2022".

SEC. 2. DEFINITIONS.

In this Act:

(1) ADMINISTRATION; ADMINISTRATOR.—The terms "Administration" and "Administrator" mean the Small Business Administration and the Administrator thereof, respectively.

(2) FEDERAL AGENCY; PHASE I; PHASE II; PHASE III; SBIR; STTR.—The terms "Federal agency", "Phase I", "Phase II", "Phase III", "SBIR", and "STTR" have the meanings given those terms, respectively, in section 9(e) of the Small Business Act (15 U.S.C. 638(e)).

SEC. 3. REAUTHORIZATION OF SBIR AND STTR PROGRAMS AND PILOT PROGRAMS.

Section 9 of the Small Business Act (15 U.S.C. 638) is amended by striking "2022" each place that term appears and inserting "2025".

SEC. 4. FOREIGN RISK MANAGEMENT.

(a) DEFINITIONS.—Section 9(e) of the Small Business Act (15 U.S.C. 638(e)) is amended—

(1) in paragraph (13)(B), by striking "and" at the end;

(2) in paragraph (14), by striking the period at the end and inserting a semicolon; and

(3) by adding at the end the following:

"(15) the term 'covered individual' means an individual who—

"(A) contributes in a substantive, meaningful way to the scientific development or execution of a research and development project proposed to be carried out with a research and development award from a Federal research agency; and

"(B) is designated as a covered individual by the Federal research agency concerned;

"(16) the term 'foreign affiliation' means a funded or unfunded academic, professional, or institutional appointment or position with a foreign government or government-owned entity, whether full-time, part-time, or voluntary (including adjunct, visiting, or honorary);

"(17) the term 'foreign country of concern' means the People's Republic of China, the Democratic People's Republic of Korea, the Russian Federation, the Islamic Republic of Iran, or any other country determined to be a country of concern by the Secretary of State;

"(18) the term 'malign foreign talent recruitment program' has the meaning given such term in section 10638 of the Research and Development, Competition, and Innovation Act (division B of Public Law 117-167); and

"(19) the term 'federally funded award' means a Phase I, Phase II (including a Phase II award under subsection (cc)), or Phase III SBIR or STTR award made using a funding agreement."

(b) DUE DILIGENCE PROGRAM TO ASSESS SECURITY RISKS.—

(1) IN GENERAL.—Section 9 of the Small Business Act (15 U.S.C. 638) is amended by adding at the end the following:

"(vv) DUE DILIGENCE PROGRAM TO ASSESS SECURITY RISKS.—

“(1) ESTABLISHMENT.—The head of each Federal agency required to establish an SBIR or STTR program, in coordination with the Administrator, shall establish and implement a due diligence program to assess security risks presented by small business concerns seeking a federally funded award.

“(2) RISKS.—Each program established under paragraph (1) shall—

“(A) assess, using a risk-based approach as appropriate, the cybersecurity practices, patent analysis, employee analysis, and foreign ownership of a small business concern seeking an award, including the financial ties and obligations (which shall include surty, equity, and debt obligations) of the small business concern and employees of the small business concern to a foreign country, foreign person, or foreign entity; and

“(B) assess awards and proposals or applications, as applicable, using a risk-based approach as appropriate, including through the use of open-source analysis and analytical tools, for the nondisclosures of information required under (g)(13).

“(3) ADMINISTRATIVE COSTS.—

“(A) IN GENERAL.—In addition to the amount allocated under subsection (mm)(1), each Federal agency required to establish an SBIR program may allocate not more than 2 percent of the funds allocated to the SBIR program of the Federal agency for the cost of establishing the due diligence program required under this subsection.

“(B) REPORTING.—

“(i) IN GENERAL.—Not later than December 31 of the year in which this subparagraph is enacted, and not later than December 31 of each year thereafter, the head of a Federal agency that exercises the authority under subparagraph (A) shall submit to the Committee on Small Business and the Committee on Science, Space, and Technology of the House of Representatives, the Committee on Small Business and Entrepreneurship of the Senate, and the Administrator, for the covered year—

“(I) the total funds allowed to be allocated for the cost of establishing the due diligence program required under this subsection;

“(II) the total amount of funds obligated or expended under subparagraph (A); and

“(III) the due diligence activities carried out or to be carried out using amounts allocated under subparagraph (A).

“(ii) ANNUAL REPORT INCLUSION.—The Administrator shall include the information submitted by head of a Federal agency under clause (i) in the next annual report submitted under subsection (b)(7) after the Administrator receives such information.

“(iii) COVERED YEAR.—In this subparagraph, the term ‘covered year’ means, with respect to the information required under clause (i), the year covered by the annual report submitted under subsection (b)(7) in which the Administrator is required to include such information by clause (ii).

“(C) TERMINATION DATE.—This paragraph shall terminate on September 30, 2025.”

(2) IMPLEMENTATION.—

(A) IN GENERAL.—Not later than 270 days after the date of enactment of this Act, the head of a Federal agency required to establish an SBIR or STTR program shall implement a due diligence program under subsection (vv) of section 9 of the Small Business Act (15 U.S.C. 638), as added by paragraph (1), at the Federal agency that, to the extent practicable, incorporates the applicable best practices disseminated under paragraph (3).

(B) PAPERWORK REDUCTION ACT.—Chapter 35 of title 44, United States Code (commonly known as the “Paperwork Reduction Act”), shall not apply to the implementation of a due diligence program under subsection (vv)

of section 9 of the Small Business Act (15 U.S.C. 638), as added by paragraph (1).

(C) BRIEFING.—Not later than 30 days after the date of enactment of this Act, and on a recurring basis until implementation is complete, each Federal agency required to establish a due diligence program under subsection (vv) of section 9 of the Small Business Act (15 U.S.C. 638), as added by paragraph (1), shall brief the Committee on Small Business and Entrepreneurship of the Senate and the Committee on Small Business and the Committee on Science, Space, and Technology of the House of Representatives on the implementation of the due diligence program.

(3) BEST PRACTICES.—Not later than 180 days after the date of enactment of this Act, the Administrator shall—

(A) in coordination with the Director of the Office of Science and Technology Policy and in consultation with the Committee on Foreign Investment in the United States, disseminate among Federal agencies required to establish an SBIR or STTR program best practices of those Federal agencies for due diligence programs required under subsection (vv) of section 9 of the Small Business Act (15 U.S.C. 638), as added by paragraph (1); and

(B) in consultation with the Committee on Foreign Investment in the United States, provide to Federal agencies described in subparagraph (A) guidance on the business relationships required to be disclosed under paragraph (13)(G) of subsection (g) and paragraph (17)(G) of subsection (o) of section 9 of the Small Business Act (15 U.S.C. 638), as added by this Act.

(4) GAO STUDY.—Not later than 1 year after the date of enactment of this Act, and annually thereafter for 3 years, the Comptroller General of the United States shall conduct a study and submit to the Committee on Small Business and Entrepreneurship and the Committee on Armed Services of the Senate and the Committee on Small Business, the Committee on Armed Services, and the Committee on Science, Space, and Technology of the House of Representatives a report on the implementation and best practices of due diligence programs established under subsection (vv) of section 9 of the Small Business Act (15 U.S.C. 638), as added by paragraph (1), across Federal agencies required to establish an SBIR or STTR program.

(5) RULE OF CONSTRUCTION.—Nothing in subsection (vv) of section 9 of the Small Business Act (15 U.S.C. 638), as added by paragraph (1), shall be construed to—

(A) apply to any Federal agency with a due diligence program that applies to the SBIR or STTR programs required under subsection (vv) of section 9 of the Small Business Act (15 U.S.C. 638), as added by paragraph (1), in existence as of the date of enactment of this Act; or

(B) restrict any Federal agency from taking due diligence measures in addition to those required under such subsection (vv) at the Federal agency.

(C) DISCLOSURES REGARDING TIES TO PEOPLE’S REPUBLIC OF CHINA AND OTHER FOREIGN COUNTRIES.—

(1) SBIR.—Section 9(g) of the Small Business Act (15 U.S.C. 638(g)) is amended—

(A) in paragraph (11), by striking “and” at the end;

(B) in paragraph (12), by striking the period at the end and inserting a semicolon; and

(C) by adding at the end the following:

“(13) require each small business concern submitting a proposal or application for a federally funded award to disclose in the proposal or application—

“(A) the identity of all owners and covered individuals of the small business concern

who are a party to any foreign talent recruitment program of any foreign country of concern, including the People’s Republic of China;

“(B) the existence of any joint venture or subsidiary of the small business concern that is based in, funded by, or has a foreign affiliation with any foreign country of concern, including the People’s Republic of China;

“(C) any current or pending contractual or financial obligation or other agreement specific to a business arrangement, or joint venture-like arrangement with an enterprise owned by a foreign state or any foreign entity;

“(D) whether the small business concern is wholly owned in the People’s Republic of China or another foreign country of concern;

“(E) the percentage, if any, of venture capital or institutional investment by an entity that has a general partner or individual holding a leadership role in such entity who has a foreign affiliation with any foreign country of concern, including the People’s Republic of China;

“(F) any technology licensing or intellectual property sales to a foreign country of concern, including the People’s Republic of China, during the 5-year period preceding submission of the proposal; and

“(G) any foreign business entity, offshore entity, or entity outside the United States related to the small business concern;

“(14) after reviewing the disclosures of a small business concern under paragraph (13), and if determined appropriate by the head of such Federal agency, request such small business concern to provide true copies of any contractual or financial obligation or other agreement specific to a business arrangement, or joint-venture like arrangement with an enterprise owned by a foreign state or any foreign entity in effect during the 5-year period preceding submission of the proposal with respect to which such small business concern made such disclosures.”

(2) STTR.—Section 9(o) of the Small Business Act (15 U.S.C. 638(o)) is amended—

(A) in paragraph (15), by striking “and” at the end;

(B) in paragraph (16), by striking the period at the end and inserting a semicolon; and

(C) by adding at the end the following:

“(17) require each small business concern submitting a proposal or application for a federally funded award to disclose in the proposal or application—

“(A) the identity of all owners and covered individuals of the small business concern who are a party to any foreign talent recruitment program of any foreign country of concern, including the People’s Republic of China;

“(B) the existence of any joint venture or subsidiary of the small business concern that is based in, funded by, or has a foreign affiliation with any foreign country of concern, including the People’s Republic of China;

“(C) any current or pending contractual or financial obligation or other agreement specific to a business arrangement, or joint venture-like arrangement with an enterprise owned by a foreign state or any foreign entity;

“(D) whether the small business concern is wholly owned in the People’s Republic of China or another foreign country;

“(E) the percentage, if any, of venture capital or institutional investment by an entity that has a general partner or individual holding a leadership role in such entity who has a foreign affiliation with any foreign country of concern, including the People’s Republic of China;

“(F) any technology licensing or intellectual property sales to a foreign country of concern, including the People’s Republic of

China, during the 5-year period preceding submission of the proposal; and

“(G) any foreign business entity, offshore entity, or entity outside the United States related to the small business concern;

“(18) after reviewing the disclosures of a small business concern under paragraph (17), and if determined appropriate by the head of such Federal agency, request such small business concern to provide true copies of any contractual or financial obligation or other agreement specific to a business arrangement, or joint-venture like arrangement with an enterprise owned by a foreign state or any foreign entity in effect during the 5-year period preceding submission of the proposal with respect to which such small business concern made such disclosures;”.

(d) DENIAL OF AWARDS.—

(1) SBIR.—Section 9(g) of the Small Business Act (15 U.S.C. 638(g)), as amended by subsection (c)(1), is further amended by adding at the end the following:

“(15) not make an award under the SBIR program of the Federal agency to a small business concern if the head of the Federal agency determines that—

“(A) the small business concern submitting the proposal or application—

“(i) has an owner or covered individual that is party to a malign foreign talent recruitment program;

“(ii) has a business entity, parent company, or subsidiary located in the People's Republic of China or another foreign country of concern; or

“(iii) has an owner or covered individual that has a foreign affiliation with a research institution located in the People's Republic of China or another foreign country of concern; and

“(B) the relationships and commitments described in clauses (i) through (iii) of subparagraph (A)—

“(i) interfere with the capacity for activities supported by the Federal agency to be carried out;

“(ii) create duplication with activities supported by the Federal agency;

“(iii) present concerns about conflicts of interest;

“(iv) were not appropriately disclosed to the Federal agency;

“(v) violate Federal law or terms and conditions of the Federal agency; or

“(vi) pose a risk to national security;”.

(2) STTR.—Section 9(o) of the Small Business Act (15 U.S.C. 638(o)), as amended by subsection (c)(2), is further amended by adding at the end the following:

“(19) not make an award under the STTR program of the Federal agency to a small business concern if the head of the Federal agency determines that—

“(A) the small business concern submitting the proposal or application—

“(i) has an owner or covered individual that is party to a malign foreign talent recruitment program;

“(ii) has a business entity, parent company, or subsidiary located in the People's Republic of China or another foreign country of concern; or

“(iii) has an owner or covered individual that has a foreign affiliation with a research institution located in the People's Republic of China or another foreign country of concern; and

“(B) the relationships and commitments described in clauses (i) through (iii) of subparagraph (A)—

“(i) interfere with the capacity for activities supported by the Federal agency to be carried out;

“(ii) create duplication with activities supported by the Federal agency;

“(iii) present concerns about conflicts of interest;

“(iv) were not appropriately disclosed to the Federal agency;

“(v) violate Federal law or terms and conditions of the Federal agency; or

“(vi) pose a risk to national security;”.

SEC. 5. AGENCY RECOVERY AUTHORITY AND ONGOING REPORTING.

(a) SBIR.—Section 9(g) of the Small Business Act (15 U.S.C. 638(g)), as amended by section 4(d)(1), is further amended by adding at the end the following:

“(16) require a small business concern receiving an award under its SBIR program to repay all amounts received from the Federal agency under the award if—

“(A) the small business concern makes a material misstatement that the Federal agency determines poses a risk to national security; or

“(B) there is a change in ownership, change to entity structure, or other substantial change in circumstances of the small business concern that the Federal agency determines poses a risk to national security; and

“(17) require a small business concern receiving an award under its SBIR program to regularly report to the Federal agency and the Administration throughout the duration of the award on—

“(A) any change to a disclosure required under subparagraphs (A) through (G) of paragraph (13);

“(B) any material misstatement made under paragraph (16)(A); and

“(C) any change described in paragraph (16)(B).”.

(b) STTR.—Section 9(o) of the Small Business Act (15 U.S.C. 638(o)), as amended by section 4(d)(1), is further amended by adding at the end the following:

“(20) require a small business concern receiving an award under its STTR program to repay all amounts received from the Federal agency under the award if—

“(A) the small business concern makes a material misstatement that the Federal agency determines poses a risk to national security; or

“(B) there is a change in ownership, change to entity structure, or other substantial change in circumstances of the small business concern that the Federal agency determines poses a risk to national security; and

“(21) require a small business concern receiving an award under its STTR program to regularly report to the Federal agency and the Administration throughout the duration of the award on—

“(A) any change to a disclosure required under subparagraphs (A) through (G) of paragraph (17);

“(B) any material misstatement made under paragraph (20)(A); and

“(C) any change described in paragraph (20)(B).”.

(c) PAPERWORK REDUCTION ACT.—Chapter 35 of title 44, United States Code (commonly known as the “Paperwork Reduction Act”), shall not apply to the implementation of paragraphs (16) and (17) of subsection (g) or paragraphs (20) and (21) of subsection (o) of section 9 of the Small Business Act (15 U.S.C. 638), as added by subsections (a) and (b).

SEC. 6. REPORT ON ADVERSARIAL MILITARY AND FOREIGN INFLUENCE IN THE SBIR AND STTR PROGRAMS.

(a) COVERED AGENCY DEFINED.—In this section, the term “covered agency” means—

(1) the Department of Defense;

(2) the Department of Energy;

(3) the Department of Health and Human Services; or

(4) the National Science Foundation.

(b) REQUIREMENT.—

(1) IN GENERAL.—Except as provided in paragraph (2), not later than 180 days after the date of enactment of this Act, the head of each covered agency shall submit a report

assessing the adversarial military and foreign influences in the SBIR and STTR programs at the covered agency to—

(A) the Committee on Armed Services, the Committee on Small Business and Entrepreneurship, and the Committee on Commerce, Science, and Transportation of the Senate; and

(B) the Committee on Armed Services, the Committee on Small Business, and the Committee on Science, Space, and Technology of the House of Representatives.

(2) DEPARTMENT OF HEALTH AND HUMAN SERVICES.—The Secretary of Health and Human Services shall submit 2 reports under paragraph (1)—

(A) 1 assessing the adversarial military and foreign influences in the SBIR and STTR programs of the National Institutes of Health; and

(B) 1 assessing the adversarial military and foreign influences in the SBIR and STTR programs of the Department of Health and Human Services other than those of the National Institutes of Health.

(c) CONTENTS.—Each report submitted by a covered agency under subsection (b) shall include an analysis of—

(1) the national security and research and integrity risks of the SBIR and STTR programs of the covered agency; and

(2) the capability of such covered agency to identify and mitigate such risks.

(d) FORM.—Each report submitted under subsection (b) shall be in unclassified form, but may include a classified annex.

(e) INDEPENDENT ENTITY CONTRACTING.—The head of each covered agency, in coordination with the heads of other Federal agencies, as appropriate, may enter into a contract with an independent entity to prepare a report required under subsection (b).

SEC. 7. PROGRAM ON INNOVATION OPEN TOPICS.

(a) IN GENERAL.—Section 9 of the Small Business Act (15 U.S.C. 638), as amended by this Act, is further amended—

(1) in subsection (b)(7)—

(A) in subparagraph (G), by striking “and” at the end; and

(B) by adding at the end the following:

“(I) the number of applications submitted to each Federal agency participating in the SBIR or STTR program in innovation open topics as compared to conventional topics, and how many small business concerns receive funding from open topics compared to conventional topics;

“(J) the total number and dollar amount, and average size, of awards made by each Federal agency participating in the SBIR or STTR program, by phase, from—

“(i) open topics; and

“(ii) conventional topics;”;

(2) by adding at the end the following:

“(ww) PROGRAM ON INNOVATION OPEN TOPICS.—

“(1) ESTABLISHMENT.—Not later than 180 days after the date of enactment of this subsection, the Secretary of Defense shall establish innovation open topic activities using the SBIR and STTR programs of the Department of Defense in order to—

“(A) increase the transition of commercial technology to the Department of Defense;

“(B) expand the small business nontraditional industrial base;

“(C) increase commercialization derived from investments of the Department of Defense; and

“(D) expand the ability for qualifying small business concerns to propose technology solutions to meet the needs of the Department of Defense.

“(2) FREQUENCY.—The Secretary of Defense shall conduct not less than 1 open topic announcement at each component of the Department of Defense per fiscal year.

“(3) BRIEFING.—Not later than 180 days after the date of enactment of this subsection, the Secretary of Defense shall provide a briefing on the establishment of the program required under paragraph (1) to—

“(A) the Committee on Armed Services and the Committee on Small Business and Entrepreneurship of the Senate; and

“(B) the Committee on Small Business, the Committee on Armed Services, and the Committee on Science, Space, and Technology of the House of Representatives.”.

(b) GAO REPORT.—Not later than 1 year after the date of enactment of this Act, and annually thereafter for 3 years, the Comptroller General of the United States shall submit to Congress and issue a publicly available report comparing open topics and conventional topics under the SBIR and STTR programs that includes, to the extent practicable—

(1) an assessment of the percentage of small business concerns that progress from Phase I to Phase II awards, then to Phase III awards;

(2) the number of awards under the SBIR and STTR programs made to first-time applicants and first-time awardees;

(3) the number of awards under the SBIR and STTR programs made to non-traditional small business concerns, including those owned by women, minorities, and veterans;

(4) a description of outreach and assistance efforts by the Department of Defense to encourage and prepare new and diverse small business concerns to participate in the program established under subsection (ww) of section 9 of the Small Business Act (15 U.S.C. 638), as added by subsection (a);

(5) the length of time to review and disburse awards under such subsection (ww), evaluated in a manner enabling normalized comparisons of such times taken by each Federal agency that is required to establish an SBIR or STTR program and offers open topics;

(6) the ratio, and an assessment, of the amount of funding allocated towards open topics as compared to conventional topics at each Federal agency that is required to establish an SBIR or STTR program and offers open topics; and

(7) a comparison of the types of technology and end users funded under open topics compared to the types of technology and end users funded under conventional topics.

SEC. 8. INCREASED MINIMUM PERFORMANCE STANDARDS FOR EXPERIENCED FIRMS.

Section 9 of the Small Business Act (15 U.S.C. 638), as amended by this Act, is further amended—

(1) in subsection (b)(7), by adding at the end the following:

“(K) the minimum performance standards established under subsection (qq), including any applicable modifications under paragraph (3) of such subsection, and the number of small business concerns that did not meet those minimum performance standards, provided that the Administrator does not publish any personally identifiable information, the identity of each such small business concern, or any otherwise sensitive information; and

“(L) the aggregate number and dollar amount of SBIR and STTR awards made pursuant to waivers under subsection (qq)(3)(E), provided that the Administrator does not publish any personally identifiable information, the identity of each such small business concern, or any otherwise sensitive information;”;

(2) in subsection (qq)—

(A) by redesignating paragraphs (3) and (4) as paragraphs (4) and (5), respectively;

(B) by inserting after paragraph (2) the following:

“(3) INCREASED MINIMUM PERFORMANCE STANDARDS FOR EXPERIENCED FIRMS.—

“(A) PROGRESS TO PHASE II SUCCESS.—

“(i) IN GENERAL.—With respect to a small business concern that received or receives more than 50 Phase I awards during a covered period, each minimum performance standard established under paragraph (1)(A)(ii) shall be doubled for such covered period.

“(ii) CONSEQUENCE OF FAILURE TO MEET STANDARD.—If the head of a Federal agency determines that a small business concern that received a Phase I award from the Federal agency is not meeting an applicable increased minimum performance standard modified under clause (i), the small business concern may not receive more than 20 total Phase I awards and Phase II awards under subsection (cc) from each Federal agency during the 1-year period beginning on the date on which such determination is made.

“(iii) COVERED PERIOD DEFINED.—In this subparagraph, the term ‘covered period’ means a consecutive period of 5 fiscal years preceding the most recent fiscal year.

“(B) PROGRESS TO PHASE III SUCCESS.—

“(i) IN GENERAL.—Each minimum performance standard established under paragraph (2)(A)(ii) shall—

“(I) with respect to a small business concern that received or receives more than 50 Phase II awards during a covered period, require an average of \$250,000 of aggregate sales and investments per Phase II award received during such covered period; and

“(II) with respect to a small business concern that received or receives more than 100 Phase II awards during a covered period, require an average of \$450,000 of aggregate sales and investments per Phase II award received during such covered period.

“(ii) CONSEQUENCE OF FAILURE TO MEET STANDARD.—If the head of a Federal agency determines that a small business concern that received a Phase I award from the agency is not meeting an applicable increased minimum performance standard modified under clause (i), the small business concern may not receive more than 20 total Phase I awards and Phase II awards under subsection (cc) from each agency during the 1-year period beginning on the date on which such determination is made.

“(iii) DOCUMENTATION.—

“(I) IN GENERAL.—A small business concern that is subject to an increased minimum performance standard described in clause (i) shall submit to the Administrator supporting documentation evidencing that all covered sales of the small business concern were properly used to meet the increased minimum performance standard.

“(II) COVERED SALE DEFINED.—In this clause, the term ‘covered sale’ means a sale by a small business concern—

“(aa) that the small business concern claims to be attributable to an SBIR or STTR award;

“(bb) for which no amount of the payment was or is made using Federal funds;

“(cc) which the small business concern uses to meet an applicable increased minimum performance standard under clause (i); and

“(dd) that was or is received during the 5 fiscal years immediately preceding the fiscal year in which the small business concern uses the sale to meet the increased minimum performance standard.

“(iv) COVERED PERIOD DEFINED.—In this subparagraph, the term ‘covered period’ means a consecutive period of 10 fiscal years preceding the most recent 2 fiscal years.

“(C) PATENTS FOR INCREASED MINIMUM PERFORMANCE STANDARDS.—A small business concern with respect to which an increased minimum performance standard under sub-

paragraph (B) applies may not meet the increased minimum performance standard by obtaining patents.

“(D) EFFECTIVE DATE.—Subparagraphs (A) through (C) shall take effect on April 1, 2023.

“(E) WAIVER.—

“(i) IN GENERAL.—The Administrator may, upon the request of a senior official of a Federal agency, grant a waiver with respect to a topic for the SBIR or STTR program of the Federal agency if—

“(I) the topic is critical to the mission of the Federal agency or relates to national security; and

“(II) the official submits to the Administrator a request for the waiver in accordance with clause (iii).

“(ii) WAIVER EFFECTS.—If the Administration grants a waiver with respect to a topic for the SBIR or STTR program of a Federal agency, subparagraphs (A)(ii) and (B)(ii) shall not prohibit any covered small business concern from receiving an SBIR or STTR award under such topic.

“(iii) AGENCY REQUEST AND CONGRESSIONAL NOTIFICATION.—Not later than 15 days before the release of a solicitation including a topic for which a senior official of a Federal agency is requesting a waiver under clause (i), the senior official shall submit to the Administrator, the Committee on Small Business and the Committee on Science, Space, and Technology of the House of Representatives, and the Committee on Small Business and Entrepreneurship of the Senate a request for the waiver.

“(iv) ADMINISTRATOR DETERMINATION AND CONGRESSIONAL NOTIFICATION.—Not later than 15 days after receiving a request for a waiver under clause (i), the Administrator shall make a determination with respect to the request and notify the senior official at the Federal agency that made the request, the Committee on Small Business and the Committee on Science, Space, and Technology of the House of Representatives, and the Committee on Small Business and Entrepreneurship of the Senate of the determination.

“(v) DEFINITIONS.—In this subparagraph:

“(I) COVERED SMALL BUSINESS CONCERN.—The term ‘covered small business concern’ means a small business concern that is subject to the consequences under subparagraph (A)(ii) or (B)(ii) pursuant to a determination by the head of a Federal agency that such small business concern did not meet an increased minimum performance standard that was applicable to such small business concern.

“(II) SENIOR OFFICIAL.—The term ‘senior official’ means an individual appointed to a position in a Federal agency that is classified above GS-15 pursuant section 5108 of title 5, United States Code, or any equivalent position, as determined by the Administrator.

“(F) REPORTING.—

“(i) IN GENERAL.—Not later than July 1, 2023, and annually thereafter, the Administrator shall submit to Congress a list of the small business concerns that did not meet—

“(I) an applicable minimum performance standard established under paragraph (1)(A)(ii) or (2)(A)(ii); or

“(II) an applicable increased minimum performance standard.

“(ii) WAIVERS.—Each list submitted under clause (i) shall identify each small business concern that received an SBIR or STTR award pursuant to a waiver granted under subparagraph (E) by the Administrator during the period covered by the list.

“(iii) CONFIDENTIALITY.—Each list submitted under clause (i) shall be confidential and exempt from disclosure under section 552(b)(3) of title 5, United States Code (commonly known as the ‘Freedom of Information Act’).

“(G) IMPLEMENTATION.—Not later than April 1, 2023, the Administration shall implement the increased minimum performance standards under this paragraph.

“(H) RULES OF CONSTRUCTION.—Nothing in this paragraph shall be construed—

“(i) to prohibit a small business concern from participating in a Phase I (or Phase II if under the authority of subsection (cc)) of an SBIR or STTR program under paragraph (1)(B) or (2)(B) solely on the basis of a determination by the head of a Federal agency that the small business concern is not meeting an increased minimum performance standard; or

“(ii) to prevent the head of a Federal agency from implementing more restrictive limitations on the number of federally funded Phase I awards and direct to Phase II awards under subsection (cc) that may be awarded to a small business concern than the limitations described in subparagraphs (A)(ii) and (B)(ii).

“(I) TERMINATION.—This paragraph shall terminate on September 30, 2025.”;

(C) in paragraph (5), as so redesignated, by striking “paragraph (3)(A)” and inserting “paragraph (4)(A)”; and

(D) by adding at the end the following:

“(6) INSPECTOR GENERAL AUDIT.—Not later than 1 year after the date on which the Administrator implements the increased minimum performance standards under paragraph (3), and periodically thereafter, the Inspector General of the Administration shall—

“(A) conduct an audit on whether the small business concerns subject to increased minimum performance standards under paragraph (3)(B) verified—

“(i) the sales by and investments in the small business concerns—

“(I) during the 5 fiscal years immediately preceding the fiscal year in which the small business concern used such sales and investments to meet an applicable increased performance standard; and

“(II) as a direct result of a Phase I award or Phase II award made under subsection (cc) during the covered period (as defined in paragraph (3)(B)(iv)), consistent with the definition of Phase III, as applicable;

“(ii) any third-party revenue the small business concerns list as investments or incomes to meet the increased minimum performance standard—

“(I) is a direct result of a Phase I award or Phase II award made under subsection (cc) during the covered period (as defined in paragraph (3)(B)(iv)); and

“(II) consistent with the requirements of the Administrator as in effect on September 30, 2022, or any successor requirements; and

“(iii) any dollar amounts such small business concerns list as investments or income to meet such increased minimum performance standard the providence of which is unclear and that is not directly attributable to a Phase I award or Phase II award made under subsection (cc) during the covered period (as defined in paragraph (3)(B)(iv)), consistent with the definition of Phase III, as applicable;

“(B) assess the self-certification requirements for the minimum performance standards established under paragraph (2)(A)(ii) and the increased minimum performance standards under paragraph (3)(B); and

“(C) submit to the Committee on Small Business and Entrepreneurship of the Senate and the Committee on Small Business and the Committee on Science, Space, and Technology of the House of Representatives a report on the audit conducted under subparagraph (A) and the assessment conducted under subparagraph (B).

“(7) INCREASED MINIMUM PERFORMANCE STANDARD DEFINED.—In this subsection, the

term ‘increased minimum performance standard’ means a minimum performance standard established under paragraph (1)(A)(ii) or (2)(A)(ii) as modified under subparagraph (A) or (B), respectively, of paragraph (3) with respect to a small business concern.”.

SEC. 9. PROHIBITION AGAINST WRITING SOLICITATION TOPICS.

(a) IN GENERAL.—Section 9 of the Small Business Act (15 U.S.C. 638), as amended by this Act, is further amended by adding at the end the following subsection:

“(xx) ADDITIONAL PROVISIONS RELATING TO SOLICITATION TOPICS.—

“(1) IN GENERAL.—A Federal agency required to establish an SBIR or STTR program shall implement a multi-level review and approval process within the Federal agency for solicitation topics to ensure adequate competition and that no private individual or entity is shaping the requirements for eligibility for the solicitation topic after the selection of the solicitation topic, except that the Federal agency may amend the requirements to clarify the solicitation topic.

“(2) REFERRAL.—A Federal agency that does not comply with paragraph (1) shall be referred to the Inspector General of the Administration for further investigation.”.

SEC. 10. GAO STUDY ON MULTIPLE AWARD WINNERS.

Not later than 18 months after the date of enactment of this Act, the Comptroller General of the United States shall conduct a study and submit to the Committee on Small Business and Entrepreneurship of the Senate and the Committee on Small Business and the Committee on Science, Space, and Technology of the House of Representatives a report, which shall be made publicly available, on small business concerns that are awarded not less than 50 Phase II awards under the SBIR or STTR programs during the consecutive period of 10 fiscal years preceding the most recent 2 fiscal years, including, to the extent practicable, an analysis of—

(1) the impact of the small business concerns on the SBIR and STTR programs;

(2) the ratio of the number of Phase II awards received by the small business concerns to the total number of Phase II awards;

(3) the ability of the small business concerns to commercialize and meet the tenets of the SBIR and STTR programs;

(4) the impact on new entrants and seeding technology necessary to the Federal agency mission or commercial markets and, with respect to the Department of Defense, whether the types of technology the small business concerns are pursuing are primarily hardware, software, or system components for the warfighter;

(5) an evaluation and study of varying levels of award caps and lifetime program earning caps;

(6) an assessment of the increased minimum performance standards under paragraph (3) of section 9(qq) of the Small Business Act (15 U.S.C. 638(qq)), as added by section 8, on the behavior of those concerns and on the SBIR and STTR programs, and whether to continue such increased minimum performance standards; and

(7) recommendations on whether alternative minimum performance standards under section 9(qq) of the Small Business Act (15 U.S.C. 638(qq)) should be considered, and the extent to which such alternative minimum performance standards preserve the competitive, merit-based foundation of the SBIR and STTR programs.

SEC. 11. GAO REPORT ON SUBCONTRACTING IN SBIR AND STTR PROGRAMS.

Not later than 1 year after the date of the enactment of this Act, the Comptroller General of the United States shall submit to the

Committee on Small Business and Entrepreneurship of the Senate and the Committee on Small Business and the Committee on Science, Space, and Technology of the House of Representatives a report evaluating, to the extent practicable, the following:

(1) The extent to which SBIR awardees and STTR awardees are in compliance with the Federal Funding Accountability and Transparency Act (31 U.S.C. 6101 note).

(2) The extent to which SBIR awardees and STTR awardees enter into subcontracting agreements with respect to an SBIR or STTR award.

(3) The total number and dollar amount of subcontracts entered into between an SBIR awardee or an STTR awardee and a concern that is not a small business concern (including such concerns that are defense contractors) with respect to an SBIR or STTR award.

(4) A description of the type and purpose of subcontracting agreements described in paragraph (2).

(5) An analysis of whether the use of subcontracts by an SBIR awardee or an STTR awardee is consistent with the purposes of section 9 of the Small Business Act (15 U.S.C. 638).

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from New York (Ms. VELÁZQUEZ) and the gentleman from Missouri (Mr. LUETKEMEYER) each will control 20 minutes.

The Chair recognizes the gentlewoman from New York.

GENERAL LEAVE

Ms. VELÁZQUEZ. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on the measure under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from New York?

There was no objection.

Ms. VELÁZQUEZ. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in support of S. 4900, the SBIR and STTR Extension Act of 2022.

Let me begin by thanking Ranking Member LUETKEMEYER and my colleagues on the Senate Small Business Committee and the House Committee on Science, Space, and Technology for their work on this legislation.

Mr. Speaker, I especially want to thank Chairwoman EDDIE BERNICE JOHNSON, who is retiring at the end of this Congress. Her knowledge and expertise of the programs were pivotal to these negotiations.

Today's bill extends the SBIR and STTR programs and six related pilot programs for 3 years. Reauthorizing them is vital to thousands of small businesses and research institutions that partner with 11 agencies to develop solutions to some of our country's most difficult challenges.

Since their founding 40 years ago, SBIR and STTR have launched some of our Nation's most innovative enterprises and products that have become household names. Companies like iRobot, Sonicare electric toothbrushes, 23andMe, LASIK eye surgery, and Qualcomm wireless communications all got their start through SBIR/STTR.

More innovative technology is on the way. In fiscal year 2021 alone, Federal agencies leveraged nearly \$4 billion in awards to back 4,000 small businesses and nearly 7,000 projects. Awardees are leading the way in our efforts to fight climate change, modernize manufacturing, and create breakthroughs in lifesaving medical technologies.

S. 4900 gives them the ability to continue their work and lead America's innovation by providing stability to both the small businesses and agencies for the next 3 years.

It builds on efforts to strengthen Federal research security through due diligence reviews to prevent malign foreign countries from stealing technologies developed through SBIR and STTR.

It also establishes higher benchmarks for more experienced firms to commercialize their technologies and includes various studies and more detailed reporting to increase oversight and inform future program changes.

Unfortunately, S. 4900 does not include everything we wanted to accomplish during this reauthorization, but I remain committed to coming together again in the future to have those conversations.

Our monthslong bipartisan and bicameral negotiations will avoid a devastating lapse and protect thousands of jobs. Today, we are here considering a hard-fought compromise to reauthorize the SBIR and STTR programs.

Mr. Speaker, I urge Members to vote "yes," and I reserve the balance of my time.

Mr. LUETKEMEYER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support in of S. 4900, the SBIR and STTR Extension Act of 2022.

The Small Business Innovation Research and Small Businesses Technology Transfer, or SBIR and STTR programs, are vital to the success of many small entities and have helped create thousands of new jobs by fostering innovation and stimulating the economy through cutting-edge research. SBIR and STTR's mission is to support scientific excellence and technological innovation for small businesses.

For the last 40 years, these programs have helped firms develop new technologies that have directly assisted Federal agencies meet their R&D needs. The American warfighter is no doubt stronger due to these programs.

However, a recent Department of Defense report revealed foreign adversaries have been exploiting the SBIR through shell companies, planted government researchers, and state-sponsored talent programs. The report found that the People's Republic of China has become a large beneficiary of SBIR and STTR. This is unacceptable, and the status quo must not continue, Mr. Speaker.

□ 1415

The programs must have heightened awareness and protections in place to

prevent nefarious abuse. This legislation, crafted over months of negotiations, provides significant reforms to combat malign foreign influence and protect our small businesses from Chinese acquisition of innovation technologies.

Specifically, this bill mandates that agencies establish strong due-diligence safeguards to assess security risks and prevent influence from bad actors. It requires companies to disclose any business ties, investments, and contracts with China, and it gives agencies authority to deny any application if certain relationships are deemed a risk to national security.

In addition to safeguarding small businesses from China, this bill curbs abuse by multiple award winners, or SBIR mills. Mills are firms that consume a disproportionate number of awards but have low commercialization rates. These mills will have to meet enhanced performance standards in order to apply for new awards. These benchmarks will hold mills accountable and ensure that the programs are focusing on commercializing projects and attracting more private capital investments.

Finally, S. 4900 strengthens congressional oversight, increases public transparency, and safeguards taxpayer dollars during a time where government overreach has run rampant, and transparency has been limited.

These reforms are a win for small businesses and will protect U.S. R&D and innovative technologies.

I thank Chairwoman VELÁZQUEZ, Ranking Member LUCAS, Chairwoman EDDIE BERNICE JOHNSON, as well as Senators CARDIN, PAUL, and ERNST for working in a bipartisan manner to ensure these programs are reauthorized before the end of the month.

I encourage all my colleagues to support S. 4900, which unanimously passed the Senate last week.

Mr. Speaker, I reserve the balance of my time.

Ms. VELÁZQUEZ. Mr. Speaker, I yield 5 minutes to the gentlewoman from Michigan (Ms. STEVENS), the chairwoman of the Science, Space, and Technology Subcommittee on Research and Technology.

Ms. STEVENS. Mr. Speaker, I rise today in support of S. 4900, the SBIR and STTR Extension Act of 2022. This is an exciting and thrilling day, and we couldn't push with more urgency to pass this legislation.

The Small Business Innovation Research Program, the SBIR, is well-known for its tagline of "America's seed fund," as it inspires small businesses across the country to transform their ideas into marketable products and services.

On behalf of Chairwoman JOHNSON, I thank the Chairwoman for the Small Business Committee for bringing us here to this moment and, of course, our colleagues on the other side of the aisle, for joining us in a bipartisan action to improve America's competitiveness.

The National Science Foundation piloted the SBIR program in the 1970s, at the urging of Members who recognized that investments in small business innovation benefits our Nation as a whole and creates jobs. Due to its success, Congress made it a government-wide program. Decades later, SBIR has given back to the taxpayer in immeasurable ways. It has been so successful that the SBIR model has been replicated in 17 countries.

Since coming to Congress myself, I devote Mondays to visiting manufacturers or businesses in my district, in what I call Manufacturing Mondays, which showcases southeastern Michigan's innovation economy and our workforce. I have seen the powerful impact of the SBIR program firsthand in these visits; and previous to coming to Congress, I helped companies and small business innovators apply for these grants.

Last December, I had the privilege of visiting the team at Geofabrica, an Additive Manufacturing Technology Development company in Auburn Hills, Michigan, to hear about their exciting, DOD-funded SBIR work. Their CEO shared something that struck a chord. He said: "Geofabrica would not have undertaken a fraction of its technology development if it were not for the SBIR and STTR programs."

Think about that, my friends. These programs make discovery possible for small businesses; some beginning at the university level, and some that are small businesses in their infancy stage.

Over the past 5 years, the SBIR program has awarded small businesses in Michigan more than \$348 million in funding for R&D. This has led to incredibly exciting discoveries and inventions in Michigan, from the development of a handheld technology that enables farmers to accurately detect nitrates in their own fields to save farmers money, while also protecting our freshwater systems from toxic algal blooms; to the testing of new ligand for PET imaging of the brain during clinical trials for new memory disorder drugs. This is all coming from this program we are going to reauthorize today.

The last comprehensive reauthorization for the SBIR program was 11 years ago. We have opted or just continued to extend the program, like we did in 2016, leaving powerful opportunities to strengthen SBIR out of the conversation. My, how the times have changed.

I began this Congress ready to work on updating SBIR in order to support our entrepreneurs, our job creators, and the place that I am so privileged to call home and represent, Oakland County, Michigan, the home of automation alley.

Congressman and Dr. JIM BAIRD and myself ushered in H.R. 4033, a smart and effective way to make improvements to SBIR. Unfortunately, our bill was not passed by the Senate, and it is not the complete legislation before us today. So even as we provide much-

needed stability to the program with today's vote, we still have work to do.

One of my own priorities is to expand program outreach to enable agencies to reach more first-time entrepreneurs, particularly those who are Black, Hispanic, Indigenous, and female entrepreneurs, people innovating in their home and alongside their family, particularly during these disruptive times of the COVID-19 pandemic. All of these individuals have innovations and businesses that have been long underfunded.

I also hope to see enhanced support for technology commercialization within the program, including through additional technical support to businesses and by providing agencies a wider range of funding tools to meet our unique needs.

Mr. Speaker, I call on my colleagues to join me in passing S. 4900 today for SBIR reauthorization.

Mr. LUETKEMEYER. Mr. Speaker, I yield such time as he may consume to the distinguished gentleman from Oklahoma (Mr. LUCAS), the Republican leader of the Science, Space, and Technology Committee.

Mr. LUCAS. Mr. Speaker, I thank my friend for yielding me this time.

Mr. Speaker, I rise in support of the SBIR and STTR Extension Act. This bill is extremely timely, as the authorizations for these programs expire in just a few days.

I am pleased that the bill we are considering today represents a bipartisan, bicameral agreement that provides both small businesses and agencies clarity by reauthorizing the programs for another 3 years.

The SBIR and STTR programs play an important role in our innovation economy. Through these programs, research agencies provide opportunities to small businesses who are then able to leverage private-sector funding to propel research forward.

The programs incentivize economic growth in two ways: They support entrepreneurship and job creation at small businesses across the country. They also support high-risk research to drive breakthrough technologies that make America more competitive.

These programs are a notable example of how public-private partnerships can provide value and stimulate innovation. Importantly, this reauthorization includes several reforms to the programs that are priorities for Republican Members, including: Protecting our research enterprise, bolstering transparency and oversight, and focusing on successful commercialization.

I am pleased that this reauthorization includes strong due diligence measures that each agency with an SBIR or STTR program must enforce. These safeguards build on the bipartisan research security framework that the Science Committee has championed.

Additionally, an increased focus on transparency and oversight of the programs will bolster public transparency,

safeguard taxpayer dollars, and provide more opportunities to new small business applicants.

I thank my colleagues on the House Small Business Committee for working with me to reach this bipartisan agreement, and, in particular, I thank Ranking Member LUETKEMEYER for his leadership throughout the process.

As always, many thanks to my Chairwoman, EDDIE BERNICE JOHNSON, for her tireless work to ensure that the Science, Space, and Technology Committee remains a bipartisan, productive committee focused on legislating.

The SBIR and STTR programs are vital to our research enterprise, especially as we strive to maintain American leadership and technology. I urge my colleagues to support this legislation.

Ms. VELÁZQUEZ. Mr. Speaker, I yield 2 minutes to the gentlewoman from Pennsylvania (Ms. HOULAHAN).

Ms. HOULAHAN. Mr. Speaker, I rise today also in support of S. 4900, the SBIR and STTR Extension Act of 2022. This bipartisan legislation is both timely and necessary to ensure that our Nation remains on the forefront of innovation, research, and development of the products and technology of our future.

As an entrepreneur myself by trade, and with experience scaling several businesses in Pennsylvania, I know personally just how important that seed funding can be to a business' success and to the potential to get its products to the shelves.

The Small Business Innovation Research and Technology Transfer Programs, otherwise known as America's seed fund, offer competitive Federal awards to small firms in order to tackle the 21st century problems and needs. Simply put, funds from these programs move innovative technologies from concept to marketplace, or from the lab to our government programs and systems.

Despite the overwhelming success of these programs, there is one major problem that we have in Congress that we all must address, and that is we are standing here today. The SBIR and STTR programs are set to expire in just 2 short days unless we come together and pass this bill and send it to the President's desk.

The consequences of a program lapse would be so devastating on many, many fronts. For instance, the Department of Defense has shared that failure to reauthorize this program will result in approximately 1,200 warfighting needs not being addressed; not to mention that these programs are remarkable taxpayer investments, returning \$22 to the economy for every \$1 spent on projects at the DOD.

I have been proud to work with my colleagues across the Small Business and the Armed Service Committees to lead this effort to extend the authorization of these critical programs. Indeed, in June, I successfully offered a bipartisan amendment to prevent a

harmful program lapse in our annual defense bill. As the defense bill is, unfortunately, still pending in the Senate, I thank Senators CARDIN and ERNST for their sponsorship of this important legislation, which will reauthorize the SBIR and STTR programs for an additional 3 years.

Furthermore, this legislation adds measures aimed at commercializing projects and expanding Federal research security to protect against technology theft.

I thank the leadership for their support. Time is of the essence, and I urge my colleagues to support the bill.

Mr. LUETKEMEYER. Mr. Speaker, I yield such time as she may consume to the gentlewoman from California (Mrs. KIM), a valuable member on the Small Business Committee and a strong advocate for entrepreneurs.

Mrs. KIM of California. Mr. Speaker, I thank Ranking Member LUETKEMEYER for yielding.

Mr. Speaker, I rise in strong support of the SBIR and STTR Extension Act of 2022. This bipartisan legislation reauthorizes the Small Business Innovation Research and Small Business Technology Transfer Programs for 3 years and implements several reforms to strengthen the programs for years to come.

This bill safeguards taxpayer dollars by ensuring that we increase the rate of successful commercialization, prohibits our adversaries from reaping the benefits of our SBIR and STTR investments, and encourages the rapid development of emerging technologies that are vital for our national security.

In addition, this legislation would allow the Department of Defense to adopt the successful open topic solicitation process pioneered by the Air Force. The open topic solicitation will attract new small businesses into the SBIR program, accelerate the development of emerging technologies, broaden program access to young startups, and increase the potential for commercial impact.

The SBIR and STTR programs are important tools for small businesses to research, develop, and commercialize innovative technologies and help create good-paying jobs.

As we all know, the CCP is taking concerted steps to bridge the innovation gap with the United States and knock us down as the world leader in innovation. We must never relent our country's position as the leading innovator and creator of emerging technologies.

I thank Ranking Members LUETKEMEYER and LUCAS and Chairwomen VELÁZQUEZ and JOHNSON for their leadership in bringing a successful, bicameral negotiation to reauthorize SBIR and STTR programs.

I urge my colleagues to support this underlying legislation and continue our country's support for our small businesses and innovation.

□ 1430

Ms. VELÁZQUEZ. Mr. Speaker, I reserve the balance of my time.

Mr. LUETKEMEYER. Mr. Speaker, I yield such time as he may consume to the gentleman from Wisconsin (Mr. FITZGERALD), a very valuable, experienced member of our Committee on Small Business and another strong advocate for the entrepreneurs of our economy.

Mr. FITZGERALD. Mr. Speaker, I thank the ranking member for yielding.

I rise in support of S. 4900, which would reauthorize the Small Business Innovation Research and Small Business Technology Transfer programs.

In addition to extending the SBIR and STTR programs for 3 years, this bill contains several important provisions that safeguard our government and its research from foreign entities and enhance benchmarks for those companies that have received multiple awards.

Since 1992, the SBIR and STTR programs have helped promote public-private partnership and small business innovation by requiring agencies with sizable R&D needs to set aside a portion of their budget for small business participation.

As many of the speakers said before me, the return on investment has been nothing short of impressive. In the Department of Defense alone, between 1995 and 2018, the SBIR and STTR programs resulted in \$28 billion in new product sales to the U.S. military, \$347 billion in total economic output, and the creation of more than 1.5 million jobs.

But with this amount of participation comes the likelihood of malign influence and fraud within the program. This was evidenced by a DOD report that found China was using shell companies in its Thousand Talents Program to profit off federally funded research programs like these two we are talking about here this afternoon.

Having been part of the negotiating process during my time as a conferee for the COMPETES/USICA bill, the issue of combating foreign influence was certainly top of mind.

I am pleased that both sides were able to come to an agreement and understand the importance of safeguarding much of this research.

Not only will this bill require companies that apply for SBIR and STTR awards to disclose any ties to China, but it will also require Federal agencies to bolster their due diligence efforts to ensure our intellectual property is fully protected.

Most importantly, the bill also requires DOD to establish an open topic solicitation, allowing small businesses the opportunity to showcase how their innovations can be beneficial to the actual warfighter. The GAO believes this will be more than efficiently laid out and planned and that new companies can be bolstered with this small business innovation.

Mr. Speaker, I urge my colleagues to vote "yes."

Ms. VELÁZQUEZ. Mr. Speaker, I reserve the balance of my time.

Mr. LUETKEMEYER. Mr. Speaker, I yield such time as he may consume to the gentleman from Nebraska (Mr. FLOOD), one of our newest Members who has joined our committee and is doing a fantastic job representing small businesses and is another strong advocate for the entrepreneurs of our country.

Mr. FLOOD. Mr. Speaker, I rise to support the SBIR and STTR Extension Act of 2022.

I thank Chair VELÁZQUEZ and Ranking Member LUETKEMEYER for their work in a bipartisan fashion. I also thank Senators ERNST and CARDIN for what they have done for this legislation. I am pleased that this bill has been brought to the floor in an expedited fashion.

The Small Business Innovation Research and Small Business Technology Transfer Extension Act is an important piece of legislation, and the changes this bill brings to these programs are urgently needed.

For those who are not familiar, the Small Business Innovation Research program was created in 1982. The program was intended to spur American innovation and harness ingenuity by increasing small business engagement in federally funded research and development.

More recently, however, the Chinese Government has been manipulating this program. A report from the Department of Defense in April 2021 revealed some of the tactics China has used to this end.

The DOD revealed instances where companies were created, received SBIR grants, and then the founders mysteriously dissolved the company. Upon further investigation, it became clear that these companies were either recruited to China or were formed with the intent of returning to China from the start.

Either way, the result was the same: The American taxpayers funded projects that were stolen by the Chinese Government. This was simply an unacceptable status quo.

This bill fixes those problems. It implements strong safeguards against the influence of China or other foreign actors, and it creates new reporting requirements for these programs that will ensure taxpayer dollars are properly used.

This bill also brings the SBIR back to its original purpose: to spur innovation and unlock the ingenuity of American small businesses.

With these changes to the program, we can make sure the SBIR and STTR are stronger and more accessible for entrepreneurs in Nebraska and across the country.

Mr. Speaker, I urge a "yes" vote.

Mr. LUETKEMEYER. Mr. Speaker, I yield myself the balance of my time for closing.

The SBIR and STTR Extension Act of 2022 will reauthorize the programs for 3 years and address congressional concerns by establishing research secu-

rity measures, increasing transparency and oversight, and focusing on commercialization.

I think, as you have heard the speakers this afternoon, in my mind, we have two big problems that we are solving here. Besides the extension of these programs, which I think are important to the national defense of our country, for one thing, I think it also helps spur entrepreneurial and investment technology that I think is vital to our country, and we stop the use of some of these programs as ATMs for different companies. I think we also put a stop to the Chinese abuse of these programs, as well.

I think those are the two highlights that are really important in these programs. They have done a good job of putting protections in place. I think that we are strengthening these protections, as well as protecting R&D and protecting our taxpayer dollars to make sure they are being spent effectively and efficiently.

Mr. Speaker, I ask my colleagues to support S. 4900, and I yield back the balance of my time.

Ms. VELÁZQUEZ. Mr. Speaker, I yield myself the balance of my time for closing.

The U.S. has the most dynamic small business ecosystem on the planet, and this 3-year extension ensures that our country remains one of the most innovative in the world.

The SBIR and STTR are essential components of that global competitiveness. They give small businesses a role in developing groundbreaking technologies that make our lives better in a variety of ways.

This program boosts American security, innovation, and entrepreneurship. That is why we must act today to extend them and ensure our country continues to reap these benefits into the future.

Stakeholders, from individual small business owners to research universities to the Department of Defense, have made it clear that even a temporary shutdown would be disastrous.

Throughout these negotiations, we have not always seen eye to eye, but I am thankful we all remain committed to keeping the programs open.

We have come up with a compromise that provides stability for small businesses and the agencies they partner with, reduces the risk that foreign adversaries can steal U.S. technologies developed through SBIR and STTR, and preserves the competitive and merit-based strength of these programs.

Mr. Speaker, this is not the end, and there will be more work to do in the coming years. I pledge to continue to work to improve the programs.

I, again, thank my colleagues involved with reauthorization for all of their work leading up to today, including the members of the Committee on Small Business who participated in many hearings and briefings over the course of the past 2 years.

I also thank the staff on the House Committees on Small Business and Science, Space, and Technology for their dedication and tireless work to get us to this point: Dahlia Sokolov, Rebecca Callahan, Sara Barber, Elizabeth Barczak, Catherine Johnson, Jenn Wickre, Giulia Leganski, Robert Yavor, Delia Barr, Ellen Harrington, and Kevin Wheeler, who have been living and breathing SBIR for most of their time on the Hill, including this year as they worked around the clock, days, nights, and weekends. I sincerely thank each of them.

Mr. Speaker, I ask my colleagues to vote “yes” on the SBIR and STTR Extension Act of 2022 to provide stability and certainty to small firms and agencies alike, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from New York (Ms. VELÁZQUEZ) that the House suspend the rules and pass the bill, S. 4900.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. GOOD of Virginia. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this motion will be postponed.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore laid before the House the following communication from the Clerk of the House of Representatives:

OFFICE OF THE CLERK,
HOUSE OF REPRESENTATIVES,
Washington, DC, September 27, 2022.

Hon. NANCY PELOSI,
Speaker, House of Representatives,
Washington, DC.

DEAR MADAM SPEAKER: Pursuant to the permission granted in Clause 2(h) of Rule II of the Rules of the U.S. House of Representatives, the Clerk received the following message from the Secretary of the Senate on September 27, 2022, at 1:47 p.m.

That the Senate passed S. 4885.

That the Senate agreed to Relative to the Death of the Honorable Robert “Bob” Charlie Krueger, former United States Senator and Representative for the State of Texas S. Res. 796.

That the Senate passed without amendment H.R. 7846.

With best wishes, I am,

Sincerely,

CHERYL L. JOHNSON,
Clerk.

FEDRAMP AUTHORIZATION ACT

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 8956) to amend chapter 36 of title 44, United States Code, to improve the cybersecurity of the Federal Government, and for other purposes.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 8956

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “FedRAMP Authorization Act”.

SEC. 2. FINDINGS.

Congress finds the following:

(1) Ensuring that the Federal Government can securely leverage cloud computing products and services is key to expediting the modernization of legacy information technology systems, increasing cybersecurity within and across departments and agencies, and supporting the continued leadership of the United States in technology innovation and job creation.

(2) According to independent analysis, as of calendar year 2019, the size of the cloud computing market had tripled since 2004, enabling more than 2,000,000 jobs and adding more than \$200,000,000,000 to the gross domestic product of the United States.

(3) The Federal Government, across multiple presidential administrations and Congresses, has continued to support the ability of agencies to move to the cloud, including through—

(A) President Barack Obama’s “Cloud First Strategy”;

(B) President Donald Trump’s “Cloud Smart Strategy”;

(C) the prioritization of cloud security in Executive Order 14028 (86 Fed. Reg. 26633; relating to improving the nation’s cybersecurity), which was issued by President Joe Biden; and

(D) more than a decade of appropriations and authorization legislation that provides agencies with relevant authorities and appropriations to modernize on-premises information technology systems and more readily adopt cloud computing products and services.

(4) Since it was created in 2011, the Federal Risk and Authorization Management Program (referred to in this section as “FedRAMP”) at the General Services Administration has made steady and sustained improvements in supporting the secure authorization and reuse of cloud computing products and services within the Federal Government, including by reducing the costs and burdens on both agencies and cloud companies to quickly and securely enter the Federal market.

(5) According to data from the General Services Administration, as of the end of fiscal year 2021, there were 239 cloud providers with FedRAMP authorizations, and those authorizations had been reused more than 2,700 times across various agencies.

(6) Providing a legislative framework for FedRAMP and new authorities to the General Services Administration, the Office of Management and Budget, and Federal agencies will—

(A) improve the speed at which new cloud computing products and services can be securely authorized;

(B) enhance the ability of agencies to effectively evaluate FedRAMP authorized providers for reuse;

(C) reduce the costs and burdens to cloud providers seeking a FedRAMP authorization; and

(D) provide for more robust transparency and dialogue between industry and the Federal Government to drive stronger adoption of secure cloud capabilities, create jobs, and reduce wasteful legacy information technology.

SEC. 3. TITLE 44 AMENDMENTS.

(a) AMENDMENT.—Chapter 36 of title 44, United States Code, is amended by adding at the end the following:

“§ 3607. Definitions

“(a) IN GENERAL.—Except as provided under subsection (b), the definitions under sections 3502 and 3552 apply to this section through section 3616.

“(b) ADDITIONAL DEFINITIONS.—In this section through section 3616:

“(1) ADMINISTRATOR.—The term ‘Administrator’ means the Administrator of General Services.

“(2) APPROPRIATE CONGRESSIONAL COMMITTEES.—The term ‘appropriate congressional committees’ means the Committee on Homeland Security and Governmental Affairs of the Senate and the Committee on Oversight and Reform of the House of Representatives.

“(3) AUTHORIZATION TO OPERATE; FEDERAL INFORMATION.—The terms ‘authorization to operate’ and ‘Federal information’ have the meaning given those term in Circular A–130 of the Office of Management and Budget entitled ‘Managing Information as a Strategic Resource’, or any successor document.

“(4) CLOUD COMPUTING.—The term ‘cloud computing’ has the meaning given the term in Special Publication 800–145 of the National Institute of Standards and Technology, or any successor document.

“(5) CLOUD SERVICE PROVIDER.—The term ‘cloud service provider’ means an entity offering cloud computing products or services to agencies.

“(6) FEDRAMP.—The term ‘FedRAMP’ means the Federal Risk and Authorization Management Program established under section 3608.

“(7) FEDRAMP AUTHORIZATION.—The term ‘FedRAMP authorization’ means a certification that a cloud computing product or service has—

“(A) completed a FedRAMP authorization process, as determined by the Administrator; or

“(B) received a FedRAMP provisional authorization to operate, as determined by the FedRAMP Board.

“(8) FEDRAMP AUTHORIZATION PACKAGE.—The term ‘FedRAMP authorization package’ means the essential information that can be used by an agency to determine whether to authorize the operation of an information system or the use of a designated set of common controls for all cloud computing products and services authorized by FedRAMP.

“(9) FEDRAMP BOARD.—The term ‘FedRAMP Board’ means the board established under section 3610.

“(10) INDEPENDENT ASSESSMENT SERVICE.—The term ‘independent assessment service’ means a third-party organization accredited by the Administrator to undertake conformity assessments of cloud service providers and the products or services of cloud service providers.

“(11) SECRETARY.—The term ‘Secretary’ means the Secretary of Homeland Security.

“§ 3608. Federal Risk and Authorization Management Program

“There is established within the General Services Administration the Federal Risk and Authorization Management Program. The Administrator, subject to section 3614, shall establish a Government-wide program that provides a standardized, reusable approach to security assessment and authorization for cloud computing products and services that process unclassified information used by agencies.

“§ 3609. Roles and responsibilities of the General Services Administration

“(a) ROLES AND RESPONSIBILITIES.—The Administrator shall—

“(1) in consultation with the Secretary, develop, coordinate, and implement a process to support agency review, reuse, and standardization, where appropriate, of security assessments of cloud computing products and services, including, as appropriate, oversight of continuous monitoring of cloud computing products and services, pursuant to guidance issued by the Director pursuant to section 3614;

“(2) establish processes and identify criteria consistent with guidance issued by the Director under section 3614 to make a cloud computing product or service eligible for a FedRAMP authorization and validate whether a cloud computing product or service has a FedRAMP authorization;

“(3) develop and publish templates, best practices, technical assistance, and other materials to support the authorization of cloud computing products and services and increase the speed, effectiveness, and transparency of the authorization process, consistent with standards and guidelines established by the Director of the National Institute of Standards and Technology and relevant statutes;

“(4) establish and update guidance on the boundaries of FedRAMP authorization packages to enhance the security and protection of Federal information and promote transparency for agencies and users as to which services are included in the scope of a FedRAMP authorization;

“(5) grant FedRAMP authorizations to cloud computing products and services consistent with the guidance and direction of the FedRAMP Board;

“(6) establish and maintain a public comment process for proposed guidance and other FedRAMP directives that may have a direct impact on cloud service providers and agencies before the issuance of such guidance or other FedRAMP directives;

“(7) coordinate with the FedRAMP Board, the Director of the Cybersecurity and Infrastructure Security Agency, and other entities identified by the Administrator, with the concurrence of the Director and the Secretary, to establish and regularly update a framework for continuous monitoring under section 3553;

“(8) provide a secure mechanism for storing and sharing necessary data, including FedRAMP authorization packages, to enable better reuse of such packages across agencies, including making available any information and data necessary for agencies to fulfill the requirements of section 3613;

“(9) provide regular updates to applicant cloud service providers on the status of any cloud computing product or service during an assessment process;

“(10) regularly review, in consultation with the FedRAMP Board—

“(A) the costs associated with the independent assessment services described in section 3611; and

“(B) the information relating to foreign interests submitted pursuant to section 3612;

“(11) in coordination with the Director of the National Institute of Standards and Technology, the Director, the Secretary, and other stakeholders, as appropriate, determine the sufficiency of underlying standards and requirements to identify and assess the provenance of the software in cloud services and products;

“(12) support the Federal Secure Cloud Advisory Committee established pursuant to section 3616; and

“(13) take such other actions as the Administrator may determine necessary to carry out FedRAMP.

“(b) WEBSITE.—

“(1) IN GENERAL.—The Administrator shall maintain a public website to serve as the authoritative repository for FedRAMP, includ-

ing the timely publication and updates for all relevant information, guidance, determinations, and other materials required under subsection (a).

“(2) CRITERIA AND PROCESS FOR FEDRAMP AUTHORIZATION PRIORITIES.—The Administrator shall develop and make publicly available on the website described in paragraph (1) the criteria and process for prioritizing and selecting cloud computing products and services that will receive a FedRAMP authorization, in consultation with the FedRAMP Board and the Chief Information Officers Council.

“(c) EVALUATION OF AUTOMATION PROCEDURES.—

“(1) IN GENERAL.—The Administrator, in coordination with the Secretary, shall assess and evaluate available automation capabilities and procedures to improve the efficiency and effectiveness of the issuance of FedRAMP authorizations, including continuous monitoring of cloud computing products and services.

“(2) MEANS FOR AUTOMATION.—Not later than 1 year after the date of enactment of this section, and updated regularly thereafter, the Administrator shall establish a means for the automation of security assessments and reviews.

“(d) METRICS FOR AUTHORIZATION.—The Administrator shall establish annual metrics regarding the time and quality of the assessments necessary for completion of a FedRAMP authorization process in a manner that can be consistently tracked over time in conjunction with the periodic testing and evaluation process pursuant to section 3554 in a manner that minimizes the agency reporting burden.

“§ 3610. FedRAMP Board

“(a) ESTABLISHMENT.—There is established a FedRAMP Board to provide input and recommendations to the Administrator regarding the requirements and guidelines for, and the prioritization of, security assessments of cloud computing products and services.

“(b) MEMBERSHIP.—The FedRAMP Board shall consist of not more than 7 senior officials or experts from agencies appointed by the Director, in consultation with the Administrator, from each of the following:

“(1) The Department of Defense.

“(2) The Department of Homeland Security.

“(3) The General Services Administration.

“(4) Such other agencies as determined by the Director, in consultation with the Administrator.

“(c) QUALIFICATIONS.—Members of the FedRAMP Board appointed under subsection (b) shall have technical expertise in domains relevant to FedRAMP, such as—

“(1) cloud computing;

“(2) cybersecurity;

“(3) privacy;

“(4) risk management; and

“(5) other competencies identified by the Director to support the secure authorization of cloud services and products.

“(d) DUTIES.—The FedRAMP Board shall—

“(1) in consultation with the Administrator, serve as a resource for best practices to accelerate the process for obtaining a FedRAMP authorization;

“(2) establish and regularly update requirements and guidelines for security authorizations of cloud computing products and services, consistent with standards and guidelines established by the Director of the National Institute of Standards and Technology, to be used in the determination of FedRAMP authorizations;

“(3) monitor and oversee, to the greatest extent practicable, the processes and procedures by which agencies determine and validate requirements for a FedRAMP authoriza-

tion, including periodic review of the agency determinations described in section 3613(b);

“(4) ensure consistency and transparency between agencies and cloud service providers in a manner that minimizes confusion and engenders trust; and

“(5) perform such other roles and responsibilities as the Director may assign, with concurrence from the Administrator.

“(e) DETERMINATIONS OF DEMAND FOR CLOUD COMPUTING PRODUCTS AND SERVICES.—The FedRAMP Board may consult with the Chief Information Officers Council to establish a process, which may be made available on the website maintained under section 3609(b), for prioritizing and accepting the cloud computing products and services to be granted a FedRAMP authorization.

“§ 3611. Independent assessment

“The Administrator may determine whether FedRAMP may use an independent assessment service to analyze, validate, and attest to the quality and compliance of security assessment materials provided by cloud service providers during the course of a determination of whether to use a cloud computing product or service.

“§ 3612. Declaration of foreign interests

“(a) IN GENERAL.—An independent assessment service that performs services described in section 3611 shall annually submit to the Administrator information relating to any foreign interest, foreign influence, or foreign control of the independent assessment service.

“(b) UPDATES.—Not later than 48 hours after there is a change in foreign ownership or control of an independent assessment service that performs services described in section 3611, the independent assessment service shall submit to the Administrator an update to the information submitted under subsection (a).

“(c) CERTIFICATION.—The Administrator may require a representative of an independent assessment service to certify the accuracy and completeness of any information submitted under this section.

“§ 3613. Roles and responsibilities of agencies

“(a) IN GENERAL.—In implementing the requirements of FedRAMP, the head of each agency shall, consistent with guidance issued by the Director pursuant to section 3614—

“(1) promote the use of cloud computing products and services that meet FedRAMP security requirements and other risk-based performance requirements as determined by the Director, in consultation with the Secretary;

“(2) confirm whether there is a FedRAMP authorization in the secure mechanism provided under section 3609(a)(8) before beginning the process of granting a FedRAMP authorization for a cloud computing product or service;

“(3) to the extent practicable, for any cloud computing product or service the agency seeks to authorize that has received a FedRAMP authorization, use the existing assessments of security controls and materials within any FedRAMP authorization package for that cloud computing product or service; and

“(4) provide to the Director data and information required by the Director pursuant to section 3614 to determine how agencies are meeting metrics established by the Administrator.

“(b) ATTESTATION.—Upon completing an assessment or authorization activity with respect to a particular cloud computing product or service, if an agency determines that the information and data the agency has reviewed under paragraph (2) or (3) of subsection (a) is wholly or substantially deficient for the purposes of performing an authorization of the cloud computing product

or service, the head of the agency shall document as part of the resulting FedRAMP authorization package the reasons for this determination.

“(C) SUBMISSION OF AUTHORIZATIONS TO OPERATE REQUIRED.—Upon issuance of an agency authorization to operate based on a FedRAMP authorization, the head of the agency shall provide a copy of its authorization to operate letter and any supplementary information required pursuant to section 3609(a) to the Administrator.

“(d) SUBMISSION OF POLICIES REQUIRED.—Not later than 180 days after the date on which the Director issues guidance in accordance with section 3614(1), the head of each agency, acting through the chief information officer of the agency, shall submit to the Director all agency policies relating to the authorization of cloud computing products and services.

“(e) PRESUMPTION OF ADEQUACY.—

“(1) IN GENERAL.—The assessment of security controls and materials within the authorization package for a FedRAMP authorization shall be presumed adequate for use in an agency authorization to operate cloud computing products and services.

“(2) INFORMATION SECURITY REQUIREMENTS.—The presumption under paragraph (1) does not modify or alter—

“(A) the responsibility of any agency to ensure compliance with subchapter II of chapter 35 for any cloud computing product or service used by the agency; or

“(B) the authority of the head of any agency to make a determination that there is a demonstrable need for additional security requirements beyond the security requirements included in a FedRAMP authorization for a particular control implementation.

“§ 3614. Roles and responsibilities of the Office of Management and Budget

“The Director shall—

“(1) in consultation with the Administrator and the Secretary, issue guidance that—

“(A) specifies the categories or characteristics of cloud computing products and services that are within the scope of FedRAMP;

“(B) includes requirements for agencies to obtain a FedRAMP authorization when operating a cloud computing product or service described in subparagraph (A) as a Federal information system; and

“(C) encompasses, to the greatest extent practicable, all necessary and appropriate cloud computing products and services;

“(2) issue guidance describing additional responsibilities of FedRAMP and the FedRAMP Board to accelerate the adoption of secure cloud computing products and services by the Federal Government;

“(3) in consultation with the Administrator, establish a process to periodically review FedRAMP authorization packages to support the secure authorization and reuse of secure cloud products and services;

“(4) oversee the effectiveness of FedRAMP and the FedRAMP Board, including the compliance by the FedRAMP Board with the duties described in section 3610(d); and

“(5) to the greatest extent practicable, encourage and promote consistency of the assessment, authorization, adoption, and use of secure cloud computing products and services within and across agencies.

“§ 3615. Reports to Congress; GAO report

“(a) REPORTS TO CONGRESS.—Not later than 1 year after the date of enactment of this section, and annually thereafter, the Director shall submit to the appropriate congressional committees a report that includes the following:

“(1) During the preceding year, the status, efficiency, and effectiveness of the General Services Administration under section 3609

and agencies under section 3613 and in supporting the speed, effectiveness, sharing, reuse, and security of authorizations to operate for secure cloud computing products and services.

“(2) Progress towards meeting the metrics required under section 3609(d).

“(3) Data on FedRAMP authorizations.

“(4) The average length of time to issue FedRAMP authorizations.

“(5) The number of FedRAMP authorizations submitted, issued, and denied for the preceding year.

“(6) A review of progress made during the preceding year in advancing automation techniques to securely automate FedRAMP processes and to accelerate reporting under this section.

“(7) The number and characteristics of authorized cloud computing products and services in use at each agency consistent with guidance provided by the Director under section 3614.

“(8) A review of FedRAMP measures to ensure the security of data stored or processed by cloud service providers, which may include—

“(A) geolocation restrictions for provided products or services;

“(B) disclosures of foreign elements of supply chains of acquired products or services;

“(C) continued disclosures of ownership of cloud service providers by foreign entities; and

“(D) encryption for data processed, stored, or transmitted by cloud service providers.

“(b) GAO REPORT.—Not later than 180 days after the date of enactment of this section, the Comptroller General of the United States shall report to the appropriate congressional committees an assessment of the following:

“(1) The costs incurred by agencies and cloud service providers relating to the issuance of FedRAMP authorizations.

“(2) The extent to which agencies have processes in place to continuously monitor the implementation of cloud computing products and services operating as Federal information systems.

“(3) How often and for which categories of products and services agencies use FedRAMP authorizations.

“(4) The unique costs and potential burdens incurred by cloud computing companies that are small business concerns (as defined in section 3(a) of the Small Business Act (15 U.S.C. 632(a)) as a part of the FedRAMP authorization process.

“§ 3616. Federal Secure Cloud Advisory Committee

“(a) ESTABLISHMENT, PURPOSES, AND DUTIES.—

“(1) ESTABLISHMENT.—There is established a Federal Secure Cloud Advisory Committee (referred to in this section as the ‘Committee’) to ensure effective and ongoing coordination of agency adoption, use, authorization, monitoring, acquisition, and security of cloud computing products and services to enable agency mission and administrative priorities.

“(2) PURPOSES.—The purposes of the Committee are the following:

“(A) To examine the operations of FedRAMP and determine ways that authorization processes can continuously be improved, including the following:

“(i) Measures to increase agency reuse of FedRAMP authorizations.

“(ii) Proposed actions that can be adopted to reduce the burden, confusion, and cost associated with FedRAMP authorizations for cloud service providers.

“(iii) Measures to increase the number of FedRAMP authorizations for cloud computing products and services offered by small businesses concerns (as defined by section

3(a) of the Small Business Act (15 U.S.C. 632(a)).

“(iv) Proposed actions that can be adopted to reduce the burden and cost of FedRAMP authorizations for agencies.

“(B) Collect information and feedback on agency compliance with and implementation of FedRAMP requirements.

“(C) Serve as a forum that facilitates communication and collaboration among the FedRAMP stakeholder community.

“(3) DUTIES.—The duties of the Committee include providing advice and recommendations to the Administrator, the FedRAMP Board, and agencies on technical, financial, programmatic, and operational matters regarding secure adoption of cloud computing products and services.

“(b) MEMBERS.—

“(1) COMPOSITION.—The Committee shall be comprised of not more than 15 members who are qualified representatives from the public and private sectors, appointed by the Administrator, in consultation with the Director, as follows:

“(A) The Administrator or the Administrator's designee, who shall be the Chair of the Committee.

“(B) At least 1 representative each from the Cybersecurity and Infrastructure Security Agency and the National Institute of Standards and Technology.

“(C) At least 2 officials who serve as the Chief Information Security Officer within an agency, who shall be required to maintain such a position throughout the duration of their service on the Committee.

“(D) At least 1 official serving as Chief Procurement Officer (or equivalent) in an agency, who shall be required to maintain such a position throughout the duration of their service on the Committee.

“(E) At least 1 individual representing an independent assessment service.

“(F) At least 5 representatives from unique businesses that primarily provide cloud computing services or products, including at least 2 representatives from a small business concern (as defined by section 3(a) of the Small Business Act (15 U.S.C. 632(a))).

“(G) At least 2 other representatives of the Federal Government as the Administrator determines necessary to provide sufficient balance, insights, or expertise to the Committee.

“(2) DEADLINE FOR APPOINTMENT.—Each member of the Committee shall be appointed not later than 90 days after the date of enactment of this section.

“(3) PERIOD OF APPOINTMENT; VACANCIES.—

“(A) IN GENERAL.—Each non-Federal member of the Committee shall be appointed for a term of 3 years, except that the initial terms for members may be staggered 1-, 2-, or 3-year terms to establish a rotation in which one-third of the members are selected each year. Any such member may be appointed for not more than 2 consecutive terms.

“(B) VACANCIES.—Any vacancy in the Committee shall not affect its powers, but shall be filled in the same manner in which the original appointment was made. Any member appointed to fill a vacancy occurring before the expiration of the term for which the member's predecessor was appointed shall be appointed only for the remainder of that term. A member may serve after the expiration of that member's term until a successor has taken office.

“(c) MEETINGS AND RULES OF PROCEDURE.—

“(1) MEETINGS.—The Committee shall hold not fewer than 3 meetings in a calendar year, at such time and place as determined by the Chair.

“(2) INITIAL MEETING.—Not later than 120 days after the date of enactment of this section, the Committee shall meet and begin the operations of the Committee.

“(3) RULES OF PROCEDURE.—The Committee may establish rules for the conduct of the business of the Committee if such rules are not inconsistent with this section or other applicable law.

“(d) EMPLOYEE STATUS.—

“(1) IN GENERAL.—A member of the Committee (other than a member who is appointed to the Committee in connection with another Federal appointment) shall not be considered an employee of the Federal Government by reason of any service as such a member, except for the purposes of section 5703 of title 5, relating to travel expenses.

“(2) PAY NOT PERMITTED.—A member of the Committee covered by paragraph (1) may not receive pay by reason of service on the Committee.

“(e) APPLICABILITY TO THE FEDERAL ADVISORY COMMITTEE ACT.—Section 14 of the Federal Advisory Committee Act (5 U.S.C. App.) shall not apply to the Committee.

“(f) DETAIL OF EMPLOYEES.—Any Federal Government employee may be detailed to the Committee without reimbursement from the Committee, and such detailee shall retain the rights, status, and privileges of his or her regular employment without interruption.

“(g) POSTAL SERVICES.—The Committee may use the United States mails in the same manner and under the same conditions as agencies.

“(h) REPORTS.—

“(1) INTERIM REPORTS.—The Committee may submit to the Administrator and Congress interim reports containing such findings, conclusions, and recommendations as have been agreed to by the Committee.

“(2) ANNUAL REPORTS.—Not later than 540 days after the date of enactment of this section, and annually thereafter, the Committee shall submit to the Administrator and Congress a report containing such findings, conclusions, and recommendations as have been agreed to by the Committee.”.

(b) TECHNICAL AND CONFORMING AMENDMENT.—The table of sections for chapter 36 of title 44, United States Code, is amended by adding at the end the following new items:

“3607. Definitions.

“3608. Federal Risk and Authorization Management Program.

“3609. Roles and responsibilities of the General Services Administration.

“3610. FedRAMP Board.

“3611. Independent assessment.

“3612. Declaration of foreign interests.

“3613. Roles and responsibilities of agencies.

“3614. Roles and responsibilities of the Office of Management and Budget.

“3615. Reports to Congress; GAO report.

“3616. Federal Secure Cloud Advisory Committee.”.

(c) SUNSET.—

(1) IN GENERAL.—Effective on the date that is 5 years after the date of enactment of this Act, chapter 36 of title 44, United States Code, is amended by striking sections 3607 through 3616.

(2) CONFORMING AMENDMENT.—Effective on the date that is 5 years after the date of enactment of this Act, the table of sections for chapter 36 of title 44, United States Code, is amended by striking the items relating to sections 3607 through 3616.

(d) RULE OF CONSTRUCTION.—Nothing in this section or any amendment made by this section shall be construed as altering or impairing the authorities of the Director of the Office of Management and Budget or the Secretary of Homeland Security under subchapter II of chapter 35 of title 44, United States Code.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from New York (Mrs. CAROLYN B. MALONEY) and the gentleman from Kentucky (Mr. COMER) each will control 20 minutes.

The Chair recognizes the gentlewoman from New York.

GENERAL LEAVE

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on the measure before us.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from New York?

There was no objection.

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I thank Representative CONNOLLY, the chairman of the Subcommittee on Government Operations, and Ranking Member COMER for working on this important bipartisan measure.

A version of this bill passed this House earlier in this Congress. It has been improved after receiving technical assistance from the General Services Administration and through discussions with the Senate Committee on Homeland Security and Governmental Affairs.

The Federal Risk and Authorization Management Program Authorization Act would codify and improve the existing FedRAMP program in the General Services Administration.

First established in 2011, FedRAMP is an important program that certifies cloud service providers that wish to offer services and products to the Federal Government.

The FedRAMP certification process outlined in this bill is comprehensive, facilitates easier agency adoption, promotes agency reuse, and encourages savings.

The FedRAMP process uses a risk-based approach to ensure the reliability of any cloud platform that hosts unclassified government data.

□ 1445

One significant provision of this bill is the Federal Secure Cloud Advisory Committee. This committee would be tasked with key responsibilities, including providing technical expertise on cloud products and services and identifying ways to reduce costs associated with FedRAMP certification.

The Director of the Office of Management and Budget would be required to issue regulations on FedRAMP and would ensure that agencies are not using cloud service providers without authorization.

This bill supports a critical effort to keep our Nation's information secure in cloud environments. I urge all Members to support this bill and reserve the balance of my time.

Mr. COMER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, if this bill sounds familiar to Members, there is good reason for that. Once again, the House of Representatives is debating a bipartisan bill to secure Federal agency use of modern cloud computing services.

However, this time we are doing it as H.R. 8956, the Federal Secure Cloud Improvement and Jobs Act. Formerly named the FedRAMP Authorization Act, this was the first bill the House passed this Congress, as H.R. 21, on January 5, 2021.

We also passed the same legislation as part of this year's House version of the National Defense Authorization Act.

This is such an important issue that we are here again to send an improved bill back to the Senate for final passage.

Cybersecurity and technology modernization are both vital issues to ensure this government runs efficiently, effectively, and safely. We need this legislation to address the continued onslaught of cyberattacks that have compromised both the private and public sectors' critical information systems.

Cloud computing is an important innovation.

It allows users to tap into extra resources to meet spikes in demand, like what agencies saw when trying to deliver COVID-relief assistance.

It also allows them to access modernized applications without the need for them to also invest in their own data storage equipment.

While cloud computing is the norm in the private sector, we still need to encourage agencies to adopt this technology when it makes sense. We also must ensure cloud computing services are secure. That is where the Federal Risk and Authorization Management Program comes in.

FedRAMP, run by the General Services Administration, is the main Federal program focused on helping agencies procure secure cloud computing systems. It provides a consistent process to ensure agencies know a given cloud service meets Federal cybersecurity standards. It also provides clarity for vendors, so they understand the requirements to ensure their products are secure enough for Federal agency use.

Shifting to the cloud is more cost effective, allows for better citizen services and mission-based solutions, and provides more responsive technology capabilities overall. These improved efficiencies have led to significant cost savings.

At the end of fiscal year 2021, the GSA estimated that over the FedRAMP program's 10-year lifespan, it had helped agencies avoid \$716 million in individual security review costs. So while agencies are not required to buy FedRAMP-approved services, it makes sense to encourage them to do so.

After passing the earlier version, H.R. 21, the Senate also made changes that improved the bill we are considering today.

Such updates include striking the unnecessary authorization of \$20 million in appropriations and requiring better oversight of the industry costs associated with becoming FedRAMP certified. This will help ensure both small and large businesses can participate in the program.

In addition, this version also seeks to identify and avoid bottlenecks that slow approval. It also takes steps to secure the software supply chain from threats by foreign bad actors, the likely source of the 2020 SolarWinds attack that targeted numerous private sector companies and Federal agencies.

Codifying this successful program into law is an important step towards encouraging Federal agencies to take full advantage of this program and all the security benefits it offers.

Mr. Speaker, I urge my colleagues to support this bill, and I reserve the balance of my time.

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I yield 5 minutes to the gentleman from Virginia (Mr. CONNOLLY), the distinguished chairman of the Subcommittee on Government Operations and sponsor of this important bill, H.R. 8956.

Mr. CONNOLLY. Mr. Speaker, I thank the gentlewoman from New York (Mrs. CAROLYN B. MALONEY), the distinguished chairwoman of the committee and my friend, and I thank the gentleman from Kentucky (Mr. COMER), the distinguished ranking member and my friend for bringing this bill to the floor.

With respect to Mr. COMER's comments, I just say, "Hear, hear." He has succinctly explained both the process and the importance of this bill.

This is the sixth time the House will have passed this bill in some form. The Senate has yet to ever consider it on the floor. As Mr. COMER indicated, the time has now come for the Senate to accept a bill that has been worked out with the Senate in terms of the language so that we can get this important piece of Federal IT into law.

This bill would create a statutory framework for the Federal Risk and Authorization Management Program, known as FedRAMP, originally established administratively back in 2011. This bill will codify FedRAMP and was the very first bill, as Mr. COMER indicated, to pass the House in the 117th Congress. It passed, I believe, unanimously.

If once again passed, this will be, as I said, I believe, the sixth time we have considered it here in the House of Representatives.

FedRAMP is a standardized approach that brings our government in line with our increasingly digital world to continually certify and assess the security of cloud computing technologies used across the Federal Government.

FedRAMP seeks to reduce the redundancies of Federal cloud migration by creating a "certify once, reuse many times" model for cloud products and services that provide cost-effective,

risk-based approaches to cloud adoption. FedRAMP saw a 50 percent increase in agencies reusing authorized cloud products in 2020.

This bill codifies FedRAMP and addresses many of the concerns raised by government and industry stakeholders in terms of both the time and cost associated with certification. The text reduces duplication of security assessments and other obstacles to agency adoption of cloud products by establishing a presumption of adequacy for cloud technologies that have already received FedRAMP certification, so companies aren't reinventing the wheel and spending millions of dollars they don't need to.

I support a strong cybersecurity framework that ensures whatever tool we use to support the infrastructure of our Federal critical systems is safe and secure. Again, referenced by Mr. COMER. However, those who have already diligently passed scrupulous security assessments shouldn't have to start from scratch, and this bill addresses that.

For more than 5 years, I have worked with administrations, both Democratic and Republican, Members on the other side of the aisle, industry stakeholders, and my friends in the U.S. Senate to ensure the legislative text makes needed improvements to the FedRAMP program and gives the program flexibility to grow and adapt to myriad future changes.

Since the coronavirus pandemic, the demand for cloud services has risen by 85 percent. Accordingly, FedRAMP use skyrocketed and enabled the government to continue working securely during the government's large-scale movement to telework.

In the first 4 years of FedRAMP, the program had only authorized 20 cloud service offerings, but by 2021 it had authorized 240. Today, there are over 280 cloud service providers to the U.S. Government participating in FedRAMP, and about 30 percent of FedRAMP authorized CSPs are small businesses. Over 180 agencies participate in FedRAMP and have initiated more than 3,000 agency reuses of authorized products.

Today, the Agency Liaison Program, which provides FedRAMP authorization, education, and training currently has 155 liaisons with 82 different Federal Government departments participating.

Ultimately, this program strives to have at least one representative from each Federal agency tied to the security authorization who can communicate to key stakeholders about their agency's internal processes as well as FedRAMP requirements.

The bill supports a critical need to support multistakeholder communication and keep our Nation's information secure in cloud environments.

Enabling the efficient and secure procurement of cloud computing technology is an important part of Federal IT modernization. Codifying FedRAMP

into law is very important because right now it exists as an orphan only by an executive action.

I thank the gentleman from Kentucky (Mr. COMER), the ranking member of the Oversight and Reform Committee, for being a steadfast partner, and I thank our chairwoman for her leadership.

Mr. COMER. Mr. Speaker, I yield myself the balance of my time to close.

Mr. Speaker, protecting our public's valuable information is something we can all agree on. I hope we can continue to do our job and work together on improving the Federal Government cybersecurity and adoption of modern technology.

Mr. Speaker, I encourage my colleagues to support this bill, and I yield back the balance of my time.

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I yield myself the balance of my time to close.

Mr. Speaker, I urge passage of H.R. 8956 and yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from New York (Mrs. CAROLYN B. MALONEY) that the House suspend the rules and pass the bill, H.R. 8956.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the yeas have it.

Mr. HICE of Georgia. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this motion will be postponed.

CHAI SUTHAMMANONT HEALTHY FEDERAL WORKPLACES ACT OF 2022

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 8466), to require the head of each agency to establish a plan relating to the safety of Federal employees and contractors physically present at certain worksites during a nationwide public health emergency declared for an infectious disease, and for other purposes, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 8466

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Chai Suthammanont Healthy Federal Workplaces Act of 2022".

SEC. 2. WORKSITE SAFETY FOR FEDERAL EMPLOYEES AND CONTRACTORS.

(a) ISSUANCE OF POLICIES AND PROCEDURES BY AGENCIES.—Not later than 60 days after the date of the enactment of this Act, the head of each agency, in consultation with the Chief Human Capital Officer of the agency and the Assistant Director of Administration of the agency (or any individual holding an equivalent position), shall—

(1) establish a plan containing procedures and policies for the safety of covered individuals physically present at worksites during a covered period that includes measures to ensure the continuity of operations of the agency, including how consistent agency mission and program performance and customer service levels will be sustained through the covered period;

(2) make such plan available to the public by including a prominent link to such plan on the home page of the website of the agency;

(3) provide a link to such plan to the Director of the Office of Management and Budget for inclusion on the web page of the Office in accordance with subsection (c); and

(4) communicate such plan to each covered individual in such a manner as to ensure that each such covered individual acknowledges receipt and understanding of the plan.

(b) PLAN.—The plan required under subsection (a) shall, at a minimum, include the following:

(1) A description of the efforts the agency plans to take with respect to mitigating a nationwide public health emergency declared for an infectious disease at worksites, including the following:

(A) A description of any personal protective equipment that is being or will be provided by the agency to any covered individual physically present at a worksite during a covered period.

(B) A description of any procedures established by the agency for—

(i) testing covered individuals at worksites for a covered condition;

(ii) identifying covered individuals potentially exposed to an individual who is diagnosed with a covered condition, and notifying such individuals of such potential exposure; and

(iii) addressing differences in data, such as the number of cases, hospitalizations, and deaths, in regions and localities if an agency has covered worksites in more than one region.

(2) Guidance on—

(A) any cleaning protocols to be implemented at covered worksites;

(B) occupancy limits for covered worksites; and

(C) the use of personal protective equipment, such as appropriate face coverings, by covered individuals while physically present at a worksite.

(3) A description of the actions the agency is or will be taking to protect employees of the agency who conduct activities in an official capacity while not physically present at a covered worksite, including employees—

(A) who are required to travel in an official capacity; or

(B) perform audits or inspections.

(4) A description of any requirements that members of the public are required to meet in order to enter a facility in which covered worksites are located.

(5) A description of any alternative option to being physically present at a covered worksite that is available for employees of the agency who—

(A) have a high risk of contracting a covered condition (as determined by the Director of the Centers for Disease Control and Prevention); or

(B) live in a household with individuals who have a high risk of contracting a covered condition (as determined by the Director of the Centers for Disease Control and Prevention).

(6) Protocols that ensure the continuity of operations of the agency, including how consistent agency mission and program performance and customer service levels will be sustained through the covered period, to include if the agency adopts enhanced and temporary telework and remote work practices

as a result of an increase in the severity of the nationwide public health emergency.

(7) The hotline website and hotline telephone number of the Inspector General of the agency for covered individuals to report to the Inspector General any instance in which the agency is not implementing the plan required by this section.

(8) The hotline website and hotline telephone number of the Office of Special Counsel to report a substantial and specific danger to public health and safety or whistleblower retaliation.

(c) PUBLICATION OF PLAN.—Not later than 90 days after the date of the enactment of this Act, the Director of the Office of Management and Budget shall make available to the public on a single web page of the Office—

(1) links to each plan provided to the Director pursuant to subsection (a)(3); and

(2) a list identifying any agency that has not provided a link pursuant to such subsection.

(d) COMMUNICATION OF PLAN TO NEW EMPLOYEES, CONTRACTORS, AND SUBCONTRACTORS.—Beginning on the date that is 60 days after the date of the enactment of this Act, the head of an agency shall communicate the plan required by subsection (a), in the manner described under such subsection, to—

(1) any new employee of the agency, not later than 30 days after the date on which such employee is hired;

(2) any individual or entity that enters into a contract with the agency after such date, not later than 30 days after the contract is entered into; and

(3) any individual or entity that enters into a subcontract at any tier of a contract with the agency after such date, not later than 30 days after the subcontract is entered into.

(e) INSPECTORS GENERAL REPORTS.—

(1) REPORT ON IMPLEMENTATION OF THIS SECTION.—Not later than 6 months after the date of the enactment of this Act, the Inspector General of each agency shall submit to the Committee on Oversight and Reform of the House of Representatives and the Committee on Homeland Security and Governmental Affairs of the Senate a report on the implementation of this section, including whether each agency involved has published and communicated the plan required by subsection (a) in accordance with this section.

(2) REPORT ON IMPLEMENTATION OF PLAN.—Not later than 60 days after the head of an agency begins to implement a plan required under subsection (a) with respect to a covered condition, the Inspector General of each agency shall submit to the Committee on Oversight and Reform of the House of Representatives and the Committee on Homeland Security and Governmental Affairs of the Senate a report on—

(A) the extent to which each agency has implemented the plan, including identifying any concerns for the safety of covered individuals at covered worksites that the agency has not fully addressed; and

(B) the extent to which such plan incorporated best practices to contain the spread of such covered condition.

(f) GOVERNMENT ACCOUNTABILITY OFFICE REPORT.—Not later than one year after the date of the enactment of this Act, the Comptroller General of the United States shall submit to the Committee on Oversight and Reform of the House of Representatives and the Committee on Homeland Security and Governmental Affairs of the Senate a report on lessons learned by agencies and covered individuals during the COVID-19 pandemic to further improve the policies and procedures of such agencies with respect to—

(1) the health and safety of covered individuals during nationwide public health emergencies declared for infectious diseases; and

(2) communication to covered individuals during nationwide public health emergencies declared for infectious diseases.

(g) APPLICATION.—Nothing in this Act shall be construed to alter or otherwise limit the rights and obligations afforded under chapter 71 of title 5, United States Code.

(h) DEFINITIONS.—In this section:

(1) AGENCY.—The term “agency” has the meaning given that term in section 551 of title 5, United States Code.

(2) COVERED CONDITION.—The term “covered condition” means an infectious disease that is the subject of a nationwide public health emergency.

(3) COVERED PERIOD.—The term “covered period” means a period during which a nationwide public health emergency declared for an infectious disease is in effect.

(4) COVERED INDIVIDUAL.—The term “covered individual” means—

(A) employees of the agency; and

(B) contractors of the agency, and subcontractors thereof at any tier.

(5) COVERED WORKSITE.—The term “covered worksite” means a worksite at which a covered individual is required to be present during a covered period.

(6) EMPLOYEE.—The term “employee” means any employee occupying a position in the civil service (as that term is defined in section 2101 of title 5, United States Code) at an agency.

(7) NATIONWIDE PUBLIC HEALTH EMERGENCY.—The term “nationwide public health emergency” means a nationwide public health emergency declared by the Secretary of Health and Human Services under section 319 of the Public Health Service Act (42 U.S.C. 247), including any renewal thereof.

(8) WORKSITE.—The term “worksite” means—

(A) in the case of an employee of the agency, the location of the employee’s position of record where the employee regularly performs his or her duties, but does not include any location where the employee teleworks (as that term is defined in section 6501 of title 5, United States Code); and

(B) in the case of a contractor of the agency (or subcontractor thereof at any tier), the location in a facility of the agency where the contractor or subcontractor performs his or her duties under a contract with the agency, or a subcontract thereof at any tier, as applicable.

SEC. 3. DETERMINATION OF BUDGETARY EFFECTS.

The budgetary effects of this Act, for the purpose of complying with the Statutory Pay-As-You-Go Act of 2010, shall be determined by reference to the latest statement titled “Budgetary Effects of PAYGO Legislation” for this Act, submitted for printing in the Congressional Record by the Chairman of the House Budget Committee, provided that such statement has been submitted prior to the vote on passage.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from New York (Mrs. CAROLYN B. MALONEY) and the gentleman from Kentucky (Mr. COMER) each will control 20 minutes.

The Chair recognizes the gentlewoman from New York.

GENERAL LEAVE

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and insert extraneous material on H.R. 8466.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 8466, the Chai Suthammanont Healthy Federal Workplaces Act of 2022, introduced by Government Operations Subcommittee Chair CONNOLLY.

The bill would require that all Federal agencies create detailed plans in preparation for a nationwide public health emergency declaration in response to an infectious disease to protect the health and safety of employees, contractors, and subcontractors.

The plan must include protocols to ensure workers have access to protective equipment, clean facilities, limited workspace occupancy, and on-site testing; that they are notified about exposures; and that accommodations are available to high-risk individuals.

Federal workers showed great resilience as the Federal Government adapted to respond to the COVID-19 pandemic. Living through the pandemic for more than 2 years should make it clear that we need to take precautions to prepare for the future, as COVID-19 is not the last public health emergency we are likely to face as a country, and government agencies need to be ready for that.

The plans required under this legislation would protect workers and prevent the spread of disease. The agency must also prioritize in its plan the continuity of operations and government services through a public health emergency. The bill requires that safety protocols are clearly communicated to all employees and publicly posted.

Holding agencies accountable for making these plans transparent to Federal employees and the public will help make everyone feel safer and better informed.

The bill also includes strong oversight measures. Inspectors general at Federal agencies would assess implementation of these plans and report to Congress.

□ 1500

The Government Accountability Office would conduct a study of the lessons from the COVID-19 pandemic that can be applied to improve agency plans and improve communication with employees throughout an emergency.

I commend Chairman CONNOLLY for his forward-looking bill that would better prepare government agencies for future public health crises. I urge my colleagues to join me in support of H.R. 8466.

Mr. Speaker, I reserve the balance of my time.

Mr. COMER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to express sincere condolences to the family of Mr. Suthammanont. I appreciate the underlying intent of this legislation: To ensure the safety of Federal workers.

I also appreciate how this version of the bill has been improved from the prior versions the House has considered.

Thankfully, there are no longer vaccine requirements for Federal workers in the bill, and the bill is now future-looking, no longer tied specifically to the COVID-19 pandemic.

Nevertheless, it makes sense to be prepared for any future public health emergencies. While the safety of the Federal workers is important, so is mission accomplishment and customer service.

In considering this new version, Committee on Oversight and Reform Republicans ensured the plans this bill requires would be made through the lens of continuity of operations. That is, continuing to provide Americans the services they need, regardless of the situation.

I am pleased to see my colleagues, Representative JODY HICE's amendment receive full support in the Committee on Oversight and Reform last week and be incorporated into the bill we are considering today.

H.R. 8466 now ensures that the next time America faces a public health emergency, Federal agencies will be required to balance their workforce safety measures with plans to accomplish their missions while minimizing impacts to customer service. Agencies will be required to make these plans public for Inspector General review and congressional scrutiny.

Americans who rely on Federal agency services, such as our veterans, should never again be forgotten when their government sends its workforce home.

Mr. Speaker, I thank Mr. CONNOLLY for working with Mr. HICE to improve the bill, and I encourage my colleagues to support the bill.

Mr. Speaker, I reserve the balance of my time.

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I yield 5 minutes to the gentleman from Virginia (Mr. CONNOLLY), the distinguished chairman of the Subcommittee on Government Operations and sponsor of H.R. 8466.

Mr. CONNOLLY. Mr. Speaker, I thank the distinguished chairwoman of our committee for yielding, and I thank Mr. COMER, the ranking member, and Mr. HICE, the ranking member of Government Operations Subcommittee, for their support and collaboration on an improved H.R. 8466, the Suthammanont Healthy Workforce Act of 2022.

On May 26, 2022, Chai Suthammanont, my constituent, a kitchen staff worker at a childcare facility at the Marine Corps Base in Quantico, Virginia, died from coronavirus-related complications. Chai was a loving father and husband and a proud naturalized American. Chai was known for his kindness and his patience. He had a unique handshake he shared with many of the kids at the childcare facility where he

worked. His death was a tragedy felt by so many.

Confusion and uncertainty emerged as two of the largest contributing factors to Chai's death. The Federal Government did not yet have any protocols in place—or guidance, for that matter—intended to protect him and others.

We are emerging from the pandemic, but new strains of infectious diseases and other potential health emergencies demand that the Federal Government prepare to adapt and continue operations and the mission across many challenges. Our government must embrace lessons learned from the pandemic; some of them learned through tragic losses such as Chai's.

Federal agencies must place the health and safety of Federal employees at the forefront of their plans and operations while continuing to provide vital services to the public, ensuring continuity of operations.

Since the beginning of the pandemic, our subcommittee has held three hearings focused on the future of Federal work, which include prioritizing the health and safety of our workforce.

Some simple truths emerged during these deliberations.

One, our Federal workforce is comprised of dedicated civil servants who didn't stop delivering mail, serving veterans, approving and distributing vaccines, and ensuring businesses received essential financial assistance.

Two, the Federal workforce needs agencies to invest in proper information technology, training, and protective equipment before another public health crisis occurs.

Three, agencies need clearly communicated, publicly available policies and guidance that let their employees and the public know how to ensure a safe and healthy continuity of operations.

Last year, this committee marked up a previous version of the bill that covered the COVID-19 pandemic. This new bill prepares the Federal workforce, as the distinguished ranking member indicated, for the potential nationwide public health emergencies of tomorrow.

The bill requires each Federal agency to establish a plan to describe public health protocols, including, but not limited to, testing, identification, notification of individuals who may have been exposed to the pathogen; cleaning; occupancy limits; use of personal protective equipment; protections for employees whose work requires them to travel offsite; and ensuring the continuity of operations for the agency.

The bill would also require each agency's Office of Inspector General to report on the extent each agency has, in fact, implemented the plan and the Government Accountability Office to report on the lessons learned from the pandemic.

This bill is endorsed by the American Federation of Government Employees, International Federation of Professional and Technical Engineers, the

National Active and Retired Federal Employees Association, the National Federation of Federal Employees, the National Treasury Employees Union, the Professional Managers Association, the Senior Executives Association, among many other organizations.

Federal employees are a great asset for our Nation. We must work to ensure their well-being and protection in difficult times such as these.

Mr. Speaker, I again thank the chairwoman, who is the original cosponsor of this legislation, as well as my colleagues, especially Mr. COMER and Mr. HICE, for making this a strong bipartisan effort.

Mr. Speaker, I particularly salute Chai's widow, Christina, for her continued efforts in honoring her late husband's memory.

Mr. COMER. Mr. Speaker, I reserve the balance of my time.

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I am prepared to close, and I reserve the balance of my time.

Mr. COMER. Mr. Speaker, it is important that Federal agencies plan and prepare for future infectious disease outbreaks and do so in a transparent manner.

This bill is much improved and now also focuses on maintaining Federal agency services to the American people through a potential future public health emergency. Federal agencies exist to serve the American people. This is true during national public health emergencies, also.

Mr. Speaker, I encourage my colleagues to support this bill, and I yield back the balance of my time.

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I urge passage of H.R. 8466, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from New York (CAROLYN B. MALONEY) that the House suspend the rules and pass the bill, H.R. 8466, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. HICE of Georgia. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this motion will be postponed.

END HUMAN TRAFFICKING IN GOVERNMENT CONTRACTS ACT OF 2022

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I move to suspend the rules and pass the bill (S. 3470) to provide for the implementation of certain trafficking in contracting provisions, and for other purposes.

The Clerk read the title of the bill.

The text of the bill is as follows:

S. 3470

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "End Human Trafficking in Government Contracts Act of 2022".

SEC. 2. IMPLEMENTATION OF TRAFFICKING IN CONTRACTING PROVISIONS.

(a) REQUIREMENT TO REFER VIOLATIONS TO AGENCY SUSPENSION AND DEBARMENT OFFICIAL.—Section 1704(c)(1) of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112-239; 22 U.S.C. 7104b(c)(1)) is amended—

(1) by inserting "refer the matter to the agency suspension and debarment official and" before "consider taking one of the following actions"; and

(2) by striking subparagraph (G).

(b) REPORT ON IMPLEMENTATION OF TRAFFICKING IN CONTRACTING PROVISIONS.—Not later than 90 days after the date of the enactment of this Act, the Director of the Office of Management and Budget shall submit to Congress a report on implementation of title XVII of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112-239; 126 Stat. 2092).

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from New York (Mrs. CAROLYN B. MALONEY) and the gentleman from Kentucky (Mr. COMER) each will control 20 minutes.

The Chair recognizes the gentlewoman from New York.

GENERAL LEAVE

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days in which to revise and extend their remarks and insert extraneous material on S. 3470.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from New York?

There was no objection.

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of S. 3470, the End Human Trafficking in Government Contracts Act.

S. 3470 was introduced by Senator LANKFORD from Oklahoma and has passed the Senate by unanimous consent. The bill would require the head of an agency to make a referral for debarment of a Federal contractor in response to Inspector General verification that the company has engaged in any form of human trafficking, including labor and sex trafficking.

Under current law, the referral is merely an action that the agency head may consider. Putting stronger penalties on contractors creates stronger incentives for them to be vigilant about eliminating human trafficking from their business. This bill helps to ensure that we use the U.S. Government's enormous purchasing power to combat human trafficking.

Under this bill, the Office of Management and Budget would also submit a report to Congress on Federal Government actions to end trafficking in Federal contracts. Human trafficking is nothing short of modern-day slavery. It

is estimated that human trafficking is a \$150 billion global industry. It must be a priority to ensure that the U.S. is not contributing one dollar to perpetuate human trafficking through Federal contracts.

Mr. Speaker, I hope my colleagues will join me in supporting this straightforward legislation to further enforce zero tolerance for human trafficking in Federal contracts.

Mr. Speaker, I reserve the balance of my time.

Mr. COMER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the End Human Trafficking in Government Contracts Act ensures that Federal agencies are not paying for or participating in human trafficking or human sex trafficking through grants or contracts. This is a particular concern for overseas contractors in which some unscrupulous companies may take advantage of vulnerable third-country workers.

Congress has acted before to address this problem. Unfortunately, both the Government Accountability Office and the Department of Defense Inspector General have found that trafficking by contractors and grantees continues. This bill moves to send a clear message: Trafficking will not be tolerated.

Under current law, agencies are already required to refer allegations of human or sex trafficking to the Inspector General for investigation. If found to be true, that agency has a number of options to deal with the situation, but this bill requires all substantiated cases be reported to the agency's suspension and debarment official.

In the contracting world, this is serious business. After due process, a contractor could be prohibited from receiving future government contracts or other government benefits. This bill ensures all current or would-be grantees or contractors take all measures necessary to stop human or sex trafficking.

Finally, the bill directs the Office of Management and Budget to report on enforcement of the laws so we in Congress could conduct the necessary oversight.

I thank Senators JAMES LANKFORD and JONI ERNST for sending this important bill to the House for final passage in Congress today.

Mr. Speaker, I urge my colleagues to support this bill and for the President to sign S. 3470 into law.

Mr. Speaker, I reserve the balance of my time.

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I have no further speakers on this bill, and I reserve the balance of my time.

Mr. COMER. Mr. Speaker, let me be clear. Not a single dime of taxpayer money should ever flow to anyone engaged in human or sex trafficking activities. This bill is an important step toward ensuring responsible stewardship of taxpayer money.

Mr. Speaker, I encourage my colleagues to support this bill, and I yield back the balance of my time.

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, combating sex trafficking by any means, in this case with using the power of our contracting system, is truly a bipartisan effort in this committee.

Mr. Speaker, I support and urge passage of this bill, S. 3470.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from New York (Mrs. CAROLYN B. MALONEY) that the House suspend the rules and pass the bill, S. 3470.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. HICE of Georgia. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this motion will be postponed.

□ 1515

ARTIFICIAL INTELLIGENCE TRAINING FOR THE ACQUISITION WORKFORCE ACT

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I move to suspend the rules and pass the bill (S. 2551), to require the Director of the Office of Management and Budget to establish or otherwise provide an artificial intelligence training program for the acquisition workforce, and for other purposes.

The Clerk read the title of the bill.

The text of the bill is as follows:

S. 2551

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Artificial Intelligence Training for the Acquisition Workforce Act” or the “AI Training Act”.

SEC. 2. ARTIFICIAL INTELLIGENCE TRAINING PROGRAMS.

(a) DEFINITIONS.—In this section:

(1) AI.—The term “AI” has the meaning given the term “artificial intelligence” in section 238(g) of the John S. McCain National Defense Authorization Act for Fiscal Year 2019 (10 U.S.C. 2358 note).

(2) AI TRAINING PROGRAM.—The term “AI training program” means the training program established under subsection (b)(1).

(3) COVERED WORKFORCE.—The term “covered workforce” means—

(A) employees of an executive agency who are responsible for—

(i) program management;

(ii) the planning, research, development, engineering, testing, and evaluation of systems, including quality control and assurance;

(iii) procurement and contracting;

(iv) logistics; or

(v) cost estimating; and

(B) other personnel of an executive agency designated by the head of the executive agency to participate in the AI training program.

(4) DIRECTOR.—The term “Director” means the Director of the Office of Management and Budget.

(5) EXECUTIVE AGENCY.—The term “executive agency”—

(A) has the meaning given the term in section 133 of title 41, United States Code; and

(B) does not include—

(i) the Department of Defense or a component of the Department of Defense; or

(ii) the National Nuclear Security Administration or a component of the National Nuclear Security Administration.

(b) REQUIREMENT.—

(1) IN GENERAL.—Not later than 1 year after the date of enactment of this Act, and not less frequently than annually thereafter, the Director, in coordination with the Administrator of General Services and any other person determined relevant by the Director, shall develop and implement or otherwise provide an AI training program for the covered workforce.

(2) PURPOSE.—The purpose of the AI training program shall be to ensure that the covered workforce has knowledge of the capabilities and risks associated with AI.

(3) TOPICS.—The AI training program shall include information relating to—

(A) the science underlying AI, including how AI works;

(B) introductory concepts relating to the technological features of artificial intelligence systems;

(C) the ways in which AI can benefit the Federal Government;

(D) the risks posed by AI, including discrimination and risks to privacy;

(E) ways to mitigate the risks described in subparagraph (D), including efforts to create and identify AI that is reliable, safe, and trustworthy; and

(F) future trends in AI, including trends for homeland and national security and innovation.

(4) UPDATES.—Not less frequently than once every 2 years, the Director shall update the AI training program to—

(A) incorporate new information relating to AI; and

(B) ensure that the AI training program continues to satisfy the requirements under paragraph (3).

(5) FORMAT.—The Director is encouraged to develop and implement or otherwise include under the AI training program interactive learning with—

(A) technologists;

(B) scholars; and

(C) other experts from the private, public, and nonprofit sectors.

(6) METRICS.—The Director shall ensure the existence of a means by which to—

(A) understand and measure the participation of the covered workforce; and

(B) receive and consider feedback from participants in the AI training program to improve the AI training program.

(7) SUNSET.—Effective 10 years after the date of enactment of this Act, this section shall have no force or effect.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from New York (Mrs. CAROLYN B. MALONEY) and the gentleman from Kentucky (Mr. COMER) each will control 20 minutes.

The Chair recognizes the gentlewoman from New York.

GENERAL LEAVE

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of S. 2551, the Artificial Intelligence Training for the Acquisition Workforce Act, sponsored by Senate Homeland Security and Governmental Affairs Committee Chairman PETERS and Ranking

Member PORTMAN. I am proud to have introduced the House companion to this bill with Ranking Member COMER.

The AI Training Act would require the Office of Management and Budget, in coordination with the General Services Administration, to develop and implement an AI training program for Federal workers whose jobs involve this technology, including acquisition and program management employees.

The program would educate employees on the science underlying AI, introductory concepts, potential benefits of the technology, and future trends. Importantly, the program would also cover the risks posed by AI, including discrimination and risks to privacy, and would teach Federal workers how to mitigate these risks.

To ensure that the AI technology procured and employed by the U.S. Government is reliable, safe, and trustworthy, it is critical that Federal workers involved in procurement and management of this technology are well-trained.

AI tools have become essential in the global race to solve societal challenges, protect national security, and remain economically competitive. At the same time, the algorithms that drive AI systems present new challenges to oversight and accountability efforts. So we need proactive approaches to ensure transparency and governance that preserves privacy and civil liberties and protects the public interest.

The training program would be updated at least every 2 years, ensuring it keeps up with the rapid evolution of this field.

I thank Ranking Member COMER for joining me in advancing this legislation to require specialized Federal workforce training in AI that will help ensure the responsible acquisition and use of this technology that will have long-term benefits to the Government.

Mr. Speaker, I urge my colleagues to support S. 2551, and I reserve the balance of my time.

Mr. COMER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, artificial intelligence, or AI, is a term that applies to a wide variety of technologies. AI plays a role in applications to simplify our everyday lives by performing complex tasks.

Navigation apps, online banking apps, spam filters, and even asking Siri or Alexa who won the Presidents Cup in North Carolina this weekend all employ various types of AI technology. The Federal Government also uses AI to improve government services and efficiency.

While there are multiple executive orders and initiatives promoting the use of AI across the government, to date there has not been a collective effort to train Federal workers who identify, buy, and manage artificial intelligence capabilities.

The National Security Commission on Artificial Intelligence, established in the fiscal year 2019 NDAA, has called for the Federal workforce to be better trained on artificial intelligence.

Mr. Speaker, when you consider the technology race against nations like China, the stakes are very high. In fact, the commission noted in its final report that the competition for government adoption of artificial intelligence technologies will not be won by the side with the best technology, it will be won by the side with the best, most diverse, and tech-savvy talent.

The Artificial Intelligence Training for the Acquisition Workforce Act establishes a government-wide training program for Federal workers responsible for AI program management and acquisition. This training will help ensure the consistent and safe procurement and use of AI products across the Federal Government.

Those purchasing and using AI systems in Federal agency missions and programs need to understand the limits of the technology's capabilities and the risks posed by potential misuse. The American taxpayers deserve nothing less.

Mr. Speaker, I appreciate Chairwoman MALONEY working with me on the House companion bill for this legislation. I am pleased to be an original cosponsor. I urge my colleagues to support this bill, and I reserve the balance of my time.

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I have no further speakers on this side, and if the gentleman is prepared to close, then I am also prepared to close.

Mr. COMER. Mr. Speaker I have no further speakers.

In closing, Mr. Speaker, artificial intelligence is proving to be a game-changing technology for nearly every sector of our economy. For instance, artificial intelligence helps farmers efficiently grow crops, scientists develop new materials, and weather forecasters predict hurricanes more accurately.

In the Federal Government, the Social Security Administration uses AI to determine benefit claims. Artificial Intelligence Training for the Acquisition Workforce Act will be invaluable to the Federal approach to artificial intelligence.

Mr. Speaker, I, once again, encourage my colleagues to support this bill, and I yield back the balance of my time.

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I thank my friend and colleague, Mr. COMER, for his help and assistance on this bill. We worked on it together.

Mr. Speaker, I urge passage of S. 2551, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from New York (Mrs. CAROLYN B. MALONEY) that the House suspend the rules and pass the bill, S. 2551.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. HICE of Georgia. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this motion will be postponed.

CHANCE TO COMPETE ACT OF 2022

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 6967) to implement merit-based reforms to the civil service hiring system that replace degree-based hiring with skills- and competency-based hiring, and for other purposes, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 6967

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Chance to Compete Act of 2022”.

SEC. 2. DEFINITIONS.

(a) TERMS DEFINED IN SECTION 3304 OF TITLE 5, UNITED STATES CODE.—In this Act, the terms “agency”, “Director”, “examining agency”, “Office”, “subject matter expert”, and “technical assessment” have the meanings given those terms in subsection (c)(1) of section 3304 of title 5, United States Code, as added by section 3(a).

(b) OTHER TERMS.—In this Act, the term “competitive service” has the meaning given the term in section 2102 of title 5, United States Code.

SEC. 3. DEFINING THE TERM “EXAMINATION” FOR PURPOSES OF HIRING IN THE COMPETITIVE SERVICE.

(a) EXAMINATIONS; TECHNICAL ASSESSMENTS.—

(1) IN GENERAL.—Section 3304 of title 5, United States Code, is amended—

(A) by redesignating subsections (c) through (f) as subsections (d) through (g), respectively; and

(B) by inserting after subsection (b) the following:

“(c) EXAMINATIONS.—

“(1) DEFINITIONS.—

“(A) EXAMINATION.—

“(i) In this chapter, the term ‘examination’—

“(I) means an opportunity to directly demonstrate knowledge, skills, abilities, and competencies, through an assessment;

“(II) includes a résumé review that is—

“(aa) conducted by a subject matter expert; and

“(bb) based upon indicators that—

“(AA) are derived from a job analysis; and

“(BB) bear a rational relationship to performance in the position for which the examining agency is hiring; and

“(III) on and after the date that is 2 years after the date of enactment of the Chance to Compete Act of 2022, does not include a self-assessment from an automated examination, a résumé review (except as provided in subclause (II)), or any other method of determining the experience or level of educational attainment of an individual, alone.

“(ii)(I) An agency’s Chief Human Capital Officer may waive clause (i)(III) if the Officer provides a written report to the Director of the Office of Personnel Management within 30 days of authorizing the waiver that justifies the need for such waiver and articulates the data, evidence, and circumstances for such need.

“(II) The Director is authorized to provide agencies guidance and instruction on the

data, evidence, and circumstances that should be included in the waiver described in subclause (I) and shall post any waiver on a public website within 30 days of receipt of the waiver.

“(III) A waiver shall not be considered in effect until it is posted on the public website pursuant to subclause (II).

“(B) OTHER DEFINITIONS.—In this subsection—

“(i) the term ‘agency’ means an agency described in section 901(b) of title 31;

“(ii) the term ‘Director’ means the Director of the Office;

“(iii) the term ‘examining agency’ means—

“(I) the Office; or

“(II) an agency to which the Director has delegated examining authority under section 1104(a)(2) of this title;

“(iv) the term ‘subject matter expert’ means an employee or selecting official—

“(I) who possesses understanding of the duties of, and knowledge, skills, and abilities required for, the position for which the employee or selecting official is developing or administering an assessment; and

“(II) whom the agency that employs the employee or selecting official designates to assist in the development and administration of technical assessments under paragraph (2); and

“(v) the term ‘technical assessment’ means an assessment developed under paragraph (2)(A)(i) that—

“(I) allows for the demonstration of job-related technical skills, abilities, and knowledge;

“(II)(aa) is based upon a job analysis; and

“(bb) is relevant to the position for which the assessment is developed; and

“(III) may include—

“(aa) a structured interview;

“(bb) a work-related exercise;

“(cc) a custom or generic procedure used to measure an individual’s employment or career-related qualifications and interests; or

“(dd) another assessment that meets the criteria under subclauses (I) and (II).

“(2) TECHNICAL ASSESSMENTS.—

“(A) IN GENERAL.—For the purpose of conducting an examination for a position in the competitive service, an individual or individuals whom an agency determines to have an expertise in the subject and job field of the position, as affirmed and audited by the Chief Human Capital Officer or Human Resources Director (as applicable) of that agency, may—

“(i) develop, in partnership with human resources employees of the examining agency, a position-specific assessment that is relevant to the position; and

“(ii) administer the assessment developed under clause (i) to—

“(I) determine whether an applicant for the position has demonstrated qualification for the position; or

“(II) rank applicants for the position for category rating purposes under section 3319.

“(B) SHARING AND CUSTOMIZATION OF ASSESSMENTS.—

“(i) SHARING.—An examining agency may share a technical assessment with another examining agency if each agency maintains appropriate control over examination material.

“(ii) CUSTOMIZATION.—An examining agency with which a technical assessment is shared under clause (i) may customize the assessment as appropriate, provided that the resulting assessment satisfies the requirements under part 300 of title 5, Code of Federal Regulations (or any successor regulation).

“(iii) PLATFORM FOR SHARING AND CUSTOMIZATION.—

“(I) IN GENERAL.—The Director shall establish and operate an online platform on which

examining agencies can share and customize technical assessments under this subparagraph.

“(II) ONLINE PLATFORM.—The Director shall—

“(aa) not be responsible for independently validating the utility of the content and technical assessments shared in the online platform described in subclause (I); and

“(bb) ensure that such online platform includes the ability of its users to rate the utility of the content and technical assessments shared in the online platform to allow for a ranking of such contents.

“(3) REGULATIONS.—Not later than one year after the date of enactment of the Chance to Compete Act of 2022, the Office of Personnel Management shall prescribe regulations necessary for the administration of this subsection with respect to employees in each agency.”.

(2) ALTERNATIVE RANKING AND SELECTION PROCEDURES.—Section 3319(a) of title 5, United States Code, is amended by adding at the end the following: “To be placed in a quality category under the preceding sentence, an applicant shall be required to have passed an examination in accordance with section 3304(b), subject to the exceptions in that section.”.

(3) TECHNICAL AND CONFORMING AMENDMENT.—Section 3330a(a)(1)(B) of title 5, United States Code, is amended by striking “section 3304(f)(1)” and inserting “section 3304(g)(1)”.

(b) OPM REPORTING.—

(1) PUBLIC ONLINE TOOL.—

(A) IN GENERAL.—The Director of the Office of Personnel Management shall maintain and periodically update a publicly available online tool that, with respect to each position in the competitive service for which an examining agency examined applicants during the applicable period, includes—

(i) the type of assessment used, such as—

(I) a behavioral off-the-shelf assessment;

(II) a résumé review conducted by a subject matter expert;

(III) an interview conducted by a subject matter expert;

(IV) a technical off-the-shelf assessment; or

(V) a cognitive ability test;

(ii) whether or not the agency selected a candidate for the position; and

(iii) the hiring authority used to fill the position.

(B) TIMING.—

(1) INITIAL DATA.—Not later than 180 days after the date of enactment of this Act, the Director shall update the online tool described in subparagraph (A) with data for positions in the competitive service for which an examining agency examined applicants during the period beginning on the date of enactment of this Act and ending on the date of submission of the report.

(ii) SUBSEQUENT UPDATES.—Not later than October 1 of each fiscal year beginning after the date on which the online tool is initially updated under clause (i), the Director shall update the online tool described in subparagraph (A) with data for positions in the competitive service for which an examining agency examined applicants during the preceding fiscal year.

(2) ANNUAL PROGRESS REPORT.—

(A) IN GENERAL.—Each year, the Director, in accordance with subparagraphs (B) and (C), shall make publicly available and submit to Congress an overall progress report that includes summary data from examinations that are closed, audited, and anonymous on the use of examinations (as defined in subsection (c)(1)(A) of section 3304 of title 5, United States Code, as added by subsection (a) of this section) for the competitive service, including technical assessments.

(B) CATEGORIES; BASELINE DATA.—In carrying out subparagraph (A), the Director shall—

(i) break the data down by applicant demographic indicator, including veteran status, race, gender, disability, and any other measure the Director determines appropriate; and

(ii) use the data available as of October 1, 2020, as a baseline.

(C) LIMITATIONS.—In carrying out subparagraph (A), the Director may only make publicly available and submit to Congress data relating to examinations for which—

(i) the related announcement is closed;

(ii) certificates have been audited; and

(iii) all hiring processes are completed.

(c) GAO REPORT.—Not later than 5 years after the date of enactment of this Act, the Comptroller General of the United States shall submit to Congress a report that—

(1) assesses the implementation of this section and the amendments made by this section;

(2) assesses the impact and modifications to the hiring process for the competitive service made by this section and the amendments made by this section; and

(3) makes recommendations for the improvement of the hiring process for the competitive service.

SEC. 4. AMENDMENTS TO COMPETITIVE SERVICE ACT OF 2015.

(a) PLATFORMS FOR SHARING CERTIFICATES OF ELIGIBLES.—

(1) IN GENERAL.—Section 3318(b) of title 5, United States Code, is amended—

(A) in paragraph (1), by striking “240-day” and inserting “1-year”;

(B) by redesignating paragraph (5) as paragraph (6); and

(C) by inserting after paragraph (4) the following:

“(5) ONLINE TOOL FOR SHARING RÉSUMÉS OF INDIVIDUALS ON CERTIFICATES OF ELIGIBLES.—Not later than one year after the date of enactment of the Chance to Compete Act of 2022, the Director of the Office of Personnel Management shall establish and operate an online tool on which an appointing authority can share, with other appointing authorities and the Chief Human Capital Officers Council established under section 1303 of the Chief Human Capital Officers Act of 2002 (5 U.S.C. 1401 note; Public Law 107–296), the resumes of individuals who are on a certificate of eligibles requested by the appointing authority. In carrying out this paragraph, the Director shall consult with the Chief Human Capital Officers Counsel and its membership to develop a plan to establish such online tool.”.

(2) PLAN.—Not later than 270 days year after the date of enactment of this Act, the Director shall provide to Congress a plan to develop the online tool required in paragraph (5) of section 3318(b) of title 5, United States Code, as added by paragraph (1) of this subsection. Such plan shall—

(A) incorporate the input and feedback collected during the required consultation under such paragraph; and

(B) include estimated costs for building and operating the online tool for ten years.

(b) MAXIMIZING SHARING OF APPLICANT INFORMATION.—Section 2 of the Competitive Service Act of 2015 (Public Law 114–137; 130 Stat. 310) is amended—

(1) by redesignating subsections (c) and (d) as subsections (d) and (e), respectively; and

(2) by inserting after subsection (b) the following:

“(c) EXPLORING THE BENEFITS OF MAXIMIZING SHARING OF APPLICANT INFORMATION.—

“(1) DEFINITIONS.—In this subsection—

“(A) the terms ‘agency’, ‘Director’, and ‘Office’ have the meanings given those terms in section 3304(c)(1) of title 5, United States Code; and

“(B) the term ‘competitive service’ has the meaning given the term in section 2102 of title 5, United States Code.

“(2) MAXIMIZING SHARING.—The Director shall research the benefits of maximizing the sharing of information among agencies regarding qualified applicants for positions in the competitive service, including by—

“(A) providing for the delegation to other agencies of the authority of the Office to host multi-agency hiring actions to increase the return on investment on high-quality pooled announcements; and

“(B) sharing certificates of eligibles and accompanying résumés for appointment.”.

(c) REPORT.—Not later than one year after the date of enactment of this Act, the Director shall provide a written report to Congress on the findings of the research required by the amendment made by subsection (b)(2). Such report shall include a plan to implement the most effective methods of maximizing the sharing of qualified candidates for positions in the competitive service.

SEC. 5. MODERNIZING AND REFORMING THE ASSESSMENT AND HIRING OF FEDERAL JOB CANDIDATES.

(a) OPM REVIEW.—The Director shall conduct a review of all examinations for hiring for a position that the Office or any other examining agency has determined requires a minimum educational requirement because of the nature of the duties of such position is of a scientific, technical, or professional position pursuant to section 3308 of title 5, United States Code, to determine whether there are data, evidence, or other information that justifies the need for educational requirements for such position. The Director shall consult with appropriate agencies, employee representatives, external experts, and other stakeholders when making any such determinations.

(b) ONLINE TOOL REGARDING POSITION DUTIES.—

(1) IN GENERAL.—Not later than two years after the date of enactment of this Act, the Director shall create and maintain an online tool that lists each of the duties determined to require minimum educational requirements and the data, evidence, or other information that justifies the need for these educational requirements. This online tool shall include a mechanism to receive feedback regarding data, evidence, or information that could affect the determination that a duty requires a minimum educational requirement.

(2) HIRING PRACTICES.—Not later than one year after the creation of the online tool under paragraph (1), the Director and the head of any other examining agency shall amend the hiring practices of the Office or the other examining agency, respectively, in accordance with the findings of the review made by subsection (a).

(c) ONLINE TOOL REGARDING RECRUITING.—Upon the date of enactment of this Act, the Director shall establish and maintain an online tool that provides Federal agencies guidance on, and information about, all programs and authorities that help agencies attract, recruit, hire, and retain individuals.

SEC. 6. TALENT TEAMS.

(a) FEDERAL AGENCY TALENT TEAMS.—

(1) IN GENERAL.—An agency may establish one or more talent teams (referred to in this section as “agency talent teams”), including at the component level.

(2) DUTIES.—An agency talent team shall provide hiring support to the agency and other agencies, including by—

(A) improving examinations (as defined in subsection (c)(1)(A) of section 3304 of title 5, United States Code, as added by section 3(a));

(B) facilitating writing job announcements for the competitive service;

(C) sharing high-quality certificates of eligibles; and

(D) facilitating hiring for the competitive service using examinations (as defined in such subsection (c)(1)(A)) and subject matter experts.

(b) OFFICE OF PERSONNEL MANAGEMENT.—The Director may establish a Federal talent team to support agency talent teams in facilitating pooled hiring actions across the Federal Government, providing training, and creating technology platforms to facilitate hiring for the competitive service, including—

(1) the development of technical assessments; and

(2) the sharing of certificates of eligibles and accompanying résumés under sections 3318(b) and 3319(c) of title 5, United States Code.

SEC. 7. DETERMINATION OF BUDGETARY EFFECTS.

The budgetary effects of this Act, for the purpose of complying with the Statutory Pay-As-You-Go Act of 2010, shall be determined by reference to the latest statement titled “Budgetary Effects of PAYGO Legislation” for this Act, submitted for printing in the Congressional Record by the Chairman of the House Budget Committee, provided that such statement has been submitted prior to the vote on passage.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from New York (Mrs. CAROLYN B. MALONEY) and the gentleman from Kentucky (Mr. COMER) each will control 20 minutes.

The Chair recognizes the gentlewoman from New York.

GENERAL LEAVE

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days in which to revise and extend their remarks and insert extraneous material on H.R. 6967.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman?

There was no objection.

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 6967, the Chance to Compete Act.

The bipartisan Chance to Compete Act was introduced by Representative HICE along with Representatives KHANNA, FOXX, and MFUME. Representatives MACE and Subcommittee Chairman CONNOLLY later joined the bill, as well.

This bill aims to make evaluations more useful in assessing the skills of candidates for Federal positions and alleviate inefficiencies that have long hindered the hiring process.

The bill turns away from the current reliance on self-assessment and attainment of an educational degree to determine candidate qualifications in the Federal hiring process. Instead, subject matter experts in agencies would design assessments that test knowledge specific to a position for which the agency is hiring.

This overhaul to the assessment method would better match qualified applicants with positions and expand employment opportunities to candidates with more diverse professional and educational backgrounds.

The Chance to Compete Act aligns with the Office of Personnel Management's guidance released in May to facilitate an executive order to modernize the process of assessing and hiring Federal job candidates. Establishing hiring methods that are more skills-based will improve agency managers' ability to hire people who possess the knowledge and experience to do the job and to hire from a wider array of qualified applicants.

The bill also directs the Office of Personnel Management to create an online platform for sharing candidate assessments between agencies and maintain a portal for hiring managers to find candidates who have already demonstrated their qualifications for certain positions but were not hired.

Under this legislation, agencies may assemble talent teams to support this assessment of job candidates and the hiring process.

The OPM director would be required to submit annual progress reports to Congress on the use of the skills-based assessments. After 5 years, the Government Accountability Office would conduct a study of the implementation of the Federal job assessment reforms and their impact on the Federal hiring process.

This bill streamlines the hiring process for Federal agencies and shortens the time it takes to bring new, well-qualified employees on board.

The Senate companion to this bill, introduced by Senator SINEMA, also enjoys bipartisan support.

I thank Representative HICE for his leadership in introducing this bill that is the result of constructive collaboration by several members of our committee from both sides of the aisle.

Mr. Speaker, I urge all my colleagues to join me in supporting it, and I reserve the balance of my time.

Mr. COMER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, Congress is charged with overseeing the general management and operations of government agencies. For the success of each Federal program, we must have a competent and skilled workforce to deliver services to the American people, defend our Nation, and execute the laws passed by Congress. However, agencies currently lack the tools to identify and hire the best candidates to fill the broad types of job positions supporting the Federal Government's various missions and programs.

The problem is that hiring for the Federal civil service has over-relied on the paper credentials and self-administered job proficiency assessments of candidates.

The Chance to Compete Act makes sure agencies use objective, skills-based assessments to evaluate job candidates. The private sector already uses such structured interviews, knowledge tests, and writing samples for the hiring process. It is time for the Federal Government to do so, as well.

Agencies should be able to hire professionals that can do the work, and

there are many ways to build the right kind of professional expertise.

H.R. 6967 represents one of those rare, bipartisan legislative reforms that targets a specific problem, implements tested solutions, and reflects private-sector best practices. The bill codifies and improves upon policy initiatives begun in the Trump administration which the Biden administration is continuing to implement.

Mr. Speaker, I thank the House Oversight and Reform Committee Chairwoman MALONEY and Government Operations Subcommittee Chairman GERRY CONNOLLY for working diligently with the bill's cosponsor, Congressman JODY HICE, to strengthen this bipartisan bill.

□ 1530

Mr. Speaker, I thank Representatives RO KHANNA, VIRGINIA FOXX, and KWEISI MFUME for their support. We hope that our Senate colleagues can rapidly advance this important legislation so it can be signed into law this year, and I urge my colleagues to support this smart reform bill.

Mr. Speaker, I yield 3 minutes to the gentleman from Georgia (Mr. HICE), the ranking member of the Subcommittee on Government Operations.

Mr. HICE of Georgia. Mr. Speaker, I appreciate the support and comments both from Ranking Member COMER and Chairwoman MALONEY. I appreciate that a great deal.

The concept of this bill is quite simple. It allows us to hire applicants for Federal positions based on whether or not they have the skills for the job. It is really that simple.

Too frequently, the hiring process is based on whether or not someone has a degree whether or not that degree has anything to do with the specific position or not.

Currently, hiring managers also have to rely on self-assessments that are filled out by applicants to determine their strengths and weaknesses. Not surprisingly, those assessments also are likely not to work.

This Chance to Compete Act simply allows agencies to develop appropriate skills that are based on examinations so that the applicants show what they can do. Federal supervisors have said for a long time that their top concern is getting a pool of quality candidates to do the job, and this bill addresses that problem head-on.

It will facilitate agencies sharing information about candidates who have passed assessments, which will make the hiring process more efficient across the government, saving both time and money. It also creates teams of subject matter experts to help agencies create assessments that are geared for the job.

This builds off what was started in the Trump administration, and I likewise express my thanks to Representatives KHANNA, FOXX, MFUME, and MACE for their cosponsorship, as well as Chairman CONNOLLY, my colleague

from the Subcommittee on Government Operations.

This is good policy. It will help America's government work more efficiently.

Mr. Speaker, I urge my colleagues to support this smart reform bill.

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I reserve the balance of my time.

Mr. COMER. Mr. Speaker, this is a commonsense bill aimed at hiring applicants for Federal positions based on whether they have the relevant skills to do the job. The American people deserve nothing less from their Federal Government.

Mr. Speaker, I encourage my colleagues to support this bill, and I yield back the balance of my time.

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I urge passage of H.R. 6967, and I yield back the balance of my time.

Mr. Speaker, I rise in support of H.R. 6967, the Chance to Compete Act.

This bill is a good first step in reforming how we find and hire talent to the federal civil service and removes barriers that prevent agencies from recruiting the best talent.

The bill specifically eliminates antiquated hiring assessment tools, improves federal agencies' hiring process, and allows qualified applicants to compete for open positions across government. This bill will move government away from a focus on academic parchment to a prioritization on skills and expertise.

I'm proud to be a cosponsor of this bill, introduced by my Ranking Member JODY HICE and my Oversight colleague RO KHANNA.

The bill came to us from the Senate, less than perfect and opposed by the Administration.

But parties across both chambers worked together to draft an updated version of the bill that incorporates important feedback from the Office of Personnel Management and the Office of Management and Budget.

As currently drafted, the bill would:

Redefine competitive-service hiring applicant assessments to help agencies focus on candidates who can perform on the job.

Put subject-matter experts at the helm of hiring, empowering those who can best distinguish practical performers from the field of candidates.

Require OPM to begin a review of all federal "duties" that require an educational achievement level for hiring purposes, and then instructs OPM to make available online the data.

Clarify to agencies, Congress, and the public why some positions, like a doctor at the Department of Veterans Affairs, must have an advanced degree, while a cybersecurity expert at the Department of Homeland Security would benefit from a seasoned specialist, trained from the field.

Authorize "talent teams" in agency human resources offices—ensuring each agency has a key group of staff focused on improving federal hiring.

I thank Ranking Member HICE for working with me to improve this bill and ensure it is policy that all stakeholders, including the Administration and our union partners, believe will improve how we find and recruit talent to the federal government.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from New York (Mrs. CAROLYN B. MALONEY) that the House suspend the rules and pass the bill, H.R. 6967, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. HICE of Georgia. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this motion will be postponed.

SERGEANT GERALD T. "JERRY" DONNELLAN POST OFFICE

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 6267) to designate the facility of the United States Postal Service located at 15 Chestnut Street in Suffern, New York, as the "Sergeant Gerald T. 'Jerry' Donnellan Post Office".

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 6267

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SERGEANT GERALD T. "JERRY" DONNELLAN POST OFFICE.

(a) DESIGNATION.—The facility of the United States Postal Service located at 15 Chestnut Street in Suffern, New York, shall be known and designated as the "Sergeant Gerald T. 'Jerry' Donnellan Post Office".

(b) REFERENCES.—Any reference in a law, map, regulation, document, paper, or other record of the United States to the facility referred to in subsection (a) shall be deemed to be a reference to the "Sergeant Gerald T. 'Jerry' Donnellan Post Office".

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from New York (Mrs. CAROLYN B. MALONEY) and the gentleman from Georgia (Mr. HICE) each will control 20 minutes.

The Chair recognizes the gentlewoman from New York.

GENERAL LEAVE

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on this measure.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from New York?

There was no objection.

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support today of H.R. 6267, authored by my good friend and colleague from the great State of New York.

This bill will designate the facility of the United States Postal Service located at 15 Chestnut Street in Suffern, New York, as the Sergeant Gerald T. "Jerry" Donnellan Post Office.

Sergeant Donnellan was born on December 18, 1946, in Nyack, New York, as

the youngest of five children. He graduated from Albertus Magnus High School and went on to major in English at Rockland Community College and Texas A&M University.

During the height of the Vietnam war, Sergeant Donnellan was drafted into the Army and began his basic training at Fort Gordon in Georgia. After several months, he was deployed to Vietnam.

On the front lines, Sergeant Donnellan sustained life-threatening injuries after an enemy grenade exploded in front of him. While in recovery at Valley Forge, he received the Purple Heart.

After recovery, Sergeant Donnellan worked in the Veterans Service Agency office of Rockland County as commissioner of veterans affairs until his retirement in January 2018.

During his tenure, he created the local Chapter 333 of the Vietnam Veterans of America, started a veterans' health clinic, helped create Camp Shanks Museum in Orangetown, established the Rockland County Buffalo Soldiers Award to recognize the contributions of African-American veterans, and established the Rockland County Public Service Medal to honor those who served in Afghanistan, Iraq, and the global war on terror.

Mr. Speaker, I urge my colleagues to join me in honoring Sergeant Donnellan, a Purple Heart recipient, by naming the post office after him.

Mr. Speaker, I reserve the balance of my time.

Mr. HICE of Georgia. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in support of H.R. 6267, which honors Gerald T. Donnellan.

Mr. Donnellan served in the U.S. Army during the Vietnam war, rising to the rank of sergeant and receiving three Purple Hearts.

After the war, his service to his country and community continued for his entire life. He served as commissioner of veterans affairs in Rockland County, New York, for 30 years and was responsible for starting a veterans' health clinic in the county.

He leaves a legacy of other noteworthy accomplishments. He established a local chapter of the Vietnam Veterans of America. He helped create the Camp Shanks Museum, commemorating the military facility that served as the largest point of embarkation for soldiers headed for the front lines in North Africa and Europe during World War II.

He also established the Rockland County Buffalo Soldiers Award to recognize the contribution of African-American veterans.

He helped start the Memorial Day watchfires in 1987 as an alternative to a parade for Vietnam veterans, and he established the Rockland County Public Service Medal to honor those who served in Afghanistan, Iraq, and the global war on terror.

Gerald T. Donnellan was a true patriot who committed his life to the United States for veterans and his local community.

Mr. Speaker, I encourage my colleagues to support this bill, and I reserve the balance of my time.

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I yield such time as he may consume to the gentleman from New York (Mr. JONES), the distinguished vice chair of the Committee on the Judiciary's Subcommittee on Courts, Intellectual Property, and the Internet.

Mr. JONES. Mr. Speaker, I rise in strong support of my bill, H.R. 6267, to designate the post office located at 15 Chestnut Street in Suffern, New York, as the Sergeant Gerald T. "Jerry" Donnellan Post Office.

I am humbled to honor the late Sergeant Jerry Donnellan, whose memory brings great pride to all of us in New York's 17th Congressional District.

Mr. Donnellan was a Valley Cottage native and a three-time Purple Heart recipient who served in Vietnam as a U.S. Army sergeant. During an ambush, he was wounded and lost his lower right leg to a grenade. He underwent countless surgeries and extensive physical therapy before returning home to Rockland County in 1970.

Against all odds, Mr. Donnellan persevered. He learned to walk again alongside his newborn son. He even pursued his passion for theater and built a successful career as a stage manager for nearly two decades, including for Frank Sinatra.

But he never lost his love for public service. In 1986, when he learned of high rates of servicemember and veteran suicides, Mr. Donnellan was moved. He became a veterans counselor at Rockland County's Veterans Agency Office.

In 1992, he was appointed Rockland County's commissioner of veterans affairs. During his tenure, Sergeant Donnellan created local Chapter 333 of the Vietnam Veterans of America and started a veterans' health clinic. He helped create Camp Shanks Museum in the town of Orangetown and established the Rockland County Buffalo Soldiers Award to recognize the contributions of Black veterans.

He helped to start the Memorial Day watchfires in 1987, the year I was born, and established the Rockland County Public Service Medal to honor those who served in Afghanistan and Iraq.

Sergeant Donnellan never relented in his advocacy for our veterans and their families. He embodied selflessness as a soldier and civilian, treating every veteran and every person with the respect and dignity they deserve.

Today, we honor Sergeant Donnellan's life and his legacy. His commitment to serving our country and our fellow Americans should inspire us all.

Mr. HICE of Georgia. Mr. Speaker, I encourage my colleagues to support this bill, and I yield back the balance of my time.

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I commend my colleague and friend, MONDAIRE JONES, for his leadership on this bill and so many other areas here in Congress. He certainly deserves this name-changing for the post office there.

Mr. Speaker, I urge passage of H.R. 6267, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from New York (Mrs. CAROLYN B. MALONEY) that the House suspend the rules and pass the bill, H.R. 6267.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

RONALD A. ROBINSON POST OFFICE

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 6080) to designate the facility of the United States Postal Service located at 5420 Kavanaugh Boulevard in Little Rock, Arkansas, as the "Ronald A. Robinson Post Office".

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 6080

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. RONALD A. ROBINSON POST OFFICE.

(a) DESIGNATION.—The facility of the United States Postal Service located at 5420 Kavanaugh Boulevard in Little Rock, Arkansas, shall be known and designated as the "Ronald A. Robinson Post Office".

(b) REFERENCES.—Any reference in a law, map, regulation, document, or other record of the United States to the facility referred to in subsection (a) shall be deemed to be a reference to the "Ronald A. Robinson Post Office".

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from New York (Mrs. CAROLYN B. MALONEY) and the gentleman from Georgia (Mr. HICE) each will control 20 minutes.

The Chair recognizes the gentlewoman from New York.

GENERAL LEAVE

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on this measure.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from New York?

There was no objection.

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in support of H.R. 6080 to designate the facility of the U.S. Postal Service located at 5420 Kavanaugh Boulevard in Little Rock, Arkansas, as the Ronald A. Robinson Post Office.

Mr. Robinson was a graduate of the University of Arkansas at Fayetteville, where he earned a bachelor's degree in journalism. He went on to study public relations at Boston University's Graduate School of Public Communications.

He served in the U.S. Air Force as a captain and was awarded a Bronze Star in Vietnam. He also received the Air Force Commendation Medal in 1969 for his support of the Apollo 11 mission to the Moon.

Mr. Robinson, in 1970, joined the marketing and communications firm Cranford Johnson Robinson Woods. After 26 years, he retired from the firm as its chief executive officer. During his tenure, the firm became the largest advertising agency in Arkansas, with notable business and political clients.

In 1993, he was appointed to the U.S. Postal Service's Citizens' Stamp Advisory Committee by the U.S. Postmaster General. In 2005, Mr. Robinson was named chairman of that committee. During his 15 years serving on the committee, Mr. Robinson was involved in the creation and production of more than 1,750 postage stamp issues.

He used his influence to highlight Arkansas in several of the newly issued postage stamps.

Mr. Speaker, I encourage my colleagues to join in honoring Mr. Robinson by naming a post office in Little Rock, Arkansas, after him.

Mr. Speaker, I reserve the balance of my time.

□ 1545

Mr. HICE of Georgia. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 6080, which honors Ronald A. Robinson.

We name many post offices for a variety of reasons around here, but the one we are considering now is notable in that it reflects Mr. Robinson's lifelong interest in and support of postal matters.

Specifically, Mr. Robinson was an avid stamp collector, but this was not just a hobby. In fact, between 1993 and 2008, he served on the Postal Service's Citizens' Stamp Advisory Committee, a body appointed by the Postmaster General to recommend subjects for commemoration on U.S. postal stamps. Mr. Robinson served as chairman of the committee for the last 3 years of his life and tenure.

Over the 15 years he served on the committee, Mr. Robinson was involved in the creation and production of more than 1,750 postal stamps. In addition to his service to the Postal Service, Mr. Robinson served as captain in the U.S. Air Force during the Vietnam war, for which he was awarded a Bronze Star. He also received the Air Force Commendation Medal for his support of the Apollo 11 mission to the Moon.

In addition to his public service, Mr. Robinson also enjoyed a successful private-sector career. After leaving the Air Force, he joined Cranford, Johnson,

Robinson, Woods, a marketing and communications firm in Arkansas.

He began as an intern at the firm and rose to become the firm's CEO—helping build it into the largest advertising agency in Arkansas and receiving numerous awards and recognitions along the way.

Mr. Speaker, Mr. Robinson passed away in 2018, leaving a legacy of service and accomplishment. I encourage my colleagues to support this bill, and I reserve the balance of my time.

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I reserve the balance of my time.

Mr. HICE of Georgia. Mr. Speaker, I yield 5 minutes to the gentleman from Arkansas (Mr. HILL), the author of this bill.

Mr. HILL. Mr. Speaker, I thank my friend, Mr. HICE, and the chairwoman for this time.

Mr. Speaker, I do indeed rise today in support of H.R. 6080, the bill to designate the U.S. Post Office at 5420 Kavanaugh Boulevard in Little Rock, Arkansas, as the Ronald A. Robinson Post Office.

Ron, as he was known, was truly larger than life. Ron was born on April 3, 1943, and he passed away August 14, 2018, at 75 years old. Ron lived an extraordinary life that included serving with distinction as an Air Force captain, communications professional, and an avid stamp collector.

Ron attended the University of Arkansas at Fayetteville, where he earned his degree in journalism. While studying journalism, he was a sports-writer covering the Arkansas Razorbacks for the Arkansas Gazette. He was also editor of the University of Arkansas newspaper, The Arkansas Traveler.

In 1966, Ron attended the Boston University Graduate School of Public Communications to study public relations.

Ron joined the Air Force, and he served as an officer for nearly 5 years. During his time in the Air Force, he rose to the rank of captain. His assignments included being the head of internal information for the nationwide Air Force ROTC program. He was also chief of combat news and the director of information for the Defense Intelligence Agency's Aeronautical Chart and Information Center.

Ron earned a Bronze Star for his service in Vietnam. He also earned the Air Force Commendation Medal for his support of 1969 Apollo 11 mission to the Moon. After his career as a sports-writer and Air Force captain, Ron became a PR expert at Cranford, Johnson.

Out of his public relations career, Ron was an avid collector of Arkansas political and historical memorabilia, U.S. postage stamps, and vintage movie posters. His house was literally a museum.

Ron began collecting stamps as a boy. He loved history and pop culture. Stamps were able to connect both of these interests for Ron Robinson.

In 1993, Ron was appointed to the U.S. Postal Service's Citizens' Stamp Advisory Committee by the U.S. Postmaster General. The U.S. Postal Service's Citizens' Stamp Advisory Committee recommends new postage stamps to the Postmaster General.

Serving on that committee was the role of a lifetime for Ron Robinson. It was an incredible honor for him, and he treasured every moment of his 15 years. He served as chair of the committee from 2005 to 2008, when, as noted, over that period of time he was involved in the creation and development of 1,750 postage stamps.

Some of Ron's favorites are here with us: 1996 Fulbright Scholarship stamp; the 2001 Hattie Caraway, the first woman elected to the United States Senate; and the 2005 Little Rock Central High School civil rights stamp.

Ron was able to use his influence to ensure that Arkansas was the subject of many newly issued postage stamps.

Ron's work and love for stamps made him an influential figure in the city of Little Rock and our State of Arkansas. He was a father, mentor, and good friend to many, including me.

Ron was well-known for being a prolific writer, and he would write hundreds of handwritten thank you notes and cards to his friends for encouragement throughout his life. He enjoyed writing those notes and placing the postage stamp on the envelope himself.

Ron's love for postage stamps and his work on the Postal Service's Citizens' Stamp Advisory Committee makes him the ideal citizen—as my friend, Mr. HICE, noted—to lend his name to his neighborhood post office after recognition of his lifetime of service to Arkansas and the United States.

Mr. Speaker, I urge all my colleagues to support this bill, and I thank my friends on both sides of the aisle.

Mr. HICE of Georgia. Mr. Speaker, I have no further speakers, and I am prepared to close.

Mr. Speaker, this is a good bill. I urge my colleagues to support it, and I yield back the balance of my time.

Mrs. CAROLYN B. MALONEY of New York. Mr. Speaker, I urge passage of H.R. 6080, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from New York (Mrs. CAROLYN B. MALONEY) that the House suspend the rules and pass the bill, H.R. 6080.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

IMPROVING TRAUMA SYSTEMS AND EMERGENCY CARE ACT

Mr. PALLONE. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 8163) to amend the Public Health Service Act with respect to trauma care, as amended.

The Clerk read the title of the bill. The text of the bill is as follows:

H.R. 8163

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Improving Trauma Systems and Emergency Care Act".

SEC. 2. TRAUMA CARE REAUTHORIZATION.

(a) IN GENERAL.—Section 1201 of the Public Health Service Act (42 U.S.C. 300d) is amended—

(1) in subsection (a)—
(A) in paragraph (3)—
(i) by inserting "analyze," after "compile,";

and
(ii) by inserting "and medically underserved areas" before the semicolon;

(B) in paragraph (4), by adding "and" after the semicolon;

(C) by striking paragraph (5); and

(D) by redesignating paragraph (6) as paragraph (5);

(2) by redesignating subsection (b) as subsection (c); and

(3) by inserting after subsection (a) the following:

"(b) TRAUMA CARE READINESS AND COORDINATION.—The Secretary, acting through the Assistant Secretary for Preparedness and Response, shall support the efforts of States and consortia of States to coordinate and improve emergency medical services and trauma care during a public health emergency declared by the Secretary pursuant to section 319 or a major disaster or emergency declared by the President under section 401 or 501, respectively, of the Robert T. Stafford Disaster Relief and Emergency Assistance Act. Such support may include—

"(1) developing, issuing, and updating guidance, as appropriate, to support the coordinated medical triage and evacuation to appropriate medical institutions based on patient medical need, taking into account regionalized systems of care;

"(2) disseminating, as appropriate, information on evidence-based or evidence-informed trauma care practices, taking into consideration emergency medical services and trauma care systems, including such practices identified through activities conducted under subsection (a) and which may include the identification and dissemination of performance metrics, as applicable and appropriate; and

"(3) other activities, as appropriate, to optimize a coordinated and flexible approach to the emergency response and medical surge capacity of hospitals, other health care facilities, critical care, and emergency medical systems."

(b) GRANTS TO IMPROVE TRAUMA CARE IN RURAL AREAS.—Section 1202 of the Public Health Service Act (42 U.S.C. 300d-3) is amended—

(1) by amending the section heading to read as follows: "GRANTS TO IMPROVE TRAUMA CARE IN RURAL AREAS";

(2) by amending subsections (a) and (b) to read as follows:

"(a) IN GENERAL.—The Secretary shall award grants to eligible entities for the purpose of carrying out research and demonstration projects to support the improvement of emergency medical services and trauma care in rural areas through the development of innovative uses of technology, training and education, transportation of seriously injured patients for the purposes of receiving such emergency medical services, access to prehospital care, evaluation of protocols for the purposes of improvement of outcomes and dissemination of any related best practices, activities to facilitate clinical research, as applicable and appropriate, and increasing communication and coordination with applicable State or Tribal trauma systems.

"(b) ELIGIBLE ENTITIES.—

"(1) IN GENERAL.—To be eligible to receive a grant under this section, an entity shall be a

public or private entity that provides trauma care in a rural area.

“(2) **PRIORITY.**—In awarding grants under this section, the Secretary shall give priority to eligible entities that will provide services under the grant in any rural area identified by a State under section 1214(d)(1).”; and

(3) by adding at the end the following:

“(d) **REPORTS.**—An entity that receives a grant under this section shall submit to the Secretary such reports as the Secretary may require to inform administration of the program under this section.”.

(c) **PILOT GRANTS FOR TRAUMA CENTERS.**—Section 1204 of the Public Health Service Act (42 U.S.C. 300d–6) is amended—

(1) by amending the section heading to read as follows: “**PILOT GRANTS FOR TRAUMA CENTERS**”; and

(2) in subsection (a)—

(A) by striking “not fewer than 4” and inserting “10”; and

(B) by striking “that design, implement, and evaluate” and inserting “to design, implement, and evaluate new or existing”; and

(C) by striking “emergency care” and inserting “emergency medical”; and

(D) by inserting “, and improve access to trauma care within such systems” before the period;

(3) in subsection (b)(1), by striking subparagraphs (A) and (B) and inserting the following: “(A) a State or consortia of States;”

“(B) an Indian Tribe or Tribal organization (as defined in section 4 of the Indian Self-Determination and Education Assistance Act);”

“(C) a consortium of level I, II, or III trauma centers designated by applicable State or local agencies within an applicable State or region, and, as applicable, other emergency services providers; or

“(D) a consortium or partnership of nonprofit Indian Health Service, Indian Tribal, and urban Indian trauma centers.”;

(4) in subsection (c)—

(A) in the matter preceding paragraph (1)—

(i) by striking “that proposes a pilot project”; and

(ii) by striking “an emergency medical and trauma system that—” and inserting “a new or existing emergency medical and trauma system. Such eligible entity shall use amounts awarded under this subsection to carry out 2 or more of the following activities.”;

(B) in paragraph (1)—

(i) by striking “coordinates” and inserting “Strengthening coordination and communication”; and

(ii) by striking “an approach to emergency medical and trauma system access throughout the region, including 9–1–1 Public Safety Answering Points and emergency medical dispatch,” and inserting “approaches to improve situational awareness and emergency medical and trauma system access.”;

(C) in paragraph (2)—

(i) by striking “includes” and inserting “Providing”; and

(ii) by inserting “support patient movement to” after “region to”; and

(iii) by striking the semicolon and inserting a period;

(D) in paragraph (3)—

(i) by striking “allows for” and inserting “Improving”; and

(ii) by striking “; and” and inserting a period;

(E) in paragraph (4), by striking “includes a consistent” and inserting “Supporting a consistent”; and

(F) by adding at the end the following:

“(5) Establishing, implementing, and disseminating, or utilizing existing, as applicable, evidence-based or evidence-informed practices across facilities within such emergency medical and trauma system to improve health outcomes, including such practices related to management of injuries, and the ability of such facilities to surge.

“(6) Conducting activities to facilitate clinical research, as applicable and appropriate.”;

(5) in subsection (d)(2)—

(A) in subparagraph (A)—

(i) in the matter preceding clause (i), by striking “the proposed” and inserting “the applicable emergency medical and trauma system”; and

(ii) in clause (i), by inserting “or Tribal entity” after “equivalent State office”; and

(iii) in clause (vi), by striking “; and” and inserting a semicolon;

(B) by redesignating subparagraph (B) as subparagraph (C); and

(C) by inserting after subparagraph (A) the following:

“(B) for eligible entities described in subparagraph (C) or (D) of subsection (b)(1), a description of, and evidence of, coordination with the applicable State Office of Emergency Medical Services (or equivalent State Office) or applicable such office for a Tribe or Tribal organization; and”;

(6) in subsection (f), by striking “population in a medically underserved area” and inserting “medically underserved population”; and

(7) in subsection (g)—

(A) in the matter preceding paragraph (1), by striking “described in”; and

(B) in paragraph (2), by striking “the system characteristics that contribute to” and inserting “opportunities for improvement, including recommendations for how to improve”; and

(C) by striking paragraph (4);

(D) by redesignating paragraphs (5) and (6) as paragraphs (4) and (5), respectively;

(E) in paragraph (4), as so redesignated, by striking “; and” and inserting a semicolon;

(F) in paragraph (5), as so redesignated, by striking the period and inserting “; and”; and

(G) by adding at the end the following:

“(6) any evidence-based or evidence-informed strategies developed or utilized pursuant to subsection (c)(5).”; and

(8) by amending subsection (h) to read as follows:

“(h) **DISSEMINATION OF FINDINGS.**—Not later than 1 year after the completion of the final project under subsection (a), the Secretary shall submit to the Committee on Health, Education, Labor, and Pensions of the Senate and the Committee on Energy and Commerce of the House of Representatives a report describing the information contained in each report submitted pursuant to subsection (g) and any additional actions planned by the Secretary related to regionalized emergency care and trauma systems.”.

(d) **PROGRAM FUNDING.**—Section 1232(a) of the Public Health Service Act (42 U.S.C. 300d–32(a)) is amended by striking “2010 through 2014” and inserting “2023 through 2027”.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from New Jersey (Mr. PALLONE) and the gentleman from Kentucky (Mr. GUTHRIE) each will control 20 minutes.

The Chair recognizes the gentleman from New Jersey.

GENERAL LEAVE

Mr. PALLONE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on H.R. 8163.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. PALLONE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in support of H.R. 8163, the Improving Trauma Systems and Emergency Care Act, sponsored by Representative O'HALLERAN of Arizona. This bill will

improve access to trauma services throughout the country and better coordinate emergency care when patients need it the very most.

Traumatic injury is a major public health issue claiming more than 270,000 lives every year, and accounting for billions of dollars in healthcare spending throughout the Nation.

Trauma affects every one of our communities, but about 46 million Americans, most of whom live in rural areas, do not live within one hour of a Level I or Level II trauma center. This is often referred to as the “golden hour” following traumatic injury. Prompt medical treatment during this hour produces the highest likelihood of preventing a patient's death.

H.R. 8163 reauthorizes grants that will enhance access to trauma care, improve coordination among trauma systems, and provide resources for rural access to trauma services. The grants included in the bill are intended to help trauma systems develop best practices, not only for their own patients, but also to facilitate the dissemination of those best practices to similar trauma systems throughout the Nation to improve overall care.

Mr. Speaker, I thank my colleagues on the Energy and Commerce Committee for their tremendous work to reach bipartisan agreement on this bill. I also commend Representative O'HALLERAN for his tireless advocacy on this issue for all rural communities.

Mr. Speaker, H.R. 8163 is a strong bill that will help people in every community. I urge my colleagues to support it, and I reserve the balance of my time.

Mr. GUTHRIE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today to express my support for H.R. 8163, the Improving Trauma Systems and Emergency Care Act of 2022, which is sponsored by my Energy and Commerce Committee colleague, Representative TOM O'HALLERAN.

This legislation renews a program in the Public Health Service Act that authorizes the Secretary of Health and Human Services to award grants to improve local trauma care readiness and emergency medical services.

According to the Centers for Disease Control and Prevention, the CDC, trauma is a leading cause of death for children and adults under the age of 44. Ensuring access to trauma care requires many crucial components, and the window of opportunity for a chance at survival is narrow for a severely injured patient; a prompt response is truly a matter of life and death.

However, in many rural parts of the United States, accident victims and others suffering life-threatening injuries may not be able to receive needed trauma care within an hour, or even many hours, following an incident.

H.R. 8163 will help ensure seriously injured patients have the best possible chance for survival by supporting States to coordinate and improve regional emergency medical services and

trauma care, and by supporting trauma centers to improve their emergency system situational awareness and access.

The bill also authorizes grants for carrying out research and demonstration projects to support the improvement of emergency medical services and trauma care in rural areas.

Mr. Speaker, I thank Chair PALLONE and Chair ESHOO for working with us to make sure the State match is maintained.

Mr. Speaker, I urge adoption of this bill, and I reserve the balance of my time.

Mr. PALLONE. Mr. Speaker, I have no additional speakers, and I reserve the balance of my time.

Mr. GUTHRIE. Mr. Speaker, I urge the passage of 8163, and I yield back the balance of my time.

Mr. PALLONE. Mr. Speaker, I also urge support. This is bipartisan. This is really important to rural areas, in particular.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New Jersey (Mr. PALLONE) that the House suspend the rules and pass the bill, H.R. 8163, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the yeas have it.

Mr. TIFFANY. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this motion will be postponed.

□ 1600

MAXIMIZING OUTCOMES THROUGH BETTER INVESTMENTS IN LIFE-SAVING EQUIPMENT FOR (MOBILE) HEALTH CARE ACT

Mr. PALLONE. Mr. Speaker, I move to suspend the rules and pass the bill (S. 958) to amend the Public Health Service Act to expand the allowable use criteria for new access points grants for community health centers.

The Clerk read the title of the bill.

The text of the bill is as follows:

S. 958

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Maximizing Outcomes through Better Investments in Lifesaving Equipment for (MOBILE) Health Care Act”.

SEC. 2. NEW ACCESS POINTS GRANTS.

(a) IN GENERAL.—Section 330(e)(6)(A) of the Public Health Service Act (42 U.S.C. 254b(e)(6)(A)) is amended by adding at the end the following:

“(v) MOBILE UNITS.—An existing health center may be awarded funds under clause (i) to establish a new delivery site that is a mobile unit, regardless of whether the applicant

additionally proposes to establish a permanent, full-time site. In the case of a health center that is not currently receiving funds under this section, such health center may be awarded funds under clause (i) to establish a new delivery site that is a mobile unit only if such health center uses a portion of such funds to also establish a permanent, full-time site.”.

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect on January 1, 2024.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from New Jersey (Mr. PALLONE) and the gentleman from Kentucky (Mr. GUTHRIE) each will control 20 minutes.

The Chair recognizes the gentleman from New Jersey.

GENERAL LEAVE

Mr. PALLONE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on S. 958.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. PALLONE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in support of S. 958, the Maximizing Outcomes through Better Investments in Life-saving Equipment for Health Care Act, or the MOBILE Health Care Act. This Senate bill is the companion to H.R. 5141, which passed out of the Energy and Commerce Committee last week. The bipartisan bill will help expand access to community health centers and the important care they provide to individuals who live in hard-to-reach areas of the country.

Community health centers are a critical source of care for nearly 30 million Americans. Unfortunately, many people who live in rural and geographically isolated areas can struggle to reach a community health center. Many others may lack access to reliable transportation that can make it difficult to get the care they need.

Now, one way to mitigate these barriers to access is to allow community health centers to establish mobile health clinics. These clinics can meet people where they live to provide the care they need. There is already funding to establish new community health centers through the New Access Points grants but, unfortunately, existing rules for these grants make it difficult to receive Federal funding to set up these mobile sites.

So this legislation will make it easier for community health centers to use New Access Points grants to establish mobile clinics and help eliminate one of the barriers to care for rural areas.

I thank Representatives SUSIE LEE, HUDSON, RUIZ, and HERRERA BEUTLER for their leadership on this issue and their hard work to advance this important bill.

The House companion to this commonsense, bipartisan legislation was voted out of the Energy and Commerce Committee by a unanimous vote of 52-

to-0 last week, so I am proud to support this bill, and I look forward to sending it to the President's desk.

I urge my colleagues to join me in supporting S. 958, and I reserve the balance of my time.

Mr. GUTHRIE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in support of S. 958, the Maximizing Outcomes through Better Investments in Life-saving Equipment, or the MOBILE Health Care Act.

Federally Qualified Health Centers, or FQHCs, are an integral part of the healthcare system. They provide much-needed healthcare services to some of our most vulnerable populations, the uninsured, pregnant women, children, those suffering from homelessness, and veterans, as well as Medicare and Medicaid beneficiaries.

It can be difficult for patients to access care at FQHCs in rural and underserved areas due to transportation constraints. One way to help improve healthcare delivery is for FQHCs to meet patients where they are by deploying mobile units.

The MOBILE Health Care Act will allow existing FQHCs to use their New Access Point grants to establish mobile health units without also creating new brick-and-mortar sites and without authorizing any new grant programs or funding.

Further, it allows new applicants to use these grants to purchase mobile health units if they also use a portion of the grant to establish a permanent, full-time site.

This bill will help increase access to affordable primary care services across the country, especially in rural areas, like my district.

I thank the bill's sponsors, Representatives HUDSON, HERRERA BEUTLER, LEE, and RUIZ for introducing this important legislation.

I urge my colleagues to support the underlying bill, and I reserve the balance of my time.

Mr. PALLONE. Mr. Speaker, I yield 3 minutes to the gentlewoman from Nevada (Mrs. LEE), the sponsor of this legislation.

Mrs. LEE of Nevada. Mr. Speaker, I thank the chairman for his leadership, as well as my cosponsors: Representatives HUDSON, HERRERA BEUTLER, and RUIZ for their hard work in supporting this piece of legislation.

I rise today in strong support of my bipartisan legislation, the MOBILE Health Care Act, which will help more Americans access the quality healthcare they need and deserve.

In my State of Nevada, more than two-thirds of residents live in a primary care health professional shortage area. In our rural communities, that number goes to 82 percent.

Needless to say, the situation is dire, and that is why expanding access to quality healthcare has been a priority of mine since I have been a Member of Congress.

Expanding the capabilities of Federally Qualified Health Centers, commonly known as FQHCs, has been a top

focus of mine when it comes to expanding access to healthcare. That is because FQHCs lead the Nation in driving quality improvement, while reducing healthcare costs.

Across this country, 1 in 11 Americans, including 400,000 veterans, and nearly 9 million children, rely on FQHCs for their primary healthcare. They have been a huge success in expanding quality care, but the reality is, smaller, rural communities do not have the population base to support full-time health centers.

There are also many Americans, in both rural and urban areas, who lack transportation to access their closest FQHC, and that is exactly where mobile health units come in. Mobile health units have the capability to bring high-quality healthcare to all Americans, especially those in underserved areas.

My bill will allow FQHCs this important flexibility to use their Federal New Access Point grants to establish mobile health units. This will allow health centers to better serve their communities, especially communities that have traditionally been hard to reach; and this does so at no additional cost to the taxpayer.

In my district, we have seen the difference these mobile units make. For example, the Nevada Health Centers currently runs three mobile health units: The Children's Mobile Medical Unit, the Ronald McDonald Care Mobile Unit, and the Mammovan.

The Mammovan is a mobile mammography unit that travels to underserved areas of our State, providing mammograms to women in geographically isolated areas and those who may not otherwise seek this important preventative care that will allow for early detection and simply will save lives.

The First Person Care Clinic in Nevada also has a mobile health unit and is in the process of setting up a second one, which will expand access to primary care to more patients from Las Vegas, to Henderson, to Laughlin.

Recently, I had the opportunity to see firsthand the Mammovan in action, and I am proud of all of Nevada's health centers and the southern Nevada Health District who are leading the way in providing lifesaving mobile healthcare for Nevadans.

We must build off these success stories and ensure health centers across America can utilize mobile health units where they make sense to better serve their communities.

We must keep working to ensure that every American has access to healthcare they need and deserve; and that is why I encourage my colleagues to vote "yes" on this critical piece of legislation today.

Mr. GUTHRIE. Mr. Speaker, I yield 2 minutes to the gentleman from Georgia (Mr. CARTER), my Energy and Commerce Committee colleague.

Mr. CARTER of Georgia. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I rise today to express my support for S. 958, the companion

bill to H.R. 5141, the MOBILE Health Care Act.

As my colleagues have pointed out, community health centers across the country play a crucial role in ensuring rural and underserved communities have access to affordable, quality healthcare.

For more than 50 years, health centers have provided services to America's most vulnerable population and medically underserved communities. These centers are the healthcare home for nearly 29 million patients, including 9 million children and over 400,000 veterans.

The MOBILE Health Care Act that we are considering today would help these centers further expand their reach to the most rural areas of our country by giving them greater flexibility and allowing them to bring clinics even closer to the patients that they serve.

I understand the need for increasing access to health services and appreciate how beneficial health centers have proven to be in my district. Community health centers are an integral part of the healthcare safety net, and this bill will improve access to care for many of my constituents. I encourage my colleagues to support this bill.

Mr. GUTHRIE. Mr. Speaker, this is an important piece of legislation. I urge my colleagues to vote "yes," and I yield back the balance of my time.

Mr. PALLONE. Mr. Speaker, this is an important bill. It is bipartisan. I urge my colleagues to vote "yes," and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. KAHELE). The question is on the motion offered by the gentleman from New Jersey (Mr. PALLONE) that the House suspend the rules and pass the bill, S. 958.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the yeas have it.

Mr. TIFFANY. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this motion will be postponed.

INFORMING CONSUMERS ABOUT SMART DEVICES ACT

Mr. PALLONE. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 4081) to require the disclosure of a camera or recording capability in certain internet-connected devices, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 4081

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Informing Consumers about Smart Devices Act".

SEC. 2. REQUIRED DISCLOSURE OF A CAMERA OR RECORDING CAPABILITY IN CERTAIN INTERNET-CONNECTED DEVICES.

Each manufacturer of a covered device shall disclose whether the covered device manufactured by the manufacturer contains a camera or microphone as a component of the covered device.

SEC. 3. ENFORCEMENT BY THE FEDERAL TRADE COMMISSION.

(a) UNFAIR OR DECEPTIVE ACTS OR PRACTICES.—A violation of section 2 shall be treated as a violation of a rule defining an unfair or deceptive act or practice prescribed under section 18(a)(1)(B) of the Federal Trade Commission Act (15 U.S.C. 57a(a)(1)(B)).

(b) ACTIONS BY THE COMMISSION.—

(1) IN GENERAL.—The Federal Trade Commission shall prevent any person from violating this Act or a regulation promulgated under this Act in the same manner, by the same means, and with the same jurisdiction, powers, and duties as though all applicable terms and provisions of the Federal Trade Commission Act (15 U.S.C. 41 et seq.) were incorporated into and made a part of this Act.

(2) PENALTIES AND PRIVILEGES.—Any person who violates this Act or a regulation promulgated under this Act shall be subject to the penalties and entitled to the privileges and immunities provided in the Federal Trade Commission Act (15 U.S.C. 41 et seq.).

(c) COMMISSION GUIDANCE.—Not later than 180 days after the date of enactment of this Act, the Commission, through outreach to relevant private entities, shall issue guidance to assist manufacturers in complying with the requirements of this Act, including guidance about best practices for making the disclosure required by section 2 as clear and conspicuous as practicable.

(d) TAILORED GUIDANCE.—A manufacturer of a covered device may petition the Commission for tailored guidance as to how to meet the requirements of section 2.

(e) LIMITATION ON COMMISSION GUIDANCE.—No guidance issued by the Commission with respect to this Act shall confer any rights on any person, State, or locality, nor shall operate to bind the Commission or any person to the approach recommended in such guidance. In any enforcement action brought pursuant to this Act, the Commission shall allege a specific violation of a provision of this Act. The Commission may not base an enforcement action on, or execute a consent order based on, practices that are alleged to be inconsistent with any such guidelines, unless the Commission determines such practices expressly violate section 2.

SEC. 4. DEFINITION OF COVERED DEVICE.

As used in this Act, the term "covered device"—

(1) means a consumer product, as defined by section 3(a) of the Consumer Product Safety Act (15 U.S.C. 2052(a)) that is capable of connecting to the internet, a component of which is a camera or microphone; and

(2) does not include—

(A) a telephone (including a mobile phone), a laptop, tablet, or any device that a consumer would reasonably expect to have a microphone or camera;

(B) any device that is specifically marketed as a camera, telecommunications device, or microphone; or

(C) any device or apparatus described in sections 255, 716, and 718, and subsections (aa) and (bb) of section 303 of the Communications Act of 1934 (47 U.S.C. 255; 617; 619; and 303(aa) and (bb)), and any regulations promulgated thereunder.

SEC. 5. EFFECTIVE DATE.

This Act shall apply to all devices manufactured after the date that is 180 days after

the date on which guidance is issued by the Commission under section 3(c), and shall not apply to devices manufactured or sold before such date, or otherwise introduced into interstate commerce before such date.

SEC. 6. DETERMINATION OF BUDGETARY EFFECTS.

The budgetary effects of this Act, for the purpose of complying with the Statutory Pay-As-You-Go Act of 2010, shall be determined by reference to the latest statement titled "Budgetary Effects of PAYGO Legislation" for this Act, submitted for printing in the Congressional Record by the Chairman of the House Budget Committee, provided that such statement has been submitted prior to the vote on passage.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from New Jersey (Mr. PALLONE) and the gentleman from Kentucky (Mr. GUTHRIE) each will control 20 minutes.

The Chair recognizes the gentleman from New Jersey.

GENERAL LEAVE

Mr. PALLONE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on H.R. 4081.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. PALLONE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of H.R. 4081, the Informing Consumers About Smart Devices Act.

For consumers, the benefits of technological progress are all around us. Perhaps nowhere is this more apparent than in our homes. The growing array of smart devices and household appliances with voice, video, and internet connectivity and technology make our lives easier, more entertaining, and more comfortable.

So, while there is no question that smart refrigerators, home assistants like Amazon's Alexa, and the countless other internet-connected devices that have microphones or cameras benefit consumers, there is also no question that these devices should not be able to listen to or watch us without our knowledge or consent. Unfortunately, studies confirm that many devices do not disclose these capabilities. Some are easily tricked into recording when people do not want them to do so.

So H.R. 4081 addresses this straightforward problem with a straightforward solution. The bill requires manufacturers of internet-connected devices that are equipped with a camera or microphone to disclose to consumers that a camera or microphone is part of the device. The bill does not apply to mobile phones, laptops, or other devices that a consumer would already reasonably expect to include a camera or microphone.

Now, the Federal Trade Commission must issue guidance to help businesses comply with these new requirements and may seek penalties, including civil penalties, for violations.

This bill will protect consumers; and I commend Representatives CURTIS and

MOULTON for their bipartisan work on this legislation.

This bill is commonsense, balanced, and bipartisan. It is a solution to an issue that touches all Americans. It unanimously passed out of the Energy and Commerce Committee in July by a vote of 53-to-0 and is yet another example of the work the committee is doing to protect consumers. I hope that trend continues today here on the House floor because there is no reason why consumers should ever be spied on by their own household devices without their knowledge and consent.

So, Mr. Speaker, I urge all my colleagues to support this important consumer protection legislation, and I reserve the balance of my time.

Mr. GUTHRIE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in support of H.R. 4081, the Informing Consumers About Smart Devices Act, introduced by Representative CURTIS.

In the past few years, we have seen a tremendous advancement in the development of technologies in consumer products. While many of these technologies make everyday life more convenient, they also have the ability to collect data from their users without their knowledge.

While it may be apparent to users that a laptop has the ability to record conversations, it certainly may not be clear that other devices like televisions, refrigerators, even toasters, have the same capabilities.

This bipartisan legislation would simply require manufacturers of the internet-connected devices that contain a microphone or a camera, and that do not market themselves as such consumer electronics, to disclose to consumers that such a component is part of the device, either pre- or post-sale.

We owe it to our constituents to ensure these types of devices are not recording them without their consent and collecting data when their users are not aware.

I thank Representatives CURTIS and MOULTON for their bipartisan work on H.R. 4081.

Mr. Speaker, I urge all of my colleagues to support this legislation, and I reserve the balance of my time.

□ 1615

Mr. PALLONE. Mr. Speaker, I yield myself such time as I may consume.

I want to take this opportunity to talk about one of our key staff people who is leaving in the next few days. The person, of course, is Jerry Leverich, who is right behind me here.

Jerry has played an instrumental role in the committee's work, not only with consumer protection but on so many issues. Shortly after I became the top Democrat on the committee, more than 7 years ago, he started. He is currently the staff director for both our Subcommittee on Communications and Technology and our Subcommittee on Consumer Protection and Commerce.

Over these last 7 years since he has been here, he has played a critical role in our efforts to expand access to broadband nationwide, make internet service more affordable, and protect consumers from annoying robocalls.

I have to also say that if it wasn't for him, I don't know that I would be able to deal with a lot of technological issues in the committee or even explain a lot of what we are doing on the issues.

He led our efforts this summer, on the Democratic side, on passing out of committee for the first time the bicameral and bipartisan consumer data privacy bill, which we consider on both sides of the aisle a significant achievement. We are still working, obviously, to bring that to the House floor before the end of this session of Congress.

Mr. Speaker, I thank him for his counsel. I wish him nothing but the best in his future endeavors. Obviously, we don't want him to leave. I also want to say that not only is Jerry such an expert and so intelligent and wise on so many issues, but he is also a great individual and someone you can always rely on to be straightforward and tell us when we are doing good things, tell us when we are not, telling us when we can do things that are achievable and when they are not. Generally, overall, he has been a great staff member, so I thank him.

Mr. Speaker, I ask that we all support this legislation, and I yield back the balance of my time.

Mr. GUTHRIE. Mr. Speaker, I yield myself the balance of my time.

We wish Jerry Godspeed and thank him for the good work. I know sometimes when our staff leaves, it is bittersweet. We hate to see them go but know they are going to different opportunities. The hard work that both your side and our side of the aisle do together, sometimes when we are working on things together, sometimes negotiating together, it is always good work. We are well served. The American people, more than anything, are well served by the people who work here on Capitol Hill. I thank and congratulate Jerry.

Mr. Speaker, I urge passage of this legislation, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New Jersey (Mr. PALLONE) that the House suspend the rules and pass the bill, H.R. 4081, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. TIFFANY. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this motion will be postponed.

VISIT AMERICA ACT

Ms. SCHAKOWSKY. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 6965) to promote travel and tourism in the United States, and for other purposes, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 6965

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Visit America Act”.

SEC. 2. ASSISTANT SECRETARY FOR TRAVEL AND TOURISM.

Section 2(d) of the Reorganization Plan Numbered 3 of 1979 (93 Stat. 1382; 5 U.S.C. App.) is amended—

(1) by striking “There shall be in the Department two additional Assistant Secretaries” and inserting “(1) There shall be in the Department 3 additional Assistant Secretaries, including the Assistant Secretary of Commerce for Travel and Tourism,”; and

(2) by adding at the end the following:

“(2) The Assistant Secretary of Commerce for Travel and Tourism shall—

“(A) be appointed by the President, subject to the advice and consent of the Senate; and

“(B) report directly to the Under Secretary for International Trade.”.

SEC. 3. RESPONSIBILITIES OF THE ASSISTANT SECRETARY OF COMMERCE FOR TRAVEL AND TOURISM.

(a) **VISITATION GOALS.**—The Assistant Secretary of Commerce for Travel and Tourism (referred to in this section as the “Assistant Secretary”), appointed pursuant to section 2(d) of the Reorganization Plan Numbered 3 of 1979, as amended by section 2, shall—

(1) in consultation with relevant Federal agencies, establish an annual visitation goal, consistent with the goals of the travel and tourism strategy developed pursuant to section 4(1), for—

(A) the number of international visitors to the United States; and

(B) the value of travel and tourism commerce;

(2) develop recommendations for achieving the annual goals established pursuant to paragraph (1);

(3) ensure that travel and tourism policy is developed in consultation with—

(A) the Tourism Policy Council;

(B) the Secretary of State;

(C) the Secretary of Homeland Security;

(D) the National Travel and Tourism Office;

(E) Brand USA;

(F) the United States Travel and Tourism Advisory Board; and

(G) travel industry partners, including public and private destination marketing organizations, travel and tourism suppliers, and labor representatives from these industries;

(4) establish short-, medium-, and long-term timelines for implementing the recommendations developed pursuant to paragraph (2);

(5) conduct Federal agency needs assessments, in consultation with the Office of Management and Budget and other relevant Federal agencies, to identify the resources, statutory or regulatory changes, and private sector engagement needed to achieve the annual visitation goals; and

(6) provide assessments and recommendations to—

(A) the Committee on Commerce, Science, and Transportation of the Senate;

(B) the Committee on Energy and Commerce of the House of Representatives; and

(C) the public through a publicly accessible website.

(b) **DOMESTIC TRAVEL AND TOURISM.**—The Assistant Secretary, to the extent feasible, shall—

(1) evaluate, on an ongoing basis, domestic policy options for supporting competitiveness with respect to the strengths, weaknesses, and growth of the domestic travel industry;

(2) develop recommendations and goals to support and enhance domestic tourism, separated by business and leisure; and

(3) engage public and private stakeholders to support domestic tourism.

(c) **WORKFORCE.**—The Assistant Secretary shall—

(1) consult with the Secretary of Labor to develop strategies and best practices for improving the timeliness and reliability of travel and tourism workforce data;

(2) work with the Secretary of Labor and the Bureau of Economic Analysis to improve travel and tourism industry data; and

(3) provide recommendations for policy enhancements and efficiencies.

(d) **INTERNATIONAL BUSINESS TRAVEL FACILITATION.**—The Assistant Secretary, in coordination with relevant Federal agencies, shall work to increase and facilitate international business travel to the United States and ensure competitiveness by engaging in, at a minimum—

(1) facilitating large meetings, incentives, conferences, and exhibitions to be hosted in the United States;

(2) emphasizing rural and other destinations rich in cultural heritage or ecological tourism, among other uniquely American destinations, as locations for hosting international meetings, incentives, conferences, and exhibitions in the United States; and

(3) facilitating sports and recreation events and activities, which shall be hosted in the United States.

(e) **RECOVERY STRATEGY.**—

(1) **INITIAL RECOVERY STRATEGY.**—Not later than 1 year after amounts are appropriated to accomplish the purposes of this section, the Assistant Secretary, in consultation with public and private stakeholders identified in subsection (a)(3) and public health officials, shall develop and implement a COVID-19 public health emergency recovery strategy to assist the United States travel and tourism industry to quickly recover from the pandemic.

(2) **FUTURE RECOVERY STRATEGIES.**—After assisting in the implementation of the strategy developed pursuant to paragraph (1), the Assistant Secretary, in consultation with appropriate public and private stakeholders, shall develop additional recovery strategies for the travel and tourism industry in anticipation of other unforeseen catastrophic events that would significantly affect the travel and tourism industry, such as hurricanes, floods, tsunamis, tornadoes, terrorist attacks, and pandemics.

(3) **COST-BENEFIT ANALYSIS.**—In developing the COVID-19 public health emergency recovery strategy under paragraph (1) and additional recovery strategies for the travel and tourism industry under paragraph (2), the Assistant Secretary shall conduct cost-benefit analyses that take into account the health and economic effects of public health mitigation measures on the travel and tourism industry.

(f) **REPORTING REQUIREMENTS.**—

(1) **ASSISTANT SECRETARY.**—The Assistant Secretary shall produce an annual forecasting report on the travel and tourism industry, to the extent feasible, which shall include current and anticipated—

(A) domestic employment needs;

(B) international inbound volume and spending, taking into account the lasting ef-

fects of the COVID-19 public health emergency and the impact of the recovery strategy implemented pursuant to subsection (e)(1); and

(C) domestic volume and spending, including Federal and State public land travel and tourism data.

(2) **BUREAU OF ECONOMIC ANALYSIS.**—The Director of the Bureau of Economic Analysis should annually update, to the extent feasible, the Travel and Tourism Satellite Accounts, including—

(A) State level travel and tourism spending data;

(B) travel and tourism workforce data for full-time and part-time employment; and

(C) Federal and State public lands outdoor recreational activity and tourism spending data.

(3) **NATIONAL TRAVEL AND TOURISM OFFICE.**—The Director of the National Travel and Tourism Office—

(A) in partnership with the Bureau of Economic Analysis and other relevant Federal agencies, shall report international arrival and spending data on a regular monthly schedule, which shall be made available to the Travel and Tourism Advisory Board and to the public through a publicly available website; and

(B) shall include questions in the Survey of International Air Travelers regarding wait-times, visits to public lands, and State data, to the extent applicable.

SEC. 4. TRAVEL AND TOURISM STRATEGY.

Not less frequently than once every 10 years, the Secretary of Commerce, in consultation with the United States Travel and Tourism Advisory Board, the Tourism Policy Council, the Secretary of State, and the Secretary of Homeland Security, shall develop and submit to Congress a 10-year travel and tourism strategy, which shall include—

(1) the establishment of goals with respect to the number of annual international visitors to the United States and the annual value of travel and tourism commerce in the United States during such 10-year period;

(2) the resources needed to achieve the goals established pursuant to paragraph (1); and

(3) recommendations for statutory or regulatory changes that would be necessary to achieve such goals.

SEC. 5. UNITED STATES TRAVEL AND TOURISM ADVISORY BOARD.

Section 3 of the Act of July 19, 1940, entitled “An Act to encourage travel in the United States, and for other purposes” (15 U.S.C. 1546) is amended—

(1) by striking “SEC. 3” and all that follows through “The Secretary of the Interior is authorized” and inserting the following:

“SEC. 3. UNITED STATES TRAVEL AND TOURISM ADVISORY BOARD; ADVISORY COMMITTEE.

“(a) **UNITED STATES TRAVEL AND TOURISM ADVISORY BOARD.**—

“(1) **IN GENERAL.**—There is established the United States Travel and Tourism Advisory Board (referred to in this subsection as the ‘Board’), the members of which shall be appointed by the Secretary of Commerce for 2-year terms from among companies and organizations in the travel and tourism industry.

“(2) **EXECUTIVE DIRECTOR.**—The Assistant Secretary for Travel and Tourism shall serve as the Executive Director of the Board.

“(3) **EXECUTIVE SECRETARIAT.**—The Director of the National Travel and Tourism Office of the International Trade Administration shall serve as the Executive Secretariat for the Board.

“(4) **FUNCTIONS.**—The Board’s Charter shall specify that the Board will—

“(A) serve as the advisory body to the Secretary of Commerce on matters relating to

the travel and tourism industry in the United States;

“(B) advise the Secretary of Commerce on Government policies and programs that affect the United States travel and tourism industry;

“(C) offer counsel on current and emerging issues;

“(D) provide a forum for discussing and proposing solutions to problems related to the travel and tourism industry; and

“(E) provide advice regarding the domestic travel and tourism industry as an economic engine.

“(5) RECOVERY STRATEGY.—The Board shall assist the Assistant Secretary in the development and implementation of the COVID-19 public health emergency recovery strategy required under section 3(e)(1) of the Visit America Act.

“(b) ADVISORY COMMITTEE FOR PROMOTION OF TOURIST TRAVEL.—The Secretary of Commerce is authorized”; and

(2) by striking “the Secretary of the Interior to serve” and inserting “the Secretary of Commerce to serve”.

SEC. 6. DATA ON DOMESTIC TRAVEL AND TOURISM.

The Secretary of Commerce, subject to the availability of appropriations, shall collect and make public aggregate data on domestic travel and tourism trends.

SEC. 7. COMPLETION OF PROCEEDING.

If the Secretary of Commerce has, before the date of the enactment of this Act, taken action that in whole or in part implements this Act or the amendments made by this Act, the Secretary is not required to revisit such action, but only to the extent such action is consistent with this Act and the amendments made by this Act.

SEC. 8. DEFINED TERM.

In this Act, the term “COVID-19 public health emergency”—

(1) means the public health emergency first declared on January 31, 2020, by the Secretary of Health and Human Services under section 319 of the Public Health Service Act (42 U.S.C. 247d) with respect to COVID-19; and

(2) includes any renewal of such declaration pursuant to such section 319.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from Illinois (Ms. SCHAKOWSKY) and the gentleman from Kentucky (Mr. GUTHRIE) each will control 20 minutes.

The Chair recognizes the gentlewoman from Illinois.

GENERAL LEAVE

Ms. SCHAKOWSKY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on H.R. 6965.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Illinois?

There was no objection.

Ms. SCHAKOWSKY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of H.R. 6965, the Visit America Act.

Since the beginning of the COVID pandemic, America's travel and tourism industry has been seriously upended. The pandemic caused a 48 percent reduction for the industry in 2020. The bipartisan Visit America Act is the latest bill that the House has brought to the floor to help turn the tide for a sec-

tor that has not rebounded as quickly as some others.

From the Committee on Energy and Commerce, we are so happy that we are able to bring this to the floor.

While travel has certainly increased over the last year, it is still significantly lower than previously before the pandemic. As an example, business travel spending is on the rise, but it is still expected to be 50 percent below 2019 levels. In the meantime, the number of travelers visiting the United States from overseas fell by 79 percent in September 2021 as compared to that same month in 2019.

These are significant reductions that are impacting not only companies directly involved in the tourism and travel industry but small businesses all across the Nation that rely on travelers to keep them in business.

Today, the United States is the only G20 country not to have a high-ranking official focusing on the travel and tourism industry. This has prevented the industry from producing a coordinated approach to recovery of the industry and to make us more competitive with the rest of the world.

H.R. 6965 addresses this deficiency and provides the industry with a path forward for continuing recovery and growth in the future. This bill establishes the role of the assistant secretary of commerce for travel and tourism at the Department of Commerce. It also requires the assistant secretary to develop and implement a COVID-19 pandemic recovery strategy, as well as strategic plans for future disruptions that hopefully we aren't going to see.

The bill also requires the Department of Commerce to develop a 10-year travel and tourism strategy, as well as provides statutory authority for the United States Travel and Tourism Advisory Board, which will aid the assistant secretary in developing and implementing these important strategies.

H.R. 6965 passed out of the Committee on Energy and Commerce last week unanimously, 56-0. I commend the tireless and passionate efforts put forth by Representative TITUS, the author of this legislation. Without her and the good work done by Representatives SOTO, CASE, KUSTER, and the late Don Young—God bless his heart—we would not have gotten this agenda done. I also thank Chairmen NADLER and MEEKS for working with us to get this to the House floor today.

I know the Senate has also been working on travel and tourism legislation and is moving forward with a package of bills that includes the Visit America Act. Although there are some technical differences between the two bills, my hope is that we can get together and work together as quickly as possible and get this legislation passed.

Mr. Speaker, I urge all of my colleagues to support this legislation, and I reserve the balance of my time.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON THE JUDICIARY,
Washington, DC, September 23, 2022.

Hon. FRANK PALLONE, Jr.
*Chairman, Committee on Energy and Commerce,
House of Representatives, Washington, DC.*

DEAR CHAIRMAN PALLONE: This letter is to advise you that the Committee on the Judiciary has now had an opportunity to review the provisions in H.R. 6965, the “Visit America Act,” that fall within our Rule X jurisdiction. I appreciate your consulting with us on those provisions. The Judiciary Committee is willing to forgo action on H.R. 6965, with the understanding that we do not thereby waive any future jurisdictional claim over those provisions or their subject matters.

In the event a House-Senate conference on this or similar legislation is convened, the Judiciary Committee reserves the right to request an appropriate number of conferees to address any concerns with these or similar provisions that may arise in conference.

Please place this letter into the Congressional Record during consideration of the measure on the House floor. Thank you for the cooperative spirit in which you have worked regarding this matter and others between our committees.

Sincerely,

JERROLD NADLER,
Chairman.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON ENERGY AND COMMERCE,
Washington, DC, September 23, 2022.

Hon. JERROLD NADLER,
*Chairman, Committee on the Judiciary,
Washington, DC.*

DEAR CHAIRMAN NADLER: Thank you for consulting with the Committee on Energy and Commerce and agreeing to be discharged from further consideration of H.R. 6965, the “Visit America Act,” so that the bill may proceed expeditiously to the House floor.

I agree that your forgoing further action on this measure does not in any way diminish or alter the jurisdiction of your Committee or prejudice its jurisdictional prerogatives on this measure or similar legislation in the future. I would support your effort to seek appointment of an appropriate number of conferees from your committee to any House-Senate conference on this legislation.

I will place our letters into the Congressional Record during consideration of the measure on the House floor. I appreciate your cooperation regarding this legislation and look forward to continuing to work together as this measure moves through the legislative process.

Sincerely,

FRANK PALLONE, Jr.,
Chairman.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON FOREIGN AFFAIRS,
Washington, DC, September 26, 2022.

Hon. FRANK PALLONE, Jr.,
*Chair, Committee on Energy and Commerce,
House of Representatives, Washington, DC.*

DEAR CHAIR PALLONE: In recognition of the desire to expedite consideration of H.R. 6965, the “Visit America Act,” the Committee on Foreign Affairs agrees to waive formal consideration of the bill as to provisions that fall within the rule X jurisdiction of the Committee on Foreign Affairs.

The Committee on Foreign Affairs takes this action with the mutual understanding that we do not waive any jurisdiction over the subject matter contained in this or similar legislation, and the Committee will be appropriately consulted and involved as the bill or similar legislation moves forward so that we may address any issues within our

jurisdiction. I ask you to support the appointment of Committee on Foreign Affairs conferees during any House-Senate conference convened on this legislation.

Finally, thank you for agreeing to include a copy of our exchange of letters in the Congressional Record during floor consideration of H.R. 6965.

Sincerely,

GREGORY W. MEEKS,
Chairman.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON ENERGY AND COMMERCE,
Washington, DC, September 27, 2022.

Hon. GREGORY W. MEEKS,
Chairman, Committee on Foreign Affairs,
Washington, DC.

DEAR CHAIRMAN MEEKS: Thank you for consulting with the Committee on Energy and Commerce and agreeing to be discharged from further consideration of H.R. 6965, the "Visit America Act," so that the bill may proceed expeditiously to the House floor.

I agree that your forgoing further action on this measure does not in any way diminish or alter the jurisdiction of your Committee or prejudice its jurisdictional prerogatives on this measure or similar legislation in the future. I would support your effort to seek appointment of an appropriate number of conferees from your committee to any House-Senate conference on this legislation.

I will place our letters into the Congressional Record during consideration of the measure on the House floor. I appreciate your cooperation regarding this legislation and look forward to continuing to work together as this measure moves through the legislative process.

Sincerely,

FRANK PALLONE, Jr.,
Chairman.

Mr. GUTHRIE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 6965, the Visit America Act.

The bill along with H.R. 7820, the Travel and Tourism Act, from Representative DUNN, and H.R. 4594, the Restoring Brand USA Act, from Representative BILIRAKIS, have represented bipartisan efforts to assist our tourism sector with economic recovery post-COVID-19.

Representative BILIRAKIS is not here speaking about this bill. He is home in Tampa, Florida, and represents the Tampa Bay area, as all of us know. Mr. Speaker, our thoughts and prayers are with his community in Florida and the other States that have to deal with the remnants of the rain. Our thoughts and prayers are with them.

Back to the bill, while I am pleased that Representative BILIRAKIS' Brand USA legislation was signed into law this year, more work and bipartisan efforts are needed to build upon Representative BILIRAKIS' efforts to increase tourism.

Without question, the COVID-19 pandemic was difficult for all industries, but the travel and tourism industry was hit especially hard.

According to testimony by the U.S. Travel Association before the Subcommittee on Consumer Protection and Commerce, at the end of 2021, international travel spending was 78 percent below prepandemic levels.

This bipartisan legislation can support the U.S. travel and tourism indus-

try and address the declining percentage of international visitors to the United States. The Visit America Act will help by directing the Department of Commerce to develop a 10-year travel and tourism strategy with annual goals for the number of international visitors to the United States.

Again, I thank the sponsors and co-sponsors of all of these bills that we have considered at the Committee on Energy and Commerce. I would like to give special recognition to our colleague, Representative BILIRAKIS, the ranking member of the Subcommittee on Consumer Protection and co-chair of the Congressional Travel and Tourism Caucus, who, as I noted, is back home, duly focusing on the hurricane response and serving his constituents.

Mr. Speaker, I urge my colleagues to support this bill, and I reserve the balance of my time.

Ms. SCHAKOWSKY. Mr. Speaker, I yield 2 minutes to the gentleman from Hawaii (Mr. CASE).

Mr. CASE. Mr. Speaker, I rise today in strong support of H.R. 6965, the Visit America Act.

U.S. travel and tourism is one of our country's core industries. Pre-COVID, it generated some \$2.6 trillion in annual economic output, was one of our largest export and service industries, and supported fully 1 in 10 U.S. jobs. In many States, my own Hawaii being a prime example, it is our leading industry.

□ 1630

But COVID taught us in spades how fragile this economic and jobs generator can be. Very frankly, it has never earned full respect in terms of Federal Government attention, focus, and support, given its prominence.

U.S. travel and tourism needs and deserves far more. This bill, in which I am joined by the gentlewoman from Nevada (Ms. TITUS), the gentleman from Florida (Mr. BILIRAKIS), our House Travel and Tourism Caucus, and other colleagues, in addition to all aspects of the industry, is a necessary start on a new chapter through a coordinated, high-level Federal effort, including a 10-year travel and tourism strategy and finally, finally, like other countries, an Assistant Secretary of Commerce for Travel and Tourism.

Mr. Speaker, I strongly urge its passage.

Mr. GUTHRIE. Mr. Speaker, I yield myself the balance of my time to close.

Mr. Speaker, we have the greatest country in the world. I love when people want to come see the beauty of our great land and meet our great people. We have a wonderful opportunity for people to come see our country. The tourism industry is a great industry, as are the people who serve in it.

Mr. Speaker, I urge the passage of this bill, and I yield back the balance of my time.

Ms. SCHAKOWSKY. Mr. Speaker, I urge everyone to support this legislation because it is so important, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from Illinois (Ms. SCHAKOWSKY) that the House suspend the rules and pass the bill, H.R. 6965, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. TIFFANY. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this motion will be postponed.

CREDIT UNION BOARD MODERNIZATION ACT

Ms. WATERS. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 6889) to mend the Federal Credit Union Act to modify the frequency of board of directors meetings, and for other purposes, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 6889

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Credit Union Board Modernization Act".

SEC. 2. FREQUENCY OF BOARD OF DIRECTORS MEETINGS.

Section 113 of the Federal Credit Union Act (12 U.S.C. 1761b) is amended—

(1) by striking "monthly" each place such term appears;

(2) in the matter preceding paragraph (1), by striking "The board of directors" and inserting the following:

"(a) IN GENERAL.—The board of directors";

(3) in subsection (a) (as so designated), by striking "shall meet at least once a month and"; and

(4) by adding at the end the following:

"(b) MEETINGS.—The board of directors of a Federal credit union shall meet as follows:

"(1) With respect to a de novo Federal credit union, not less frequently than monthly during each of the first five years of the existence of such Federal credit union.

"(2) Not less than six times annually, with at least one meeting held during each fiscal quarter, with respect to a Federal credit union—

"(A) with composite rating of either 1 or 2 under the Uniform Financial Institutions Rating System (or an equivalent rating under a comparable rating system); and

"(B) with a capability of management rating under such composite rating of either 1 or 2.

"(3) Not less frequently than once a month, with respect to a Federal credit union—

"(A) with composite rating of either 3, 4, or 5 under the Uniform Financial Institutions Rating System (or an equivalent rating under a comparable rating system); or

"(B) with a capability of management rating under such composite rating of either 3, 4, or 5.".

SEC. 3. DETERMINATION OF BUDGETARY EFFECTS.

The budgetary effects of this Act, for the purpose of complying with the Statutory Pay-As-You-Go Act of 2010, shall be determined by reference to the latest statement titled "Budgetary Effects of PAYGO Legislation" for this Act, submitted for printing in

the Congressional Record by the Chairman of the House Budget Committee, provided that such statement has been submitted prior to the vote on passage.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from California (Ms. WATERS) and the gentleman from Wisconsin (Mr. STEIL) each will control 20 minutes.

The Chair recognizes the gentlewoman from California.

GENERAL LEAVE

Ms. WATERS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and insert extraneous material thereon.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from California?

There was no objection.

Ms. WATERS. Mr. Speaker, I yield myself such time as I may consume.

First, I thank the gentleman from California (Mr. VARGAS) for offering H.R. 6889, the Credit Union Board Modernization Act.

This bipartisan bill would revise Federal credit union board meeting requirements to bring highly rated Federal credit unions in line with State credit union charter requirements in 17 States, including my home State of California.

Under this bill, Federal credit unions that are highly rated by their regulator, including a highly rated management team, would be required to meet at least six times annually, with at least one meeting held during each fiscal quarter. This would be a reduction from the current requirement to meet monthly.

To ensure stability and mitigate the risk of institutional failure, there are important safeguards included in the bill. For example, de novo or new Federal credit union boards would still be required to meet at least monthly during the first 5 years of receiving a charter, as well as Federal credit unions that have received low exam ratings.

Additionally, if emergencies or issues arise requiring a board meeting, nothing in the bill prevents Federal credit unions from meeting more frequently.

Credit unions and consumer groups support H.R. 6889, including the California and Nevada Credit Union Leagues, Americans for Financial Reform, and Center for Responsible Lending.

Mr. Speaker, I urge Members to support this bill as well, and I reserve the balance of my time.

Mr. STEIL. Mr. Speaker, I yield myself such time as I may consume.

I rise in support of H.R. 6889, the Credit Union Board Modernization Act.

I thank the gentlewoman from California (Ms. WATERS), the chairwoman of the Financial Services Committee, as well as the gentleman from California (Mr. VARGAS) for introducing this legislation, and the gentleman from Ohio (Mr. GONZALEZ) for cosponsoring.

The commonsense bill will modernize credit union practices while ensuring

the safety and soundness of Federal credit unions.

H.R. 6889 would amend the Federal Credit Union Act to revise the frequency of meetings that a Federal credit union's board of directors is required to hold.

Specifically, the bill requires monthly meetings for de novo Federal credit unions during the first 5 years of existence. Highly rated credit unions, 1 or 2 CAMELS rating, with high management ratings, must hold at least six meetings annually, with at least one meeting held during each fiscal quarter. Lower rated credit unions, 3, 4 or 5 CAMELS, must continue meeting once a month.

This is a change from current law, which requires all Federal credit union boards to meet at least once a month. This meeting requirement can be burdensome for credit union staff and their volunteer board members. This is especially true for smaller credit unions and for those with few employees or those located in rural areas.

The resources needed to run monthly board meetings shift valuable employee and board member time and focus away from services that credit unions provide to their consumers.

Commonsense, regulatory rightsizing bills like this one help American families by reducing costs and the challenges associated with accessing financial services.

H.R. 6889 is a strong, bipartisan bill that protects the safety and soundness of credit unions. It also illustrates how Members can come together to create nonpartisan legislation, modernizing outdated practices and policies. I look forward to working with my colleagues across the aisle to meaningfully support our community financial institutions.

Mr. Speaker, I reiterate to my colleagues that H.R. 6889 is commonsense legislation that will modernize credit unions.

Mr. Speaker, I urge my colleagues to support the bill, and I yield back the balance of my time.

Ms. WATERS. Mr. Speaker, I yield myself the balance of my time to close.

H.R. 6889 will incentivize Federal credit union boards to ensure their institutions are highly rated and well run in order to reduce the number of board meetings they need to hold.

I therefore urge Members to support H.R. 6889, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from California (Ms. WATERS) that the House suspend the rules and pass the bill, H.R. 6889, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. FULCHER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further pro-

ceedings on this motion will be postponed.

BANKING TRANSPARENCY FOR SANCTIONED PERSONS ACT OF 2021

Ms. WATERS. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2710) to increase transparency with respect to financial services benefiting state sponsors of terrorism, human rights abusers, and corrupt officials, and for other purposes, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 2710

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Banking Transparency for Sanctioned Persons Act of 2021".

SEC. 2. REPORT ON FINANCIAL SERVICES BENEFITTING STATE SPONSORS OF TERRORISM, HUMAN RIGHTS ABUSERS, AND CORRUPT OFFICIALS.

(a) IN GENERAL.—Not later than 180 days after the date of the enactment of this Act, and every 180 days thereafter, the Secretary of the Treasury shall issue a report to the Committees on Financial Services and Foreign Affairs of the House of Representatives and the Committees on Banking, Housing, and Urban Affairs and Foreign Relations of the Senate that includes a copy of any license issued by the Secretary in the preceding 180 days that authorizes a United States financial institution (as defined under section 561.309 of title 31, Code of Federal Regulations) to provide financial services benefitting—

(1) a state sponsor of terrorism; or

(2) a person sanctioned pursuant to any of the following:

(A) Section 404 of the Russia and Moldova Jackson-Vanik Repeal and Sergei Magnitsky Rule of Law Accountability Act of 2012 (Public Law 112-208).

(B) Subtitle F of title XII of the National Defense Authorization Act for Fiscal Year 2017 (Public Law 114-328, the Global Magnitsky Human Rights Accountability Act).

(C) Executive Order No. 13818.

(b) FORM OF REPORT.—The report required under subsection (a) shall be submitted in unclassified form but may contain a classified annex.

SEC. 3. SUNSET.

The reporting requirement under this Act shall terminate on the date that is the end of the 7-year period beginning on the date of the enactment of this Act.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from California (Ms. WATERS) and the gentleman from Wisconsin (Mr. STEIL) each will control 20 minutes.

The Chair recognizes the gentlewoman from California.

GENERAL LEAVE

Ms. WATERS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and insert extraneous material thereon.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from California?

There was no objection.

Ms. WATERS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 2710, the Banking Transparency for Sanctioned Persons Act of 2021.

This legislation requires the Secretary of the Treasury to report to Congress semiannually with a copy of any license Treasury issues in the preceding 180 days that authorizes a U.S. financial institution to provide services benefitting a state sponsor of terrorism and certain other sanctioned entities, including human rights abusers and corrupt officials. It would sunset 7 years after enactment of the act.

I am supportive of the disclosure requirements in this bill because I believe that this after-the-fact reporting to congressional committees regarding these specific licenses can serve as a useful oversight tool.

When the Office of Foreign Assets Control, or OFAC, issues a specific license, it allows a particular individual or entity to engage in a transaction that would otherwise be prohibited under a United States sanctions program. Typically, specific licenses are granted by OFAC when the person or entity requesting such a license makes clear that allowing for the permitted transactions serves a compelling public policy goal. But currently, Treasury does not release specific licenses granted to individuals or entities or any information about them.

OFAC's licensing authority is an important part of an effective administration of United States sanctions, and disclosure is an important part of Congress' ability to conduct effective oversight.

Now, there is a risk that if some licenses were to become public, they would disclose commercially sensitive information to potential market competitors, introducing issues of corporate theft and unfair competition. That is why the bill allows for sensitive information in these licenses to be included in a classified annex to the report. Moving forward, we may want to examine whether this provides sufficient protection for proprietary or commercially sensitive information submitted by private-sector representatives which may not be classified and, if publicly released, would allow potential market competitors to gain an unfair competitive advantage. We certainly do not want to create a chilling effect and a wariness on behalf of companies about continuing to file for licenses moving forward, and we should guard against that.

Mr. Speaker, ultimately, I support the underlying goal and the disclosure requirements of H.R. 2710 because I believe they will increase congressional oversight of United States' sanctions activity. I urge my colleagues to do the same, and I reserve the balance of my time.

Mr. STEIL. Mr. Speaker, I yield myself such time as I may consume.

I thank the Chairwoman of the Financial Services Committee, the gen-

tlewoman from California (Ms. WATERS), for bringing the bill to the floor today.

I rise in strong support of H.R. 2710, the Banking Transparency for Sanctioned Persons Act. This bill that I authored represents an important step forward for oversight of the Treasury Department's sanctions program.

Under current law, Treasury may issue licenses through its Office of Foreign Assets Control, authorizing U.S. financial institutions to engage in transactions that would otherwise be prohibited. These licenses typically allow for the facilitation of trade in humanitarian and agricultural goods such as medicines and food.

H.R. 2710 requires the administration to inform Congress that certain financial services-related licenses have been improved when they involve state sponsors of terrorism or others sanctioned for human rights abuses.

While OFAC may have good reasons to issue a license, it is essential for Congress to be aware of bad actors' access to our financial system. Though some OFAC licenses are made public, others are not disclosed or even their existence may be unknown to Congress.

By requiring a semiannual report on these licenses, my bill would make the disclosure of OFAC's actions more consistent with congressional notification procedures for other sanctions waivers. Without this knowledge, Congress is limited in its ability to oversee the implementation of sanctions.

□ 1645

I am pleased to note that our colleagues on the other side of the aisle have long supported this oversight, and they have provided helpful input as we have developed this important legislation.

Mr. Speaker, let me conclude by noting that our majority support for this measure is reflective of a strong spirit of bipartisanship on the Committee on Financial Services when it comes to safeguarding our national security.

While we may not agree on everything, our Members have been extremely productive in advancing our national security interests while maintaining a vibrant financial system. It is important to have a government that is accountable, and this bill brings needed accountability to our sanctions enforcement efforts.

Mr. Speaker, I urge my colleagues to support H.R. 2710, and I reserve the balance of my time.

Ms. WATERS. Mr. Speaker, I have no further speakers, and I am prepared to close.

Mr. Speaker, I reserve the balance of my time.

Mr. STEIL. Mr. Speaker, I simply close by urging my colleagues to support this bill, and I yield back the balance of my time.

Ms. WATERS. Mr. Speaker, I yield myself the balance of my time.

Mr. Speaker, the Banking Transparency for Sanctioned Persons Act of

2021 will help ensure that Members of Congress have the information they need to provide more effective oversight of the decisions made by Treasury and OFAC and the impact that those decisions have on sanctioned persons.

I thank Mr. STEIL for bringing this measure forward, and I urge my colleagues to join me in supporting this bill.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from California (Ms. WATERS) that the House suspend the rules and pass the bill, H.R. 2710, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

AMENDING THE DELAWARE WATER GAP NATIONAL RECREATION AREA IMPROVEMENT ACT TO EXTEND THE EXCEPTION TO THE CLOSURE OF CERTAIN ROADS WITHIN THE RECREATION AREA FOR LOCAL BUSINESSES, AND FOR OTHER PURPOSES

Ms. TLAIB. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 6364) to amend the Delaware Water Gap National Recreation Area Improvement Act to extend the exception to the closure of certain roads within the Recreation Area for local businesses, and for other purposes, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 6364

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. USE OF CERTAIN ROADS WITHIN THE DELAWARE WATER GAP NATIONAL RECREATION AREA.

Section 4(b) of the Delaware Water Gap National Recreation Area Improvement Act (Public Law 109-156; 119 Stat. 2948) is amended in the matter preceding paragraph (1), by striking "Until" and all that follows through "subsection (a)" and inserting "Until September 30, 2026, subsection (a))".

SEC. 2. DETERMINATION OF BUDGETARY EFFECTS.

The budgetary effects of this Act, for the purpose of complying with the Statutory Pay-As-You-Go Act of 2010, shall be determined by reference to the latest statement titled "Budgetary Effects of PAYGO Legislation" for this Act, submitted for printing in the Congressional Record by the Chairman of the House Budget Committee, provided that such statement has been submitted prior to the vote on passage.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from Michigan (Ms. TLAIB) and the gentleman from Idaho (Mr. FULCHER) each will control 20 minutes.

The Chair recognizes the gentlewoman from Michigan.

GENERAL LEAVE

Ms. TLAIB. Mr. Speaker, I ask unanimous consent that all Members may

have 5 legislative days in which to revise and extend their remarks and include additional material on the measure under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Ms. TLAIB. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in strong support of H.R. 6364 introduced by my colleague, Representative MATT CARTWRIGHT. This bill will amend the Delaware Water Gap National Recreation Area Improvement Act to extend the use of Highway 209 within the recreation area until 2026.

Mr. Speaker, in 1981, the section of Highway 209 that runs through the recreation area was transferred from the State to the National Park Service.

In 1983, Congress enacted a provision of law that closed that section of Highway 209 to commercial traffic, with an important exception for vehicles serving businesses located in or adjacent to the recreation area. Since then, the United States Congress has extended the exemption multiple times, with the latest exemption set to expire on September 30 of this year.

Mr. Speaker, without this exemption, commercial vehicles have limited acceptable alternatives. Commercial traffic would have to travel a minimum of 10 extra miles to avoid the recreation area.

This permitted access contributes to economic vitality that impacts that community, the public safety, and the quality of life of the park's adjacent communities.

I, again, thank my good colleague, Representative CARTWRIGHT, for introducing this important legislation and championing this bill on behalf of his constituents.

Mr. Speaker, I urge my colleagues to vote "yes" on this bill, and I reserve the balance of my time.

Mr. FULCHER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 6364 would extend the use of U.S. Route 209, a Federally owned road within the boundaries of the Delaware Water Gap National Recreation Area for commercial vehicles in 2026.

While I support this bill today due to the public safety issues involved, I would note that the bill was brought to the House floor prior to the committee requesting technical assistance from the National Park Service.

At legislative hearing on this bill, the National Park Service requested the opportunity to work with the committee on a technical edit to the public law referenced in the bill. Instead of waiting for administrative feedback, the bill was rushed to the floor, and as a result, may fail to achieve its goal of actually enhancing public safety.

Legislation placed on the suspension calendar should be thoroughly vetted to ensure it will execute correctly and achieve desired outcomes. I urge my

colleagues on the other side of the aisle to work with us to ensure that legislation considered on the floor is fully vetted in the future.

Mr. Speaker, that said, I support this bill, and I reserve the balance of my time.

Ms. TLAIB. Mr. Speaker, I yield such time as he may consume to the gentleman from Pennsylvania (Mr. CARTWRIGHT), the main sponsor of the bill.

Mr. CARTWRIGHT. Mr. Speaker, I thank the gentlewoman from Michigan for the opportunity to speak about this important bill, H.R. 6364, which would extend the use of Federally owned portions of Highway 209 by certain commercial vehicles serving northeastern Pennsylvania small businesses.

The Delaware Water Gap National Recreation Area stretches across Pennsylvania and New Jersey, preserving 70,000 acres of land on both sides of the Delaware River.

Highway 209, which runs through Pennsylvania northwards into New York, cuts directly through the middle of this national recreation area. Up until the 1980s, there was heavy truck traffic all along Route 209, a heavily trafficked truck route.

In 1981, the National Park Service received jurisdiction over the section of Route 209 within that national recreation area. Then 2 years later, the 1983 Supplemental Appropriations Act closed this Federally owned segment of Highway 209 to all commercial traffic, with one exception: for light commercial vehicles serving businesses or people located in, or along, the boundaries of the national recreation area.

Since then, this limited exemption for commercial vehicles has been reauthorized by Congress multiple times on a bipartisan basis. In fact, former Pennsylvania Republican Representative Tom Marino and I co-led this same bill in 2018, this commercial vehicle exemption, that passed this body by voice vote and was signed into law by former President Trump. When that exemption expired last year, Congress included a short 1-year extension in the FY22 omnibus bill.

Mr. Speaker, that exemption expires the day after tomorrow, September 30. If Congress fails to renew the exemption, commercial traffic in northeastern Pennsylvania will be faced with limited acceptable alternatives. Commercial vehicles based in places like Monroe and Pike counties, in my district, would have to travel, as the gentlewoman mentioned, an extra 10 miles to avoid the Delaware Water Gap National Recreation Area, and small businesses locally would be hurt needlessly.

Mr. Speaker, that is why I have introduced H.R. 6364, which would simply extend the existing commercial vehicle exemption until September 30, 2026.

With this extension, qualifying commercial vehicles will be allowed to continue using the Federally owned portion of Route 209, with an annual permit.

My bill would also ensure that emergency vehicles and school buses could continue utilizing sections of Highway 209 within the boundaries of the Delaware Water Gap National Recreation Area, toll-free.

This is a commonsense bipartisan piece of legislation that is not only supported by the National Park Service and local officials but is also broadly supported here in the House, having passed unanimously out of the House Committee on Natural Resources in July.

Mr. Speaker, I will say, despite what my friend across the aisle has said, the National Park Service has confirmed that the exemption authorized under this bill poses no safety concerns.

On behalf of the entire Commonwealth, I thank Pennsylvania Republican Representatives MEUSER and FITZPATRICK for cosponsoring this bill, as well as Senators TOOMEY and CASEY, who are championing this very same measure in the Senate.

This legislation would go a long way toward protecting northeastern Pennsylvania small businesses and our regional economy, and so it is gratifying to see that we have bipartisan support for it again.

Mr. Speaker, I urge my colleagues on both sides of the aisle to vote for the bill.

Mr. FULCHER. Mr. Speaker, I urge adoption of the bill, and I yield back the balance of my time.

Ms. TLAIB. Mr. Speaker, I urge my colleagues to support this legislation, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from Michigan (Ms. TLAIB) that the House suspend the rules and pass the bill, H.R. 6364, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GILT EDGE MINE CONVEYANCE ACT

Ms. TLAIB. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1638) to direct the Secretary of Agriculture to transfer certain National Forest System land to the State of South Dakota, and for other purposes, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 1638

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Gilt Edge Mine Conveyance Act".

SEC. 2. DEFINITIONS.

In this Act:

(1) **FEDERAL LAND.**—The term "Federal land" means all right, title, and interest of

the United States in and to approximately 266 acres of National Forest System land within the Gilt Edge Mine Superfund Boundary, as generally depicted on the map.

(2) MAP.—The term “map” means the map entitled “Gilt Edge Mine Conveyance Act” and dated August 20, 2020.

(3) SECRETARY.—The term “Secretary” means the Secretary of Agriculture, acting through the Chief of the Forest Service.

(4) STATE.—The term “State” means State of South Dakota.

SEC. 3. LAND CONVEYANCE.

(a) IN GENERAL.—Subject to the terms and conditions described in this Act, if the State submits to the Secretary an offer to acquire the Federal land for the market value, as determined by the appraisal under subsection (c), the Secretary shall convey the Federal land to the State.

(b) TERMS AND CONDITIONS.—The conveyance under subsection (a) shall be—

(1) subject to valid existing rights;

(2) made by quitclaim deed; and

(3) subject to any other terms and conditions as the Secretary considers appropriate to protect the interests of the United States.

(c) APPRAISAL.—

(1) IN GENERAL.—After the State submits an offer under subsection (a), the Secretary shall complete an appraisal to determine the market value of the Federal land.

(2) STANDARDS.—The appraisal under paragraph (1) shall be conducted in accordance with—

(A) the Uniform Appraisal Standards for Federal Land Acquisitions; and

(B) the Uniform Standards of Professional Appraisal Practice.

(d) MAP.—

(1) AVAILABILITY OF MAP.—The map shall be kept on file and available for public inspection in the appropriate office of the Forest Service.

(2) CORRECTION OF ERRORS.—The Secretary may correct any errors in the map.

(e) CONSIDERATION.—As consideration for the conveyance under subsection (a), the State shall pay to the Secretary an amount equal to the market value of the Federal land, as determined by the appraisal under subsection (c).

(f) SURVEY.—The State shall prepare a survey that is satisfactory to the Secretary of the exact acreage and legal description of the Federal land to be conveyed under subsection (a).

(g) COSTS OF CONVEYANCE.—As a condition on the conveyance under subsection (a), the State shall pay all costs associated with the conveyance, including the cost of—

(1) the appraisal under subsection (c); and

(2) the survey under subsection (f).

(h) PROCEEDS FROM THE SALE OF LAND.—Any proceeds received by the Secretary from the conveyance under subsection (a) shall be—

(1) deposited in the fund established under Public Law 90-171 (commonly known as the “Sisk Act”) (16 U.S.C. 484a); and

(2) available to the Secretary, only to the extent and in the amount provided in advance in appropriations Acts, for the maintenance and improvement of land or administration facilities in the Black Hills National Forest in the State.

(i) ENVIRONMENTAL CONDITIONS.—Notwithstanding section 120(h)(3)(A) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9620(h)(3)(A)), the Secretary shall not be required to provide any covenant or warranty for the Federal land conveyed to the State under this Act.

SEC. 4. DETERMINATION OF BUDGETARY EFFECTS.

The budgetary effects of this Act, for the purpose of complying with the Statutory

Pay-As-You-Go Act of 2010, shall be determined by reference to the latest statement titled “Budgetary Effects of PAYGO Legislation” for this Act, submitted for printing in the Congressional Record by the Chairman of the House Budget Committee, provided that such statement has been submitted prior to the vote on passage.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from Michigan (Ms. TLAI) and the gentleman from Idaho (Mr. FULCHER) each will control 20 minutes.

The Chair recognizes the gentlewoman from Michigan.

GENERAL LEAVE

Ms. TLAI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include any extraneous material on the measure under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Michigan?

There was no objection.

Ms. TLAI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of H.R. 1638, the Gilt Edge Mine Conveyance Act, introduced by my colleague, Representative JOHNSON.

The bill will authorize South Dakota to purchase approximately 266 acres of U.S. Forest Service land in Lawrence County, South Dakota.

Any proceeds received by the Forest Service from the conveyance will be deposited in a fund for the maintenance and improvement of the Black Hills National Forest in South Dakota.

Mr. Speaker, the conveyance is necessary due to the Gilt Edge Mine, which is located within the Black Hills forestry boundary. Since Brohm Mining Company abandoned the mine and its responsibilities to address contaminated water in the late 1990s, South Dakota and the Environmental Protection Agency have worked together to conduct a cleanup effort of the mine and contaminated water.

Mr. Speaker, currently, the mine encompasses a patchwork of Forest Service lands and lands owned by South Dakota. Consolidating ownership of the entire Gilt Edge Mine with South Dakota will make it easier for the State to fulfill its obligation for site remediation and monitoring.

Mr. Speaker, I thank my good colleague, Representative JOHNSON, for introducing this important legislation and championing this bill on behalf of his constituents.

Mr. Speaker, I urge my colleagues to vote “yes” on H.R. 1638, and I reserve the balance of my time.

□ 1700

Mr. FULCHER. Mr. Speaker, I yield myself such time as I may consume.

I rise in support of the Gilt Edge Mine Conveyance Act. This bill reflects exemplary collaboration between the State of South Dakota, the Environmental Protection Agency, and the Forest Service. I commend Congressman DUSTY JOHNSON for his leadership on this proposal.

The Gilt Edge Mine is a 360-acre former mining site in South Dakota. Mining began on the site in 1876 with sporadic operations until the 1990s. The Environmental Protection Agency declared the former mine a Superfund site in the year 2000.

Mr. JOHNSON’s bill authorizes the State of South Dakota to purchase approximately 266 acres of Forest Service land that will allow the State to clean up the Gilt Edge Mine Superfund site once the EPA completes its portion of the cleanup.

This is a good bill that will lead to a more seamless cleanup effort and empower South Dakota to pursue additional water reclamation efforts.

This bill will also allow revenue from the land sale to go toward maintenance and improvements at the Black Hills National Forest. Recent mismanagement of the Black Hills National Forest has hurt rural communities and jeopardized future forest management efforts. This is a key provision of the bill and the result of a compromise worked out with South Dakota that will improve the management and care of the Black Hills National Forest, and I strongly support its inclusion.

This bill is an example of a win-win solution that not only empowers the State to enhance its environment and remediation efforts, but also reduces the burden on the Federal Government by chipping away at the massive Federal estate.

Mr. Speaker, I urge adoption of this bill, and I reserve the balance of my time.

Ms. TLAI. Mr. Speaker, I have no further requests for time. I am prepared to close, and I reserve the balance of my time.

Mr. FULCHER. Mr. Speaker, I yield 5 minutes to the gentleman from South Dakota (Mr. JOHNSON).

Mr. JOHNSON of South Dakota. Mr. Speaker, I want to thank the gentlewoman and thank the gentleman for their words of support for this piece of legislation.

I ask all my colleagues to support my bill.

It would do exactly as the previous two speakers said. It would make things a lot easier. It would advance environmental quality.

What exactly are we dealing with here?

We have a 266-acre parcel. It used to be the site of the Gilt Edge Mine. It is now an EPA Superfund site. Mr. Speaker, you can see a picture of the site here. This is not pristine wilderness; but, of course, we want to get it back to an environmental asset.

This is now, as the gentlewoman said, a checkerboard of competing governmental ownerships and roles. You have got the Forest Service which owns much of this land; you have got the State of South Dakota which owns some of the rest of it; you have got the EPA which for 20 years has been doing remediation work on the water; and then you have got the State of South

Dakota which has other environmental cleanup and management responsibilities on this site.

So what this bill would do is take the portions of this site that are owned by the Forest Service, and it would allow the State of South Dakota to purchase this land. That is going to get the Forest Service out of the middle of this. They don't need to play a role here.

The work of the State will be easier if they have one less Federal partner to work with and to navigate.

Now, sometimes my colleagues get concerned if we are going to take a Federal asset and give it to a State.

Will this be a loss of important Federal access opportunities for the public?

Well, that is why I brought this picture up here, Mr. Speaker. People are not going hiking here. This is not wildlife habitat. You will not have bison from the Black Hills of South Dakota nestle in this leach pond here.

We have real environmental work to do here, and it is important that we do it in the most effective way. This bill would advance that cause.

I just want to make it clear, so many people who are involved are supportive of this. Senators THUNE and ROUNDS have been supportive. Governor Noem has been supportive. Lawrence County, the city of Lead, and the city of Deadwood are all supportive.

I ask all of my colleagues to join their voices of support so we can do what needs to be done on this Superfund site. We didn't treat this land properly, and the mining company did not treat this land properly. We have a continuing opportunity to do right. My bill would do that. Vote "yes."

Mr. FULCHER. Mr. Speaker, I urge adoption of the bill, and I yield back the balance of my time.

Ms. TLAIB. Mr. Speaker, I urge my colleagues to support this legislation, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from Michigan (Ms. TLAIB) that the House suspend the rules and pass the bill, H.R. 1638, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. HICE of Georgia. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this motion will be postponed.

GLOBAL AIRCRAFT MAINTENANCE SAFETY IMPROVEMENT ACT

Mr. KAHELE. Madam Speaker, I move to suspend the rules and pass the bill (H.R. 7321) to amend title 49, United States Code, to require certain air carriers to provide reports with respect to maintenance, preventive

maintenance, or alterations, and for other purposes, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 7321

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Global Aircraft Maintenance Safety Improvement Act".

SEC. 2. SENSE OF CONGRESS.

It is the sense of Congress that—

(1) the safety of the global aviation system requires the highest standards for aircraft maintenance, repair, and overhaul work;

(2) the safety of aircraft operated by United States air carriers should not be dependent on the location where maintenance, repair, and overhaul work is performed; and

(3) the Federal Aviation Administration must fully enforce, in a manner consistent with United States obligations under international agreements, Federal Aviation Administration standards for maintenance, repair, and overhaul work at every facility, whether in the United States or abroad, where such work is performed on aircraft operated by United States air carriers.

SEC. 3. FAA OVERSIGHT OF REPAIR STATIONS LOCATED OUTSIDE THE UNITED STATES.

(a) IN GENERAL.—Section 44733 of title 49, United States Code, is amended—

(1) in the heading by striking "Inspection" and inserting "Oversight";

(2) in subsection (e)—

(A) by inserting ", without prior notice to such repair stations," after "annually";

(B) by inserting "and the applicable laws of the country in which a repair station is located" after "international agreements"; and

(C) by striking the last sentence and inserting "The Administrator may carry out announced or unannounced inspections in addition to the annual unannounced inspection required under this subsection based on identified risks and in a manner consistent with United States obligations under international agreements and with the applicable laws of the country in which a repair station is located.";

(3) by redesignating subsection (g) as subsection (j); and

(4) by inserting after subsection (f) the following:

"(g) DATA ANALYSIS.—

"(1) IN GENERAL.—An air carrier conducting operations under part 121 of title 14, Code of Federal Regulations, shall, if applicable, provide to the appropriate office of the Administration, not less than once every year, a report containing the information described in paragraph (2) with respect to heavy maintenance work on aircraft (including on-wing aircraft engines) performed in the preceding year.

"(2) INFORMATION REQUIRED.—A report under paragraph (1) shall contain the following information:

"(A) The location where any heavy maintenance work on aircraft (including on-wing aircraft engines) was performed outside the United States.

"(B) A description of the work performed at each such location.

"(C) The date of completion of the work performed at each such location.

"(D) A list of all failures, malfunctions, or defects affecting the safe operation of such aircraft identified by the air carrier within 30 days after the date on which an aircraft is returned to service, organized by reference to aircraft registration number, that—

"(i) requires corrective action after the aircraft is approved for return to service; and

"(ii) results from the work performed on such aircraft.

"(E) The certificate number of the person approving such aircraft or on-wing aircraft engine, for return to service following completion of the work performed at each such location.

"(3) ANALYSIS.—The Administrator of the Federal Aviation Administration shall—

"(A) analyze information made available under paragraph (1) of this subsection and sections 121.703, 121.705, 121.707, and 145.221 of title 14, Code of Federal Regulations, or any successor provisions, to detect safety issues associated with heavy maintenance work on aircraft (including on-wing aircraft engines) performed outside the United States; and

"(B) require appropriate actions in response.

"(4) CONFIDENTIALITY.—Information made available under paragraph (1) shall be subject to the same protections given to voluntarily-provided safety or security related information under section 40123.

"(h) APPLICATIONS AND PROHIBITION.—

"(1) IN GENERAL.—The Administrator may not approve any new application under part 145 of title 14, Code of Federal Regulations, from a person located or headquartered in a country that the Administrator, through the International Aviation Safety Assessment program, has classified as Category 2.

"(2) EXCEPTION.—Paragraph (1) shall not apply to an application for the renewal of a certificate issued under part 145 of title 14, Code of Federal Regulations.

"(3) MAINTENANCE IMPLEMENTATION PROCEDURES AGREEMENT.—The Administrator may elect not to enter into a new maintenance implementation procedures agreement with a country classified as Category 2, for as long as that country remains classified as Category 2.

"(4) PROHIBITION ON CONTINUED HEAVY MAINTENANCE WORK.—No air carrier conducting operations under part 121 of title 14, Code of Federal Regulations, may enter into a new contract for heavy maintenance work with a person located or headquartered in a country that the Administrator, through the International Aviation Safety Assessment program, has classified as Category 2, for as long as such country remains classified as Category 2.

"(i) MINIMUM QUALIFICATIONS FOR MECHANICS AND OTHERS WORKING ON U.S. REGISTERED AIRCRAFT.—

"(1) IN GENERAL.—Not later than 1 year after the date of enactment of this subsection, the Administrator shall require that, at each covered repair station—

"(A) all supervisory personnel are appropriately certificated as a mechanic or repairman under part 65 of title 14, Code of Federal Regulations, or under an equivalent certification or licensing regime, as determined by the Administrator; and

"(B) all personnel authorized to approve an article for return to service are appropriately certificated as a mechanic or repairman under part 65 of such title, or under an equivalent certification or licensing regime, as determined by the Administrator.

"(2) AVAILABLE FOR CONSULTATION.—Not later than 1 year after the date of enactment of this subsection, the Administrator shall require any individual who is responsible for approving an article for return to service or who is directly in charge of aircraft (including on-wing aircraft engine) maintenance performed on aircraft operated under part 121 of title 14, Code of Federal Regulations, be available for consultation while work is being performed at a covered repair station."

(b) DEFINITION OF COVERED REPAIR STATION.—

(1) IN GENERAL.—Section 44733(j) of title 49, United States Code (as redesignated by this section), is amended—

(A) by redesignating paragraphs (1) through (3) as paragraphs (2) through (4), respectively; and

(B) by inserting before paragraph (2), as so redesignated, the following:

“(1) COVERED REPAIR STATION.—The term ‘covered repair station’ means a facility that—

“(A) is located outside the United States;

“(B) is certificated under part 145 of title 14, Code of Federal Regulations; and

“(C) performs heavy maintenance work on aircraft (including on-wing aircraft engines) operated under part 121 of title 14, Code of Federal Regulations.”.

(2) TECHNICAL AMENDMENT.—Section 44733(a)(3) of title 49, United States Code, is amended by striking “covered part 145 repair stations” and inserting “part 145 repair stations”.

(c) CONFORMING AMENDMENTS.—The analysis for chapter 447 of title 49, United States Code, is amended by striking the item relating to section 44733 and inserting the following:

“44733. Oversight of repair stations located outside the United States.”.

SEC. 4. INTERNATIONAL STANDARDS FOR SAFETY OVERSIGHT OF FOREIGN REPAIR STATIONS.

(a) FOREIGN REPAIR STATION WORKING GROUP.—Not later than 60 days after the date of enactment of this Act, the Administrator shall convene a foreign repair station working group with other civil aviation authorities (hereinafter referred to as “repair station working group”) to conduct a review of the certification and oversight of foreign repair stations and to identify any future enhancements that might be appropriate to strengthen oversight of such repair stations.

(b) COMPOSITION OF THE REPAIR STATION WORKING GROUP.—The repair station working group shall consist of—

(1) technical representatives from the FAA; and

(2) such other civil aviation authorities or international intergovernmental aviation safety organizations as the Administrator shall invite that are willing to participate, including—

(A) civil aviation authorities responsible for certifying foreign repair stations; and

(B) civil aviation authorities of countries in which foreign repair stations are located.

(c) CONSULTATION.—In conducting the review under this section, the repair station working group shall, as appropriate, consult with relevant experts and stakeholders.

(d) RECOMMENDATIONS.—The repair station working group shall make recommendations with respect to any future enhancements that might be appropriate to—

(1) strengthen oversight of foreign repair stations; and

(2) better leverage the resources of other civil aviation authorities to conduct such oversight.

(e) REPORTS.—

(1) REPAIR STATION WORKING GROUP REPORT.—Not later than 1 year after the date of the first meeting of the repair station working group, the repair station working group shall submit to the Administrator a report containing the findings of the review and each recommendation made under subsection (d).

(2) FAA REPORTS.—

(A) TRANSMISSION OF REPAIR STATION WORKING GROUP REPORT.—The Administrator shall submit to the Committee on Transportation and Infrastructure of the House of Rep-

resentatives, and the Committee on Commerce, Science, and Transportation of the Senate the report required under paragraph (1) as soon as is practicable after the receipt of such report.

(B) FAA REPORT TO CONGRESS.—Not later than 45 days after receipt of the Report under paragraph (1), the Administrator shall submit to the Committee on Transportation and Infrastructure of the House of Representatives, and the Committee on Commerce, Science, and Transportation of the Senate a report containing—

(i) a statement of whether the Administrator concurs or does not concur with each recommendation contained in the report required under paragraph (1);

(ii) for any recommendation with which the Administrator does not concur, a detailed explanation as to why the Administrator does not concur;

(iii) a plan to implement each recommendation related to FAA oversight of foreign repair stations contained in such report with which the Administrator concurs; and

(iv) a plan to work with the international community to implement the recommendations applicable to both the FAA as well as other civil aviation authorities.

(f) TERMINATION.—The repair station working group shall terminate on the earlier of the date of submission of the report under subsection (e)(1) or on the date that is 2 years after the repair station working group is commissioned under subsection (a).

(g) DEFINITION OF FOREIGN REPAIR STATION.—In this section, the term “foreign repair station” means a repair station that performs heavy maintenance work on an aircraft (including on-wing engines) and that is located outside of the territory of the country of the civil aviation authority which certificated the repair station, including repair stations certified under part 145 of title 14, Code of Federal Regulations, which are located outside the United States and the territories of the United States.

SEC. 5. ALCOHOL AND DRUG TESTING AND BACKGROUND CHECKS.

(a) IN GENERAL.—Beginning on the date that is 24 months after the date of enactment of this Act, the Administrator may not approve or authorize international travel for any employee of the Federal Aviation Administration until a final rule carrying out the requirements of subsection (b) of section 2112 of the FAA Extension, Safety, and Security Act of 2016 (49 U.S.C. 44733 note) has been published in the Federal Register.

(b) RULEMAKING ON ASSESSMENT REQUIREMENT.—With respect to any employee not covered under the requirements of section 1554.101 of title 49, Code of Federal Regulations, the Administrator shall initiate a rulemaking that requires a covered repair station to confirm that any such employee has successfully completed an assessment commensurate with a security threat assessment described in subpart C of part 1540 of such title.

(c) EXCEPTIONS.—The prohibition in subsection (a) shall not apply to international travel that is determined by the Administrator on an individual by individual basis to be—

(1) exclusively for the purpose of conducting a safety inspection;

(2) directly related to aviation safety standards, certification, and oversight; or

(3) vital to the national interests of the United States.

(d) NON-DELEGATION AND REPORTING.—For any determination to make an exception based on the criteria in paragraph (2) or (3) of subsection (c), the Administrator—

(1) may not delegate the authority to make such a determination to any other individual; and

(2) shall report to the Committee on Transportation and Infrastructure of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate not later than 3 days after making each determination under subsection (c)—

(A) the name of the individual approved or authorized to travel internationally;

(B) the location to which the individual is traveling;

(C) a detailed explanation of why the Administrator has determined the travel is—

(i) directly related to aviation safety standards, certification, and oversight; or

(ii) vital to the national interests of the United States; and

(D) a detailed description of the status of the rulemakings described in subsection (a).

SEC. 6. DEFINITIONS.

In this Act:

(1) ADMINISTRATOR.—The term “Administrator” means the Administrator of the FAA.

(2) COVERED REPAIR STATION.—The term “covered repair station” means a facility that—

(A) is located outside the United States;

(B) is certificated under part 145 of title 14, Code of Federal Regulations; and

(C) performs heavy maintenance work on aircraft (including on-wing aircraft engines), operated under part 121 of title 14, Code of Federal Regulations.

(3) FAA.—The term “FAA” means the Federal Aviation Administration.

The SPEAKER pro tempore (Ms. TLAIB). Pursuant to the rule, the gentleman from Hawaii (Mr. KAHELE) and the gentleman from Florida (Mr. WEBSTER) each will control 20 minutes.

The Chair recognizes the gentleman from Hawaii.

GENERAL LEAVE

Mr. KAHELE. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on H.R. 7321, as amended.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Hawaii?

There was no objection.

Mr. KAHELE. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I rise in support of H.R. 7321, the Global Aircraft Maintenance Safety Improvement Act, introduced by Transportation and Infrastructure Committee Chair, PETER DEFazio.

One level of safety. For over a decade, that has been the single-minded goal of Congress and the Federal Aviation Administration in setting aviation policy. But until domestic and FAA-certificated foreign repair stations are subject to the same oversight and safety standards, there is no hope we can achieve one level of safety.

In fact, existing safety rules make clear that there is not truly one level of safety. Under current FAA regulations, domestic repair station workers are subject to mandatory drug and alcohol testing. Workers at foreign repair stations are not. Domestic repair station workers are subject to comprehensive background investigations; foreign repair station workers are not.

Unfortunately, more and more maintenance work for U.S. air carriers is being sent overseas. The number of these facilities has grown by nearly 40 percent in the past 6 years. The global pandemic has only exacerbated this trend, as more than 8,200 aircraft maintenance jobs left the United States in just the past few years.

The Department of Transportation inspector general has also been ringing the alarm bell in five audit reports containing 41 recommendations since 2002 to improve the FAA's dangerously weak oversight of repair stations overseas.

How many more inspector general reports will it take for the FAA to be brave enough to take a leadership role in the international community and apply strong standards to foreign repair stations?

This bill will require the FAA to take a number of specific and decisive steps to improve oversight of foreign repair stations. These include, among other things: requiring all foreign repair stations to be subject to at least one unannounced inspection each year; requiring supervisors and individuals who authorize aircraft for return to service to meet minimum requirements and hold FAA mechanic or repairman certificates; and requiring the FAA to, one, comply with the 2016 mandate for a final rule on drug and alcohol testing of employees at foreign repair stations, and, two, initiate a rulemaking mandating background checks of such employees.

I thank the stakeholders for their support and the tireless efforts in working toward an agreeable solution as well as Ranking Member GRAVES and his staff.

Madam Speaker, this bill is a giant step in the right direction. I urge my colleagues to support it, and I reserve the balance of my time.

Mr. WEBSTER of Florida. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, first, I thank Chairman DEFazio for working with us on this particular bill, the Global Aircraft Maintenance Safety Improvement Act.

I am pleased that H.R. 7321, as amended, ensures the level of safety we all expect in a way that is consistent with our bilateral safety agreements and collaborative with foreign civil aviation authorities.

International buy-in and collaboration are key if we are to chart a real path forward on aviation safety, and this bill strives to do that.

Notably, this legislation has markedly improved since last Congress, and I, again, want to thank the chair and his staff for working with us in a bipartisan manner.

Under H.R. 7321, our domestic repair stations will not be exposed to retaliation by other countries, nor will American jobs be jeopardized.

Again, improving oversight of foreign repair stations without damaging our standing and partnerships in the inter-

national community is the goal here today. This is another example of our bipartisan commitment to aviation safety.

Madam Speaker, I urge support, and I reserve the balance of my time.

The SPEAKER pro tempore. Without objection, the gentleman from Indiana (Mr. CARSON) will control the remaining time.

There was no objection.

Mr. CARSON. Madam Speaker, I have no more speakers, and I continue to reserve the balance of my time.

Mr. WEBSTER of Florida. Madam Speaker, in closing, H.R. 7321, as amended, continues our commitment to the traveling public by ensuring aviation safety on the international playing field.

Madam Speaker, I urge support of this legislation, and I yield back the balance of my time.

Mr. CARSON. Madam Speaker, in closing, this bipartisan bill will correct the FAA's unacceptably lax oversight of foreign aeronautical repair stations that work on U.S. airline fleets and help increase the safety of our global aviation system.

Madam Speaker, I urge my colleagues to support the bill, and I yield back the balance of my time.

□ 1715

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Hawaii (Mr. KAHELE) that the House suspend the rules and pass the bill, H.R. 7321, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. HICE of Georgia. Madam Speaker, on that I demand the yeas and nays. The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this motion will be postponed.

NATIONAL CENTER FOR THE ADVANCEMENT OF AVIATION ACT OF 2022

Mr. CARSON. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3482) to establish the National Center for the Advancement of Aviation, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 3482

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "National Center for the Advancement of Aviation Act of 2022".

SEC. 2. FEDERAL CHARTER FOR THE NATIONAL CENTER FOR THE ADVANCEMENT OF AVIATION.

(a) IN GENERAL.—Chapter 1 of title 49, United States Code, is amended by adding at the end the following:

"§ 120. National Center for the Advancement of Aviation

"(a) FEDERAL CHARTER AND STATUS.—

"(1) IN GENERAL.—The National Center for the Advancement of Aviation (in this section referred to as the 'Center') is a federally chartered entity. The Center is a private independent entity, not a department, agency, or instrumentality of the United States Government or a component thereof. Except as provided in subsection (f)(1), an officer or employee of the Center is not an officer or employee of the Federal Government.

"(2) PERPETUAL EXISTENCE.—Except as otherwise provided, the Center shall have perpetual existence.

"(b) GOVERNING BODY.—

"(1) IN GENERAL.—The Board of Directors (in this section referred to as the 'Board') is the governing body of the Center.

"(2) AUTHORITY OF POWERS.—

"(A) IN GENERAL.—The Board shall adopt a constitution, bylaws, regulations, policies, and procedures to carry out the purpose of the Center and may take any other action that it considers necessary (in accordance with the duties and powers of the Center) for the management and operation of the Center. The Board is responsible for the general policies and management of the Center and for the control of all funds of the Center.

"(B) POWERS OF BOARD.—The Board shall have the power to do the following:

"(i) Adopt and alter a corporate seal.

"(ii) Establish and maintain offices to conduct its activities.

"(iii) Enter into contracts or agreements as a private entity not subject to the requirements of title 41.

"(iv) Acquire, own, lease, encumber, and transfer property as necessary and appropriate to carry out the purposes of the Center.

"(v) Publish documents and other publications in a publicly accessible manner.

"(vi) Incur and pay obligations as a private entity not subject to the requirements of title 31.

"(vii) Make or issue grants and include any conditions on such grants in furtherance of the purpose and duties of the Center.

"(viii) Perform any other act necessary and proper to carry out the purposes of the Center as described in its constitution and bylaws or duties outlined in this section.

"(3) MEMBERSHIP OF THE BOARD.—

"(A) IN GENERAL.—The Board shall have 11 Directors as follows:

"(i) EX-OFFICIO MEMBERSHIP.—The following individuals, or their designees, shall be considered ex-officio members of the Board:

"(I) The Administrator of the Federal Aviation Administration.

"(II) The Executive Director, pursuant to paragraph (5)(D).

"(ii) APPOINTMENTS.—

"(I) IN GENERAL.—From among those members of the public who are highly respected and have knowledge and experience in the fields of aviation, finance, or academia—

"(aa) the Secretary of Transportation shall appoint 5 members to the Board;

"(bb) the Secretary of Defense shall appoint 1 member to the Board;

"(cc) the Secretary of Veterans Affairs shall appoint 1 member to the Board;

"(dd) the Secretary of Education shall appoint 1 member to the Board;

"(ee) the Administrator of the National Aeronautics and Space Administration shall appoint 1 member to the Board.

"(II) TERMS.—

"(aa) IN GENERAL.—The members appointed under subclause (I) shall serve for a term of 3 years and may be reappointed.

"(bb) STAGGERING TERMS.—To ensure subsequent appointments to the Board are staggered, of the 9 members first appointed under subclause (I), 3 shall be appointed for a term of 1 year, 3 shall be appointed for a term of

2 years, and 3 shall be appointed for a term of 3 years.

“(III) CONSIDERATION.—In considering whom to appoint to the Board, the Secretaries and Administrator referenced in subclause (I) shall, to the maximum extent practicable, ensure the overall composition of the Board adequately represents the fields of aviation and academia.

“(B) VACANCIES.—A vacancy on the Board shall be filled in the same manner as the initial appointment.

“(C) STATUS.—All Members of the Board shall have equal voting powers, regardless if they are ex-officio members or appointed.

“(4) CHAIR OF THE BOARD.—The Board shall choose a Chair of the Board from among the members of the Board that are not ex-officio members under paragraph (3)(A)(i).

“(5) ADMINISTRATIVE MATTERS.—

“(A) MEETINGS.—

“(i) IN GENERAL.—The Board shall meet at the call of the Chair but not less than 2 times each year and may, as appropriate, conduct business by telephone or other electronic means.

“(ii) OPEN.—

“(I) IN GENERAL.—Except as provided in subclause (II), a meeting of the Board shall be open to the public.

“(II) EXCEPTION.—A meeting, or any portion of a meeting, may be closed if the Board, in public session, votes to close the meeting because the matters to be discussed—

“(aa) relate solely to the internal personnel rules and practices of the Center;

“(bb) may result in disclosure of commercial or financial information obtained from a person that is privileged or confidential;

“(cc) may disclose information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy; or

“(dd) are matters that are specifically exempted from disclosure by Federal or State law.

“(iii) PUBLIC ANNOUNCEMENT.—At least 1 week before a meeting of the Board, and as soon as practicable thereafter if there are any changes to the information described in subclauses (I) through (III), the Board shall make a public announcement of the meeting that describes—

“(I) the time, place, and subject matter of the meeting;

“(II) whether the meeting is to be open or closed to the public; and

“(III) the name and appropriate contact information of a person who can respond to requests for information about the meeting.

“(iv) RECORD.—The Board shall keep a transcript of minutes from each Board meeting. Such transcript shall be made available to the public in an accessible format, except for portions of the meeting that are closed pursuant to subparagraph (A)(ii)(II).

“(B) QUORUM.—A majority of members of the Board shall constitute a quorum.

“(C) RESTRICTION.—No member of the Board shall participate in any proceeding, application, ruling or other determination, contract claim, scholarship award, controversy, or other matter in which the member, the member's employer or prospective employer, or the member's spouse, partner, or minor child has a direct financial interest. Any person who violates this subparagraph may be fined not more than \$10,000, imprisoned for not more than 2 years, or both.

“(D) EXECUTIVE DIRECTOR.—The Board shall appoint and fix the pay of an Executive Director of the Center (in this section referred to as the ‘Executive Director’) who shall—

“(i) serve as a Member of the Board;

“(ii) serve at the pleasure of the Board, under such terms and conditions as the Board shall establish;

“(iii) is subject to removal by the Board at the discretion of the Board; and

“(iv) be responsible for the daily management and operation of the Center and for carrying out the purposes and duties of the Center.

“(E) APPOINTMENT OF PERSONNEL.—The Board shall designate to the Executive Director the authority to appoint additional personnel as the Board considers appropriate and necessary to carry out the purposes and duties of the Center.

“(F) PUBLIC INFORMATION.—Nothing in this section may be construed to withhold disclosure of information or records that are subject to disclosure under section 552 of title 5.

“(c) PURPOSE OF THE CENTER.—The purpose of the Center is to—

“(1) develop a skilled and robust U.S. aviation and aerospace workforce;

“(2) provide a forum to support collaboration and cooperation between governmental, non-governmental, and private aviation and aerospace sector stakeholders regarding the advancement of the U.S. aviation and aerospace workforce, including general, business, and commercial aviation, education, labor, manufacturing and international organizations; and

“(3) serve as a repository for research conducted by institutions of higher education, research institutions, or other stakeholders regarding the aviation and aerospace workforce, or related technical and skill development.

“(d) DUTIES OF THE CENTER.—In order to accomplish the purpose described in subsection (c), the Center shall perform the following duties:

“(1) Improve access to aviation and aerospace education and related skills training to help grow the U.S. aviation and aerospace workforce, including—

“(A) assessing the current U.S. aviation and aerospace workforce challenges and identifying actions to address these challenges, including by developing a comprehensive workforce strategy;

“(B) establishing scholarship, apprenticeship, internship or mentorship programs for individuals who wish to pursue a career in an aviation- or aerospace-related field, including individuals in economically disadvantaged areas or individuals who are members of underrepresented groups in the aviation and aerospace sector;

“(C) supporting the development of aviation and aerospace education curricula, including syllabi, training materials, and lesson plans, for use by middle schools and high schools, institutions of higher education, secondary education institutions, or technical training and vocational schools; and

“(D) building awareness of youth-oriented aviation and aerospace programs and other outreach programs.

“(2) Support the personnel or veterans of the Armed Forces seeking to transition to a career in civil aviation or aerospace through outreach, training, apprenticeships, or other means.

“(3) Amplify and support the research and development efforts conducted as part of the National Aviation Research Plan, as required under section 44501(c), and work done at the Centers of Excellence and Technical Centers of the Federal Aviation Administration regarding the aviation and aerospace workforce, or related technical and skills development, including organizing and hosting symposiums, conferences, and other forums as appropriate, between the Federal Aviation Administration, aviation and aerospace stakeholders, and other interested parties, to

discuss current and future research efforts and technical work.

“(e) GRANTS.—

“(1) IN GENERAL.—In order to accomplish the purpose under subsection (c) and duties under subsection (d), the Center may issue grants to eligible entities to—

“(A) create, develop, deliver, or update—

“(i) middle and high school aviation curricula, including syllabi, training materials, equipment and lesson plans, that are designed to prepare individuals to become aircraft pilots, aerospace engineers, unmanned aircraft system operators, aviation maintenance technicians, or other aviation maintenance professionals, or to support the continuing education of any of the aforementioned individuals; or

“(ii) aviation curricula, including syllabi, training materials, equipment and lesson plans, used at institutions of higher education, secondary education institutions, or by technical training and vocational schools, that are designed to prepare individuals to become aircraft pilots, aerospace engineers, unmanned aircraft system operators, aviation maintenance technicians, or other aviation maintenance professionals, or to refresh the knowledge of any of the aforementioned individuals; or

“(B) support the professional development of educators using the curriculum in subparagraph (A);

“(C) establish new education programs that teach technical skills used in aviation maintenance, including purchasing equipment, or to improve existing programs;

“(D) establish scholarships, internships or apprenticeships for individuals pursuing employment in the aviation maintenance industry;

“(E) support outreach about educational opportunities and careers in the aviation maintenance industry, including in economically disadvantaged areas; or

“(F) support the transition to careers in aviation maintenance, including for members of the Armed Forces.

“(2) ELIGIBLE ENTITIES.—An eligible entity under this subsection includes—

“(A) an air carrier, as defined in section 40102, an air carrier engaged in intrastate or intra-U.S. territorial operations, an air carrier engaged in commercial operations covered by part 135 or part 91 of title 14, Code of Federal Regulations, operations, or a labor organization representing aircraft pilots;

“(B) an accredited institution of higher education or a high school or secondary school (as defined in section 8101 of the Higher Education Act of 1965 (20 U.S.C. 7801));

“(C) a flight school that provides flight training, as defined in part 61 of title 14, Code of Federal Regulations, or that holds a pilot school certificate under part 141 of title 14, Code of Federal Regulations;

“(D) a State or local governmental entity; or

“(E) an organization representing aircraft users, aircraft owners, or aircraft pilots;

“(F) a holder of a certificate issued under part 21, 121, 135, or 145 of title 14, Code of Federal Regulations or a labor organization representing aviation maintenance workers; or

“(G) other organizations at the discretion of the Board.

“(3) LIMITATION.—No organization that receives a grant under this section may sell or make a profit from the creation, development, delivery, or updating of high school aviation curricula.

“(f) ADMINISTRATIVE MATTERS OF THE CENTER.—

“(1) DETAILEES.—

“(A) IN GENERAL.—At the request of the Center, the head of any Federal agency or department may, at the discretion of such

agency or department, detail to the Center, on a reimbursable basis, any employee of the agency or department.

“(B) CIVIL SERVANT STATUS.—The detail of an employee under subparagraph (A) shall be without interruption or loss of civil service status or privilege.

“(2) NAMES AND SYMBOLS.—The Center may accept, retain, and use proceeds derived from the Center’s use of the exclusive right to use its name and seal, emblems, and badges incorporating such name as lawfully adopted by the Board in furtherance of the purpose and duties of the Center.

“(3) GIFTS, GRANTS, BEQUESTS, AND DEVICES.—The Center may accept, retain, use, and dispose of gifts, grants, bequests, or devises of money, services, or property from any public or private source for the purpose of covering the costs incurred by the Center in furtherance of the purpose and duties of the Center.

“(4) VOLUNTARY SERVICES.—The Center may accept from any person voluntary services to be provided in furtherance of the purpose and duties of the Center.

“(g) RESTRICTIONS OF THE CENTER.—

“(1) PROFIT.—The Center may not engage in business activity for profit.

“(2) STOCKS AND DIVIDENDS.—The Center may not issue any shares of stock or declare or pay any dividends.

“(3) POLITICAL ACTIVITIES.—The Center shall be nonpolitical and may not provide financial aid or assistance to, or otherwise contribute to or promote the candidacy of, any individual seeking elective public office or political party. The Center may not engage in activities that are, directly, or indirectly, intended to be or likely to be perceived as advocating or influencing the legislative process.

“(4) DISTRIBUTION OF INCOME OR ASSETS.—The assets of the Center may not inure to the benefit of any member of the Board, or any officer or employee of the Center or be distributed to any person. This subsection does not prevent the payment of reasonable compensation to any officer, employee, or other person or reimbursement for actual and necessary expenses in amounts approved by the Board.

“(5) LOANS.—The Center may not make a loan to any member of the Board or any officer or employee of the Center.

“(6) NO CLAIM OF GOVERNMENTAL APPROVAL OR AUTHORITY.—The Center may not claim approval of Congress or of the authority of the United States for any of its activities.

“(h) ADVISORY COMMITTEE.—

“(1) IN GENERAL.—The Executive Director shall appoint members to an advisory committee subject to approval by the Board. Members of the Board may not sit on the advisory committee.

“(2) MEMBERSHIP.—The advisory committee shall consist of 15 members who represent various aviation industry and labor stakeholders, stakeholder associations, and others as determined appropriate by the Board. The advisory committee shall select a Chair and Vice Chair from among its members by majority vote. Members of the advisory committee shall be appointed for a term of 5 years.

“(3) DUTIES.—The advisory committee shall—

“(A) provide recommendations to the Board on an annual basis regarding the priorities for the activities of the Center;

“(B) consult with the Board on an ongoing basis regarding the appropriate powers of the Board to accomplish the purposes and duties of the Center;

“(C) provide relevant data and information to the Center in order to carry out the duties set forth in subsection (d); and

“(D) nominate United States citizens for consideration by the Board to be honored annually by the Center for such citizens’ efforts in promoting U.S. aviation or aviation education and enhancing the aviation workforce in the United States.

“(4) MEETINGS.—The provisions for meetings of the Board under subsection (b)(5) shall apply as similarly as is practicable to meetings of the advisory committee.

“(1) WORKING GROUPS.—

“(1) IN GENERAL.—The Board may establish and appoint the membership of the working groups as determined necessary and appropriate to achieve the purpose of the Center under subsection (c).

“(2) MEMBERSHIP.—Any working group established by the Board shall have members representing various aviation industry and labor stakeholders, stakeholder associations, and others, as determined appropriate by the Board. Once established, the membership of such working group shall choose a Chair from among the members of the working group by majority vote.

“(3) TERMINATION.—Unless determined otherwise by the Board, any working group established by the Board under this subsection shall be constituted for a time period of not more than 3 years.

“(j) RECORDS OF ACCOUNTS.—The Center shall keep correct and complete records of accounts.

“(k) DUTY TO MAINTAIN TAX-EXEMPT STATUS.—The Center shall be operated in a manner and for purposes that qualify the Center for exemption from taxation under the Internal Revenue Code as an organization described in section 501(c)(3) of such Code.

“(1) ANNUAL REPORT.—The Board shall submit an annual report to the appropriate committees of Congress that, at minimum,—

“(1) includes a review and examination of—

“(A) the activities performed as set forth in subsections (d) and (e) during the prior fiscal year;

“(B) the advisory committee as described under subsection (h); and

“(C) the working groups as described under subsection (i); and

“(2) provides recommendations to improve the role, responsibilities, and functions of the Center to achieve the purpose set forth in subsection (c).

“(m) AUDIT BY THE DEPARTMENT OF TRANSPORTATION INSPECTOR GENERAL.—

“(1) IN GENERAL.—Not later than 2 years after the date on which the Center is established under subsection (a), the inspector general of the Department of Transportation shall conduct a review of the Center.

“(2) CONTENTS.—The review shall—

“(A) include, at a minimum—

“(i) an evaluation of the efforts taken at the Center to achieve the purpose set forth in subsection (c); and

“(ii) the recommendations provided by the Board in subsection (1)(2); and

“(B) provide any other information that the inspector general determines is appropriate.

“(3) REPORT ON AUDIT.—

“(A) REPORT TO SECRETARY.—Not later than 30 days after the date of completion of the audit, the inspector general shall submit to the Secretary a report on the results of the audit.

“(B) REPORT TO CONGRESS.—Not later than 60 days after the date of receipt of the report under subparagraph (A), the Secretary shall submit to the appropriate committees of Congress a copy of the report, together with, if appropriate, a description of any actions taken or to be taken to address the results of the audit.

“(n) AUTHORIZATION OF APPROPRIATIONS.—In order to carry out this section, there is authorized to be appropriated for fiscal year

2023 and each fiscal year thereafter an amount equal to 3 percent of the interest from investment credited to the Airport and Airway Trust Fund.

“(o) DEFINITIONS.—In this section:

“(1) APPROPRIATE COMMITTEES OF CONGRESS.—The term ‘appropriate committees of Congress’ means the Committee on Transportation and Infrastructure of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate.

“(2) INSTITUTION OF HIGHER EDUCATION.—The term ‘institution of higher education’ has the meaning given such term in section 101 of the Higher Education Act of 1965 (20 U.S.C. 1001).

“(3) STEM.—The term ‘STEM’ means science, technology, engineering, and mathematics.”

(b) CLERICAL AMENDMENT.—The analysis for chapter 1 of title 49, United States Code, is amended by inserting after the item relating to section 119 the following:

“120. National Center for the Advancement of Aviation.”

SEC. 3. PREVENTION OF DUPLICATIVE PROGRAMS.

The Board of Directors of the National Center for the Advancement of Aviation established under section 120 of title 49, United States Code (as added by this Act), shall coordinate with the Administrator of the Federal Aviation Administration to prevent any programs of the Center from duplicating programs established under section 625 of the FAA Reauthorization Act of 2018 (49 U.S.C. 40101 note).

SEC. 4. DETERMINATION OF BUDGETARY EFFECTS.

The budgetary effects of this Act, for the purpose of complying with the Statutory Pay-As-You-Go Act of 2010, shall be determined by reference to the latest statement titled “Budgetary Effects of PAYGO Legislation” for this Act, submitted for printing in the Congressional Record by the Chairman of the House Budget Committee, provided that such statement has been submitted prior to the vote on passage.

The SPEAKER pro tempore (Mr. KAHELE). Pursuant to the rule, the gentleman from Indiana (Mr. CARSON) and the gentleman from Florida (Mr. WEBSTER) each will control 20 minutes.

The Chair recognizes the gentleman from Indiana.

GENERAL LEAVE

Mr. CARSON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on H.R. 3482, as amended.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. CARSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, today is bittersweet. I am glad that my bill is finally being considered on the House floor after working on this bill for over two sessions, but unfortunately, my partner on this bill is not here to join me, Representative Don Young of Alaska, the former chairman of the Transportation and Infrastructure Committee, the former dean of this House. Mr. Speaker, his work and support were invaluable in helping us get this bill to the floor.

This National Center for the Advancement of Aviation Act is both bipartisan and bicameral. I am pleased that so many members of our Transportation and Infrastructure Committee are sponsors of the bill, including Subcommittee on Aviation Chair LARSEN, as well as my colleagues in the other body, Senators DUCKWORTH and INHOFE.

Our committee has worked for years to make American skies the safest in the world and to strengthen the industry workforce to maintain the highest standards of aviation excellence.

This bill supports and promotes collaboration among civil, commercial, and military aviation sectors to address the demands and challenges of ensuring a safe and vibrant national aviation system through research, education, and training.

Too often in the past, Mr. Speaker, innovation and lessons learned in various aviation sectors have not been shared in a collaborative or even a timely manner, especially considering rapid developments in new technology. My bill helps to break down these silos across commercial aviation, general aviation, and military aviation sectors. This will not only improve safety and best practices, Mr. Speaker, but it will also expand opportunities for those interested in more diverse aviation workforces.

For the young and not so young, from those just starting out to those with experience who want to move into other types of aviation work, the national center will focus on four key areas with an emphasis on aviation workforce development.

Firstly, it will support education efforts and provide resources to curriculum developers, so educators at all levels have the tools and training to educate the next generation of aviation professionals.

Secondly, the national center will provide a forum to leverage and share expertise amongst industry sectors, including the improvement of existing high school curriculum to develop and deploy a workforce of pilots, aerospace engineers, unmanned aircraft systems operators, aviation maintenance technicians, or other aviation maintenance professionals needed in the coming decades.

Finally, it will support symposiums and conferences to facilitate collaboration across the industry and develop future advancements for the aviation and aerospace community. This legislation will also allow the FAA to focus on safety, certification, and air traffic operations.

Mr. Speaker, the aviation and aerospace industry supports over 11 million jobs and contributes more than \$1.6 trillion per year to our national economy.

Nearly 200 organizations, including schools, airports, airlines, manufacturers, unions, and other entities involved in aviation and aerospace, have expressed strong support for this wonder-

ful legislation. It will address the demands and challenges our aviation and aerospace industry face today and tomorrow.

Mr. Speaker, I urge my colleagues to support the National Center for the Advancement of Aviation Act, and I reserve the balance of my time.

HOUSE OF REPRESENTATIVES, COMMITTEE ON TRANSPORTATION AND INFRASTRUCTURE,

Washington DC, September 27, 2022.

Hon. EDDIE BERNICE JOHNSON, Chairwoman, Committee on Science, Space, and Technology,

House of Representatives, Washington, DC.

DEAR CHAIRWOMAN JOHNSON: I write to you concerning H.R. 3482, the National Center for the Advancement of Aviation Act of 2022, which was introduced on May 21, 2021, and solely referred to the Committee on Transportation and Infrastructure.

I appreciate you agreeing to withdraw your request for a sequential referral of H.R. 3482 so that the bill may be considered expeditiously. I acknowledge that forgoing your referral claim now does not waive the right to jurisdictional claims in the future on subject matter contained in this bill or similar legislation. Further, I will appropriately consult and involve the Committee on Science, Space, and Technology as the bill moves forward on issues that fall within your Rule X jurisdiction.

Finally, I will include a copy of our letter exchange in the committee report and in the Congressional Record when the bill is considered on the floor.

Thank you again for your cooperation.

Sincerely,

PETER A. DEFazio,
Chair.

HOUSE OF REPRESENTATIVES, COMMITTEE ON SCIENCE, SPACE, AND TECHNOLOGY,

Washington, DC, September 27, 2022.

Chairman PETER A. DEFazio,

Committee on Transportation and Infrastructure House of Representatives, Washington, DC.

DEAR CHAIRMAN DEFazio: I am writing to you concerning H.R. 3482, the "National Center for the Advancement of Aviation Act of 2022," which was referred to the Committee on Transportation and Infrastructure. I requested a sequential referral of this bill on July 23, 2022. However, in an effort to expedite consideration of this measure, I agree to withdraw my request for a sequential referral.

The Committee takes this action with our mutual understanding that by foregoing consideration of H.R. 3482 at this time, we do not waive any jurisdiction over the subject matter contained in this or similar legislation. I also ask to be appropriately consulted and involved as the bill or similar legislation moves forward so that we may address any remaining issues that fall within our Rule X jurisdiction.

I would appreciate your response to this letter confirming this understanding and ask that a copy of our exchange of letters on this matter be included in the bill report filed by the Committee on Transportation and Infrastructure, as well as inserted in the Congressional Record during floor consideration to memorialize our understanding. Thank you for your cooperation on this legislation.

Sincerely,

EDDIE BERNICE JOHNSON.

Mr. WEBSTER of Florida. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 3482, as amended, creates the National Center for the Ad-

vancement of Aviation, a private, not-for-profit organization dedicated to bringing government and aviation stakeholders together to address aviation workforce issues.

United States aviation supports 11.3 million direct jobs and facilitates more than a trillion dollars in economic activity, which represents more than 5 percent of gross domestic product.

Every industry is feeling the pinch of labor shortages, and the reality is that self-help measures undertaken by the aviation industry are not enough to ensure advancement of the aerospace industry. We must address the growing aviation workforce shortage to ensure our domestic aerospace industry maintains its global competitive advantage.

This bipartisan legislation has widespread support across the aviation industry, and I acknowledge that this bill was passionately supported, as has been said, by the dean of the House, Don Young.

Mr. Speaker, in order to ensure our Nation's aviation dominance, we must work forcefully to address the looming shortfall of aviation workforce. Having a properly trained and dedicated workforce to meet the near-term and future capacities needed in the aviation sector is crucial to the underpinning of the high standard of safety that sets America apart from the rest.

H.R. 3482, as amended, supplements the FAA's safety-focused mission by ensuring just that.

Mr. Speaker, I urge support of this legislation, and I yield back the balance of my time.

Mr. CARSON. Mr. Speaker, this bill will help to address the workforce challenges facing U.S. aviation today and prepare our workforce for the opportunities of the future.

Mr. Speaker, I support this bipartisan legislation, and I urge my colleagues to do the same.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Indiana (Mr. CARSON) that the House suspend the rules and pass the bill, H.R. 3482, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. HICE of Georgia. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this motion will be postponed.

SMALL PROJECT EFFICIENT AND EFFECTIVE DISASTER RECOVERY ACT

Mr. CARSON. Mr. Speaker, I move to suspend the rules and concur in the Senate amendments to the bill (H.R. 5641) to amend the Robert T. Stafford Disaster Relief and Emergency Assistance Act to increase the threshold for

eligibility for assistance under sections 403, 406, 407, and 502 of such Act, and for other purposes.

The Clerk read the title of the bill.

The text of the Senate amendments is as follows:

Senate amendments:

(1) On page 2, line 13, strike ["AND REPORT" after "REVIEW"] and insert "AND REPORT" after "REVIEW".

(2) On page 3, after line 3, insert:

SEC. 3. AUDIT AND REVIEW.

Not later than 3 years after the date of enactment of this Act, the Inspector General of the Department of Homeland Security shall conduct an audit, and submit to Congress a report, on whether there has been waste and abuse as a result of the amendment made under section 2(a)(1).

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Indiana (Mr. CARSON) and the gentleman from Florida (Mr. WEBSTER) each will control 20 minutes.

The Chair recognizes the gentleman from Indiana.

GENERAL LEAVE

Mr. CARSON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on H.R. 5641.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. CARSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 5641. This legislation will expedite the approval process for small projects applying for aid through FEMA's public assistance program, a program that helps communities remove debris, implement emergency protective measures, and repair damage to public infrastructure.

The House has already passed this once with overwhelming support, and the amendment we are considering today would solely add a reporting requirement to the language we previously supported.

Also, in the time since we first passed this bill, the Biden administration has updated the small project threshold to \$1 million via rulemaking. The \$1 million threshold, Mr. Speaker, is currently expediting the post-disaster recovery process, cutting unnecessary red tape and helping communities get back on their feet.

Mr. Speaker, I urge my colleagues to support this bill, and I reserve the balance of my time.

Mr. WEBSTER of Florida. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 5641, the SPEED Recovery Act, is a bipartisan bill that cuts red tape and helps expedite disaster recovery efforts, especially in small and rural areas. This legislation updates what the Federal Emergency Management Agency considers a small project.

The bill already passed the House in April, as has been said, and today, it

returns with a reasonable amendment from the Senate and adds a report by the inspector general of Homeland Security to help ensure that there is no fraud, waste, and abuse.

Increasing the small project threshold allows communities to recover faster and allows FEMA to focus more of their time and resources on larger, more complex projects that represent 90 percent of the disaster costs.

I have heard from communities in my district about paperwork burdens and increasing denials over technicalities, and I hope the commonsense adjustments of this bill will improve this process.

Mr. Speaker, I urge support of this legislation.

Mr. Speaker, I yield 3 minutes to the gentlewoman from Puerto Rico (Miss GONZÁLEZ-COLÓN).

Miss GONZÁLEZ-COLÓN. Mr. Speaker, I thank my colleague for yielding.

Today, I rise again in support of H.R. 5641, the SPEED Recovery Act, which is bipartisan legislation introduced by Ranking Member GRAVES that passed the House in April.

This bill cannot be timelier as Puerto Rico is once again dealing with the effects of yet another major disaster, Hurricane Fiona, while also communities in Florida are facing Hurricane Ian as we speak.

We do have a lot of experience in those small projects that are never done because of the red tape or the long procedures that need to be dealt with between municipalities and FEMA.

Too often, cities and municipalities face the burden of rising costs of material and labor, which means that the cost estimate for relatively simple projects, such as street repairs, now surpasses the threshold for what is defined as a small project.

Today, \$123,000 hardly covers the most trivial work, and we can talk about that. I mean, we still have a lot of those small projects since Hurricane Maria that are not being done, and now, many of those projects were hit by Hurricane Fiona. Although the money is there, the process is so big that even the initial amount won't cover those repairs.

We have had cases where there may have been resources to start and finish promptly, but because of the price tag, we are forced to go through a more complicated process with FEMA, which can take years, years in which the people wonder when they will see the work.

When a community does not see even small things taken care of, that weakens the social fabric and promotes displacement.

□ 1730

We cannot afford to keep going through that again. We have a responsibility to make the Federal Government more efficient, particularly in times of need.

By increasing the threshold for eligibility for small projects, including ad-

justments for inflation, this bill will simplify that process, reducing administrative burdens, resulting in faster start of work and allowing more recovery projects to move forward.

Mr. Speaker, I support this commonsense bipartisan legislation, and I urge all Members to support the Senate amendments and send them to the President's desk. Across the Nation, our communities will need it.

Mr. CARSON. Mr. Speaker, I have no more speakers, and I reserve the balance of my time.

Mr. WEBSTER of Florida. Mr. Speaker, I yield myself such time as I may consume to close.

The amendments to H.R. 5641, the SPEED Recovery Act, is reasonable and will help to strengthen accountability.

Mr. Speaker, I thank Senators PORTMAN and PETERS, who are the bipartisan leaders of the Senate Committee on Homeland Security and Governmental Affairs. Without their leadership in the Senate to push forward this measure, we would not be here today.

Mr. Speaker, I thank Senator JOSH HAWLEY of Missouri, who also helped by being engaged in this particular issue.

Finally, I thank our great staff on both sides to get this bill to the finish line, especially my subcommittee staff director, Johanna Hardy and Maddy McCaslin.

Mr. Speaker, I urge support of this important legislation, and I yield back the balance of my time.

Mr. CARSON. Mr. Speaker, in closing, this legislation supports FEMA's role and codifies that the qualifying small project threshold will be \$1 million.

Mr. Speaker, I urge my colleagues to support the bill, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Indiana (Mr. CARSON) that the House suspend the rules and concur in Senate amendments to the bill, H.R. 5641.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. NEHLS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this motion will be postponed.

PREVENTING PFAS RUNOFF AT AIRPORTS ACT

Mr. CARSON. Mr. Speaker, I move to suspend the rules and pass the bill (S. 3662) to temporarily increase the cost share authority for aqueous film forming foam input-based testing equipment, and for other purposes, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

S. 3662

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Preventing PFAS Runoff at Airports Act”.

SEC. 2. TEMPORARILY INCREASED COST SHARE AUTHORITY FOR AQUEOUS FILM FORMING FOAM INPUT-BASED TESTING EQUIPMENT.

(a) IN GENERAL.—Section 47109 of title 49, United States Code, is amended by adding at the end the following new subsection:

“(g) SPECIAL RULE FOR COVERED EQUIPMENT.—

“(1) IN GENERAL.—The Government’s share of allowable project costs for covered equipment and its installation shall be 100 percent.

“(2) DEFINITION OF COVERED EQUIPMENT.—For purposes of this subsection, the term ‘covered equipment’ means aqueous film forming foam input-based testing equipment that is eligible for Airport Improvement Program funding based on Federal Aviation Administration PGL 21-01, titled ‘Extension of Eligibility for stand-alone acquisition of input-based testing equipment and truck modification’, dated October 5, 2021 (or any other successor program guidance letter).

“(3) SUNSET.—The higher cost share authority established in this subsection shall terminate on the earlier of—

“(A) 180 days after the date on which the eligibility of covered equipment for Airport Improvement Program funding under the authority described in paragraph (2) terminates or is discontinued by the Administrator; or

“(B) 5 years after the date of enactment of this subsection.”.

(b) OUTREACH EFFORTS.—Not later than 90 days after the date of enactment of this Act, the Administrator of the Federal Aviation Administration shall conduct an outreach effort to make airports aware of the higher cost share authority established in section 47109(g) of title 49, United States Code, as added by subsection (a).

(c) FORWARD-LOOKING AIRPORT REIMBURSEMENTS.—Not later than 18 months after the date of enactment of this Act, the Administrator of the Federal Aviation Administration shall provide a briefing to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Transportation and Infrastructure of the House of Representatives that reviews—

(1) potential options for Congress to reimburse airports that—

(A) are certificated under part 139 of title 14, Code of Federal Regulations; and

(B) acquired covered equipment (as defined in section 47109(g) of title 49, United States Code) as added by subsection (a)—

(i) with Federal funding but with a Government’s share less than 100 percent; or

(ii) without Federal funding;

(2) information relevant to estimating the potential cost of providing such reimbursement;

(3) the status of the Federal Aviation Administration’s outreach efforts as required under subsection (b); and

(4) any additional information the Administrator of the Federal Aviation Administration considers appropriate.

(d) AUTHORIZATION OF APPROPRIATIONS.—The amendments made by this Act shall apply to amounts that first become available in fiscal year 2023 or thereafter.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Indiana (Mr. CARSON) and the gentleman from Florida (Mr. WEBSTER) each will control 20 minutes.

The Chair recognizes the gentleman from Indiana.

GENERAL LEAVE

Mr. CARSON. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days in which to revise and extend their remarks and include extraneous material on S. 3662, as amended.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. CARSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of S. 3662, the Preventing PFAS Runoff at Airports Act, sponsored by Senator PETERS from Michigan.

Mr. Speaker, every day millions of Americans are exposed to highly toxic fluorinated chemicals known as PFAS, through either their drinking water, home appliances, retail packaging, or countless other things they come into contact with each and every day.

These chemicals, known as “forever chemicals” due to their long-term persistence and inability to be easily broken down when released into the environment, have been linked with numerous human health risks, including increased risk of cancer, immune system impairment, and impaired child development. And that is just what we know. There is still plenty that we don’t know about these hazardous materials and chemicals.

Unfortunately, these chemicals are also likely to be found in and around many of our Nation’s airports. That is because airports have been required by law to use and discharge firefighting foam containing PFAS; not just during firefighting emergencies, but also to comply with mandatory FAA testing requirements for firefighting equipment. These discharges have tremendous health implications for the people who live and work around airports, as well as growing liability concerns for the airports themselves.

Fortunately, there has been significant progress on this front. For instance, just last month, the EPA proposed designating two of the most widely used PFAS chemicals as hazardous substances, which would create more public transparencies around the release of these chemicals. And the FAA is in the process of transitioning away from mandating the use of airport firefighting foam containing PFAS—though the agency still has to offer PFAS-free alternatives.

Furthermore, the FAA now allows for airports to sufficiently test their firefighting equipment without discharging PFAS outside of the vehicle. But while these efforts should be celebrated, more work must be done.

That is why I support this bill, which would raise the Federal cost share to 100 percent for airports that use Federal Airport Improvements Program funds to acquire input-based testing equipment, which enables airports to test firefighting equipment without

emitting toxic PFAS substances. While airports are already allowed to procure this equipment, the cost of the equipment—which can be tens of thousands of dollars—can often be prohibitive.

Through this higher Federal cost share, S. 3662 would incentivize the broad adoption of this new technology to ensure airports are able to limit or prevent the spread of PFAS contamination into local communities.

In addition, the bill would require the FAA to provide Congress with options for reimbursing airports that use AIP funds to require input-based testing equipment under a lower Federal cost share standard or acquire this equipment without AIP funds.

Mr. Speaker, I urge my colleagues to support this bill, and I reserve the balance of my time.

Mr. WEBSTER of Florida. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, ensuring the safety of the traveling public is of critical importance to this Committee. To ensure aviation safety, the Federal Aviation Administration regulates airport firefighting standards and requires airports to regularly test firefighting equipment.

Currently, the fire suppressant foam required to be used at airports contains PFAS. While FAA is working closely with the Department of Defense to come up with an alternative that is just as effective at suppressing jet fuel fires, there is still work to be done before that alternative is made available.

Given that, this bill ensures that airports are able to acquire equipment to test firefighting vehicles, in compliance with FAA regulations, without discharging PFAS-laden foam.

Mr. Speaker, this bipartisan bill passed the Senate unanimously, and I urge support. This legislation is a good piece of legislation, and I reserve the balance of my time.

Mr. CARSON. Mr. Speaker, I have no more speakers and I reserve the balance of my time.

Mr. WEBSTER of Florida. Mr. Speaker, in closing, S. 3662 is a minor adjustment of an AIP cost share to remove any barriers an airport might have for acquiring firefighting testing equipment.

Mr. Speaker, I urge support of the bill and I yield back the balance of my time.

Mr. CARSON. Mr. Speaker, in closing, by making this small change to the Federal AIP, this bill would make it much easier to protect the health of our airport workers, first responders, and local communities, as well as bolster our Nation’s ability to continue fighting these dangerous and insidious chemicals.

Mr. Speaker, I support this bipartisan legislation and I urge my colleagues to do the same. I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Indiana (Mr. CARSON) that the House suspend the rules and pass the bill, S. 3662, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the yeas have it.

Mr. NEHLS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this motion will be postponed.

□ 1745

PROVIDING FOR CONSIDERATION OF H.R. 3843, MERGER FILING FEE MODERNIZATION ACT OF 2022; PROVIDING FOR CONSIDERATION OF H.R. 7780, MENTAL HEALTH MATTERS ACT; AND PROVIDING FOR CONSIDERATION OF S. 3969, PAVA PROGRAM INCLUSION ACT; AND FOR OTHER PURPOSES

Mr. DESAULNIER. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 1396 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 1396

Resolved, That upon adoption of this resolution it shall be in order to consider in the House the bill (H.R. 3843) to promote antitrust enforcement and protect competition through adjusting premerger filing fees, and increasing antitrust enforcement resources. All points of order against consideration of the bill are waived. In lieu of the amendment in the nature of a substitute recommended by the Committee on the Judiciary now printed in the bill, an amendment in the nature of a substitute consisting of the text of Rules Committee Print 117-66 shall be considered as adopted. The bill, as amended, shall be considered as read. All points of order against provisions in the bill, as amended, are waived. The previous question shall be considered as ordered on the bill, as amended, and on any further amendment thereto, to final passage without intervening motion except: (1) one hour of debate equally divided and controlled by the chair and ranking minority member of the Committee on the Judiciary or their respective designees; and (2) one motion to recommit.

SEC. 2. At any time after adoption of this resolution the Speaker may, pursuant to clause 2(b) of rule XVIII, declare the House resolved into the Committee of the Whole House on the state of the Union for consideration of the bill (H.R. 7780) to support the behavioral needs of students and youth, invest in the school-based behavioral health workforce, and ensure access to mental health and substance use disorder benefits. The first reading of the bill shall be dispensed with. All points of order against consideration of the bill are waived. General debate shall be confined to the bill and shall not exceed one hour equally divided and controlled by the chair and ranking minority member of the Committee on Education and Labor or their respective designees. After general debate the bill shall be considered for amendment under the five-minute rule. In lieu of the amendment in the nature of a substitute recommended by the Committee on Education and Labor now printed in the bill, an amendment in the nature of a substitute consisting of the text of Rules Committee Print 117-67 shall be considered as adopted in the House and in the Committee of the Whole. The bill,

as amended, shall be considered as the original bill for the purpose of further amendment under the five-minute rule and shall be considered as read. All points of order against provisions in the bill, as amended, are waived. No further amendment to the bill, as amended, shall be in order except those printed in the report of the Committee on Rules accompanying this resolution. Each such further amendment may be offered only in the order printed in the report, may be offered only by a Member designated in the report, shall be considered as read, shall be debatable for the time specified in the report equally divided and controlled by the proponent and an opponent, shall not be subject to amendment, and shall not be subject to a demand for division of the question in the House or in the Committee of the Whole. All points of order against such further amendments are waived. At the conclusion of consideration of the bill for amendment the Committee shall rise and report the bill, as amended, to the House with such further amendments as may have been adopted. In the case of sundry further amendments reported from the Committee, the question of their adoption shall be put to the House en gros and without division of the question. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

SEC. 3. During consideration of H.R. 7780, the Chair may entertain a motion that the Committee rise only if offered by the chair of the Committee on Education and Labor or his designee. The Chair may not entertain a motion to strike out the enacting words of the bill (as described in clause 9 of rule XVIII).

SEC. 4. Upon adoption of this resolution it shall be in order to consider in the House the bill (S. 3969) to amend the Help America Vote Act of 2002 to explicitly authorize distribution of grant funds to the voting accessibility protection and advocacy system of the Commonwealth of the Northern Mariana Islands and the system serving the American Indian consortium, and for other purposes. All points of order against consideration of the bill are waived. The bill shall be considered as read. All points of order against provisions in the bill are waived. The previous question shall be considered as ordered on the bill and on any amendment thereto to final passage without intervening motion except: (1) one hour of debate equally divided and controlled by the chair and ranking minority member of the Committee on House Administration or their respective designees; and (2) one motion to commit.

SEC. 5. On any legislative day during the period from October 3, 2022, through November 11, 2022, the Journal of the proceedings of the previous day shall be considered as approved.

SEC. 6. The Speaker may appoint Members to perform the duties of the Chair for the duration of the period addressed by section 5 of this resolution as though under clause 8(a) of rule I.

SEC. 7. Each day during the period addressed by section 5 of this resolution shall not constitute a calendar day for purposes of section 7 of the War Powers Resolution (50 U.S.C. 1546).

SEC. 8. Each day during the period addressed by section 5 of this resolution shall not constitute a legislative day for purposes of clause 7 of rule XIII.

SEC. 9. Each day during the period addressed by section 5 of this resolution shall not constitute a calendar or legislative day for purposes of clause 7(c)(1) of rule XXII.

SEC. 10. (a) At any time through the legislative day of Friday, September 30, 2022, the Speaker may entertain motions offered by

the Majority Leader or a designee that the House suspend the rules as though under clause 1 of rule XV with respect to multiple measures described in subsection (b), and the Chair shall put the question on any such motion without debate or intervening motion.

(b) A measure referred to in subsection (a) includes any measure that was the object of a motion to suspend the rules on the legislative day of September 28, 2022, September 29, 2022, or September 30, 2022, in the form as so offered, on which the yeas and nays were ordered and further proceedings postponed pursuant to clause 8 of rule XX.

(c) Upon the offering of a motion pursuant to subsection (a) concerning multiple measures, the ordering of the yeas and nays on postponed motions to suspend the rules with respect to such measures is vacated to the end that all such motions are considered as withdrawn.

The SPEAKER pro tempore. The gentleman from California is recognized for 1 hour.

Mr. DESAULNIER. Mr. Speaker, for the purpose of debate only, I yield the customary 30 minutes to the gentleman from Minnesota (Mrs. FISCHBACH), pending which I yield myself such time as I may consume. During consideration of this resolution, all time yielded is for the purpose of debate only.

GENERAL LEAVE

Mr. DESAULNIER. Mr. Speaker, I ask unanimous consent that all Members be given 5 legislative days to revise and extend their remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. DESAULNIER. Mr. Speaker, yesterday, the Rules Committee met and reported a rule, House Resolution 1396, providing for consideration of three measures.

First, the rule provides for consideration of H.R. 7780 under a structured rule. The rule provides 1 hour of general debate equally divided and controlled by the chair and the ranking minority member of the Committee on Education and Labor, and makes in order two amendments, and provides one motion to recommit.

Second, the rule provides for consideration of H.R. 3843 under a closed rule. The rule provides 1 hour of general debate equally divided and controlled by the chair and ranking minority member of the Committee on the Judiciary and a motion to recommit.

Third, the rule provides for consideration of S. 3969 under a closed rule. The rule provides 1 hour of general debate equally divided and controlled by the chair and the ranking minority member of the Committee on House Administration and a motion to commit.

The rule provides the majority leader or his designee the ability to en bloc requested roll call votes on suspension bills considered on September 28 to September 30. This authority lasts through September 30, 2022.

Lastly, the rule provides standard recess instructions from October 3 to November 11.

Mr. Speaker, an average of 18 young Americans took their own lives every

day in 2020. When children take their own lives, families and communities are left broken. This includes the community of Moorhead, Minnesota, which faced the devastating loss of 13-year old Horizon Middle School student Jacoby Blake to suicide just last year.

These sad stories happen all over this country in all of our districts. Mental health disorders, as a whole, are a common cause of death. It is estimated by CDC that 8 million deaths worldwide, which represents about 14.3 of total annual deaths, are attributable to mental disorders.

Even before the pandemic, the unmet mental and behavioral health needs of young people, students, and teachers, were a serious problem.

In talking with teachers in the district I represent in the East Bay of the San Francisco Bay area, it is clear that this problem has become a crisis. Teachers, administrators, and parents, often tell me that dealing with their students and their children's and their own mental and behavioral health challenges is among the most difficult things they deal with every day.

The data, unfortunately, backs up these stories. Teachers are saying, just last year, almost half of the students experienced persistent sadness or hopelessness, and nearly 20 percent seriously considered suicide.

Think of that, Mr. Speaker. Almost one in four American children have considered suicide in the last 2 years.

At the same time, 27 percent of teachers reported symptoms of depression, which is significantly higher than average adults, and those numbers have been growing.

Despite these warning signs, over 60 percent of children experiencing major depression do not receive any form of mental health treatment, and only 22 percent of teachers reported receiving emotional support from their school, their school district, or professional staff.

This is at a time when investments in the National Institute of Mental Health is discovering exponential information about how our brains work, how they cognitively develop, and the danger to trauma.

We are not getting this information out to the people who need it the most. We know that when people get treatment, they succeed. They overcome their difficulties.

As a Nation, we are underinvesting in the resources our students need, and our communities, our parents, our teachers, our administrators, to stay healthy, to succeed in school, and retain talented teachers and professionals and make sure that future Americans grow and are ready to carry on the legacy that we have inherited from former generations.

While the School Social Work Association of America recommends a ratio of 250 students per social worker, not one single State meets this recommended ratio. The national average is 2,106 of students per social worker;

2,106, as opposed to the recommended average of 250.

I am proud this week that the House is advancing my legislation, the Mental Health Matters Act, to confront this crisis head on, to give communities and parents and teachers the resources they need.

This bill was drafted with the needs of students, parents, and teachers in mind and is the product of months of careful consideration about how Congress can best respond to our Nation's mental health crisis.

This legislation before us would expand the school-based mental and behavioral health workforce, promote accessibility for students with disabilities, provide resources to address trauma in young children, and strengthen the ability of Americans with employer-sponsored insurance to access mental health and substance use disorder treatments they are statutorily entitled to.

From my discussions with mental health professionals over the years and research that has informed this legislation, it is clear that failure to address these challenges at a young age can harm performance at school and work and lead to ever worsening mental and behavioral health outcomes later in life for individuals and for our country.

□ 1800

Anxiety and reading disorders co-occur in approximately 25 percent of students. For individuals whose reading challenges persist into adulthood, there is a greater likelihood of depression, low self-esteem, and difficulty in social functioning.

To break this cycle, a provision I authored would help Head Start agencies implement evidence-based interventions to improve the health of children and staff.

While investment is needed for greater access to school-based mental health and behavioral health, individuals and families with employer-sponsored health insurance must also have robust access to treatment outside of school.

Some insurers, unfortunately, have placed arbitrary coverage limits on mental and behavioral health care, making it hard for patients to access treatment in the same way they would for physical ailments. This legislation makes great strides in the fight for mental health parity so that families can focus more on staying healthy and less on battling insurers for coverage.

Mental health and suicide prevention are deeply personal issues for me, having lost my own father to suicide almost 34 years ago. In advancing this bill, it is my hope that we can prevent many families from having to experience what mine went through several decades ago.

Also included in today's rule is the Merger Filing Fee Modernization Act. This bipartisan bill would increase the filing fee that large corporations must pay the Federal Trade Commission in order to conduct a merger.

A recent surge in merger filings has placed a strain on the FTC's resources, and updating the fee schedule will help the agency cope with its many demands.

Finally, we will also consider the PAVA Program Inclusion Act under the rule. This Senate-passed legislation would help ensure that all programs designed to help voters with disabilities can access Federal funds regardless of their location.

Unfortunately, programs designed to help individuals with disabilities vote who are Native Americans or who live in the Northern Mariana Islands are not currently able to access the Protection and Advocacy for Voting Access funds in the same manner as other Federal programs. The PAVA Program Inclusion Act will fix this injustice, and passing this bill will send it to President Biden's desk to be signed into law.

Mr. Speaker, we have a great opportunity this week to make transformative investments in our Nation's future and our mental health and pass other commonsense legislation.

Mr. Speaker, I reserve the balance of my time.

Mrs. FISCHBACH. Mr. Speaker, I thank the gentleman from California for yielding me the customary 30 minutes, and I yield myself such time as I may consume.

We are here to debate the rule providing for consideration of three bills: H.R. 7780, Mental Health Matters Act; H.R. 3843, Merger Filing Fee Modernization Act; and S. 3969, Protection and Advocacy for Voting Access, or PAVA, Program Inclusion Act.

H.R. 3843 would increase funding to the Federal Trade Commission without justification or restrictions on that funding. This is the same agency that, through its strategic plan for the next 4 years, removed a longstanding clause that states the agency will not unduly burden legitimate business activity.

In the coming term, the Supreme Court will hear a case as to whether the FTC is mission creeping beyond the bounds of its constitutional authority. The FTC, through its initiatives in antitrust enforcement, has taken an increasing liberal view of its traditional focus on protecting consumers from fraud and ensuring businesses have clear rules to follow and is instead moving toward an interpretation of reshaping the American economy through enforcement action.

In the Committee on the Judiciary, my colleagues offered amendments to put limitations on this funding.

Mr. ROY offered an amendment to prohibit appropriated funds from being used to promote critical race theory and one to require funds to be used to enforce antitrust laws as defined in the Clayton Act.

Mr. FITZGERALD offered one to prohibit funds from being used for non-enforcement activities.

Mr. BISHOP offered one to limit the scope of the bill to only apply to mergers involving large technology companies.

All of these failed on party lines, and I can't understand why, unless my colleagues on the left want to encourage the FTC to get involved in issues outside of its purview. The FTC is out of control under this administration and cannot be trusted with these additional resources.

H.R. 7780 misses the mark. Republicans are committed to addressing the mental health crisis facing young people in the country. Unfortunately, this bill is another one-size-fits-all proposal that fails to provide local leaders with the flexibility they need to address the unique problems they face. Republicans support mental health parity, but this bill will actually do the opposite. It opens insurers and employers to lawsuits when they voluntarily offer to provide mental health care benefits.

As with so many bills promoted by the majority this Congress, provisions of this bill ban arbitration clauses, class action waivers, and representation waivers, discouraging other means of settling disputes and pushing creating even more bottlenecks in our judicial system.

During markup, Republicans offered an alternative bill that streamlined existing programs, helped the needs on the ground, helped all students in need regardless of where their school is, and included important accountability metrics. I wish we were discussing that bill here today. Unfortunately, this and every other Republican amendment is effectively blocked from discussion under this rule.

Mr. Speaker, it is for that reason that I oppose the rule and ask Members to do the same.

Mr. Speaker, I reserve the balance of my time.

Mr. DESAULNIER. Mr. Speaker, I yield myself such time as I may consume.

I appreciate the comments from my friend.

Just on the mental health part, we did have hearings in the subcommittee I am proud to chair, the Subcommittee on Health, Employment, Labor, and Pensions. We have had ongoing discussions with both the ranking member of that subcommittee and the ranking member of the full committee, so I think this is to be continued.

I would say on the mental health part of the rule, the urgency is right now, as I outlined in my opening comments. It is something we will have to continue to work with and hopefully will in good faith because all of these issues are on mental health, particularly for young people. I have agreed in my conversations with my friends, the ranking members, Ms. FOXX and Mr. ALLEN, and I look forward to continuing that. I think there is a real urgency on that.

On the trust, I respectfully disagree. Given the level of inequality in this country right now, I think it is really important that we support competition in the marketplace, and the Federal Trade Commission needs the resources to make sure that that happens.

The PAVA bill obviously has bipartisan support.

On all of these bills, I am anxious to get them off the floor today as a rule and look forward to seeing the continued debate tomorrow on the specific bills and the outcome of those bills.

Mr. Speaker, I reserve the balance of my time.

Mrs. FISCHBACH. Mr. Speaker, I yield 2 minutes to my colleague from California (Ms. LOFGREN).

Ms. LOFGREN. Mr. Speaker, today, I reluctantly rise in opposition to this rule and will vote "no."

I am a supporter of all three bills covered by this rule as they were originally introduced. I am even the cosponsor of Representative NEGUSE's bill to increase filing fees. However, very unfortunately, this rule advances a modified version of that bill. It tacks on provisions from Representative BUCK's antitrust enforcement venue bill, and these antitrust venue provisions are unwise public policy.

I vocally opposed them during the Committee on the Judiciary markup and have dutifully kept my leadership apprised of my opposition to them since that time.

Despite proponents trying to sell these venue provisions as non-controversial, I am far from the only Member with concerns.

Furthermore, in a highly unusual move, the Administrative Office of the U.S. Courts wrote to Congress outlining their serious concerns with these venue policy provisions. Opposition also comes in letters from the Progressive Policy Institute and the U.S. Chamber of Commerce.

Proponents argue that State attorneys general are in favor. Well, I understand it was sold to them as a non-controversial provision. Of course, they would be in favor. It makes life easier for them. It doesn't address the very serious issues outlined by the Administrative Office of the Courts, and it doesn't make this good, wise policy.

So, very reluctantly, I will vote "no." I would gladly support today's rule if these venue provisions were not tacked onto the other good bills.

Mr. Speaker, I include in the RECORD the letters from the Administrative Office of the United States Courts, the Progressive Policy Institute, and the U.S. Chamber of Commerce.

ADMINISTRATIVE OFFICE OF
THE UNITED STATES COURTS,
Washington, DC, July 19, 2021.

Hon. KEVIN MCCARTHY,
Minority Leader, House of Representatives,
Washington, DC.

DEAR MR. LEADER: I write regarding H.R. 3460, the "State Antitrust Enforcement Venue Act of 2021," which was ordered reported as amended by the Committee on the Judiciary on June 24, 2021. Neither the Judicial Panel on Multidistrict Litigation ("Panel") nor any of the relevant committees of the Judicial Conference of the United States ("Conference") have had the opportunity to analyze this bill thoroughly. Considering its potential impact on the federal Judiciary and the efficient administration of justice, I offer for your consideration the fol-

lowing initial observations. These comments are neither expressions of support for, nor opposition to the bill. Nevertheless, I hope they are helpful and note that pending a more in-depth analysis, by both the Panel and the relevant Conference committees, additional comments may be submitted.

BACKGROUND

Section 1407 was enacted in 1968, in the wake of a large multidistrict antitrust litigation involving alleged conspiracies to divide businesses and fix prices in multiple product lines of electrical equipment. That litigation encompassed more than a thousand actions in numerous federal judicial districts brought, in large part, by public utilities against virtually every manufacturer of electrical equipment. The sudden influx of civil antitrust actions led to the creation of ad hoc procedures to coordinate the litigation before a smaller number of judges to eliminate duplicative discovery and pretrial proceedings.

Section 1407 was intended to serve as a permanent solution to the problem that large multidistrict litigations pose to the federal Judiciary's ability to administer its civil docket efficiently and justly. The statute created a panel of seven circuit and district judges, no two of whom shall be from the same circuit, which is authorized to transfer civil actions involving one or more common questions of fact and pending in different districts to a single district for coordinated or consolidated pretrial proceedings. See 28 U.S.C. §1407(a). To distinguish from other forms of transfer and consolidation, transfer for coordinated or consolidated pretrial proceedings under Section 1407 is referred to as "centralization." The Panel may transfer actions for centralized pretrial proceedings only if it determines that transfer will be for the convenience of the parties and witnesses and will promote the just and efficient conduct of such actions. Id. Civil actions transferred to multidistrict litigation (MDL) proceedings are remanded by the Panel at the conclusion of pretrial proceedings to their transferor districts (i.e., trial is conducted in the district of original filing), unless the actions were terminated during the course of pretrial proceedings. Id.

Over the past fifty years, MDLs have encompassed a wide variety of civil litigation in the federal courts, but antitrust litigations have always constituted a core category of cases subject to centralization. Section 1407 contains one exception with respect to antitrust MDLs—enforcement actions by the United States arising under the federal antitrust laws are not subject to transfer under Section 1407. See 28 U.S.C. §1407(g). Congress has amended Section 1407 only once. As part of the Hart Scott Rodino Antitrust Improvements Act of 1976, Congress added subsection (h), which authorizes the Panel to consolidate and transfer any action brought under 15 U.S.C. §15c (i.e., State *parens patriae* actions) for both pretrial purposes and trial. See 28 U.S.C. §1407(h).

CONCERNS

H.R. 3460 would amend 28 U.S.C. §1407 to limit the Panel's ability to centralize civil actions brought by States under the antitrust laws of the United States and delete the subsection added by the Hart Scott Rodino Antitrust Improvements Act of 1976. Congress to date has never amended Section 1407 to restrict the Panel's ability to centralize civil actions. Doing so in this instance raises several concerns that merit Congress's consideration.

H.R. 3460 May Negatively Impact the Efficiency and Conduct of Antitrust MDLs

Restricting the Panel's ability to centralize State antitrust actions could negatively impact the efficiency and conduct of

antitrust MDLs. When the Panel centralizes actions under Section 1407, it considers whether centralization will enhance convenience and efficiency with respect to the parties, witnesses, and the federal Judiciary as a whole—the Panel does not limit its consideration to the impact on any one party in isolation. In general, MDL litigation is most efficient when all related actions are centralized before a single judge. Doing so minimizes the potential for duplicative discovery and motion practice, eliminates the potential for inconsistent pretrial schedules or rulings, and conserves the resources of the parties, counsel, and the Judiciary. To the extent there are actions with different legal issues or concerns, the MDL judge can formulate a pretrial program that allows pretrial proceedings with respect to any non-common issues to proceed concurrently with pretrial proceedings on common issues (for example, by creating a separate discovery or motion track for certain actions). This ensures that pretrial proceedings will be conducted in a streamlined manner leading to a just and expeditious resolution of all actions to the overall benefit of the parties.

Excepting State antitrust actions from centralization can only increase the number of actions (and, hence, the number of independent parties and courts) outside the ambit of the MDL. Related actions that cannot be centralized can introduce case management difficulties into the MDL. Parties and courts in actions pending outside the MDL may (either actively or inadvertently) undermine attempts to coordinate and streamline discovery and pretrial practice in the litigation. For instance, such actions may be subject to different pretrial schedules, parties and witnesses might be subject to duplicative discovery, and the courts might issue inconsistent pretrial rulings pertaining to the same parties. It also is possible that substantively inconsistent rulings could issue—such as with respect to market definition or which standard of review (per se or rule of reason) applies to a given case. Given the nationwide scope of these antitrust litigations, such inconsistent rulings may complicate proceedings and sow confusion not only among the courts and parties, but also in the marketplace.

H.R. 3460 May Result in Inefficient Judicial Administration of Antitrust Litigation

Apart from the general impact on efficiency caused by increasing the number of actions that cannot be centralized, there could be particular inefficiencies created by excepting State antitrust actions from centralization. States are, in many ways, similar to private antitrust plaintiffs. For instance, States may sue because they have suffered a direct antitrust injury (e.g., if the State directly purchased a product subject to an alleged price fixing conspiracy). Along with their claims under the federal antitrust laws, States may also include claims brought under state antitrust law for “indirect” antitrust damages not permitted under federal antitrust law. Both types of claims are substantially similar to those presented by private plaintiffs asserting antitrust injury as direct or indirect purchasers. As such, these type of State antitrust claims will present factual and legal issues that are similar or identical to those presented by the claims of the private plaintiffs. These common claims generally will be most efficiently litigated in a centralized proceeding. Notably, similar claims by the United States for civil damages due to injury to the government itself are not excluded from centralization under Section 1407. See 28 U.S.C. §1407(g) (stating that the exemption for claims brought by the United States as a complainant under the antitrust laws “shall not include section

4A of the Act of October 15, 1914, as added July 7, 1955 (69 Stat. 282; 15 U.S.C. 15a)).

In addition, States may bring federal antitrust claims on behalf of their citizens who have suffered harm due to the alleged anti-competitive conduct (parens patriae actions). Those citizens may be class members in private antitrust actions. Indeed, Section 4C of the Clayton Act, 15 U.S.C. §15c, imposes on State parens patriae actions notice and opt out requirements akin to those for private class actions under Federal Rule of Civil Procedure 23. Courts also are statutorily obligated to exclude from any award in a parens patriae action any amounts that duplicate awards in private actions. See 15 U.S.C. §15c(a)(1). A single MDL judge usually will be best positioned to coordinate state and private litigations.

H.R. 3460 Could Adversely Affect the Interest of States

Excluding State antitrust actions from MDL proceedings could adversely affect the interests of the States. While States might gain greater autonomy with respect to their individual actions, they would lose much of their ability to participate in and influence the centralized proceedings. Collaboration between private plaintiffs and State Attorneys General also may be reduced, particularly if the States retain outside counsel to prosecute their antitrust claims. Such counsel may have attorneys’ fees or other incentives inconsistent with close coordination with the MDL. This could result (absent coordination between the different courts) in competing pretrial schedules and inconsistent orders that complicate the management and adjudication of both the State antitrust action and the MDL.

H.R. 3460 Could Undermine the Panel’s Efforts to Enhance Coordination with Federal Antitrust Litigation

Excluding State antitrust actions from centralization could undermine the Panel’s efforts to facilitate coordination and cooperation between private antitrust litigation and antitrust actions brought by the United States. Where there is a federal enforcement action or investigation that cannot be included in a given antitrust MDL, the Panel often will centralize the MDL in the court where the federal antitrust action or grand jury proceedings are pending to facilitate any appropriate and necessary coordination with the private actions. By multiplying the number of actions excluded from centralization under Section 1407, the proposed legislation might eliminate this alternative means of facilitating coordination with respect to litigations involving both federal and state antitrust actions.

CONCLUSION

Thank you for considering these comments. We request that the Committees of the Judicial Conference and the Panel have the opportunity to conduct more in-depth analysis of the legislation before any further consideration by Congress.

Sincerely,

ROSLYNN R. MAUSKOPF,
Director.

PROGRESSIVE POLICY INSTITUTE (PPI)
September 26, 2022.

Hon. NANCY PELOSI,
Speaker, House of Representatives,
Washington, DC.
Hon. STENY HOYER,
Majority Leader, House of Representatives,
Washington, DC.
Hon. KEVIN MCCARTHY,
Minority Leader, House of Representatives
Washington, DC.

DEAR SPEAKER PELOSI, LEADER MCCARTHY,
AND LEADER HOYER: State enforcement of

antitrust law plays a key role in protecting consumer welfare in the face of corporate monopolies. However, the national nature of our economy means that, in many cases, consumers across state lines are buying the same products and services. H.R. 3460, the State Antitrust Enforcement Venue Act, retreats from the national nature of many markets by attempting to refocus antitrust law on a state-by-state basis. It makes this shift by preventing venue transfers for antitrust cases brought by state attorneys general in favor of a system where states can bring antitrust claims against companies with more control over the venue in which these cases are carried out. A major change such as this will have unforeseen consequences in a variety of antitrust situations. It is for this and the following reasons we urge you to oppose H.R. 3460, which is incorporated in the House Rules Committee notice hearing for the modified version of H.R. 3843, the Merger Filing Fee Modernization Act.

A July 2021 letter from the Director of the Administrative Office of the U.S. Courts explains the ways in which the bill would reduce efficiency in the American judicial system. It highlights that currently under 28 U.S. Code §1407 similar civil cases in different districts are consolidated by the Judicial Panel on Multi-District Litigation, which then transfers the case to a single district. This can be requested by the defendant and the intent is to minimize duplicative processes and prevent inconsistent rulings.

By discarding this means for centralization through the passage of H.R. 3460, the processes through which states approach antitrust cases is fundamentally changed. As is pointed out by the Administrative Office of the U.S. Courts, efficiency is compromised, as courts will need to separately engage in similar discovery and pretrial proceedings in different venues, even in cases where it would conserve the time of the court and taxpayer money to carry out in a single district.

Additional concerns lie in the potential for politically motivated judicial consequences associated with the bill. The bill’s elimination of the consolidation process for antitrust cases brought under 15 U.S.C. §15c will give rise to a reality where different states could simultaneously pursue their own separate antitrust actions against the same companies across various federal courts. As such, state attorneys generals may harass companies that are politically unpopular in a particular state or region.

Creating a fragmented and inefficient antitrust system is not the optimal remedy for potential corporate antitrust violations. We urge you to oppose H.R. 3460, the State Antitrust Enforcement Venue Act, and avoid the unintended consequences that may come with it.

Sincerely,

Progressive Policy Institute (PPI), Center for New Liberalism (CNL), Computer & Communications Industry Association (CCIA), Blackstone Valley Chamber of Commerce, South Shore Chamber of Commerce, Council Bluffs Chamber of Commerce, Lawsuit Reform Alliance of New York, Florida State Hispanic Chamber of Commerce.

U.S. CHAMBER OF COMMERCE,
GOVERNMENT AFFAIRS,

Washington, DC, September 27, 2022.

TO THE MEMBERS OF THE HOUSE OF REPRESENTATIVES: The U.S. Chamber of Commerce strongly opposes in its current form H.R. 3843, the “Merger Filing Fee Modernization Act of 2022,” because it would stymie legitimate business transactions across sectors and industries, create needless new bureaucracy, and spur unwarranted litigation. The

Chamber will consider including votes related to this legislation in our "How They Voted" scorecard.

The egregious provisions of the bill include:

Venue. While no longer retroactive as it was in previous drafts of the bill, the Multi District Litigation (MDL) provisions could force firms into simultaneously defending against private litigants, the federal government, and various states in dozens of different courtrooms around the country. The Administrative Office of the United States Courts indicates that such legislation could harm MDL participants more generally by harming judicial efficiency and administration and hamper coordination of state and federal enforcement actions with MDLs. Moreover, these problems would be compounded when states employ private, outside contingency fee attorneys to maximize profits through litigation, rather than to protect consumers or competition.

Transparency and Fees. Only a handful of the thousands of mergers filed each year present potential competition concerns. Yet, the agencies have refused to meet the statutory deadlines for process and accountability under the Hart-Scott-Rodino (HSR) Act. Rather, regulators issue notice letters to firms that essentially dare companies to close mergers at the risk of future action. It is unacceptable to engage in abusive procedural gimmicks. Congress should not raise merger fees while the agencies are currently engaging in process violations.

Foreign Subsidy Notification Provision. Despite efforts to improve the subsidy notification provisions, they remain un-administrable. The legislation provides no clear definition as to what constitutes a subsidy, there is no definition as to what qualifies as a "country of concern," and the disclosure of subsidies has zero bearing on merger review and the merger standard under the law. Subsidies involved in how a deal is financed are not a concern under the antitrust laws, and concerns tied to subsidies the merging parties have received will not result in the government successfully blocking the merger as a remedy to predatory pricing concerns.

The Chamber urges you to oppose this legislation.

Sincerely,

EVAN JENKINS,
Senior Vice President,
U.S. Chamber of Commerce.

Mr. DESAULNIER. Mr. Speaker, I always say that I respect and admire my friend from the San Francisco Bay Area. Sometimes, we disagree.

Mr. Speaker, I reserve the balance of my time.

Mrs. FISCHBACH. Mr. Speaker, I yield 2 minutes to the gentleman from Colorado (Mr. BUCK).

Mr. BUCK. Mr. Speaker, Big Tech is crushing competition and crushing conservative speech. H.R. 3843 contains three important measures that will help America with Big Tech.

The first gives State attorneys general the ability to file their lawsuits and keep those lawsuits in their States. The 48 State attorneys general have asked Congress to move this bill forward. It received broad bipartisan support in the Committee on the Judiciary.

The second is a bill that Senator HAWLEY and our colleague, Congressman FITZGERALD, have supported. It basically prohibits China from buying small high-tech companies so that they can steal our innovation.

The third bill that is combined with H.R. 3843 raises filing fees. Make no mistake, there are controls on these filing fees. They have to be appropriated for the FTC by the Appropriations Committee. That is a control. The Appropriations Committee, I hope, will be under Republican control in the next Congress, and it will be controlled so that nobody in the FTC is using these funds in an inappropriate way, other than reviewing the mergers at issue.

Mr. Speaker, my friend Senator CRUZ has said it absolutely correctly: The greatest threat to democracy in this country is Big Tech.

Senator LEE, Senator COTTON, and Senator GRASSLEY support the House version of this bill because it is a conservative bill, a bipartisan bill, and a bill that will help America deal with Big Tech. I hope my colleagues will support H.R. 3843.

Mr. DESAULNIER. Mr. Speaker, I include in the RECORD the names and correspondence of several organizations I will mention just briefly. These are 40 different organizations that have written to Congress in support of H.R. 3843, the Merger Filing Fee Modernization Act.

Amongst them are Accountable Tech, American Trust Institute, American Family Voices, Artist Rights Alliance, Center for Democracy and Technology, Center for Digital Democracy, Common Sense Media, Consumer Action, Consumer Reports, Free Press Action, Open Markets Institute, Our Revolution, the Service Employees International Union, the International Brotherhood of Teamsters, and the Writers Guild of America West, amongst others. We have covered a broad group here.

These organizations include:

Accountable Tech, American Antitrust Institute, American Economic Liberties Project, American Family Voices, Artist Rights Alliance, Asian Pacific American Labor Alliance, AFL-CIO, Athena, Campaign for Family Farms and the Environment, Center for Democracy & Technology, Center for Digital Democracy, Center for Economic and Policy Research, Common Sense Media, Consumer Action.

Consumer Reports, Demand Progress, Demos, Economic Security Project Action, Electronic Privacy Information Center (EPIC), Farm Action Fund, Fight for the Future, Free Press Action, Future of Music Coalition, Institute for Local Self-Reliance, International Brotherhood of Teamsters, National Grocers Association, New York Communities for Change.

Open Markets Institute, Our Revolution, P Street/Progressive Change Campaign Committee, People's Parity Project, Public Citizen, Public Knowledge, Revolving Door Project, Service Employees International Union, The Democratic Coalition, The Tech Oversight Project, UltraViolet Action, Writers Guild of America West (WGAW).

Mr. DESAULNIER. Mr. Speaker, I reserve the balance of my time.

Mrs. FISCHBACH. Mr. Speaker, if we defeat the previous question, Republicans will offer an amendment to the rule allowing for the immediate consideration of H.R. 6184, the HALT Fentanyl Act.

I ask unanimous consent to insert the text of my amendment into the RECORD, along with extraneous material, immediately prior to the vote on the previous question.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mrs. FISCHBACH. Mr. Speaker, over 100,000 people died from fentanyl overdoses in a 1-year span, according to the CDC. That is a 30 percent increase from the year before.

Fentanyl is now the number one cause of death for Americans ages 18 to 45. I think we can all agree that something must be done to put a stop to this heartbreaking epidemic.

□ 1815

Fentanyl has been temporarily classified as a schedule I substance. This classification strengthens law enforcement's ability to prosecute fentanyl traffickers, and DEA reports that it has acted as an effective deterrent.

The HALT Fentanyl Act would make the schedule I classification permanent and would also promote research by removing regulations and streamlining the research process. We should do everything we possibly can to put an end to the devastation caused by fentanyl in this country, and the HALT Fentanyl Act is one piece of the puzzle that could make a real difference.

Mr. Speaker, I yield 5 minutes to the gentleman from Virginia (Mr. GRIFFITH) to speak further on the amendment.

Mr. GRIFFITH. Mr. Speaker, I rise to oppose the previous question so that we can immediately consider my bill, H.R. 6184, the Halt All Lethal Trafficking of Fentanyl Act.

Every Member of this body knows someone who has been affected by the drug overdose epidemic plaguing our country.

Recent provisional data from the Centers for Disease Control and Prevention indicates that during 2021 there were more than 107,000 overdose deaths that occurred in the United States, an increase of nearly 15 percent from the previous year.

These record numbers are due in large part to the increasing presence of fentanyl and fentanyl analogues, which are approximately 100 times more potent than morphine and 50 times more potent than heroin.

Because fentanyl has a proven medical use, it is considered a schedule II narcotic. But illicit derivatives of fentanyl, also called fentanyl analogues or fentanyl-related substances, do not often demonstrate a medical value. Right now they are considered schedule I substances, but only because of a temporary scheduling order which expires on December 31.

My bill aims to curb overdose deaths by permanently scheduling fentanyl analogues as schedule I substances. This will strengthen law enforcement's ability to prosecute fentanyl traffickers and act as a deterrent.

The HALT Fentanyl Act also promotes research by removing barriers to that research. In the Energy and Commerce Committee, we heard there are as many as 4,800 analogues. Our experts at the NIH, the FDA, and other agencies have studied roughly 30 of these 4,800 analogues.

By encouraging research of schedule I substances like fentanyl analogues, we can better understand how these substances work and how we can prevent potentially harmful impacts in the future.

The problem is that if this law expires and doesn't become permanent, those 4,800 analogues are arguably legal—I would submit they are legal—and we have to pass a law on each one of them. The HALT Fentanyl Act makes it so we don't have to do that.

Should we discover that one of those 4,800 or maybe two have a legitimate medical purpose, then we can come back in and consider that, but it is a whole lot easier to figure out what we have already done research on when we have done research on 30 of 4,800 analogues than it is to say, wait a minute, we are going to make all of these legal, and then figure out which ones of them are the most dangerous to the American public. I would submit they are all dangerous and that Congress must pass the HALT Fentanyl Act now.

Mr. DESAULNIER. Mr. Speaker, I reserve the balance of my time.

Mrs. FISCHBACH. Mr. Speaker, I yield 3 minutes to the gentleman from Texas (Mr. BURGESS).

Mr. BURGESS. Mr. Speaker, I rise to speak on and urge defeat of the previous question so that we can immediately take up H.R. 6184, the HALT Fentanyl Act.

Mr. Speaker, there is a crisis on our southern border greater than we have ever seen due to the policies put in place by the Biden administration. Almost 2½ million migrants have crossed our southern border in fiscal year 2022. In 2021 alone, border officials encountered nearly 2 million illegal immigrants and seized over 11,000 pounds of fentanyl. This is a public health crisis that demands immediate attention.

H.R. 6184, the HALT Fentanyl Act, places fentanyl-related analogues into schedule I of the Controlled Substances Act and establishes a new registration process for schedule I research funding by the Department of Health and Human Services and the Department of Veterans Affairs.

The move to permanently schedule fentanyl as schedule I is a necessary tool for the Drug Enforcement Administration to work with other agencies and law enforcement officials to address the threat of illicit fentanyl.

According to the Centers for Disease Control and Prevention, fentanyl is now the number one cause of death for Americans 18 to 45, surpassing suicide, COVID-19, and car accidents.

Mr. Speaker, we have all heard stories about how drug dealers are using social media and apps, like Snapchat,

to infiltrate chats with teens or young kids and sell them these illicit drugs. We have no idea what they are selling and whether or not the drug is laced with fentanyl.

Two Congresses ago, the Energy and Commerce Committee worked hard on the SUPPORT Act to deal with what at the time was called an opiate crisis, but we have moved on from that, and now we have a fentanyl crisis.

This is a different disease. It demands attention at the southern border, it demands attention to the analogues being shipped to Mexico from China, and it demands that our Drug Enforcement Administration have the tools it needs to interrupt this deadly epidemic of drug overdose deaths. One death is too many, and we need to equip our communities to address this issue from the source.

If it has changed so much in 4 years, imagine what it will look like in 10 years if nothing is done now. I urge Members to defeat the previous question so we can immediately take up this important bill.

Mr. DESAULNIER. Mr. Speaker, I reserve the balance of my time.

Mrs. FISCHBACH. Mr. Speaker, I yield 3 minutes to the gentleman from Georgia (Mr. CARTER).

Mr. CARTER of Georgia. Mr. Speaker, I rise today to oppose the previous question so that we can immediately consider H.R. 6184, the HALT Fentanyl Act, and stop the deadly flow of fentanyl into our communities.

The failure of the Biden administration to control the southern border has resulted in record levels of deadly synthetic drugs, like fentanyl, pouring directly into American communities. So far this fiscal year, over 10,000 pounds of fentanyl have been seized at the southern border, with even more slipping through into our country. That is enough fentanyl to kill every American eight times over.

There is little doubt that the surge of drug seizures at our border is closely connected to the surge of drug overdose deaths in the United States. In fact, every 7½ minutes, someone in the United States dies from fentanyl poisoning. Every 7½ minutes. There is an opportunity here for us to work together to help stem the flow of deadly fentanyl and its analogues into our country.

In my home State of Georgia, fentanyl overdose deaths in teens are up 800 percent. 800 percent. Tragic overdoses like this are happening every day all over the country.

Even the CDC reports that fentanyl is now the leading cause of death in the U.S. for adults ages 18 to 45. How can anyone seriously argue that a drug 50 times more potent than heroin that almost always proves to be fatal when ingested should ever be legal?

Despite this crisis, the President did not request a single additional penny for the border crisis or the fentanyl crisis in the funding request for the CR. That is despicable.

Again, these products are manufactured illegally and are largely brought to the United States through the southern border. To save lives, we must secure the border and halt the flow of fentanyl.

I have visited the border several times to see this crisis firsthand. Unfortunately, our President has never visited our southern border. Never been there. Not even once.

With a record-high number of illegal immigrants, smugglers and cartels are using this as an opportunity to traffic more fentanyl substances.

Unfortunately, President Biden and his administration have elected to leave our border wide open, inviting drug traffickers to bring fentanyl substances into the country and distribute it in our streets.

This should not be a partisan issue. Fentanyl does not discriminate. It doesn't care if you are a Republican or a Democrat.

The individuals manufacturing and distributing fentanyl and its analogues are criminal, and they are killing us. This is not an issue that is going away. It is only getting worse every day.

If the President would visit the border, he would be able to talk to the agents firsthand and see for himself just how serious the issue is. Our communities are at risk, and our loved ones are dying. President Biden has ignored this public health crisis for far too long.

It is past time to make this scheduling classification permanent, and I am proud to support the HALT Fentanyl Act to do just that.

Mr. Speaker, let's pass this bill, secure the border, stem the tide of the growing fentanyl crisis, and save lives.

Mr. DESAULNIER. Mr. Speaker, I include in the RECORD The Washington Post article titled: "U.S. arrests along Mexico border top 2 million a year for first time."

[From the Washington Post, Sept. 19, 2022]

U.S. ARRESTS ALONG MEXICO BORDER TOP 2 MILLION A YEAR FOR FIRST TIME

(By Nick Miroff)

U.S. authorities made more than 2 million immigration arrests along the southern border during the past 11 months, marking the first time annual enforcement statistics have exceeded that threshold, according to figures provided by senior Biden administration officials Monday.

In August, U.S. Customs and Border Protection detained 203,598 migrants crossing from Mexico, the latest figures show, putting authorities on pace to tally more than 2.3 million arrests during the government's 2022 fiscal year, which ends Sept. 30. The total, which includes some people apprehended more than once, far exceeds last year's record of more than 1.7 million arrests.

The historic migration wave this year has been driven by soaring numbers of border-crossers from outside Mexico and Central America, the two largest traditional sources of illegal entries. Migrants from Venezuela, Nicaragua and Cuba accounted for more than one-third of those taken into custody along the southern border last month, according to Customs and Border Protection, a 175 percent increase over August 2021.

Biden administration officials blamed the governments of those countries, whose strained relations with Washington severely limit the ability of authorities to send them deportees. Many of the migrants apply for humanitarian protection in the United States and tend to have strong asylum claims.

"Failing communist regimes in Venezuela, Nicaragua, and Cuba are driving a new wave of migration across the Western Hemisphere, including the recent increase in encounters at the southwest U.S. border," Customs and Border Protection Commissioner Chris Magnus, said in a statement. "Those fleeing repressive regimes pose significant challenges for processing and removal," he said, using the official term for deportations.

Biden administration officials continue to insist they are building a "safe, orderly and humane" immigration system while blaming the Trump administration for "dismantling" channels for legal migration.

Critics say Biden administration officials have fallen far short of meeting their refugee admission goals, and the number of migrants who have died this year attempting to cross into the United States is at an all-time high. Scores have drowned in the Rio Grande in recent months, and 53 were killed in June when smugglers in Texas packed migrants into a sweltering tractor trailer with a failing cooling system.

Republican lawmakers blame the record number of crossings on President Biden's reversal of Trump administration border policies. Over the past several months, the Republican governors of Texas and Arizona have sent more than 10,000 migrants on buses to Washington, New York and other northern destinations to put pressure on Democrats by straining relief services in their jurisdictions.

Last week, Florida Gov. Ron DeSantis (R) shipped a planeload of Venezuelans to Martha's Vineyard in Massachusetts, transporting them to a wealthy island enclave with limited services for migrants.

Biden administration officials also say the high border numbers are distorted by repeat crossing attempts by migrants who have been previously arrested. Last month, 22 percent of those taken into custody had a prior arrest in the previous 12 months, the latest figures show.

One factor Biden administration officials blame for the repeat crossings is the Title 42 emergency public health policy, implemented at the start of the pandemic, that allows U.S. agents to rapidly "expel" some migrants back to Mexico. The Biden administration's attempt to phase out Title 42 was blocked in federal court last spring.

The latest figures show the percentage of border-crossers expelled under Title 42 has been falling and remains far lower under Biden than President Donald Trump. About 36 percent of the 203,598 migrant "encounters" resulted in an expulsion last month, down from 83 percent when Biden took office.

Sen. John Cornyn (R-Tex.), said Monday that the strain on Democratic-run cities will force the administration to see the border surge as a crisis. "Maybe, just maybe, they'll see that what's happening along our border every day is dangerous, unsustainable, and a problem that we need to work on together to address," he said.

Biden officials defending the administration's border record pointed to a decline in the number of Mexican and Central American migrants arrested over the past three months as a sign their enforcement policies are having some success, including efforts to target smuggling organizations in Latin America.

Mr. DESAULNIER. Mr. Speaker, the numbers don't lie. If the annual num-

ber of apprehensions at the border is set to break records, that means fewer migrants are making it into the country. The notion that Biden is doing nothing is just absolutely not true.

Just secondarily, my good friend and co-chair of the Cancer Survivors Caucus from Georgia, we have a wonderful relationship. On this I agree, but I disagree on the process. As somebody who has spent a lot of time on opioid abuse, and we know that in our experience with people like myself who survived cancer, particularly more painful ones, that is a product when used properly that can bring relief to people, but we know about the abuse. As you said, a lot of that led to fentanyl.

We are against illegal drugs hurting Americans. We want to support effective remedies to that. I would say that one of the most effective things we can do—having had a long experience personally and professionally in behavioral health—is to invest in the kind of bill we have in front of us—with all due respect, with my name on it—to get upstream, so we make sure that people have the resources, evidence-based resources. So it is not as subjective to get the services they need to protect themselves in an, unfortunately, far-too-free market when it comes to the abuse of both legal and illegal drugs.

With all due respect, again, I am happy to work with the gentleman, but I really think, from my perspective, it is an argument to engage in the investment in behavioral health and mental health services. I will still work with the gentleman to make sure people aren't bringing these awful products across our border.

Mrs. FISCHBACH. Mr. Speaker, I yield 4 minutes to the gentlewoman from Florida (Mrs. CAMMACK).

Mrs. CAMMACK. Mr. Speaker, I rise today to oppose the previous question so that we can immediately consider H.R. 6184, the HALT Fentanyl Act.

Before I begin, I have to address something that was said just now. I am the wife of a first responder. My husband sees these overdoses every single day.

In my community, in just this year, we have apprehended bricks of fentanyl stamped with border cartels' stamps on them. We know it is coming from the border. We know it is being trafficked across, both in trucks at ports of entry but also illegally. We know this to be a fact, and if we do not secure the border this will continue to happen.

I will say, as the wife of a first responder, someone whose husband has continually responded to these calls and is reviving people who have been poisoned by fentanyl, it is not a matter of if he, himself, overdoses, it is when. And that is going to be a very bad day because I think that Members of this Chamber need to be held responsible for the open border policies that this administration continues to allow. But I digress.

Mr. Speaker, 108,000. That is the number of Americans who died from

drug overdoses last year. Of those, more than 80,000 were connected to opioids. The lion's share of those opioid deaths were linked to fentanyl.

Now, it is important that we remember that these numbers are actually people. They are mothers, fathers, brothers, sisters, sons, daughters, aunts, uncles. They are people. Not statistics. They are humans. They represent millions of families who will never see their son, daughter, husband, wife, brother, sister, father ever again. Millions of people whose families have been shattered and feel helpless, broken, and angry as these horrific substances destroyed their communities and their family.

These thousands of victims represent communities crushed by this epidemic, swept away by the flood of lethal substances that are ripping apart the fabric of our society. These thousands of people lost lay bare the denial, the weakness, and the lack of compassion that this administration and my colleagues across the aisle have shown through their ambivalence toward border security, our Nation's security, as literally tons of fentanyl is trucked and walked across the southern border and into our communities.

A few months ago, a mother from my district cried in my office as she talked about her beautiful daughter, Mackenzie, who died from fentanyl poisoning, not overdosing, poisoning, after taking what she thought was a Xanax. She was 28 years old.

Now, unfortunately, Mackenzie's story is not unique. It is not rare. Her mother, Rebecca, is now dedicating her life to saving mothers across the country from the pain that she has endured from a preventable loss and their daughters from Mackenzie's fate.

□ 1830

To my colleagues on the left, you control this Chamber, so it is up to you to decide. How many more Mackenzies have to die before you will take action?

You can pretend that there is no crisis at the border. We see that. That is evidenced in your remarks. But we know that is a lie. You visit any community in this country, and you will see that it has been ravaged by the death and destruction wrought by fentanyl. You cannot deny it. Your constituents know it. The American people know it.

Mr. Speaker, it is time for our colleagues across the aisle to wake up. So I stand here once again, as I did back in March, fighting against the horrors of the opioid epidemic that have a stranglehold on our communities. We once again have an opportunity to take a stand today, not as Republicans or Democrats but as Americans and concerned citizens, for those that have lost their lives, but also for those potentially in the future. The families of those who lost deserve this.

Today is an opportunity to act. Today is an opportunity to put people above politics. I commend my friend,

the gentleman from Virginia, for his great work and for sticking with this bill and seeing it across the finish line.

I urge my colleagues, please, think with your hearts, perhaps in vain but with hope, to defeat the previous question so that we can immediately consider this bill, the HALT Fentanyl Act.

The SPEAKER pro tempore (Ms. MCCOLLUM). Members are reminded to direct their remarks to the Chair.

Mr. DESAULNIER. Madam Speaker, I yield myself such time as I may consume. I would say in brief response that I have great respect, obviously, for our emergency responders. I appreciate what the gentlewoman's husband does for a living and what they have to go through. We all agree that we have to support thoughtful oversight to stop these drugs from getting into the hands of people who it can do great damage.

I have been to the border multiple times, both as a Member of Congress and as a member of the California State Legislature. We have a problem, and it has been a problem through Republican administrations and Democratic administrations, both in State houses in the border States and here in Washington, D.C.

We are not for open borders. We want to stop people being harmed by illicit drugs. So the idea that we are not, I would respectfully say that is not accurate.

Madam Speaker, I reserve the balance of my time.

Mrs. FISCHBACH. Madam Speaker, I am prepared to close, and I yield myself the balance of my time.

Madam Speaker, while I want to be in favor of these bills, Republicans are in agreement that the underlying problems these bills seek to solve are valid and warrant our attention. There are serious flaws with these bills as written that must be considered first. H.R. 7780 is a one-size-fits-all strategy that will not help the people on the ground. What a school in Minneapolis needs is not likely what a school in my rural district needs. Furthermore, it pushes people in the courts to settle disputes and discourages other methods of resolution.

H.R. 3843 trusts the FTC with no-strings-attached funding, even though the FTC is becoming increasingly partisan and cannot be trusted with more resources.

Madam Speaker, I oppose the rule, and I encourage other Members to do the same.

Madam Speaker, I yield back the balance of my time.

Mr. DESAULNIER. Madam Speaker, I yield myself the balance of my time.

I will read a few numbers, particularly on the part of the rule that is the Mental Health Matters Act, which I am proud to be the author of with Chairman SCOTT.

Suicide is the second leading cause of death for ages of Americans 10 to 24; second for 12 to 18.

For adolescents, depression, substance abuse, and suicide are extremely

important concerns—an epidemic, I would say—among adolescents age 12 to 17.

In 2018 to 2019, 15.1 percent of young Americans had major depressive episodes; 36.7 had persistent feelings of sadness and hopelessness; 4.1 had a substance abuse disorder; 18 percent seriously considered attempting suicide; 16 percent made a suicide plan; and 10 percent attempted suicide.

Madam Speaker, 10 percent of America's young people have attempted suicide; 2.5 percent made suicide attempts requiring medical treatment.

For all those reasons, the part of the rule that is the Mental Health Matters Act is extremely important to this country. Is it perfect? Of course not, from every perspective of 535 Members of Congress and 435 Members of the House. But the need is too urgent, in my view, to wait. That is why it is so important that not just this rule passes but the bill is passed.

We need to put resources in the FTC with the most income inequality and consolidation of wealth through mergers. Not always in our best interest. It is important that the FTC has the resources it needs to actually enforce the statutes as they currently have.

Madam Speaker, we need to help Americans, and specifically teachers and students, get back to doing what they do best, teaching and learning.

The legislation before us on the rule will help provide the resources to improve mental health outcomes and educational attainment.

Madam Speaker, I urge a “yes” vote on the rule and the previous question.

The material previously referred to by Mrs. FISCHBACH is as follows:

AMENDMENT TO HOUSE RESOLUTION 1396

At the end of the resolution, add the following:

SEC. 11. Immediately upon adoption of this resolution, the House shall proceed to the consideration in the House of the bill (H.R. 6184) to amend the Controlled Substances Act with respect to the scheduling of fentanyl-related substances, and for other purposes. All points of order against consideration of the bill are waived. The bill shall be considered as read. All points of order against provisions in the bill are waived. The previous question shall be considered as ordered on the bill and on any amendment thereto to final passage without intervening motion except: (1) one hour of debate equally divided and controlled by the chair and ranking minority member of the Committee on Energy and Commerce; and (2) one motion to recommit.

SEC. 13. Clause 1(c) of rule XIX shall not apply to the consideration of H.R. 6184.

Mr. DESAULNIER. Madam Speaker, I yield back the balance of my time, and I move the previous question on the resolution.

The SPEAKER pro tempore. The question is on ordering the previous question on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mrs. FISCHBACH. Madam Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 9 of rule XX, this 15-minute vote on ordering the previous question will be followed by 5-minute votes on:

Adoption of the resolution, if ordered; and

The motion to suspend the rules and pass H.R. 3482.

The vote was taken by electronic device, and there were—yeas 220, nays 208, not voting 4, as follows:

[Roll No. 455]

NOT VOTING—4

Donalds Mace
Kinzinger Zeldin

□ 1911

Mr. McHENRY, Ms. CHENEY, and Mr. KATKO changed their votes from “yea” to “nay.”

So the previous question was ordered.

The result of the vote was announced as above recorded.

Stated against:

Mr. DONALDS. Madam Speaker, Metal Detectors stopped me. Had I been present, I would have voted “NAY” on rollcall No. 455.

MEMBERS RECORDED PURSUANT TO HOUSE RESOLUTION 8, 117TH CONGRESS

Bacon (Stauber)	Carter (TX)	DeFazio

NATIONAL CENTER FOR THE ADVANCEMENT OF AVIATION ACT OF 2022

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, the unfinished business is the vote on the motion to suspend the rules and pass the bill (H.R. 3482) to establish the National Center for the Advancement of Aviation, as amended, on which the yeas and nays were ordered.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Indiana (Mr. CARSON) that the House suspend the rules and pass the bill, as amended.

This is a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 369, nays 56, not voting 7, as follows:

[Roll No. 457]

PERMISSION FOR MEMBER TO BE
CONSIDERED AS FIRST SPONSOR
OF H.R. 8137

Mr. SMITH of Nebraska. Madam Speaker, I ask unanimous consent that I may hereafter be considered to be the first sponsor of H.R. 8137, a bill originally introduced by Representative WALORSKI of Indiana, for the purpose of adding cosponsors and requesting reprintings pursuant to clause 7 of rule XII.

The SPEAKER pro tempore (Ms. BOURDEAUX). Is there objection to the request of the gentleman from Nebraska?

There was no objection.

□ 1945

ADVANCING UNIFORM TRANSPORTATION OPPORTUNITIES FOR VETERANS ACT

Mr. TAKANO. Madam Speaker, I move to suspend the rules and pass the bill (H.R. 3304) to amend title 38, United States Code, to authorize the Secretary of Veterans Affairs to provide or assist in providing an additional vehicle adapted for operation by disabled individuals to certain eligible persons, and for other purposes, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 3304

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Advancing Uniform Transportation Opportunities for Veterans Act" or the "AUTO for Veterans Act".

SEC. 2. ELIGIBILITY FOR DEPARTMENT OF VETERANS AFFAIRS PROVISION OF ADDITIONAL AUTOMOBILE OR OTHER ADAPTED EQUIPMENT.

Section 3903(a) of title 38, United States Code, is amended—

(1) in paragraph (1), by striking "paragraph (2)" and inserting "paragraphs (2) and (3)"; and

(2) by adding at the end the following new paragraph:

"(3) The Secretary may provide or assist in providing an eligible person with an additional automobile or other conveyance under this chapter—

"(A) if more than 25 years have elapsed since the eligible person most recently received an automobile or other conveyance under this chapter; or

"(B) beginning on the day that is 10 years after date of the enactment of the AUTO for Veterans Act, if more than 10 years have elapsed since the eligible person most recently received an automobile or other conveyance under this chapter."

SEC. 3. DEPARTMENT OF VETERANS AFFAIRS TREATMENT OF CERTAIN VEHICLE MODIFICATIONS AS MEDICAL SERVICES.

Section 1701(6) of title 38, United States Code, is amended by adding at the end the following new subparagraph:

"(I) The provision of medically necessary van lifts, raised doors, raised roofs, air-conditioning, and wheelchair tie-downs for passenger use."

SEC. 4. MODIFICATION OF CERTAIN HOUSING LOAN FEE.

(a) EXTENSION.—The loan fee table in section 3729(b)(2) of title 38, United States Code, is amended by striking "January 14, 2031" each place it appears and inserting "May 16, 2031".

SEC. 5. DETERMINATION OF BUDGETARY EFFECTS.

The budgetary effects of this Act, for the purpose of complying with the Statutory Pay-As-You-Go Act of 2010, shall be determined by reference to the latest statement titled "Budgetary Effects of PAYGO Legislation" for this Act, submitted for printing in the Congressional Record by the Chairman of the House Budget Committee, provided that such statement has been submitted prior to the vote on passage.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from California (Mr. TAKANO) and the gen-

tleman from Illinois (Mr. BOST) each will control 20 minutes.

The Chair recognizes the gentleman from California.

GENERAL LEAVE

Mr. TAKANO. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on H.R. 3304, as amended.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. TAKANO. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I rise in support of H.R. 3304, as amended, the AUTO for Veterans Act.

I was proud to join Representative LIZZIE FLETCHER in introducing H.R. 3304, and I thank her for her tireless work with the veteran community, which has led to this bill being considered on the floor today.

Currently, disabled veterans are only allowed a single grant to modify a vehicle to provide them mobility. This means there are cars that are 25, 30, or even 40 years old on the road because the veteran has no other option.

When you consider that the average life of an automobile is less than 12 years, we are asking veterans to incur additional costs and risks by driving excessively old cars for decades.

The AUTO for Veterans Act finally expands eligibility for disabled veterans to obtain vehicles modified for their disabilities more than once in their lifetime.

Upon passage into law, H.R. 3304 would immediately allow veterans who have waited decades to acquire a new vehicle and, after giving those veterans priority, would eventually expand the benefit to cover those veterans who updated their vehicle 10 years ago.

This legislation also expands the definition of "medical services" to include certain vehicle modifications so that veterans can attend medical appointments.

This legislation has long been a priority for veterans and is supported by DAV, VFW, PVA, and countless other veterans organizations.

This legislation is fully paid for and delivers for disabled veterans who gave us so much.

I thank the ranking member for his support of this legislation. I know we have both wanted to fix this longstanding problem.

Madam Speaker, I wholeheartedly support this bill, and I urge my colleagues to do the same. I reserve the balance of my time.

Mr. BOST. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I rise today in support of the AUTO for Veterans Act, as amended.

This bill would help severely disabled service-connected veterans purchase and adapt a vehicle 10 years after they

purchased their first one. Current law only provides veterans with the funds for one vehicle during their lifetime. We all know that the life of a car is not infinite. Maybe my father didn't, but most people do.

For too long, disabled veterans have had to drive vehicles that have logged hundreds of thousands of miles. This bill would help a deserving population with the safe and reliable transportation they need. I am also pleased that this bill is fully offset.

The underlying bill is very similar to H.R. 1361, the AUTO for Veterans Act, which was introduced this Congress and last by our colleague, Congressman MEUSER. While I would have preferred that we consider his version today, this bill will help many disabled veterans, and it has my full support.

I thank the PVA and the DAV for their continued advocacy for this proposal.

Madam Speaker, I encourage all Members to support this bill, and I reserve the balance of my time.

Mr. TAKANO. Madam Speaker, I reserve the balance of my time.

Mr. BOST. Madam Speaker, I yield 2 minutes to the gentleman from Pennsylvania (Mr. MEUSER).

Mr. MEUSER. Madam Speaker, I thank Ranking Member BOST for his leadership on this important bill.

I rise in support of the AUTO for Veterans Act. This legislation would expand, as stated, access to the Department of Veterans Affairs' automobile grant, which assists severely disabled veterans.

Veterans, especially those in rural communities, Madam Speaker, face transportation challenges, as we all know, that affect their quality of life and independence. Expanding the VA auto grant program is a commonsense step toward improving this program for men and women who made tremendous sacrifices serving our country.

Improving access to safe and reliable transportation for disabled veterans will ensure they can maintain their independence and lead fulfilling, healthy lives.

I introduced the AUTO for Veterans Act, a bill nearly identical to this legislation, in the last Congress, and it did receive support from numerous veterans service organizations and garnered over 70 cosponsors, including Democrats and Republicans. I am glad that my Democrat colleagues were able to see the merit of this legislation, and I do look forward to the Senate taking action on this legislation and providing much-needed support and independence for our wounded veterans.

Madam Speaker, I encourage all of my colleagues to support this bill, and I yield back the balance of my time.

Mr. TAKANO. Madam Speaker, I ask all of my colleagues to join me in passing H.R. 3304, as amended, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr.

TAKANO) that the House suspend the rules and pass the bill, H.R. 3304, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the yeas have it.

Mr. ROY. Madam Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this motion will be postponed.

FOOD SECURITY FOR ALL VETERANS ACT

Mr. TAKANO. Madam Speaker, I move to suspend the rules and pass the bill (H.R. 8888) to amend title 38, United States Code, to establish in the Department of Veterans Affairs an Office of Food Security, and for other purposes, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Food Security for All Veterans Act”.

SEC. 2. ESTABLISHMENT OF DEPARTMENT OF VETERANS AFFAIRS OFFICE OF FOOD SECURITY.

Chapter 3 of title 38, United States Code, is amended by adding at the end the following new section (and conforming the table of sections at the beginning of such chapter accordingly):

“§ 325. Office of Food Security

“(a) ESTABLISHMENT.—There is in the Department an office to be known as the ‘Office of Food Security’. There is at the head of the Office a Director, which shall be a career position.

“(b) RESPONSIBILITIES.—(1) The Director of the Office of Food Security shall carry out the following responsibilities:

“(A) To provide information to veterans concerning the availability of, and eligibility requirements for Federal nutrition assistance programs.

“(B) To collaborate with other program offices of the Department, including the Homeless Programs Office and the Office of Tribal Government Relations, to develop and implement policies and procedures to identify and treat veterans at-risk or experiencing food insecurity.

“(C) To collaborate with the Secretary of Agriculture and the Secretary of Defense on food insecurity among veterans, including by collaborating with the Secretaries to develop materials related to food insecurity for the Transition Assistance Program curriculum and other transition-related resources.

“(D) To develop and provide training, including training that may count towards continuing education or licensure requirements, for social workers, dietitians, chaplains, and other clinicians on how to assist veterans with enrollment in Federal nutrition assistance programs, including the supplemental nutrition assistance program and the special supplemental nutrition program for women, infants, and children established by section 17 of the Child Nutrition Act of 1966 (42 U.S.C. 1786).

“(E) To issue guidance to Department medical centers on how to collaborate with their State and local offices administering the supplemental nutrition assistance program.

“(2) In carrying out the responsibilities under paragraph (1), the Director shall consult with and provide technical assistance to the heads of other Federal departments and agencies, including the Department of Agriculture, Department of Defense, Department of Interior, and Department of Labor.

“(c) ANNUAL REPORT ON FOOD INSECURITY.—The Secretary of Veterans Affairs, in consultation with the Secretary of Agriculture, shall submit to the Committees on Veterans Affairs of the Senate and House of Representatives an annual report on veteran food insecurity. Each such report shall include data on the following:

“(1) The socioeconomic, ethnic, and racial characteristics of veterans experiencing food insecurity, disaggregated by State in which the veteran is located.

“(2) Native American veterans experiencing food insecurity.

“(3) Specific interventions for veterans who screen positive for food insecurity.

“(4) Eligibility screenings for participation in the supplemental nutrition assistance program completed by personnel of the Department of Veterans Affairs.

“(5) The number of applications for participation in the supplemental nutrition assistance program completed with assistance from personnel of the Department.

“(6) Changes, as a result of participation in the supplemental nutrition assistance program, in the number of food insecure veteran households.

“(7) Coordination efforts between State agencies and Department facilities located in that State regarding outreach to veterans to participate in the supplemental nutrition assistance program.

“(d) DEFINITIONS.—In this section:

“(1) The terms ‘Native American’ and ‘Native American veteran’ have the meanings given those terms in section 3765 of this title.

“(2) The terms ‘State agency’ and ‘supplemental nutrition assistance program’ have the meanings given those terms in section 3 of the Food and Nutrition Act of 2008 (7 U.S.C. 2012).”.

SEC. 3. DETERMINATION OF BUDGETARY EFFECTS.

The budgetary effects of this Act, for the purpose of complying with the Statutory Pay-As-You-Go Act of 2010, shall be determined by reference to the latest statement titled “Budgetary Effects of PAYGO Legislation” for this Act, submitted for printing in the Congressional Record by the Chairman of the House Budget Committee, provided that such statement has been submitted prior to the vote on passage.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from California (Mr. TAKANO) and the gentleman from Illinois (Mr. BOST) each will control 20 minutes.

The Chair recognizes the gentleman from California.

GENERAL LEAVE

Mr. TAKANO. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and insert extraneous material on H.R. 8888, as amended.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. TAKANO. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I rise today in support of H.R. 8888, as amended, the Food Security for All Veterans Act.

This bill establishes an office dedicated to ending veteran hunger at the VA that will collaborate with internal and external groups to develop and implement policies and procedures to identify and treat veterans at risk of or experiencing hunger.

Food insecurity can create or exacerbate other health maladies and is one of many contributing factors that has led to increased suicide rates, diabetes, heart disease, and depression. Addressing veteran hunger is critical to this committee’s suicide prevention efforts.

Madam Speaker, I thank our newest Member from Alaska, Congresswoman PELTOLA, for taking up this important issue and prioritizing veterans.

The VA has made tremendous strides in its work to end veteran hunger. The VA leads an interagency working group and regularly collaborates with its Federal counterparts on this issue. The VA also instituted a clinical reminder that screens every veteran who receives their care at VA for food insecurity and connects those in need with resources.

However, until recently, these tasks were carried out by VA employees as ancillary duties. There was no staff dedicated solely to addressing veteran hunger. The VA has started the process of building a team that works exclusively on this issue, and Congresswoman PELTOLA’s bill gives the VA the infrastructure and resources to ensure those efforts continue for years to come.

Before the pandemic and still now, Black, Latino, Native American, and Alaska Native veteran families experienced disproportionately high rates of hunger. This bill requires the VA to coordinate with the VA Office of Tribal Government Relations and the Department of the Interior to focus on these communities.

A critical issue this bill intends to affect is the disparity between the VA and USDA data on veteran hunger. The USDA reports about an 11 percent rate of food insecurity among veterans versus the VA, which reports a roughly 2 percent rate among veterans using VA healthcare.

The bill requires VA, in consultation with the USDA, to issue an annual report to Congress on the prevalence of veteran hunger. It also requires the VA to track its progress and success in connecting more veterans with resources like the Supplemental Nutrition Assistance Program, or SNAP.

Importantly, the Food Security for All Veterans Act mandates the VA collaborates with the Departments of Agriculture and Defense to develop materials for the Transition Assistance Program to help increase access to food resources for families in need as they navigate the military-to-civilian transition.

September is Hunger Action Month, and today, the White House hosted the Conference on Hunger, Nutrition, and Health that will catalyze the public and private sectors around a coordinated strategy to accelerate progress

and drive transformative change in our country to end hunger.

This legislation is endorsed by numerous veterans service organizations and hunger advocacy organizations, including Student Veterans of America, MAZON: A Jewish Response to Hunger, Food Research & Action Center, Disabled American Veterans, American Federation of Government Employees, National Coalition for Homeless Veterans, Iraq and Afghanistan Veterans of America, and Blue Star Families.

Madam Speaker, I include in the RECORD the following letters from MAZON: A Jewish Response to Hunger and the Food Research & Action Center.

[MAZON, Sept. 23, 2022]

STATEMENT FOR THE RECORD IN SUPPORT OF
H.R. 8888 SUBMITTED BY MAZON: A JEWISH
RESPONSE TO HUNGER

A Jewish Response to Hunger is pleased to share this statement for the record in support of H.R. 8888, the Food Security for All Veterans Act. This bill, which would establish an Office of Food Security at the U.S. Department of Veterans Affairs, represents a helpful step forward in the effort to achieve a more comprehensive and lasting solution to the preventable problem of veteran food insecurity.

Inspired by Jewish values and ideals, MAZON takes to heart our collective responsibility to care for the vulnerable in our midst, without judgement or precondition. In the United States, this responsibility to prevent and respond to hunger lies centrally with our federal government. The charitable food sector is in no way equipped to respond to the scope of food insecurity in America—all of the charitable and faith-based organizations in this country combined contribute less than ten percent of all food assistance in this country and have extremely limited capacity to respond to more than emergency needs. The food insecurity crisis in our country is the purview of the federal government and it is impractical, inefficient, and immoral to abdicate this responsibility and attempt to outsource the response to a charitable sector that is already overburdened.

For over 37 years, MAZON has been fighting to end hunger among all people of all faiths and backgrounds, and for nearly ten years, we have prioritized addressing the long-overlooked issue of food insecurity among veterans and military families. Jewish text and tradition compel us to honor the dignity of every person, especially those who are struggling. No matter a person's circumstance, no one deserves to be hungry. Those who have bravely served to defend our country especially should never have to be subjected to the cruel and painful experience of hunger.

The establishment of the Office of Food Security at the Department of Veterans Affairs that is empowered to coordinate efforts among VA program offices, provide information about and help connect veterans to available nutrition assistance benefits and resources, collaborate with USDA, Department of Defense, and other federal agencies, and develop and provide training for professionals who work with veterans, would be an extremely helpful step forward in the national effort to address the crisis of veteran food insecurity.

MAZON has testified before Congress and shared our insights and recommendations about food insecurity among veteran households numerous times over the years. Unfortunately, too little progress has been made

during the intervening time. There have been some positive steps, both programmatically and through policy change, that have helped; most notably, the recent adoption of the Hunger Vital Signs screening tool at all VA outpatient facilities (MAZON has long advocated for mandatory food insecurity screenings and SNAP eligibility screening, and application assistance across the VA system; much more still remains to be done on this front to connect food insecure veterans with SNAP) and increases to SNAP benefits through the temporary boost included through COVID-19-relief legislation and the recent update to the Thrifty Food Plan by USDA.

It should be noted that, while the temporary boost to SNAP benefits and other COVID-19 assistance provided by the federal government helped to alleviate some material hardship and prevented food insecurity and poverty rates from dramatically spiking due to the pandemic and associated economic downturn, the American population—including veterans—experienced exacerbated challenges that compounded food insecurity rates and more severe impacts.

These challenges include elevated rates of unemployment (particularly within the service sector and disproportionately impacting female employees and people of color), widespread school closures and the loss of subsidized school meals, medical emergencies and the associated financial costs for treatment and lost income from time out of work), and mental health distress.

We are particularly concerned about the impacts of racial inequities on veterans and the ongoing tragedy of heightened suicide rates among veterans. While there is growing public awareness and concern about both issues, there remains a need for viable policy proposals to address them. The disproportionate impact of food insecurity on households of veterans of color highlight racial inequities that are perpetuated through public policies and program implementation. Closing the SNAP participation gap for veterans and improving the program to better reach and serve food insecure veterans of color will not only signal a commitment to meaningful efforts to address racial justice—it will concretely contribute to those efforts to achieve greater racial equity in federal policy.

As noted by Dr. Thomas O'Toole during his testimony before the House Veterans Affairs Committee on January 9, 2020, a growing body of research sheds light on the relationship between food insecurity and risk factors for poor mental health and suicide. A new study on "Association between Food Insecurity, Mental Health, and Intentions to Leave the U.S. Army in a Cross-Sectional Sample of U.S. Soldiers" by researchers at the USDA Economic Research Service and the U.S. Army Public Health Center offers additional insight about linkages between food insecurity, mental health, and military service. Contributing to the VA's stated top clinical priority to end veteran suicide and implement a comprehensive public health approach to reach all veterans, the VA must step up to provide leadership around a robust effort to address veteran food insecurity by proactive SNAP outreach to veterans both within and outside of the VA system.

A recommendation made by Dr. Colleen Heflin during her testimony at the May 27, 2021 House Rules Committee roundtable examination of the hunger crisis among veterans and military families holds great promise to decrease the risk of food insecurity during the transition from military service to civilian life, when many households are more likely at risk of food insecurity. MAZON urges Congress to explore this suggestion for the federal government to provide a targeted transitional benefit to all

families leaving military service below a certain rank. Such a benefit would act as a stabilizing mechanism and provide much-needed additional assistance to veterans and their families during a time when they may experience a greater level of financial need. Such a transitional benefit, especially one that utilizes innovative new technologies for benefit delivery and personalized communications, opens up opportunities to proactively assess and respond to the whole-person needs of veterans by building trust and facilitating connections to other available resources and comprehensive services. In addition, MAZON supports the distinct, yet often related, recommendations by Dr. Heflin to better protect veterans with disabilities from food insecurity.

MAZON was proud to recently sign a Memorandum of Agreement with the Veterans Health Administration to work collaboratively to address veteran food insecurity. While MAZON is excited about this opportunity to provide input, contribute resources, and collaborate on innovative program ideas and solutions, the limited commitments to date by the VA and slow pace of response to a preventable crisis with multiple negative consequences is deeply distressing. Additionally, the sporadic oversight by Congress and the lack of urgency that has been demonstrated in holding federal agencies accountable to a proactive, robust, and measurable solution to ending veteran food insecurity must be rectified. There is great bipartisan concern in Congress about veteran food insecurity, but the commitment to mandate and provide funding for proven solutions has unfortunately not matched the lofty rhetoric.

It is time to recenter the VA's goals and priorities in the effort to provide a comprehensive response to veteran food insecurity. The implicit abdication of responsibility by the federal government to the charitable sector is unsustainable and dangerous as it shifts attention away from the need to strengthen and improve access to SNAP and other federal programs that serve as the frontline response to veteran food insecurity.

Success should be measured not by how many food pantries open at VA centers, but rather by how many food pantries become unnecessary due to veteran households receiving the support they need and are entitled to through programs like SNAP. MAZON urges Congress to step up its leadership as a vital part of this effort by prioritizing the protection and improvement of SNAP, supporting innovative and effective ways to better connect food insecure veterans with federal nutrition assistance programs (including mandating that VA facilities conduct on-site SNAP eligibility screenings and application assistance in addition to the food insecurity screenings currently conducted), bolstering nutrition assistance support during transition from active duty to veteran status, strengthening the supports and removing barriers for food insecure veterans with disabilities, and centering the experiences and perspectives of veterans with lived experiences with food insecurity.

The establishment of the Office of Food Security at the VA as proposed in H.R. 8888 promises to make a substantial contribution to coordinating and improving agency efforts and deepening the impact of the federal response to veteran food insecurity. This progress is long overdue and should represent just the next step forward among additional commitments to come.

Veteran food insecurity—indeed, all food insecurity—is a solvable problem, and the solution lies in mustering the political will to prioritize and address it. MAZON welcomes the opportunity to continue to work with

Congress, with all relevant federal agencies, and with VSOs and other community partners, to build this political will and do right by those who have bravely served our country. No veteran should ever have to worry about being able to feed themselves or those in their family. We owe them much more than the half-measures and broken promises of our policies and programs to date.

Hungry veterans cannot eat another report or hearing transcript. MAZON urges Congress to enact the recommendations included in H.R. 8888 and identify additional concrete steps that Congress and the Administration can take now to end the crisis of veteran food insecurity. We stand ready with suggestions and with resolve to work in partnership.

[From Food Research & Action Center, May 18, 2022]

HOUSE OF REPRESENTATIVES, COMMITTEE ON VETERANS' AFFAIRS, SUBCOMMITTEE ON ECONOMIC OPPORTUNITY

STATEMENT OF SUPPORT FOR THE ESTABLISHMENT OF A DEPARTMENT OF VETERANS AFFAIRS OFFICE OF FOOD SECURITY

The Food Research & Action Center (FRAC) supports the "Discussion Draft, to amend Title 38, United States Code, to establish in the Department of Veterans Affairs an Office of Food Insecurity, and for other purposes" set for hearing on May 18, 2022, before the House Veterans Affairs Subcommittee on Economic Opportunity. This critical legislation will amplify the Department of Veterans Affairs efforts to address food insecurity among veterans and their families.

FRAC works to improve the nutrition, health, and well-being of tens of millions of people struggling against poverty-related hunger in the United States through advocacy, partnerships, and by advancing bold and equitable policy solutions. FRAC has championed work to address food insecurity among veterans and participates in the Military Family Advisory Network and Veterans Health Administration (VHA) efforts to screen and intervene to address food insecurity among patients.

Food insecurity, even marginal food insecurity (a less severe form), is detrimental to the health, development, and well-being of people and is associated with some of the most common and costly health problems in the U.S. A 2021 Economic Research Service Report, *Food Insecurity Among Working-Age Veterans*, found that 11.1 percent of veterans between the ages of 18 to 64 lived in households reporting food insecurity, while 5.3 lived in households experiencing very low food security. After controlling for demographic characteristics that normally predict food insecurity, such as age, educational attainment, and income, the risk of food insecurity is 7.4 percent higher among veterans than nonveterans ages 18-64.

By creating an Office of Food Security, this legislation represents a critical step to prioritize, accelerate, and sustain the Department of Veterans Affairs' work to address food insecurity among those who have sacrificed so much for our nation. Of note, the Veterans Health Administration has screened millions of patients for food insecurity and connected veterans and their families to crucial federal nutrition programs, like the Supplemental Nutrition Assistance Program (SNAP), the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC), school meals, child care meals, summer meals, and emergency food sites, such as food banks and pantries. By providing funding to build out these efforts to screen and intervene veterans at risk for

food insecurity, this legislation will enshrine the importance of this work, identify gaps in services, and connect veterans to available federal nutrition programs and other resources.

This legislation recognizes the critical role the federal nutrition plays in addressing food insecurity among veterans and their families. The federal nutrition programs are among our nation's most important, proven, and cost-effective public interventions to not only address food insecurity but also to improve health, nutrition, and well-being. A growing body of research links these programs to a wide range of positive outcomes for families and the nation. Federal nutrition programs improve dietary intake and nutrition quality; support healthy growth of children; boost learning and academic achievement; reduce poverty and increase family economic security; and lower health care spending.

Ensuring access to SNAP, in particular, is a critical step in supporting food security among veterans. Nationwide, according to the USDA, 1,174,027 veterans (6.6 percent of all veterans) received SNAP benefits, improving veterans' purchasing power necessary to buy food in a dignified way at military commissaries and other food retail outlets that accept SNAP. A recent survey estimated that only 59 percent of eligible veterans were enrolled in SNAP. The USDA has identified veterans as a priority population for state SNAP outreach plans, including partnership with local VHA facilities. Accessing SNAP not only helps veterans everywhere put food on the table, it reduces poverty, supports economic stability, and improves health outcomes.

FRAC looks forward to supporting the Department of Veterans Affairs work to address food insecurity. Alongside increasing veteran participation in SNAP and other federal nutrition programs, eradicating food insecurity and hunger among veterans and their families will require a national response that addresses underlying causes (e.g., a lack of well-paying jobs and a lack of affordable housing). This draft legislation is an important step in the right direction.

Mr. TAKANO. Madam Speaker, I urge the rest of my colleagues to support this legislation and ensure no veteran goes hungry, and I reserve the balance of my time.

Mr. BOST. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I reluctantly support this bill.

Food insecurity is an issue that impacts thousands of veterans every year. Veterans continue to suffer from skyrocketing food prices caused by the economic mistakes of the Biden administration.

While I support bringing more attention to veteran hunger, I am skeptical that this bill is the correct solution. The bill before us today would try to address these issues by creating a new office of food security at the VA. The VA has also already told us that they were working to set up an office at the VHA dedicated to food insecurity.

I look forward to working with our colleagues in the Senate to modify the language in this bill to match the Department's efforts.

That said, I am pleased by the changes that were made today to improve on the text. All considered, I reluctantly urge all of my colleagues to support the bill.

Madam Speaker, I reserve the balance of my time.

Mr. TAKANO. Madam Speaker, I yield 5 minutes to the gentlewoman from Alaska (Mrs. PELTOLA), my new friend who is a newly elected Member of Congress. I think this is her first piece of legislation to be brought to the floor, and we are proud it is coming out of the Veterans' Affairs Committee.

□ 2000

Mrs. PELTOLA. Madam Speaker, I thank the chairman for providing consideration of my legislation today. I particularly want to share my appreciation with committee Chair TAKANO and Ranking Member BOST on the Veterans' Affairs Committee for moving quickly on this important issue for the 18 million veterans in our country.

Madam Speaker, I rise today to speak on a topic of vital importance to my State where veterans comprise about 10 percent of the population, and I know many veterans who face food insecurity.

This is my first bill as a Member of the U.S. House of Representatives, which is appropriate. There is nothing more important than ensuring our veterans and their families can enjoy a safe and healthy life after their service for our country.

This bill would create an Office of Food Security within the Department of Veterans Affairs. The office would be charged with providing information to veterans on the availability and eligibility requirements for Federal nutrition assistance programs. The office would work with other government agencies to implement policies to help veterans at risk or experiencing food insecurity.

A report just 4 months ago from the Center for Strategic and International Studies was clear, "Food insecurity among U.S. veterans and military families is a national security concern: it multiplies stress on Active Duty personnel, diminishes well-being among servicemembers and their children—who are more likely to serve in the military as adults—and may hinder recruitment for the armed services."

Madam Speaker, I know this bill will not solve the problem entirely, but I believe it can help in Alaska and throughout the country. I ask my colleagues to support H.R. 8888.

Mr. BOST. Madam Speaker, I encourage my colleagues to support this bill, and I yield back the balance of my time.

Mr. TAKANO. Madam Speaker, I ask all my colleagues to join me in passing H.R. 8888, as amended, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. TAKANO) that the House suspend the rules and pass the bill, H.R. 8888, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. ROY. Madam Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this motion will be postponed.

EXPANDING HOME LOANS FOR GUARD AND RESERVISTS ACT

Mr. TAKANO. Madam Speaker, I move to suspend the rules and pass the bill (H.R. 8875) to amend title 38, United States Code, to expand eligibility of members of the National Guard for housing loans guaranteed by the Secretary of Veterans Affairs, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 8875

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Expanding Home Loans for Guard and Reservists Act”.

SEC. 2. EXPANSION OF ELIGIBILITY OF MEMBERS OF THE NATIONAL GUARD FOR HOUSING LOANS GUARANTEED BY THE SECRETARY OF VETERANS AFFAIRS.

Section 3701(b)(7) of title 38, United States Code, is amended by striking “full-time National Guard duty” and inserting “active service”.

SEC. 3. DETERMINATION OF BUDGETARY EFFECTS.

The budgetary effects of this Act, for the purpose of complying with the Statutory Pay-As-You-Go Act of 2010, shall be determined by reference to the latest statement titled “Budgetary Effects of PAYGO Legislation” for this Act, submitted for printing in the Congressional Record by the Chairman of the House Budget Committee, provided that such statement has been submitted prior to the vote on passage.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from California (Mr. TAKANO) and the gentleman from Illinois (Mr. BOST) each will control 20 minutes.

The Chair recognizes the gentleman from California.

GENERAL LEAVE

Mr. TAKANO. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to insert extraneous material on H.R. 8875, as amended.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. TAKANO. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I rise in support of H.R. 8875, as amended, the Expanding Home Loans for Guard and Reservists Act.

One of the most valuable benefits veterans earn is the VA home loan benefit, which can provide them a head start in their transition to civilian life.

That is why 2 years ago we passed into law an expansion to grant Na-

tional Guard members credit for the days they serve on Active Duty. However, through oversight and case work we have learned how some veterans are missing out on this benefit.

This legislation makes a technical fix, which updates the law to define eligibility by counting Active Duty for training when guard and reservists are training for things like Special Forces, Aviation, or Linguistics.

These servicemembers deserve eligibility because they are going through the same courses and training as their Active Duty counterparts, taking the same risks, and passing the very same requirements.

Guard and reservists are at a greater disadvantage because they are removed from the civilian workforce for extended periods of time. After their training is complete, they transition back to civilian life, move back home from the base where they were training, find employment, and find a place to live.

This technical fix makes sure that guard and reservists don't miss out on using a great benefit from the VA home loan guarantee service.

I thank the gentleman from New York (Mr. RYAN), our newest Member, for taking up this issue and making veterans a priority. As an added bonus, this fix actually saves the Federal Government money by bringing more borrowers into the attractive low rates of the VA home loan program.

Madam Speaker, I wholeheartedly support this bill, and I urge my colleagues to do the same.

Madam Speaker, I reserve the balance of my time.

Mr. BOST. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I rise today in reluctant support of the Expanding Home Loans for Guard and Reservists Act. Last Congress, my bill, H.R. 7445, proposed expanding VA home loan benefits to members of the National Guard who have served on Active Duty or full-time guard duty.

Congressman RYAN's bill would expand the home loan benefit to members of the National Guard that are on Federal Active Duty orders for training. Unfortunately, this policy is being rushed in an election year gimmick.

Unlike other bills we are considering today, this bill has not had the benefit of legislative hearings, and I would have liked to have heard the views of the VA and other stakeholders. A hearing would have allowed us to understand the impact this legislation could have on the mortgage markets. It would also have provided insight on the effect this bill could have on recruitment of National Guard Active Forces.

That said, I do not want to stand in the way of legislation that can help members of the National Guard, and I reluctantly urge all my colleagues to support this bill.

Madam Speaker, I yield back the balance of my time.

Mr. TAKANO. Madam Speaker, again, I ask all my colleagues to join

me in passing H.R. 8875, as amended, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. TAKANO) that the House suspend the rules and pass the bill, H.R. 8875, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the yeas have it.

Mr. ROY. Madam Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this motion will be postponed.

AMENDING TITLE 38, UNITED STATES CODE, TO ENSURE THAT THE SECRETARY OF VETERANS AFFAIRS REPAYS MEMBERS OF THE ARMED FORCES FOR CERTAIN CONTRIBUTIONS MADE BY SUCH MEMBERS TOWARDS POST-9/11 EDUCATIONAL ASSISTANCE

Mr. TAKANO. Madam Speaker, I move to suspend the rules and pass the bill (H.R. 5918) to amend title 38, United States Code, to ensure that the Secretary of Veterans Affairs repays members of the Armed Forces for certain contributions made by such members towards Post-9/11 Educational Assistance, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 5918

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. REPAYMENT OF MEMBERS OF THE ARMED FORCES FOR CONTRIBUTIONS TOWARD POST-9/11 EDUCATIONAL ASSISTANCE.

(a) IN GENERAL.—Section 3327(f)(3) of title 38, United States Code, is amended by striking “together” and all that follows through “(as applicable),”.

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect on August 1, 2023.

SEC. 2. MODIFICATION OF CERTAIN HOUSING LOAN FEES.

The loan fee table in section 3729(b)(2) of title 38, United States Code, is amended by striking “January 14, 2031” each place it appears and inserting “January 28, 2031”.

SEC. 3. DETERMINATION OF BUDGETARY EFFECTS.

The budgetary effects of this Act, for the purpose of complying with the Statutory Pay-As-You-Go Act of 2010, shall be determined by reference to the latest statement titled “Budgetary Effects of PAYGO Legislation” for this Act, submitted for printing in the Congressional Record by the Chairman of the House Budget Committee, provided that such statement has been submitted prior to the vote on passage.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from California (Mr. TAKANO) and the gentleman from Illinois (Mr. BOST) each will control 20 minutes.

The Chair recognizes the gentleman from California.

GENERAL LEAVE

Mr. TAKANO. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and insert extraneous material on H.R. 5918, as amended.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. TAKANO. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I rise today in support of H.R. 5918, as amended, legislation to ensure veterans can recoup the money they paid into the Montgomery GI Bill.

Under current law, veterans who do not fully access their Montgomery GI Bill can lose out on the payments they made into the program, in some cases totaling up to \$1,200.

The Montgomery GI Bill is in the process of being phased out for the more generous Forever GI Bill. Many veterans may not remember the \$1,200 they paid into the program in the early days of their service or even be aware that they are entitled to a refund of the unused funds.

The process to reclaim that \$1,200 can be difficult, and there are times when the veteran can simply lose out on the money because they waited too long. This legislation eliminates that cumbersome process by making it so the veteran is repaid, no questions asked.

The bill is fully offset and supported by the veterans service organization community, including by Student Veterans of America.

Madam Speaker, I thank the gentleman from Indiana (Mr. BANKS) for his work on this legislation and the VSO community for bringing this issue to our committee. I urge the rest of my colleagues to support this legislation to ensure no veteran loses out on what is owed to them.

Madam Speaker, I reserve the balance of my time.

Mr. BOST. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I rise today in support of H.R. 5918, as amended. This bill would close a financial loophole affecting many servicemembers.

Last Congress, I was proud to support General Bergman's efforts to responsibly sunset the Montgomery GI Bill, and today I am pleased to support Congressman BANKS' bill to ensure that those servicemembers who paid into the program are repaid.

Under current law, servicemembers who switch from Montgomery to the Post-9/11 GI Bill would lose about \$1,200 they paid into the program, if they exhausted their benefits while still on Active Duty. Veterans who exhaust their benefits already receive the \$1,200 back. This bill would fix this loophole and treat servicemembers and veterans equally.

Servicemembers earned the benefits and should not be shortchanged just

because they are still on Active Duty. This bill would include a short-term extension of the VA home loan funding fees to fully offset the cost of this bill.

Madam Speaker, I thank the American Legion for bringing this problem to our attention, and I also thank Congressman BANKS for introducing this important bill.

Madam Speaker, I urge my colleagues to support the bill, and I yield back the balance of my time.

Mr. TAKANO. Madam Speaker, I ask all my colleagues to join me in passing H.R. 5918, as amended, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. TAKANO) that the House suspend the rules and pass the bill, H.R. 5918, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

The title of the bill was amended so as to read: "A bill to amend title 38, United States Code, to ensure that the Secretary of Veterans Affairs repays members of the Armed Forces for certain contributions made by such members towards Post-9/11 Educational Assistance, and for other purposes."

A motion to reconsider was laid on the table.

REDUCE AND ELIMINATE MENTAL HEALTH OUTPATIENT VETERAN COPAYS ACT

Mr. TAKANO. Madam Speaker, I move to suspend the rules and pass the bill (H.R. 7589) to amend title 38, United States Code, to prohibit the imposition or collection of copayments for certain mental health outpatient care visits of veterans, and for other purposes, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 7589

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Reduce and Eliminate Mental Health Outpatient Veteran Copays Act" or the "REMOVE Copays Act".

SEC. 2. PROHIBITION ON COLLECTION OF COPAYMENTS FOR FIRST THREE MENTAL HEALTH CARE OUTPATIENT VISITS OF VETERANS.

(a) PROHIBITION ON COLLECTION.—Chapter 17 of title 38, United States Code, is amended by inserting after section 1722B the following new section (and conforming the table of sections at the beginning of such chapter accordingly):

"§ 1722C. Copayments: prohibition on collection of copayments for first three mental health care outpatient visits of veterans

"(a) PROHIBITION.—Except as provided in subsection (b), notwithstanding section 1710(g) of this title or any other provision of law, the Secretary may not impose or collect a copayment for the first three mental health care outpatient visits of a veteran in a calendar year for which the veteran would otherwise be required to pay a copayment

under the laws administered by the Secretary.

"(b) COPAYMENT FOR MEDICATIONS.—The prohibition under subsection (a) shall not apply with respect to the imposition or collection of copayments for medications pursuant to section 1722A of this title.

"(c) MENTAL HEALTH CARE OUTPATIENT VISIT DEFINED.—In this section, the term 'mental health care outpatient visit' means an outpatient visit with a qualified mental health professional for the primary purpose of seeking mental health care or treatment for substance abuse disorder."

(b) APPLICABILITY.—The amendments made by subsection (a) shall apply with respect to mental health care outpatient visits occurring on or after the date that is 180 days after the date of the enactment of this Act.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from California (Mr. TAKANO) and the gentleman from Illinois (Mr. BOST) each will control 20 minutes.

The Chair recognizes the gentleman from California.

GENERAL LEAVE

Mr. TAKANO. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and insert extraneous material on H.R. 7589, as amended.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. TAKANO. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, as we all know, September is Suicide Prevention Awareness Month. I hope everyone has the new crisis hotline number, 988, saved on their phones. If you or a veteran you care about is in crisis, please dial 988, and press 1 to reach trained responders at the Veterans Crisis Line. Again, let me repeat the number. Dial 988 and press 1 to reach trained responders at the Veterans Crisis Line.

One component of a public health approach to veteran suicide prevention is ensuring that all of our Nation's heroes have access to timely, high-quality, effective mental health care.

Madam Speaker, I am so pleased to bring up my bill, H.R. 7589, as amended, the Reduce and Eliminate Mental Health Outpatient Veteran Copays or REMOVE Copays Act. We reported this bill favorably out of the Veterans' Affairs Committee last week on a bipartisan voice vote. I thank Ranking Member BOST for his support of this bill.

H.R. 7589 turns a legislative proposal from the Department of Veterans Affairs into a law that will make every enrolled veteran's first three outpatient mental health appointment at VA free every year. We know that what may seem like low copays can, in fact, be significant financial barriers for many veterans. Our goal is to knock down all barriers for veterans seeking and accessing mental health care at the VA.

□ 2015

VA strongly supports this bill, as do veterans service organizations and

mental health groups. If we can enact this into law, VA will be the first of hopefully all Federal healthcare programs to eliminate copays for mental health care every year in this way and get people the help they need.

Madam Speaker, I urge all of my colleagues to vote "yes" on this vital piece of legislation, H.R. 7589, as amended, the REMOVE Copays Act, and I reserve the balance of my time.

Mr. BOST. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I rise in support of H.R. 7589, the REMOVE Copays Act. As its name suggests, this bill would remove copayments from every veteran's first three mental health outpatient visits for each calendar year.

I am pleased to support the REMOVE Copays Act today, and I hope it will encourage veterans to take better care of their mental health. September is Suicide Prevention Awareness Month, and according to the most recent data from the VA, the amount of veterans who died by suicide decreased from 2019 to 2020.

That is encouraging news. However, at least one non-VA study suggests that VA is undercounting the number of veterans who die by suicide by as much as 2.4 times. I fear that VA's data still has not accounted for the negative effects of COVID lockdowns, isolation, and illness.

Regardless, as long as veterans continue to take their own lives, we have important work to do. Suicide is not just a mental health issue. Improving mental health has a critical role to play in stopping suicide once and for all.

I am grateful to Chairman TAKANO for his introduction of this bill, and I hope all of my colleagues will join me in supporting it today.

Madam Speaker, I reserve the balance of my time.

Mr. TAKANO. Madam Speaker, I am prepared to close, and I reserve the balance of my time.

Mr. BOST. Madam Speaker, I encourage all of my colleagues to support the bill, and I yield back the balance of my time.

Mr. TAKANO. Madam Speaker, again, I ask all my colleagues to join me in passing H.R. 7589, as amended. I do thank my colleague, the ranking member. It is an example of standing our ground where we must and finding common ground where we can.

Lastly, I close by saying, please dial 988 and press 1 to reach trained responders at the Veterans Crisis Line.

Madam Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. TAKANO) that the House suspend the rules and pass the bill, H.R. 7589, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

SOLID START ACT OF 2022

Mr. TAKANO. Madam Speaker, I move to suspend the rules and pass the bill (S. 1198) to amend title 38, United States Code, to improve and expand the Solid Start program of the Department of Veterans Affairs, and for other purposes.

The Clerk read the title of the bill.

The text of the bill is as follows:

S. 1198

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Solid Start Act of 2022".

SEC. 2. SOLID START PROGRAM OF THE DEPARTMENT OF VETERANS AFFAIRS.

(a) IN GENERAL.—Chapter 63 of title 38, United States Code, is amended by adding at the end the following new subchapter:

"SUBCHAPTER II—OTHER OUTREACH PROGRAMS AND ACTIVITIES

"§ 6320. Solid Start program

"(a) IN GENERAL.—The Secretary shall carry out a program, to be known as the 'Solid Start program', under which the Secretary shall—

"(1) build the capacity of the Department to efficiently and effectively respond to the queries and needs of veterans who have recently separated from the Armed Forces; and

"(2) systemically integrate and coordinate efforts to assist veterans, including efforts—

"(A) to proactively reach out to newly separated veterans to inform them of their eligibility for programs and benefits provided by the Department; and

"(B) to connect veterans in crisis to resources that address their immediate needs.

"(b) ACTIVITIES OF THE SOLID START PROGRAM.—(1) The Secretary, in coordination with the Secretary of Defense, shall carry out the Solid Start program of the Department by—

"(A) collecting up-to-date contact information during transition classes or separation counseling for all members of the Armed Forces who are separating from the Armed Forces, while explaining the existence and purpose of the Solid Start program;

"(B) calling each veteran, regardless of separation type or characterization of service, three times within the first year after separation of the veteran from the Armed Forces;

"(C) providing information about the Solid Start program on the website of the Department and in materials of the Department, especially transition booklets and other resources;

"(D) ensuring calls are truly tailored to the needs of each veteran's unique situation by conducting quality assurance tests;

"(E) prioritizing outreach to veterans who have accessed mental health resources prior to separation from the Armed Forces;

"(F) providing women veterans with information that is tailored to their specific health care and benefit needs;

"(G) as feasible, providing information on access to State and local resources, including Vet Centers and veterans service organizations; and

"(H) gathering and analyzing data assessing the effectiveness of the Solid Start program.

"(2) The Secretary, in coordination with the Secretary of Defense, may carry out the Solid Start program by—

"(A) encouraging members of the Armed Forces who are transitioning to civilian life to authorize alternate points of contact who can be reached should the member be unavailable during the first year following the separation of the member from the Armed Forces; and

"(B) following up missed phone calls with tailored mailings to ensure the veteran still receives similar information.

"(3) In this subsection:

"(A) The term 'Vet Center' has the meaning given that term in section 1712A(h) of this title.

"(B) The term 'veterans service organization' means an organization recognized by the Secretary for the representation of veterans under section 5902 of this title."

(b) CONFORMING AMENDMENTS.—Chapter 63 of such title, as amended by subsection (a), is further amended—

(1) by inserting before section 6301 the following:

"Subchapter I—Outreach Services Program";

and

(2) in sections 6301, 6303, 6304, 6305, 6306, and 6307, by striking "this chapter" each place it appears and inserting "this subchapter".

(c) CLERICAL AMENDMENTS.—The table of sections at the beginning of chapter 63 of such title is amended—

(1) by inserting before the item relating to section 6301 the following new item:

"SUBCHAPTER I—OUTREACH SERVICES PROGRAM";

and

(2) by adding at the end the following new items:

"SUBCHAPTER II—OTHER OUTREACH PROGRAMS AND ACTIVITIES

"6320. Solid Start program."

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from California (Mr. TAKANO) and the gentleman from Illinois (Mr. BOST) each will control 20 minutes.

The Chair recognizes the gentleman from California.

GENERAL LEAVE

Mr. TAKANO. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to insert extraneous material on S. 1198.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. TAKANO. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I rise to support S. 1198, the bipartisan, bicameral, Solid Start Act.

This bill is led by Senator HASSAN, and in the House, this legislative effort is led by my Veterans Affairs' Committee colleague, Representative SLOTKIN.

Now, we know that the transition from Active-Duty service to veteran status can bring not only new opportunities, but also substantial adjustment and stress. For some veterans, it can pose serious mental health challenges. In fact, the first year of transitioning out of military service is a very high-risk period for veteran suicide.

VA initiated its Solid Start program to address the challenges new veterans may face during this period. VA now

contacts veterans at three different periods in that first year to check in, remind veterans of benefits and services for which they are eligible, and connect them to resources.

Women veterans, like all veterans, deserve to know about all of the benefits and services they have earned with no exceptions. I have heard today that some Republican Members of this House are suddenly looking to oppose this veteran suicide prevention bill, and all because it has 16 words that simply ensure women veterans are told about the range of benefits and services for which they are eligible; 16 words, when we are talking about 16 veteran suicide deaths a day.

We are talking about benefits like the GI bill, and compensation for toxic exposure presumptions, breast cancer screening, treatment for military sexual trauma, and, yes, the freedom to discuss their options around pregnancy.

All benefits they have earned through their service because they chose to serve our Nation. Well, I would say to my colleagues on the other side of the aisle to take your fight against women veterans elsewhere.

Criminalizing, infantilizing, and denying women veterans—take your fight elsewhere.

There is no bar that prevents VA providers from discussing a single benefit with male veterans, but my colleagues want a double standard for women veterans. This is about two lines in an entire bill meant to help veterans who have recently left Active Duty. All veterans.

Republicans won't pass this bill unless we delete women from it. I refuse to do that. Women veterans are veterans.

A conversation with a woman veteran about coming to the VA could prevent her death from suicide. It could also prevent needless suffering and possible death from health conditions, including pregnancy.

Republicans have gotten so extreme with their fear of women having autonomy over their own bodies and lives that they are willing to play political games with veterans' lives and tank a veteran suicide prevention bill.

I would also remind those considering blocking this bill that this very same language has already passed in the House. Back on June 23 of this year, this Chamber passed the STRONG Veterans Act of 2022. It passed under a simple voice vote.

The Senate unanimously passed the Solid Start Act after VA's new rule on abortion counseling and services had been announced.

September is National Suicide Prevention Awareness Month, and this legislation would help us better connect veterans with the resources needed to save lives. Sadly, each day, we are losing roughly 16 veterans to suicide.

I am not willing to let 16 words about women's freedom to discuss their own

benefits contained in this legislation prevent us from saving the lives of 16 veterans who die by suicide each day. I thank Senator HASSAN and Representative SLOTKIN for their work on this important issue, and I am pleased we could take up this bill during Suicide Prevention Month.

Madam Speaker, I strongly urge my colleagues to vote "yes" on S. 1198, and I reserve the balance of my time.

Mr. BOST. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I rise today in reluctant opposition to S. 1198, the Solid Start Act of 2021. The Solid Start program was created by President Trump in 2019 to better support veterans as they transition out of the military.

I know firsthand that leaving the military can be tough. When I left the military as a young marine, the only TAP program that I got was a tap on the back and a "see ya later."

I am glad that things have improved a lot since then. The Solid Start program has helped improve servicemembers' transitions even more.

I am a real big fan of the Solid Start program. The STRONG Act, my bill with Chairman TAKANO, includes identical language to this bill and would permanently authorize the Solid Start Program. The STRONG Act passed the House in June with my full support.

However, earlier this month, Secretary McDonough announced that VA would begin providing abortions. I believe it is not only immoral, but it is also illegal. Congress prohibited VA providing abortions in 1992. Congress has never repealed that prohibition. Just so you know, it has never been superseded.

Secretary McDonough has claimed that he is taking this action in defense of women's health, setting aside the fact that abortion is not healthcare. By making that claim, the Secretary has made it clear that he views women's health as one and the same with abortion.

Madam Speaker, this bill would require VA to provide women veterans with, "information that is tailored to their specific healthcare and benefit needs."

We have offered if they would remove that language to just say "veterans," that would not include information about abortion, given the Secretary's views, that is unacceptable to me and to many others.

Our democracy is based on the rule of law, and I wish the Secretary would follow the law, especially when it is a matter of life and death. If he did, I would fully support this bill just like I did in June, before the VA's new illegal rule.

Instead, I regret that I must oppose it today, and I urge my colleagues to oppose the bill.

Madam Speaker, I reserve the balance of my time.

Mr. TAKANO. Madam Speaker, I yield myself such time as I may consume.

Let me just respond, that every day my colleagues are making threats to file a lawsuit to stop the interim final rule. Like the ranking member believes, as do many on his side of the aisle, that the interim final rule is illegal based on the 1992 law. I will remind him that in 1996, Congress authorized the VA Secretary to define the medical benefits package. So I disagree with his interpretation of this interim final rule as being illegal.

Let me mention one thing further, that I have not seen any lawsuit yet filed, even though he asserted that he would seek to have this rule stayed. I am assuming that the delay in filing, since the hearing that we had, is because he is still looking for a perfect judge to hear it.

In the meantime, they are highjacking this opportunity to once again blind and gag women veterans under the premise that veterans should not be allowed to know the healthcare options and benefits that are available to them.

This is not only an insult to veterans but to the veterans service organizations that have endorsed and supported this bill.

Madam Speaker, I yield 5 minutes to the gentlewoman from Michigan (Ms. SLOTKIN), my good friend who serves on the Disability Assistance and Memorial Affairs Subcommittee.

Ms. SLOTKIN. Madam Speaker, I rise today in support of the Solid Start Act, a truly bipartisan bill that I originally introduced on Veterans Day in 2020.

This bill requires the VA to connect with veterans during their first year when they transition out of service to ensure they are aware of the benefits and resources that they have earned.

I was thrilled to see this bipartisan legislation pass the Senate twice, both times by unanimous consent. It passed the House as part of the STRONG Veterans Act with overwhelming support by voice vote.

□ 2030

First, I would like to thank my Veterans Advisory Board back in Michigan and the other stakeholders in my district who have helped to craft this bill. I would like to thank The American Legion, Disabled American Veterans, and the VFW for their support, and the countless veterans and veteran families in the district who gave me their feedback to help us craft this bill.

It comes directly from their experience where, overwhelmingly, the sentiment was in that first year of separation, veterans do not understand all of the resources from education to healthcare that they are eligible for.

Madam Speaker, 40 percent of the veterans in Michigan are unconnected totally from the VA and the resources they are entitled to. This statistic, coupled with the experience of navigating those challenges in the VA, are unacceptable. Every veteran I know has their own story as they transition out of the military, whether it has been 3 years or three decades.

I watched this up close with my husband after 30 years of Active Duty in the Army. Newly separated veterans encounter changes in job status, lifestyle, housing, healthcare, and education. It is a period of enormous change, and also a period of vulnerability. Tragically, rates of veteran suicide are higher in those tumultuous first years than later after separation.

Veterans are entitled to a variety of resources, but they only can access them if they know about them. That is why I introduced the Solid Start Act with my Republican friend, Congressman JOYCE.

This bipartisan bill codifies a pilot program, as Mr. BOST said, that was initiated under President Trump, and it shows great promise. But as we stand here tonight, this bill has now been unexpectedly thrown into jeopardy, and it is entirely because of political gamesmanship. Right now, at the last minute, before we vote on this bill, the Pro-Life Caucus from the other side of the aisle has acted to stop the bill from moving to prevent the 16 words that are on this page. This language has been in the bill since its inception when we created this: "Providing women veterans with information that is tailored to their specific healthcare and benefit needs."

To be clear, if we pass this bill, then it goes to the President's desk to be signed into law.

But just so we understand what was meant with the idea of providing women and veterans with information tailored to them, it is pregnancy and mental health care, maternity care, mammogram, breast health, breastfeeding and lactation, menopause, gynecological cancer, pre-pregnancy health, chronic pelvic pain, birth control, osteoporosis, prosthetics for women, intimate partner violence, disordered eating, and sexual assault. I can go on. There is a very long list of specific health issues that are specific to women.

Instead, my colleagues on the other side of the aisle are holding this bill hostage. The 16 words that they apparently now object to are essential for women's healthcare and are already covered by the VA. None of this is controversial. None of this is objectionable. It doesn't change one thing about veterans' benefits or services. It makes no changes to what they are entitled to. All it does is require the VA to reach out to servicemembers three times in their first year from separation. It increases outreach to veterans.

So let's talk about what this is really about.

Earlier today, a letter went out from Ranking Member BOST and the Pro-Life Caucus saying that Members, while they supported it previously, should now turn against it. After publicly supporting this, they are now leaving it.

And why?

Because they are concerned about VA policy. They are concerned about the

VA's decision to provide veteran women with access to abortion when they have been raped, when they are the victims of family incest, or when a doctor confirms that the pregnancy is a risk to the health or the life of the mother.

It is not abortion on demand and not extreme policies. These are very basic, commonly accepted instances when a woman veteran has gone through hell and has no other option.

The other side of the aisle, to be clear, is objecting to this bill because they object to any exceptions whatsoever on abortion. It is a political game. It is literally putting politics ahead of the 18 million veterans and 200,000 each year who separate.

It is our responsibility to honor the veterans, male and female. I find it disturbing that you would play politics in this way. I ask the other side of the aisle to reconsider and support this bill.

Mr. TAKANO. Madam Speaker, I reserve the balance of my time.

Mr. BOST. Madam Speaker, I yield myself such time as I may consume because I would like to take this time to respond to a few things that were not said correctly.

One, no one has said anything about a lawsuit, especially from the ranking member.

Two, the Hyde amendment says: rape, incest, life of the mother. When you put life and health of the mother, then it expands what can be distorted and where we are at, and it opens to the point of long-term abortion, and that has actually been verified by the VA.

There is not a whole list there that we want to remove. We want it to say: If we believe that men and women are all veterans and should be considered, then they should be advised as veterans.

But by putting that particular language in at this time after the administration has violated the law of 1962—now the chairman said there is another law, but if you look at that law, that law never goes directly to abortion. And if it was directed towards abortion, then they would have put it in the law. They would have put it in the law. They wouldn't have made that broad statement. That is why it is a misinterpretation of the VA.

Madam Speaker, I yield 4 minutes to the gentleman from New Jersey (Mr. SMITH).

Mr. SMITH of New Jersey. Madam Speaker, I thank my good friend for yielding.

Madam Speaker, as the former chairman of the House Committee on Veterans' Affairs and the prime author of 14 major laws to assist veterans, including the Homeless Veterans Comprehensive Assistance Act and several healthcare laws as well, I have always deeply respected and strongly supported the unique mission of VA healthcare.

Comprised of 172 medical centers and over 1,100 outpatient clinics, the VA

operates the largest integrated healthcare network in the entire world. VA medical personnel—371,000 professionals and support staff—are absolutely committed to healing, nurturing, and rehabilitating.

So it is beyond disappointing that President Biden issued an illegal rule—I was here when section 106 of the Veterans Healthcare Act of 1992 was enacted, and it couldn't have been clearer—to turn the lifesaving, life-enhancing mission of the VA into new venues for abortion on demand.

And the word health—*Roe v. Wade* and *Doe v. Bolton* couldn't have made it more clear, and *Doe v. Bolton* with the companion opinion issued by the Supreme Court, they defined health. They used the World Health Organization's definition, and it is everything including any kind of mental stress. So it is completely wide-open, abortion-on-demand language. It is not rape, incest, and life of the mother. Health is included in Biden's rule.

The new Biden VA abortion rule authorizes and forces taxpayers to fund the violent death of unborn baby girls and baby boys by what?

By beheading, dismemberment, forced expulsion from the womb, deadly poisons, and other methods at any time until birth.

Abortion, Madam Speaker, is not healthcare unless one construes the precious life of an unborn child to be analogous to a tumor to be excised or a disease to be vanquished.

For decades, Madam Speaker, abortion advocates have gone to extraordinary lengths to ignore, trivialize, and cover up the battered baby victim. But today, thanks to ultrasound, unborn babies are more visible than ever before. Today, science informs us that birth is an event—albeit an important one—but it is not the beginning of life. Modern science and medicine today treats unborn children with disability or disease as a patient in need of diagnosis and treatment, not death by abortion.

Unborn babies are society's youngest patients and deserve benign, life-affirming medical interventions and not medicines that kill. The weakest and most vulnerable unborn babies deserve our respect, empathy, protection, and love.

The legislation before us today will be used to promote the VA's new abortion-on-demand mission.

Madam Speaker, I urge my colleagues to oppose it, and, hopefully, we will see a change in the policy sometime in the near future that President Biden has issued.

Mr. BOST. Madam Speaker, I reserve the balance of my time.

Mr. TAKANO. Madam Speaker, may I inquire as to how much time remains.

The SPEAKER pro tempore. The gentleman from California has 9½ minutes remaining.

Mr. TAKANO. Madam Speaker, before I yield an additional 3 minutes to the gentlewoman from Michigan, let

me just say that if the minority is so insistent and is fervent in their belief that this interim final rule is illegal, I do not understand why there has been no lawsuit filed to enjoin the rule.

This is very peculiar that with such passion and with such fervor they argue that this rule is illegal.

Madam Speaker, I yield 3 minutes to the gentlewoman from Michigan (Ms. SLOTKIN).

Ms. SLOTKIN. Madam Speaker, there has been a lot of talk on the other side of the aisle, and I just want to be clear. No one in this room is in the judicial branch, and no one in this room that I am aware of is a medical doctor.

If you believe that the provisions that the VA has put forward have a legal problem, then you have the right to take up that case and put it through the courts. We are the legislative branch. We make laws, and we pass laws. We are not judge and jury. Take it to a court if you are concerned. That is your right.

In terms of making decisions on behalf of women, if you want to take a veterans' bill and make it about abortion, then let's do it. What you are saying, and you are saying it in front of the American people, is that you believe a veteran who has been raped, who is the victim of incest, or who is having a dangerous miscarriage does not deserve access to abortion.

You are saying—unless you correct me and tell me what you believe a woman deserves to have when she has been raped, the victim of incest, or is in the middle of a dangerous miscarriage, if you can't state it then be clear you believe in no exceptions for women—a cold, heartless, and violent approach to women's health.

You want to ban all abortions. That is your goal. Many of you have been open about that, and if you flip the House, we know that you will put forward a full ban on all abortions for all States. You have been clear about it.

If you want to turn a veterans' bill into an abortion bill, then let's do it. Not one of you are a medical doctor. Not one of you.

What the VA guidelines say is that if you have been raped or are the victim of incest or a medical professional deems that your pregnancy is a risk to your health. The one in four women in this country who has had a miscarriage, probably many women in this room, that you are a better judge of who gets to decide the future of their life and not a medical doctor? Who do you think you are?

You are politicians. We are all on this floor elected officials and not medical professionals. If it were your wife or your daughter who is suffering through a miscarriage, are you going to tell her she can't until her fever gets high enough or until she is bleeding harder?

That is what is happening in the State of Texas right now. If that is what you want for veterans, shame on you. Shame on you.

I am sorry we built this bill to be bipartisan. I sought your support par-

ticularly, sir, and you are making it a political issue.

Shame on you. You all have pictures of veterans in your office. You are proud to show your pride in our veterans. It should be the most bipartisan issue in the world, and you are making it political. Shame on you.

The SPEAKER pro tempore. Members are reminded to direct their remarks to the Chair.

Mr. BOST. Madam Speaker, I yield myself such time as I may consume.

Let me tell you, Madam Speaker, if I may, the question is not on rape, incest, or life of the mother. It is on health, which could then go to mental health which could spin off to late-term abortions.

This is a very personal issue to a lot of people, and I am sure it is to everyone on both sides of the aisle. But I have to question who in this room has ever held a child who has been born after 25 weeks in the womb? I have. I held one granddaughter who died in the womb and one who died in my arms after she was out of the womb.

What the VA has done with this rule by tweaking it, they think it is for the right reasons—right or wrong—which you consider, rape, incest, life of the mother, it is not. It is rape, incest, life and health of the mother, which will allow for those late-term abortions.

Madam Speaker, that is life. Our Constitution is very clear. It is very clear: life, liberty, and the pursuit of happiness, the first being life.

□ 2045

You can't, if you have ever held a child like that when they died in your arms, say that is not life.

Unfortunately, it is not us that is making the decision. It is political. It is the Biden administration, Madam Speaker, and they have done it through taking the VA.

Anybody that can question me on my support of veterans is out of their mind. I have served. My father served. My grandfather served. My son served. My grandson served. And guess what? As of last week, my granddaughter is now in Navy boot camp.

I will stand for the veterans, but I will not stand for the death of children regardless of who this administration is or what they believe is a good political move.

Madam Speaker, I yield 3 minutes to the gentleman from Texas (Mr. ROY), my good friend.

Mr. ROY. Madam Speaker, I appreciate his friend's service, and I appreciate his passion on this issue.

I listened here as my colleagues want to lecture us about making decisions about life. Who are my colleagues to decide when life begins? Talking about where the doctors are in the room, who are my colleagues, where is God in the room about determining when life begins?

It is my colleagues on the other side of the aisle who have out-of-step views about the extent of abortion in this country to terminate life right up to the point of birth. It is out of step with

the entirety of the world. It is a radical position, and the entirety of this country knows it.

What we are talking about right now, when we used to be able to have some peaceful debates in this body, we had the Hyde amendment recognizing our differences on the issue and trying to pull it out of the debate of funding, but my colleagues on the other side of the aisle refuse to respect the Hyde amendment.

Now, you have an administration making up law. My colleague on the other side of the aisle wants to lecture about where you go to have a dispute about law. Oh, run to the courts, they say. Run to Article III.

Well, we are Article I, dadgummit, and we make decisions about the law every single day. As a Member of this body, I introduced the ARTICLE ONE Act under President Trump, questioning executive authority.

I subpoenaed records from the White House, questioning unaccompanied alien children data because I believe in the primacy of Article I.

But we should, dadgummit, on a bipartisan basis believe that we need to make these decisions, and you don't have the VA arbitrarily making law and stepping over the 1992 law, which has never been repealed. It has never been set aside, and to suggest that it has makes a mockery of the laws that we pass. We should agree on that on a bipartisan basis.

The ranking member is speaking for all of us when he says we are trying to stand up in support of the Solid Start program, but it has now been turned on its head by a radical decision by the executive branch, so now we are no longer going to support this program as it exists.

As the chairman said, 16 words are the hang-up. Then change the 16 words, and let's fix what needs to be fixed to honor what we know is the law from the 1992 law.

Mr. TAKANO. Madam Speaker, what the gentleman from Texas is suggesting that we do is delete women from S. 1198. That, I will not do.

Yes, I strongly believe in Article I. The accusation that Secretary McDonough issued a radical rule, well, what is this so-called radical rule he is mentioning that he has issued? The rule that Secretary McDonough issued, the interim final rule, says that abortion is available based on the 1996 law, which gave him the authority to define medical benefits available at the VA. That is very clear what Congress did.

It is under that authority that this Secretary has made not a radical rule but simply a rule which allows veteran women to enjoy the same rights that they had when they were serving in the military as Active-Duty servicemembers. Women serving in the military have access to abortions when they have been raped, when they are victims of incest, and, yes, when their pregnancies pose a danger to their life.

Who is trying to play God here are the Members on the other side of the aisle who wish to deny women who have worn the cloth of this country, who have served our country, who fought for all of our freedoms, to deny them the freedom to be able to consider the full range of medical procedures that they need in order to preserve their own life.

What is extreme here is that they want to deny women to even be able to access abortion counseling, counseling which may save their lives.

Madam Speaker, I reserve the balance of my time.

Mr. BOST. Madam Speaker, I yield myself the balance of my time.

Madam Speaker, I think it is important to realize that DOD actually follows the Hyde amendment, which is rape, incest, and the life of the mother, which is exactly what the chairman just quoted.

What the VA does is rape, incest, and life and health, including mental health, of the mother, which can be a claim that maybe I am under stress, all of these things. That is why we need clarification. Not only do we need clarification, but we need to follow the law.

The argument that the other law allows the VA Secretary to make these decisions, it never mentioned abortion in there. I think that would have done that.

Madam Speaker, I am encouraging my Members to vote “no” on this bill. I would love to be able to vote on this bill when we get this problem straightened out. I believe our veterans deserve to have the other benefits that are here and available in the bill.

As everybody knows, I did vote for it in the other form before the VA stepped down this path.

Madam Speaker, I yield back the balance of my time.

Mr. TAKANO. Madam Speaker, again, I ask for my colleagues to join me in passing S. 1198.

Madam Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. TAKANO) that the House suspend the rules and pass the bill, S. 1198.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. BOST. Madam Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this motion will be postponed.

STRENGTHENING WHISTLEBLOWER PROTECTIONS AT THE DEPARTMENT OF VETERANS AFFAIRS ACT

Mr. TAKANO. Madam Speaker, I move to suspend the rules and pass the

bill (H.R. 8510) to amend title 38, United States Code, to make certain improvements to the Office of Accountability and Whistleblower Protection of the Department of Veterans Affairs, and for other purposes, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 8510

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Strengthening Whistleblower Protections at the Department of Veterans Affairs Act”.

SEC. 2. COUNSEL OF OFFICE OF ACCOUNTABILITY AND WHISTLEBLOWER PROTECTION.

Subsection (e) of section 323 of title 38, United States Code, is amended—

(1) by inserting “(1)” before “The Office”; and

(2) by adding at the end the following new paragraph:

“(2) The Assistant Secretary shall appoint a Counsel of the Office, who shall be a career appointee in the Senior Executive Service and shall report to the Assistant Secretary. The Counsel shall provide the Assistant Secretary with legal advice on all matters relating to the Office. In accordance with subsection (e), the Assistant Secretary may hire the appropriate staff for the Counsel to provide such legal advice.”.

SEC. 3. MODIFICATIONS TO FUNCTIONS OF OFFICE OF ACCOUNTABILITY AND WHISTLEBLOWER PROTECTION.

Subsection (c)(1) of such section is amended—

(1) by striking subparagraphs (A) and (B);

(2) by redesignating subparagraphs (C) through (G) as subparagraphs (A) through (E), respectively;

(3) in subparagraph (A), as so redesignated, by inserting “and allegations of whistleblower retaliation” after “disclosures”; and

(4) by striking subparagraph (B), as so redesignated, and inserting the following new subparagraph:

“(B) Referring employees of the Department to the Office of Special Counsel so the Office of Special Counsel may receive whistleblower disclosures and allegations of whistleblower retaliation.”; and

(5) by striking subparagraphs (H) and (I).

SEC. 4. EXPANSION OF WHISTLEBLOWER PROTECTIONS.

(a) CLARIFICATION OF PROHIBITED PERSONNEL ACTION.—Section 731(c) of such title is amended—

(1) in paragraph (1)—

(A) in the matter preceding subparagraph (A), by inserting “, or threatening to take or fail to take,” after “failing to take”; and

(B) in subparagraph (A), by inserting “, or with respect to an allegation of such a disclosure” before the semicolon;

(2) in paragraph (3), by inserting “, making a referral to boards of licensure,” after “negative peer review”.

(b) FUNCTION OF OFFICE OF ACCOUNTABILITY AND WHISTLEBLOWER PROTECTION.—Section 323(g) of such title is amended by adding at the end the following new paragraph:

“(4) The term ‘prohibited personnel action’ has the meaning given such term in section 731(c) of this title.”.

SEC. 5. TRACKING AND ENFORCEMENT OF RECOMMENDATIONS AND SETTLEMENT AGREEMENTS REGARDING WHISTLEBLOWERS.

Subsection (c) of section 323 of such title, as amended by section 4, is further amended—

(1) in paragraph (1), by adding at the end the following new subparagraphs:

“(I) Tracking the negotiation, implementation, and enforcement of settlement agreements entered into by the Secretary regarding claims of whistleblower retaliation, including with respect to the work of the General Counsel of the Department regarding such settlements.

“(J) Tracking the determinations made by the Special Counsel regarding claims of whistleblower retaliation, including—

“(i) any disciplinary action for the individual who engaged in whistleblower retaliation; and

“(ii) determinations regarding the need for settlement as identified by the Special Counsel, and any settlement resolving claims of whistleblower retaliation entered into by the Secretary with the whistleblower.”; and

(2) by adding at the end the following new paragraph:

“(4)(A) In carrying out subparagraph (I) of paragraph (1), the Assistant Secretary shall, in consultation with the General Counsel, establish metrics and standards regarding—

“(i) the timely implementation of settlement agreements entered into by the Secretary regarding whistleblower retaliation; and

“(ii) reasonable restitution and restoration of employment, and other relief for whistleblowers; and

“(B) The Assistant Secretary shall establish a secure electronic system to carry out subparagraphs (I) and (J) of paragraph (1) in a manner that ensures the confidentiality of the identity of a whistleblower.”.

SEC. 6. TRAINING AND INFORMATION.

Section 323 of such title is further amended—

(1) in subsection (c)(2), by striking “receive anonymous whistleblower disclosures” and inserting “provide information to employees of the Department regarding the rights of and procedures for whistleblowers”; and

(2) by redesignating subsection (g) as subsection (i); and

(3) by inserting after subsection (f) the following new subsections:

“(g) TRAINING.—The Assistant Secretary shall—

“(1) develop, in consultation with the Special Counsel, annual training on whistleblower protection and related issues;

“(2) provide and make such training available to employees of the Department; and

“(3) disseminate training materials and information to employees on whistleblower rights, whistleblower disclosures, and allegations of whistleblower retaliation, including any materials created pursuant to section 733 of this title.”.

SEC. 7. IMPROVEMENTS TO ANNUAL REPORTS.

Subsection (f) of section 323 of such title is amended—

(1) in paragraph (1)(B)(ii), by striking “subsection (C)(1)(G)” and inserting “subsection (c)(1)(E)”; and

(2) in paragraph (2)—

(A) by striking “under subsection (c)(1)(I)” and inserting “by the Special Counsel”; and

(B) by inserting “not later than 60 days after such date” before “the Secretary shall”; and

(3) by adding at the end the following new paragraph:

“(3) Not later than June 30, 2023, and semi-annually thereafter, the Secretary shall submit to the Committees on Veterans’ Affairs of the House of Representatives and the Senate a report on settlements described in paragraph (1)(I) of subsection (c), including, with respect to the period covered by the report—

“(A) the number of settlements under negotiation or executed, and the number of executed settlements that have not been fully implemented;

“(B) the explanation as to why any such executed settlement has not been fully implemented;

“(C) a description of the metrics described in paragraph (4)(A) of such subsection; and

“(D) identification of settlement agreements that are not meeting such metrics and standards, or for which the Assistant Secretary is aware of a determination that a breach of agreement has been found.”.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from California (Mr. TAKANO) and the gentleman from Illinois (Mr. BOST) each will control 20 minutes.

The Chair recognizes the gentleman from California.

GENERAL LEAVE

Mr. TAKANO. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on H.R. 8510, as amended.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. TAKANO. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, H.R. 8510, as amended, the Strengthening Whistleblower Protections at the Department of Veterans Affairs Act, is an important bill that will protect and support VA employees who report wrongdoing within the Department.

I commend Representatives CHRIS PAPPAS and TRACEY MANN, the chairman and ranking member of our Subcommittee on Oversight and Investigations, for their work over the past few years on this issue.

The subcommittee has been tireless in its examination of VA policies and procedures for protecting whistleblowers and disciplining those who retaliate against them. When retaliation occurs, VA must make whole a whistleblower who was unfairly punished for speaking truth to power. This is not only the right thing to do; it is the law.

During the subcommittee's hearings on this issue, we heard firsthand accounts from several individuals who experienced long waits for justice despite confirmed findings of retaliation. VA can and must do more to protect whistleblowers.

I support Chairman PAPPAS and Ranking Member MANN's bipartisan legislation. It would promote independence and strengthen the mission of VA's Office of Accountability and Whistleblower Protection.

It would also streamline duplicative investigations and send a clear message that retaliation against those who report wrongdoing will not be tolerated.

This bill has the support of several national organizations that advocate on behalf of government whistleblowers and was favorably reported by the full Veterans' Affairs Committee last week.

Madam Speaker, I urge all of my colleagues to support this legislation, and I reserve the balance of my time.

Mr. BOST. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I rise today in support of H.R. 8510, as amended.

Following the access scandal of 2014, Congress enacted the VA Accountability Act. The Accountability Act is meant to make it easier for VA to hold bad employees responsible for their actions. The law also created a new VA office intended to protect whistleblowers and conduct investigations.

Unfortunately, this office has never lived up to the standard that whistleblowers deserve. In 2021, 80 percent of the OAWP recommendations for discipline were ignored by the VA. It is time to refocus their mission.

H.R. 8510, as amended, would require VA employees with complaints to be referred to the Office of Special Counsel. The OSC is an independent office which has the authority to receive, manage, and investigate allegations of whistleblower retaliation at the VA.

The OSC has a respected history of conducting objective investigations. As such, I am convinced that the OSC will do a better job of holding senior VA employees accountable than the OAWP.

This bill was drafted with valuable input from stakeholders and enjoys broad support.

Madam Speaker, I am pleased that Congressman PAPPAS and Congressman MANN have come together to author this important bipartisan proposal, and I urge my colleagues to support the bill.

Madam Speaker, I reserve the balance of my time.

Mr. TAKANO. Madam Speaker, I yield 5 minutes to the gentleman from New Hampshire (Mr. PAPPAS), the chairman of the Subcommittee on Oversight and Investigations for the Veterans' Affairs Committee.

Mr. PAPPAS. Madam Speaker, I rise in support of my bipartisan legislation, H.R. 8510, the Strengthening Whistleblower Protections at the Department of Veterans Affairs Act.

It is a bill that improves policies and procedures to better protect VA whistleblowers. It also promotes independence and removes conflicts of interest at VA's Office of Accountability and Whistleblower Protection.

Whistleblowers play a critical role in holding the Federal Government and its agencies accountable for waste, fraud, abuse, and mismanagement. When employees of the Department of Veterans Affairs witness issues that put the health, safety, and well-being of veterans at risk, VA staff should feel encouraged to speak out without fear of retaliation. This would encourage corrective action to be taken and no harm to the whistleblower.

In reality, however, too often the messenger is punished. The Subcommittee on Oversight and Investigations that I chair has done years of work on this issue.

Alongside Ranking Member TRACEY MANN, we have conducted multiple

hearings looking into this problem. Our efforts have highlighted the individual stories of whistleblowers who have lost their jobs or faced other retaliatory actions as a result of their disclosures.

Further, whistleblowers often wait years to be made whole after experiencing retaliation under current Department policies and procedures.

The testimony from three previous VA employees disclosed VA whistleblowers are likely to face retaliation, including the loss of their position, and are forced to wait years for justice.

This bipartisan bill will make major changes to how whistleblower claims are handled, strengthening accountability through the process. The bill ends VA's authority to investigate whistleblower retaliation complaints and, instead, relies on the independent U.S. Office of Special Counsel to ensure objectivity over the process.

OSC is an independent Federal investigative agency that has high trust within the whistleblower community. They have the resources and autonomy needed to do this work.

It will also require VA's Office of Accountability and Whistleblower Protection to strengthen accountability over settlement agreements for VA employees who suffered retaliation which provide financial restitution and guarantees of reemployment.

Further, the bill will reaffirm OAWP's responsibility to provide resources to VA employees on whistleblower rights, including training. These reforms will ensure whistleblowers feel safe reporting issues within the Department.

We can't continue to allow whistleblowers to be punished for speaking out, and we have to make sure we are doing all we can to protect VA whistleblowers. It is not only the law; it is also the right thing to do to protect whistleblowers from retaliation.

My colleague and ranking member of the Subcommittee on Oversight and Investigations, Congressman TRACEY MANN, co-led this bill with me to promote independence and strengthen the mission of VA's whistleblowers office. I thank Congressman MANN and his staff for their dedication and hard work on this issue.

I thank all the members of the Veterans' Affairs Committee for their support of this bill last week, and I appreciate the support from the whistleblower advocacy groups, including the Project on Government Oversight, the Whistleblowers of America, and the Government Accountability Project, as well as VA's labor union, AFGE.

□ 2100

So once this is enacted, this bill will ensure that the protections are on the books at the Department of Veterans Affairs that will strengthen independence and the mission of VA's whistleblower office.

Madam Speaker, I urge the full House to support passage.

Mr. BOST. Madam Speaker, I yield 3 minutes to the gentleman from Kansas (Mr. MANN), my good friend, who has worked so hard on this issue.

Mr. MANN. Madam Speaker, I rise today in support of legislation that I co-introduced with Congressman PAPPAS, H.R. 8510, the Strengthening Whistleblower Protections at the Department of Veterans Affairs Act.

Holding government accountable requires reasonable whistleblower protection. VA employees take a risk when exposing fraud, corruption, or any wrongdoing of any kind, and they deserve to have their claims investigated, and to have protection from retaliation.

The VA's Office of Accountability and Whistleblower Protection was created with good intentions but has never lived up to the expectations of whistleblowers or of this Congress. In 2021, 80 percent of all the disciplinary recommendations that OAWP made were either changed or simply ignored. Here are just two examples of the many troubling stories that my colleagues and I have heard during our hearings.

At one facility, OAWP recommended a range of discipline from 12-day suspension to removal for three supervisors who engaged in whistleblower retaliation. VA officials disagreed, however, and the individuals received no disciplinary action.

At another facility, OAWP recommended a range of discipline from demotion to removal for an individual who retaliated against and harassed an employee. VA officials believed the file lacked certain testimony and evidence and the individual received no disciplinary action.

Despite the efforts of many dedicated VA staff, these cases, and others like them, highlight the need for a change in OAWP's roles and responsibilities. Veterans, whistleblowers, and taxpayers deserve better. H.R. 8510 would remove OAWP's investigative authority, and instead, direct OAWP to refer whistleblowers to the Office of Special Counsel, an independent agency, which has a much better track record for whistleblower investigations. This bill would also require OAWP to track settlement negotiations and agreements between VA employees and the Department and refocus the office on providing training to employees on whistleblower rights.

This legislation is an example of the good that Congress can do when we work together. I look forward to its swift passage through the House, and I urge my colleagues to support this important bill.

Mr. TAKANO. Madam Speaker, I have no further speakers, I am prepared to close, and I reserve the balance of my time.

Mr. BOST. Madam Speaker, I encourage all my colleagues to support this bill, and I yield back the balance of my time.

Mr. TAKANO. Madam Speaker, I ask all my colleagues to join me in passing

H.R. 8510, as amended, the Strengthening Whistleblower Protections at the Department of Veterans Affairs Act, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. TAKANO) that the House suspend the rules and pass the bill, H.R. 8510, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. ROY. Madam Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this motion will be postponed.

SUPPORTING FAMILIES OF THE FALLEN ACT

Mr. TAKANO. Madam Speaker, I move to suspend the rules and pass the bill (S. 2794) to amend title 38, United States Code, to increase automatic maximum coverage under the Servicemembers' Group Life Insurance program and the Veterans' Group Life Insurance program, and for other purposes.

The Clerk read the title of the bill.

The text of the bill is as follows:

S. 2794

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Supporting Families of the Fallen Act".

SEC. 2. INCREASE IN AUTOMATIC MAXIMUM COVERAGE UNDER SERVICEMEMBERS' GROUP LIFE INSURANCE AND VETERANS' GROUP LIFE INSURANCE.

(a) IN GENERAL.—Section 1967(a)(3)(A)(i) of title 38, United States Code, is amended by striking "\$400,000" and inserting "\$500,000".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect on the later of—

(1) the date that is 60 days after the date of the enactment of this Act; or

(2) the date on which the Secretary of Veterans Affairs determines that—

(A) the amount for which a member will be insured pursuant to the amendment made by subsection (a) and the premiums for such amount are administratively and actuarially sound for the Servicemembers' Group Life Insurance program under subchapter III of chapter 19 of title 38, United States Code, and the Veterans' Group Life Insurance program under section 1977 of such title; and

(B) the increase in such amount carried out pursuant to the amendment will not result in such programs operating at a loss.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from California (Mr. TAKANO) and the gentleman from Illinois (Mr. BOST) each will control 20 minutes.

The Chair recognizes the gentleman from California.

GENERAL LEAVE

Mr. TAKANO. Madam Speaker, I ask unanimous consent that all Members

may have 5 legislative days in which to revise and extend their remarks and include extraneous material on S. 2794.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. TAKANO. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, life insurance is designed to offer protection from loss and serves as a death benefit. For a veteran or servicemember, VA's Veterans' Group Life Insurance offers security and confidence that loved ones will be covered and made financially whole in the event a source of income is lost.

While no amount of money can replace the life of a beloved family member, VA's Servicemembers' and Veterans' Group Life Insurance exists to provide an affordable option to provide a fiscal shield for survivors.

Neither insurance program has experienced a coverage limit increase since 2005. This bill increases the maximum amount of coverage for Servicemembers' and Veterans' Group Life Insurance by \$100,000, which means expanded coverage of up to \$500,000 for each option.

Madam Speaker, I support this bill, I urge all of my colleagues to do the same, and I reserve the balance of my time.

Mr. BOST. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I rise today in support of S. 2794, the Supporting Families of the Fallen Act.

I thank Senator TUBERVILLE and Congressman ROY for leading this effort in the Senate and the House, respectively.

This bill makes much-needed updates to the coverage amounts for the Servicemembers' Group Life Insurance and the Veterans' Group Life Insurance program.

Specifically, this bill would allow VA to raise the max payment for both programs from \$400,000 to \$500,000. An additional \$100,000 would make it easier for surviving spouses to keep a roof over their family's head and food on the table following the loss of their loved one.

As many of you know, VA's life insurance programs may be the only affordable option available to servicemembers and veterans. This is because some veterans may not be eligible for private life insurance due to the added risk of military service or because they have a service-connected disability, like PTSD or cancer.

When we send our military into harm's way, VA insurance programs provide them and their families with financial security. However, the max rate of \$400,000, which was established in 2005, does not meet the needs of today's survivors.

Since 2005, American families have seen the cost of living continuously rise. This is especially true right now due to historic inflation under the Biden administration.

This bill would provide families with insurance coverage that will better meet their needs. S. 2794 builds on our Nation's promises to care for the families of those lost in service to our country.

Madam Speaker, I urge my colleagues to support the bill, and I reserve the balance of my time.

Mr. TAKANO. Madam Speaker, I have no further speakers, I am prepared to close, and I reserve the balance of my time.

Mr. BOST. Madam Speaker, I yield 3 minutes to the gentleman from Texas (Mr. ROY), my good friend.

Mr. ROY. Madam Speaker, I am pleased to rise in support of my bill, which in this case is the S version—the Senate version—that was introduced by Senator TUBERVILLE from Alabama, S. 2794, the Supporting Families of the Fallen Act.

The ranking member just articulated why this legislation is important. I think one of the things that we have to remember is the extent to which our men and women in uniform have to keep up and keep pace with inflation, and we thought this was important.

I had a constituent in my district who raised this issue. I sat down with that constituent and then met with a bunch of other constituents who were running into the same problem. I talked to a number of my veteran colleagues, and we believed that this was an important solution.

As many know, I am not one to want to put forward legislation that isn't paid for. This bill, for the most part, pays for itself with the slight exception of Active Duty combat individuals. I believe that is an exception worth making when we talk about things that are not paid for.

It is straightforward. It simply increases the SGLI and VGLI maximum coverage from \$400,000 to \$500,000 so that servicemembers and veterans can customize the coverage amount that they need. I think it is a commonsense solution. It is bipartisan and it is bicameral.

Madam Speaker, I appreciate the chairman and the ranking member for their support.

Mr. TAKANO. Madam Speaker, I reserve the balance of my time.

Mr. BOST. Madam Speaker, I encourage my colleagues to support this bill, and I yield back the balance of my time.

Mr. TAKANO. Madam Speaker, I thank all the folks that came together for this bill, and I ask all my colleagues to join me in passing S. 2794, which upon passage today will be sent on to the President's desk for signature.

Madam Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. TAKANO) that the House suspend the rules and pass the bill, S. 2794.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the yeas have it.

Mr. ROY. Madam Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this motion will be postponed.

□ 2110

JOHN LEWIS CIVIL RIGHTS FELLOWSHIP ACT OF 2022

Mr. CASTRO of Texas. Madam Speaker, I move to suspend the rules and pass the bill (H.R. 8681) to establish the John Lewis Civil Rights Fellowship to fund international internships and research placements for early- to mid-career professionals to study non-violent movements to establish and protect civil rights around the world, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 8681

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "John Lewis Civil Rights Fellowship Act of 2022".

SEC. 2. JOHN LEWIS CIVIL RIGHTS FELLOWSHIP PROGRAM.

The Mutual Educational and Cultural Exchange Act of 1961 (22 U.S.C. 2451 et seq.) is amended by adding at the end the following:

"SEC. 115. JOHN LEWIS CIVIL RIGHTS FELLOWSHIP PROGRAM.

"(a) ESTABLISHMENT.—There is established the John Lewis Civil Rights Fellowship Program (referred to in this section as the 'Fellowship Program') within the J. William Fulbright Educational Exchange Program.

"(b) PURPOSES.—The purposes of the Fellowship Program are—

"(1) to honor the legacy of Representative John Lewis by promoting a greater understanding of the history and tenets of non-violent civil rights movements; and

"(2) to advance foreign policy priorities of the United States by promoting studies, research, and international exchange in the subject of nonviolent movements that established and protected civil rights around the world.

"(c) ADMINISTRATION.—The Bureau of Educational and Cultural Affairs (referred to in this section as the 'Bureau') shall administer the Fellowship Program in accordance with policy guidelines established by the Fulbright Foreign Scholarship Board, in consultation with the binational Fulbright Commissions and United States Embassies.

"(d) SELECTION OF FELLOWS.—

"(1) IN GENERAL.—The Board shall annually select qualified individuals to participate in the Fellowship Program. The Bureau may determine the number of fellows selected each year, which, whenever feasible, shall be not fewer than 25.

"(2) OUTREACH.—To the extent practicable, the Bureau shall conduct outreach at institutions the Bureau determines are likely to produce a range of qualified applicants.

"(e) FELLOWSHIP ORIENTATION.—The Bureau shall organize and administer a fellowship orientation that shall—

"(1) be held in Washington, DC, or at another location selected by the Bureau;

"(2) include programming to honor the legacy of Representative John Lewis; and

"(3) be held on an annual basis.

"(f) STRUCTURE.—

"(1) WORK PLAN.—To carry out the purposes described in subsection (b)(2)—

"(A) each fellow selected pursuant to subsection (d) shall arrange an internship or research placement—

"(i) with a nongovernmental organization, academic institution, or other organization approved by the Bureau; and

"(ii) in a country with an operational Fulbright U.S. Student Program; and

"(B) the Bureau shall, for each fellow, approve a work plan that identifies the target objectives for the fellow, including specific duties and responsibilities relating to those objectives.

"(2) CONFERENCES; PRESENTATIONS.—Each fellow shall—

"(A) attend the fellowship orientation described in subsection (e);

"(B) not later than the date that is 1 year after the end of the fellowship period, attend a fellowship summit organized and administered by the Bureau, which, whenever feasible, shall be held in a location of importance to the civil rights movement in the United States and may coincide with other events facilitated by the Bureau; and

"(C) at such summit, give a presentation on lessons learned during the period of fellowship.

"(3) FELLOWSHIP PERIOD.—Each fellowship under this section shall continue for a period determined by the Bureau, which, whenever feasible, shall be not shorter than 10 months.

"(g) FELLOWSHIP AWARD.—The Bureau shall provide each fellow under this section with an allowance that is equal to the amount needed for—

"(1) the fellow's reasonable costs during the fellowship period; and

"(2) travel and lodging expenses related to attending the orientation and summit required under subsection (e)(2).

"(h) REPORTS.—Not later than 1 year after the date of completion of the Fellowship Program by the initial cohort of fellows selected under subsection (d), and on an annual basis thereafter, the Secretary of State shall submit to the Committee on Foreign Affairs of the House of Representatives and the Committee on Foreign Relations of the Senate a report providing information on the implementation of the Fellowship Program, including on—

"(1) the demographics of the cohort of fellows who completed a fellowship during the preceding 1-year period;

"(2) a description of internship and research placements, and research projects selected, under the Fellowship Program, including participant feedback on program implementation and feedback of the Department on lessons learned;

"(3) a plan for factoring such lessons learned into future programming; and

"(4) an analysis of trends relating to the diversity of the cohorts of fellows and the topics of projects completed over the course of the Fellowship Program."

SEC. 3. TECHNICAL AND CONFORMING AMENDMENTS TO THE MUTUAL EDUCATIONAL AND CULTURAL EXCHANGE ACT OF 1961A.

Section 112(a) of the Mutual Educational and Cultural Exchange Act of 1961 (22 U.S.C. 2460(a)) is amended—

(1) in paragraph (8), by striking ";" and inserting a semicolon;

(2) in paragraph (9), by striking the period and inserting "; and"; and

(3) by adding at the end the following:

"(10) the John Lewis Civil Rights Fellowship Program established under section 115, which provides funding for international internships and research placements for early-

to mid-career individuals from the United States to study nonviolent civil rights movements in self-arranged placements with universities or nongovernmental organizations in foreign countries.”.

SEC. 4. SUNSET.

The authority to carry out the John Lewis Civil Rights Fellowship Program established under section 115 of the Mutual Educational and Cultural Exchange Act of 1961 (22 U.S.C. 2451 et seq.), as added by section 2, shall expire on the date that is 7 years after the date of the enactment of this Act.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Texas (Mr. CASTRO) and the gentlewoman from California (Mrs. KIM) each will control 20 minutes.

The Chair recognizes the gentleman from Texas.

GENERAL LEAVE

Mr. CASTRO of Texas. Madam Speaker, I ask unanimous consent that all Members have 5 legislative days in which to revise and extend their remarks and include extraneous material on H.R. 8681, as amended.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. CASTRO of Texas. Madam Speaker, I yield myself such time as I may consume.

I rise today in strong support of H.R. 8681, the John Lewis Civil Rights Fellowship Act of 2022, and I thank Ms. WILLIAMS for authoring this important bill.

I want to begin with a passage from an essay written by Representative John Lewis before his death, which was published on the day of his funeral.

Representative John Lewis, in reflecting on the past and looking to the future said: “You must also study and learn the lessons of history because basic humanity has been involved in this soul-wrenching, existential struggle for a very long time. People on every continent have stood in your shoes, through decades and centuries before you. The truth does not change, and that is why the answers worked out long ago can help you find solutions to the challenges of our time. Continue to build union between movements stretching across the globe because we must put away our willingness to profit from the exploitation of others.”

These words are a call to action and H.R. 8681, the John Lewis Civil Rights Fellowship Act, seeks to meet that call, to learn from history and find solutions to the challenges of our time.

The John Lewis Fellowship will be part of the Fulbright Scholarship Program administered by the State Department and will advance the teaching of the history of nonviolent movements around the world by fostering research and international exchange.

The fellowship supports 25 young scholars in studying the history of nonviolent civil rights movements around the world and improving the understanding of nonviolence as a critical tool for change.

Fostering constructive methods of civic expression is vital for a healthy, flourishing society. Thanks to John’s leadership by example, thousands of people around the world over have learned how to confront the injustices of their own societies through nonviolent means. Now, the duty of honoring his legacy and shepherding a new generation of leaders falls on our shoulders.

I can think of no better time than now to pass this bill that honors the legacy of the great John Lewis. I strongly urge all Members to vote in support of this important legislation, and I reserve the balance of my time.

Mrs. KIM of California. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I rise in support of the John Lewis Civil Rights Fellowship Act. John Lewis was a powerful, tireless advocate for equality and justice all his life.

Along with his mentor and friend, Dr. Martin Luther King, Jr., he put his life and personal safety on the line as a leader in the nonviolent civil rights movement that profoundly changed our Nation for the better.

His boldness in pursuit of justice was powerfully rooted in faith and love. As he himself described it: “At a very early stage of the movement, I accepted the teaching of Jesus, the way of love, the way of nonviolence, the spirit of forgiveness and reconciliation. The idea of hate is too heavy a burden to bear. It is better to love.”

To help pass these values on to future generations, this bill establishes the John Lewis Civil Rights Fellowship within the Fulbright Program at the Department of State.

The Fulbright educational exchange program has enjoyed bipartisan support for over 75 years. As part of Fulbright, the stated purpose of the John Lewis Fellowship is “to advance foreign policy priorities of the United States by promoting studies, research, and international exchange in the subject of nonviolent movements that established and protected civil rights around the world.”

This bill is a worthy way of honoring a great man who sacrificed so much to make America and the world a better place. I support the bill, and I reserve the balance of my time.

Mr. CASTRO of Texas. Madam Speaker, it is my honor to yield 3 minutes to the gentlewoman from Georgia (Ms. WILLIAMS).

Ms. WILLIAMS of Georgia. Madam Speaker, I thank the gentleman for yielding.

I rise today in support of H.R. 8681, the John Lewis Civil Rights Fellowship Act of 2022.

Following in the footsteps of Congressman John Lewis is no easy feat. He was a friend and a mentor to many of us. He was known as the conscience of this body. I often tell people that while I will never fill his shoes, I strive daily to carry out his legacy.

It is my honor to ensure that my friend and my mentor and my predecessor’s legacy lives on through the John Lewis Civil Rights Fellowship within the Fulbright program, which will give scholars an opportunity to study both the inspiration and the impacts of the civil rights movement internationally.

The John and Lilian Miles Lewis Foundation has been working hard to launch this program as a tribute to Congressman Lewis’ impact on social and political change around the world.

Congressman Lewis himself was shaped by his study of nonviolent civil rights movements from around the world, most notably, the philosophy and tactics of Mahatma Gandhi, whose very words were “it is either non-violence or nonexistence.”

Of course, people across the globe have been inspired by the tactics of the United States’ civil rights movement, many led by Congressman John Lewis himself. From the lunch counter sit-ins of the early 1960s, to the 1961 Freedom Rides, to the 1965 march across the Edmund Pettus bridge, Mr. Lewis taught the world that the most powerful way to bend the moral arc toward justice is rooted in the discipline of nonviolence.

But for all of his experiences and impact at home, Congressman Lewis always wished that he would have had the opportunity to study abroad.

Creating the John Lewis Civil Rights Fellowship is a full-circle tribute: sending scholars to study Congressman Lewis’ inspirations and impacts around the world in his name. We hope this program will unlock a powerful opportunity for students who, like Congressman Lewis, would not otherwise have an opportunity to do research across the globe.

The John Lewis Civil Rights Fellowship will be a beacon for the importance of nonviolence, and I look forward to the incredible academic work and exchange this fellowship will support.

Mrs. KIM of California. Madam Speaker, I yield myself the balance of my time.

Madam Speaker, John Lewis lived a life profoundly dedicated to pursuing equality and justice for all, rooted in love and nonviolence. The part he played in the brave struggle against racial injustice changed the course of American history and inspired many around the world.

This bill to create a Fulbright fellowship program in his name is a fitting tribute to his legacy. I support this bill, and I yield back the balance of my time.

□ 2120

Mr. CASTRO of Texas. Madam Speaker, I yield myself such time as I may consume for the purpose of closing.

Madam Speaker, I want to reiterate my staunch support for the John Lewis Civil Rights Fellowship Act of 2022.

This legislation encourages the values of peaceful expression and invigorates a new generation of leaders with

the same spirit that drove John in his lifelong advocacy for civil rights. His leadership during the civil rights movement was pivotal for extending the American promises of life, liberty, and the pursuit of happiness to all Americans. Many of us may not be standing here before this Chamber but for his contributions to racial equality.

This legislation seeks to instill that very same drive and purpose in the leaders of tomorrow, promoting the use of nonviolent civil rights as a tool for change around the world.

Madam Speaker, I hope my colleagues will join me and support this bill, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. CASTRO) that the House suspend the rules and pass the bill, H.R. 8681, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. CLYDE. Madam Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this motion will be postponed.

GLOBAL FOOD SECURITY REAUTHORIZATION ACT OF 2022

Mr. CASTRO of Texas. Madam Speaker, I move to suspend the rules and pass the bill (H.R. 8446) to modify and extend the Global Food Security Act of 2016, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 8446

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

The Act may be cited as the “Global Food Security Reauthorization Act of 2022”.

SEC. 2. FINDINGS.

Section 2 of the Global Food Security Act of 2016 (22 U.S.C. 9301) is amended by striking “Congress makes” and all that follows through “(3) A comprehensive” and inserting “Congress finds that a comprehensive”.

SEC. 3. STATEMENT OF POLICY OBJECTIVES; SENSE OF CONGRESS.

Section 3(a) of the Global Food Security Act of 2016 (22 U.S.C. 9302(a)) is amended—

(1) in the matter preceding paragraph (1), by striking “programs, activities, and initiatives that” and inserting “comprehensive, multi-sectoral programs, activities, and initiatives that consider agriculture and food systems in their totality and that”.

(2) in paragraph (1), by striking “and economic freedom through the coordination” and inserting “, economic freedom, and security through the phasing, sequencing, and coordination”;

(3) by striking paragraphs (3) and (4) and inserting the following:

“(3) increase the productivity, incomes, and livelihoods of small-scale producers and artisanal fishing communities, especially women in these communities, by working across terrestrial and aquatic food systems and agricultural value chains, including by—

“(A) enhancing local capacity to manage agricultural resources and food systems effectively and expanding producer access to, and participation in, local, regional, and international markets;

“(B) increasing the availability and affordability of high quality nutritious and safe foods and clean water;

“(C) creating entrepreneurship opportunities and improving access to business development related to agriculture and food systems, including among youth populations, linked to local, regional, and international markets; and

“(D) enabling partnerships to facilitate the development of and investment in new agricultural technologies to support more resilient and productive agricultural practices;

“(4) build resilience to agriculture and food systems shocks and stresses, including global food catastrophes in which conventional methods of agriculture are unable to provide sufficient food and nutrition to sustain the global population, among vulnerable populations and households through inclusive growth, while reducing reliance upon emergency food and economic assistance;”;

(4) in paragraph (6)—

(A) by inserting “, adolescent girls,” after “women”;

(B) by inserting “and incidence of wasting” after “child stunting”;

(C) by inserting “large-scale food fortification,” after “diet diversification,”; and

(D) by inserting before the semicolon at the end the following: “and nutrition, especially during the first 1,000-day window until a child reaches 2 years of age”; and

(5) in paragraph (7)—

(A) by inserting “combating fragility, resilience,” after “national security,”;

(B) by inserting “natural resource management,” after “science and technology,”; and

(C) by striking “nutrition,” and inserting “nutrition, including deworming,”.

SEC. 4. DEFINITIONS.

Section 4 of the Global Food Security Act of 2016 (22 U.S.C. 9303) is amended—

(1) in paragraph (2), by inserting “, including in response to shocks and stresses to food and nutrition security” before the period at the end;

(2) in paragraph (5)(H)—

(A) by inserting “local” before “agricultural”;

(B) by inserting “and fisher” after “farmer”; and

(C) by inserting “youth,” after “small-scale producers,”;

(3) in paragraph (7), by inserting “the Inter-American Foundation,” after “United States African Development Foundation,”;

(4) in paragraph (8)—

(A) by inserting “agriculture and food” before “systems”; and

(B) by inserting “, including global food catastrophes,” after “food security”;

(5) in paragraph (9), by striking “fishers” and inserting “artisanal fishing communities”;

(6) in paragraph (10), by amending subparagraphs (D) and (E) to read as follows:

“(D) is a marker of an environment deficient in the various needs that allow for a child’s healthy growth, including nutrition; and

“(E) is associated with long-term poor health, delayed motor development, impaired cognitive function, and decreased immunity.”;

(7) in paragraph (12), by striking “agriculture and nutrition security” and inserting “food and nutrition security and agriculture-led economic growth”;

(8) by redesignating paragraphs (4) through (12), as amended, as paragraphs (5) through (13), respectively;

(9) by inserting after paragraph (3) the following:

“(4) FOOD SYSTEM.—The term ‘food system’ means the intact or whole unit made up of interrelated components of people, behaviors, relationships, and material goods that interact in the production, processing, packaging, transporting, trade, marketing, consumption, and use of food, feed, and fiber through aquaculture, farming, wild fisheries, forestry, and pastoralism that operates within and is influenced by social, political, economic, and environmental contexts.”; and

(10) by adding at the end the following:

“(14) WASTING.—The term ‘wasting’ means—

“(A) a life-threatening condition attributable to poor nutrient intake or disease that is characterized by a rapid deterioration in nutritional status over a short period of time; and

“(B) in the case of children, is characterized by low weight for height and weakened immunity, increasing their risk of death due to greater frequency and severity of common infection, particularly when severe.”.

SEC. 5. COMPREHENSIVE GLOBAL FOOD SECURITY STRATEGY.

(a) STRATEGY.—Section 5(a) of the Global Food Security Act of 2016 (22 U.S.C. 9304) is amended—

(1) in paragraph (4)—

(A) by striking “country-owned agriculture, nutrition, and food security policy” and inserting “partner country-led agriculture, nutrition, regulatory, food security, and water resources management policy”; and

(B) by inserting after “investment plans” the following: “and governance systems”;

(2) by amending paragraph (5) to read as follows:

“(5) support the locally-led and inclusive development of agriculture and food systems, including by enhancing the extent to which small-scale food producers, especially women, have access to and control over the inputs, skills, resource management capacity, networking, bargaining power, financing, market linkages, technology, and information needed to sustainably increase productivity and incomes, reduce poverty and malnutrition, and promote long-term economic prosperity;”;

(3) in paragraph (6)—

(A) by inserting “, adolescent girls,” after “women”; and

(B) by inserting “and preventing incidence of wasting” after “reducing child stunting”;

(4) in paragraph (7), by inserting “poor water resource management and” after “including”;

(5) in paragraph (8)—

(A) by striking “the long-term success of programs” and inserting “long-term impact”; and

(B) by inserting “, including agricultural research capacity,” after “institutions”;

(6) in paragraph (9)—

(A) by striking “integrate resilience and nutrition strategies into food security programs, such that” and inserting “coordinate with and complement relevant strategies to ensure”; and

(B) by inserting “adapt and” before “build safety nets”;

(7) in paragraph (13), by inserting “non-governmental organizations, including” after “civil society,”;

(8) in paragraph (14), by inserting “and coordination, as appropriate,” after “collaboration”;

(9) in paragraph (16)—

(A) by striking “section 8(b)(4)” and inserting “section 8(a)(4)”;

(B) by striking “; and” at the end and inserting a semicolon;

(10) by redesignating paragraph (17) as paragraph (22);

(11) by redesignating paragraphs (12) through (16), as amended, as paragraphs (14) through (18), respectively;

(12) by striking paragraphs (10) and (11) and inserting the following:

“(10) develop community and producer resilience and adaptation strategies to disasters, emergencies, and other shocks and stresses to food and nutrition security, including conflicts, droughts, flooding, pests, and diseases, that adversely impact agricultural yield and livelihoods;

“(11) harness science, technology, and innovation, including the research and extension activities supported by the private sector, relevant Federal Departments and agencies, Feed the Future Innovation Labs or any successor entities, and international and local researchers and innovators, recognizing that significant investments in research and technological advances will be necessary to reduce global poverty, hunger, and malnutrition;

“(12) use evidenced-based best practices, including scientific and forecasting data, and improved planning and coordination by, with, and among key partners and relevant Federal Departments and agencies to identify, analyze, measure, and mitigate risks, and strengthen resilience capacities;

“(13) ensure scientific and forecasting data is accessible and usable by affected communities and facilitate communication and collaboration among local stakeholders in support of adaptation planning and implementation, including scenario planning and preparedness using seasonal forecasting and scientific and local knowledge;” and

(13) by inserting after paragraph (18), as redesignated, the following:

“(19) improve the efficiency and resilience of agricultural production, including management of crops, rangelands, pastures, livestock, fisheries, and aquacultures;

“(20) ensure investments in food and nutrition security consider and integrate best practices in the management and governance of natural resources and conservation, especially among food insecure populations living in or near biodiverse ecosystems;

“(21) be periodically updated in a manner that reflects learning and best practices; and”.

(b) PERIODIC UPDATES.—Section 5 of the Global Food Security Act of 2016 (22 U.S.C. 9304), as amended by subsection (a), is further amended by adding at the end the following:

“(d) PERIODIC UPDATES.—Not less frequently than quinquennially through fiscal year 2030, the President, in consultation with the head of each relevant Federal department and agency, shall submit to the appropriate congressional committees updates to the Global Food Security Strategy required under subsection (a) and the agency-specific plans described in subsection (c)(2).”.

SEC. 6. ASSISTANCE TO IMPLEMENT THE GLOBAL FOOD SECURITY STRATEGY; AUTHORIZATION OF APPROPRIATIONS.

Section 6(b) of the Global Food Security Act of 2016 (22 U.S.C. 9305(b)) is amended—

(1) by striking “\$1,000,600,000” and inserting “\$1,200,000,000”;

(2) by striking “fiscal years 2017 through 2023” and inserting “fiscal years 2024 through 2028”; and

(3) by adding at the end the following: “Amounts authorized to be appropriated by this subsection should be prioritized to carry out programs and activities in target countries.”.

SEC. 7. EMERGENCY FOOD SECURITY PROGRAM.

(a) IN GENERAL.—Section 7 of the Global Food Security Act of 2016 (22 U.S.C. 9306) is amended—

(1) by striking “(a) Sense of Congress” and all that follows through “It shall be” and inserting the following:

“(a) STATEMENT OF POLICY.—It shall be”; and

(2) by redesignating subsection (c) as subsection (b).

(b) AUTHORIZATION OF APPROPRIATIONS.—Section 492(a) of the Foreign Assistance Act of 1961 (22 U.S.C. 2292a(a)) is amended by striking “\$2,794,184,000 for each of fiscal years 2017 through 2023, of which up to \$1,257,382,000” and inserting “\$3,905,460,000 for each of the fiscal years 2024 through 2028, of which up to \$1,757,457,000”.

SEC. 8. REPORTS.

Section 8 of the Global Food Security Act of 2016 (22 U.S.C. 9307) is amended—

(1) in subsection (a), in the matter preceding paragraph (1)—

(A) by striking “During each of the first 7 years after the date of the submission of the strategy required under section 5(c)” and inserting “For each of fiscal years 2024 through 2028”; and

(B) by striking “reports that describe” and inserting “a report that describes”; and

(C) by striking “at the end of the reporting period” and inserting “during the preceding year”;

(2) in paragraph (2), by inserting “, including any changes to the target countries selected pursuant to the selection criteria described in section 5(a)(2) and justifications for any such changes” before the semicolon at the end;

(3) in paragraph (3), by inserting “identify and” before “describe”; and

(4) in paragraph (5), by striking “agriculture” and inserting “food”;

(5) in paragraph (6)—

(A) by inserting “quantitative and qualitative” after “how”; and

(B) by inserting “at the initiative, country, and zone of influence levels, including longitudinal data and key uncertainties” before the semicolon at the end;

(6) in paragraph (7), by inserting “within target countries, amounts and justification for any spending outside of target countries” after “amounts spent”; and

(7) in paragraph (11), by striking “and the impact of private sector investment” and inserting “and efforts to encourage financial donor burden sharing and the impact of such investment and efforts”; and

(8) in paragraph (13), by striking “and” at the end;

(9) in paragraph (14)—

(A) by inserting “, including key challenges or missteps,” after “lessons learned”; and

(B) by striking the period at the end and inserting “; and”;

(10) by redesignating paragraphs (12) through (14), as amended, as paragraphs (15) through (17), respectively;

(11) by redesignating paragraphs (5) through (11), as amended, as paragraphs (7) through (13), respectively;

(12) by striking paragraph (4) and inserting the following:

“(4) identify and describe the priority quantitative metrics used to establish baselines and performance targets at the initiative, country, and zone of influence levels;

“(5) identify such established baselines and performance targets at the country, and zone of influence levels;

“(6) identify the output and outcome benchmarks and indicators used to measure results annually, and report the annual measurement of results for each of the priority metrics identified pursuant to paragraph (4), disaggregated by age, gender, and disability, to the extent practicable and appropriate, in an open and transparent man-

ner that is accessible to the American people;”;

(13) by inserting after paragraph (13), as redesignated, the following:

“(14) describe how agriculture research is prioritized within the Global Food Security Strategy to support agriculture-led growth and eventual self-sufficiency and assess efforts to coordinate research programs within the Global Food Security Strategy with key stakeholders;” and

(14) by adding at the end the following:

“(18) during the final year of each strategy required under section 5, complete country graduation reports to determine whether a country should remain a target country based on quantitative and qualitative analysis.”.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Texas (Mr. CASTRO) and the gentlewoman from California (Mrs. KIM) each will control 20 minutes.

The Chair recognizes the gentleman from Texas.

GENERAL LEAVE

Mr. CASTRO of Texas. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on H.R. 8446, as amended.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. CASTRO of Texas. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I rise today in strong support of this bill that reauthorizes the Global Food Security Act. I thank my colleagues, Ms. MCCOLLUM, Mr. SMITH, Chairman MEEKS, and Ranking Member MCCAUL, for leading this bill.

Today, as the world grapples with a rapidly changing climate, the ongoing impacts of the COVID-19 pandemic, and the global consequences of Russia's war of choice in Ukraine, the U.S. must step up to support the hundreds of millions of hungry and food insecure people in all corners of the world. More importantly, perhaps, we need to give these communities the tools they need to feed themselves.

The Global Food Security Act was passed with strong bipartisan support in 2016 and reauthorized in 2018. It is critical that Congress once again acts to reauthorize this important piece of legislation.

Not only does this reauthorization increase annual funding for the Feed the Future initiative; it also requires an additional focus on building resilience, strengthening food systems, and forming more local partnerships to advance agriculture-led economic growth. This will play a critical role in delivering food to those in need today while creating more durable and sustainable food systems for tomorrow.

Food insecurity is a key driver of instability and violent extremism throughout the world. Investing in combating global hunger not only reflects U.S. values; it is also in our national security interest.

By passing this legislation, along with President Biden's announcement last week that the United States will provide over \$2.9 billion in new assistance to address food insecurity, we will make important strides toward achieving our goal of creating lasting food security.

This important bipartisan legislation will continue support for the Feed the Future initiative that has already lifted millions out of poverty.

Madam Speaker, I am proud to support this bipartisan legislation, and I urge my colleagues to do the same. I reserve the balance of my time.

Mrs. KIM of California. Madam Speaker, I yield myself such time as I may consume, and I rise in support of this bill.

Madam Speaker, today, 50 million people in 45 countries are living on the brink of famine, and more than 350 million people around the world are facing emergency food insecurity. This is a staggering increase from record-breaking levels of hunger last year.

Russia's unprovoked and full-scale invasion of Ukraine, previously known as the breadbasket of Europe, has worsened an already overwhelming global food crisis and is destabilizing fragile states.

Global food prices are expected to increase by 20 percent and could be even higher in developing countries that are highly dependent on imported commodities from Ukraine and Russia.

These shocks are creating shortages and instability that affect the entire world, including our constituents.

First enacted in 2016, and amended in 2018, the Global Food Security Act provides critical authorities to respond to immediate global food needs and to advance longer term agricultural-led economic growth.

I am a cosponsor of today's bipartisan legislation to refine and extend those authorities for another 5 years, through 2028. Madam Speaker, I thank my colleagues, Congresswoman MCCOLLUM, Congressman CHRIS SMITH, Chairman MEEKS, and Ranking Member MCCAUL, for their leadership in this effort.

In order to prevent the next food crisis, we must increase the resiliency of communities around the world to shocks like natural disasters, supply chain disruptions, and fertilizer shortages. This is why the U.S. is working with partner countries to advance targeted efforts to increase agricultural productivity, invest in food systems and market-based approaches to agricultural-led economic growth, and, ultimately, support communities' abilities to provide for themselves.

These strategic agricultural development activities are a critical investment in preventing future humanitarian emergencies and dependency on foreign aid.

Madam Speaker, I urge my colleagues to support this bill, and I reserve the balance of my time.

Mr. CASTRO of Texas. Madam Speaker, I yield 3 minutes to the gen-

tlewoman from Minnesota (Ms. MCCOLLUM).

Ms. MCCOLLUM. Madam Speaker, today, I rise in support of my bill, the Global Food Security Reauthorization Act of 2022, a bipartisan bill, which I worked on with Mr. SMITH to reaffirm the United States' commitment to fighting hunger and poverty worldwide. It truly has been a bipartisan effort.

This bill builds upon the landmark Global Food Security Act of 2016. It reauthorizes the incredibly successful Feed the Future initiative, which has carried out lifesaving programs and helped millions of people break the cycle of poverty and hunger.

This legislation reauthorizes GFSA to 2028 and makes commonsense updates to reflect the changing landscape of global hunger. Specifically, this bill emphasizes agriculture-led economic growth and strengthening resilience against climate change and the global COVID-19 pandemic. This will help reduce malnutrition in women and children.

By supporting small farmers and women farmers, in particular, we can increase food production and incomes so that families and communities around the world may improve their way of life.

This legislation will also help to create a more stable world, as has been mentioned, by helping millions of people in the world's poorest countries become self-sufficient in feeding themselves.

As chair of the Appropriations Subcommittee on Defense, I know all too well the human, economic, and national security costs of global food insecurity, and it is just too high for Congress to ignore. The passage and enactment of this bill today truly cannot come soon enough for our national security.

I am proud to have worked on this legislation. I have worked on this legislation for over 14 years, starting with Senator Lugar, after being in Africa and watching how lack of food and clean water affected our ability to really make the HIV/AIDS program move forward. From that, the more I learned about malnutrition, the more passionate I became.

I am proud to have worked on this with experts in the field of global food and nutrition security, such as InterAction, Bread for the World, 1,000 Days, CARE, Save the Children, The Alliance to End Hunger, and so many more. Madam Speaker, I thank them for their expertise, for helping to lift up this legislation.

Madam Speaker, I also thank our co-leads, Chair MEEKS and Ranking Member MCCAUL, and a special thank-you to Representative SMITH, for their work on this legislation. Their enduring commitment to end global hunger is important work that we do together.

Madam Speaker, I urge the passage of this bill.

□ 2130

Mrs. KIM of California. Madam Speaker, I yield such time as he may

consume to the gentleman from New Jersey (Mr. SMITH).

Mr. SMITH of New Jersey. Madam Speaker, I rise in strong support of the bicameral, bipartisan Global Food Security Reauthorization Act of 2022. I especially want to thank my good friend and colleague, BETTY MCCOLLUM, for her authorship of this important legislation that will help so many.

Today's vote on global food security will show that we can come together to advance the good. For the Global Food Security Act is a model of cooperation, from the collaboration between Congresswoman MCCOLLUM and I on previous iterations, which began back in 2014 when I first introduced it, and the House passed the legislation.

Madam Speaker, like PEPFAR, the President's Emergency Plan for AIDS Relief, our food security policy is a remarkably effective, relatively low-cost lifesaving, life-enhancing initiative, championed by both Republican and Democrat administrations.

Indeed, we are fortunate that President Bush, beginning in 2002, had the initial foresight to elevate the important role of food security in U.S. foreign policy, especially in Africa, via the Initiative to End Hunger in Africa, or the IEHA, which was funded through development assistance and implemented through USAID. The objective was to help meet the nutritional needs of millions and to elevate self-sufficiency over dependency.

At the same time, the Millennium Challenge Corporation began making substantial investments in ag-led economic growth programs, particularly in Africa. The food price crisis of 2007-2008 accelerated and underscored the need for robust food security policy.

President Obama, in 2009, announced further enhancements to our food security strategy at the G8 summit in Italy, and this became known as the Feed the Future initiative.

Our emphasis on ag-led economic development and food security self-sufficiency continued through the Trump administration and now into the Biden administration.

Madam Speaker, last week a World Food Programme and Food and Agriculture Organization, WFP and FAO, report said the world faces its "largest food crisis in modern history."

The report sounds the alarm: 2022, as they put it, is a "year of unprecedented hunger."

"As many as 828 million people go to bed hungry every night, the number of those facing acute food insecurity has soared from 135 million to 345 million since 2019. A total of 50 million people in 45 countries are teetering on the edge of famine."

"Conflict," they point out, "is still the biggest driver of hunger, with 60 percent of the world's hungry living in areas afflicted by war and violence. Events unfolding in Ukraine are further proof of how conflict feeds hunger, forcing people out of their homes, and wiping out their sources of income."

As we all know, the weakest and most vulnerable are dying, and many, many more are at risk of death while millions more are made susceptible to opportunistic diseases while many children continue to suffer from stunting. Many, however, are rallying to mitigate this suffering.

As my good friend and colleague from Minnesota pointed out, many of the organizations that have done so much for so long are doing even more now to make sure that we get to the point where people are food secure. And, of course, that includes the secular groups and the faith-based groups all working in tandem for this noble goal.

One of the objectives of the Global Food Security Act was to take a whole-of-government approach, led by USAID, in promoting food security. In conducting oversight hearings with regard to its implementation, however, we found that there were several places where a whole-of-agency approach, let alone a whole-of-government approach was lacking.

One area that needed attention was to make sure that our nutrition efforts were firing on all cylinders. While the original bill, law, and subsequent reauthorization placed great emphasis on reducing stunting—and I have seen it all over Africa, as have Betty and many others. You go to Nigeria, and stunting is endemic to this moment. That can all be alleviated through the right kind of nutritional interventions, including the first 1,000 days of life, from conception to the second birthday, with nutrition that helps both mother and baby.

We have seen pictures of children with distended bellies caused by worms that rob them of needed nutrients. I chaired several hearings on worms, horrible things to see, growing in little kids, causing them to die, but certainly to be very sick in most cases.

USAID, when it came to deworming, often had a more stovepiped approach to it, while this legislation integrates the whole idea of deworming with the food security so that we don't feed the worms, we feed the future, and we feed these wonderful children and all those who are at risk.

We also have put in and continue the integration of water, sanitation, and hygiene, or WASH programming, which is also extraordinarily effective.

This is a great bill. I hope it gets total support of this body. Again, I thank Betty. I look forward to this vote and enactment into law.

Mr. CASTRO of Texas. Madam Speaker, I yield 1 minute to the gentlewoman from Texas (Ms. JACKSON LEE.)

Ms. JACKSON LEE. Madam Speaker, I thank the gentleman from Texas for participating in the Congressional Children's Caucus hearing this past Monday on the Uvalde murder of children.

I rise to join my colleagues in supporting the Global Food Security Reauthorization Act of 2022 and compliment Representative MCCOLLUM and

others who have strongly supported this legislation over the years.

It is particularly timely because I have just finished meeting with the Foreign Minister of Pakistan and was able to visit in Pakistan in early September after the catastrophic and momentous floods of biblical proportion that went on.

What we saw was the potential of extreme starvation of families and children. Thirty-three million people were displaced. The families in the region had lost their wheat, their cotton, and their livestock.

The SPEAKER pro tempore. The time of the gentlewoman has expired.

Mr. CASTRO of Texas. Madam Speaker, I yield an additional 1 minute to the gentlewoman.

Ms. JACKSON LEE. Madam Speaker, the idea of the emphasis on the issue of food security is so crucial, both in terms of the climate change such that is impacted in Eritrea and Ethiopia, and the issues of catastrophic flood conditions, so I rise to support this with the idea that we have right in our midst conditions that would suggest food insecurity.

This legislation that focuses on ensuring that people of the world can eat, and the children of the world will not starve is a crucial and needed legislation, which I support, and which emphasizes, again, the important element in foreign affairs of food. Food helps save the world.

I support this legislation, and I commend my colleagues to continue to work, with devastating conditions around the world, to ensure the safety and security of children and particularly food security.

Mrs. KIM of California. Madam Speaker, I yield myself the balance of my time to close.

Madam Speaker, I am proud to support this bipartisan bill to refine and extend statutory authorities needed to respond to the global food crisis and prevent future aid dependency. It updates the policy, definitions, and the strategy requirements of the current law. It also strengthens oversight and accountability and ensures continued focus on core programs that have strong bipartisan support.

At its core, the bill embodies the saying, "Give a man a fish, and you feed him for a day. Teach him how to fish, and you feed him for a lifetime."

These are effective, strategic investments in agriculture and agricultural development to help ensure that communities and families are able to provide for themselves.

Madam Speaker, I urge support for this bill, and I hope that our Senate colleagues will take it up promptly.

Madam Speaker, I yield back the balance of my time.

□ 2140

Mr. CASTRO of Texas. Madam Speaker, I yield myself such time as I may consume for the purpose of closing.

Madam Speaker, as the world continues to experience climate-related devastation, downstream effects of COVID-19 on global supply chains, and the crippling effects of the Russian invasion of Ukraine on food delivery and production, the United States must continue to support those vulnerable to food insecurity.

Now is not the time to continue business as usual. The United States must step up to meet the moment and adapt our policy tools and foreign assistance to do the same. H.R. 8446 ensures that the United States maintains global leadership in combating the global hunger crisis by sowing the seeds of food security for the future.

Madam Speaker, I hope my colleagues will join me in supporting this important piece of legislation, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. CASTRO) that the House suspend the rules and pass the bill, H.R. 8446, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. CLYDE. Madam Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this question will be postponed.

MILLENNIUM CHALLENGE CORPORATION ELIGIBILITY EXPANSION ACT

Mr. CASTRO of Texas. Madam Speaker, I move to suspend the rules and pass the bill (H.R. 8463) to modify the requirements under the Millennium Challenge Act of 2003 for candidate countries, and for other purposes.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 8463

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Millennium Challenge Corporation Eligibility Expansion Act".

SEC. 2. MODIFICATIONS OF REQUIREMENTS TO BECOME A CANDIDATE COUNTRY.

Section 606 of the Millennium Challenge Act of 2003 (22 U.S.C. 7705) is amended to read as follows:

"SEC. 606. CANDIDATE COUNTRIES.

"(a) IN GENERAL.—A country shall be a candidate country for purposes of eligibility for receiving assistance under section 605 if—

"(1) the per capita income of the country is equal to or less than the gross national income per capita of the 125th poorest country as identified by the World Bank for the fiscal year; and

"(2) subject to subsection (b), the country is not ineligible to receive United States economic assistance under part I of the Foreign Assistance Act of 1961 by reason of the application of any provision of the Foreign Assistance Act of 1961 or any other provision of law.

“(b) RULE OF CONSTRUCTION.—For the purposes of determining whether a country is eligible for receiving assistance under section 605 pursuant to subsection (a)(2), the exercise by the President, the Secretary of State, or any other officer or employee of the United States of any waiver or suspension of any provision of law referred to in such paragraph, and notification to the appropriate congressional committees in accordance with such provision of law, shall be construed as satisfying the requirements of such subsection.

“(c) IDENTIFICATION BY THE BOARD.—The Board shall identify whether a country is a candidate country for purposes of this section.”.

SEC. 3. CONFORMING AMENDMENTS.

(a) AMENDMENT TO MILLENNIUM CHALLENGE COMPACT AUTHORITY.—Section 609(b)(2) of the Millennium Challenge Act of 2003 (22 U.S.C. 7708(b)(2)) is amended—

(1) by striking the heading and inserting “COUNTRY CONTRIBUTIONS”; and

(2) by striking “with respect to a lower middle income country described in section 606(b),”.

(b) AMENDMENT TO REPORT IDENTIFYING CANDIDATE COUNTRIES.—Section 608(a)(1) of the Millennium Challenge Act of 2003 (22 U.S.C. 7707(a)(1)) is amended by striking “section 606(a)(1)(B)” and inserting “section 606(a)(2)”.

(c) AMENDMENT TO AUTHORIZATION TO PROVIDE ASSISTANCE FOR CANDIDATE COUNTRIES.—Section 616(b)(1) of the Millennium Challenge Act of 2003 (22 U.S.C. 7715(b)(1)) is amended by striking “subsection (a) or (b) of section 606” and inserting “section 606(a)”.

SEC. 4. MODIFICATION TO FACTORS IN DETERMINING ELIGIBILITY.

Section 607(c)(2) of the Millennium Challenge Act of 2003 (22 U.S.C. 7706(c)(2)) is amended in the matter preceding subparagraph (A) by striking “consider” and inserting “prioritize need and impact by considering”.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Texas (Mr. CASTRO) and the gentlewoman from California (Mrs. KIM) each will control 20 minutes.

The Chair recognizes the gentleman from Texas.

GENERAL LEAVE

Mr. CASTRO of Texas. Madam Speaker, I ask unanimous consent that all Members have 5 legislative days within which to revise and extend their remarks and include extraneous material on H.R. 8463.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. CASTRO of Texas. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I am glad to bring this bipartisan legislation, which I authored together with my colleague, Representative YOUNG KIM of California to the House floor.

It will allow the Millennium Challenge Corporation, or MCC, to continue to work where it can do the most to foster development and reduce poverty.

When Congress established the MCC almost 20 years ago, it was envisioned as a selective agency that would work collaboratively with the best-governed developing countries.

Perhaps the most visible part of MCC's rigorous selection process is its scorecard, which evaluates more than 20 different policy indicators of good governance. But Congress also set an income-based threshold for nations where MCC could work. It was intended to make sure MCC focused on developing countries and on helping the people who need it most. I strongly support that focus and nothing in this bill is intended to alter that core part of MCC's mission and mandate.

But the way we define that threshold, based on who falls within two categories in the World Bank's estimates of per capita gross national income, has led to several issues this legislation seeks to address.

In the decades since the original standard was defined, the number of potential countries eligible for MCC's compacts has shrunk by almost a third. These compacts, which need to be ratified by both the United States and the partner country, can take years to negotiate, ratify, and implement.

Under the income threshold's current structure, countries can suddenly become ineligible for assistance in the middle of a multi-year negotiation. Global disruptions like a pandemic or major conflict can also lead to changes in a country's eligibility.

Under my legislation, the MCC would continue to use World Bank measures of GNI per capita as the basis to calculate eligibility, while expanding consideration for potential compacts to the world's 125 poorest countries. This change will ensure that MCC has a stable number of potential candidates, even as we continue to make progress in the fight against global poverty.

The new pool of potentially eligible countries would cover 98 percent of the world's poor and 90 percent of the countries MCC has identified as facing substantial vulnerability, including to pandemics, natural disasters, migration, and food insecurity.

It is important to note that this is potential eligibility.

This bill does not change any of MCC's scorecard criteria. To qualify for a potential compact, countries must also be generally eligible to receive American foreign assistance under the Foreign Assistance Act and other provisions of United States law.

The MCC Eligibility Expansion Act also includes protections to ensure that newly eligible countries do not crowd out support for low and lower-middle-income countries that qualify under the existing income threshold.

For example, it includes language that would strengthen statutory direction to the MCC's board to prioritize development need and impact. The legislation would also require all potential candidate countries to identify appropriate national contributions during compact negotiations, meaning wealthier countries would pitch in more.

In implementing this legislation, I also expect the MCC to compare this

small pool of newly eligible upper-middle-income countries against their peers in determining eligibility through the scorecard.

This bill would provide the MCC with more certainty and stability when it chooses to pursue a compact.

Madam Speaker, with the support of my colleagues today, we can ensure that the MCC will continue its important work and maximize its impact fighting poverty and promoting development.

Madam Speaker, I reserve the balance of my time.

Mrs. KIM of California. Madam Speaker, I rise in support of this bill, and I yield myself such time as I may consume.

Madam Speaker, I was proud to introduce the Millennium Challenge Corporation Eligibility Expansion Act along with my Democratic colleague from Texas, Mr. CASTRO.

In the nearly 20 years since its founding under President Bush, the Millennium Challenge Corporation has demonstrated a strong track record of success in its mission of combating poverty through economic growth.

The agency has enjoyed broad bipartisan support, earned through strict project selection criteria and the ability to hold partner countries to a high standard of accountability. But the agency and its partners are facing new challenges. The Chinese Communist Party is increasing its malign influence in the developing world, often disguised as development assistance. The world is facing a food security crisis and other effects of Russia's unprovoked war in Ukraine.

Many countries risk losing progress on development and poverty reduction made over previous decades. This bill will ensure that the world's 125 poorest countries are eligible for potential consideration as candidate countries in the MCC's rigorous selection process. It adds stability to MCC's partnerships, and it ensures its ability to focus on the world's poorest populations, who are often the most vulnerable to debt traps and other forms of outside manipulation.

This bill is an important step towards equipping MCC to operate in today's environment so, that it can continue to use its proven, evidence-based model to build sustainable economic growth, transparency, and stability in partner countries around the world.

Madam Speaker, I reserve the balance of my time.

Mr. CASTRO of Texas. Madam Speaker, I am prepared to close, and I reserve the balance of my time.

Mrs. KIM of California. Madam Speaker, the Millennium Challenge Corporation has done important work on behalf of the American people to promote economic growth and transparency around the world. But we must make sure that the agency is equipped to address the challenges and threats of today, including those posed by our strategic rivals who are attempting to increase their global influence.

Madam Speaker, I, again, thank the gentleman from Texas (Mr. CASTRO), my colleague, our bipartisan cosponsors, and Chairman MEKES and Ranking Member MCCAUL of the Committee on Foreign Affairs for moving this bill forward.

Madam Speaker, I urge support for the bill, and I yield back the balance of my time.

□ 2150

Mr. CASTRO of Texas. Madam Speaker, I yield myself such time as I may consume for the purpose of closing.

Madam Speaker, the Millennium Challenge Corporation Eligibility Expansion Act will improve the MCC's ability to form stable, long-term compacts in the well-governed countries that will benefit most from United States' development assistance.

I thank my colleagues, particularly my co-lead on this bill, Representative YOUNG KIM, for the bipartisan work that has brought this legislation forward today.

Madam Speaker, I urge the House to pass this legislation. I hope the Senate will take it up swiftly so that it can become law this year, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. CASTRO) that the House suspend the rules and pass the bill, H.R. 8463.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. CLYDE. Madam Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this motion will be postponed.

COMBATING THE PERSECUTION OF RELIGIOUS GROUPS IN CHINA ACT

Mr. CASTRO of Texas. Madam Speaker, I move to suspend the rules and pass the bill (H.R. 4821) to hold accountable senior officials of the Government of the People's Republic of China who are responsible for, complicit in, or have directly persecuted Christians in China, and for other purposes, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 4821

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Combating the Persecution of Religious Groups in China Act".

SEC. 2. FINDINGS.

Congress makes the following findings:

(1) According to the Department of State's International Religious Freedom (IRF) report estimates, Buddhists comprise 18.2 percent of the country's total population, Christians, 5.1 percent, Muslims, 1.8 percent, fol-

lowers of folk religions, 21.9 percent, and atheists or unaffiliated persons, 52.2 percent, with Hindus, Jews, and Taoists comprising less than one percent.

(2) The Government of the People's Republic of China (PRC) recognizes five official religions, Buddhism, Taoism, Islam, Protestantism, and Catholicism (according to the State Department's IRF report) and only religious groups belonging to one of the five sanctioned "patriotic religious associations" representing these religions are permitted to register with the government and hold worship service, excluding all other faiths and denying the ability to worship without being registered with the government.

(3) The activities of state-sanctioned religious organizations are regulated by the Chinese Communist Party, which manages all aspects of religious life.

(4) The Chinese Communist Party is actively seeking to control, govern, and manipulate all aspects of faith through the "Sinicization of Religion", a process intended to shape religious traditions and doctrines so they conform with the objectives of the Chinese Communist Party.

(5) On February 1, 2018, the PRC Government implemented new religious regulations that imposed restrictions on Chinese contacts with overseas religious organizations, required government approval for religious schools, websites, and any online religious service, and effectively banned unauthorized religious gatherings and teachings.

(6) There are numerous reports that authorities forced closures of Buddhist, Christian, Islamic, and Taoist houses of worship and destroyed public displays of religious symbols throughout the country.

(7) Authorities arrested and detained religious leaders trying to hold services online.

(8) There are credible reports of Chinese authorities raiding house churches and other places of religious worship, removing and confiscating religious paraphernalia, installing surveillance cameras on religious property, pressuring congregations to sing songs of the Chinese Communist Party and display the national flag during worship, forcing churches to replace images of Jesus Christ or the Virgin Mary with pictures of General Secretary Xi Jinping, and banning children and students from attending religious services.

(9) It has been reported that the PRC is rewriting and will issue a version of the Bible with the "correct understanding" of the text according to the Chinese Communist Party. Authorities continued to restrict the printing and distribution of the Bible, Quran, and other religious literature, and penalized publishing and copying businesses that handled religious materials.

(10) According to the Department of State's IRF reports, the PRC Government has imprisoned thousands of individuals of all faiths for practicing their religious beliefs and often labels them as "cults".

(11) The Political Prisoner Database maintained by the human rights NGO Dui Hua Foundation counted 3,492 individuals imprisoned for "organizing or using a 'cult' to undermine implementation of the law." Prisoners include—

(A) the 11th Panchen Lama, Gedun Choekyi Nyima, who has been held captive along with his parents since May 17, 1995;

(B) Pastor Zhang Shaojie, a Three-Self church pastor from Nanle County in central Henan was sentenced in July 2014 to 12 years in prison for "gathering a crowd to disrupt the public order";

(C) Pastor John Cao, a United States permanent resident from Greensboro, North Carolina, who was sentenced for 7 years in prison in March 2018 under contrived charges of organizing illegal border crossings; and

(D) Pastor Wang Yi of the Early Rain Covenant Church who was arrested and sentenced to 9 years in prison for "inciting to subvert state power" and "illegal business operations".

(12) Authorities continue to detain Falun Gong practitioners and subject them to harsh and inhumane treatment.

(13) Since 1999, the Department of State has designated the PRC as a country of particular concern under the International Religious Freedom Act of 1998.

(14) The National Security Strategy of the United States, issued in 2017, 2015, 2006, 2002, 1999, 1998, and 1997, committed the United States to promoting international religious freedom to advance the security, economic, and other national interests of the United States.

SEC. 3. STATEMENT OF POLICY.

(a) HOLDING PRC OFFICIALS RESPONSIBLE FOR RELIGIOUS FREEDOM ABUSES TARGETING CHINESE CHRISTIANS OR OTHER RELIGIOUS MINORITIES.—It is the policy of the United States to consider senior officials of the Government of the People's Republic of China (PRC) who are responsible for or have directly carried out, at any time, persecution of Christians or other religious minorities in the PRC to have committed—

(1) a gross violation of internationally recognized human rights for purposes of imposing sanctions with respect to such officials under the Global Magnitsky Human Rights Accountability Act (22 U.S.C. 2656 note); and

(2) a particularly severe violation of religious freedom for purposes of applying section 212(a)(2)(G) of the Immigration and Nationality Act (8 U.S.C. 1182(a)(2)(G)) with respect to such officials.

(b) DEPARTMENT OF STATE PROGRAMMING TO PROMOTE RELIGIOUS FREEDOM IN THE PEOPLE'S REPUBLIC OF CHINA.—The Ambassador-at-Large for International Religious Freedom should support efforts to protect and promote international religious freedom in the PRC and for programs to protect Christians and other religious minorities in the PRC.

(c) DESIGNATION OF THE PEOPLE'S REPUBLIC OF CHINA AS A COUNTRY OF PARTICULAR CONCERN.—It is the policy of the United States to continue to designate the PRC as a "country of particular concern", as long as the PRC continues to engage in systematic and egregious religious freedom violations, as defined by the International Religious Freedom Act of 1998 (Public Law 105-292).

SEC. 4. SENSE OF CONGRESS.

It is the sense of Congress that the United States should promote religious freedom in the PRC by—

(1) strengthening religious freedom diplomacy on behalf of Christians and other religious minorities facing restrictions in the PRC;

(2) raising cases relating to religious or political prisoners at the highest levels with PRC officials because experience demonstrates that consistently raising prisoner cases can result in improved treatment, reduced sentences, or in some cases, release from custody, detention, or imprisonment;

(3) encouraging Members of Congress to "adopt" a prisoner of conscience in the PRC through the Tom Lantos Human Rights Commission's "Defending Freedom Project", raise the case with PRC officials, and work publicly for their release;

(4) calling on the PRC Government to unconditionally release religious and political prisoners or, at the very least, ensure that detainees are treated humanely with access to family, the lawyer of their choice, independent medical care, and the ability to practice their faith while in detention;

(5) encouraging the global faith community to speak in solidarity with the persecuted religious groups in the PRC; and

(6) hosting, once every two years, the Ministerial to Advance Religious Freedom organized by the Department of State in order to bring together leaders from around the world to discuss the challenges facing religious freedom, identify means to address religious persecution and discrimination worldwide, and promote great respect for and preservation of religious liberty.

SEC. 5. SENSE OF CONGRESS REGARDING ACTIONS AT UNITED NATIONS.

It is the sense of Congress that the United Nations Human Rights Council should issue a formal condemnation of the People's Republic of China for the ongoing genocide against Uyghurs and other religious and ethnic minority groups, as well as for its persecution of Christians, Falun Gong, and other religious groups.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Texas (Mr. CASTRO) and the gentlewoman from California (Mrs. KIM) each will control 20 minutes.

The Chair recognizes the gentleman from Texas.

GENERAL LEAVE.

Mr. CASTRO of Texas. Madam Speaker, I ask unanimous consent that all Members have 5 legislative days in which to revise and extend their remarks and include extraneous material on H.R. 4821, as amended.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. CASTRO of Texas. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I rise today in support of H.R. 4821, the Combating the Persecution of Religious Groups in China Act, introduced by my colleague, Representative VICKY HARTZLER.

The state of religious freedom in China has been alarming for several years now. Despite religious freedom being guaranteed in its constitution, the PRC actively suppresses this fundamental right.

While this government's systemic orchestration of genocide and crimes against humanity against the Uyghur people and other ethnic and religious minorities in the Uyghur region has been widely broadcasted across international media, followers of a variety of religious faiths and traditions have long experienced religious persecution in China.

The ability to freely practice one's religion or engage in worship has continued to deteriorate. Those who bravely speak out against the infringement of religious freedom or refuse to join state-sanctioned religious organizations face the PRC Government's inhumane repression and human rights abuses.

Thousands of religious leaders and worshippers have been harassed, detained, disappeared, tortured, physically abused, sentenced to prison, or subjected to forced labor and indoctrination due to their religious affiliation or the practice of their religious

beliefs. Some have even been pressured to renounce their religious beliefs.

In addition to these atrocities, the People's Republic of China officials have removed or replaced religious images, iconography, and symbols; have desecrated or demolished places of worship; and have rewritten religious text in an effort to align with Communist Party ideology.

This is unacceptable, but infringement on personal rights has become business as usual in China. Nobody should be forced to endure discrimination because of their religion anywhere in the world.

Congress must act now to support efforts to protect and promote religious freedom in China and to protect adherents of all religious faiths in China. We must continue to call out the PRC Government for these atrocities and take actions to prevent the stifling of religious freedom in China.

By passing this important, bipartisan legislation, this body sends a clear message to the PRC Government that it will be held accountable for its pattern of gross human rights abuses and severe violations of religious freedoms.

Madam Speaker, I thank Representative HARTZLER for authoring this important, bipartisan legislation which I was proud to move through the Foreign Affairs Committee, I urge my colleagues to join me in supporting it, and I reserve the balance of my time.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON THE JUDICIARY,
Washington, DC, September 23, 2022.

Hon. GREGORY MEEKS,
Chairman, Committee on Foreign Affairs, House of Representatives, Washington, DC.

DEAR CHAIRMAN MEEKS: This letter is to advise you that the Committee on the Judiciary has now had an opportunity to review the provisions in H.R. 4821, the "Combating the Persecution of Christians in China Act," that fall within our Rule X jurisdiction. I appreciate your consulting with us on those provisions. The Judiciary Committee has no objection to your including them in the bill for consideration on the House floor, and to expedite that consideration is willing to forgo action on H.R. 4821, with the understanding that we do not thereby waive any future jurisdictional claim over those provisions or their subject matters.

In the event a House-Senate conference on this or similar legislation is convened, the Judiciary Committee reserves the right to request an appropriate number of conferees to address any concerns with these or similar provisions that may arise in conference.

Please place this letter into the Congressional Record during consideration of the measure on the House floor. Thank you for the cooperative spirit in which you have worked regarding this matter and others between our committees.

Sincerely,

JERROLD NADLER,
Chairman.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON FOREIGN AFFAIRS,
Washington, DC, September 26, 2022.

Hon. JERROLD NADLER,
Chairman, Committee on the Judiciary, House of Representatives, Washington, DC.

DEAR CHAIRMAN NADLER: I am writing to you concerning H.R. 4821, the "Combating the Persecution of Religious Groups in China

Act." I appreciate your willingness to work cooperatively on this legislation.

I acknowledge that provisions of the bill fall within the jurisdiction of the Committee on the Judiciary under House Rule X, and that your Committee will forgo action on H.R. 4821 to expedite floor consideration. I further acknowledge that the inaction of your Committee with respect to the bill does not waive any future jurisdictional claim over the matters contained in the bill that fall within your jurisdiction.

I also acknowledge that your Committee will be appropriately consulted and involved as this, or similar legislation moves forward and will support the appointment of Committee on the Judiciary conferees during any House-Senate conference convened on this legislation.

Lastly, I will ensure that our exchange of letters is included in the Congressional Record during floor consideration of the bill. Thank you again for your cooperation regarding the legislation. I look forward to continuing to work with you as the measure moves through the legislative process.

Sincerely,

GREGORY W. MEEKS,
Chairman.

Mrs. KIM of California. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I rise in support of this bill. The Chinese Communist Party is at war with religious freedom. The CCP treats as threats those organizations and allegiances that it does not control. Members of the CCP and the PLA are required to be atheists and are prohibited from practicing a religion. National law effectively prohibits young people in China from receiving any religious education.

Xi Jinping is ramping up his so-called Sinicization of religion and is expressly demanding that religious groups support the control and ideology of the Chinese Communist Party. The consequences for those who refuse to submit are brutal.

House-church Protestant Christians, underground Catholics, Tibetan Buddhists, Uyghur Muslims, Falun Gong practitioners, and other people who seek to worship freely are repressed.

The State Department's annual religious freedom reports note deaths in police custody. They also state that the PRC "tortured, physically abused, arrested, disappeared, detained, sentenced to prison, subjected to forced labor and . . . harassed adherents of both registered and unregistered religious groups for activities related to their religious beliefs and practices."

Both the Trump and Biden administrations have correctly recognized the PRC's brutal crackdown and forced encampment of Uyghur Muslims and other minorities in Xinjiang as a genocide, involving crimes against humanity.

According to credible reports, more than 800,000 Muslim children have been separated from their families.

Just this week, 90-year-old Catholic Cardinal Joseph Zen is on trial in Hong Kong, one of several Catholic bishops imprisoned and actively persecuted by the CCP. Numerous Protestant pastors remain in detention, and the government continues to demolish church buildings and crosses.

Religious believers in China deserve our prayers, our respect, and our support.

This bill before us today will help ensure that CCP officials responsible for this persecution are identified, sanctioned, and denied visas into the United States.

It also states that the People's Republic of China has continued to earn designation as a "country of particular concern" under the International Religious Freedom Act. It calls for efforts by the United States, including diplomacy at the highest levels, to promote the protection of Christians and other religious minorities inside China. It expresses the sense of Congress that the U.N. Human Rights Council should formally condemn the PRC for its ongoing genocide in Xinjiang as well as its persecution of Christians and other religious groups. The inability of that Council to condemn such massive human rights abuses is an indictment of its effectiveness.

Madam Speaker, I thank the gentleman from Missouri (Mrs. HARTZLER) for introducing this important bill of which I am a proud cosponsor. It deserves our unanimous support, and I reserve the balance of my time.

Mr. CASTRO of Texas. Madam Speaker, I reserve the balance of my time.

Mrs. KIM of California. Madam Speaker, I yield 3 minutes to the gentleman from Missouri (Mrs. HARTZLER).

Mrs. HARTZLER. Madam Speaker, I rise today to advocate for the passage of my bill, H.R. 4821, the Combating the Persecution of Religious Groups in China Act. This urgently needed legislation will hold senior officials of the Chinese Communist Party accountable for the human rights violations and persecution of Christians and other religious groups in China.

The Chinese Communist Party believes any religion threatens its control over society. As a result, the CCP is carrying out a systemic crackdown on all religions to control and manipulate every aspect of faith. This includes the closing and destruction of churches, installing surveillance equipment on church property, forcing the modification of religious teachings to conform with the objectives of the government, and the wrongful imprisonment of thousands of individuals.

□ 2200

Through the Defending Freedoms Project, I am a congressional advocate for three of these religious prisoners: Pastor John Cao, Pastor Zhang Shaojie, and Pastor Wang Yi. Each were sentenced to several years in Chinese prisons on illegitimate charges for practicing their faith. This is unacceptable, and it must end.

As a Nation built on the fundamental principle of the freedom of religion, we have a responsibility to shed light on this persecution and speak for those in China who have no voice.

By passing this legislation, the House of Representatives will be sending a clear message to China that we will not stand by as they brutally abuse their own citizens. No one should live in fear for practicing their faith, and China must be held accountable for their criminal human rights violations.

Madam Speaker, I thank the Foreign Affairs Committee members and their staff for their hard work in bringing this important legislation to the floor, and I call on my colleagues to support its passage.

Mr. CASTRO of Texas. Madam Speaker, I reserve the balance of my time.

Mrs. KIM of California. Madam Speaker, I yield 4 minutes to the gentleman from New Jersey (Mr. SMITH).

Mr. SMITH of New Jersey. Madam Speaker, I thank VICKY HARTZLER for authoring this very important and extraordinarily timely resolution.

Under Xi Jinping, the Chinese Communist Party is waging war against all faiths: Christians, Falun Gong, Tibetan Buddhists, Muslims, Uyghurs. He is actually committing genocide against the Uyghurs and has been doing it for some time now.

Thankfully, this Congress has spoken out before, particularly on the Uyghurs, but we need to speak out again on the Christians who are suffering, the most persecuted group in all of China.

Let me say, too, that in calling for sanctions, we have sanctions, Madam Speaker. The Global Magnitsky Act and other sanctions are in place for the violation of the Religious Freedom Act of 1998, and the sanctioning could occur there as a CPC country, a country of particular concern.

I believe we need to do more to hold individuals and, collectively, the Chinese Communist Party to account. That goes for all. That goes for Trump when he was in office. It goes for President Biden now.

We should have done more. We need to do more now because it is all-out war on religion.

I wrote an op-ed in The Washington Post in 1998. I titled it "The world must stand against China's war on religion" and noted that the sinicization, making all faiths comport to Xi Jinping's horrible, nightmarish vision for that country, needs to be incorporated. Whole texts, the Bible texts and sacred scriptures of all faiths, are being rewritten in order to comport, again, with his socialist ideology.

In 1994, after Tiananmen Square, I went to China. I went there many times—barred from going now. I know Bishop Shu of Baoding Province. Here was a man who spent years being tortured, being deprived of food, but especially being tortured because there were terrible usages of cattle prods and all the other terrible things that they do in Chinese prisons, Laogai.

I couldn't believe when he looked me in the eyes and said: I pray for my persecutors.

I mean, we all get a little mad when we get a bad editorial or something politically. Here is a man saying he has endured all this, and he prays for the people of China and for his persecutors.

I held a hearing as co-chairman of the Tom Lantos Human Rights Commission, asking Xi Jinping, just this Congress: Where is Bishop Shu?

He disappeared. He may have passed away due to the mistreatment, but that is what they do, as well. People all of a sudden just disappear. Numbers of Christians and other believers just go off the face of the Earth.

This resolution couldn't be more timely. The Chinese Communist Party is getting worse by the hour. Xi Jinping may get reelected by his peers to a third term as dictator. Our hope is that the Chinese Communist Party will realize they bring gross dishonor to China by their gross misbehavior.

Thankfully, the U.N. High Commissioner, as we all know, just released a report calling out China for its genocide. They called it crimes against humanity. That is good. Hopefully, the U.N. Human Rights Council will take this up, as well.

We need to do sanctioning, and we need to do it now.

Mr. CASTRO of Texas. Madam Speaker, I have no more speakers, and I am ready to close. I reserve the balance of my time.

Mrs. KIM of California. Madam Speaker, I yield myself such time as I may consume for the purpose of closing.

Madam Speaker, the Chinese Communist Party persecutes religious believers who will not submit their religious convictions to CCP control. It reacts with brutality against any attempted religious practice outside of the five religious patriotic associations allowed and controlled by the regime.

This bill tells the truth about the dangers faced by Christians, Uyghur Muslims, Tibetan Buddhists, and other religious minorities in China and takes steps to sanction their CCP persecutors.

I am an enthusiastic cosponsor of this bill by my colleague from Missouri, and I urge its unanimous passage.

Madam Speaker, I yield back the balance of my time.

Mr. CASTRO of Texas. Madam Speaker, I yield myself such time as I may consume for the purpose of closing.

Madam Speaker, H.R. 4821 sends a strong and unequivocal message that the United States stands firmly in support of worshippers of all religious traditions and faiths and their ability to freely practice their religion or engage in worship without fear of discrimination or persecution.

This legislation signals strong bipartisan House support for the administration to hold accountable all those responsible for the severe violations of religious freedom and persecution of religious groups in China.

Madam Speaker, I hope my colleagues will join me in supporting this resolution, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. CASTRO) that the House suspend the rules and pass the bill, H.R. 4821, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the yeas have it.

Mr. CLYDE. Madam Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this motion will be postponed.

PRESS CORPS SHOULD RESEARCH SOUTHERN BORDER CRISIS

(Mr. GROTHMAN asked and was given permission to address the House for 1 minute.)

Mr. GROTHMAN. Madam Speaker, over the last couple of weeks, there have been stories again about our southern border, which I think is the biggest crisis facing America today.

We will refresh the American public and remind them that whereas 2 years ago, 5,000 to 10,000 people were crossing our border and being let in the country, we have now, in an average month, over 150,000 entering the country.

In any event, there are rumors that, right now, Venezuela is—as there were rumors about Cuba about 40 years ago—letting people who are prisoners out of Venezuela to come to the United States.

Given that Venezuela considers the United States an enemy, a country that they are hostile to, why wouldn't they? The question is, where is the press corps? And why isn't the press corps demanding more information about the type of people that are crossing our southern border and particularly about Venezuelans who are coming in the country and whether there are any particular traits that these people have?

I beg the press corps to wake up a little bit and do a little research here.

THANKING STAFF

(Mr. LARSON of Connecticut asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LARSON of Connecticut. Madam Speaker, I rise to compliment Speaker pro tempore BOURDEAUX on her service to this great Nation of ours. I have very much enjoyed the privilege and honor of serving with the gentlewoman.

I also rise to thank and compliment the Clerk's Office for all the work that they do; the long days and hours that they put in, extending well into the evening. Yet, on both sides of the aisle,

the staff work so hard, but day in and day out, it is the Clerk's Office here that carries out the work in governance of this great country of ours. I thank them for their service. God bless them. God bless America.

SENATE ENROLLED BILL SIGNED

The Speaker pro tempore, Mr. RASKIN, on Tuesday, September 27, 2022, announced his signature to an enrolled bill of the Senate of the following title:

S. 2293.—An act to amend the Robert T. Stafford Disaster Relief and Emergency Assistance Act to provide certain employment rights to reservists of the Federal Emergency Management Agency, and for other purposes.

ADJOURNMENT

The SPEAKER pro tempore. Pursuant to section 1 of House Resolution 1230, the House stands adjourned until 10 a.m. tomorrow.

Thereupon (at 10 o'clock and 9 minutes p.m.), under its previous order, the House adjourned until tomorrow, Thursday, September 29, 2022, at 10 a.m.

U.S. CONGRESS, OFFICE OF CONGRESSIONAL WORKPLACE RIGHTS,
Washington, DC., September 28, 2022.

HON. NANCY PELOSI,
Speaker of the House of Representatives,
Washington, DC.

DEAR MADAM SPEAKER: Section 304(b)(3) of the Congressional Accountability Act of 1995 (CAA), 2 U.S.C. 1384(b)(3), requires that, with regard to substantive regulations under the CAA, after the Board of Directors (Board) of the Office of Congressional Workplace Rights (OCWR) has published a general notice of proposed rulemaking as required by subsection (b)(1), and received comments as required by subsection (b)(2), the Board shall adopt regulations and shall transmit notice of such action together with a copy of such regulations to the Speaker of the House of Representatives and the President pro tempore of the Senate for publication in the Congressional Record on the first day on which both Houses are in session following such transmittal."

The OCWR Board has adopted the proposed regulations in the Notice of Adoption of Substantive Regulations and Transmittal for Congressional Approval that accompany this transmittal letter. The Board requests that the accompanying Notice be published in both the House and Senate versions of the Congressional Record on the first day on which both Houses are in session following receipt of this transmittal. The Board also requests that Congress approve the proposed Regulations, as further specified in the accompanying Notice.

Any inquiries regarding the accompanying Notice should be addressed to Teresa James, Acting Executive Director of the Office of Congressional Workplace Rights, 110 Second Street, SE, Room LA-200, Washington, DC 20540-1099; telephone: 202-724-9250; email: OCWRinfo@ocwr.gov.

Sincerely,

BARBARA CHILDS WALLACE,
Chair of the Board of Directors.

Attachment.

FROM THE BOARD OF DIRECTORS OF THE OFFICE OF CONGRESSIONAL WORKPLACE RIGHTS

NOTICE OF ADOPTION OF REGULATIONS AND TRANSMITTAL FOR CONGRESSIONAL APPROVAL

Procedural Summary:

Issuance of the Board's Initial Notice of Proposed Rulemaking.

On or about April 26, 2022, the Board of Directors (Board) of the Office of Congressional Workplace Rights (OCWR) issued a Notice of Proposed Rulemaking in the Congressional Record at 168 Cong. Rec. S2157-S2169 (daily ed.), and at 168 Cong. Rec. H4498-H4508 (daily ed.). The Notice of Proposed Rulemaking was prompted by the promulgation by the Secretary of Labor in 2004, 2016, 2019, and 2020, of amended regulations regarding the overtime pay requirements of the FLSA.

Why did the Board propose these new Regulations?

Section 203(c)(2) of the CAA, 2 U.S.C. 1313(c)(2), requires that the Board of Directors propose substantive regulations implementing the FLSA overtime requirements that are "the same as substantive regulations promulgated by the Secretary of Labor to implement the statutory provisions . . . except insofar as the Board may determine, for good cause shown and stated together with the regulation, that a modification of such regulation would be more effective for the implementation of the rights and protections under this section."

What procedure followed the Board's initial Notice of Proposed Rulemaking?

The April 26, 2022 Notice of Proposed Rulemaking included a thirty day comment period, which began on April 26, 2022. The OCWR received four comments to the proposed substantive regulations from stakeholders. The Board of Directors has reviewed these comments, made a number of changes to the proposed substantive regulations in response to the comments, and has adopted the amended regulations.

What is the effect of the Board's "adoption" of these substantive regulations?

Adoption of these substantive regulations by the Board of Directors does not complete the promulgation process. Pursuant to section 304 of the CAA, 2 U.S.C. 1384, the procedure for promulgating such substantive regulations requires that: (1) the Board of Directors issue proposed substantive regulations and publish a general notice of proposed rulemaking in the Congressional Record (the April 26, 2022 Notice); (2) there be a comment period of at least 30 days after the date of publication of the general notice of proposed rulemaking; and (3) after consideration of comments by the Board of Directors, that the Board adopt regulations and transmit notice of such action together with the regulations and a recommendation regarding the method for Congressional approval of the regulations to the Speaker of the House and President pro tempore of the Senate for publication in the Congressional Record. This Notice of Adoption of Substantive Regulations and Submission for Congressional Approval completes the third step described above.

What are the next steps in the process of promulgation of these regulations?

Pursuant to section 304(b)(4) of the CAA, 2 U.S.C. 1384(b)(4), the Board of Directors is required to "include a recommendation in the general notice of proposed rulemaking and in the regulations as to whether the regulations should be approved by resolution of the Senate, by resolution of the House of Representatives, by concurrent resolution, or by

joint resolution.” The Board of Directors recommends that the procedure used by Congress to approve these overtime exemption regulations: that the House of Representatives approve the “H” version of the regulations by resolution; that the Senate approve the “S” version of the regulations by resolution; and that the House and Senate approve the “C” version of the regulations applied to the other employing offices by a concurrent resolution.

Are there regulations covering overtime exemptions currently in force under the CAA?

Yes, however, they are woefully outdated. Unless and until the House of Representatives and the Senate approve the regulations adopted by the OCFR Board, all employing offices and covered employees continue to be required to follow the existing Part 541 Regulations, which were adopted by the Board of Directors and approved by the House of Representatives and the Senate in 1996.

If approved by Congress, will these regulations completely replace the existing Part 541 overtime exemption regulations applicable under the CAA?

Yes, and they will provide the modernization necessary to properly remunerate Legislative Branch employees for overtime consistent with the Executive Branch and the private sector.

The Board's Responses to Comments

As the result of the April 26, 2022 Notice of Proposed Regulations, and the ensuing 30 day comment period, the Office received four comments from interested parties. Not surprisingly, a common theme among the comments was the difficulty in applying the Fair Labor Standards Act to real-life occupations within the legislative branch. Commenters requested that the Board add descriptive examples that discuss specific positions and opine on whether those positions should or should not be classified as exempt or non-exempt. Commenters recognized that these exempt status determinations are fact specific and often require complex analysis. For this reason, the Board remains unconvinced that including specific position titles plucked from Congressional employment would serve the legislative branch community. Many legislative branch employees share common job titles but nevertheless have different duties in actuality. These employees, and their employing offices, would not benefit from improper classification through rulemaking.

There exists a body of law which addresses the application of these exceptions in the context of government employees. See e.g., Wage and Hour Division (WHD) Opinion Letter FLSA2020-9, <https://www.dol.gov/sites/dolgov/files/WHD/opinion-letters/FLSA/2020-06-25-09-FLSA.pdf> (last viewed on 8/29/22). For example, the Department of Labor has applied the exemption as it relates to a government press officer. *Id.*

One commenter notified the Board that the U.S. Supreme Court granted certiorari in *Helix Energy Solutions Group v. Hewitt*, ___ S.Ct. ___, 2022 WL 1295708 (May 2, 2022) to address “highly compensated employee” regulations. The commenter suggests that any decision rendered by the Supreme Court could impact the application of the proposed regulations. The Board acknowledges that a decision in *Helix Energy Solutions Group v. Hewitt* may impact the application of 541.601 and 541.604. Nevertheless, a decision is likely more than a year away and the Board does not wish to further delay the adoption of these regulations. The Board will revisit these regulations consistent with any relevant U.S. Supreme Court decision and future Department of Labor amendments.

The Board has reviewed all comments, and has deliberated regarding the question

whether comments establish “good cause” pursuant to section 203(c)(2) of the CAA, 2 U.S.C. 1313(c)(2), for varying the Office of Congressional Workplace Rights proposed regulations from the Department of Labor regulations. The following discussion outlines the comments, and the Board's response to them.

What changes to the regulations as proposed on April 26, 2022 have been made by the Board in response to comments received from interested parties?

The Board has made many changes in response to comments received from interested parties. First, the Board agrees that good cause exists to modify these regulations in several respects to further reflect the legislative branch's unique workplace. Several commenters applauded this Board's decision to eliminate references that have no application to Congressional employees. However, they requested that the Board tailor the Proposed Regulations even further. The Board has heeded this request and in large part removed additional private sector terminology and replaced it with language specific to legislative branch employees and employing offices. Second, a commenter recommended departing from the effective date maintained within the Department of Labor regulations so that the regulations, once applied to the legislative branch, are not deemed retroactive. The Board agrees that good cause exists to modify these regulations so that they are not deemed retroactive. Third, a commenter asked that the Board include in deleted sections the words “Intentionally Left Blank” or renumber those sections that remain so that they are consecutively numbered for typographical clarity. The Board agrees with this suggestion and has included the word “Reserved” for Department of Labor sections and subsections that are being eliminated. Additional changes are explained below by section.

Sec. 541.0: Commenters correctly pointed out that a principal statutory authority for adoption of these regulations was not included in the language of the proposed regulation itself. Therefore, one commenter proposed to add the words “and applies to covered employees by virtue of section 225(e)(1) of the CAA, as amended, 2 U.S.C. 1361(e)(1)” before the end of each sentence. The Board concurs with this recommendation; therefore, the proposed language was added as authority for the promulgation of these overtime exemption rules.

Sec. 541.3: At least one commenter requested the removal of “deputy sheriffs, state troopers, highway patrol officers . . . correctional officers, parole or probation officers, park rangers, fire fighters” and “or fight fires” to further tailor the regulations to reflect legislative branch terminology. Police officers, detectives and investigators are already referenced in the regulation. Thus, the Board agrees that the example of deputy sheriffs, state troopers, highway patrol officers, correctional officers, and parole and probation officers—positions that are not present within the legislative branch—are additional law enforcement positions that are unhelpful by analogy. However, the Board does not find good cause to remove “park rangers,” “fire fighters,” or individuals who “fight fires.” The park rangers' functions may serve employing offices by analogy. With respect to fire fighters and fighting fires, although the legislative branch presently relies on the District of Columbia's fire department, it is reasonably foreseeable that fire fighters or individuals whose main duty is to prevent fires may be employed by the legislative branch. Therefore, the Board finds good cause to remove the examples of deputy sheriffs, state troop-

ers, highway patrol officers, correctional officers, and parole or probation officers, but not park rangers, fire fighters, and individuals who fight fires. Similarly, the commenter requested that “customers” be replaced with “constituents” to further tailor the regulations to reflect legislative branch terminology. The Board recognizes that the word “customers” is not inherently governmental. Nevertheless, the Board believes that “constituents” is too narrow. Thus, the Board finds good cause to modify the word “customers” with “customers, constituents or stakeholders”. Another commenter requested that “enterprise” be modified to “employing office” to further tailor the regulations to reflect legislative branch terminology. Although Section 541.1 defines “enterprise” to mean “employing office,” the Board concurs with this recommendation.

Section 541.4: Several commenters pointed out that the proposed section maintained an erroneous requirement that employing offices must comply with “. . . State or municipal laws, regulations, or ordinances establishing a higher minimum wage or lower maximum workweek than those established under the FLSA” as applied via the CAA. The Board concurs with the comment. That requirement has been deleted from the proposed regulation.

Sec. 541.100: At least one commenter requested that “enterprise” be modified to “employing office” to further tailor the regulations to reflect legislative branch terminology. Although Section 541.1 defines “enterprise” to mean “employing office,” the Board concurs with this recommendation.

Sec. 541.101: A commenter asked the Board to either identify that the section was removed or renumber the sections thereafter for typographical clarity. The Board will include the word “Reserved” after the headings of removed sections.

Sec. 541.103: At least one commenter requested that “enterprise” be modified to “employing office” to further tailor the regulations to reflect legislative branch terminology. Although Section 541.1 defines “enterprise” to mean “employing office,” the Board concurs with this recommendation. Similarly, the commenter requested that “establishment” be modified to “location” to further tailor the regulations to reflect the legislative branch terminology. The Board concurs with this recommendation as well.

Sec. 541.200: One commenter requested that “customers” be replaced with “constituents” to further tailor the regulations to reflect legislative branch terminology. The Board recognizes that the word “customers” is not inherently governmental. Nevertheless, the Board believes that “constituents” is too narrow. Thus, the Board finds good cause to modify the word “customers” with “customers, constituents or stakeholders”.

Sec. 541.201: At least one commenter requested that “business” be modified to further tailor the regulations to reflect legislative branch terminology. Although Section 541.1 defines “business” and “company” to mean “employing office,” the Board concurs with all of these recommendations. Similarly, one commenter requested that “customers” be replaced with “constituents” to further tailor the regulations to reflect legislative branch terminology. The Board recognizes that the word “customers” is not inherently governmental. Nevertheless, the Board believes that “constituents” is too narrow. Thus, the Board finds good cause to modify the word “customers” with “customers, constituents or stakeholders”.

Sec. 541.202: At least one commenter requested that “business”, when used as a noun and not an adjective, “company”,

“credit manager”, “large corporation”, “management consultant”, “large company”, and “client” be modified to further tailor the regulations to reflect legislative branch terminology. Although Section 541.1 defines “business” and “company” to mean “employing office,” the Board concurs with all of these recommendations.

Sec. 541.203: Multiple commenters questioned whether Congress had insurance adjusters (541.203(a)) and comparison shoppers (541.203(i)), or whether Congressional employees could be deemed “[e]mployees in the financial services industry generally” (541.203(b)). The Board agrees that the example of insurance adjusters is not applicable directly to any employing office. However, insurance adjusters’ investigative functions may serve employing offices by analogy to evaluate the administrative exemption. Similarly the Board believes that employees in financial services generally, as opposed to the financial services industry, is a function that may be applicable directly or by analogy for employing offices to analyze whether employees are covered by the administrative exemption. Lastly, the Board agrees that the comparison shoppers example is neither applicable directly or by analogy to any employing office. Therefore, the Board finds good cause to modify 541.203(a) to “employees who investigate claims”, remove the word “industry” in 541.203(b), and reserve all of 541.203(i). In addition, at least one commenter asked that certain words or phrases, such as but not limited to “business owner,” “purchasing and selling”, “executive of a large business,” and “company,” be modified to legislative branch terminology in all of the remaining subsections. The Board agrees with these modifications generally, if not verbatim.

Sec. 541.303: One commenter recommends omitting “teachers of kindergarten or nursery school pupils” because, in the legislative branch, the daycare providers are not required to hold advanced degrees or required to graduate from a prolonged course of specialized instruction. In addition, the commenter recommends including salary requirements when evaluating whether a teacher should be included in the professional exemption. The Board does not believe good cause has been established for such a substantial departure from the Department of Labor regulations. Department of Labor Fact Sheet #46, “Daycare Centers and Preschools Under the Fair Labor Standards Act (revised July 2009), explains that nursery school teachers are exempt if their primary duty is “teaching, tutoring, instructing or lecturing”. However, “preschool employees whose primary duty is to care for the physical needs of the facility’s children would ordinarily not meet the requirement for exemption as teachers”. <https://www.dol.gov/agencies/whd/fact-sheets/46-flsa-daycare>. Whether an exemption applies is fact specific and should be decided through adjudication and not through rulemaking.

Sec. 541.402: One commenter requested that “customers” be replaced with “constituents” to further tailor the regulations to reflect legislative branch terminology. The Board recognizes that the word “customers” is not inherently governmental. Nevertheless, the Board believes that “constituents” is too narrow. Thus, the Board finds good cause to modify the word “customers” with “customers, constituents or stakeholders”.

Subpart F: A commenter asked the Board to either identify that the section was removed or renumber the sections thereafter for typographical clarity. The Board will include the word “Reserved” after the headings of removed sections.

Sec. 541.601: A commenter recommended departing from the Department of Labor’s ef-

fective dates in Section 541.601(a)(1), 541.601(a)(2), and 541.601(b)(2) so that the regulations are not deemed retroactive. The Board finds good cause to amend this language so that there is no ambiguity regarding retroactivity. In addition, the Board agrees that good cause exists to further modify 541.601(b)(2) by eliminating references to commissioned sales to further reflect the legislative branch’s unique workplace.

Sec. 541.602: At least one commenter requested that “business” be modified to further tailor the regulations to reflect legislative branch terminology. Although Section 541.1 defines “business” to mean “employing office,” the Board concurs with this recommendation. Similarly, a commenter pointed out that the proposed section maintained an erroneous requirement that employing offices may deduct for benefits received under State laws. The Board concurs with the comment.

Sec. 541.603: At least one commenter requested that “company” be modified to further tailor the regulations to reflect legislative branch terminology. Although Section 541.1 defines “company” to mean “employing office,” the Board concurs with this recommendation.

Sec. 541.606: Commenters recommended maintaining the original language. The Board agrees with the concern that incorporating by reference all of Part 531’s interpretation of “board, lodging, or other facilities” is overbroad and cumbersome. One commenter recommended creating a definition specific to legislative branch employees, including transit benefits in the definition of board, lodging or other facilities. The Board notes that private sector employees are also eligible for transit benefits but the Department of Labor did not include it in its regulation. The Board does not find good cause to stray from the original regulation.

Sec. 541.607: A commenter asked the Board to either identify that the section was removed or renumber the sections thereafter for typographical clarity. The Board will include the word “Reserved” after the headings of removed sections.

Sec. 541.702: Raising the same concern as addressed in Sec. 541.202, at least one commenter requested that “credit manager”, “employer”, and “customers” be modified to further tailor the regulations to reflect legislative branch terminology. Although “employing office” can be readily understood from the term “employer,” the Board concurs with all of these recommendations since the example of “credit manager” is not applicable directly to any employing office.

Sec. 541.706: At least one commenter requested that the example of a “mine superintendent” be eliminated, and the terms “establishment” and “industry” be modified to further tailor the regulations to reflect legislative branch terminology. The Board recognizes that there is no position of “mine superintendent” in the legislative branch and that this example will not be applicable directly or by analogy for employing offices to analyze whether employees are covered by any exemption. Therefore, the Board finds good cause to both eliminate and modify said language.

Sec. 541.709: A commenter asked the Board to either identify that the section was removed or renumber the sections thereafter for typographical clarity. The Board will include the word “Reserved” after the headings of removed sections.

Sec. 541.710: Commenters correctly observed that all legislative employees are essentially “Employees of public agencies.” The commenters thus requested that the language be modified to further tailor the regulations to reflect legislative branch terminology. The Board concurred with this recommendation.

What changes to the proposed substantive regulations suggested by commenters were not made by the Board of Directors?

The Board of Directors reviewed all suggestions included in comments pursuant to the statutory requirement that the regulations “shall be the same as substantive regulations promulgated by the Secretary of Labor to implement the statutory provisions . . . except insofar as the Board may determine, for good cause shown and stated together with the regulation, that a modification of such regulations would be more effective for the implementation of the rights and protections under this section.” (section 203(c)(2) of the CAA, 2 USC 1313(c)(2)). If the Board declined to adopt a suggestion, it determined that there was not good cause for such a change in implementing the FLSA.

One commenter was critical of the Board’s approach and questioned why the Board incorporated some of its suggestions in response to the proposed 2004 Substantive Regulations but not others. The April 2022 proposed regulations were created to mirror current Department of Labor regulations. This, in addition to the almost 20 year lapse of time since 2004, is why the Board diverged from the adopted 2005 Substantive Regulations.

As discussed previously, several commenters requested the Board to further amend the Proposed Rule to remove positions not presently found in the legislative branch and include examples of positions specific to the legislative branch employees. While the Board agreed with this suggestion in large part, the Board did not find good cause for all of the requested changes. First, as explained in 2005, the Board is aware that many of the job classifications and types of work processes treated in Part 541 are probably not found within the Legislative Branch of the Federal Government, that there may be job categories in the Legislative Branch not directly reflected in Part 541, and that there are differences among the work forces in the several employing offices covered by the CAA. However, the Board has concluded that adding or removing all exemplary and descriptive provisions from the regulations as applied to all employing offices could result in a basic misunderstanding of the purpose and goal of the new Part 541 of 29 CFR, and of the Congressional mandate in the CAA that the Board issue regulations based upon the Secretary of Labor’s regulations promulgated for the private sector. Second, the Board did not remove positions which do not presently exist in the legislative branch but are reasonably foreseeable to exist in the future. The Board recognizes that this Proposed Rule, when adopted and issued, may be effective for many years to come. For example, although the legislative branch does not presently employ a chef, it may in the future for one of the multiple dining locations within the Capitol complex. Thus, descriptions of positions or functions that are not currently held by Congressional employees but could reasonably be foreseen to exist in the future were maintained. Third, the Board did not include position titles that are currently held by many legislative branch employees where the employees may have the same title but whose actual job duties may differ. The Board believes that such determinations should not be made through rulemaking but rather through adjudication.

Sec. 541.0: One commenter suggested the removal of the words “elementary or secondary schools” and in its stead the inclusion of “nursery school programs” as exempt from minimum wage and overtime requirements. The Board does not believe that good cause exists to make this change. The inclusion of “elementary or secondary schools”

and the exclusion of “nursery schools” provides an employing office with the ability to evaluate whether a nursery school employee is exempt, or not exempt, consistent with the maxim of interpretation, *expressio unius, exclusio alterius*. Further, the Board believes that determinations regarding exemptions for nursery school program employees should be made through adjudication and not through rulemaking. Commenters also noted that the reference in the proposed regulation to “enforcement” by the Office of Congressional Workplace Rights of the equal pay provision found at section 6(d) of the FLSA reflected an authority not given to the Office under the CAA. The Office of Congressional Workplace Rights is authorized to administer the dispute resolution process for employee claims of a violation of the equal pay requirement at section 6(d) of the FLSA. Although the Office of Congressional Workplace Rights does not initiate enforcement, this remains a method of enforcement. Therefore, the reference to “enforcement” of section 6(d) was maintained.

Sec. 541.1: One commenter expressed concern that by defining the terms “employee”, “intern”, and “employing office” by reference to statutory citations, this causes confusion. It recommended, therefore, that the terms be defined pursuant to definitions already extant in the Substantive Regulations for the FLSA at Section 501.102. The Board does not believe that citation to the Congressional Accountability Act causes confusion. Therefore, the statutory citations will remain.

Sec. 541.100: One commenter requested this section be revised to clarify that an executive must regularly direct the work of two or more full time employees or their equivalent. The Board does not find good cause to modify this subsection as section 541.104(a)(3) provides this exact clarification.

Sec. 541.104: One commenter suggested that the Board re-evaluate its 2005 determination declining to include interns as employees for the purpose of section 54.104 to the extent that they are now paid staff. In 2005, then Office of Compliance submitted an inquiry with the Department of Labor as to whether the Department interprets the term “employee” in regulation 541.104 to include individual workers who are not “employees” as defined under the balance of Part 541. The Department of Labor responded informally that such workers are not counted as “employees” for purposes of the application of section 541.104 of the regulations. The Board has concluded that there is no good cause to modify section 541.104 to expressly include interns. The Board has defined “interns” in this regulation pursuant to the Congressional Accountability Act’s definition, i.e., an individual who performs work but is uncompensated. To the extent that an employee holds the position of “intern” but is nevertheless compensated, the employee may, in certain circumstances, be considered a full time employee or the equivalent. The Board believes that determinations regarding paid interns should be made through adjudication and not through rulemaking.

Sec. 541.202: One commenter requested that “segment” be modified to “department or division” to further tailor the regulations to reflect the legislative branch terminology. Because segment is a generic description for the words “department” and “division”, and since “segment” would also capture other partitions within the employ-

ing office that are not called a department or division, the Board does not find good cause to modify this language.

Sec. 541.203: Multiple commenters requested that additional position titles and descriptions be included as examples of employees who are exempt based on the administrative exemption. For example, one commenter proposed to include the following examples of employees whose primary duty is to perform office or non-manual work directly related to the management or general business operations of the employer or the employer’s stakeholders:

(k) “Employees who perform public relations work for an employing office, such as developing and implementing a media strategy or managing and coordinating media contacts and activities for the office, generally meet the duties requirements for the administrative exemption.”

(l) “Employees who perform research and government relations functions for an employing office, such as devising and formulating legislative initiatives, serving as a Senator’s principal advisor on legislative matters, and working with governmental and non-governmental offices to gather support for particular legislative proposals, generally meet the duties requirements for the administrative exemption.”

(m) “Employees who act as a Senator’s liaison to government, community and constituent groups and leaders in assigned geographic or issue areas and who research and advise the Senator on community, legislative or other developments in the assigned area, generally meet the duties requirements for the administrative exemption.”

However, among other potential issues, it is unclear from these examples whether the employees exercise discretion and independent judgment with respect to matters of significance and whether the employee is paid the equivalent of at least \$684 per week on a salary basis. The Department of Labor’s Wage and Hour Division has opined that for a government employee to qualify for the administrative exemption, the employee’s primary duty should involve its management policies or the management policies of the government entity or political subdivision, i.e., “directly related to assisting with the ‘running or servicing’ of the . . . government itself.” WHD Opinion Letter FLSA2020-9. Therefore, the Board cannot find good cause to include the commenter’s language as the determination whether these employment positions and functions would qualify for the administrative exemption should be made on a case by case basis.

Sec. 541.204: One commenter suggested the substitution of “nursery school programs” for “elementary or secondary schools.” As explained in Sec. 541.0 above, the Board does not believe that good cause exists to make this change. The inclusion of “elementary or secondary schools” and the exclusion of “nursery schools” in the original regulation provides an employing office with the ability to evaluate whether a nursery school employee is exempt, or not exempt, consistent with the maxim *expressio unius, exclusio alterius*. Further, the Board believes that determinations regarding exemptions for nursery school program management employees should be made through adjudication and not through rulemaking.

Sec. 541.301: Commenters broadly suggested that portions of the proposed regulations that arguably do not directly concern

types or categories of employment in their component of the legislative branch should be deleted from the proposed regulations in its entirety. Thus, they recommend deleting Section 541.301(e)(1), pertaining to registered or certified technologists; Section 541.301(e)(2), pertaining to nurses; Section 541.301(e)(3), relating to dental hygienists; Section 541.301(e)(4), pertaining to physicians assistants; Section 541.301(e)(6), relating to chefs; and Section 541.301(e)(8), relating to athletic trainers. The Board does not find good cause to remove these positions and descriptions. Some of these functions may exist directly or by analogy within the Office of Attending Physician. Furthermore, for positions that do not presently exist in the legislative branch but are reasonably foreseeable to exist in the future, the Board believes these descriptions will assist employing offices either directly or by analogy for positions created in years to come.

Sec. 541.304: Commenters broadly suggested that portions of the proposed regulations which arguably do not directly concern types or categories of employment in their component of the legislative branch should be deleted from the proposed regulations in its entirety. For example, one commenter recommends deleting all references to the practice of medicine in 541.304. The Board does not find good cause to remove these positions and descriptions. These functions may exist directly or by analogy within the Office of Attending Physician. Furthermore, for positions that do not presently exist in the legislative branch but are reasonably foreseeable to exist in the future, the Board believes these descriptions will assist employing offices either directly or by analogy for positions created in years to come.

Sec. 541.605: One commenter suggested that this section in its entirety, and the many references to this section, should be eliminated since Congressional employees are paid on a salary basis. The Board does not find good cause to remove the “fee basis” section. Although most, if not all, positions are paid on a salary basis, it is reasonably foreseeable that an employee could be hired on a fee basis in the future.

HOW TO READ THE ADOPTED AMENDMENTS

The text of the amendments adopted by the OCWR Board reproduces the text of the current regulations promulgated by the Secretary of Labor at 29 CFR Part 541, and shows changes adopted by the OCWR Board for the CAA version of these same regulations. Changes adopted by the Board are shown as follows: deletions are marked with a [bracket] and added text is within angled <<brackets>>. Therefore, if these regulations are adopted as proposed, the deletion within bracketed text will disappear from the regulations and the added text within angled brackets will remain. If these regulations are approved for the House of Representatives by resolution of the House, they will be promulgated with the prefix “H” appearing before each regulations section number. If these regulations are approved for the Senate by resolution of the Senate, they will be promulgated with the prefix “S” appearing before each regulation’s section number. If these regulations are approved for the other employing offices by joint or concurrent resolution of the House of Representatives and the Senate, they will be promulgated with the prefix “C” appearing before each regulation’s section number.

(a) Section 13(a)(1) of the Fair Labor Standards Act, as amended, provides an ex-

emption from the Act's minimum wage and overtime requirements for any employee employed in a bona fide executive, administrative, or professional capacity (including any employee employed in the capacity of academic administrative personnel or teacher in elementary or secondary schools)[, or in the capacity of an outside sales employee, as such terms are defined and delimited from time to time by regulations of the Secretary, subject to the provisions of the Administrative Procedure Act.]<< and applies to covered employees by virtue of section 225(e)(1) of the CAA, as amended, 2 U.S.C. 1361(e)(1).>> Section 13(a)(17) of the Act provides an exemption from the minimum wage and overtime requirements for computer systems analysts, computer programmers, software engineers, and other similarly skilled computer employees << and applies to covered employees by virtue of section 225(e)(1) of the CAA, as amended, 2 U.S.C. 1361(e)(1).>>.

(b) The requirements for these exemptions are contained in this part as follows: executive employees, subpart B; administrative employees, subpart C; professional employees, subpart D; computer employees, subpart E; outside sales employees, subpart F. Subpart G contains regulations regarding salary requirements applicable to most of the exemptions, including salary levels and the salary basis test. Subpart G also contains a provision for exempting certain highly compensated employees. Subpart H contains definitions and other miscellaneous provisions applicable to all or several of the exemptions.

(c) Effective July 1, 1972, the Fair Labor Standards Act was amended to include within the protection of the equal pay provisions those employees exempt from the minimum wage and overtime pay provisions as bona fide executive, administrative, and professional employees (including any employee employed in the capacity of academic administrative personnel or teacher in elementary or secondary schools)[, or in the capacity of an outside sales employee under section 13(a)(1) of the Act]. The equal pay provisions in section 6(d) of the Fair Labor Standards Act are administered and enforced by the [United States Equal Employment Opportunity Commission] <<Office of Congressional Workplace Rights>>.

§ 541.1 Terms used in regulations.

Act means the Fair Labor Standards Act of 1938, as amended. [Administrator means the Administrator of the Wage and Hour Division, United States Department of Labor. The Secretary of Labor has delegated to the Administrator the functions vested in the Secretary under sections 13(a)(1) and 13(a)(17) of the Fair Labor Standards Act.] <<CAA means Congressional Accountability Act of 1995, as amended. Office means the Office of Congressional Workplace Rights. Employee means a "covered employee" as defined in section 101(a)(3) through (a)(8) of the CAA, 2 U.S.C. 1301(a)(3) through (a)(8), but not an "intern" as defined in section 203(a)(2) of the CAA, 2 U.S.C. 1313(a)(2). Employer, company, business, or enterprise each mean an "employing office" as defined in section 101(a)(9) of the CAA, 2 U.S.C. 1301(a)(9).>>

§ 541.2 Job titles insufficient.

A job title alone is insufficient to establish the exempt status of an employee. The exempt or nonexempt status of any particular employee must be determined on the basis of whether the employee's salary and duties meet the requirements of the regulations in this part.

§ 541.3 Scope of the section 13(a)(1) exemptions.

(a) The section 13(a)(1) exemptions and the regulations in this part do not apply to man-

ual laborers or other "blue collar" workers who perform work involving repetitive operations with their hands, physical skill and energy. Such nonexempt "blue collar" employees gain the skills and knowledge required for performance of their routine manual and physical work through apprenticeships and on-the-job training, not through the prolonged course of specialized intellectual instruction required for exempt learned professional employees such as medical doctors, architects and archeologists. Thus, for example, non-management production-line employees and non-management employees in maintenance, construction and similar occupations such as carpenters, electricians, mechanics, plumbers, iron workers, craftsmen, operating engineers, longshoremen, construction workers and laborers are entitled to minimum wage and overtime premium pay under the Fair Labor Standards Act, and are not exempt under the regulations in this part no matter how highly paid they might be.

(b)(1) The section 13(a)(1) exemptions and the regulations in this part also do not apply to police officers, detectives, [deputy sheriffs, state troopers, highway patrol officers,] investigators, inspectors, [correctional officers, parole or probation officers,] park rangers, fire fighters, paramedics, emergency medical technicians, ambulance personnel, rescue workers, hazardous materials workers and similar employees, regardless of rank or pay level, who perform work such as preventing, controlling or extinguishing fires of any type; rescuing fire, crime or accident victims; preventing or detecting crimes; conducting investigations or inspections for violations of law; performing surveillance; pursuing, restraining and apprehending suspects; detaining or supervising suspected and convicted criminals, including those on probation or parole; interviewing witnesses; interrogating and fingerprinting suspects; preparing investigative reports; or other similar work.

(2) Such employees do not qualify as exempt executive employees because their primary duty is not management of the [enterprise] <<employing office>> in which the employee is employed or a customarily recognized department or subdivision thereof as required under § 541.100. Thus, for example, a police officer or fire fighter whose primary duty is to investigate crimes or fight fires is not exempt under section 13(a)(1) of the Act merely because the police officer or fire fighter also directs the work of other employees in the conduct of an investigation or fighting a fire.

(3) Such employees do not qualify as exempt administrative employees because their primary duty is not the performance of work directly related to the management or general business operations of the employer or the employer's customers<<, constituents or stakeholders>> as required under § 541.200.

(4) Such employees do not qualify as exempt professionals because their primary duty is not the performance of work requiring knowledge of an advanced type in a field of science or learning customarily acquired by a prolonged course of specialized intellectual instruction or the performance of work requiring invention, imagination, originality or talent in a recognized field of artistic or creative endeavor as required under § 541.300. Although some police officers, fire fighters, paramedics, emergency medical technicians and similar employees have college degrees, a specialized academic degree is not a standard prerequisite for employment in such occupations.

§ 541.4 Other laws and collective bargaining agreements.

The Fair Labor Standards Act provides minimum standards that may be exceeded,

but cannot be waived or reduced. Employers must comply, for example, with any Federal[, State or municipal] laws, regulations or ordinances establishing a higher minimum wage or lower maximum workweek than those established under the Act. Similarly, employers, on their own initiative or under a collective bargaining agreement with a labor union, are not precluded by the Act from providing a wage higher than the statutory minimum, a shorter workweek than the statutory maximum, or a higher overtime premium (double time, for example) than provided by the Act. While collective bargaining agreements cannot waive or reduce the Act's protections, nothing in the Act or the regulations in this part relieves employers from their contractual obligations under collective bargaining agreements.

SUBPART B—EXECUTIVE EMPLOYEES (§§ 541.100-541.106)

§ 541.100 General rule for executive employees.

(a) The term "employee employed in a bona fide executive capacity" in section 13(a)(1) of the Act shall mean any employee:

(1) Compensated on a salary basis pursuant to § 541.600 at a rate of not less than \$684 per week [(or \$455 per week if employed in the Commonwealth of the Northern Mariana Islands, Guam, Puerto Rico, or the U.S. Virgin Islands by employers other than the Federal government, or \$380 per week if employed in American Samoa by employers other than the Federal government)], exclusive of board, lodging or other facilities;

(2) Whose primary duty is management of the [enterprise] <<employing office>> in which the employee is employed or of a customarily recognized department or subdivision thereof;

(3) Who customarily and regularly directs the work of two or more other employees; and

(4) Who has the authority to hire or fire other employees or whose suggestions and recommendations as to the hiring, firing, advancement, promotion or any other change of status of other employees are given particular weight.

(b) The phrase "salary basis" is defined at § 541.602; "board, lodging or other facilities" is defined at § 541.606; "primary duty" is defined at § 541.700; and "customarily and regularly" is defined at § 541.701.

§ 541.101 Business owner.

The term "employee employed in a bona fide executive capacity" in section 13(a)(1) of the Act also includes any employee who owns at least a bona fide 20-percent equity interest in the enterprise in which the employee is employed, regardless of whether the business is a corporate or other type of organization, and who is actively engaged in its management. The term "management" is defined in § 541.102. The requirements of Subpart G (salary requirements) of this part do not apply to the business owners described in this section.]

§ 541.102 Management.

Generally, "management" includes, but is not limited to, activities such as interviewing, selecting, and training of employees; setting and adjusting their rates of pay and hours of work; directing the work of employees; maintaining production or sales records for use in supervision or control; appraising employees' productivity and efficiency for the purpose of recommending promotions or other changes in status; handling employee complaints and grievances; disciplining employees; planning the work; determining the techniques to be used; apportioning the work among the employees; determining the type of materials, supplies,

machinery, equipment or tools to be used or merchandise to be bought, stocked and sold; controlling the flow and distribution of materials or merchandise and supplies; providing for the safety and security of the employees or the property; planning and controlling the budget; and monitoring or implementing legal compliance measures.

§ 541.103 Department or subdivision.

(a) The phrase "a customarily recognized department or subdivision" is intended to distinguish between a mere collection of employees assigned from time to time to a specific job or series of jobs and a unit with permanent status and function. A customarily recognized department or subdivision must have a permanent status and a continuing function. For example, a large employer's human resources department might have subdivisions for labor relations, pensions and other benefits, equal employment opportunity, and personnel management, each of which has a permanent status and function.

(b) When an [enterprise] <<employing office>> has more than one [establishment] <<location>>, the employee in charge of each [establishment] <<location>> may be considered in charge of a recognized subdivision of the [enterprise] <<employing office>>.

(c) A recognized department or subdivision need not be physically within the employer's establishment and may move from place to place. The mere fact that the employee works in more than one location does not invalidate the exemption if other factors show that the employee is actually in charge of a recognized unit with a continuing function in the organization.

(d) Continuity of the same subordinate personnel is not essential to the existence of a recognized unit with a continuing function. An otherwise exempt employee will not lose the exemption merely because the employee draws and supervises workers from a pool or supervises a team of workers drawn from other recognized units, if other factors are present that indicate that the employee is in charge of a recognized unit with a continuing function.

§ 541.104 Two or more other employees.

(a) To qualify as an exempt executive under § 541.100, the employee must customarily and regularly direct the work of two or more other employees. The phrase "two or more other employees" means two full-time employees or their equivalent. One full-time and two half-time employees, for example, are equivalent to two full-time employees. Four half-time employees are also equivalent.

(b) The supervision can be distributed among two, three or more employees, but each such employee must customarily and regularly direct the work of two or more other full-time employees or the equivalent. Thus, for example, a department with five full-time nonexempt workers may have up to two exempt supervisors if each such supervisor customarily and regularly directs the work of two of those workers.

(c) An employee who merely assists the manager of a particular department and supervises two or more employees only in the actual manager's absence does not meet this requirement.

(d) Hours worked by an employee cannot be credited more than once for different executives. Thus, a shared responsibility for the supervision of the same two employees in the same department does not satisfy this requirement. However, a full-time employee who works four hours for one supervisor and four hours for a different supervisor, for example, can be credited as a half-time employee for both supervisors.

§ 541.105 Particular weight.

To determine whether an employee's suggestions and recommendations are given "particular weight," factors to be considered include, but are not limited to, whether it is part of the employee's job duties to make such suggestions and recommendations; the frequency with which such suggestions and recommendations are made or requested; and the frequency with which the employee's suggestions and recommendations are relied upon. Generally, an executive's suggestions and recommendations must pertain to employees whom the executive customarily and regularly directs. It does not include an occasional suggestion with regard to the change in status of a co-worker. An employee's suggestions and recommendations may still be deemed to have "particular weight" even if a higher level manager's recommendation has more importance and even if the employee does not have authority to make the ultimate decision as to the employee's change in status.

§ 541.106 Concurrent duties.

(a) Concurrent performance of exempt and nonexempt work does not disqualify an employee from the executive exemption if the requirements of § 541.100 are otherwise met. Whether an employee meets the requirements of § 541.100 when the employee performs concurrent duties is determined on a case-by-case basis and based on the factors set forth in § 541.700. Generally, exempt executives make the decision regarding when to perform nonexempt duties and remain responsible for the success or failure of business operations under their management while performing the nonexempt work. In contrast, the nonexempt employee generally is directed by a supervisor to perform the exempt work or performs the exempt work for defined time periods. An employee whose primary duty is ordinary production work or routine, recurrent or repetitive tasks cannot qualify for exemption as an executive.

(b) For example, an assistant manager in a retail establishment may perform work such as serving customers, cooking food, stocking shelves and cleaning the establishment, but performance of such nonexempt work does not preclude the exemption if the assistant manager's primary duty is management. An assistant manager can supervise employees and serve customers at the same time without losing the exemption. An exempt employee can also simultaneously direct the work of other employees and stock shelves.

(c) In contrast, a relief supervisor or working supervisor whose primary duty is performing nonexempt work on the production line in a manufacturing plant does not become exempt merely because the nonexempt production line employee occasionally has some responsibility for directing the work of other nonexempt production line employees when, for example, the exempt supervisor is unavailable. Similarly, an employee whose primary duty is to work as an electrician is not an exempt executive even if the employee also directs the work of other employees on the job site, orders parts and materials for the job, and handles requests from the prime contractor.

SUBPART C—ADMINISTRATIVE EMPLOYEES (§§ 541.200-541.204)

§ 541.200 General rule for administrative employees.

(a) The term "employee employed in a bona fide administrative capacity" in section 13(a)(1) of the Act shall mean any employee:

(1) Compensated on a salary or fee basis pursuant to § 541.600 at a rate of not less than \$684 per week [(or \$455 per week if employed in the Commonwealth of the Northern Mariana Islands, Guam, Puerto Rico, or the U.S.

Virgin Islands by employers other than the Federal government, or \$380 per week if employed in American Samoa by employers other than the Federal government)], exclusive of board, lodging or other facilities;

(2) Whose primary duty is the performance of office or non-manual work directly related to the management or general business operations of the employer or the employer's customers<<, constituents or stakeholders>>; and

(3) Whose primary duty includes the exercise of discretion and independent judgment with respect to matters of significance.

(b) The term "salary basis" is defined at § 541.602; "fee basis" is defined at § 541.605; "board, lodging or other facilities" is defined at § 541.606; and "primary duty" is defined at § 541.700.

§ 541.201 Directly related to management or general business operations.

(a) To qualify for the administrative exemption, an employee's primary duty must be the performance of work directly related to the management or general business operations of the employer or the employer's customers<<, constituents or stakeholders>>. The phrase "directly related to the management or general business operations" refers to the type of work performed by the employee. To meet this requirement, an employee must perform work directly related to assisting with the running or servicing of the [business] <<employing office>>, as distinguished, for example, from working on a manufacturing production line or selling a product in a retail or service establishment.

(b) Work directly related to management or general business operations includes, but is not limited to, work in functional areas such as tax; finance; accounting; budgeting; auditing; insurance; quality control; purchasing; procurement; advertising; marketing; research; safety and health; personnel management; human resources; employee benefits; labor relations; public relations; government relations; computer network, internet and database administration; legal and regulatory compliance; and similar activities. Some of these activities may be performed by employees who also would qualify for another exemption.

(c) An employee may qualify for the administrative exemption if the employee's primary duty is the performance of work directly related to the management or general business operations of the employer's customers<<, constituents and/or stakeholders>>. Thus, for example, employees acting as advisers or consultants to their employer's [clients or] customer<<, constituents or stakeholders>> (as tax experts or financial consultants, for example) may be exempt.

§ 541.202 Discretion and independent judgment.

(a) To qualify for the administrative exemption, an employee's primary duty must include the exercise of discretion and independent judgment with respect to matters of significance. In general, the exercise of discretion and independent judgment involves the comparison and the evaluation of possible courses of conduct, and acting or making a decision after the various possibilities have been considered. The term "matters of significance" refers to the level of importance or consequence of the work performed.

(b) The phrase "discretion and independent judgment" must be applied in the light of all the facts involved in the particular employment situation in which the question arises. Factors to consider when determining whether an employee exercises discretion and independent judgment with respect to matters of significance include, but are not

limited to: whether the employee has authority to formulate, affect, interpret, or implement management policies or operating practices; whether the employee carries out major assignments in conducting the operations of the [business] <<employing office>>; whether the employee performs work that affects business operations <<of the employing office>> to a substantial degree, even if the employee's assignments are related to operation of a particular segment of the [business] <<employing office>>; whether the employee has authority to commit the employer in matters that have significant financial impact; whether the employee has authority to waive or deviate from established policies and procedures without prior approval; whether the employee has authority to negotiate and bind the [company] <<employing office>> on significant matters; whether the employee provides consultation or expert advice to management; whether the employee is involved in planning longer short-term [business] <<employing office>> objectives; whether the employee investigates and resolves matters of significance on behalf of management; and whether the employee represents the [company] <<employing office>> in handling complaints, arbitrating disputes or resolving grievances.

(c) The exercise of discretion and independent judgment implies that the employee has authority to make an independent choice, free from immediate direction or supervision. However, employees can exercise discretion and independent judgment even if their decisions or recommendations are reviewed at a higher level. Thus, the term "discretion and independent judgment" does not require that the decisions made by an employee have a finality that goes with unlimited authority and a complete absence of review. The decisions made as a result of the exercise of discretion and independent judgment may consist of recommendations for action rather than the actual taking of action. The fact that an employee's decision may be subject to review and that upon occasion the decisions are revised or reversed after review does not mean that the employee is not exercising discretion and independent judgment. For example, the policies formulated by the [credit] manager of a <<n>> [large corporation] <<employing office>> may be subject to review by higher [company] <<employing office>> officials who may approve or disapprove these policies. The [management consultant] <<department director>> who has made a study of the operations of a [business] <<department>> and who has drawn a proposed change in organization may have the plan reviewed or revised by superiors before it is [submitted to the client] <<approved>>.

(d) An employer's volume of [business] <<work>> may make it necessary to employ a number of employees to perform the same or similar work. The fact that many employees perform identical work or work of the same relative importance does not mean that the work of each such employee does not involve the exercise of discretion and independent judgment with respect to matters of significance.

(e) The exercise of discretion and independent judgment must be more than the use of skill in applying well-established techniques, procedures or specific standards described in manuals or other sources. See also § 541.704 regarding use of manuals. The exercise of discretion and independent judgment also does not include clerical or secretarial work, recording or tabulating data, or performing other mechanical, repetitive, recurrent or routine work. An employee who simply tabulates data is not exempt, even if labeled as a "statistician."

(f) An employee does not exercise discretion and independent judgment with respect to matters of significance merely because the employer will experience financial losses if the employee fails to perform the job properly. For example, a messenger who is entrusted with carrying large sums of money does not exercise discretion and independent judgment with respect to matters of significance even though serious consequences may flow from the employee's neglect. Similarly, an employee who operates very expensive equipment does not exercise discretion and independent judgment with respect to matters of significance merely because improper performance of the employee's duties may cause serious financial loss to the employer.

§ 541.203 Administrative exemption examples.

(a) [Insurance claims adjusters] <<Employees who investigate claims>> generally meet the duties requirements for the administrative exemption[, whether they work for an insurance company or other type of company,] if their duties include activities such as interviewing [insureds,] witnesses [and physicians]; inspecting property damage; reviewing factual information to prepare damage estimates; evaluating and making recommendations regarding coverage of claims; determining liability and total value of a claim; negotiating settlements; and making recommendations regarding litigation.

(b) Employees in [the] financial services [industry] generally meet the duties requirements for the administrative exemption if their duties include work such as collecting and analyzing information regarding the customer's income, assets, investments or debts; determining which financial products best meet the customer's needs and financial circumstances; advising the customer regarding the advantages and disadvantages of different financial products; and marketing, servicing or promoting the employer's financial products. However, an employee whose primary duty is selling financial products does not qualify for the administrative exemption.

(c) An employee who leads a team of other employees assigned to complete major projects for the employer (such as [purchasing, selling or closing all or part of the business,] negotiating a real estate transaction or a collective bargaining agreement, or designing and implementing productivity improvements) generally meets the duties requirements for the administrative exemption, even if the employee does not have direct supervisory responsibility over the other employees on the team.

(d) An executive assistant or administrative assistant to a [business owner or senior executive of a large business] <<senior management official of an employing office>> generally meets the duties requirements for the administrative exemption if such employee, without specific instructions or prescribed procedures, has been delegated authority regarding matters of significance.

(e) Human resources managers who formulate, interpret or implement employment policies and management consultants who study the operations of a [business] <<employing office>> and propose changes in organization generally meet the duties requirements for the administrative exemption. However, personnel clerks who "screen" applicants to obtain data regarding their minimum qualifications and fitness for employment generally do not meet the duties requirements for the administrative exemption. Such personnel clerks typically will reject all applicants who do not meet minimum standards for the particular job or for employment by the [company] <<employing office>>. The minimum standards are usually set by the exempt human resources manager or other [company]

<<employing office>> officials, and the decision to hire from the group of qualified applicants who do meet the minimum standards is similarly made by the exempt human resources manager or other [company] <<employing office>> officials. Thus, when the interviewing and screening functions are performed by the human resources manager or personnel manager who makes the hiring decision or makes recommendations for hiring from the pool of qualified applicants, such duties constitute exempt work, even though routine, because this work is directly and closely related to the employee's exempt functions.

(f) Purchasing agents with authority to bind the [company] <<employing office>> on significant purchases generally meet the duties requirements for the administrative exemption even if they must consult with top management officials when making a purchase commitment for [raw] materials in excess of the contemplated [plant] needs.

(g) Ordinary inspection work generally does not meet the duties requirements for the administrative exemption. Inspectors normally perform specialized work along standardized lines involving well-established techniques and procedures which may have been catalogued and described in manuals or other sources. Such inspectors rely on techniques and skills acquired by special training or experience. They have some leeway in the performance of their work but only within closely prescribed limits.

(h) Employees usually called examiners or graders, such as employees that grade lumber, generally do not meet the duties requirements for the administrative exemption. Such employees usually perform work involving the comparison of products with established standards which are frequently catalogued. Often, after continued reference to the written standards, or through experience, the employee acquires sufficient knowledge so that reference to written standards is unnecessary. The substitution of the employee's memory for a manual of standards does not convert the character of the work performed to exempt work requiring the exercise of discretion and independent judgment.

(i) [Comparison shopping performed by an employee of a retail store who merely reports to the buyer the prices at a competitor's store does not qualify for the administrative exemption. However, the buyer who evaluates such reports on competitor prices to set the employer's prices generally meets the duties requirements for the administrative exemption.] <<Reserved.>>

(j) [Public sector i]<<I>>nspectors or investigators of various types, such as fire prevention or safety, building or construction, health or sanitation, environmental or soils specialists and similar employees, generally do not meet the duties requirements for the administrative exemption because their work typically does not involve work directly related to the management or general business operations of the employer. Such employees also do not qualify for the administrative exemption because their work involves the use of skills and technical abilities in gathering factual information, applying known standards or prescribed procedures, determining which procedure to follow, or determining whether prescribed standards or criteria are met.

§ 541.204 Educational establishments.

(a) The term "employee employed in a bona fide administrative capacity" in section 13(a)(1) of the Act also includes employees:

(1) Compensated on a salary or fee basis at a rate of not less than \$684 per week [(or \$455 per week if employed in the Commonwealth

of the Northern Mariana Islands, Guam, Puerto Rico, or the U.S. Virgin Islands by employers other than the Federal government, or \$380 per week if employed in American Samoa by employers other than the Federal government)], exclusive of board, lodging, or other facilities; or on a salary basis which is at least equal to the entrance salary for teachers in the educational establishment by which employed; and

(2) Whose primary duty is performing administrative functions directly related to academic instruction or training in an educational establishment or department or subdivision thereof.

(b) The term "educational establishment" means an elementary or secondary school system, an institution of higher education or other educational institution. Sections 3(v) and 3(w) of the Act define elementary and secondary schools as those day or residential schools that provide elementary or secondary education, as determined under State law. Under the laws of most States, such education includes the curriculums in grades 1 through 12; under many it includes also the introductory programs in kindergarten. Such education in some States may also include nursery school programs in elementary education and junior college curriculums in secondary education. The term "other educational establishment" includes special schools for mentally or physically disabled or gifted children, regardless of any classification of such schools as elementary, secondary or higher. Factors relevant in determining whether post-secondary career programs are educational institutions include whether the school is licensed by a state agency responsible for the state's educational system or accredited by a nationally recognized accrediting organization for career schools. Also, for purposes of the exemption, no distinction is drawn between public and private schools, or between those operated for profit and those that are not for profit.

(c) The phrase "performing administrative functions directly related to academic instruction or training" means work related to the academic operations and functions in a school rather than to administration along the lines of general business operations. Such academic administrative functions include operations directly in the field of education. Jobs relating to areas outside the educational field are not within the definition of academic administration.

(1) Employees engaged in academic administrative functions include: the superintendent or other head of an elementary or secondary school system, and any assistants, responsible for administration of such matters as curriculum, quality and methods of instructing, measuring and testing the learning potential and achievement of students, establishing and maintaining academic and grading standards, and other aspects of the teaching program; the principal and any vice-principals responsible for the operation of an elementary or secondary school; department heads in institutions of higher education responsible for the administration of the mathematics department, the English department, the foreign language department, etc.; academic counselors who perform work such as administering school testing programs, assisting students with academic problems and advising students concerning degree requirements; and other employees with similar responsibilities.

(2) Jobs relating to building management and maintenance, jobs relating to the health of the students, and academic staff such as social workers, psychologists, lunch room managers or dietitians do not perform academic administrative functions. Although such work is not considered academic admin-

istration, such employees may qualify for exemption under 541.200 or under other sections of this part, provided the requirements for such exemptions are met.

SUBPART D—PROFESSIONAL EMPLOYEES (§§ 541.300–541.304)

§ 541.300 General rule for professional employees.

(a) The term "employee employed in a bona fide professional capacity" in section 13(a)(1) of the Act shall mean any employee:

(1) Compensated on a salary or fee basis pursuant to § 541.600 at a rate of not less than \$684 per week [(or \$455 per week if employed in the Commonwealth of the Northern Mariana Islands, Guam, Puerto Rico, or the U.S. Virgin Islands by employers other than the Federal government, or \$380 per week if employed in American Samoa by employers other than the Federal government)], exclusive of board, lodging or other facilities; and

(2) Whose primary duty is the performance of work:

(i) Requiring knowledge of an advanced type in a field of science or learning customarily acquired by a prolonged course of specialized intellectual instruction; or

(ii) Requiring invention, imagination, originality or talent in a recognized field of artistic or creative endeavor.

(b) The term "salary basis" is defined at § 541.602; "fee basis" is defined at § 541.605; "board, lodging or other facilities" is defined at § 541.606; and "primary duty" is defined at § 541.700.

§§ 541.301 Learned professionals.

(a) To qualify for the learned professional exemption, an employee's primary duty must be the performance of work requiring advanced knowledge in a field of science or learning customarily acquired by a prolonged course of specialized intellectual instruction. This primary duty test includes three elements:

(1) The employee must perform work requiring advanced knowledge;

(2) The advanced knowledge must be in a field of science or learning; and

(3) The advanced knowledge must be customarily acquired by a prolonged course of specialized intellectual instruction.

(b) The phrase "work requiring advanced knowledge" means work which is predominantly intellectual in character, and which includes work requiring the consistent exercise of discretion and judgment, as distinguished from performance of routine mental, manual, mechanical or physical work. An employee who performs work requiring advanced knowledge generally uses the advanced knowledge to analyze, interpret or make deductions from varying facts or circumstances. Advanced knowledge cannot be attained at the high school level.

(c) The phrase "field of science or learning" includes the traditional professions of law, medicine, theology, accounting, actuarial computation, engineering, architecture, teaching, various types of physical, chemical and biological sciences, pharmacy and other similar occupations that have a recognized professional status as distinguished from the mechanical arts or skilled trades where in some instances the knowledge is of a fairly advanced type, but is not in a field of science or learning.

(d) The phrase "customarily acquired by a prolonged course of specialized intellectual instruction" restricts the exemption to professions where specialized academic training is a standard prerequisite for entrance into the profession. The best prima facie evidence that an employee meets this requirement is possession of the appropriate academic degree. However, the word "customarily" means that the exemption is also available

to employees in such professions who have substantially the same knowledge level and perform substantially the same work as the degreed employees, but who attained the advanced knowledge through a combination of work experience and intellectual instruction. Thus, for example, the learned professional exemption is available to the occasional lawyer who has not gone to law school, or the occasional chemist who is not the possessor of a degree in chemistry. However, the learned professional exemption is not available for occupations that customarily may be performed with only the general knowledge acquired by an academic degree in any field, with knowledge acquired through an apprenticeship, or with training in the performance of routine mental, manual, mechanical or physical processes. The learned professional exemption also does not apply to occupations in which most employees have acquired their skill by experience rather than by advanced specialized intellectual instruction.

(e)(1) *Registered or certified medical technologists.* Registered or certified medical technologists who have successfully completed three academic years of pre-professional study in an accredited college or university plus a fourth year of professional course work in a school of medical technology approved by the Council of Medical Education of the American Medical Association generally meet the duties requirements for the learned professional exemption.

(2) *Nurses.* Registered nurses who are registered by the appropriate State examining board generally meet the duties requirements for the learned professional exemption. Licensed practical nurses and other similar health care employees, however, generally do not qualify as exempt learned professionals because possession of a specialized advanced academic degree is not a standard prerequisite for entry into such occupations.

(3) *Dental hygienists.* Dental hygienists who have successfully completed four academic years of pre-professional and professional study in an accredited college or university approved by the Commission on Accreditation of Dental and Dental Auxiliary Educational Programs of the American Dental Association generally meet the duties requirements for the learned professional exemption.

(4) *Physician assistants.* Physician assistants who have successfully completed four academic years of pre-professional and professional study, including graduation from a physician assistant program accredited by the Accreditation Review Commission on Education for the Physician Assistant, and who are certified by the National Commission on Certification of Physician Assistants generally meet the duties requirements for the learned professional exemption.

(5) *Accountants.* Certified public accountants generally meet the duties requirements for the learned professional exemption. In addition, many other accountants who are not certified public accountants but perform similar job duties may qualify as exempt learned professionals. However, accounting clerks, bookkeepers and other employees who normally perform a great deal of routine work generally will not qualify as exempt professionals.

(6) *Chefs.* Chefs, such as executive chefs and sous chefs, who have attained a four-year specialized academic degree in a culinary arts program, generally meet the duties requirements for the learned professional exemption. The learned professional exemption is not available to cooks who perform predominantly routine mental, manual, mechanical or physical work.

(7) *Paralegals.* Paralegals and legal assistants generally do not qualify as exempt

learned professionals because an advanced specialized academic degree is not a standard prerequisite for entry into the field. Although many paralegals possess general four-year advanced degrees, most specialized paralegal programs are two-year associate degree programs from a community college or equivalent institution. However, the learned professional exemption is available for paralegals who possess advanced specialized degrees in other professional fields and apply advanced knowledge in that field in the performance of their duties. For example, if a law firm hires an engineer as a paralegal to provide expert advice on product liability cases or to assist on patent matters, that engineer would qualify for exemption.

(8) *Athletic trainers.* Athletic trainers who have successfully completed four academic years of pre-professional and professional study in a specialized curriculum accredited by the Commission on Accreditation of Allied Health Education Programs and who are certified by the Board of Certification of the National Athletic Trainers Association Board of Certification generally meet the duties requirements for the learned professional exemption.

(9) *Funeral directors or embalmers.* Licensed funeral directors and embalmers who are licensed by and working in a state that requires successful completion of four academic years of pre-professional and professional study, including graduation from a college of mortuary science accredited by the American Board of Funeral Service Education, generally meet the duties requirements for the learned professional exemption.]

(f) The areas in which the professional exemption may be available are expanding. As knowledge is developed, academic training is broadened and specialized degrees are offered in new and diverse fields, thus creating new specialists in particular fields of science or learning. When an advanced specialized degree has become a standard requirement for a particular occupation, that occupation may have acquired the characteristics of a learned profession. Accrediting and certifying organizations similar to those listed in paragraphs (e)(1), (e)(3), (e)(4) and (e)(8) of this section also may be created in the future. Such organizations may develop similar specialized curriculums and certification programs which, if a standard requirement for a particular occupation, may indicate that the occupation has acquired the characteristics of a learned profession.

§ 541.302 Creative professionals.

(a) To qualify for the creative professional exemption, an employee's primary duty must be the performance of work requiring invention, imagination, originality or talent in a recognized field of artistic or creative endeavor as opposed to routine mental, manual, mechanical or physical work. The exemption does not apply to work which can be produced by a person with general manual or intellectual ability and training.

(b) To qualify for exemption as a creative professional, the work performed must be "in a recognized field of artistic or creative endeavor." This includes such fields as music, writing, acting and the graphic arts.

(c) The requirement of "invention, imagination, originality or talent" distinguishes the creative professions from work that primarily depends on intelligence, diligence and accuracy. The duties of employees vary widely, and exemption as a creative professional depends on the extent of the invention, imagination, originality or talent exercised by the employee. Determination of exempt creative professional status, therefore, must be made on a case-by-case basis. This requirement generally is met by actors, mu-

sicians, composers, conductors, and soloists; painters who at most are given the subject matter of their painting; cartoonists who are merely told the title or underlying concept of a cartoon and must rely on their own creative ability to express the concept; essayists, novelists, short-story writers and screen-play writers who choose their own subjects and hand in a finished piece of work to their employers (the majority of such persons are, of course, not employees but self-employed); and persons holding the more responsible writing positions in advertising agencies. This requirement generally is not met by a person who is employed as a copyist, as an "animator" of motion-picture cartoons, or as a retoucher of photographs, since such work is not properly described as creative in character.

(d) Journalists may satisfy the duties requirements for the creative professional exemption if their primary duty is work requiring invention, imagination, originality or talent, as opposed to work which depends primarily on intelligence, diligence and accuracy. Employees of newspapers, magazines, television and other media are not exempt creative professionals if they only collect, organize and record information that is routine or already public, or if they do not contribute a unique interpretation or analysis to a news product. Thus, for example, newspaper reporters who merely rewrite press releases or who write standard recounts of public information by gathering facts on routine community events are not exempt creative professionals. Reporters also do not qualify as exempt creative professionals if their work product is subject to substantial control by the employer. However, journalists may qualify as exempt creative professionals if their primary duty is performing on the air in radio, television or other electronic media; conducting investigative interviews; analyzing or interpreting public events; writing editorials, opinion columns or other commentary; or acting as a narrator or commentator.

§ 541.303 Teachers.

(a) The term "employee employed in a bona fide professional capacity" in section 13(a)(1) of the Act also means any employee with a primary duty of teaching, tutoring, instructing or lecturing in the activity of imparting knowledge and who is employed and engaged in this activity as a teacher in an educational establishment by which the employee is employed. The term "educational establishment" is defined in § 541.204(b).

(b) Exempt teachers include, but are not limited to: Regular academic teachers; teachers of kindergarten or nursery school pupils; teachers of gifted or disabled children; teachers of skilled and semi-skilled trades and occupations; teachers engaged in automobile driving instruction; aircraft flight instructors; home economics teachers; and vocal or instrumental music instructors. Those faculty members who are engaged as teachers but also spend a considerable amount of their time in extracurricular activities such as coaching athletic teams or acting as moderators or advisors in such areas as drama, speech, debate or journalism are engaged in teaching. Such activities are a recognized part of the schools' responsibility in contributing to the educational development of the student.

(c) The possession of an elementary or secondary teacher's certificate provides a clear means of identifying the individuals contemplated as being within the scope of the exemption for teaching professionals. Teachers who possess a teaching certificate qualify for the exemption regardless of the terminology (e.g., permanent, conditional, standard, provisional, temporary, emergency, or

unlimited) used by the State to refer to different kinds of certificates. However, private schools and public schools are not uniform in requiring a certificate for employment as an elementary or secondary school teacher, and a teacher's certificate is not generally necessary for employment in institutions of higher education or other educational establishments. Therefore, a teacher who is not certified may be considered for exemption, provided that such individual is employed as a teacher by the employing school or school system.

(d) The requirements of §541.300 and Subpart G (salary requirements) of this part do not apply to the teaching professionals described in this section.

§541.304 Practice of law or medicine.

(a) The term "employee employed in a bona fide professional capacity" in section 13(a)(1) of the Act also shall mean:

(1) Any employee who is the holder of a valid license or certificate permitting the practice of law or medicine or any of their branches and is actually engaged in the practice thereof; and

(2) Any employee who is the holder of the requisite academic degree for the general practice of medicine and is engaged in an internship or resident program pursuant to the practice of the profession.

(b) In the case of medicine, the exemption applies to physicians and other practitioners licensed and practicing in the field of medical science and healing or any of the medical specialties practiced by physicians or practitioners. The term "physicians" includes medical doctors including general practitioners and specialists, osteopathic physicians (doctors of osteopathy), podiatrists, dentists (doctors of dental medicine), and optometrists (doctors of optometry or bachelors of science in optometry).

(c) Employees engaged in internship or resident programs, whether or not licensed to practice prior to commencement of the program, qualify as exempt professionals if they enter such internship or resident programs after the earning of the appropriate degree required for the general practice of their profession.

(d) The requirements of §541.300 and subpart G (salary requirements) of this part do not apply to the employees described in this section.

SUBPART E—COMPUTER EMPLOYEES (§§ 541.400–541.402)

§541.400 General rule for computer employees.

(a) Computer systems analysts, computer programmers, software engineers or other similarly skilled workers in the computer field are eligible for exemption as professionals under section 13(a)(1) of the Act and under section 13(a)(17) of the Act. Because job titles vary widely and change quickly in the computer industry, job titles are not determinative of the applicability of this exemption.

(b) The section 13(a)(1) exemption applies to any computer employee who is compensated on a salary or fee basis at a rate of not less than \$684 per week [or \$455 per week if employed in the Commonwealth of the Northern Mariana Islands, Guam, Puerto Rico, or the U.S. Virgin Islands by employers other than the Federal government, or \$380 per week if employed in American Samoa by employers other than the Federal government], exclusive of board, lodging, or other facilities.

The section 13(a)(17) exemption applies to any computer employee compensated on an hourly basis at a rate of not less than \$27.63 an hour. In addition, under either section 13(a)(1) or section 13(a)(17) of the Act, the ex-

emptions apply only to computer employees whose primary duty consists of:

(1) The application of systems analysis techniques and procedures, including consulting with users, to determine hardware, software or system functional specifications;

(2) The design, development, documentation, analysis, creation, testing or modification of computer systems or programs, including prototypes, based on and related to user or system design specifications;

(3) The design, documentation, testing, creation or modification of computer programs related to machine operating systems; or

(4) A combination of the aforementioned duties, the performance of which requires the same level of skills.

(c) The term "salary basis" is defined at §541.602; "fee basis" is defined at §541.605; "board, lodging or other facilities" is defined at §541.606; and "primary duty" is defined at §541.700.

§541.401 Computer manufacture and repair.

The exemption for employees in computer occupations does not include employees engaged in the manufacture or repair of computer hardware and related equipment. Employees whose work is highly dependent upon, or facilitated by, the use of computers and computer software programs (e.g., engineers, drafters and others skilled in computer-aided design software), but who are not primarily engaged in computer systems analysis and programming or other similarly skilled computer-related occupations identified in §541.400(b), are also not exempt computer professionals.

§541.402 Executive and administrative computer employees.

Computer employees within the scope of this exemption, as well as those employees not within its scope, may also have executive and administrative duties which qualify the employees for exemption under subpart B or subpart C of this part. For example, systems analysts and computer programmers generally meet the duties requirements for the administrative exemption if their primary duty includes work such as planning, scheduling, and coordinating activities required to develop systems to solve complex business, scientific or engineering problems of the employer or the employer's customers<<, constituents or stakeholders>>. Similarly, a senior or lead computer programmer who manages the work of two or more other programmers in a customarily recognized department or subdivision of the employer, and whose recommendations as to the hiring, firing, advancement, promotion or other change of status of the other programmers are given particular weight, generally meets the duties requirements for the executive exemption.

<<SUBPART F—Reserved>>[SUBPART F—OUTSIDE SALES EMPLOYEES (§§ 541.500–541.504)]

§541.500 General rule for outside sales employees.

(a) The term "employee employed in the capacity of outside salesman" in section 13(a)(1) of the Act shall mean any employee:

(1) Whose primary duty is:

(i) making sales within the meaning of section 3(k) of the Act, or

(ii) obtaining orders or contracts for services or for the use of facilities for which a consideration will be paid by the client or customer; and

(2) Who is customarily and regularly engaged away from the employer's place or places of business in performing such primary duty.

(b) The term "primary duty" is defined at §541.700. In determining the primary duty of

an outside sales employee, work performed incidental to and in conjunction with the employee's own outside sales or solicitations, including incidental deliveries and collections, shall be regarded as exempt outside sales work. Other work that furthers the employee's sales efforts also shall be regarded as exempt work including, for example, writing sales reports, updating or revising the employee's sales or display catalogue, planning itineraries and attending sales conferences.

(c) The requirements of subpart G (salary requirements) of this part do not apply to the outside sales employees described in this section.

§541.501 Making sales or obtaining orders.

(a) Section 541.500 requires that the employee be engaged in:

(1) Making sales within the meaning of section 3(k) of the Act, or

(2) Obtaining orders or contracts for services or for the use of facilities.

(b) Sales within the meaning of section 3(k) of the Act include the transfer of title to tangible property, and in certain cases, of tangible and valuable evidences of intangible property. Section 3(k) of the Act states that "sale" or "sell" includes any sale, exchange, contract to sell, consignment for sale, shipment for sale, or other disposition.

(c) Exempt outside sales work includes not only the sales of commodities, but also "obtaining orders or contracts for services or for the use of facilities for which a consideration will be paid by the client or customer." Obtaining orders for "the use of facilities" includes the selling of time on radio or television, the solicitation of advertising for newspapers and other periodicals, and the solicitation of freight for railroads and other transportation agencies.

(d) The word "services" extends the outside sales exemption to employees who sell or take orders for a service, which may be performed for the customer by someone other than the person taking the order.

§541.502 Away from employer's place of business.

An outside sales employee must be customarily and regularly engaged "away from the employer's place or places of business." The outside sales employee is an employee who makes sales at the customer's place of business or, if selling door-to-door, at the customer's home. Outside sales does not include sales made by mail, telephone or the Internet unless such contact is used merely as an adjunct to personal calls. Thus, any fixed site, whether home or office, used by a salesperson as a headquarters or for telephonic solicitation of sales is considered one of the employer's places of business, even though the employer is not in any formal sense the owner or tenant of the property. However, an outside sales employee does not lose the exemption by displaying samples in hotel sample rooms during trips from city to city; these sample rooms should not be considered as the employer's places of business. Similarly, an outside sales employee does not lose the exemption by displaying the employer's products at a trade show. If selling actually occurs, rather than just sales promotion, trade shows of short duration (i.e., one or two weeks) should not be considered as the employer's place of business.

§541.503 Promotion work.

(a) Promotion work is one type of activity often performed by persons who make sales, which may or may not be exempt outside sales work, depending upon the circumstances under which it is performed. Promotional work that is actually performed incidental to and in conjunction with an employee's own outside sales or solicitations is

exempt work. On the other hand, promotional work that is incidental to sales made, or to be made, by someone else is not exempt outside sales work. An employee who does not satisfy the requirements of this subpart may still qualify as an exempt employee under other subparts of this rule.

(b) A manufacturer's representative, for example, may perform various types of promotional activities such as putting up displays and posters, removing damaged or spoiled stock from the merchant's shelves or rearranging the merchandise. Such an employee can be considered an exempt outside sales employee if the employee's primary duty is making sales or contracts. Promotional activities directed toward consummation of the employee's own sales are exempt. Promotional activities designed to stimulate sales that will be made by someone else are not exempt outside sales work.

(c) Another example is a company representative who visits chain stores, arranges the merchandise on shelves, replenishes stock by replacing old with new merchandise, sets up displays and consults with the store manager when inventory runs low, but does not obtain a commitment for additional purchases. The arrangement of merchandise on the shelves or the replenishing of stock is not exempt work unless it is incidental to and in conjunction with the employee's own outside sales. Because the employee in this instance does not consummate the sale nor direct efforts toward the consummation of a sale, the work is not exempt outside sales work.

§ 541.504 Drivers who sell.

(a) Drivers who deliver products and also sell such products may qualify as exempt outside sales employees only if the employee has a primary duty of making sales. In determining the primary duty of drivers who sell, work performed incidental to and in conjunction with the employee's own outside sales or solicitations, including loading, driving or delivering products, shall be regarded as exempt outside sales work.

(b) Several factors should be considered in determining if a driver has a primary duty of making sales, including, but not limited to: a comparison of the driver's duties with those of other employees engaged as truck drivers and as salespersons; possession of a selling or solicitor's license when such license is required by law or ordinances; presence or absence of customary or contractual arrangements concerning amounts of products to be delivered; description of the employee's occupation in collective bargaining agreements; the employer's specifications as to qualifications for hiring; sales training; attendance at sales conferences; method of payment; and proportion of earnings directly attributable to sales.

(c) Drivers who may qualify as exempt outside sales employees include:

(1) A driver who provides the only sales contact between the employer and the customers visited, who calls on customers and takes orders for products, who delivers products from stock in the employee's vehicle or procures and delivers the product to the customer on a later trip, and who receives compensation commensurate with the volume of products sold.

(2) A driver who obtains or solicits orders for the employer's products from persons who have authority to commit the customer for purchases.

(3) A driver who calls on new prospects for customers along the employee's route and attempts to convince them of the desirability of accepting regular delivery of goods.

(4) A driver who calls on established customers along the route and persuades reg-

ular customers to accept delivery of increased amounts of goods or of new products, even though the initial sale or agreement for delivery was made by someone else.

(d) Drivers who generally would not qualify as exempt outside sales employees include:

(1) A route driver whose primary duty is to transport products sold by the employer through vending machines and to keep such machines stocked, in good operating condition, and in good locations.

(2) A driver who often calls on established customers day after day or week after week, delivering a quantity of the employer's products at each call when the sale was not significantly affected by solicitations of the customer by the delivering driver or the amount of the sale is determined by the volume of the customer's sales since the previous delivery.

(3) A driver primarily engaged in making deliveries to customers and performing activities intended to promote sales by customers (including placing point-of-sale and other advertising materials, price stamping commodities, arranging merchandise on shelves, in coolers or in cabinets, rotating stock according to date, and cleaning and otherwise servicing display cases), unless such work is in furtherance of the driver's own sales efforts.]

SUBPART G—SALARY REQUIREMENTS (§§ 541.600–541.607)

§ 541.600 Amount of salary required.

(a) To qualify as an exempt executive, administrative or professional employee under section 13(a)(1) of the Act, an employee must be compensated on a salary basis at a rate of not less than \$684 per week [(or \$455 per week if employed in the Commonwealth of the Northern Mariana Islands, Guam, Puerto Rico, or the U.S. Virgin Islands by employers other than the Federal Government, or \$380 per week if employed in American Samoa by employers other than the Federal Government)], exclusive of board, lodging or other facilities. Administrative and professional employees may also be paid on a fee basis, as defined in § 541.605.

(b) The required amount of compensation per week may be translated into equivalent amounts for periods longer than one week. For example, the \$684-per-week requirement will be met if the employee is compensated biweekly on a salary basis of not less than \$1,368, semimonthly on a salary basis of not less than \$1,482, or monthly on a salary basis of not less than \$2,964. However, the shortest period of payment that will meet this compensation requirement is one week.

(c) In the case of academic administrative employees, the compensation requirement also may be met by compensation on a salary basis at a rate at least equal to the entrance salary for teachers in the educational establishment by which the employee is employed, as provided in § 541.204(a)(1).

(d) In the case of computer employees, the compensation requirement also may be met by compensation on an hourly basis at a rate not less than \$27.63 an hour, as provided in § 541.400(b).

(e) In the case of professional employees, the compensation requirements in this section shall not apply to employees engaged as teachers (see § 541.303); employees who hold a valid license or certificate permitting the practice of law or medicine or any of their branches and are actually engaged in the practice thereof (see § 541.304); or to employees who hold the requisite academic degree for the general practice of medicine and are engaged in an internship or resident program pursuant to the practice of the profession (see § 541.304). In the case of medical occupations, the exception from the salary or fee

requirement does not apply to pharmacists, nurses, therapists, technologists, sanitarians, dietitians, social workers, psychologists, psychometrists, or other professions which service the medical profession.

§ 541.601 Highly compensated employees.

(a)(1) Beginning on [January 1, 2020]<<the effective date of these Substantive Regulations>>, an employee with total annual compensation of at least \$107,432 is deemed exempt under section 13(a)(1) of the Act if the employee customarily and regularly performs any one or more of the exempt duties or responsibilities of an executive, administrative or professional employee as identified in subparts B, C or D of this part.

(2) Where the annual period covers periods both prior to and after [January 1, 2020]<<the effective date of these Substantive Regulations>>, the amount of total annual compensation due will be determined on a proportional basis.

(b)(1) "Total annual compensation" must include at least \$684 per week paid on a salary or fee basis as set forth in §§ 541.602 and 541.605, except that 541.602(a)(3) shall not apply to highly compensated employees. Total annual compensation may also include commissions, nondiscretionary bonuses and other nondiscretionary compensation earned during a 52-week period. Total annual compensation does not include board, lodging and other facilities as defined in § 541.606, and does not include payments for medical insurance, payments for life insurance, contributions to retirement plans and the cost of other fringe benefits.

(2) If an employee's total annual compensation does not total at least the amount specified in the applicable subsection of paragraph (a) by the last pay period of the 52-week period, the employer may, during the last pay period or within one month after the end of the 52-week period, make one final payment sufficient to achieve the required level. For example, for a 52-week period [beginning January 1, 2020], an employee may earn \$90,000 in base salary, and the employer may anticipate [based upon past sales] that the employee also will earn \$17,432 in [commissions]<<other payments>>. However, [due to poor sales] in the final quarter of the year, the employee actually only earns \$12,000 in [commissions]<<other payments>>. In this situation, the employer may within one month after the end of the year make a payment of at least \$5,432 to the employee. Any such final payment made after the end of the 52-week period may count only toward the prior year's total annual compensation and not toward the total annual compensation in the year it was paid. If the employer fails to make such a payment, the employee does not qualify as a highly compensated employee, but may still qualify as exempt under subparts B, C, or D of this part.

(3) An employee who does not work a full year for the employer, either because the employee is newly hired after the beginning of the year or ends the employment before the end of the year, may qualify for exemption under this section if the employee receives a pro rata portion of the minimum amount established in paragraph (a) of this section, based upon the number of weeks that the employee will be or has been employed. An employer may make one final payment as under paragraph (b)(2) of this section within one month after the end of employment.

(4) The employer may utilize any 52-week period as the year, such as a calendar year, a fiscal year, or an anniversary of hire year. If the employer does not identify some other year period in advance, the calendar year will apply.

(c) A high level of compensation is a strong indicator of an employee's exempt status, thus eliminating the need for a detailed analysis of the employee's job duties. Thus, a highly compensated employee will qualify for exemption if the employee customarily and regularly performs any one or more of the exempt duties or responsibilities of an executive, administrative or professional employee identified in subparts B, C or D of this part. An employee may qualify as a highly compensated executive employee, for example, if the employee customarily and regularly directs the work of two or more other employees, even though the employee does not meet all of the other requirements for the executive exemption under §541.100.

(d) This section applies only to employees whose primary duty includes performing office or non-manual work. Thus, for example, non-management production-line workers and non-management employees in maintenance, construction and similar occupations such as carpenters, electricians, mechanics, plumbers, iron workers, craftsmen, operating engineers, longshoremen, construction workers, laborers and other employees who perform work involving repetitive operations with their hands, physical skill and energy are not exempt under this section no matter how highly paid they might be.

§ 541.602 Salary basis.

(a) General rule. An employee will be considered to be paid on a "salary basis" within the meaning of this part if the employee regularly receives each pay period on a weekly, or less frequent basis, a predetermined amount constituting all or part of the employee's compensation, which amount is not subject to reduction because of variations in the quality or quantity of the work performed.

(1) Subject to the exceptions provided in paragraph (b) of this section, an exempt employee must receive the full salary for any week in which the employee performs any work without regard to the number of days or hours worked. Exempt employees need not be paid for any workweek in which they perform no work.

(2) An employee is not paid on a salary basis if deductions from the employee's predetermined compensation are made for absences occasioned by the employer or by the operating requirements of the [business] <<employing office>>. If the employee is ready, willing and able to work, deductions may not be made for time when work is not available.

(3) Up to ten percent of the salary amount required by §541.600(a) may be satisfied by the payment of nondiscretionary bonuses, incentives and commissions, that are paid annually or more frequently. The employer may utilize any 52-week period as the year, such as a calendar year, a fiscal year, or an anniversary of hire year. If the employer does not identify some other year period in advance, the calendar year will apply. This provision does not apply to highly compensated employees under §541.601.

(i) If by the last pay period of the 52-week period the sum of the employee's weekly salary plus nondiscretionary bonus, incentive, and commission payments received is less than 52 times the weekly salary amount required by §541.600(a), the employer may make one final payment sufficient to achieve the required level no later than the next pay period after the end of the year. Any such final payment made after the end of the 52-week period may count only toward the prior year's salary amount and not toward the salary amount in the year it was paid.

(ii) An employee who does not work a full 52-week period for the employer, either because the employee is newly hired after the

beginning of this period or ends the employment before the end of this period, may qualify for exemption if the employee receives a pro rata portion of the minimum amount established in paragraph (a)(3) of this section, based upon the number of weeks that the employee will be or has been employed. An employer may make one final payment as under paragraph (a)(3)(i) of this section within one pay period after the end of employment.

(b) Exceptions. The prohibition against deductions from pay in the salary basis requirement is subject to the following exceptions:

(1) Deductions from pay may be made when an exempt employee is absent from work for one or more full days for personal reasons, other than sickness or disability. Thus, if an employee is absent for two full days to handle personal affairs, the employee's salaried status will not be affected if deductions are made from the salary for two full-day absences. However, if an exempt employee is absent for one and a half days for personal reasons, the employer can deduct only for the one full-day absence.

(2) Deductions from pay may be made for absences of one or more full days occasioned by sickness or disability (including work-related accidents) if the deduction is made in accordance with a bona fide plan, policy or practice of providing compensation for loss of salary occasioned by such sickness or disability. The employer is not required to pay any portion of the employee's salary for full-day absences for which the employee receives compensation under the plan, policy or practice. Deductions for such full-day absences also may be made before the employee has qualified under the plan, policy or practice, and after the employee has exhausted the leave allowance thereunder. Thus, for example, if an employer maintains a short-term disability insurance plan providing salary replacement for 12 weeks starting on the fourth day of absence, the employer may make deductions from pay for the three days of absence before the employee qualifies for benefits under the plan; for the twelve weeks in which the employee receives salary replacement benefits under the plan; and for absences after the employee has exhausted the 12 weeks of salary replacement benefits. [Similarly, an employer may make deductions from pay for absences of one or more full days if salary replacement benefits are provided under a State disability insurance law or under a State workers' compensation law.]

(3) While an employer cannot make deductions from pay for absences of an exempt employee occasioned by jury duty, attendance as a witness or temporary military leave, the employer can offset any amounts received by an employee as jury fees, witness fees or military pay for a particular week against the salary due for that particular week without loss of the exemption.

(4) Deductions from pay of exempt employees may be made for penalties imposed in good faith for infractions of safety rules of major significance. Safety rules of major significance include those relating to the prevention of serious danger in the workplace or to other employees, such as rules prohibiting smoking in explosive plants, oil refineries and coal mines.

(5) Deductions from pay of exempt employees may be made for unpaid disciplinary suspensions of one or more full days imposed in good faith for infractions of workplace conduct rules. Such suspensions must be imposed pursuant to a written policy applicable to all employees. Thus, for example, an employer may suspend an exempt employee without pay for three days for violating a generally applicable written policy prohib-

iting sexual harassment. Similarly, an employer may suspend an exempt employee without pay for twelve days for violating a generally applicable written policy prohibiting workplace violence.

(6) An employer is not required to pay the full salary in the initial or terminal week of employment. Rather, an employer may pay a proportionate part of an employee's full salary for the time actually worked in the first and last week of employment. In such weeks, the payment of an hourly or daily equivalent of the employee's full salary for the time actually worked will meet the requirement. However, employees are not paid on a salary basis within the meaning of these regulations if they are employed occasionally for a few days, and the employer pays them a proportionate part of the weekly salary when so employed.

(7) An employer is not required to pay the full salary for weeks in which an exempt employee takes unpaid leave under the Family and Medical Leave Act. Rather, when an exempt employee takes unpaid leave under the Family and Medical Leave Act, an employer may pay a proportionate part of the full salary for time actually worked. For example, if an employee who normally works 40 hours per week uses four hours of unpaid leave under the Family and Medical Leave Act, the employer could deduct 10 percent of the employee's normal salary that week.

(c) When calculating the amount of a deduction from pay allowed under paragraph (b) of this section, the employer may use the hourly or daily equivalent of the employee's full weekly salary or any other amount proportional to the time actually missed by the employee. A deduction from pay as a penalty for violations of major safety rules under paragraph (b)(4) of this section may be made in any amount.

§ 541.603 Effect of improper deductions from salary.

(a) An employer who makes improper deductions from salary shall lose the exemption if the facts demonstrate that the employer did not intend to pay employees on a salary basis. An actual practice of making improper deductions demonstrates that the employer did not intend to pay employees on a salary basis. The factors to consider when determining whether an employer has an actual practice of making improper deductions include, but are not limited to: the number of improper deductions, particularly as compared to the number of employee infractions warranting discipline; the time period during which the employer made improper deductions; the number and geographic location of employees whose salary was improperly reduced; the number and geographic location of managers responsible for taking the improper deductions; and whether the employer has a clearly communicated policy permitting or prohibiting improper deductions.

(b) If the facts demonstrate that the employer has an actual practice of making improper deductions, the exemption is lost during the time period in which the improper deductions were made for employees in the same job classification working for the same managers responsible for the actual improper deductions. Employees in different job classifications or who work for different managers do not lose their status as exempt employees. Thus, for example, if a manager [at a company facility] routinely docks the pay of engineers at that facility for partial-day personal absences, then all engineers at that facility whose pay could have been improperly docked by the manager would lose the exemption; engineers at other facilities or working for other managers, however, would remain exempt.

(c) Improper deductions that are either isolated or inadvertent will not result in loss of

the exemption for any employees subject to such improper deductions, if the employer reimburses the employees for such improper deductions.

(d) If an employer has a clearly communicated policy that prohibits the improper pay deductions specified in § 541.602(a) and includes a complaint mechanism, reimburses employees for any improper deductions and makes a good faith commitment to comply in the future, such employer will not lose the exemption for any employees unless the employer willfully violates the policy by continuing to make improper deductions after receiving employee complaints. If an employer fails to reimburse employees for any improper deductions or continues to make improper deductions after receiving employee complaints, the exemption is lost during the time period in which the improper deductions were made for employees in the same job classification working for the same managers responsible for the actual improper deductions. The best evidence of a clearly communicated policy is a written policy that was distributed to employees prior to the improper pay deductions by, for example, providing a copy of the policy to employees at the time of hire, publishing the policy in an employee handbook or publishing the policy on the employer's Intranet.

(e) This section shall not be construed in an unduly technical manner so as to defeat the exemption.

§ 541.604 Minimum guarantee plus extras.

(a) An employer may provide an exempt employee with additional compensation without losing the exemption or violating the salary basis requirement, if the employment arrangement also includes a guarantee of at least the minimum weekly-required amount paid on a salary basis. Thus, for example, an exempt employee guaranteed at least \$684 each week paid on a salary basis may also receive additional compensation of a one percent commission on sales. An exempt employee also may receive a percentage of the sales or profits of the employer if the employment arrangement also includes a guarantee of at least \$684 each week paid on a salary basis. Similarly, the exemption is not lost if an exempt employee who is guaranteed at least \$684 each week paid on a salary basis also receives additional compensation based on hours worked for work beyond the normal workweek. Such additional compensation may be paid on any basis (e.g., flat sum, bonus payment, straight-time hourly amount, time and one-half or any other basis), and may include paid time off.

(b) An exempt employee's earnings may be computed on an hourly, a daily or a shift basis, without losing the exemption or violating the salary basis requirement, if the employment arrangement also includes a guarantee of at least the minimum weekly required amount paid on a salary basis regardless of the number of hours, days or shifts worked, and a reasonable relationship exists between the guaranteed amount and the amount actually earned. The reasonable relationship test will be met if the weekly guarantee is roughly equivalent to the employee's usual earnings at the assigned hourly, daily or shift rate for the employee's normal scheduled workweek. Thus, for example, an exempt employee guaranteed compensation of at least \$725 for any week in which the employee performs any work, and who normally works four or five shifts each week, may be paid \$210 per shift without violating the \$684-per-week salary basis requirement. The reasonable relationship requirement applies only if the employee's pay is computed on an hourly, daily or shift basis. It does not apply, for example, to an exempt store man-

ager paid a guaranteed salary per week that exceeds the current salary level who also receives a commission of one-half percent of all sales in the store or five percent of the store's profits, which in some weeks may total as much as, or even more than, the guaranteed salary.

§ 541.605 Fee basis.

(a) Administrative and professional employees may be paid on a fee basis, rather than on a salary basis. An employee will be considered to be paid on a "fee basis" within the meaning of these regulations if the employee is paid an agreed sum for a single job regardless of the time required for its completion. These payments resemble piecework payments with the important distinction that generally a "fee" is paid for the kind of job that is unique rather than for a series of jobs repeated an indefinite number of times and for which payment on an identical basis is made over and over again. Payments based on the number of hours or days worked and not on the accomplishment of a given single task are not considered payments on a fee basis.

(b) To determine whether the fee payment meets the minimum amount of salary required for exemption under these regulations, the amount paid to the employee will be tested by determining the time worked on the job and whether the fee payment is at a rate that would amount to at least the minimum salary per week, as required by §§ 541.600(a) and 541.602(a), if the employee worked 40 hours. Thus, an artist paid \$350 for a picture that took 20 hours to complete meets the \$684 minimum salary requirement for exemption since earnings at this rate would yield the artist \$700 if 40 hours were worked.

§ 541.606 Board, lodging or other facilities.

(a) To qualify for exemption under section 13(a)(1) of the Act, an employee must earn the minimum salary amount set forth in § 541.600, "exclusive of board, lodging or other facilities." The phrase "exclusive of board, lodging or other facilities" means "free and clear" or independent of any claimed credit for non-cash items of value that an employer may provide to an employee. Thus, the costs incurred by an employer to provide an employee with board, lodging or other facilities may not count towards the minimum salary amount required for exemption under this part 541. Such separate transactions are not prohibited between employers and their exempt employees, but the costs to employers associated with such transactions may not be considered when determining if an employee has received the full required minimum salary payment.

(b) Regulations defining what constitutes "board, lodging, or other facilities" are contained in 29 CFR part 531. As described in 29 CFR 531.32, the term "other facilities" refers to items similar to board and lodging, such as meals furnished at company restaurants or cafeterias or by hospitals, hotels, or restaurants to their employees; meals, dormitory rooms, and tuition furnished by a college to its student employees; merchandise furnished at company stores or commissaries, including articles of food, clothing, and household effects; housing furnished for dwelling purposes; and transportation furnished to employees for ordinary commuting between their homes and work.

[§ 541.607] [Reserved by 85 FR 34970 Effective: June 8, 2020] <<541.607—Reserved.>>

SUBPART H—DEFINITIONS AND MISCELLANEOUS PROVISIONS (§§ 541.700–541.710)

§ 541.700 Primary duty.

(a) To qualify for exemption under this part, an employee's "primary duty" must be

the performance of exempt work. The term "primary duty" means the principal, main, major or most important duty that the employee performs. Determination of an employee's primary duty must be based on all the facts in a particular case, with the major emphasis on the character of the employee's job as a whole. Factors to consider when determining the primary duty of an employee include, but are not limited to, the relative importance of the exempt duties as compared with other types of duties; the amount of time spent performing exempt work; the employee's relative freedom from direct supervision; and the relationship between the employee's salary and the wages paid to other employees for the kind of nonexempt work performed by the employee.

(b) The amount of time spent performing exempt work can be a useful guide in determining whether exempt work is the primary duty of an employee. Thus, employees who spend more than 50 percent of their time performing exempt work will generally satisfy the primary duty requirement. Time alone, however, is not the sole test, and nothing in this section requires that exempt employees spend more than 50 percent of their time performing exempt work. Employees who do not spend more than 50 percent of their time performing exempt duties may nonetheless meet the primary duty requirement if the other factors support such a conclusion.

(c) Thus, for example, assistant managers in a retail establishment who perform exempt executive work such as supervising and directing the work of other employees, ordering merchandise, managing the budget and authorizing payment of bills may have management as their primary duty even if the assistant managers spend more than 50 percent of the time performing nonexempt work such as running the cash register. However, if such assistant managers are closely supervised and earn little more than the nonexempt employees, the assistant managers generally would not satisfy the primary duty requirement.

§ 541.701 Customarily and regularly.

The phrase "customarily and regularly" means a frequency that must be greater than occasional but which, of course, may be less than constant. Tasks or work performed "customarily and regularly" includes work normally and recurrently performed every workweek; it does not include isolated or one-time tasks.

§ 541.702 Exempt and nonexempt work.

The term "exempt work" means all work described in §§ 541.100, 541.101, 541.200, 541.300, 541.301, 541.302, 541.303, 541.304, <<and>> 541.400 [and 541.500], and the activities directly and closely related to such work. All other work is considered "nonexempt."

§ 541.703 Directly and closely related.

(a) Work that is "directly and closely related" to the performance of exempt work is also considered exempt work. The phrase "directly and closely related" means tasks that are related to exempt duties and that contribute to or facilitate performance of exempt work. Thus, "directly and closely related" work may include physical tasks and menial tasks that arise out of exempt duties, and the routine work without which the exempt employee's exempt work cannot be performed properly. Work "directly and closely related" to the performance of exempt duties may also include recordkeeping; monitoring and adjusting machinery; taking notes; using the computer to create documents or presentations; opening the mail for the purpose of reading it and making decisions; and using a photocopier or fax machine. Work is not "directly and closely related" if the work is remotely related or completely unrelated to exempt duties.

(b) The following examples further illustrate the type of work that is and is not normally considered as directly and closely related to exempt work:

(1) Keeping time, production or sales records for subordinates is work directly and closely related to an exempt executive's function of managing a department and supervising employees.

(2) The distribution of materials, merchandise or supplies to maintain control of the flow of and expenditures for such items is directly and closely related to the performance of exempt duties.

(3) A supervisor who spot checks and examines the work of subordinates to determine whether they are performing their duties properly, and whether the product is satisfactory, is performing work which is directly and closely related to managerial and supervisory functions, so long as the checking is distinguishable from the work ordinarily performed by a nonexempt inspector.

(4) A supervisor who sets up a machine may be engaged in exempt work, depending upon the nature of the industry and the operation. In some cases the setup work, or adjustment of the machine for a particular job, is typically performed by the same employees who operate the machine. Such setup work is part of the production operation and is not exempt. In other cases, the setting up of the work is a highly skilled operation which the ordinary production worker or machine tender typically does not perform. In large plants, non-supervisors may perform such work. However, particularly in small plants, such work may be a regular duty of the executive and is directly and closely related to the executive's responsibility for the work performance of subordinates and for the adequacy of the final product. Under such circumstances, it is exempt work.

(5) A department manager in a retail or service establishment who walks about the sales floor observing the work of sales personnel under the employee's supervision to determine the effectiveness of their sales techniques, checks on the quality of customer service being given, or observes customer preferences is performing work which is directly and closely related to managerial and supervisory functions.

(6) A business consultant may take extensive notes recording the flow of work and materials through the office or plant of the client; after returning to the office of the employer, the consultant may personally use the computer to type a report and create a proposed table of organization. Standing alone, or separated from the primary duty, such note-taking and typing would be routine in nature. However, because this work is necessary for analyzing the data and making recommendations, the work is directly and closely related to exempt work. While it is possible to assign note-taking and typing to nonexempt employees, and in fact it is frequently the practice to do so, delegating such routine tasks is not required as a condition of exemption.

(7) A [credit] manager who makes and administers the [credit]<<budget>> policy of the [employer]<<employing office>>, establishes [credit]<<spending>> limits for [customers]<<the employing office>>, <<and>> authorizes [the shipment of orders on credit, and makes decisions on whether to exceed credit limits]<<expenditures>> would be performing work exempt under §541.200. Work that is directly and closely related to these exempt duties may include checking the status of accounts to determine whether the credit limit would be exceeded by the shipment of a new order, removing credit reports from the files for analysis, and writing letters giving credit data and experience to other employers or credit agencies.

(8) A traffic manager in charge of planning a company's transportation, including the most economical and quickest routes for shipping merchandise to and from the plant, contracting for common-carrier and other transportation facilities, negotiating with carriers for adjustments for damages to merchandise, and making the necessary rearrangements resulting from delays, damages or irregularities in transit, is performing exempt work. If the employee also spends part of the day taking telephone orders for local deliveries, such order-taking is a routine function and is not directly and closely related to the exempt work.

(9) An example of work directly and closely related to exempt professional duties is a chemist performing menial tasks such as cleaning a test tube in the middle of an original experiment, even though such menial tasks can be assigned to laboratory assistants.

(10) A teacher performs work directly and closely related to exempt duties when, while taking students on a field trip, the teacher drives a school van or monitors the students' behavior in a restaurant.

§ 541.704 Use of manuals.

The use of manuals, guidelines or other established procedures containing or relating to highly technical, scientific, legal, financial or other similarly complex matters that can be understood or interpreted only by those with advanced or specialized knowledge or skills does not preclude exemption under section 13(a)(1) of the Act or the regulations in this part. Such manuals and procedures provide guidance in addressing difficult or novel circumstances and thus use of such reference material would not affect an employee's exempt status. The section 13(a)(1) exemptions are not available, however, for employees who simply apply well-established techniques or procedures described in manuals or other sources within closely prescribed limits to determine the correct response to an inquiry or set of circumstances.

§ 541.705 Trainees.

The executive, administrative, professional, [outside sales] and computer employee exemptions do not apply to employees training for employment in an executive, administrative, professional, [outside sales] or computer employee capacity who are not actually performing the duties of an executive, administrative, professional, [outside sales] or computer employee.

§ 541.706 Emergencies.

(a) An exempt employee will not lose the exemption by performing work of a normally nonexempt nature because of the existence of an emergency. Thus, when emergencies arise that threaten the safety of employees, a cessation of operations or serious damage to the employer's property, any work performed in an effort to prevent such results is considered exempt work.

(b) An "emergency" does not include occurrences that are not beyond control or for which the employer can reasonably provide in the normal course of business. Emergencies generally occur only rarely, and are events that the employer cannot reasonably anticipate.

(c) The following examples illustrate the distinction between emergency work considered exempt work and routine work that is not exempt work:

(1) [A mine superintendent who pitches in after an explosion and digs out workers who are trapped in the mine is still a bona fide executive.] <<Reserved.>>

(2) Assisting nonexempt employees with their work during periods of heavy workload or to handle rush orders is not exempt work.

(3) Replacing a nonexempt employee during the first day or partial day of an illness may be considered exempt emergency work depending on factors such as the size of the [establishment]<<location>> and of the executive's department, the nature of the [industry]<<work performed by the employing office>>, the consequences that would flow from the failure to replace the ailing employee immediately, and the feasibility of filling the employee's place promptly.

(4) Regular repair and cleaning of equipment is not emergency work, even when necessary to prevent fire or explosion; however, repairing equipment may be emergency work if the breakdown of or damage to the equipment was caused by accident or carelessness that the employer could not reasonably anticipate.

§ 541.707 Occasional tasks.

Occasional, infrequently recurring tasks that cannot practicably be performed by nonexempt employees, but are the means for an exempt employee to properly carry out exempt functions and responsibilities, are considered exempt work. The following factors should be considered in determining whether such work is exempt work: Whether the same work is performed by any of the exempt employee's subordinates; practicability of delegating the work to a nonexempt employee; whether the exempt employee performs the task frequently or occasionally; and existence of an industry practice for the exempt employee to perform the task.

§ 541.708 Combination exemptions.

Employees who perform a combination of exempt duties as set forth in the regulations in this part for executive, administrative, professional, [outside sales] and computer employees may qualify for exemption. Thus, for example, an employee whose primary duty involves a combination of exempt administrative and exempt executive work may qualify for exemption. In other words, work that is exempt under one section of this part will not defeat the exemption under any other section.

§ [541.709 Motion picture producing industry.

The requirement that the employee be paid "on a salary basis" does not apply to an employee in the motion picture producing industry who is compensated at a base rate of at least \$1,043 per week (exclusive of board, lodging, or other facilities). Thus, an employee in this industry who is otherwise exempt under subparts B, C, or D of this part, and who is employed at a base rate of at least the applicable current minimum amount a week is exempt if paid a proportionate amount (based on a week of not more than 6 days) for any week in which the employee does not work a full workweek for any reason. Moreover, an otherwise exempt employee in this industry qualifies for exemption if the employee is employed at a daily rate under the following circumstances:

(a) The employee is in a job category for which a weekly base rate is not provided and the daily base rate would yield at least the minimum weekly amount if 6 days were worked; or

(b) The employee is in a job category having the minimum weekly base rate and the daily base rate is at least one-sixth of such weekly base rate.] <<541.709 Reserved.>>

§ 541.710 [Employees of public agencies]<<Effect of certain deductions on exempt employee pay>>.

(a) An employee [of a public agency] who otherwise meets the salary basis requirements of §541.602 shall not be disqualified from exemption under §§541.100, 541.200, 541.300 or 541.400 on the basis that such employee is paid according to a pay system established by statute, ordinance or regulation, or by a policy or practice established

pursuant to principles of public accountability, under which the employee accrues personal leave and sick leave and which requires the [public agency] employee's pay to be reduced or such employee to be placed on leave without pay for absences for personal reasons or because of illness or injury of less than one work-day when accrued leave is not used by an employee because:

(1) Permission for its use has not been sought or has been sought and denied;

(2) Accrued leave has been exhausted; or

(3) The employee chooses to use leave without pay.

(b) Deductions from the pay of an employee [of a public agency] for absences due to a budget-required furlough shall not disqualify the employee from being paid on a salary basis except in the workweek in which the furlough occurs and for which the employee's pay is accordingly reduced.

BUDGETARY EFFECTS OF PAYGO LEGISLATION

Pursuant to the Statutory Pay-As-You-Go Act of 2010 (PAYGO), Mr. YARMUTH hereby submits, prior to the vote on passage, for printing in the CONGRESSIONAL RECORD, that H.R. 1638, the Gilt Edge Mine Conveyance Act, as amended, would have no significant effect on the deficit, and therefore, the budgetary effects of such bill are estimated as zero.

Pursuant to the Statutory Pay-As-You-Go Act of 2010 (PAYGO), Mr. YARMUTH hereby submits, prior to the vote on passage, the attached estimate of the costs of H.R. 3304, the AUTO for Veterans Act, as amended, for printing in the CONGRESSIONAL RECORD.

ESTIMATE OF PAY-AS-YOU-GO EFFECTS FOR H.R. 3304

	By fiscal year, in millions of dollars—												
	2022	2023	2024	2025	2026	2027	2028	2029	2030	2031	2032	2022– 2027	2022– 2032

Components may not sum to totals because of rounding.													

Pursuant to the Statutory Pay-As-You-Go Act of 2010 (PAYGO), Mr. YARMUTH hereby submits, prior to the vote on passage, for printing in the CONGRESSIONAL RECORD, that H.R. 6364, to amend the Delaware Water Gap National Recreation Area Improvement Act to extend the exception to the closure of certain roads within the Recreation Area for local businesses, and for other purposes, as amended, would have no significant effect on the deficit, and therefore, the budgetary effects of such bill are estimated as zero.

Pursuant to the Statutory Pay-As-You-Go Act of 2010 (PAYGO), Mr. YARMUTH hereby submits, prior to the vote on passage, for printing in the CONGRESSIONAL RECORD, that H.R. 6889, the Credit Union Board Modernization Act, as amended, would have no significant effect on the deficit, and therefore, the budgetary effects of such bill are estimated as zero.

Pursuant to the Statutory Pay-As-You-Go Act of 2010 (PAYGO), Mr. YARMUTH hereby submits, prior to the vote on passage, for printing in the CONGRESSIONAL RECORD, that H.R. 6967, the Chance to Compete Act of 2022, as amended, would have no significant effect on the deficit, and therefore, the budgetary effects of such bill are estimated as zero.

Pursuant to the Statutory Pay-As-You-Go Act of 2010 (PAYGO), Mr. YARMUTH hereby submits, prior to the vote on passage, for printing in the CONGRESSIONAL RECORD, that H.R. 8466, the Chai Suthammanont Healthy Federal Workplaces Act of 2022, as amended, would have no significant effect on the deficit, and therefore, the budgetary effects of such bill are estimated as zero.

Pursuant to the Statutory Pay-As-You-Go Act of 2010 (PAYGO), Mr. YARMUTH hereby submits, prior to the vote on passage, for printing in the CONGRESSIONAL RECORD, that H.R. 8875, the Expanding Home Loans for Guard and Reservists Act, as amended, would have no significant effect on the deficit, and therefore, the budgetary effects of such bill are estimated as zero.

EXECUTIVE COMMUNICATIONS,
ETC.

Under clause 2 of rule XIV, executive communications were taken from the Speaker's table and referred as follows:

EC-5319. A letter from the Secretary, Department of Veterans Affairs, transmitting a report of a violation of the Antideficiency Act, pursuant to 31 U.S.C. 1351; Public Law 97-258; (96 Stat. 926); to the Committee on Appropriations.

EC-5320. A letter from the Secretary, Department of Veterans Affairs, transmitting a report of a violation of the Antideficiency Act, pursuant to 31 U.S.C. 1351; Public Law 97-258; (96 Stat. 926); to the Committee on Appropriations.

EC-5321. A letter from the Secretary, Department of Veterans Affairs, transmitting a report of a violation of the Antideficiency Act, pursuant to 31 U.S.C. 1351; Public Law 97-258; (96 Stat. 926); to the Committee on Appropriations.

EC-5322. A letter from the Secretary, Department of Veterans Affairs, transmitting a report of a violation of the Antideficiency Act, pursuant to 31 U.S.C. 1351; Public Law 97-258; (96 Stat. 926); to the Committee on Appropriations.

EC-5323. A letter from the Secretary, Department of Veterans Affairs, transmitting a report of a violation of the Antideficiency Act, pursuant to 31 U.S.C. 1351; Public Law 97-258; (96 Stat. 926); to the Committee on Appropriations.

EC-5324. A letter from the Assistant Secretary for Defense for Nuclear, Chemical, and Biological Defense Programs, Department of Defense, transmitting a letter regarding the request made in House Report 116-453; to the Committee on Armed Services.

EC-5325. A letter from the Chair of the Board and Director, Pension Benefit Guaranty Corporation, transmitting the Corporation's FY 2021 actuarial evaluation of the expected operations and status of the PBGC funds, pursuant to 29 U.S.C. 1308; Public Law 93-406, Sec. 4008 (as amended by Public Law 109-280, Sec. 412); (120 Stat. 936); to the Committee on Education and Labor.

EC-5326. A letter from the Administrator, Environmental Protection Agency, transmitting the report to Congress, "America's Water Infrastructure Act (AWIA) Report to Congress — Drinking Water Compliance Monitoring Data Strategic Plan", pursuant to 42 U.S.C. 300g-3(j)(1); July 1, 1944, ch. 373, title XIV, Sec. 1414 (as amended by Public Law 115-270, Sec. 2011); (132 Stat. 3849); to the Committee on Energy and Commerce.

EC-5327. A letter from the Secretary, Department of the Treasury, transmitting a six-month periodic report on the national emergency with respect to Zimbabwe that was declared in Executive Order 13288 of March 6, 2003, pursuant to 50 U.S.C. 1641(c); Public Law 94-412, Sec. 401(c); (90 Stat. 1257) and 50 U.S.C. 1703(c); Public Law 95-223, Sec. 204(c); (91 Stat. 1627); to the Committee on Foreign Affairs.

EC-5328. A letter from the Assistant Secretary for Legislative Affairs, Department of Homeland Security, transmitting a memorandum on the continued provision of Secret Service protection for former Assistant to the President for National Security Affairs Robert O'Brien, pursuant to Public Law 116-260, div. F, title V, Sec. 542; (134 Stat. 1477); to the Committee on Oversight and Reform.

EC-5329. A letter from the Secretary, Department of the Treasury, transmitting a letter regarding an administrative funding provision for the Department of the Treasury; to the Committee on Oversight and Reform.

EC-5330. A letter from the Management and Program Analyst, FAA, Department of Transportation, transmitting the Depart-

ment's final rule — Standard Instrument Approach Procedures, and Takeoff Minimums and Obstacle Departure Procedures; Miscellaneous Amendments [Docket No.: 31439; Amdt. No.: 4018] received September 9, 2022, pursuant to 5 U.S.C. 801(a)(1)(A); Public Law 104-121, Sec. 251; (110 Stat. 868); to the Committee on Transportation and Infrastructure.

EC-5331. A letter from the Management and Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule — Standard Instrument Approach Procedures, and Takeoff Minimums and Obstacle Departure Procedures; Miscellaneous Amendments [Docket No.: 31437; Amdt. No.: 4016] received September 9, 2022, pursuant to 5 U.S.C. 801(a)(1)(A); Public Law 104-121, Sec. 251; (110 Stat. 868); to the Committee on Transportation and Infrastructure.

EC-5332. A letter from the Management and Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule — Airworthiness Directives; Airbus SAS Airplanes [Docket No.: FAA-2022-1075; Project Identifier MCAI-2021-00856-T; Amendment 39-22077; AD 2022-12-05] (RIN: 2120-AA64) September 9, 2022, pursuant to 5 U.S.C. 801(a)(1)(A); Public Law 104-121, Sec. 251; (110 Stat. 868); to the Committee on Transportation and Infrastructure.

EC-5333. A letter from the Management and Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule — Airworthiness Directives; Continental Aerospace Technologies, Inc., Lycoming Engines, and Textron Lycoming/Subsidiary of Textron, Inc. Reciprocating Engines [Docket No.: FAA-2022-0983; Project Identifier AD-2022-00614-E; Amendment 39-22132; AD 2022-16-03] (RIN: 2120-AA64) received September 9, 2022, pursuant to 5 U.S.C. 801(a)(1)(A); Public Law 104-121, Sec. 251; (110 Stat. 868); to the Committee on Transportation and Infrastructure.

EC-5334. A letter from the Management and Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule — Airworthiness Directives; Embraer S.A. (Type Certificate Previously Held by Yavora Indústria Aeronáutica S.A.) Airplanes [Docket No. FAA-2022-0976 Project Identifier AD-2022-00722-T Amendment 39-22130 AD 2022-16-01 RIN: 2120-AA64] received September 9, 2022, pursuant to 5 U.S.C. 801(a)(1)(A); Public Law 104-121, Sec. 251; (110 Stat. 868); to the Committee on Transportation and Infrastructure.

EC-5335. A letter from the Management and Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule — Airworthiness Directives; Dassault Aviation Airplanes [Docket No.: FAA-2022-0390; Project Identifier MCAI-2021-00968-T; Amendment 39-22082; AD 2022-12-10] (RIN: 2120-AA64) received September 9, 2022, pursuant to 5 U.S.C. 801(a)(1)(A); Public Law 104-121, Sec. 251; (110 Stat. 868); to the Committee on Transportation and Infrastructure.

EC-5336. A letter from the Management and Program Analyst, Department of Transportation, transmitting the Department's final rule — Airworthiness Directives; Various Transport Airplanes [Docket No.: FAA-2022-0883; Project Identifier MCAI-2021-01179-T; Amendment 39-22128; AD 2022-15-08] (RIN: 2120-AA64) received September 9, 2022, pursuant to 5 U.S.C. 801(a)(1)(A); Public Law 104-121, Sec. 251; (110 Stat. 868); to the Committee on Transportation and Infrastructure.

EC-5337. A letter from the Management and Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule — Airworthiness Directives; Embraer S.A. (Type Certificate Previously Held by Yavora Indústria Aeronáutica S.A.) Airplanes [Docket No.:

FAA-2022-0399; Project Identifier MCAI-2021-00983-T; Amendment 39-22083; AD 2022-12-11] (RIN: 2120-AA64) received September 22, 2022, pursuant to 5 U.S.C. 801(a)(1)(A); Public Law 104-121, Sec. 251; (110 Stat. 868); to the Committee on Transportation and Infrastructure.

EC-5338. A letter from the Management and Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule — Airworthiness Directives; Airbus SAS Airplanes [Docket No.: FAA-2022-0457; Project Identifier MCAI-2022-00263-T; Amendment 39-22125; AD 2022-15-05] (RIN: 2120-AA64) received September 9, 2022, pursuant to 5 U.S.C. 801(a)(1)(A); Public Law 104-121, Sec. 251; (110 Stat. 868); to the Committee on Transportation and Infrastructure.

EC-5339. A letter from the Management and Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule — Airworthiness Directives; MHJ RJ Aviation ULC (Type Certificate Previously Held by Bombardier, Inc.) Airplanes [Docket No.: FAA-2022-0388; Project Identifier MCAI-2020-01604-T; Amendment 39-22088; AD 2022-13-02] (RIN: 2120-AA64) received September 9, 2022, pursuant to 5 U.S.C. 801(a)(1)(A); Public Law 104-121, Sec. 251; (110 Stat. 868); to the Committee on Transportation and Infrastructure.

EC-5340. A letter from the Management and Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule — Airworthiness Directives; Alexander Schleicher GmbH & Co. Segelflugzeugbau Gliders [Docket No.: FAA-2022-0288; Project Identifier MCAI-2021-00913-G; Amendment 39-22119; AD 2022-14-14] (RIN: 2120-AA64) received September 9, 2022, pursuant to 5 U.S.C. 801(a)(1)(A); Public Law 104-121, Sec. 251; (110 Stat. 868); to the Committee on Transportation and Infrastructure.

EC-5341. A letter from the Management and Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule — Airworthiness Directives; BAE Systems (Operations) Limited Airplanes [Docket No.: FAA-2022-0508; Project Identifier MCAI-2021-01120-T; Amendment 39-22118; AD 2022-14-13] (RIN: 2120-AA64) received September 9, 2022, pursuant to 5 U.S.C. 801(a)(1)(A); Public Law 104-121, Sec. 251; (110 Stat. 868); to the Committee on Transportation and Infrastructure.

EC-5342. A letter from the Management and Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule — Airworthiness Directives; Cameron Balloons Ltd. Burner Assemblies [Docket No.: FAA-2022-0469; Project Identifier MCAI-2021-00124-Q; Amendment 39-22121; AD 2022-15-02] (RIN: 2120-AA64) received September 9, 2022, pursuant to 5 U.S.C. 801(a)(1)(A); Public Law 104-121, Sec. 251; (110 Stat. 868); to the Committee on Transportation and Infrastructure.

EC-5343. A letter from the Management and Program Analyst, FAA, Department of Transportation, transmitting the Department's final rule — Airworthiness Directives; The Boeing Company Airplanes [Docket No.: FAA-2022-0010; Project Identifier AD-2021-00850-T; Amendment 39-22120; AD 2022-15-01] (RIN: 2120-AA64) received September 9, 2022, pursuant to 5 U.S.C. 801(a)(1)(A); Public Law 104-121, Sec. 251; (110 Stat. 868); to the Committee on Transportation and Infrastructure.

Resolution of inquiry directing the Secretary of the Interior to transmit certain documents to the House of Representatives relating to the actions of the Department of the Interior's Departmental Ethics Office, adversely; with an amendment (Rept. 117-501). Referred to the House Calendar.

Mr. GRIJALVA: Committee on Natural Resources. H. Res. 1638. A bill to direct the Secretary of Agriculture to transfer certain National Forest System land to the State of South Dakota, and for other purposes, with an amendment (Rept. 117-502). Referred to the Committee of the Whole House on the state of the Union.

Mr. GRIJALVA: Committee on Natural Resources. H. Res. 6364. A bill to amend the Delaware Water Gap National Recreation Area Improvement Act to extend the exception to the closure of certain roads within the Recreation Area for local businesses, and for other purposes (Rept. 117-503). Referred to the Committee of the Whole House on the state of the Union.

Mr. DEFAZIO: Committee on Transportation and Infrastructure. H.R. 5703. A bill to amend the Robert T. Stafford Disaster Relief and Emergency Assistance Act to authorize the President to provide professional counseling services to victims of emergencies declared under such Act, and for other purposes (Rept. 117-504). Referred to the Committee of the Whole House on the state of the Union.

Mr. DEFAZIO: Committee on Transportation and Infrastructure. H.R. 3482. A bill to establish the National Center for the Advancement of Aviation; with an amendment (Rept. 117-505). Referred to the Committee of the Whole House on the state of the Union.

Mr. DEFAZIO: Committee on Transportation and Infrastructure. H.R. 7321. A bill to amend title 49, United States Code, to require certain air carriers to provide reports with respect to maintenance, preventive maintenance, or alterations, and for other purposes; with an amendment (Rept. 117-506). Referred to the Committee of the Whole House on the state of the Union.

Mr. DESAULNIER: Committee on Rules. House Resolution 1396. Resolution providing for consideration of the bill (H.R. 3843) to promote antitrust enforcement and protect competition through adjusting premerger filing fees, and increasing antitrust enforcement resources; providing for consideration of the bill (H.R. 7780) to support the behavioral needs of students and youth, invest in the school-based behavioral health workforce, and ensure access to mental health and substance use disorder benefits; providing for consideration of the bill (S. 3969) to amend the Help America Vote Act of 2002 to explicitly authorize distribution of grant funds to the voting accessibility protection and advocacy system of the Commonwealth of the Northern Mariana Islands and the system serving the American Indian consortium, and for other purposes; and for other purposes (Rept. 117-507). Referred to the House Calendar.

Mr. PALLONE: Committee on Energy and Commerce. H.R. 6965. A bill to promote travel and tourism in the United States, and for other purposes; with an amendment (Rept. 117-508, Pt. 1). Referred to the Committee of the Whole House on the state of the Union.

Mr. PALLONE: Committee on Energy and Commerce. H.R. 4081. A bill to require the disclosure of a camera or recording capa-

bility in certain internet-connected devices (Rept. 117-509). Referred to the Committee of the Whole House on the state of the Union.

Mr. PALLONE: Committee on Energy and Commerce. House Resolution 1264. Resolution of inquiry requesting the President to transmit to the House of Representatives certain documents relating to misinformation and the preservation of free speech, adversely (Rept. 117-510). Referred to the House Calendar.

Mr. PALLONE: Committee on Energy and Commerce. House Resolution 1261. Resolution of inquiry requesting the President to provide certain documents to the House of Representatives relating to communications and directives with the Federal Trade Commission, adversely (Rept. 117-511). Referred to the House Calendar.

Mr. PALLONE: Committee on Energy and Commerce. House Resolution 1271. Resolution of inquiry requesting the President transmit to the House of Representatives certain documents relating to activities of the National Telecommunications and Information Administration relating to broadband service, adversely (Rept. 117-512). Referred to the House Calendar.

Mr. PALLONE: Committee on Energy and Commerce. H.R. 5141. A bill to amend the Public Health Service Act to expand the allowable use criteria for new access points grants for community health centers; with an amendment (Rept. 117-513). Referred to the Committee of the Whole House on the state of the Union.

Mr. PALLONE: Committee on Energy and Commerce. H.R. 8163. A bill to amend the Public Health Service Act with respect to trauma care; with an amendment (Rept. 117-514). Referred to the Committee of the Whole House on the state of the Union.

Ms. VELAZQUEZ: Committee on Small Business. House Resolution 1298. Resolution of inquiry directing the Secretary of the Treasury to transmit certain documents to the House of Representatives relating to the role of the Department of the Treasury in the Paycheck Protection Program of the Small Business Administration; with amendments (Rept. 117-515). Referred to the House Calendar.

Mr. PALLONE: Committee on Energy and Commerce. House Resolution 1244. Resolution of inquiry requesting the President and directing the Secretary of Health and Human Services to transmit, respectively, certain documents to the House of Representatives relating to any COVID-19 vaccine, adversely (Rept. 117-516). Referred to the House Calendar.

Ms. WATERS: Committee on Financial Services. H.R. 6889. A bill to amend the Federal Credit Union Act to modify the frequency of board of directors meetings, and for other purposes; with amendments (Rept. 117-517). Referred to the Committee of the Whole House on the state of the Union.

Mr. NEAL: Committee on Ways and Means. House Resolution 1269. Resolution of inquiry directing the Secretary of the Treasury to provide certain documents in the Secretary's possession to the House of Representatives relating to the impact of the OECD Pillar One agreement on the United States Treasury (Rept. 117-518), adversely Referred to the House Calendar.

Mr. NEAL: Committee on Ways and Means. House Resolution 1262. Resolution of inquiry directing the Secretary of Health and Human Services to provide to the House of Representatives certain documents in the Secretary's possession regarding the reinterpretation of sections 36B(c)(2)(C)(i)(II) and 5000A(e)(1)(B) of the Internal Revenue Code of 1986, commonly known as the "fix to the family glitch" (Rept. 117-519), adversely Referred to the House Calendar.

Mr. NEAL: Committee on Ways and Means. House Resolution 1285. Resolution requesting the President to transmit certain information to the House of Representatives relating to a waiver of intellectual property commitments under the World Trade Organization Agreement on Trade-Related Aspects of Intellectual Property Rights (Rept. 117-520), adversely Referred to the House Calendar.

Mr. NEAL: Committee on Ways and Means. House Resolution 1288. Resolution of inquiry directing the Secretary of Labor to provide to the House of Representatives certain documents in the Secretary's possession relating to Unemployment Insurance fraud during the COVID-19 pandemic (Rept. 117-521), adversely Referred to the House Calendar.

Mr. NEAL: Committee on Ways and Means. House Resolution 1246. Resolution of inquiry directing the Secretary of the Treasury to provide certain documents in the Secretary's possession to the House of Representatives relating to recovery rebates under section 6428B of the Internal Revenue Code of 1986 (Rept. 117-522), adversely Referred to the House Calendar.

Mr. NEAL: Committee on Ways and Means. House Resolution 1283. Resolution of inquiry directing the Secretary of the Treasury to provide to the House of Representatives a copy of the Internal Revenue Service Small Business/Self Employed Division Decision Memorandum regarding the decision to destroy approximately 30,000,000 paper information returns around the time of March 2021, and any other memorandum related to the decision to destroy those information returns (Rept. 117-523), adversely Referred to the House Calendar.

DISCHARGE OF COMMITTEE

Pursuant to clause 2 of rule XIII, the Committees on Foreign Affairs and the Judiciary discharged from further consideration. H.R. 6965 referred to the Committee of the Whole House on the state of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XII, public bills and resolutions of the following titles were introduced and severally referred, as follows:

By Ms. LOFGREN:

H.R. 8990. A bill to amend the Ethics in Government Act of 1978 to restrict trading and ownership of covered investments by senior government officials, and for other purposes; to the Committee on Oversight and Reform, and in addition to the Committees on House Administration, the Judiciary, and Ways and Means, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Ms. JOHNSON of Texas (for herself, Ms. LOFGREN, Ms. BONAMICI, Ms. STEVENS, and Ms. SHERRILL):

By Mr. BUDD:

H.R. 8998. A bill to amend the Securities Exchange Act of 1934 to create a safe harbor for finders and private placement brokers, and for other purposes; to the Committee on Financial Services.

By Mr. CAWTHORN:

H.R. 8999. A bill to amend the Occupational Safety and Health Act of 1970 to provide for the expiration of emergency temporary standards after 6 months; to the Committee on Education and Labor.

By Mr. MICHAEL F. DOYLE of Pennsylvania (for himself, Mr. FITZPATRICK, Mr. PETERS, and Mr. MCKINLEY):

H.R. 9000. A bill to amend the Energy Policy Act of 2005 to establish a Hydrogen Technologies for Heavy Industry Grant Program, and for other purposes; to the Committee on Science, Space, and Technology, and in addition to the Committees on Energy and Commerce, and Transportation and Infrastructure, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mrs. FLORES:

H.R. 9001. A bill to secure schools, to increase access to mental health resources, and for other purposes; to the Committee on the Judiciary, and in addition to the Committees on Education and Labor, and Ways and Means, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Ms. GARCIA of Texas:

H.R. 9002. A bill to direct the Secretary of Veterans Affairs to establish a pilot program for gynecologic cancer care coordination at the Department of Veterans Affairs, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. GOSAR:

H.R. 9003. A bill to allow States to authorize State and local law enforcement officers

to enforce the provisions of Federal immigration law relating to unlawful entry into the United States; to the Committee on the Judiciary.

By Mr. GRAVES of Louisiana:

H.R. 9004. A bill to allow the Secretary of the Interior to authorize geological and geophysical surveys for offshore oil and gas exploration; to the Committee on Natural Resources.

By Mrs. HARSHBARGER (for herself and Mr. ROY):

H.R. 9005. A bill to direct the Secretary of Veterans Affairs to carry out a pilot program for the cognitive care of veterans, and for other purposes; to the Committee on Veterans' Affairs.

By Ms. HERRELL (for herself and Mr. WESTERMAN):

H.R. 9006. A bill to establish deadlines for the Secretary of the Interior and the Secretary of Agriculture to complete certain environmental reviews, to establish notification rules for receipt of onshore right-of-way applications, and for other purposes; to the Committee on Natural Resources, and in addition to the Committee on Agriculture, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. KIM of New Jersey (for himself and Ms. SHERRILL):

H.R. 9007. A bill to authorize the Secretary of Health and Human Services to provide grants to medical and other health profession schools to expand or develop education and training programs for substance use prevention and treatment, and for other purposes; to the Committee on Energy and Commerce.

By Ms. KUSTER:

H.R. 9008. A bill to increase the size of the Northeast Home Heating Oil Reserve, and for other purposes; to the Committee on Energy and Commerce.

By Mrs. McBATH (for herself and Mr. ARMSTRONG):

H.R. 9009. A bill to establish an inspections regime for the Bureau of Prisons, and for other purposes; to the Committee on Oversight and Reform.

By Mr. McCAUL (for himself, Mr.

CHABOT, Mr. WILSON of South Carolina, Mr. BANKS, Mr. RESCHENTHALER, Mr. GALLAGHER, Mr. BURCHETT, Mr. JOHNSON of Ohio, Mr. KINZINGER, Mr. TIFFANY, Mr. BILIRAKIS, Mr. CURTIS, Mr. CRENSHAW, Mrs. MILLER-MEEKS, Mrs. RADEWAGEN, Mr. LAMBORN, Ms. TENNEY, Mr. GREEN of Tennessee, Ms. STEFANIK, Mr. BARR, Mr. ISSA, Mr. KIM of California, Mr. DESJARLAIS, Mr. MEUSER, Mr. CARTER of Georgia, Mr. WOMACK, Ms. MACE, Mr. SMITH of New Jersey, Mrs. WAGNER, Mr. WALTZ, Mr. GOODEN of Texas, Mrs. CAMMACK, Mr. FALLON, Mrs. HINSON, Mr. KATKO, Mr. CLINE, and Ms. MALLIOTAKIS):

H.R. 9010. A bill to provide for United States policy toward Taiwan; to the Committee on Foreign Affairs, and in addition to the Committees on Armed Services, Financial Services, Ways and Means, and Homeland Security, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. McEACHIN:

H.R. 9011. A bill to amend the Federal Food, Drug, and Cosmetic Act to direct the Secretary of Health and Human Services to establish a process to allow the holders of abbreviated new drug applications to make labeling changes to include new or updated safety-related information, and for other

purposes; to the Committee on Energy and Commerce.

By Mrs. MILLER-MEEKS (for herself and Mr. WESTERMAN):

H.R. 9012. A bill to amend the National Environmental Policy Act of 1969 to limit the scope of environmental reviews required by such Act, and for other purposes; to the Committee on Natural Resources.

By Mr. NEHLS (for himself, Mr. GOODEN of Texas, Mr. BANKS, Mr. ELLZEY, Mr. WEBER of Texas, Mr. JACKSON, Mr. BACON, and Mr. JOYCE of Ohio):

H.R. 9013. A bill to authorize grants for crime victims to be distributed to angel families, and for other purposes; to the Committee on the Judiciary.

By Ms. NORTON:

H.R. 9014. A bill to provide for supplemental appropriations to increase the number of Americorps members and to increase the living allowances of such members, and for other purposes; to the Committee on Appropriations, and in addition to the Committee on Education and Labor, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. PANETTA (for himself and Mr. KELLY of Pennsylvania):

H.R. 9015. A bill to amend the Internal Revenue Code of 1986 to increase the exclusion of gain from the sale of a principal residence, and for other purposes; to the Committee on Ways and Means.

By Mr. PETERS (for himself and Mr. MEUSER):

H.R. 9016. A bill to amend the Small Business Act to codify the scorecard program of the Small Business Administration, and for other purposes; to the Committee on Small Business.

By Mr. PETERS (for himself and Mrs. MILLER-MEEKS):

H.R. 9017. A bill to amend title 38, United States Code, to promote assistance from entities recognized by the Secretary of Veterans Affairs for individuals who file certain claims under laws administered by the Secretary; to the Committee on Veterans' Affairs.

By Mr. PETERS (for himself, Mr. FITZPATRICK, and Mr. MICHAEL F. DOYLE of Pennsylvania):

H.R. 9018. A bill to require the Secretary of Energy to establish a hydrogen infrastructure finance and innovation pilot program, and for other purposes; to the Committee on Energy and Commerce, and in addition to the Committees on Transportation and Infrastructure, and Science, Space, and Technology, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Ms. PORTER (for herself, Ms. DEGETTE, Mr. DOGGETT, Ms. SCHKOWSKY, Mr. POCAN, Mr. GRIJALVA, Mr. TAKANO, Ms. CASTOR of Florida, Ms. DELAULO, and Ms. JAYAPAL):

H.R. 9019. A bill to amend title XVIII of the Social Security Act to require complete and accurate data set submissions from Medicare Advantage organizations offering Medicare Advantage plans under part C of the Medicare program to improve transparency, and for other purposes; to the Committee on Ways and Means, and in addition to the Committee on Energy and Commerce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. RYAN of Ohio (for himself, Mr. KELLY of Mississippi, Mr. KILDEE, Mr. KIM of New Jersey, Mr. KAHELE, and Mr. KILMER):

H.R. 9020. A bill to amend the Internal Revenue Code of 1986 to decrease the distance away from home required for a member of a reserve component of the Armed Forces to be eligible for the above-the-line deduction for travel expenses; to the Committee on Ways and Means.

By Mr. SARBANES:

H.R. 9021. A bill to establish uniform accessibility standards for websites and applications of employers, employment agencies, labor organizations, joint labor-management committees, public entities, public accommodations, testing entities, and commercial providers, and for other purposes; to the Committee on Education and Labor, and in addition to the Committee on the Judiciary, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Ms. STEVENS (for herself, Mrs. DINGELL, and Ms. JOHNSON of Texas):

H.R. 9022. A bill to support research, development, demonstration, and other activities to develop innovative vehicle technologies, and for other purposes; to the Committee on Science, Space, and Technology.

By Ms. TENNEY (for herself, Mr. JACOBS of New York, Mr. MULLIN, Mr. LAMBORN, Mr. CARTER of Georgia, Mr. OBERNOLTE, Mr. CHABOT, Mr. STAUBER, Mr. GOODEN of Texas, Mr. WEBER of Texas, Mr. CRENSHAW, Mr. STEUBE, Mr. VAN DREW, and Mrs. FLORES):

H.R. 9023. A bill to rescind certain balances made available to the Internal Revenue Service and redirect them to the U.S. Customs and Border Protection; to the Committee on Appropriations, and in addition to the Committee on Ways and Means, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. TIFFANY (for himself and Mr. WESTERMAN):

H.R. 9024. A bill to direct the Secretary of the Interior to submit a report and maintain publicly available data on expressions of interests, applications for permits to drill, and offshore geological and geophysical survey licenses, and for other purposes; to the Committee on Natural Resources, and in addition to the Committee on Agriculture, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. VALADAO (for himself and Mr. WESTERMAN):

H.R. 9025. A bill to direct the Secretary of the Interior and the Secretary of Agriculture to use certain previously completed environmental assessments and environmental impact statements to satisfy the review requirements of the National Environmental Policy Act of 1969, and for other purposes; to the Committee on Natural Resources, and in addition to the Committee on Agriculture, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mrs. KIM of California (for herself, Mr. FITZPATRICK, Ms. SALAZAR, and Ms. SPANBERGER):

H. Res. 1397. A resolution condemning the Government of Iran's torture and murder of Mahsa Amini and its crackdown on protesters seeking basic human rights, and supporting the protesters in their demands for freedom; to the Committee on Foreign Affairs.

By Mrs. AXNE (for herself, Mrs. MILLER-MEEKS, Mr. RUPPERSBERGER, Mr. TRONE, Mr. CURTIS, and Mrs. LEE of Nevada):

H. Res. 1398. A resolution supporting the designation of the week beginning September 25, 2022, as "National Source Water Protection Week"; to the Committee on Energy and Commerce.

By Mr. ISSA (for himself, Ms. DELBENE, Ms. CLARKE of New York, and Mr. LIEU):

H. Res. 1399. A resolution expressing support for the designation of the month of November 2022 as "National XR Month"; to the Committee on Oversight and Reform.

By Ms. SPEIER (for herself, Mr. SCHIFF, Ms. ESHOO, and Mr. PAL-LONE):

H. Res. 1400. A resolution condemning atrocities committed by the Republic of Azerbaijan; to the Committee on Foreign Affairs.

By Mr. TORRES of New York (for himself, Ms. VELÁZQUEZ, Miss GONZÁLEZ-COLÓN, Mr. SOTO, Mr. SAN NICOLAS, Ms. WILD, Mr. LARSON of Connecticut, Mr. GRIJALVA, and Mr. ESPAILLAT):

H. Res. 1401. A resolution expressing continued support for the people of Puerto Rico, and calling for the Federal Government to expedite the rebuilding of Puerto Rico's electrical grid; to the Committee on Natural Resources.

CONSTITUTIONAL AUTHORITY STATEMENT

Congressional Record

PROCEEDINGS AND DEBATES OF THE 117th CONGRESS, SECOND SESSION

Vol. 168

WASHINGTON, WEDNESDAY, SEPTEMBER 28, 2022

No. 157

Senate

The Senate met at 10 a.m. and was called to order by the Honorable BEN RAY LUJÁN, a Senator from the State of New Mexico.

PRAYER

The Chaplain, Dr. Barry C. Black, offered the following prayer:

Let us pray.

Our Father in Heaven, as Hurricane Ian wreaks havoc, protect those in harm's way. Lord, we thank You that the winds and the waves obey Your will.

Today, make us aware of our need for Your presence, and empower us to reach out to others in Your Name. Lord, teach us to pray, and sustain us by the wonders of Your Word. Give us truths that will strengthen our minds, souls, and hearts. In times of distress, grief, confusion, and misunderstanding, illuminate our paths with the light of Your companionship.

Guide our lawmakers in their challenging work, for You have promised never to leave or forsake them.

We pray in Your merciful Name. Amen.

PLEDGE OF ALLEGIANCE

The Presiding Officer led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. LEAHY).

The senior assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, September 28, 2022.

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable BEN RAY LUJÁN, a Senator from the State of New Mexico, to perform the duties of the Chair.

PATRICK J. LEAHY,
President pro tempore.

Mr. LUJÁN thereupon assumed the Chair as Acting President pro tempore.

RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

CONCLUSION OF MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Morning business is closed.

LEGISLATIVE SESSION

AFFORDABLE INSULIN NOW ACT— MOTION TO PROCEED—Resumed

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will resume consideration of the motion to proceed to H.R. 6833, which the clerk will report.

The senior assistant legislative clerk read as follows:

Motion to proceed to H.R. 6833, a bill to amend title XXVII of the Public Health Service Act, the Internal Revenue Code of 1986, and the Employee Retirement Income Security Act of 1974 to establish requirements with respect to cost-sharing for certain insulin products, and for other purposes.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

TRIBUTE TO ERNIE MANN

Mr. SCHUMER. Mr. President, before I begin my remarks, I was just watch-

ing the "TODAY" show. That is why I was late.

They have a surprise neighbor of the month, and when they come in and surprise him, all his neighbors are there because he is such a great neighbor.

Well, Ernie Mann—who is the father of Steve Mann, who has been my deputy State director since I have been Senator for over 20 years—a teacher in the community, a volunteer firefighter for 60 years, and just a great guy and a wonderful Yankee fan. They had Nestor Cortes get on the phone and speak to him. He was just made the neighbor of—I think it is of the month, but maybe it is of the year. Anyway, he deserves it. It was wonderful. It was beautiful to see.

So, Ernie—and to all the Mann family, including the great Steve, who has done such a great job for me—congratulations. Good luck. It was beautiful. It was beautiful.

CONTINUING RESOLUTION

Mr. President, now let's get to the substance of the day.

Last night, by a vote of 72 to 23, the Senate agreed to advance a shell for a continuing resolution to keep the government open until December 16 and avoid a needless government shutdown.

As my colleagues know, government funding runs out Friday at midnight, whereupon a partial shutdown would begin if we do not act. We must work fast to finish the process here on the floor, send a CR to the House, and then send it to the President's desk before the clock runs out. With cooperation from our Republican colleagues, the Senate can finish its work with keeping the government open as soon as tomorrow. There is every reason in the world to get to yes, and I look forward to working with Leader McCONNELL to make sure we can do that and not bump up into the Friday midnight deadline.

I urge my colleagues on both sides to work with us together to speed this process as quickly as we can through

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Printed on recycled paper.

S5115

the floor, especially since the CR contains many things both parties support.

I am talking about billions in disaster aid to help communities in Kentucky, Louisiana, Alabama, Texas, Alaska, and Puerto Rico, battered by floods and disasters over the past year; as well as help for New Mexico to recover from its worst wildfire in the State's history.

We must also renew the FDA user fees for the next 5 years to prevent the slowdown of innovative drugs and medical devices so needed by our people and to prevent thousands of workers—good, hard-working workers—who help approve these drugs and make sure they are safe from being furloughed.

And, crucially, we must also approve critical emergency aid for the people of Ukraine. Over the past few weeks, it has become clear that U.S. assistance has made an enormous difference in helping Ukraine defend itself.

I want to salute President Biden. He has done a masterful job in helping the Ukrainians and leading us. But the Congress in a bipartisan way has gone along in the past. We have not only got along, but we enthusiastically supported our help for Ukraine. I certainly enthusiastically support it, and we have to continue. The conflict in Ukraine is far from over and our obligation remains to help them, however we can, to beat the brutal, nasty, vicious Putin.

I want to also thank my colleagues on both sides of the aisle who worked day and night to put this CR together, especially my friend Senator LEAHY, the chairman of the Appropriations Committee, and Ranking Member SHELBY for his good work. They are both retiring. Let's hope this is the last CR they do so we get an omnibus done in December.

I also want to recognize all of my other colleagues on the Appropriations Committee and in the Senate and all their great staffs, who have worked hard to make sure we don't have a needless shutdown.

Twenty months into the Democratic majority, I want to take a moment to highlight the many, many accomplishments we have secured in this Chamber, the most in recent memory. This is one of the most productive Congresses we have had in a very long time, and we have worked hard every step of the way to improve the lives of the American people, to help those in the middle class stay in the middle class, and to help those struggling to get into the middle class, making it a little easier for them to get there.

A few months ago, for instance, after the tragedies in Uvalde, Buffalo, and so many others, the Senate came together on a bipartisan basis to break the grip of the NRA and pass the first gun safety bill in three decades. It was the first gun safety bill since the Brady Act, which I was proud to author as a Member of Congress, 30 years ago. It took 30 years to get some real progress made, but we did, and we have to continue.

A few weeks later, we passed the largest expansion of veterans' benefits in a generation to help veterans suffering from cancers, lung diseases, and other ailments stemming from toxic exposure. Again, it was a bipartisan bill. Senators Tester and Moran led the way. It was a really good bill, and thousands and thousands and thousands of veterans who risked their lives for us are now getting the help they always needed and deserved.

And, as Ukraine fights for survival, we strengthened NATO—again, bipartisan—by adding Finland and Sweden to its ranks, sending Putin a clear message that he can't intimidate America or Europe.

And, as the Chinese Communist Party continues its drive to outcompete the United States, we passed the CHIPS and Science Act, the largest manufacturing, science, and jobs bill we have seen in decades, bringing jobs back to America in high-end manufacturing and in research, to keep us No. 1 on into the 21st century as the leading economy, free and democratic, in the world.

Our efforts, of course, culminated in the crowning jewel of them all, the Inflation Reduction Act—a groundbreaking bill that will lower prescription drug costs, lower the price of insulin for seniors on Medicare, and help Americans save on energy costs with the largest clean energy investments in American history.

I am so proud that my caucus stuck together in getting this important bill done. We needed every vote, and we got it—and that is only what we have done since June.

Over the past year, we have enacted the first infrastructure law in decades—the largest, biggest infrastructure law in decades. We revamped our post office, finally, and put it on a good track. We reinstated VAWA, the Violence Against Women Act, after years of trying. We finally declared lynching a Federal hate crime after a century of delay, and we unanimously ended forced arbitration for sexual harassment and assault in the workplace.

Then, of course, we have confirmed over 80 qualified nominees to the Federal bench, including Ketanji Brown Jackson as the first Black woman ever to sit on the Supreme Court. Roughly three-quarters of the President's nominees have been women and two-thirds people of color. With one nominee at a time, we are making our Federal bench a better reflection of our great country.

All of these accomplishments will echo for years in the lives of the American people. They were hard to get done, especially in a 50-50 Senate. While we have gotten so much done, there is a lot, certainly more, we have to do.

I have always said, from my first days as majority leader, that Democrats would be willing to work in a bipartisan way to get things done whenever we could, but of course, on such

important issues like climate, when we are unable to find common ground, Democrats will hold firm in the defense of our values and show the American people the choice before them in the coming election, as we did in the IRA. Sadly, since the overturning of Roe, that contrast has come into sharper focus than we have seen in years.

One example is in Arizona. For decades, overturning Roe and eliminating the right to choose had been the North Star for many in the Republican Party—for most, it seems—in orienting much of their legislation, their candidates, and their nominees they elevate to the judiciary. All too often, Republican Senators and legislators—even when they might not agree with the extreme MAGA position on abortion—go along because they are afraid of the consequences in a primary.

Well, we saw another horrifying consequence of this late last week when a judge in Arizona upheld a radical abortion ban that dates back to the time of the Civil War—even before Arizona became a State. In the blink of an eye, the right to choose has been practically eliminated in Arizona, a devastating blow to the freedoms of millions of Arizonan women.

The law held in Arizona is as cruel and radical as it comes. It dates all the way back to the 1860s—the 1860s, not the 1960s—and provides no exceptions for rape and incest. It tells young women who are raped or who are subject to incest: You have to carry the baby all the way to term. You have to carry the fetus all the way to term.

That is terrible. That is terrible.

It allows for the prosecution of doctors and, even worse, of those who assist women in accessing abortion.

In response, the MAGA state attorney general released a statement, saying: We applaud the court for upholding the will of the legislature.

The 1860s. The 1860s.

MAGA Republicans are making it clear as day exactly where they stand on the right to choose. They want to make freedom of choice extinct across the country—period.

The Arizona ruling is hardly the only example of Republican State legislatures, as we see in places like Indiana, South Carolina, and many others, that have already introduced or enacted restrictions with few exceptions for rape and incest.

Look, at the end of the day, this isn't about States' rights despite what Republicans have claimed. This is about getting rid of the right to choose in its entirety. If anyone has any doubts, look no further than the national ban that was introduced right here in the Senate not 3 weeks ago.

And while Republicans will try to deflect, distort, or mainly distract from their record—they don't like talking about this because they know the American people are not on their side, but their hard-right, MAGA core is—they are stuck. The fact is that every

Senate Republican—every Senate Republican—is already on record as voting in favor of a national ban—sometimes more than once—here on the floor.

So the contrast has become clear—clear, clear as could be: While Democrats want to protect a woman's freedom to choose, MAGA Republicans want to take away that right with proposals to ban freedom of choice in its entirety and to punish women and doctors for carrying out abortions, even past bans, with no exceptions for rape or incest. We are seeing it play out across the country, and it is chilling to the bone.

Democrats will keep fighting these MAGA abortion bans—these radical MAGA abortion bans—and make clear to all that we are the party fighting to protect people's freedoms over their own bodies.

I yield the floor.

RECOGNITION OF THE MINORITY LEADER

The ACTING PRESIDENT pro tempore. The Republican leader is recognized.

HURRICANE IAN

Mr. McCONNELL. Mr. President, first, this morning, the Senate and the entire country are watching the news and praying for the people of the great State of Florida, where a seemingly massive, massive hurricane is poised to make landfall soon. I understand the current forecast suggests that Hurricane Ian may be both extremely powerful and unusually slow-moving, a terrible combination for the citizens and communities in its path.

Our colleague the senior Senator from Florida reported this morning that State officials and the relevant Federal Agencies have been working well together and that, thus far, every request Florida has made of the Federal Government has been approved. The bipartisan government funding bill the Senate is on track to pass this week will ensure that the Federal Disaster Relief Fund is fully resourced at this critical moment.

We are all keeping the people of Florida at the forefront of our thoughts and will stand ready to help our colleagues from Florida, the Governor, and local officials however we can.

CONTINUING RESOLUTION

Now, Mr. President, on a completely different matter, the path to keeping the government open and funded has been clear for weeks now. The solution was always going to be a clean, bipartisan continuing resolution, negotiated by Senators SHELBY and LEAHY, without any unrelated, partisan language jammed in. Our Democratic colleagues tried to complicate things by jamming in a phony, partisan figleaf on the subject of permitting reform.

Republicans strongly support real, substantive permitting reform. We are actually leading that charge. Senator CAPITO has an outstanding bill that would make significant changes to make it easier to build things in our

country, create jobs in our country, and unleash domestic energy in our country.

The problem was that the Schumer-Manchin language was not actual permitting reform by any stretch. It was a phony figleaf. It was designed to create the illusion of progress while sapping the political will to tackle the issue in any meaningful way. The Democrats carefully tailored the bill to avoid making any—any—impactful changes to permitting laws. In fact, we had panicked State-level elected officials from around the country writing the Senate to explain how the Democrats' bill would actually make the existing problems even worse. Fortunately, the Senate saw through the political game, and the phony figleaf didn't have the votes.

So I am glad that our colleagues capitulated and abandoned their phony figleaf. I look forward to a bipartisan funding bill coming to the floor this week, and I hope our Democratic colleagues will push the liberal special interests aside and let actual, robust permitting reform become law someday soon.

BIDEN ADMINISTRATION

Mr. President, on another matter, 2 years ago, the American people elected a President who claimed he would govern as a uniting moderate. In underscoring that mandate, voters gave him unusually small coattails—the slimmost possible majority—in Congress.

The all-Democratic government inherited an economy that was, by every account, already primed and ready for economic recovery. Vaccines were already flooding the country. A major bipartisan stimulus had just passed, literally, days earlier. And remember, before the temporary COVID shot, years of Republican policies had our economic fundamentals humming along with low inflation, low unemployment, and robust growth, an outstanding trifecta for working families. To put it as plainly as possible, the Democrats had one job: Just don't mess things up.

But, alas, fast-forward to today.

Overall inflation is a staggering 13.2 percent since President Biden and his party came into power; consumer prices—through the roof; supply chain chaos left and right; the worst single year for both grocery inflation and electricity inflation since the fallout back in the Jimmy Carter era. The stock market has plummeted below where it was when President Biden took office, cutting the value of Americans' retirement savings just as the cost of living has soared. America's real wages—our citizens' buying power after inflation—is lower today than it was the moment President Biden put his hand on the Bible.

The Democrats asked for total control. They got total control, and they created a total disaster. The net effect of this far-left policy experiment has been the equivalent of all-out economic warfare against the American middle class. But alas, Democrats hardly seem to even much less care.

The same day the latest sky-high monthly inflation report came out, our colleagues literally headed down Pennsylvania Avenue to the White House for a folk music concert—folk music concert—celebrating additional hundreds of billions they had just dumped—dumped—into “green” energy subsidies.

Do you know who isn't partying? Working families in Wisconsin who are paying a “Democratic Inflation Tax” averaging \$673 every single month just to tread water. In Georgia, that is \$681 every month and in Colorado, \$953 every month.

None of this had to happen. It didn't have to happen. Democrats were literally warned in advance that their plans for far-left reckless spending would send inflation through the roof and crush normal Americans.

So what did our colleagues do? One gigantic party-line spending bill in 2021, another huge, reckless taxing and spending spree just this past summer, and student loan socialism that has cashiers and carpenters eating the graduate school debt of doctors and lawyers. It adds up to nearly \$3 trillion of party-line waste—\$3 trillion of party-line waste. And it adds up to 13.2 percent inflation and counting.

So Democrats wanted one-party control of Washington; they got it. They promptly used that power to create a literal nightmare for American families.

TRIBUTE TO JOHN CALIPARI

Mr. President, now one final matter, in my home State of Kentucky, college basketball ranks up there with horseracing as one of our signature pastimes. Our greatest players have become local heroes. Our greatest seasons have become local legends. So it is no surprise, then, that our basketball coaches are larger-than-life figures.

Plenty of notable ones have passed through the halls of our universities. But the University of Kentucky's John Calipari—Coach Cal to most of us—is already one for the history books.

Of course, there is his record with the program: 365 wins, 4 Final Four appearances, and a National Championship.

There is also his record of public service. During the past 13 years with UK, Coach Cal has leveraged his position in the public eye to transform the face of charitable giving in Kentucky. In recognition of his work, the organization Multiplying Good presented Coach Cal with their Jefferson Award for public service this year. Previous recipients of this prestigious award include Oprah Winfrey, Steve Jobs, Colin Powell. Coach Cal is the first men's college basketball coach to receive the honor.

Sometimes Coach Cal's efforts are local. Every Thanksgiving, he helps folks around Lexington enjoy the family meal they deserve. Every Christmas, he gathers presents for children in need. But sometimes, Coach Cal's efforts touch every corner of the Commonwealth. As Kentucky reeled from

multiple crises in the past few years, his assistance has proved invaluable.

During the pandemic, he helped Fayette County students access the resources they needed to continue their schooling from home.

When tornadoes hit Western Kentucky last winter, he rallied Kentuckians to raise money through a telethon. And when heavy rainfall and floods damaged communities in Eastern Kentucky this summer, he did the same, pulling our State together to help victims rebuild. In total—in total—Coach Cal's telethons have raised more than \$12 million for charitable ventures in Kentucky and across the world.

So thank you. Thank you, Coach Cal, for your service to our State. And congratulations on receiving this distinguished award.

The ACTING PRESIDENT pro tempore. The Senator from Nevada.

FIVE-YEAR ANNIVERSARY OF LAS VEGAS,
NEVADA SHOOTING

Ms. ROSEN. Mr. President, I rise today to honor the memories of the lives we lost and all who were injured or impacted in Las Vegas on October 1, 2017.

Five years ago, Nevada experienced tragedy on an unprecedented scale. In just 10 minutes—10 minutes—58 innocent lives were taken, hundreds of people were injured by gunfire, and hundreds more were injured in the chaos that followed.

Sadly, in the years since, two more victims of that night's attacks died because of the injuries they received during that shooting, bringing the death toll to 60.

During the attack, scores of heroic first responders—police officers, firefighters, paramedics, and others—arrived at the scene in an attempt to neutralize the threat and provide aid to the victims. Then hundreds of doctors, nurses, and other medical professionals—well, they worked nonstop to save the lives of those on the scene.

That day, the attack on the Route 91 Harvest Festival became the deadliest mass shooting in American history. Let me repeat that: the deadliest mass shooting in American history.

And to this day—sadly, even with all of the mass shootings we have endured over the past few years since then—1 October—1 October—still remains the single deadliest mass shooting in American history.

All it took—all it took—was just 10 minutes—10 minutes—for dozens of lives to be cut short, hundreds more injured and traumatized, with emotional and physical scars they will carry with them for the rest of their lives.

These were our friends. These were our neighbors. For some, they were their family. And now there are 60 families who will never be the same, 60 families who will forever have an empty chair every night at their kitchen table.

One October changed our community and the history of our State forever. It left a hole that can never be filled.

We are united in our grief for those we lost and also in our gratitude and admiration for the heroes that day who worked to rescue and aid those in danger. This dark day put on full display the tight-knit community of southern Nevada that we all know and love.

We came together to celebrate and thank the heroism for those who helped: our law enforcement officers, our first responders, our medical professionals, and so many everyday people. They just ran toward danger. They ran toward danger to help to get people to safety.

Hundreds lined up for blocks to donate blood. They offered their cars for people who were displaced by the chaos. Our community—well, it rallied together not just in the immediate aftermath but in the days, weeks, months, and now years after. I know why—because we are Vegas Strong, we are Nevada Strong.

Today, as we reflect on the 5-year anniversary since this horrific event, I stand here to honor the 60 individuals who lost their lives, the hundreds of survivors, and all of those—all of those—who experienced that traumatic event.

I stand here today to honor the heroes—our first responders, our community members—those who risked their lives to help others.

In Nevada, the Vegas Strong Resiliency Center that supports those affected by the 1 October tragedy, well, they launched a wide array of efforts to help people heal from and cope with the trauma and take action to honor the victims.

I have a floor chart here. I know it is a little hard to see, but one of the projects the Resiliency Center is organizing on this fifth anniversary is creating a lantern. This is a picture of a lantern. It has an outline of the Las Vegas skyline.

This lantern is going to serve as a sign of solidarity and respect for victims, survivors, and responders to the tragic shooting as it lights up the night with hope, because the lanterns are a symbol, representing the fact that out of the darkness of that night came the strongest light shining on countless examples of heroism—big and small—displayed by Nevadans.

But as we remember this fifth anniversary, we must also recommit ourselves to action.

In the nearly 5 years since 1 October, the epidemic of gun violence has impacted even more communities and broke more families' hearts all across our great Nation.

Finally, after the recent mass shooting at an elementary school in Uvalde, TX, Congress was able to finally come together and act.

We passed the most significant gun safety legislation in almost 30 years. This was a breakthrough, and we know it will help save lives, keeping guns out of the hands of dangerous people. But it cannot be an end point.

We can and we must do more to prevent these shootings. I know we can do

this while also respecting people's constitutional rights. We can take commonsense, bipartisan action, like permanently banning bump stocks and high-capacity magazines which allowed the 1 October shooter to fire so many rounds and cause so much carnage. Bump stocks, in particular, are modifications that only make guns more deadly.

The previous administration took regulatory action to address this issue, but the move to ban bump stocks now faces a wave of troubling legal challenges that threaten to reverse that progress.

That is why I call on this Chamber to finally pass legislation that will permanently ban bump stocks—permanently ban bump stocks—and cut off access to these deadly and unnecessary weapons devices.

Remember—remember this—with these devices, a shooter can fire hundreds of rounds to end or damage lives in mere minutes; 1 October, just 10 minutes.

Inaction is not an option. We owe it to those who experienced the pain of gun violence to do more. We owe it to the future generations to keep up our efforts.

At the end of the day, this is all about keeping communities safe. We must continue working to prevent more tragedies like the one that brought so much heartbreak to my hometown.

I ask all of my colleagues in this Chamber to remember and honor the memory of the 60 victims of 1 October as we mark this 5-year anniversary.

I yield the floor.

The ACTING PRESIDENT pro tempore. The Republican whip.

BIDEN ADMINISTRATION

Mr. THUNE. Mr. President, we are coming up now on 2 years of Democratic governance here in Washington, 2 years in which Democrats have controlled Congress and the White House, and the result of their 2 years in power is not encouraging. Economic insecurity is rampant; our energy security situation has worsened; and on the national security front, we are facing a raging crisis at our southern border, plus a disturbing increase in violent crime across the country.

If there has been one defining feature of Democrat governance over the past 20 months, it is inflation. When President Biden took office, inflation was at 1.4 percent—well within the target inflation rate of 2 percent—but then Democrats decided to pass a massive \$1.9 trillion spending spree, the so-called American Rescue Plan Act. The legislation flooded the economy with unnecessary government money, and the economy overheated as a result. Inflation quickly began climbing and then climbing some more and then some more after that.

We have now spent 6 straight months with inflation above 8 percent—6 straight months. The last time inflation was this bad, "E.T." was about to

hit theaters, and we still had more than a year to wait for “Return of the Jedi.” For those who weren’t around then, that was 40 years ago, in 1982.

Inflation, of course, has meant tremendous economic pain for the American people: huge grocery store bills, big utility bills, high prices at the pump. Americans are dipping into their savings to make ends meet. They are cutting back on essentials or putting basic living expenses on their credit cards.

In the month of August alone, inflation cost the average American household a staggering \$715—\$715, 1 month. Even if prices stopped increasing tomorrow, the inflation that we have already experienced will cost the average American household more than \$8,500 over the next year—\$8,500. That is a lot of money—a lot. That is a kid’s braces, essential car repairs, essential home repairs. It is the difference between putting something away for the kids’ college or leaving the education savings account empty. It is the difference between putting money away for retirement or spending every penny on necessities. And for too many families, that is the difference between breaking even or finding themselves in debt or worse.

Americans’ economic security has taken a serious hit under Democrat control in Washington, and there is little evidence to suggest that things are going to get any better anytime soon. Our economy is weakening. We have posted negative economic growth for each of the past two quarters, and estimates for third-quarter growth are not promising. Major companies have announced job cuts, and the nonpartisan Conference Board is projecting a recession in the coming months.

Unfortunately, the bad news is not confined to inflation or slowdowns in economic growth, neither of which, I should note, will be helped by Democrats’ misleadingly named Inflation Reduction Act or by President Biden’s massive student loan giveaway, which the Committee for a Responsible Federal Budget notes will “meaningfully boost inflation.”

One major driver of inflation is high energy prices, and we are facing a concerning situation on the energy front. As every American who has paid an electricity bill or filled up his or her car is well aware, energy has gotten much more expensive in Joe Biden’s America. Gas prices are up 57 percent since President Biden took office, and, after a temporary decline, they are on the rise again. Electricity prices were up 15.8 percent in August—the biggest year-over-year increase since August of 1981. Utility gas service is up 33 percent. And Americans are facing high prices to heat their homes this winter.

While there are multiple reasons for high oil and gas prices, Democrats’ hostility to conventional energy production is contributing to this energy price crisis. I am a big supporter of alternative energy, and I have been

working for years in Congress to advance renewable energy technology, but the fact of the matter is that we are still a long way from being able to rely exclusively on alternative energy technologies.

But that isn’t something that Democrats seem able to accept. They want their Green New Deal future, and they want it now. So despite our continued need for oil and gas resources, President Biden has adopted an energy agenda that is hostile to conventional energy production: canceling the Keystone XL Pipeline—an environmentally responsible pipeline project that would have reinforced our energy infrastructure; discouraging investment in conventional energy; limiting oil and gas leasing. The list goes on. And I haven’t even mentioned Democrats’ latest measure: a round of tax hikes on oil and gas companies that will drive up Americans’ energy bills and continue to discourage conventional energy production here at home.

The result of all this, the result of Democrats’ attempt to force an alternative energy future before that future is fully ready, will be reducing our energy security and prolonging the high energy prices that are hitting families and businesses.

Our Nation’s energy security has declined under the Biden administration, and so has our national security. I came to the floor last week to talk yet again about another raging crisis at our southern border—a crisis the President and Democrats are apparently content to continue to ignore. The flow of illegal immigration across our southern border has reached record levels. The Border Patrol and border facilities are overwhelmed, and border communities are struggling. The President and the Democrats, it would appear, could not care less.

Border security is an essential part of national security. It is not just individuals hoping for a better life who are attempting to make their way illegally across our southern border; all sorts of dangerous individuals are attempting to make their way across as well, from gang members, to human smugglers, to possible terrorists. So far this fiscal year, the Border Patrol has encountered 78 individuals on the terror watchlist attempting to cross our southern border illegally—78. And that is the number of individuals the Border Patrol has managed to apprehend. Given the incredible strain that Customs and Border Protection is under, it is entirely possible that other individuals on the watchlist have entered the country without our knowledge.

One thing we do know is that illegal drugs are flowing across our southern border and contributing to violent crime. My State is almost as far from the southern border as it is possible to get, but the flow of illegal drugs across the southern border has a direct impact on crime in our communities in South Dakota. The sheriff in my home county in South Dakota recently stat-

ed that there is a “direct connection between the high percentage of our violent crimes [in Minnehaha County] to the use and distribution of illegal drugs, in particular the drugs that are poisoning our community.” A substantial part of those drugs, he went on to note, are coming from Mexican cartels across the southern border.

Mr. President, there is a lot more to say about the way our Nation’s security has declined over the past 2 years. There is the increase in violent crime—an increase undoubtedly driven in part by woke Democrat prosecutors’ lax attitude toward serious crimes and Democrats’ willingness to accommodate the “defund the police” movement. There is our botched withdrawal from Afghanistan—a national security debacle that weakened our standing internationally and emboldened terrorists and the Taliban. And there are the President’s ill-conceived plans for a nuclear deal with Iran.

But I will stop here. Suffice it to say that it has been a rough couple of years under Democrat governance on both the economic and the security fronts, and if Democrats get a chance to continue with their policies, I expect the situation will continue to get worse.

Mr. President, I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Montana.

Mr. TESTER. Mr. President, interesting time we have here in the U.S. Senate. When the Democrats took over this body, we were coming out of a pandemic and not even close to being fully out of the pandemic yet. If you think back then, people didn’t have shots in their arms, the economy was in tough shape, and Democrats responded in a way that helped turn this economy around and helped put us on firm footing as a leading economic driver in this world.

It is interesting as I hear some of my folks on the other side of the aisle talk about things like inflation as it applies to food. I happen to have a couple of bills that will deal with that issue, and hopefully we can take it up in the lameduck. I don’t think we are going to have time to take it up before the election. But that will help not only our cow-calf producers but also consumers when it comes to meat prices. I would hope that we get a large number of folks from across the aisle to support us on that.

When we talk about the southern border and we talk about national security—and I am going to approach national security in a little different vein here with this CR—I think it is important to note that folks bring up a lot of things wrong, with few solutions.

The bottom line is that we need more manpower and we need more technology on the southern border. I have been down there, and I have seen how these folks bring drugs across the line. They don’t put it in backpacks—some, but very little. Most come across in cars and trucks and equipment. If we have the technology to be able to, for

lack of a better term, x-ray these vehicles, we can make a big inroad on what is going on from a drug standpoint. If we have the manpower—which, by the way, we are very undermanned as far as Border Patrol and border protection—we could make inroads into illegal border crossings also.

CONTINUING RESOLUTION

Mr. President, I am not here to talk about any of that stuff, per se. What I do want to talk about is a thing called a continuing resolution because that is what we are going to vote on hopefully today or tomorrow. Without this continuing resolution, we will be shutting down the government, so I would encourage all my fellow Senators to vote for this continuing resolution.

I am going to approach it from my position as chairman of the Appropriations Defense Subcommittee, the committee that funds our military. Our Armed Forces need this funding, this continuing resolution, for their paychecks, along with the thousands of civilian employees whom the Department of Defense employs.

The fact that we are debating a continuing resolution instead of a full government funding bill is truly disappointing. It is disappointing because Federal Government funding is Congress's primary job. People of Montana did not send me to the U.S. Senate to play politics and put off work that needs to be done to another day; they sent me here to get the job done. Failing to pass this CR would harm families, businesses, agriculture all across our great Nation. So step 1 is passing this continuing resolution, not kicking the can further down the road.

But let's do ourselves a favor. Let's make sure that this is the last CR before we agree to fiscal year 2023's funding package. I can tell you that after working for the last nearly 2 years as chair of the Appropriations Defense Subcommittee, that this bill shouldn't be about politics or partisanship; it should be about national security, keeping our Nation safe. But by continuing to pass CRs, our military will be operating on outdated budgets, our troops will not have the resources that they need to operate at the highest level, and it will waste taxpayer money.

Make no mistake about it, there are countries out there that wish to do us harm. With every continuing resolution, we are giving our enemies—and I don't need to bring them up per list—the ability to take a second breath and come after us: Russia in Ukraine; China, which is rapidly modernizing their military and threatening our technological edge. This is happening, along with a bunch of other stuff, while we are limiting our military's ability to assess emerging threats around the globe.

Without a full appropriations package, our Armed Forces lack certainty needed to operate to their fullest potential—certainty that is so important for everything. It is important for busi-

ness, it is important for families, and it is important for our armed services.

I know what it takes to craft these bills because, quite honestly, we worked on a pretty darned good appropriations bill, but we weren't allowed to bring it up. For the sake of our national security and for our men and women in uniform, we need to work in a bipartisan way.

If you want to talk about what is wrong with this country, the main thing that is wrong with this country is we point to the different issues and areas that we could do better on. The main thing that is wrong with this country right now is dysfunction in Washington, DC, and the fact that this place is totally divided, and everything is about politics first and policy second.

We need to find common ground. Failure to find common ground puts our troops and our Nation and, quite frankly, the whole world in danger.

I will close by saying that my colleagues need to pass this resolution, and we need to make sure that this is the last continuing resolution that we pass; that, in fact, we have full appropriations bills done in the proper timeline, which is at the end of the fiscal year, which is the end of September. Anything less should be considered a failure.

I yield the floor.

I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Ms. MURKOWSKI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

HURRICANE IAN AND TYPHOON MERBOK

Ms. MURKOWSKI. Mr. President, we are all watching the news this morning, as a very, very threatening and ferocious hurricane is bearing down on Florida, a storm that is causing great anxiety. Hopefully, people are as prepared as they can be, but the consequences of these storms, these disasters that we are seeing, are ravaging in ways that are seemingly more ferocious than before.

We saw that last week in Puerto Rico, and, just about 10 days ago, we felt the effects of Typhoon Merbok on the western coast of Alaska. I would like to take just a few minutes here this afternoon because, as I was watching the news as this Hurricane Ian is approaching the coast of Florida, I can't help but think about what the folks back home are facing as they have lived through a very terrifying disaster like the typhoon and then what happens next, because, unfortunately—and you know in your State very well with the fires that ravaged New Mexico—disasters come through and the attention of the country is focused on that, and we all want to be there to be of help and of assistance.

We have FEMA and we have the Red Cross, and we have everybody that is there, and it is all very important and very well intended. But then the next disaster comes. So maybe—I don't know—maybe, the people in New Mexico are thinking that we have forgotten them. I don't want the people of Alaska to think that we have forgotten what happened in their communities.

Typhoon Merbok came up from Japan, came across the gulf, up into the Bering Sea, and impacted an area of land on the coast of Alaska in excess of 1,000 miles.

To put it into context, it is as if the entire west coast of the United States—from the Canadian border all the way down to Mexico—were impacted and inundated by one massive storm. That is the size and the scope of what we experienced: hurricane-force winds and, in the Bering Sea, waves as high as 50 feet.

The impact to the land was extraordinary, with the strength of the wind, but it was this massive storm surge that came. We get tough storms in the Bering Sea. We get really tough storms in the Gulf of Alaska. But what we saw this year was a storm that was earlier in its intensity than we have seen in previous years.

Oftentimes, people think about Alaska and think, man, it must be tough when the ice is formed out over the whole sea and everything is locked in. Actually, that is when we have safety, because when there is ice, it takes you all the way up to the shoreline, and these massive storms with the wind can't build the waves to that level to eat away at the shore, to cause the destruction that we are seeing with, again, the intensity of the impact of this storm.

We in Alaska are lucky. There were no people who were killed or injured. Really, it is astonishing, given all that the area sustained. I think part of that was just due to being prepared, knowing that everybody had to hunker down. But when your community then is, literally, separated in two, as they were in Hooper Bay, where on the old side of town you are cut off from your evacuation center, which is the school, because the waters have risen to the point where it is no longer accessible, there is no way to get to safety, and it is blowing 80 miles an hour in the middle of the night, the only place that you can go to is the next house up, hoping it is going to be a little bit higher above the water.

And so it is a recognition that preparation is going to be key to saving lives, but it is also making sure that our coastal communities that are so exposed, as the many in Western Alaska are, that they are able to push back or hold back to the extent possible.

For some of the erosion, the threat that comes their way, we have seawalls that are nothing more than boulders that are built up, dunes and berms that have been built over the years. But, again, we recognize how minimal that

is in terms of a protective barrier when you have the extent and intensity of these storms.

This is where many Alaskans are feeling very exposed and very vulnerable, knowing we made it through this storm, but what happens with the next one, because now that berm in Shaktoolik is completely eroded away. For a good portion of the seawall in Nome, the rocks are just jumbled and scattered. What we saw in Elim, around their front street there, they had a seawall of sorts. It was like a giant had come in and just picked up those boulders and sprinkled them, threw them all around. The front street there that had just been asphalted a couple of years ago—the pieces of asphalt almost lifted up, peeled back like a piece of taffy, just curled over the beach there. You look at that and you cannot comprehend the strength of that storm surge, the strength of what had caused that to just buckle and heave and, literally, melt.

I had a chance over this weekend to go and visit the area. I flew up to Nome, and we were able to go out to Golovin and Elim on the first day. Elim is a community of about 125 people—pretty small. It is pretty small but pretty important in terms of what they do. They are trying to build a little subsistence harbor there. They are resilient people. But some of what we saw with the erosion and what that will mean to them and their community—what it is going to mean to them and their water supply.

Golovin is a little bit bigger of a community, several hundred people. Golovin was impacted in a way and a manner that was just almost mind-boggling. The surge from the storm came up over this isthmus there, literally lifting homes up off their foundation, floating them and depositing them in different locations.

We went down a couple of different streets, and you come around and there is a house literally in the middle of the road, and people are moving their four-wheelers on either side of it because the house is in the middle of the road. Another one on another corner that had been floated across was just kind of catawampus. These homes will never be habitable again.

Sand—you look at it from the air, and it is lovely golden sand, not something you would expect to see on the coast of Western Alaska. But this sand now has inundated the entire lower part of the community, making it a thick, spongy, soft—interesting, but it is really very, very impractical in terms of how we move this wet, soggy sand out of everything that has come into the community here.

The areas underneath the homes—the homes in most of these western communities are elevated on stilts, not very high but they are all elevated. They are elevated because you do have instances of flooding. But the flooding was so high that it came up underneath

the belly board of these homes and saturated the insulation underneath with water. But worse to the point is that water was mixed with the diesel, the diesel that had come from people's home heating fuel, their stove oil, the fuel they may have had for their snow machines or their four-wheelers. You could smell, going into the homes, the diesel that was below. What everyone was doing was literally ripping the insulation out from underneath their homes and buckets full of—dozer loads full of wet, soggy, contaminated insulation was being hauled off to the dump.

So that is all the activity that is going on now, and it is fast and it is frenetic. And it needs to be because on the day that I was there in Golovin and Elim, then 2 days later when I was in Hooper Bay and Chevak, the weather was kind of nice. It was decent. But in about 2 weeks—in about maybe 3 weeks—winter comes. Winter is on its way.

When winter comes, you can't move around. When the ice comes down out of the north, you don't have fuel barges that return to the area until the spring. That fuel barge comes in maybe May; in the upper river regions, June. Think about that. If you lost your fuel and the last fuel barge has come and gone and you weren't filled up, it is a long wait. What do you do? If you can't barge it in, you fly it in. Imagine what it means to fly in your fuel into these villages.

Construction materials. How do we get the construction materials up there, whether it is the sheetrock or the plywood or the insulation? You put it on the barge. Well, the last barges are like the fuel trucks. Barges won't be back until the spring. Right now, people are planning on: I need to fix up my home, but I am not going to be able to get the materials until June. What happens in the meantime? What happens in the meantime as winter comes? If you don't have any insulation under your home, if you haven't been able to get your home situated, you are going to be pretty vulnerable.

You may have made it through the storm, but it may be a very, very difficult and cold winter. It may be that your family of eight is now going to have to move in with another family that is already in an overcrowded situation. We don't have extra housing. There is no extra housing.

Everybody is moving as quickly as they possibly can to try to bring relief. We have the National Guard that are doing amazing things. Red Cross was out there analyzing. We were out there with the FEMA administrator. I took her to Nome, was able to take her to Golovin. She was able to see the destruction that came to the fish camps right outside of Nome. Fish camps are not where people go for a holiday. Fish camp is where people work. This is where they harvest and they process and they prepare their food, whether it is the salmon nets to catch the salmon,

the Beluga nets, the gear that they have for their fishing. If they are able to get caribou or moose, this is where they come and they process. They harvested their berries. Everything kind of comes together at fish camp. Then you are ready for winter.

What happens when you have harvested and gathered and fished and you put it all in your freezer and then the power goes out, as it did for multiple days, and you lose everything in your freezer? The power went out here in Washington, DC, when I was back in Alaska in August, and I lost the stuff in my freezer. You know what? I am just fine. I can go down to the grocery store here. Folks in Elim don't have that opportunity.

The people in Golovin and Chevak and Hooper Bay and Shaktoolik and all the other places that have been impacted—the outdoors is their grocery store and the outdoor grocery store is now shut down because salmon season is over, fishing is pretty much over, berries are gone, moose and caribou—maybe they will be able to get a little bit of game, maybe not.

Think about what that means when your food source is now gone. You lost your boat because that was swept away or demolished. You have lost your motor. This is not a recreational boat. This is how you feed your family; this is how you live. The four-wheelers are just thrown up and crumbled and crushed. That is not recreation; that is how people move around. When you think about the ability then to—what do you do now? What do you do now?

I am sharing this with people because this is what has been keeping me up at night and getting me up really early in the morning to figure out what more we can do—what more we can do to help the people in these small communities that lived through a very scary natural disaster but who have looming in front of them perhaps a very frightening winter—a cold winter, one where their food resource is gone, where the expense of living has always been high, but now—we don't even know how to account for how high it is.

I was talking about this with a guy in Chevak who said he had ordered a little bit of lumber. He was working on something. He didn't even say what it was. It was \$1,500 worth of lumber, but it cost him \$2,200 to get it there, to freight it up.

I went into the grocery store, as I do in as many of the small towns and villages as I can. I always price things like, What is a box of Tide? I know what it is in Anchorage, I know what it is in Fairbanks, but in Chevak, it is \$45 before the tax is added on to it.

But I had heard—I had heard this crazy story that water, bottled water, was more expensive than fuel. That can't possibly be. Fuel is \$7 a gallon out there in Nome and probably more than that in Chevak. A 24-pack of bottled water—I don't know what the label was, it was like generic bottled water you probably get at Costco—\$91.

That did include tax. It was \$91 for bottled water. And this is in a community where they were still on a boil water notice because they were just still checking out their water systems.

We are working hard. Nobody is sitting back and waiting for the Federal Government to come in and help them because they don't have time. They are cleaning things up.

The FEMA administrator saw in Nome—in fairness compared to where she was in Puerto Rico, it probably didn't look that bad. But when you peel it back and you look at the damage and you realize the vulnerability going forward into this winter, that is where it looks scary.

So we are using every resource that we have—every volunteer, every agency. People are there and they are putting their muscle into it. We have asked for the same support that President Biden has given to Puerto Rico with a 100 percent cost-share waiver for the first 30 days to get things cleaned up. I am hopeful—I am desperately hopeful—that the administration hears us on that.

For us, right now, it is this immediacy of time to get things pulled back together as fully as we possibly can because we cannot—they cannot—be in a situation where, in the middle of winter, when resources may be there but they are a long way away and they are very expensive, that we then realize that we have to provide additional support and additional relief.

There is a resilience in Alaska and, certainly, a resilience in Western Alaska. These people have lived in these villages for thousands of years—maybe not exactly the same place, but they are not going anywhere. They are not going anywhere.

And what I feel compelled to do is everything in my power to make sure that they are not forgotten and that they and their families are able to move forward in these next months.

With that, I just share that my thoughts and my prayers are not just limited to those in Alaska, but we think about all those who have suffered due to disasters, whether in New Mexico, in Puerto Rico, or those who are very, very fearful in Florida right now.

I yield the floor.

I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CORNYN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

LAW ENFORCEMENT

Mr. CORNYN. Mr. President, despite the gridlock that occasionally grips this Chamber, the Senate has managed to advance some great bipartisan bills since the beginning of this Congress.

All of the attention seems to focus on our disagreements, not where we agree,

and there is no question that there are big disagreements here and for good reasons. But the media seems to miss the smaller but no less important bills that earn bipartisan support every day.

Over the last couple of years, the Senate has unanimously—unanimously—approved bills that I have introduced to support victims of child abuse, provide tax relief to survivors of human trafficking, strengthening our trade relationships with Canada and Mexico, and building safer and healthier communities.

It is no secret that our country is in the midst of a mental health crisis. We do not have a mental health delivery system in America. We made some great strides recently with the Mental Health and Safe Communities Act that made an unprecedented investment in community-based mental health care.

We all know that the mental health crisis does not discriminate. It affects people of all ages, from all walks of life, and it is creating serious challenges for law enforcement who are often the first to respond when someone is experiencing a mental health crisis. Police officers will tell you that they don't have the training or expertise, ordinarily, to assist these individuals in the most effective way possible because they are not mental health professionals. We can't expect the police to solve every problem that they face on the streets of our country, whether it has to do with mental health, drug overdoses, homelessness, or the like. They have simply been asked to do too much without the resources or support they need, and that needs to change.

That is where the Justice and Mental Health Collaboration Program comes in. For nearly two decades, this program has provided critical grants to help law enforcement assist individuals experiencing a mental health crisis. That includes mental health courts, crisis intervention teams, and other programs that promote public safety and improve mental health outcomes and reduce recidivism.

Communities across my State of Texas are working to bridge the gap between criminal justice and mental health, and I was able to hear about some of that work during the August recess.

In the city of Pharr, in the Rio Grande Valley, for example, I sat down with local law enforcement officers and mental health professionals, as well as local civic leaders, to talk about the city's innovative mental health unit.

The Pharr Police Department launched this unit in 2020 to improve the quality of outcomes for individuals in crisis and the community as a whole. Mental health officers are trained to respond to these crises in the most effective and compassionate way possible, and the city of Pharr has experienced great results over the last couple of years. The program has even been recognized as the "Organization of the Year" at the Texas Crisis Inter-

vention Team Association annual conference.

It is a shining success story, and the Pharr Police Department is eager to do more. That is why the Justice and Mental Health Collaboration Grant Program is important—because it provides additional resources.

In the past, the mental health unit in the city of Pharr received a \$550,000 grant, which will be used to expand the reach and impact of the program in the community, and I introduced a bill with Senator KLOBUCHAR, our colleague from Minnesota, to ensure that these grants can deliver even bigger benefits.

Our bill would allow grants to be used for mental health courts and veterans treatment programs—two incredible resources to provide individuals who are struggling with the treatment they need.

Grant recipients could also use these funds to improve officer training. As I said, most police officers aren't trained to deal with people in a mental health crisis, and things like deescalation training are really important for the safety of the person experiencing the crisis as well as the law enforcement officer.

But these grants can also enhance services for substance use disorders and suicide prevention programs, and they would be able to invest in 24/7, 365-day crisis response capabilities.

All of these recommendations in this legislation came from the men and women on the frontlines. They come face-to-face with America's mental health crisis every day, and these are the changes that they have suggested and asked for.

But, obviously, I am not alone in supporting the program. As I said, this bill was introduced with Senator KLOBUCHAR, and it has more than a dozen bipartisan cosponsors, including the chairman and the ranking member of the Senate Judiciary Committee. And the bill passed the U.S. Senate last summer with unanimous support.

So that is just one example of the bipartisan work we have done here that doesn't get a lot of attention but will go a long way to improve our criminal justice system and how it deals with people who are struggling.

Last year, the Senate approved legislation that I introduced with Senator WHITEHOUSE, the Senator from Rhode Island, to help incarcerated individuals break the cycle of addiction. This legislation updates the Residential Substance Abuse Treatment Program and expands it to treatment in jails and prisons across the country. The program has already provided incarcerated individuals with access to treatment for substance use disorders. That treatment is coupled with programs to prepare these men and women for reentry and to provide community-based treatment once they are released, hopefully, to help them lead productive, law-abiding lives.

Our legislation opens up even more opportunities for successful rehabilitation and continued recovery, and it

gives providers more options when it comes to treating substance use disorders. It requires program staff to be trained on the science of addiction, evidence-based therapies, and strategies for continuity of care. And it ensures programs are affiliated with providers who can continue treatment after incarceration.

We have done a lot of good work, if I can say so myself, on a bipartisan basis, to try to deal with things like addiction, things like mental health crises because typically what happens in the absence of these programs is law enforcement ends up getting a 9-1-1 call, and they have nowhere to take the person other than to the local jail.

Not that long ago, I met with a group of major city police chiefs, and I was asked by a friend of mine—one of the police chiefs—who said: Would you like to meet the largest mental health provider in the country? He is the police chief of the Los Angeles Police Department.

So in the absence of these kinds of programs, these innovative programs, what you are seeing is people warehoused in jails or prisons, only to repeat their offenses again because the core problems that they are experiencing aren't being addressed. That is true in addiction. That is true with mental health.

So these changes that I am talking about were not drafted in a vacuum. We consulted with law enforcement, criminal justice specialists, and behavioral health experts. And, once again, this bill passed unanimously in the Senate.

Despite the fact that these two bills that I have talked about got support of 100 Senators, both have hit a brick wall in the House. The House has yet to schedule a vote on either one of those pieces of legislation. It is not clear to me why the House won't take up and pass these obviously nonpartisan, important pieces of legislation.

These are two bills to improve the way our criminal justice system supports people who are struggling and gives them the best possible shot at healthy and productive lives.

They were drafted here, as I said, on a bipartisan basis, based on feedback and input of the people who know this topic best, and they will improve public safety and individual outcomes.

So I hope the House will take up and pass these bills without further delay. I hope there isn't a resistance to these bills because some of this money goes to fund police departments.

As we have seen over the last couple of years, some of our Democratic colleagues reflexively oppose any effort to send funding to police departments. We all remember the "defund the police" movement.

When this became a major political liability, though, obviously, those who had advocated for defunding the police tried to run for cover.

Last week, the House passed a partisan police funding bill that is loaded

down with so many poison pills that it stands no chance of becoming law here in the Senate. In short, they can now say they voted for a police funding bill, even though they know it is guaranteed to go nowhere.

Meanwhile, there are great bipartisan bills that do support the police that are just one vote and a signature away from becoming law. The difference is, these aren't messaging bills. These aren't designed to provide people with political cover or mistaken positions that they have taken in the past. The goal was never to make a point or force a tough vote on our colleagues across the aisle.

Bipartisan, good policy—these bills give law enforcement the tools they need in order to succeed at the very difficult job we know they have, and both of them passed the Senate without a single dissenting vote.

So given the fact that America is facing a mental health crisis and an overdose epidemic, there could not be a more important time to take up and pass these bills.

So I hope if anybody in the House is listening in the leadership, they will consider the fact that by one vote they can get these bills on the President's desk, and we can't let antipolice rhetoric stand in the way of good policy or helping those who deserve and need our help.

I yield the floor.

I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. SASSE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. HICKENLOOPER). Without objection, it is so ordered.

IRAN

Mr. SASSE. Mr. President, the human spirit abhors tyranny.

Since February, the world has witnessed examples of extraordinary courage. In Ukraine, we have watched ordinary men and women mount a defense of their homes and their homeland against overwhelming odds—people never having handled firearms before who are getting training, getting arms, getting munitions, and joining together in the cause of defending their homes and their homeland. We know what it has cost them. Across the border, we have seen thousands and thousands of ordinary Russians challenge the suicidal thuggery of Vladimir Putin. We know what it has cost them too.

Today, I want to call our attention to the courage on display in a different part of the world. I want to look to Iran.

Two weeks ago yesterday, on September 13, Iran's so-called morality police arrested a young woman named Mahsa Amini. They detained her on the grounds that she was wearing her hijab improperly. She was bundled into a

van, where eyewitnesses could hear the police beating her. A few hours later, she was delivered to a local hospital, where she was declared brain dead. The police shamelessly claimed that she had had a spontaneous heart attack.

Thousands upon thousands of Iranians have poured into the streets since. Protesters are calling for an end to the savagery that has made absurd arrests and vicious beatings a regular part of the rhythm of life in Tehran. They are demanding dignity for the millions and millions of people who have lost it under Tehran's maniac theocracy. This is no small thing, what they have done—the courage that is on display as they pour into the streets. Protests have erupted now in more than 80 cities and in all 31 of Iran's provinces. This is not a minor demonstration.

The mullahs are facing one of the most significant challenges to their rule since they seized it 43 years ago, in 1979. How has the regime responded? As expected—with more brutality, with more repression, and with more savagery. Human rights groups estimate that 76 people have been killed so far by the authorities.

Meanwhile, the crackdown has also included a shutting off of social media and the internet. They hope that a country and a world that can't see their thuggery won't notice it, will pretend it doesn't exist, won't know. Well, they know, and we know. The Iranians know how this regime operates. We know that these pathetic cowards have no regard for human dignity.

Who are they?

These bloodthirsty men are the goons who hang homosexuals from gallows, who protect child rapists, who deny women education. The regime is rotten to the core. The people who are suffering under it know, and we know. These men have told the world exactly who they are again and again and again.

In 2009, Iranians erupted at the grotesque human rights abuses perpetrated by then-President Mahmoud Ahmadinejad. In an election riddled with fraud, the world saw who he was again. During the Green Revolution, thousands of protesters, including key opposition leaders, were arrested and thrown in Iran's dungeon prisons. Many were tortured, and several dozen were killed. A 26-year-old woman, a student, was shot from a nearby rooftop by pro-government militia men. Her dying moments were recorded by cell phone video and were broadcast around the world.

We know who they are.

Ten years later—3 years ago, in 2019—massive nationwide protests erupted again. This time, it was following an announcement of massive, unsustainable hikes on gas prices. The protests and the violence that followed were the worst since 1979.

Hundreds of people took to the streets, and the government responded with a campaign of systemic savagery,

hoping to drive people back into their homes in order to hide the truth and to not admit to what this regime was and the ways that they failed. Protesters were shot from rooftops and helicopters by the Iranian Revolutionary Guard. Their troops opened fire on unarmed protesters who were attempting to block roadways and entrances. In one southwestern city, IRGC forces pursued several dozen, mostly young, unarmed protesters into a march outside the city and then began massacring them. Most reliable outside observers believe that about 1,500 protesters were killed.

In 2019, Tehran also conducted a near-total internet shutdown, plunging the country's 83 million people into information darkness for about 6 days. That practice, as we are seeing again right now, as we see this month, has become one more regular instrument of terror. These guys are scared of sunlight. They are scared of information. They are scared of the truth.

We know that the despots in Iran who brutalize their own people also export their terror tactics. Look at the last 2 months alone.

In July of last summer, 2021, a group of Iranian spies tried to kidnap Masih Alinejad—an Iranian-American journalist and human rights activist—at her home in New York. In July of this year, she was the target of an assassination attempt again at her home in our country.

We learned in August that a member of the IRGC had plotted to assassinate former National Security Advisor John Bolton on American soil.

Former Secretary of State Mike Pompeo and former Iran Envoy Brian Hook still require personal security details everywhere they go because Iran has put targets on their backs in our country.

It was also just last month that, inspired by the Ayatollah Khomeini's 1989 fatwa, an American man attacked and nearly killed novelist Salman Rushdie during an appearance in New York.

Then, in August, Vladimir Putin received his first shipment of Iranian drones—birds of a feather.

Inside its borders and beyond them, the regime in Tehran thinks nothing but bloody thoughts. They think no one has dignity who doesn't subscribe exactly to their theocratic views. It is long past time that American policy and the policies of our friends and allies recognize these blunt facts. We should tell the truth.

In 2009 and again in 2019, we had the opportunity to support and encourage protesters who were agitating against a regime that is their enemy and is ours, and in both cases, under administrations Democratic and Republican, we failed the test.

Last week, President Biden told the U.N. General Assembly:

Today, we stand with the brave citizens and the brave women of Iran, who right now are demonstrating to secure their basic rights.

It is a good start, but it is far from sufficient. It is far from the end.

Right now, America's policy toward Iran is hopelessly schizophrenic. We cannot stand on the side of Iranian protesters at the same time that we are trying to re-sign a nuclear deal with the same mullahs who would release billions of dollars back into their hands, help them shore up their power, and do nothing to prevent putting a catastrophic weapon into their genocidal hands. President Obama chased a flawed nuclear deal with Iran's terror state instead of more aggressively standing with the Iranian people. Today, the same hodgepodge of national security advisers is at it again.

Newly announced sanctions against the leaders of the Ministry of Intelligence and Security, the Army Ground Forces, and the pro-government militias are good, but we cannot stand on the side of the men and women of Iran who are in the streets at the same time we refuse to sanction the leaders who matter most. Ayatollah Khomeini and the circle of elites around him continue to escape serious consequence.

We shouldn't trick ourselves and should not delude ourselves into thinking that economic sanctions are a magic wand or that the mullahs themselves care very much about the economic pain that the people under their regime are suffering. We should not think that the mullahs care about elite opinion in Paris. We have to have a serious top-to-bottom evaluation of our Iran strategy, and a coherent policy must begin by telling the truth over and over and over again.

We cannot stand on the side of the people on the streets demanding dignity at the same time that we welcome Iran's President—someone personally responsible for show trials and mass executions and assassination attempts on our soil, in our country. We can't allow him to spout lies and propaganda on our same American soil as we did last week at the U.N. General Assembly in New York.

Now is the time for a serious, coordinated policy that admits the threat that Iran poses, not just to its people and its neighbors but also to America, and to take seriously our commitment to the rights and freedoms of all 7.8 billion people across this globe created in God's image.

We can start by helping illuminate the government-imposed blackout so that Iranians can see what their government and its blackshirts are doing—more light, more information. We can expand and intensify the sanctions regime that has pushed Iran to the brink in the past, before we lost our nerve. We can amplify the voices of the Iranian protesters and stop providing platforms to the regime's propagandists. We can make sure that the voices of the Iranian people are heard by keeping the internet on while Tehran works to put the country back into the black box of despotism.

The courage of men and women on the streets of Iran today has not gone

unnoticed. They have imagined the possibility of an Iranian future no longer under the thumb of Tehran's bloodthirsty dictators. We should be able to imagine that future too and to do more to make that a reality.

The Iranian people hate Tehran's blood-soaked tyrants. This is not a regime that has the consent of the governed. The American people are on freedom's side. The administration should drop the fantasy of another nuclear deal, walk away from the table, and turn the screws on these monsters by, first, telling the truth again and again.

We ought to do everything we can to celebrate the heroism of the Iranians in the streets and to expose Tehran's human rights abuses around the watching world. And the best way to do that is by making sure that the internet stays on in Iran—more light, more truth, more information.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. MARSHALL. Mr. President, I ask unanimous consent that Senator MENENDEZ and I be permitted to complete our remarks prior to the scheduled recess.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS CONSENT REQUEST—S. 4914

Mr. MARSHALL. Mr. President, I rise in support of our legislation to formally designate the major Mexican drug cartels as foreign terrorist organizations under Federal law.

It would also require the State Department to issue a report to Congress on additional cartels that meet the criteria for foreign terrorist organizations designation and require the Department to designate them as such within 30 days of the report. This bill would give us greater tools to push back against the cartels fueling the White House's deadly open border crisis.

This past March, I was honored and proud to lead five Kansas sheriffs to the border to meet with Border Patrol officers and survey the ongoing immigration crisis at our border. With our own eyes, we saw the activities of the major Mexican drug cartels that qualify them for designation as a foreign terrorist organization, as they are transnational entities that engage in textbook terrorist activity, such as kidnapping, assassination, and endangering lives with explosives and firearms.

Additionally, these cartels are responsible for the deaths of hundreds of thousands of Americans, especially young Americans in their prime.

Fentanyl has quickly become the leading cause of death among adults ages 18 to 45. Last year, the number of drug overdose deaths in the United States topped 100,000, with fentanyl being the cause of more than two-thirds of them.

The vast majority of fentanyl precursors, as we all know now, are manufactured in China and then chemically

turned into lethal fentanyl by the cartels. Next, the cartels smuggle the poison into the United States via the southwest border. In fact, the DEA reports that an astounding 80 percent of the fentanyl in America comes into our country through the U.S.-Mexico open border.

Last week, we introduced the Cooper Davis Act, a bill named after Cooper Davis, a Johnston County, KS, teen who tragically lost his life to fentanyl poisoning last summer after just taking one-half of one pill of fake Percocet that contained, unfortunately, a lethal dose of fentanyl.

Sadly, Cooper Davis is not the only victim in Kansas from the actions of the Mexican cartels, as most every day, we lose a young person in Kansas due to the actions of these terrorist cartel operations. And I know every single one of my Senate colleagues have victims from their States who have been poisoned and murdered from this same illicit fentanyl.

That is right. Americans are dead, hundreds being murdered every day because of this administration's open border policies and zero respect for border security.

Last year, the Border Patrol seized at the southern border 11,000 pounds of fentanyl. That is over 5 tons of this poison. They seized over 5,000 pounds of heroin, nearly a ton of meth, and almost a thousand pounds of cocaine, and, finally, 10,000 pounds of ketamine.

Of course, this is a fraction of how much of this poison actually crossed the border and was transported into our communities undetected, making every State a border State.

Regardless, this represents many, many multiples of amounts needed to kill every man, woman, and child in the United States. Indeed, this sounds like a weapon of mass destruction.

Joe Biden's open border policies are responsible for the deaths of thousands of young American men, women, and children.

To anyone who knows the brutal tactics and extensive operations that cartels use on both sides of our southern border every single day, there is no question that they should be described, designated, and treated as terrorists.

These are people who hang, behead, and burn people alive to threaten and control government officials in Mexico, and now with cartel members in most likely every State of the Union—yes, even in Kansas—they actively engage in these same dangerous, murderous tactics here domestically.

For more than 10 years, Texas Republicans have been trying to label Mexican cartels terrorists in an effort to try and cripple their empires.

This week, Texas Governor Greg Abbott made a declaration establishing a Mexican cartel division within the Texas Fusion Center at the Texas Department of Public Safety, which his office said will conduct multijurisdictional investigations with local law enforcement and other States.

The unsustainable crisis at the border has impacted not only Americans but the migrants themselves, who have often traveled hundreds of miles on foot and can be exploited by these terrorist organizations.

Just yesterday, the Washington Examiner reported those being brought across the border by coyotes are paying an average of \$8,600 in total smuggling fees this year, mimicking what Mafias do who charge a fee—literally a tax—to enter their territory and pass through.

The Biden open border surge has enriched these terrorist organizations, and we must step up our defenses against them as they continue to wreak havoc on communities all across the country. It cannot go on any longer.

Listen, designating Mexican drug cartels as foreign terrorist organizations will give our Federal Government new ways to fight back; that is, if the White House will allow them to.

A foreign terrorist organization designation provides additional tools for law enforcement and national security authorities to take action, including by providing additional investigation and intelligence resources and sanction capabilities.

For example, a foreign terrorist organization designation would, No. 1, make it unlawful for any person who knowingly provides “material support or resources” to the cartel to enter the United States. Next, it prevents any member of the designated cartel from legally entering the United States. And, finally, it would allow the Secretary of the Treasury to block all assets possessed or controlled by the cartels.

The cartels are playing a massive role in the ongoing crisis at the border. By exploiting Joe Biden's open border policies, the cartels have increased their power and wealth at the expense of innocent lives that get in their way.

I encourage my colleagues to support this legislation to formally designate the major Mexican drug cartels as foreign terrorist organizations under Federal law and help stem the tide of dangerous drugs and other illicit goods pouring across our open southern border.

Surely, this is an effort we can all get behind, as every Senator in this body affirmed by oath that they would support and defend the Constitution upon their swearing in. This, importantly, includes providing for the common defense of our people.

Personally, I will not rest until we stop this war on the youth of young Americans.

Mr. President, I ask unanimous consent that the Committee on Foreign Relations be discharged from further consideration of S. 4914 and the Senate proceed to its immediate consideration. I further ask that the bill be considered read a third time and passed and that the motion to reconsider be considered made and laid upon the table.

The PRESIDING OFFICER. Is there objection?

The Senator from New Jersey.

Mr. MENENDEZ. Mr. President, reserving the right to object—and I appreciate my friend—I do consider him my friend—and colleague and his concern, which we mutually share on this issue. But this legislation was introduced 7 days ago—7 days ago. Most of our colleagues have not even had a chance to read it.

The Foreign Relations Committee, which I have the privilege of chairing, has not reviewed or marked up this bill since it just got referred to us. And to my knowledge, my colleague has not made any effort to engage the committee.

Especially in light of its sweeping and mandatory nature and the lack of any waiver—even if a waiver were in our national interest—members with expertise in foreign affairs need to have the opportunity to scrutinize the bill.

Regular order allows us to refine legislation. It ensures we avoid unintended consequences, and that is needed here.

As chairman of the Foreign Relations Committee, I take the threat of Mexican drug trafficking organizations seriously. During my 30 years in Congress, I have made significant efforts to combat drug trafficking in Mexico, Latin America, the Caribbean, and around the world.

Given the potential impact of this legislation, I would just ask my colleague the following questions for his consideration—these are the questions I ask myself as I am looking at his request: The U.S. Congress has developed a framework of sanctions specifically to target drug traffickers. It is called the Kingpin Act. There is substantial overlap between the Kingpin Act and what is being proposed today. Is this redundancy helpful, or is it hurtful? Why is it needed?

S. 4914 provides no new funding for the management of our sanctions program targeting foreign terrorist organizations, and we are deeply engaged in our whole-sanctions operation as it relates to Russia and Ukraine. This would be additional, but it has no additional resources. Do we want to stretch the U.S. Government's personnel and resources that target foreign terrorist organizations? That is what the legislation would do.

Does my colleague want to explain to the American people why we should have less personnel and funding dedicated to countering Hezbollah, ISIS, al-Qaida, because, as it is, that is what the legislation would do.

The members of the Foreign Relations Committee take the threat posed by Mexican cartels very seriously. We know that the cartels are deeply involved in the production and trafficking of fentanyl. We know that this is a substance so lethal it kills tens of thousands of American citizens every year.

That is why in June, the committee approved the FENTANYL Results Act, legislation designed to strengthen the United States response to fentanyl trafficking—legislation that received unanimous, bipartisan backing of all members of the Foreign Relations Committee, legislation that we hope can be enacted into law before the end of this Congress. That is a serious legislative effort conducted through normal order of the Senate.

I would just say to my friend, if you really want to address the impact that Mexican cartels and drug trafficking have on the American people, I urge you, respectfully, to work through the Foreign Relations Committee and join us in a meaningful legislative effort.

Finally, before I object, I would just say, I know that my colleague keeps talking about the Biden open borders. Well, it is a little incongruous when you self-designate and made in your comments that it is the U.S. Customs and Border large catches of fentanyl and other drugs under the direction of this administration that is making those catches. It is either that we have an open border and anything comes in, or it is that the U.S. Customs and Border Patrol that is actively engaged is stopping the flow of significant amounts of drugs.

For all of those reasons, at this point in time, I will have to object.

The PRESIDING OFFICER. Objection is heard.

The Senator from Kansas.

Mr. MARSHALL. Mr. President, I certainly do respect the comments of the chairman.

I would ask him a question: What would you tell the mother of Cooper Davis? What would you tell the mother of the hundreds of Americans who are going to die today from fentanyl poisoning?

Whatever we are doing now is not working. This is a war. Just yesterday morning, at 1 a.m., we were given 250 pages of legislation that we were asked to vote on that evening. This is a 3- or 4-page bill.

I have declared war on fentanyl. Every day in Kansas someone is dying from fentanyl. Every day in the State of New Jersey probably several people are dying from fentanyl poisoning.

I would ask the chairman: Whatever we are doing, it is not working. What more can we do? What do I tell Cooper Davis's mom? What do I tell these people out there whose babies are dying?

They are young adults being taken from the prime of their lives. Whatever we have done is not working. This stuff is coming over by the tons. What we have captured is a fraction of what is reaching America. That is why Kansas is no longer safe. It is not safe for any of our young adults. This is why this Halloween we are going to have to put our kids on special watches as this candied fentanyl comes across the border. I don't see how anyone who cares about our youth and young adults could object to this.

I yield the floor.

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. MENENDEZ. Mr. President, I can't let the question rhetorically hang there.

I would say to my colleague, first of all, for all of us who have been fighting this issue on a bipartisan basis—I think his bill has only got Republican sponsors on it, a few—that we have been fighting this, and this is a continuous fight. And, yes, every life that is lost is a life that we mourn. But what would I say to them?

I would say, well, if we get the Fentanyl Results Act legislation passed, which passed the committee on a bipartisan basis, we would have a bipartisan approach toward dealing with this.

I appreciate that my colleague has declared war on fentanyl, but just because he has declared war doesn't mean that his view as to how you meet the challenge is the ultimate result, is the ultimate solution.

So in good faith, I offer our colleague to work with us. But you can't end up making the Senate the Committee of the Whole. If we want to do that, good, let's abolish all of our committees, and let's all sit here and we can bring up legislation after legislation that was just introduced, where nobody has a chance to read it and nobody has a chance to understand the unintended consequences, as noble as the intent might be. But that is what my colleague has done on more than one occasion now. He introduces a piece of legislation and, days after, comes to the floor to seek its approval. Well, that bypasses the entire system that is meant as a check and balance to get the best legislation to accomplish a common goal.

So that is what I would say. We need to work on this together. We are committed to it. That is why we passed legislation in the past. That is why we just passed legislation recently. I hope my colleague will join us, and maybe we can get it in the NDAA together.

With that, I yield the floor.

RECESS

The PRESIDING OFFICER. Under the previous order, the Senate stands in recess until 2:15.

Thereupon, the Senate, at 12:48 p.m., recessed until 2:15 p.m. and reassembled when called to order by the Presiding Officer (Ms. ROSEN).

AFFORDABLE INSULIN NOW ACT— MOTION TO PROCEED—Continued

The PRESIDING OFFICER. The majority whip.

UKRAINE

Mr. DURBIN. Madam President, it has been a little more than 7 months since Russia launched its illegal invasion of Ukraine, and the destruction that has followed is unbelievable. We

have all had a chance to bear witness to the brutal reality of Russia's invasion as Ukrainian forces have recaptured territories like the city of Izyum.

Soon after the city was liberated, Ukrainian forces discovered mass graves filled with hundreds of bodies, including children. Some of the bodies had their hands tied behind their backs and their skulls crushed, and many showed signs of torture. The images that have emerged from Izyum prove what we have suspected for some time: The mountain of evidence of Russian war crimes is sky high.

These photos illustrate what the Ukrainians are finding in recaptured territory. They are sending out people to redig mass graves to find out just what happened to members of their family and neighbors and their friends.

The same thing is illustrated by this photo as well. In the shadow of this beautiful church, they are finding mass graves left behind by the Russians.

Today, I had the honor of presiding over a hearing of the Senate Committee on the Judiciary, focusing on the role we must play in the United States in holding Putin and his thugs accountable for these heinous war crimes. The message was clear: Our Nation must continue the legacy we began with the Nuremberg trials by ensuring that Russian war criminals are brought to justice. And a critical step in doing that is to make sure that the perpetrators of these atrocities find no safe haven anywhere in the world, let alone in the United States.

That is why I have introduced the Justice for Victims of War Crimes Act with the ranking Republican Member, Senator GRASSLEY. It closes a shameful loophole in American law that has allowed war criminals to escape justice. Our legislation updates the War Crimes Act so foreign war criminals who try to flee to America can be prosecuted, even years after their crimes were committed. It is only a starting point, but I hope we can build on it to finally enact the law in this country prohibiting crimes against humanity. This is an opportunity to send a clear signal to war criminals, like those in Russia today who systemically attack civilians, that America is going to hold you accountable for your crimes.

IMMIGRATION

Madam President, on a related topic, at our brightest moments, America has not only held war criminals and tyrants accountable; we have also provided refuge to their victims. Many of us in Congress can attest to that fact.

In fact, it is exactly how my family arrived in this country. Back in 1911, my grandmother left Lithuania in search of freedom. She boarded a ship carrying two things in her arms: a bag with her Catholic prayer book, published a year before the Czars outlawed its printing in Lithuania, and her 2-year-old daughter, my mother, Ona.

The moment my grandmother stepped foot on American soil, her life changed. From that moment on, she

and my mother were protected by an incredible shield: the U.S. Constitution, along with the rights and protections it guarantees.

But for Lithuanians, securing those same rights has not been so easy. The country struggled under Soviet occupation for nearly 50 years. Even after the Lithuanian people proclaimed their independence in 1990, their liberty wasn't guaranteed. In January 1991, 9 months after Lithuania held its first free elections, Soviet tanks rolled into Vilnius in a ruthless, last-ditch effort to crush the country's new democracy. Thirteen Lithuanian martyrs were killed that day.

I would like to think it was the sacrifice of those 13 Lithuanians, and millions who also suffered under communism, that inspired the current Governor of Florida to establish a new holiday earlier this year. It was entitled Victims of Communism Day. In his own words, Governor DeSantis created this holiday with the goal of "honoring the people that have fallen victim to communist regimes." In announcing this holiday, he asserted that "Florida will stand for truth and remain as a beachhead for freedom."

That is an admirable aspiration, but, sadly, it is one that the Governor of Florida has failed to live up to because, when it comes to standing up to ruthless dictators of our time, like Venezuela's Nicolas Maduro, Governor DeSantis and his allies are nowhere to be found. Instead of offering safe harbor to victims of Maduro's regime, these very same Governors have chosen to abandon and abuse their families.

This is no way to honor the victims of communism and political repression. It is a cowardly failure of leadership that violates our Nation's basic values.

When news first broke that Governors Abbott of Texas and DeSantis of Florida were using refugee families fleeing desperate conditions in Venezuela as political pawns, I couldn't help but wonder: What if it were my own family?

The families fleeing Venezuela are seeking refuge from the same menace that the victims of communists faced decades ago: political persecution and state-sanctioned violence. Under Nicolas Maduro, Venezuela has been a failed criminal state awash in human misery. It is so dangerous that the State Department warns Americans to avoid traveling to that country, and the people of Venezuela suffer every day under rampant corruption, human rights violations, hunger, and criminal mismanagement. I saw it for myself when I visited Venezuela a few years ago, just before Maduro's latest sham election.

Since then, things have grown worse. Hospitals are devoid of basic medical supplies, kids and parents are too hungry to go to school or work, and Maduro's barbaric regime is being propped up by some of the most repressive powers of the world, like Russia and Cuba.

A recent United Nations report found that Maduro and his cronies have been systemically repressing Venezuelans and gruesomely torturing their political opponents. These horrors have driven nearly 7 million Venezuelans to leave that country in desperation and fear. To put that in perspective, that is more than the number of Syrian refugees and nearly equal to the number of Ukrainian refugees fleeing active war in those countries.

Despite what some Republicans have claimed, families fleeing Venezuela are not "illegals" or "invaders." They are victims of the same ruthless tactics that once defined the Soviet Union. Instead of helping these families, Governor DeSantis and Governor Abbott declare holidays and have chosen to exploit their fear and confusion.

I met with a few of the families who were unwittingly placed on migrant buses to Chicago by Governor Abbott of Texas a few weeks ago. One of the people I met was named Carlos. He and his wife and two little girls were sitting at a table, and we were able to talk to them for about a half hour and ask questions.

Carlos was a hard worker in Venezuela, but the country's political and economic crisis was so severe that his job couldn't keep food on the table. His family was on the brink of starvation.

So on May 15, Carlos and his wife, along with those two beautiful little girls, decided to literally flee for their lives. They embarked on a 5-month journey, much of it on foot, to the Texas-Mexico border. It was a nightmare of violence, theft, and exploitation. Carlos told me that, at one point, he thought he would die, while spending 9 nights in a Panamanian jungle. By the time they were rescued by a local military force, all of their money was gone, their cell phones had been stolen, and they were penniless.

But they pressed on and eventually made it to America. They filed their claim for asylum. We are honored that they were brought to Chicago, though the circumstances were not good.

To me, Carlos is living proof that we have more work to do in ridding the world of violent repression and totalitarianism. These evils didn't suddenly disappear with the fall of the Soviet Union.

I actually share the Florida Governor's belief that America has the responsibility to stand in contrast to dictators like Maduro and Putin by actually defending truth and freedom. But that responsibility is far bigger than declaring a holiday, because it is one thing to speak out against the evils of communism or voice opposition to Maduro, but talk is cheap. The real test for our values begins when the victims of tyrants like Maduro arrive at our doorstep in search of freedom. I am sad to say that Governor Ron DeSantis and Greg Abbott have literally failed that test. To add insult to injury, these Governors not only refused to help these families fleeing Venezuela; they

wasted taxpayers' dollars on a political stunt that only made the problem worse and made us, as a nation, look weak and, to some of the world, look cruel.

Here is the reality. The most powerful way to stand up against dictators like Maduro is by honoring America's legacy as a beacon of freedom. That means coming to the aid of families like Carlos's—families who are applying for asylum the right way and seeking a fair shot in America, like our own families once did.

In fact, we need workers. We have 11 million unfilled jobs in this Nation and 5 million unemployed Americans. Let's put young, able-bodied people like Carlos to work in jobs that Americans don't want. Let's get them on the books and give them their fair shot so they can finally enjoy the security and safety for their families that was denied to them in their home countries. They will contribute to a better America.

Time and again, immigrants have shown us that they rise to the occasion, work harder than most, and achieve things unimaginable. They can do it again, and they will. Let's prove that America was and is better than the cold, iron fist of authoritarianism.

I yield the floor.

The PRESIDING OFFICER. The Senator from Virginia.

NOMINATIONS OF MICHELLE KWAN AND MARI CARMEN APONTE

Mr. KAINÉ. Madam President, I was scheduled to come to the floor today to offer live UCs to bring up two Biden nominees—very important nominees—to assume diplomatic posts in the Western Hemisphere.

Senator SCOTT of Florida was scheduled to be here to oppose my UCs and have a dialogue. The hurricane in Florida has pulled him away, and so he is unable to be here. I am left with the case where there is an objection, but the objector can't come for a reason that I understand. Senator SCOTT's team has indicated that he will likely be here tomorrow, and we might be able to repeat this tomorrow.

What I thought I would do, having the floor, is say a little bit about these two countries and these two nominees because I hope Senator SCOTT might watch this or his staff might give him the transcript because I think, if he does, he will see that they are both highly qualified individuals. I want to talk about both, but I will not make the motion at the end of my comments with respect to unanimous consent.

I would say that both Michelle Kwan, who was nominated by President Biden to be our Ambassador to Belize, and Mari Carmen Aponte, who was nominated to be our Ambassador to Panama, are both highly qualified individuals, as I will describe.

But the countries are really important. Belize has not had an ambassador confirmed for more than 5 years. Panama has not had a confirmed ambassador for more than 4 years. And, sort

of, the theme for both of these is, Why punish good behavior? These are great allies of the United States, both Belize and Panama. They are both doing some really important work with us right now, and they deserve to have confirmed ambassadors.

If we won't confirm an ambassador for more than 4 years or more than 5 years, it has a way of sending a message to these countries like: Wow, we say you are great allies, but we clearly don't value you enough to have a confirmed ambassador.

Let me talk about Michelle Kwan, the nominee to be our Ambassador in Belize.

Belize is a critical partner in the Caribbean and Central America. This is a region of significant distress and instability. But Belize has been a bright spot in both relative stability and also closeness to the United States. As I mentioned, no U.S. ambassador has been confirmed there for more than 5 years. It is a stable democracy in a region facing significant threats from organized crime, irregular migration, human trafficking, as well as democratic backsliding in the region.

We worked hard to deepen our relationship with Prime Minister Briceno, and bilateral cooperation between the nations are increasing. Our ability to engage with Belize at this most senior level is crucial right now.

In particular with Belize, there is something fairly unique about this country. In this hemisphere that is very important to the United States, it is also of growing importance to China. We see Beijing active all over the Americas, often outstripping our efforts to pay attention to these countries.

Belize has been willing to be a stalwart partner of Taiwan. There are only 11 nations in the world that recognize Taiwan, and China is going after each one of them, putting pressure on them to strip away their recognition of Taiwan.

The United States is encouraging nations that have recognized Taiwan to continue to do so, but very few are able to hold out against the Chinese onslaught. Belize has been willing to do this. This is good behavior. We asked them to do it, and they have.

By leaving this position vacant, even as Beijing aggressively builds more and more momentum in the region, it is nothing less than diplomatic malpractice. Having a sitting U.S. ambassador there is of utmost importance.

Now, how about Michelle Kwan?

Exceptionally qualified to take on this challenge. She has had an incredibly distinguished career in public service and diplomacy and especially sports.

She is the most decorated figure skater in U.S. history, having won 43 championships, including 5 world championships, 9 national titles, and 2 Olympic medals.

Michelle became the first-ever U.S. Public Diplomacy Envoy in 2006, 16

years ago. For the following decade and a half, under Presidents and Secretaries of State of both parties, she has traveled extensively on behalf of the State Department all around the world to engage youth and especially young girls on social and educational issues.

She would be an extraordinary champion for the United States with this close neighbor, and her global profile will say to Belize: Hey, we value you because we are sending an accomplished and well-known athlete, inspiration, and diplomat to be our representative there.

And so I was going to ask today that she be confirmed by unanimous consent, and I will return, hopefully, to successfully see her advanced by the Senate into this position.

Now let me talk about Mari Carmen Aponte, who is President Biden's nominee to be Ambassador to Panama.

First on Panama, Panama is one of our strongest partners in the Americas. It is a critical ally on a wide range of U.S. priorities.

And, Madam President, you and I remember when we had major problems with Panama—major problems. It has been a success story of turning an adversary into a great ally and even partner, and yet Panama has now been without a U.S. ambassador for more than 4 years.

My friends across the aisle frequently cite migration as a top foreign policy concern. They have a point.

The Venezuelan refugee crisis is now the second largest displacement in the world. The size and scope of this crisis and the humanitarian impact on the region and the Venezuelan people is worsening by the day. I agree. This issue needs much more attention.

Panama is on the frontline of this crisis. Their border with Colombia—the Darien Gap on that border is the primary route by which people migrate from South America, especially Venezuela, north. They have a crucial role to play in any cohesive regional response.

Panama is also critical to narcotics interdiction efforts and in promoting democratic values that are increasingly under threat in the region.

They are also the subject of intense Chinese investment in the Panama Canal. China has a new Embassy built right on the canal.

We are not competing in a vacuum here. We are competing in a highly competitive world, where China is making more investments than we are, and yet Panama still desires to have a very close relationship with the United States.

And there is more.

Recently, Panama, Costa Rica, the Dominican Republic, and Ecuador noticed democratic backsliding in the Americas and announced the formation of something called the Alliance for Democracy and Development. They want to band together, four democratic nations, and be proudly pro-democracy in a region where we see too much

backsliding. They can punch above their weight. They can do work not only within their own nations but be an influence throughout the region—indeed, throughout the world. This is something that the United States has celebrated and recognized.

So, again, why punish bad behavior? If they are doing these things to help us with migration, if they are stepping forward to be pro-democracy in a region that is backsliding, why wouldn't we want a confirmed U.S. ambassador?

Let me tell you about Mari Carmen Aponte. She is a Puerto Rican native. She previously served with distinction as an ambassador to El Salvador during the Obama administration. She was confirmed in this body with bipartisan support. She has been the Acting Assistant Secretary of State for the Western Hemisphere.

It is hard to imagine a more qualified nominee. She will have impact from the moment she hits the ground. She was nominated for this role in October of 2021. Her Senate Foreign Relations Committee hearing was in May, and she has been pending consideration by the entire Senate since June.

Let's get a proven ambassador in the field and put her to work in a nation that is critical to the United States in the region.

Finally, I will just note, Panama is the home of the Panama Canal. It is the world's second largest free-trade zone. It has a sophisticated logistics and financial operations hub. It attracts billions in direct foreign investment, and we need to be there, again, to counter the significant Chinese interest in this country.

So, again, I had planned to make a motion on behalf of Mari Carmen Aponte. In deference to my colleague from Florida and the challenge there, I will not, but his team has committed to me that they will pay attention to my description of both the importance of these nations and the qualifications of these nominees.

I will return in the hopes that we may soon be able to act as the Senate and forward these highly qualified nominees to the field where they can do their work as representatives of the United States.

I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The senior assistant legislative clerk proceeded to call the roll.

Mr. MARSHALL. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Ms. BALDWIN). Without objection, it is so ordered.

The junior Senator from Kansas.

UNANIMOUS CONSENT REQUEST—S.J. RES. 63

Mr. MARSHALL. Madam President, I rise today in order to ask for unanimous consent to pass S.J. Res. 63, a resolution to terminate the COVID-19 national emergency declaration. It has been more than 2½ years since the national emergency concerning the novel

coronavirus disease outbreak was declared, and it has been extended now twice already by President Biden since the initial proclamation, most recently in February of this year.

It is this declaration, coupled with other additional emergency powers currently invoked by the President, which this administration is using to supersize government in order to continue their reckless, inflationary spending spree and enact their radical, partisan agenda. In fact, the White House uses these emergencies to justify their inflationary, out-of-control spending, their unconstitutional vaccine and mask mandates, and to forgive student loans.

This is not the first time I have come to the floor to terminate this emergency declaration. In fact, in March, I brought an identical resolution to this floor under the expedited procedures contained in the National Emergencies Act that passed this body by a vote of 48 to 47. At that time, the status of the virus in this Nation had greatly improved since the dark, early days of the pandemic. Everyone ages 12 and over was eligible for a booster shot if they wanted further inoculation. More than 550 million shots had been administered in the United States, with 215 million people being fully vaccinated. Two oral anti-virals had been made available for certain patients, and monoclonal antibody treatments were available for those at high risk of becoming seriously ill.

Fast-forward to today, 6 months later, and the status of our immunity and ability to fight the virus in the United States has improved further still. More than 660 million doses have been administered, and 225 million people are fully vaccinated—nearly 70 percent of the population. If you include natural immunity, immunity gained through natural infection, the CDC stated just last month that approximately 95 percent of Americans over the age of 16 have some acquired level of immunity. Everyone ages 12 and older can receive Omicron-specific boosters, and we have a growing roster of anti-viral drugs and monoclonal antibodies that are helping vulnerable populations avoid life-threatening infections.

Now, this is not the time to ignore the individuals still struggling with COVID or those who are tragically dying with the virus, but it does demonstrate that we have made major advances in our fight against COVID-19 and entered a less dire, more endemic phase. In fact, even President Biden recently acknowledged during a “60 Minutes” interview that the “pandemic is over.”

Of course, the President’s handlers immediately walked back this claim to argue that the pandemic is, in fact, not over. But why? Why would the Federal officials calling the shots in the executive branch not want to declare this pandemic over? Because it is the fearmongering and the robust authori-

ties provided by the emergency declaration that allow this administration to justify infringing upon your rights and validates their continued expansion of inflationary government spending and social programs.

It was this government-imposed state of emergency that justified their continued lockdowns of small businesses and schools. It was this government-imposed state of emergency that justified their vaccine and mask mandates that continue to this day in too many instances. It was this government-imposed state of emergency that justified President Biden’s and congressional Democrats’ inflationary spending binge, starting with the \$1.19 trillion American Rescue Plan last year and their curiously and inappropriately named Inflation Reduction Act this summer. Most recently, it was the national emergency declaration that allowed the President to extend the payment pause and cancel up to \$10,000 in outstanding federally held student loan balances and \$20,000 for Pell Grant recipients.

This rallying cry of the far left that the President is pandering to will cost the Federal Government \$420 billion—\$420 billion—according to the Congressional Budget Office. The Wall Street Journal called the move “an unprecedented act of peacetime fiscal recklessness.” And every American knows this is inflationary.

This is exactly the problem. The Biden administration is keeping Americans under the strain of the national emergency declaration as if we are not living in a time of peace, as if we are living in a time of war that requires the full force of the Federal Government—rights and fiscal responsibility be damned—in order to respond to this crisis.

In order to rein in this massive expansion of government, to slow down inflation, and restore Americans’ fundamental rights, we must take the important step of terminating the COVID-19 national emergency declaration. I encourage all my colleagues to join me in supporting doing so.

Madam President, I ask unanimous consent that the Committee on Finance be discharged from further consideration of S.J. Res. 63 and that the Senate proceed to its immediate consideration. I further ask that the joint resolution be read a third time and passed and that the motion to reconsider be considered made and laid upon the table.

The PRESIDING OFFICER. Is there objection?

Mr. WYDEN. Reserving the right to object, Madam President.

The PRESIDING OFFICER. The senior Senator from Oregon.

Mr. WYDEN. Madam President, I just went over to our colleague from Kansas and told him that I would much rather be on the floor this afternoon working in a bipartisan way on something like this, and I hope that can be part of Senate proceedings in the future.

Here is what I think is important for the public to know about this proposal. It is that in the real world, the Marshall proposal is a prescription for less flexibility and more redtape in American healthcare. I want to be very specific.

Every Member of this body understands that America has a serious shortage of nurses and healthcare providers. Every single time we go home—I am sure this is the case for our colleague from Kansas, who is a physician. He hears from physicians and providers. Every time we are home, we hear from healthcare providers. I see the Presiding Officer of the Senate has been a very strong advocate for healthcare improvement for patients and providers. Every time we are home, we hear about the need for more healthcare providers.

Right now, there are requirements in Medicare for a lengthy process that must be completed before it is possible to hire healthcare providers to serve Medicare patients. If the Marshall proposal goes into effect as written, Health and Human Services could not waive this complicated process to take care of patients. So that would leave our country short of healthcare providers when there is an acute, even more serious need for them.

I am just going to close with this because we are all hoping to be home over the next week or so. When I am home, I always do these open-to-all townhall meetings. I go to every one of my counties every year. I have had more than 1,020 of them—open to all, ask whatever you want. I have never had a constituent at home, an Oregonian, say: RON, what we need is more complicated processes and redtape in American healthcare. Usually, they are talking to us about waiving things.

For those reasons, Madam President, I object.

The PRESIDING OFFICER. Objection is heard.

The junior Senator from Kansas.

Mr. MARSHALL. I certainly appreciate the chairman’s comments and his sincere commitment. We certainly share some of the same goals.

Practicing medicine in rural Kansas for 25 years, we have been faced with physician shortages for decades, with nursing shortages for decades, and we both agree that is a problem. But the difference is, I don’t think that the government is the solution to the problem; I think that the government has created the problem, that physicians and nurses are so tired of dealing with all the redtape, all the continuing burden that the ACA has put on us.

I am so proud of the doctors and nurses. When this country called for them in an emergency, we—including myself—volunteered, rushing to the frontlines of the emergency rooms to take care of patients. Now this Congress is going to reward them with a pay cut, by the way.

But this is not the solution to the doctor shortages or the nurse shortages. The solution is to respect the profession, to remove some of the red tape. Allow us to be doctors and nurses. Don't make us be tied down with issues like prior authorization, which I know your committee is seriously considering as well. We appreciate your work on that as well.

Certainly, I do have people who come to my townhalls—and, like you, we have been to 100 counties in the past 2 years. We have five left to go. And what people ask me is: Why do our kids in the Head Start Programs still need to wear a mask? Do they do any good? Why are there still vaccine mandates out there? Why is this government continuing inflationary spending?

It is my feeling that this emergency declaration allows the President and the White House to expand those powers to take our constitutional rights away from us.

You know, again, I have encouraged people to take the vaccine and do all the right things. But I still think it is time to end the emergency. Give us our God-given constitutional rights back. I think we should support ending this declaration of emergency.

I yield the floor.

THE PRESIDING OFFICER. The Senator from Arkansas.

UNANIMOUS CONSENT REQUEST—S. 4984

Mr. COTTON. Madam President, the United States is in the midst of the deadliest drug epidemic in our Nation's history, caused by the most lethal drugs ever created.

More than 108,000 Americans died last year from drugs—more than 108,000—which is almost double the number of Americans killed in the entire Vietnam war. That is the worst slaughter of American citizens by drug dealers and traffickers on record.

The biggest killers, by far, were lab-made opioids, most notably fentanyl, which are cheap to produce and easy to mix with other street drugs. These lethal cocktails have devastated countless families and communities across our Nation. Too many parents have come home to a dead child who has mistakenly taken a prescription pill or a so-called party drug that might have been laced with fentanyl. Indeed, almost no one dies of a fentanyl overdose thinking he took fentanyl. It is laced into other drugs.

That is why, repeatedly, over the past 2 years, I and many of my colleagues have offered a measure to keep it illegal to traffic new variants of fentanyl, but, each time, a Democrat has blocked that measure. Later today, they will do so again.

Perhaps we can at least agree on one thing: We should have no tolerance for people who willingly trick addicted drug users or other innocent persons into taking deadly fentanyl by telling them it is really something else. This happens every day with heartbreaking consequences across the country.

For example, just 2 weeks ago, a drug trafficker was sentenced to life in pris-

on for his role in distributing fentanyl to unsuspecting users in Minnesota. Eleven people died. They thought they were buying illicit Adderall. When he heard about the deaths, the dealer asked his Chinese suppliers for a discount on his next shipment.

That same week, another drug dealer was arrested just minutes from the Capitol Building, where we stand—in Silver Spring, MD—for killing a child with a fentanyl pill, which he said was Percocet. He was hiding the fentanyl-laced, fake Percocet pills inside small bags of marijuana.

Last week, a few minutes in the other direction, a trafficker was tried in Northern Virginia for distributing cocaine laced with fentanyl at a party. Six partygoers overdosed. One died.

These cases happen every day. Drug addicts are especially lulled into a false sense of safety by fake prescription pills, believing them to be medicine for which they have some past experience. That is why fake prescription drugs are on the rise. Federal law enforcement encountered as many fake prescription pills in 2021 as in the previous 2 years combined.

If Democrats refuse to help Republicans keep all fentanyl variants off the streets, hopefully, we can at least agree on keeping deceptive fentanyl traffickers behind bars. My bill would establish that any drug trafficker who knowingly misrepresents fentanyl as though it is something else would be subject to 20 years in prison. If the criminal has a prior felony criminal record or if its misrepresentation kills someone, then the criminal would be subject to life in prison or would even be eligible for the death penalty. There can simply be no leniency for people who trick unsuspecting users into taking deadly fentanyl.

Madam President, I ask unanimous consent that the Senate proceed to the immediate consideration of S. 4984, which is at the desk. I further ask that the bill be considered read a third time and passed and that the motion to reconsider be considered made and laid upon the table.

THE PRESIDING OFFICER. Is there objection?

The Democratic whip.

Mr. DURBIN. Madam President, in reserving the right to object, I worried this morning that the Senator from Arkansas was going to offer this unanimous consent request on the floor of the Senate this afternoon. I was a little bit surprised. I wasn't aware of this bill. We have been members of the same committee, the Judiciary Committee, for 21 months, and the Senator from Arkansas has not raised the bill during that period of time. But it is his right to come to the floor today and ask that it be considered. I would like to tell you why I am going to object to this.

If you serve in Congress for any period of time, you become a student of the terrible drug problems of America. I recall a period of time in the House of

Representatives when we had crack cocaine appear in the United States for the first time. It scared us because it was cheap; it was deadly; addictive; and for the women who were pregnant who had taken it, it did harm to the babies they were carrying. So we decided to make sure that we were going to do the right thing in our War on Drugs.

What we said was—listen closely—the penalty for crack cocaine would be 100 times the penalty for the use of ordinary cocaine—100 times. The penalty for using cocaine in general was already serious. One hundred times, we said, for the War on Drugs. I voted for it. I thought, finally, a message will come from the Congress that, if you touch crack cocaine, you are going to be in for it. We expected that fewer people would do it because of the fear of that criminal sentencing and that the price of crack cocaine would go up because the demand was limited.

Guess what happened—exactly the opposite, exactly the opposite.

More and more people used crack cocaine, and the price on the street went down to dirt level. The result was we started filling our prisons in a way that we had never seen before in the history of the United States: 500 percent of the prison population of just 20 or 30 years ago increased in that period of time.

We learned the hard way that getting tough wasn't always the smart way to deal with drug addiction. We thought about it, and we changed the law several times. I have been party to changing it. I voted for the original version, and it failed. We had to do better.

Then something happened that was dramatic—opioids. Out of nowhere came opioids, and what used to be a problem of drug addiction and death in the inner cities of America became a problem of drug addiction and death in the suburbs of America, in the farm towns of America—all over America. Interestingly enough, America started looking at our drug laws and our drug addiction and saying: What are we doing wrong here? What is wrong with this situation?

As a consequence, a lot of attitudes changed. People got away from the old "just say no" routine and started asking serious questions: How do we deal with drug addiction? How do we stop this addiction? It is not easy to stop it, but God knows we need to. So we have seen a transformation with the arrival of opioids.

Now, the Senator from Arkansas is correct. People are lacing these opioids with fentanyl, and fentanyl is deadly; there is no question about it. We should take it seriously, and we do. As a matter of fact, each judge, when imposing a sentence for crimes already involving fentanyl, is pretty serious about it. I just heard the Senator from Arkansas describe a situation in which someone in Minnesota got life in prison for the sale of a fentanyl product. So it is clear that it is not being ignored, nor should it be.

Intentionally selling fentanyl is already a crime all over the United States. Representing that fentanyl is something else is exactly the kind of aggravated factor a judge takes into account in the sentencing. I don't believe this bill is a serious effort to deal with the problem in light of what we know today.

Let's start with the fact that it creates a new Federal death penalty offense.

Well, I have to tell you that I have watched a lifetime—a political lifetime—of death penalty cases and have seen the result. I have my serious doubts that that is the best way for America to go. I think the gentleman from Arkansas realizes it. I am the lead sponsor, along with 20 others, of the Federal Death Penalty Prohibition Act—to repeal it once and for all. So I am concerned about any legislation that imposes the death penalty.

It also creates mandatory minimum sentences that don't allow judges to consider the individual circumstances in a case.

That is straight out of the failed doctrine of the War on Drugs—a mandatory minimum. Tie the judge's hands. Put people in jail, and basically say there will be unlimited amounts of time that they will spend there. People were getting 20- and 30-year sentences for the sale of narcotics like crack cocaine, and we soon realized that it didn't make sense over the long haul. It was 20 years for a single drug sale, which goes up to mandatory life in prison if a defendant has any prior felony conviction, no matter if it has zero relationship to drugs or is based on a defendant's immigration status.

I don't believe that is the right way to go. It wasn't with the War on Drugs. We learned the hard way. I want to get tough on the drug sales, and I am sure the Senator from Arkansas feels the same way. We approach it differently. I have the experience of trying to take the hard position on this issue and of seeing that it failed when it came to crack cocaine.

For that reason, I object.

The PRESIDING OFFICER. Objection is heard.

The junior Senator from Arkansas.

Mr. COTTON. Madam President, what we heard is a lot of the same excuses that the Democrats have made for years about being soft on crime and their claims about mass incarceration or systemic racism or what have you.

I would point out that almost no one—almost no one—is in Federal prison for mere drug possession. It is a myth that there are low-level, non-violent offenders in prison because they are addicted to drugs.

Where we are is at a 21-year low in the number of Federal inmates we have. Do you know where we are not at? A 21-year low in drug deaths—the highest on record every single year, year after year. Almost twice as many have died as in the Vietnam war. Almost 24 times as many have died as in

the entire Iraq war. Almost 35 times as many have died as on 9/11. Yet the Democrats repeatedly refuse to crack down on deceptive fentanyl dealers.

As I have mentioned, I have also offered bills in the past that would permanently add fentanyl to the Controlled Substances Act scheduling. The Democrats refuse to do so. They will do it temporarily from time to time, but they want a trade. They want to get a trade for something. They want to either reduce sentences or let prisoners out. This is whether they are Democratic Senators or Democratic Governors in places like Illinois, in their eliminating the bail system, or whether they are Democratic mayors or Democratic prosecuting attorneys in places like Chicago. As a result, we have a crimewave and a drug epidemic all across America.

Let me just reiterate. The bill I just offered, which the Senator from Illinois blocked, would simply say that you cannot sell another drug and not acknowledge that fentanyl is in it; that you cannot misrepresent what you are selling.

It is not just opioids. It is not just heroin. It is even marijuana. It is pills that are passed off as mere prescription drugs, like in some of the examples I gave—Adderall, OxyContin, Percocet—that people all across the America are dying from.

UNANIMOUS CONSENT REQUEST—S. 621

Madam President, let's take another angle on this problem. Almost all of these drugs come from Mexico. Almost all of the drugs in America today come from Mexico. Almost all come from a handful of vicious, depraved cartels in Mexico—cartels that have taken on the powers of a quasi-state, cartels that the Mexican Government either cannot or will not crack down on. So let's look at it from that perspective. It is past time that we bring the full weight of the U.S. Government to bear on these cartels and to destroy them for what they are unleashing on our streets.

Imagine if ISIS or al-Qaida set up shop across our border and was responsible for more than a hundred thousand American deaths every single year. What would we do? What would you do?

I know what we wouldn't do. We wouldn't hesitate to act, and that is exactly what we should do with these Mexican cartels.

Unfortunately, President Biden has done the opposite. Since the day he took office, he has flung open our borders, created a border crisis, and made it easier than ever to smuggle massive amounts of illegal drugs into the United States.

Already this year, the Border Patrol has found over 12,000 pounds of fentanyl being smuggled over our borders—12,000 pounds. You may not be able to put that in perspective. Let me put it in perspective for you: It is enough to kill every man, woman, and child in America many, many times over.

That doesn't even include any fentanyl brought in by the hundreds of

thousands of illegal aliens whom the DHS calls got-aways.

President Biden could declare fentanyl-peddling cartels to be terrorist organizations, but he has refused to do so. So the bill that I am about to bring up would give him additional tools, short of labeling these cartels "terrorists."

My bill would create a new designation called a significant transnational criminal organization, and it would enable the Federal Government to impose many of the same sanctions and use many of the same tools against cartels that it already does against terrorist organizations like al-Qaida and ISIS. Those would include barring cartel members and their immediate families from entering the United States, freezing assets belonging to the cartels to hit their wallets and to keep them from profiting off of death and destruction, and enabling civil and criminal penalties for anyone who provides material assistance or resources to the cartels.

The Democrats are going to block a bill later today that would keep new fentanyl variants illegal. They just blocked another bill that would target drug traffickers who trick people into taking the fentanyl that kills them. I hope at least Democratic Senators would be willing to say that we should give the Biden administration more tools to use against the Mexican cartels, some of the worst and most depraved criminals on Earth.

Therefore, Madam President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of my bill, S. 621, the Significant Transnational Criminal Organization Designation Act, and that the Senate proceed to its immediate consideration; further, that the bill be considered read a third time and passed, and the motion to reconsider be considered made and laid upon the table.

The PRESIDING OFFICER. Is there objection?

Mr. DURBIN. Reserving the right to object.

The PRESIDING OFFICER. The Democratic whip.

Mr. DURBIN. The Senator from Arkansas' views on immigration are well-known. He has been consistent in opposing immigration, but it is interesting to me that people like him who oppose immigration always, at the end, seem to go after the same people: mothers and children.

We saw it with the cages the kids were kept in. We saw it when kids were forcibly removed from their parents at the border during the Trump years. We have seen it time and again, and now we see it with the Governor of Florida and the Governor of Texas putting mothers and children on buses and bus-ing them hundreds of miles away from where they were picked up, whether there is any contact there or not. Mothers and children are always a

focal point of anti-immigration rhetoric, and, once again, this bill does that.

I agree completely when it comes to stopping transnational criminal organizations, but to focus the bill on innocent spouses and children, including minor children, and make them the target of the bill seems to me going beyond any reasonable law enforcement.

There is a narrow exception in the bill that allows a spouse or child to be admitted to the United States if they can somehow convince the consular officer that they did not know or could not reasonably have known of their spouse's or parent's membership in a criminal organization. But there is no exception for battered spouses or children who are often victims of these organizations themselves. And the bill gives what appears to be unreviewable discretion to these consular officers to decide whether an innocent spouse or child has renounced the organization.

These transnational criminal organizations must be sanctioned and stopped, but this is not the way to do it, going after mothers and children.

I want to make a point, since the Senator concluded after my last statement that I am somehow soft on crime. Can I go through a short list here of bills that I voted for to get tough on crime?

Let's take a look at this bill, the American Rescue Plan. That American Rescue Plan passed in the U.S. Senate and provided billions—billions—of dollars to State and local communities for police and crime protection—more money for police and crime protection from this Senate to those communities. I voted for it. The Senator from Arkansas voted against it.

Then the Congress passed the Infrastructure Investment and Jobs Act. In that bill was a \$430 million investment in our ports of entry, helping DHS to screen vehicles for fentanyl. You see, these drugs come through ports of entry. This idea of a backpack full of drugs being hiked over the border by someone in the middle of the night, that is not where the bulk of these drugs come from. They come through the ports of entry. So we put a \$430 million investment to make those ports of entry even stronger and tougher.

I agree with that completely, helping the Department of Homeland Security to screen vehicles and stop fentanyl from coming in. I voted for that. The Senator from Arkansas voted no. Who is soft on crime?

Then we passed the March Omnibus appropriations bill—tens of millions of dollars in increased funding for hiring police officers and technology upgrades at the border to detect and seize fentanyl and other illicit cargo. I voted for that. The Senator from Arkansas voted against it. Who is soft on crime?

And when we passed the Bipartisan Safer Communities Act, the most serious bipartisan step Congress has taken to end gun violence in 30 years, I voted for it. The Senator from Arkansas voted against it. Who is soft on crime?

The American people can see which party is passing legislation and actually funds law enforcement, addresses crime and violence in a thoughtful way. And they can see, when the bills come up on the floor, one party gives the speeches; the other party gets the votes.

I am going to continue to vote to support the police and put an end to this drug crisis in America in a thoughtful and sensible way.

I object.

The PRESIDING OFFICER. The objection is heard.

The junior Senator from Arkansas.

Mr. COTTON. Madam President, I think we know who is soft on crime. It sounds like I hit a nerve. I didn't stand up here saying I am not soft on crime five or six times in a row. It is the Senator from Illinois who said that, just like Senate Democrats have been saying it for the last several months, just like their candidates all across America are saying it.

Let's look at the first bill he mentioned, the American Rescue Plan. You know what that is, right, the American Rescue Plan? That is their \$2 trillion wasteful spending bill from last spring that is responsible for 13 percent inflation.

Do you know what is also included in it? A measure that would get stimulus checks to prisoners. That is right—depraved, violent felons; murderers and rapists and drug traffickers all across America. People like the Boston marathon bomber got stimulus checks last year because the Democrats believe that criminals are really, at heart, victims as well, victims of an oppressive society and system.

If I am not mistaken, when I offered my amendment to prevent prisoners from getting stimulus checks, I think it was the Senator from Illinois who stood up and blocked it. I know that he voted against it. I know that he wanted prisoners to get stimulus checks. That is what he is talking about.

What about his objection to this bill, that it is going to target mothers and kids, the poor mothers and children of drug kingpins, a very common feature of American sanctions efforts—in fact, sanctions efforts that we are doing exactly against Russian oligarchs and regime figures, which I support, by the way. I support. No, the wives and the children of Russian oligarchs and Mexican cartel kingpins should not benefit from their ill-gotten gains.

But I care more about the lives of American citizens—the hundred thousand-plus American citizens whom we lose every single year—than anyone else in the world.

The Biden administration's policy, though, is that we will use this tool against Russians, but we are not going to use it against Mexican cartel members. I think that goes to show you where their priorities are.

Again, just to recap, we tried to pass legislation that would have imposed heightened penalties on drug traf-

fickers who misrepresent their drugs and say they don't contain fentanyl. The Senator from Illinois blocked it on behalf of the Democrats.

Just now, we tried to give the Biden administration more tools to target the cartels that are smuggling these drugs into our country, that are killing a hundred thousand of our fellow citizens. Again, on behalf of Senate Democrats, the Senator from Illinois blocked it.

I say, again, over 108,000 Americans were killed by drugs last year. Yet the Democrats continue to refuse to crack down on drug traffickers and cartel kingpins.

Some of my other colleagues are going to offer similar bills today, just like I am going to offer, yet again, my permanent fentanyl scheduling bill that would stop the annual Kabuki dance here of the Democrats demanding some pro-criminal law just so we can permanently add fentanyl to the Controlled Substance Act schedule.

Think about that. At a time when 108,000 Americans are dying every single year—that is not an aggregate number, every single year—the Democrats refuse to act if they don't get something in return on behalf of criminals, if they can't reduce drug sentences for hardened criminals, if they can't let more felons out of prison. It shows a depraved indifference to the lives of our people.

I yield the floor.

The PRESIDING OFFICER. The Democratic whip.

Mr. DURBIN. Madam President, passing legislation is difficult at any stage in American history. It is increasingly difficult when it is a 50-50 Senate. You have to work it. You have to be willing to sit down with someone from the other side of the aisle and find a co-sponsor so that you have a bipartisan bill.

I have seen that work. In fact, I was part of it. It was Senator CHUCK GRASSLEY and I who put together the FIRST STEP Act, which was part of prison reform—significant prison reform—in this country.

Who signed the FIRST STEP Act? President Donald Trump.

Soft on crime? What we did was work out something that was bipartisan, sensible, and really makes a difference, and makes certain that people currently serving in prison will one day be released—most will—and not return to crime when that happens. I think that was time well spent, but it took a bipartisan effort.

I could have come to the floor every day of the week and offered my best idea on how to fight crime, but if you can't pass it on a bipartisan basis in the Senate, it doesn't work.

It takes a lot of hard work and a lot of patience and compromise to make a real change in the law. Even if you think you have the best idea on Earth, you have to work at it.

I yield the floor.

The PRESIDING OFFICER. The senior Senator from Nevada.

FIVE-YEAR ANNIVERSARY OF LAS VEGAS,
NEVADA, SHOOTING

Ms. CORTEZ MASTO. Madam President, 5 years ago this Saturday, my hometown of Las Vegas endured one of the darkest days in its history. On a beautiful autumn evening, the Route 91 Harvest Music Festival was interrupted when a gunman showered the concert with bullets from a high-rise hotel room. Those who were at the festival, including my niece, at first thought the gunshots were fireworks, but they soon realized that something much more deadly was unfolding.

Fifty-eight people lost their lives that night, and two more have died in the years since the attack. Over 850 people were wounded, and tens of thousands who attended the concert or helped respond to the shooting bear the visible and invisible scars of that night.

It is hard to overstate the scale of the devastation of that night, and it remains the worst mass shooting in modern American history. As soon as the gunfire broke out, first responders sprang into action, as did ordinary citizens, turning concert barriers into stretchers and trucks and cars into makeshift ambulances. Doctors and nurses rushed to hospitals, and thousands of people lined up all over the State to donate blood. Individuals and businesses contributed food, blankets, airline tickets home, or whatever survivors might need.

At the worst of times, Nevadans came together to support one another, and they have worked to help each other ever since. Local businesses have supported the construction of a healing garden. The commission working on a permanent memorial continues to make progress, and this summer it invited the public to participate in its planning. And scholarship funds and activity groups continue their work to support the children of victims and survivors.

And this weekend in Las Vegas, thanks to the work of the Vegas Strong Resiliency Center, bereaved families, survivors, first responders, and community members will light lanterns together to honor the strength, the light, and resilience of the Las Vegas community.

The fact is, though, that trauma leaves its marks. Many of those touched by the Route 91 attack say that the shooting created a permanent before and after for them. It fundamentally changed their lives. And America has seen far too many of these mass attacks, from Orlando to San Jose, Parkland to Buffalo. More recently, of course, this summer saw the horrific shooting in Uvalde, TX, of 19 students and 2 teachers.

In the wake of Uvalde, Route 91 survivors Geena and Marisa Marano came to see me. They are sisters whose experiences at the festival inspired them to work for change. They told me that knowing how difficult it had been for them as survivors of a mass attack,

they could not imagine what children who survived Uvalde were going through, and so they were in Washington to call, once again, for change. This time, they succeeded.

Over the summer, Congress passed and the President signed the Bipartisan Safer Communities Act, which contains a range of commonsense provisions to reduce gun violence in America. I can't emphasize this accomplishment enough. People thought that passing bipartisan gun safety legislation was impossible, but because of the work and the dedication and advocacy of so many, including Route 91 survivors like Marisa and Geena, we got it done.

I am especially proud that I was able to help secure enhanced background checks for those under 21 years of age as well as additional mental health funding that is needed in our schools. Many survivors will be the first to say the work isn't finished yet. That was a first step; we still have more to do. And I agree with them. They are going to continue to push for commonsense reforms, and I will support them as I always have. Because these shootings are just devastating for whole communities, we have to do something. I know for many in Las Vegas and all over Nevada—this week especially—will bring difficult reminders of that dark day 5 years ago, but it will also bring a renewed determination to heal, to memorialize, to honor those who were affected, and to work toward a safer future.

Madam President, I will continue to stand with my hometown and with those survivors not only in Nevada but across the country and to do everything that I can to work for the same goals that they care about.

I yield the floor.

The PRESIDING OFFICER. The senior Senator from Iowa.

PRESCRIPTION DRUG COSTS

Mr. GRASSLEY. Madam President, as a leading advocate for lower drug prices in the Senate, No. 1, I have hauled Big Pharma and pharmacy benefit managers' executives before my committee of Congress; second, I led a 2-year bipartisan investigation into insulin price-gouging; and three, introduced bipartisan reforms to lower the cost of insulin and many other prescription drugs. In the past few years, legislation I have championed into law has saved the taxpayers \$9.6 billion.

Right now, the Senate is not acting on bipartisan legislation to lower drug costs. I support a bipartisan plan by Senators COLLINS and SHAHEEN that establishes a \$35 out-of-pocket cap on insulin for patients with private insurance while also reforming PBMs, the powerful middlemen who are behind rising drug prices. If you don't address PBM reform, a cap on out-of-pocket costs will only result in shifting patient costs somewhere else.

In my 2-year bipartisan insulin investigation, we found that a drug's list price is tied to rebates and other fees

that drug companies have to pay the PBMs. The scheme encourages drugmakers to spike the list price of the drug to offer a greater rebate. And then do you know what happens in turn? Secure priority placement on a health plan's list of covered medications. We have to hold PBMs accountable, then, if you really want to lower prescription drug costs.

In 2018, I called on the Federal Trade Commission to assess consolidation in the pharmaceutical supply chain and its impact on drug prices, but I didn't wait for the FTC to act. I introduced the Prescription Pricing for the People Act with Senator CANTWELL, and it was approved out of the Judiciary Committee unanimously last year.

A few months ago, the FTC agreed to conduct a study of PBM business practices. This is very welcomed news, but the FTC needs to complete this study and do it in a timely way. Last week, I asked FTC Chair Kahn about when the PBM study would be completed. Chair Kahn didn't commit to a date.

While we need more sunshine on the PBMs, we don't need to wait to take some action. Senator CANTWELL and I have introduced the PBM Transparency Act, and it has been approved by the Commerce Committee on a 19-to-9 vote. The bill prohibits PBMs from engaging in spread pricing and clawbacks. Both spread pricing and clawbacks are actions that game the system and hurt consumers.

When the majority party pursued a partisan, reckless spending-and-tax package that they called the Inflation Reduction Act, I filed the Grassley-Wyden Prescription Drug Pricing Reduction Act as an amendment that had 10 Republican cosponsors. I did that in order to show that the majority party could have chosen to pass drug pricing reform on a bipartisan basis if the majority wanted to do that. The bill establishes PBM accountability and transparency, something missing from the Inflation Reduction Act.

So, Madam President, we have bipartisan prescription drug legislation awaiting action. We don't have to wait until 2026 for what happened in August in the Inflation Reduction Act to get anything done because that doesn't take effect until 2026. This includes the bipartisan plan to lower insulin prices and my two bills to hold PBMs accountable. That is what we need bipartisan action on in the U.S. Senate.

I have also led out of the Judiciary Committee three bipartisan bills to establish more competition to lower prescription drug prices. They save taxpayers a combined \$1.9 billion.

So the Senate must act on six bipartisan bills. Collectively, they lower insulin costs, secondly hold PBMs accountable, and lastly establish more competition to lower prescription drug prices.

I yield the floor.

The PRESIDING OFFICER. The senior Senator from Tennessee.

RESTORING LAW AND ORDER ACT

Mrs. BLACKBURN. Madam President, last evening, I had the opportunity to get on the phone in a telephone townhall with citizens from Davidson and Shelby Counties in Tennessee, and crime was the No. 1 issue that people were talking about. And one of the points that came up several times was, Why is it that some of our colleagues across the aisle have stuck with this prepackaged, zero consequences crime narrative that they are still trying to sell to the American people?

Crime is an issue. And Tennesseans aren't buying the message. I don't think the American people are buying it because they are living with the real-world consequences of the Democrats' refusal to work to get crime under control.

Now, a few days ago, I was watching the news, and I could not believe what I was seeing. Young people were ransacking a convenience store. They were doing this in full view of the cameras, continuing to talk to one another, just going through ransacking that store.

Now, I know I would like to say that was an isolated incident, but we all know that this is not an isolated incident. What is happening is, this has become a trend in many of our cities. The numbers aren't working in our favor when we talk about this trend, whether you are talking about theft or vandalism or something much worse.

Here are some stats. Since 2019, homicide rates in our largest cities are up 50 percent. That is since 2019. Aggravated assaults are up 36 percent. Last year, 108,000 Americans died of a drug overdose; 4,000 of those were Tennesseans.

Now, we can continue to engage in a cable news proxy war or we can do something about this. We, as lawmakers, cannot control what the pundits and the activists say, but we can do something to help the millions of Americans who have become or are at risk of becoming victims of violence.

Back home in Tennessee, the sheriffs and other local officials whom I talk to as I have done my 95-county tour, visiting with every county, these sheriffs, these local officials, parents, principals—they are all telling me exactly why they are struggling to get this crimewave under control. Go talk to a police chief or a captain or go talk to a sheriff or a deputy, and they will tell you: lack of manpower, lack of funding, and the Democrats' soft-on-crime agenda.

We can help with the first two things right now without spending an additional dime of taxpayer money. That lack of manpower, that lack of funding—yes, this is something that we could take action on today if we chose to.

This month, Senator HAGERTY and I filed a bill called the Restoring Law and Order Act that would establish a grant program to help State, local, and Tribal law enforcement officials do the

work that obviously our President and the Democrats have chosen not to do.

First and foremost, here is what the bill would do. Our local law enforcement officers would be able to use these grants to hire more officers and to train them to deal with violent criminals. They will also be able to pull in more resources to combat interstate child trafficking between the open border and the ease with which criminals are using technology to target kids. This was something we could not afford to leave out of the Restoring Law and Order Act.

These grants would help communities prioritize tough sentencing for repeat offenders and use responsible bail practices and pretrial detention to keep dangerous offenders behind bars. If housing is a problem, they will be able to address it. If food items are a problem, then there would be a way to address that.

We are also going to make these grants available to departments that need help targeting drug crime and getting fentanyl off the streets. Sheriffs in Tennessee tell me that around 80 percent of the drugs that they are seizing—80 percent—contain fentanyl, which means there are a lot of people out there who are ingesting fentanyl and dying without ever knowing that they were taking something laced with fentanyl. This is also putting law enforcement at considerable risk. At least one Tennessee officer is lucky to be alive after accidentally coming into contact with fentanyl.

Last but not least, we are going to encourage law enforcement to make use of these grants to clear the investigatory backlog and get evidence processed as quickly as possible.

So much of our focus has been on urban areas because cities like Philadelphia, Washington, DC, and Memphis are struggling when it comes to controlling homicides, carjackings, and other crimes that are really frightening to people, but rural areas of my State are also seeing unprecedented levels of crime and drug overdose. So to help these communities rise to the challenge, this bill commits no less than 25 percent of its total grant allotment to rural and depressed counties.

Now, as I said, this grant program won't spend an additional dime of taxpayer money. The big IRS payday my Democratic colleagues snuck into the so-called Inflation Reduction Act will be put to better use. Here is how you do it. Instead of using that money to hire more bureaucrats to attack small businesses and independent operators, we are going to use it to keep the communities where they work safe from violent criminals.

We also found that Joe Biden and the Democrats have left a lot of their so-called emergency COVID funding lying around, so we are going to put those funds toward hiring more officers and forensic examiners and clearing the rape kit backlogs. Tennesseans are spending \$616 more per month now than

they were last year just to keep themselves fed and their cars running. They can't afford to maintain a slush fund for far-left priorities when that money could be put to use actually helping clean up our streets, helping keep our communities safe, and helping to apprehend drug dealers and keep them in jail. That is where these dollars should be used.

The final element of this bill would help us get to the root causes of the rape kit backlogs. In 2021, the U.S. Government spent \$251,975,000 through six separate programs to help law enforcement conduct rape and sexual assault investigations. Here is that breakdown. And yes, indeed, Mr. President, \$251 million is a lot of money—you are right. More than \$24 million was spent on advocacy programs; almost \$34 million to train forensic examiners and their staff to collect and preserve DNA evidence, analyze it, and present it in the courtroom; \$4 million to train and provide resources to medical personnel who treat victims of sexual assault; almost \$90 million to get first responders and forensic testing capabilities in rural areas up on par with urban areas; and \$158 million just to address the backlog.

Hundreds of millions of dollars have been invested, and still it seems we cannot get these rape kits processed. Sometimes it takes a full year to get these results.

I want to use one grant program as a case study to demonstrate the problem that we are seeing. An audit of the Sexual Assault Kit Initiative found that between 2015 and 2021, we sent \$266 million to 75 grantees in 40 States and DC to process these kits, to process and obtain this evidence. In that time, they only managed to clear a little over half of a 136,000-kit backlog.

Now, bear in mind, these kits are the kits that contain the DNA evidence of violent offenders. These are individuals who have committed violent sexual assaults. Every one of these should be processed as a rush order—but no. From 2015 to 2021, with \$266 million being sent to 75 grantees in 40 different States and the District of Columbia, they managed to clear a little over half of a 136,000-case backlog. So you still have tens of thousands of kits that are gathering dust, and that is just the ones in the custody of grantees from one single program.

This represents over 50,000 violations of trust and bodily autonomy, 50,000 worst night of an innocent man or woman's life, and 50,000 times the scum of the Earth thought they committed a crime and they got away with it, but they also represent 50,000 opportunities for us to take that rapist or that violent offender and put them in jail for the rest of their life.

The Restoring Law and Order Act will give the GAO a year to conduct a study and prepare a report to explain why we haven't been able to clear the backlog. Why is it we cannot get these kits processed? They are going to look

for deficiencies in processing and also let us know where and to what extent rape kits aren't available at all.

This month, Tennesseans—especially the people of Memphis—have been stuck in a vicious cycle of grieving and asking: What more could have been done to spare the victims of two of the most notorious killers in recent memory?

We already know that at least one brutal murder could have been prevented if the crime lab had been able to reduce their processing time for rape kits. Three more may have been prevented if the people responsible for keeping criminals in jail had done their jobs and forced a repeat violent offender to serve out a full sentence. That didn't happen. Four innocent people in Memphis are dead.

The community is heartbroken, and they are grieving. Last night, on our telephone townhall, they talked a lot about this. They talked about how it has affected them and their community.

Now, the left has spent 2 years screaming at Congress to defund the police, pull law enforcement out of neighborhoods, and eliminate consequences for violent behavior, and it is just plain frightening to see so many of my colleagues continue to go along with that rhetoric.

Tennesseans agree, and I think the American people agree also. They don't want an unfair system. They don't want innocent people to be behind bars. They want a system that works. They are tired of hearing that they are the problem—at least according to the Democrats' zero-consequences narrative. That narrative has turned criminals into victims and innocent people into villains and has left true victims wondering who was there for them. There is nothing just or equitable about that.

I would ask my Democratic colleagues to abandon the echo chamber and get on the phone. Go see and visit and listen to and hear from your sheriffs and your mayors and other law enforcement officials back home. Listen to what they have to say. They need your help.

Senator HAGERTY and I would love to have their help and support in passing the Restoring Law and Order Act. We need to move this legislation. We need to vote on it now before the crimewave gets even worse.

I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. HICKENLOOPER). The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. OSSOFF. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CIVIL RIGHTS COLD CASE INVESTIGATIONS SUPPORT ACT OF 2022

Mr. OSSOFF. Mr. President, I rise this afternoon in pursuit of justice for the Black men and Black women abducted, beaten, and killed during the segregation era in the American South and in retaliation for their participation in the civil rights movement.

I rise today to ask that the Senate pass the Civil Rights Cold Case Investigations Support Act to secure justice and pursue truth for the victims of those atrocities, for the victims of civil rights cold cases, and for their families—justice for folks like Alphonso Harris, a member of the SCLC who was murdered in Albany, GA, in 1966; justice for Ernest Hunter, who was killed in a physical altercation at the Camden County jail in St. Marys, GA, in 1958; justice for Caleb Hill, Jr., who was dragged at night from a Wilkinson County jail in Middle, GA, in 1949 and shot to death by a lynch mob.

Decades may have passed, but the pursuit of justice cannot and will not end. I sat down in Wilkinson County a few months ago with Caleb Hill, Jr.'s descendants, and in his name, they demand justice. By passing the Civil Rights Cold Case Investigations Support Act and by doing it with the support of Democrats and Republicans in the U.S. Senate, we will demonstrate that the United States will never rest in the pursuit of truth and justice for those who were lynched, abducted, beaten, killed, and assaulted in the segregation-era South and during the civil rights movement.

I thank Senator CRUZ for his original cosponsorship of this bipartisan legislation, and all of my colleagues on both sides of the aisle, for bringing us now to a point where, after much work, I hope that we can pass this legislation with bipartisan support.

Mr. President, I ask unanimous consent the Senate proceed to the immediate consideration of Calendar No. 451, S. 3655.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report the bill by title.

The bill clerk read as follows:

A bill (S. 3655) to amend the Civil Rights Cold Case Records Collection Act of 2018 to extend the termination date of the Civil Rights Cold Case Records Review Board.

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Homeland Security and Governmental Affairs.

Mr. OSSOFF. I further ask unanimous consent that the bill be considered read a third time and passed and the motion to reconsider be considered made and laid upon the table with no intervening action or debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (S. 3655) was ordered to be engrossed for a third reading, was read the third time, and passed as follows:

S. 3655

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Civil Rights Cold Case Investigations Support Act of 2022".

SEC. 2. CIVIL RIGHTS COLD CASE RECORDS REVIEW BOARD EXTENSION OF TERM.

Section 5(n)(1) of Civil Rights Cold Case Records Collection Act of 2018 (44 U.S.C. 2107 note; Public Law 115-426) is amended—

(1) by striking "4 years" and inserting "7 years"; and

(2) by striking "4-year period" and inserting "7-year period".

Mr. OSSOFF. I yield the floor.

The PRESIDING OFFICER. The Senator from Wisconsin.

UNANIMOUS CONSENT REQUEST—S. 1006

Mr. JOHNSON. Mr. President, I rise today to tell a story of one family's tragedy but also of two wonderful people who turned that tragedy into helping others and finding solutions.

On May 15, 2014, a 19-year-old Wisconsinite named Archie Badura died of a fentanyl overdose.

Two years later, I met his mother Lauri Badura, who testified before a field hearing I held in Pewaukee, WI, together with an emergency room doctor named Dr. Tim Westlake, who testified about the growing problem that he was seeing in his emergency room with overdoses and, in particular, overdoses with, I think, a drug that we all heard was somewhat new, fentanyl, a schedule II drug; one used in medicine but one that had been altered, the molecule changed, and produced in China and shipped through our Postal Service and was killing people like Archie Badura.

It was probably the first time I heard of what was happening to fentanyl. And so Dr. Westlake, because he was seeing the tragedy firsthand, was developing a piece of legislation that he was proposing in Wisconsin as well as on a national level.

The piece of legislation I introduced in 2017 was called the SOFA Act. The reason I called it the SOFA Act—and that stands for Stopping Overdoses of Fentanyl Analogs—is because Lauri Badura, again, who lost her 19-year-old son, turned her tragedy into helping others.

She was the go-to person for other families who also lost a loved one through overdoses, and she started an organization called Saving Others for Archie. The acronym was SOFA. So I thought it only appropriate, when working with Dr. Tim Westlake on this piece of legislation that would recognize the growing problem of these analogs, of these fentanyl-related drugs that were killing and poisoning our citizens—I thought it only appropriate to come up with a piece of legislation named after that organization with that same acronym, SOFA.

So on July 13, 2017, I introduced SOFA for the first time here in the U.S. Senate.

On November 9, 2017, because of Tim Westlake and Lauri Badura's tireless effort, a State piece of legislation, the SOFA equivalent, was signed into law in Wisconsin. And basically what this law does—it is a pretty simple law—it just allows law enforcement, the DEA, to view these fentanyl-related substances as a class under schedule I of the Controlled Substances Act.

Prior to this bill, prior to these regulations, law enforcement had to view each new molecule, each new analog as a separate drug, and they could not arrest, they couldn't prosecute, they couldn't put people in jail for selling these and poisoning our cities.

So Dr. Tim Westlake recognized that problem. I recognized that problem, and so we introduced the SOFA Act. And once DEA saw it, they thought this was a pretty good idea, and they utilized their regulatory authority and passed a regulation on February 6, 2018. They issued a temporary scheduling order that placed "certain fentanyl-related substances in schedule 1 for 2 years."

The text of that regulation was identical to the text of the SOFA law that I had introduced earlier in 2017.

Now, unfortunately, they could only issue that regulation having an effect of 2 years. So as it was about ready to run out, Congress extended that regulation in an act of Congress, and we have extended it six times. President Biden has signed that extension five times. But the problem is, the extension of that regulation runs out on December 31 of this year.

Now, the Biden administration—I think it is important to understand—in its 2021 budget proposal, called for classwide fentanyl scheduling. The DEA Administrator Anne Milgram said:

The permanent scheduling of all fentanyl-related substances is critical—

Is critical—

to the safety and health of our communities.

She added:

Class-wide scheduling provides a vital tool—

A vital tool—

to combat overdose deaths in the United States.

Now, why have we extended this regulation six times? There is no need for it. We could pass the law, which we have tried to do a number of times.

But the reason we keep extending it is because it has worked. It has helped stop the flow of these precursor chemicals coming out of China. China has actually cracked down on these analogs within China. So the regulation worked. The SOFA Act is vital, according to Anne Milgram.

Something else I want to point out about the SOFA Act is, in an almost unprecedented—this is very rare—in 2018, all 50 States' attorneys general, plus the attorney general from the District of Columbia, including current HHS Secretary Xavier Becerra, who was an attorney general for California

at the time, signed a letter to congressional leadership urging the Congress to act expeditiously and pass the SOFA Act.

This is such a commonsense piece of legislation. It works. It reduces the number of types of fentanyl on the streets killing our citizens, killing our youth, killing people like Archie Badura.

Again, the DEA had a regulation for 2 years. Congress has extended that regulation six times. All I am asking is for the Senate to pass this commonsense, lifesaving piece of legislation by unanimous consent.

And so, Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of S. 1006 and the Senate proceed to its immediate consideration; further, that the bill be considered read a third time and passed and the motion to reconsider be considered made and laid upon the table.

I ask this in the name of Archie Badura and on behalf of Dr. Tim Westlake and a wonderful woman, a wonderful Wisconsinite named Lauri Badura.

The PRESIDING OFFICER. Is there objection?

Mr. DURBIN. Reserving the right to object.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DURBIN. Mr. President, I took chemistry in high school. I wasn't very good at it, but I think I got a B, and I was glad to get rid of it because I didn't understand a lot of it, and that was not where I was headed in life.

The question which the Senator from Wisconsin puts before us today is a complicated question. It seems he is—do we have a drug crisis in America? Yes. Is fentanyl dangerous? Yes. Is fentanyl deadly? Yes. Is fentanyl on schedule I, the highest possible narcotic rating under our Criminal Code? Yes.

So what is this discussion about fentanyl? Why are we at this again?

I don't know the Senator from Wisconsin's background in chemistry and the like, but here is how I understand it and why it is not as simple as paying tribute to this young man who lost his life to fentanyl. And I can come up with examples that I have run into as well. It is heartbreaking what is going on.

There are certain elements that contain fentanyl that have other chemical structures, not simple fentanyl, which is already a prohibited narcotic under American law. And these so-called analogs of fentanyl have many chemical variations. It turns out that some of them are deadly dangerous, but some of them are not. It turns out that some are deadly dangerous, and others may have a promise to be the next Narcan for the researchers.

So we have been struggling, literally, for years with a research community that says: When it comes to fentanyl analogs, don't sweep them all into cat-

egory I. Some of them may be lifesaving, as odd as that sounds. It could happen. And I have been saying it is a reasonable argument, but how long is this investigation going to go on? How long will this research continue?

We are told that it is sincere and real—it has happened under previous administrations and this administration—and that to sweep all these chemical analogs of fentanyl into this category would be, frankly, counterproductive. We may be walking away from something that is a lifesaver rather than a life-taker.

And it is because of that that we have been temporarily extending the decision to put fentanyl and its analogs on category I so that this research can establish whether, in fact, there is a lifesaver, that there is something positive in a fentanyl analog.

I have just given you the sum total of my understanding of this issue. As I said, I didn't major in chemistry and barely got through it in high school, but I think that is where we are.

I don't think there is any disagreement between us that fentanyl is deadly and dangerous and belongs on that category I.

When it comes to the analogs, they said to me: DURBIN, you are a liberal arts lawyer. Don't act like you are a chemist. Give us the time to do this right.

Mr. JOHNSON. Would the Senator from Illinois yield?

Mr. DURBIN. Sure. Yes.

Mr. JOHNSON. So I want to just make the point that there is nothing in the SOFA Act that would prevent that research from continuing, and if a molecule was found that is helpful, it can be scheduled separately.

This is just targeting the deadly drugs that are not helpful. So there is nothing in this that would prevent that type of research, which is why, you know, we have—Congress has reauthorized this or extended this six times, and the Biden administration supports this. They say it is vital that we are able to class all these fentanyl-related molecules together so that we can enforce our laws and prevent death.

So, again, there is nothing in here that prevents the research, which I would completely support. Again, molecules are amazing things, and changing them can change the characteristics, but we have to recognize how deadly fentanyl is.

We have gone from, you know, slightly more than 50,000 overdose deaths in 2015, the year after Archie Badura died, to over 107,000 last year, and we are on a path to break that record too.

So, again, this has been supported on a bipartisan basis. We have extended this.

I just have to say that the research argument just doesn't hold water.

Mr. DURBIN. There is an element that the Senator from Wisconsin may not be aware of. When a drug is on schedule I, it is prohibited to do research on it. That is the reason why we

are running into problems with cannabis, now legal in my State and maybe in your State as well.

And I raised the basic question: Are the health claims about cannabis true or false?

And they said: We cannot research it because it is on the list of prohibited drugs in the United States.

The problem is, if we put all of these analogs on the list, it is going to stop the research that we need to finish. It is a catch-22.

What we have tried to do is a temporary extension saying: Give us the final word. We have got to make a decision.

I do not quarrel with you in any way about the danger of fentanyl, but the people who do this for a living—and I can't keep up with their conversations, by and large—have explained to me: We are trying to find a good use of a fentanyl analog. Don't close the door, slam the door, by putting it on schedule I because research stops.

Mr. JOHNSON. Would the Senator yield again?

Mr. DURBIN. Yes, of course.

Mr. JOHNSON. Fentanyl is being used in medicine today, and it is on schedule II. So they can do the research off of that drug on schedule II. There is nothing preventing that—nothing whatsoever.

Mr. DURBIN. I would just say that my information is a little different. I respect the Senator from Wisconsin and his tribute to this poor young man who lost his life, but we are trying to do the sensible thing. Fentanyl itself is going to continue to be branded a dangerous drug, titled in category 1. But Federal analogs and a variation on that theme is what we are discussing, and for reasons—I am trying to bow to the experts in science and research—on a temporary basis. Believe me, if they have got something, we want to see it. If not, we are going to categorize them as schedule I. So for the reasons I have mentioned, I am going to object.

The PRESIDING OFFICER. Objection is heard.

The Senator from Wisconsin.

Mr. JOHNSON. Mr. President, again, I find that unfortunate. I would hope that the Senator from Illinois would not at least object to Senator GRASSLEY coming on the floor looking for another extension of this.

Again, the DEA Administrator says this is vital. So I hope that, at a minimum, we can extend this for a seventh time, and then maybe we can come back when some of these issues are resolved and maybe finally pass SOFA possibly in the next Congress.

I yield the floor.

Mr. DURBIN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The senior assistant legislative clerk proceeded to call the roll.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Iowa.

UNANIMOUS CONSENT REQUEST—S. 1216

Mr. GRASSLEY. Mr. President, home should be the safest place in the world for a child. It used to be that parents could breathe a little easier once they locked the front door, knowing that their child was safe on the inside.

For some reason or other, not anymore is that the case. Drug dealers have found ways into our homes through social media. Now, more and more children are dying alone at night in what should be the safest place for them, in their own bedrooms.

That is where Deric and Kathy Kidd found their son Sebastian, unresponsive, on the morning of July 30, 2021. He was slumped on his bed, still in his street clothes.

Sebastian was a high school senior in Des Moines, IA. He took half of what he thought was a pain pill. It was actually fentanyl. Sebastian's parents should have had the rest of their lives with him. Instead, they buried their 17-year-old son.

Congress has responded in the worst possible way to parents like the Kidd family. We have responded with inaction. I am disappointed that my Democrat colleagues have tried to block fentanyl analog scheduling. Under this Democrat-led Congress, the reauthorization periods of fentanyl analog scheduling keeps getting shorter and shorter, and bipartisan talks about permanent scheduling have all dropped. And if you don't have bipartisan talks, nothing happens in the U.S. Senate. That is what it takes to get things done in a body that takes a supermajority of 60 to stop debate to get to finality.

It doesn't matter if you are a rank-and-file Democrat or Republican, fentanyl is a problem for all of us. It is time that we start treating it like the problem it is. We can't keep ignoring law enforcement's requests for fentanyl analog scheduling. Police are the folks responding to fentanyl poisoning. Police are the ones putting their lives on the line facing off with cartels, and police are asking us to extend classification of fentanyl analog as schedule I substances.

Who are we to deny the police when they say what they need? We all agreed that fentanyl analog scheduling was necessary in 2020 when we unanimously extended it by 15 months. Even career officials in the Biden administration agreed that fentanyl analog scheduling was necessary when they asked Congress. The Biden administration asked Congress to permanently schedule it.

But here we are on the brink of fentanyl analog scheduling—the expiration of it. Families and law enforcement alike are panicked that we let this authority disappear. Temporary fentanyl analog scheduling cannot lapse while we hash out more permanent solutions.

We have all voted this provision into law before. We have been warned that

more parents will have to bury their children if we do not pass it.

So, I have this motion.

Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 45, S. 1216; further, that the Grassley amendment at the desk be considered and agreed to; that the bill, as amended, be considered read a third time and passed, and the motion to reconsider be considered made and laid upon the table with no intervening action.

The PRESIDING OFFICER. Is there objection?

Mr. DURBIN. Mr. President, reserving the right to object.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DURBIN. Mr. President, I believe the Senator from Iowa is sincere and accurate as he describes the fentanyl challenge we face in the United States. He tells the story of losing an Iowan. Sadly, I can tell a similar story in my home State of Illinois.

We currently have a temporary answer to this situation that extends until December 31 of this year, and admittedly, it is coming on us, but it isn't tomorrow. It will be in just a few months.

One of my colleagues on the committee, Senator CORY BOOKER, has a particular expertise and interest in this issue, but, unfortunately, he could not be here at this moment when the Senator from Iowa made his motion. On his behalf, so he has an opportunity to discuss this with the Senator from Iowa and perhaps find a path through our differences, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. GRASSLEY. Mr. President, I appreciate the chairman's right to do that. I appreciate his position on this whole problem that we are trying to deal with. I am just sorry that Senator BOOKER had to have people object for him.

It is not right. How many people have to die before we do something about it? Last year, there were over 107,000 overdose deaths, with 70,000 due to fentanyl-related substances—200 opioid overdoses in the State of Iowa.

Somebody has got to wake up around here and realize that we can do something about it. The Biden administration wants us to do something about it, and one person—not Chairman DURBIN, but other people—stands in the way. It is just not right.

I yield the floor.

The PRESIDING OFFICER (Ms. SMITH). The Senator from Ohio.

HURRICANE IAN

Mr. PORTMAN. Madam President, before I rise to talk about Ukraine tonight, I want to join my colleagues in extending my prayers to all those who are currently in Florida, in the area, and those with loved ones and family there who are in Hurricane Ian's dangerous path this evening.

UKRAINE

Madam President, I come to the floor tonight to talk about Ukraine. This is

the 24th week in a row I have come to bring to the attention of my colleagues what is happening in this part of the world where Russia has attacked a sovereign and democratic country with brutality.

I come to talk about the latest news of Russia's illegal and unprovoked war on Ukraine and to ensure that my colleagues know how important it is that we do follow up with our commitment to Ukraine and pass the legislation that is on the floor this week to provide supplemental funding to the Ukrainian Government, to their military, and also for the humanitarian effort.

I will also highlight tonight the continued Ukrainian counteroffensive up here in the northeast part of Ukraine, where there has been a good deal of success.

The light blue is parts of Ukraine that have been liberated just in the past few weeks. It is about 3,000 square miles. The red is parts that are still occupied by Russia.

I will talk about the sham "referendum" that President Putin announced just last Wednesday and then took place over the weekend, the reasons for and consequences of Russia's recent decision to draft an additional 300,000 troops, as well as Vladimir Putin once again threatening a nuclear attack.

I will also discuss the vote in this body—again, this week—because we, in the next couple of days, are going to decide whether to provide additional funding for Ukraine. It is so important we continue to provide that support at this crucial juncture, just as Ukraine is making progress and pushing back against Russia's war of aggression.

Last week, I touched on the extraordinary success of this counteroffensive. As you will recall, Ukraine launched a surprise lightning counteroffensive here in the northeastern part of the country, which caught Russian forces off guard. In a matter of days, Ukraine liberated over 3,000 square miles of territory and sent the invaders rushing back to Russia and back to eastern parts of Ukraine.

To the north, Russian forces have been pushed back to the international boundary here and over into Ukraine or some into Belarus.

Along this front line is a river. It is the Oskil River, which many thought would be a natural barrier to block Ukraine from making further gains. Yet, as we have seen in the last week, Ukrainian forces have actually managed to cross this river and establish major bridgeheads, including one here at Kupiansk right here and also one here east of Izyum. Izyum is the place where, unfortunately, there were all sorts of atrocities discovered when the liberation took place. There has been additional Ukrainian success here and progress crossing the river to the east of Izyum.

As you will see from the map, a key city called Lyman will soon be sur-

rounded by three sides. When Lyman is surrounded by three sides, it will be very difficult for Russia to defend it. The sense is that the invaders there will be forced to either surrender or retreat.

Clearly, Ukraine continues to have the momentum here in the northeast; again, therefore, exactly the time for us to continue to support Ukraine.

U.S. funding has made a huge difference. The actions of this body and the House of Representatives and the administration in providing this help to Ukraine has allowed for successes that were unimaginable 7 months ago when Russia initiated this latest invasion. They have actually stopped and are now pushing back a Russian army that is much larger and with a lot more heavy equipment.

Our support, along with that of over 50 countries around the world—and let me underline that. Fifty countries around the world or more have now provided military assistance to Ukraine. That has helped enable the survival of this country as a free and independent Ukraine.

Yesterday, I had the privilege to host Ukraine's Ambassador to the United States, Oksana Markarova, along with Ukraine's Parliament. We heard firsthand from them how the weapons we are providing are making a huge difference on the battlefield.

One of the parliamentarians had just returned from the region, the northeast region we talked about. She was just in the area of Kharkiv, and she said that the soldiers there told her: Please, go back to the United States and say thank you because these weapons you are giving us—particularly, they focused on the HIMARS—are making such a huge difference.

These HIMARS are long-range missile systems, and they have changed the tide of this war.

Along with more ammunition and equipment, of course, we have to continue to insist on total transparency to ensure that the end use is being monitored. "End use monitoring" is the term that the 101st Airborne used when I talked to them in Poland about the U.S. weapons that are going into the country.

This is an example. HIMARS is an example. We know now from public information there are 16 of these HIMARS from the United States. There are also some from the UK—not exactly the same weapon but a similar weapon—and also some from Germany. Those 16 remain undamaged, which is extraordinary, and they have been incredibly useful.

But we need to ensure that all this equipment goes to the right place to ensure there is no fraud, no diversion of weapons. In my visits to the region, including a month ago, I did speak to U.S. military officials both in Poland and in Ukraine, who provided details on how they are tracking U.S. and other weapons to ensure they are not diverted from the Ukrainians and from the frontlines.

This end-use monitoring, which as our military explains it is, according to them, being implemented in ways never done before; and they claim the Ukrainian Government and military are full partners in these accountability measures. That is what I heard as well. I heard that from the President of Ukraine, President Zelenskyy; and I heard it from all the Ukrainian officials, including the Parliamentarians with whom we met, that they want to have total transparency. They think it is in their interest as well.

Of course, Russian disinformation is trying to convince media otherwise. Let me give you an example of that. Over the weekend, a BBC investigation revealed allegations from Russia media sources that were picked up, frankly, by some U.S. and European media—which is a warning, I think, to our own media to be careful and check your sources—but the reports from the Russian media was that U.S.-supplied weapons were being sold on the black market in Ukraine. BBC determined that was entirely false.

Russians had posed as Ukrainians on the dark web pretending to sell these weapons in order to undermine American and European confidence in Ukraine's ability to control these weapons. It turns out it was a totally false narrative peddled by the Russian Government in order to sow division between Ukraine and its allies. The BBC report again affirms what I've heard in the region, that our military aid to Ukraine is getting into the right hands and is not being diverted for malign purposes.

A specific example of what we had provided that is making a difference are these HIMARS, as we talked about. By all accounts, Ukrainian forces have used these really creatively to be able to disrupt the logistics of the Russian Armed Forces. They have been striking behind enemy lines to destroy Russian ammunition depots, logistics hubs, command and control outposts. Prior to the HIMARS, only the Russians had long-range artillery, and they could fire on Ukrainian civilians and military with impunity. Finally, they have the ability to push back. These weapons have enabled this spectacular counteroffensive we saw in the northeast to be able to succeed. So when we give the Ukrainians weapons they have actually been asking for, they actually need, they use them effectively, and it is working.

In the clearest sign yet that Russia is feeling desperate, last week President Putin announced a new draft, a mobilization of at least 300,000 soldiers to support his troubled war on Ukraine. Remember, President Putin promoted his "special operation" in Ukraine as a special military operation that would not touch the lives of ordinary Russians. It would be quick; it would involve minimal casualties; it would bring great glory to Russia.

Now after 7 months, tens of thousands of casualties, a substantial part

of their military equipment being lost on the battlefield, and global outrage at what Russia is doing, President Putin is being forced to implement Russia's first mass mobilization since World War II to bolster his failing war effort. This is an act of desperation, and it is deeply unpopular among the people in Russia. According to reports, antimobilization protests in 38 Russian cities saw more than 1,300 people arrested just last week. Here are some of those demonstrations.

The punishment for many of those detained, by the way, if they are males between the ages of, say, 18 and 50, is to be forcibly conscripted. Meanwhile, several Russian enlistment offices have been burned down by citizens armed with Molotov cocktails who want nothing to do with Putin's war in Ukraine.

In fact, the announcement of the mobilization has caused many thousands of military-aged men to flee Russia to avoid being sent to war. It is reported that airline tickets out of Moscow have reached \$5,000 or \$10,000 or more, and flights are totally sold out. Car traffic at Russia's international borders have caused massive traffic jams, as those who can't fly out of Russia try to drive out to get away from the conscription. Here is an example with the border with Georgia. You can see these cars lined up for miles.

Russia is so desperate that they are recruiting just about any able-bodied man just to get bodies in to fill their ranks. These are not military-trained individuals. They are letting prisoners out of jail if they promise to fight. Despite the official policy that this mobilization will only draft men with prior military experience, they will take anyone. In the Irkutsk region of Russia, a young man shot and killed a military commissar who was attempting to conscript his friend who had no prior military experience. President Putin is breaking his promises to the Russian people, and they are responding.

Russia's desperation has shown itself in other ways too. After numerous postponements, Moscow-backed occupation officials in Luhansk, Kherson, Zaporizhzhia, and Donetsk Oblast suddenly announced last Tuesday they would hold immediate referendum to join Russia, which they completed over the weekend. In typical Russian fashion, these so-called referenda are not free or fair. The results have been preordained in Moscow, and the actual conduct of the voting is just theater. There are a lot of videos circulating—and you have probably seen them—of online videos of armed Russian soldiers going door-to-door to conduct these illegal referendum. So you have an armed soldier with an automatic weapon next to an election official asking someone how they are going to vote. Here is an example of one of the photographs that somebody bravely took of a Russian soldier literally looking over the shoulder of a Ukrainian citizen. How can any Ukrainian vote against

the referendum in the face of an automatic rifle? The European Union, the United Nations, the United States, and others, of course, have called these sham elections. It appears that Russia thinks by claiming these territories as theirs, it can justify now their use of chemical, biological, or even nuclear weapons in order to defend what Putin would call his own sovereign territory. Of course, no matter what Russia says, this—all of this—is Ukrainian territory. It is sovereign Ukrainian territory. And a sham referendum is only a Russian escalation of their illegal and unprovoked war on Ukraine.

So the results this week are predictable. You can look for them. It will be 95 percent. It will be 98 percent. The process won't be fair. It will be done with flagrant disregard for Ukrainian law and for international law. Russia's actions reveal their weak hand, and the world is not fooled. UK defense secretary Ben Wallace said that the partial mobilization and the annexation of parts of Ukraine are an admission, as he said, of Mr. Putin's invasion failing. Ambassador to Ukraine Bridget Brink called the announced measures "signs of weakness."

We must make it clear that the United States will never recognize Russia's claims to these annexed territories. President Putin's veiled threats last week and again this week, some say, to use nuclear weapons to defend illegally annexed territory have received a good deal of media attention. First, it should be noted, he has made similar threatening statements in the past. But he also knows that the use of nuclear weapons would be catastrophic for his own country. As the Washington Post said over the weekend:

There are no military gains to be had from a nuclear attack that indiscriminately incinerates everything in its path and leaves the land uninhabitable.

The nuclear fallout of attacking neighboring Ukraine, of course, will also affect Russia and its citizens. Meanwhile, if he were to act on such a threat, President Putin would immediately turn his country into even more of a pariah than it is now, and there would be a severe consequence, as the United States has warned.

Nuclear weapons have not been used since World War II, almost 80 years ago. Using them now would plunge us into a far more dangerous world, and the world would never forgive President Putin. The countries that have taken a neutral stance on this brutal conflict would quickly change their tune, and the resolve of the West and so many other countries to stand against Russian aggression would only increase. This conflict has shown that when push comes to shove, the alliance actually comes together to protect Ukraine; it binds together.

Nuclear blackmail cannot be allowed to work. Responding to Vladimir Putin's reckless threats by pulling back would only reward bad behavior and create a more dangerous and vola-

tile world. Appeasement does not work. In response to these threats, it is crucial that we continue to support Ukraine while making clear to Russia that there will be enormous costs for use of a nuclear weapon. National Security Advisor Jake Sullivan said on Sunday morning that "any use of nuclear weapons will be met with catastrophic consequences for Russia."

This battle for freedom transcends this Congress; it transcends partisanship. We all know who the aggressor is in this fight. The people of Ukraine have never asked for anything other than peace and to be able to live with their neighbors, including Russia, in peace; the right to exist as a sovereign, independent nation. Russia's illegal and unprovoked war is an attack on their fundamental right to self-governance.

We have all seen the evidence of war crimes: the torture, the rape, the killings of innocent Ukrainian civilians and noncombatants, the videos of Ukrainian soldiers being tortured with box cutters, and the mass gravesites. NATO's response last week to the Russian atrocities in Izyum this past week was to reaffirm "our unwavering support for Ukraine's independence, sovereignty, and territorial integrity . . . and for Ukraine's inherent right to self-defence. NATO allies remain resolute in providing political and practical support to Ukraine as it continues to defend itself against Russia's aggression."

Global support for Ukraine has increased in response to the increasing number of atrocities being committed by Russian soldiers. I was able to hear about this firsthand last week when I met with Ukrainian Prosecutor General Andriy Kostin about the ongoing global effort to hold Russia accountable for their war crimes, which are a clear violation of international law. We discussed ways the United States can aid Ukraine in its effort to investigate and prosecute cases of war crimes conducted by Russian soldiers in Ukraine. Last week, I talked about the mass graves of people tortured and executed in the city of Izyum. Who knows how many more are out there. The evidence of this genocide grows every day, and every day the anger against Russia grows alongside it. So far, we believe these war crimes have resulted in the deaths of at least 7,300 civilians, including 391 children.

The West and our allies must all recognize that these Russian atrocities will not stop until Russia believes the costs are too high, until there are more Ukrainian victories on the battlefield, and until the sanctions are more effective at cutting off funding to Russia's war machine. Russia needs to feel the squeeze. We talked about this in the Senate Foreign Relations Committee hearing today. That is the only way this Russian brutality, this madness, ends. For the sake of global freedom, Ukraine must be allowed to end this war on its terms, not on Russia's

terms. To get to that point requires us to continue supporting Ukraine, to keep the momentum going. What would it say if we backed down now?

In an address before the United Nations last week, President Zelenskyy said:

Ukraine wants peace. Europe wants peace. The world wants peace. And we have seen who is the only one who wants war.

Secretary of State Blinken summed it up:

If Russia stops fighting, the war ends. If Russia stops fighting, the war ends. If Ukraine stops fighting, Ukraine ends.

I encourage the Senate to act with a united voice in support of the people of Ukraine. By providing additional funding, the battlefield gains can continue; the government in Kyiv can continue to operate; Ukrainian prosecutors can investigate more war crimes and bring the perpetrators to justice.

As Russia continues their ruthless attack on freedom and democracy, it is our duty to stand up for what we believe to be true: that life, liberty, and the pursuit of happiness will always win in the fight against tyranny. And it is working. Ukrainian liberators have taken back cities across Ukraine, as we have seen. It is working. And unlike Russia, the morale of the Ukrainian people and the troops is strong. Their determination is strong.

We must continue to let the world know we stand with Ukraine. And as I have heard from multiple meetings with Ukrainian officials, including some of the Parliamentarians we were with yesterday, they said: Freedom must be armed.

And the United States must be there to lead that effort to ensure that freedom's flame is not extinguished in Ukraine.

I yield the floor.

The PRESIDING OFFICER. The Senator from Vermont.

URGING THE GOVERNMENT OF BRAZIL TO ENSURE THAT THE OCTOBER 2022 ELECTIONS ARE CONDUCTED IN A FREE, FAIR, CREDIBLE, TRANSPARENT, AND PEACEFUL MANNER

Mr. SANDERS. Madam President, I ask unanimous consent that the Committee on Foreign Relations be discharged from further consideration and the Senate now proceed to S. Res. 753.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 753) urging the Government of Brazil to ensure that the October 2022 elections are conducted in a free, fair, credible, transparent, and peaceful manner.

There being no objection, the committee was discharged and the Senate proceeded to consider the resolution.

Mr. SANDERS. I know of no further debate on the resolution.

The PRESIDING OFFICER. Is there further debate?

If not, the question is on adoption of the resolution.

The resolution (S. Res. 753) was agreed to.

Mr. SANDERS. I ask unanimous consent that the preamble be agreed to and that the motions to reconsider be considered made and laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The preamble was agreed to.

(The resolution, with its preamble, is printed in the RECORD of September 7, 2022, under "Submitted Resolutions.")

The PRESIDING OFFICER. The Senator from Vermont.

Mr. SANDERS. Madam President, I have risen today to ask unanimous consent for S. Res. 753, expressing the sense of the Senate on the upcoming election in Brazil.

This Sunday, October 2, Brazil will hold its Presidential election. According to many polls, it appears that the two major candidates are President Jair Bolsonaro and former President Lula da Silva. If no candidate receives over 50 percent of the vote, there will be a runoff election between the top two candidates on October 30.

Madam President, over the past several months, Brazilians from all sectors of society have publicly expressed serious concern about ongoing efforts to undermine democracy in their country, including close to 1 million Brazilians who signed an open letter released on July 26, defending the democratic institutions of Brazil and the rule of law.

And there is a very good reason why these people in Brazil signed that letter. And that is that the current President, and candidate for reelection, Mr. Bolsonaro, has made some very provocative statements which suggest that he might not accept the election results if he loses. In other words, he might attempt to destroy Brazilian democracy and remain in power no matter what the people of Brazil determine in a free, fair, and democratic election.

And let me just quote some of what Mr. Bolsonaro has been saying over the last several years. Back in September 2018, before he won his election, Bolsonaro stated:

I will not accept an election result that is not my own victory.

On September 7, 2021, as reported by the Financial Times, Mr. Bolsonaro stated:

There are those who think they can take me from the presidency with the mark of a pen. Well, I say to everyone I have only three possible fates: arrest, death or victory. And tell the bastards I'll never be arrested. Only God can take me from the presidency.

According to Human Rights Watch, previously, President Bolsonaro had claimed, without providing any evidence, that the last two Presidential elections were fraudulent, including his own election, in which he claimed he got more votes than the final tally showed.

But it is not just Bolsonaro's words that should be of concern to those of us who believe in democracy. According

to a recent survey by the Federal University of the state of Rio de Janeiro, Brazil is facing a 335-percent increase in violence directed against political leaders in 2022 relative to 2019.

Last month, a Workers' Party official was shot dead by a Bolsonaro supporter. Yesterday, Reuters reported that the Federal Police guarding former President Lula da Silva, who is the current frontrunner to unseat Bolsonaro, sent a classified memo to senior colleagues across Brazil calling for backup in order to protect Lula from possible assassination attempts.

It is clearly not the business of the United States to determine who the next President of Brazil is or to get involved in Brazil's Presidential elections in any way. That is a decision to be made solely by the people of Brazil through a free and fair election. But it is the business of the United States to make clear to the people of Brazil that our government will not recognize or support a government that comes to power through a military coup or the undermining of a democratic election.

In that regard, I have asked to receive unanimous consent today for a resolution that I introduced with Senator TIM Kaine, the chair of the Senate Foreign Relations Subcommittee on the Western Hemisphere. That resolution is also cosponsored by Senators DURBIN, LEAHY, MERKLEY, BLUMENTHAL, and WARREN.

I would also like to thank Senator MENENDEZ, the chair of the Senate Foreign Relations Committee, for allowing this resolution to come to the floor.

This resolution is very simple and straightforward. It does not take sides in Brazil's elections. All it does is express the sense of the U.S. Senate that the U.S. Government should make unequivocally clear that the continuing relationship of the United States and Brazil depends upon the commitment of the Government of Brazil to democracy and human rights.

It urges the Biden administration to make clear that the United States will not support any government that comes to power in Brazil through undemocratic means and to ensure that U.S. security assistance to Brazil remains compliant with our laws related to the peaceful and democratic transition of power. This includes longstanding legal restrictions on the provision of security assistance in the event of a military coup.

In my view, it is imperative that the U.S. Senate make it clear through this resolution that we support democracy in Brazil. It would be unacceptable for the United States to recognize a government that came to power undemocratically, and it would send a horrific message to the entire world if we did that.

It is important for the people of Brazil to know we are on their side, on the side of democracy. This resolution sent that message. And I thank my colleagues for supporting it.

With that, I yield the floor.

The PRESIDING OFFICER. The Senator from California.

FEMA IMPROVEMENT, REFORM, AND EFFICIENCY ACT OF 2022

Mr. PADILLA. Madam President, I ask unanimous consent that the Senate proceed to Calendar No. 482, S. 3092.

The PRESIDING OFFICER. The clerk will report the bill by title.

The bill clerk read as follows:

A bill (S. 3092) to amend the Robert T. Stafford Disaster Relief and Emergency Assistance Act to improve the provision of certain disaster assistance, and for other purposes.

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Homeland Security and Governmental Affairs, with an amendment to strike all after the enacting clause and insert in lieu thereof the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the “FEMA Improvement, Reform, and Efficiency Act of 2022” or the “FIRE Act”.

SEC. 2. DEFINITIONS.

In this Act—

(1) the term “Administrator” means the Administrator of the Agency;

(2) the term “Agency” means the Federal Emergency Management Agency;

(3) the term “appropriate committees of Congress” means—

(A) the Committee on Homeland Security and Governmental Affairs and the Committee on Appropriations of the Senate; and

(B) the Committee on Transportation and Infrastructure and the Committee on Appropriations of the House of Representatives;

(4) the term “emergency” means an emergency declared or determined to exist by the President under section 501 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5191);

(5) the terms “Indian tribal government”, “local government”, and “State” have the meanings given such terms in section 102 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5122); and

(6) the term “major disaster” means a major disaster declared by the President under section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5170).

SEC. 3. REPORT ON RELOCATION ASSISTANCE.

(a) IN GENERAL.—Not later than 180 days after the date of enactment of this Act, the Administrator shall submit a report regarding the use of relocation assistance under sections 203, 404, and 406 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5133, 5170c, 5172) for wildfire risk to the appropriate committees of Congress.

(b) CONTENTS.—The report submitted under subsection (a) shall include the following:

(1) Any information on relocation projects that have been carried out due to fire risks or denied by the Agency, including the number and value of projects either carried out or denied.

(2) A discussion of the possible benefits or disadvantages of providing relocation assistance that may reduce, but not eliminate, the risk of loss due to wildfires.

(3) A discussion of how the Agency may optimize relocation assistance when entire States or geographic areas are considered subject to a fire risk.

(4) An analysis of whether other mitigation measures are more cost-effective than relocation assistance when the applicant is applying to move from a high-risk to a medium-risk or low-risk area with respect to wildfires.

(5) An analysis of the need for the Federal Government to produce wildfire maps that identify high-risk, moderate-risk, and low-risk wildfire zones.

(6) An analysis of whether other mitigation measures promote greater resilience to wildfires when compared to relocation or, if additional data is required in order to carry out such an analysis, a discussion of the additional data required.

(7) A discussion of the ability of States, local governments, and Indian tribal governments to demonstrate fire risk, and whether the level of this ability impacts the ability of States, local governments, or Indian tribal governments to access relocation assistance, including an assessment of existing fire mapping products and capabilities and recommendations on redressing any gaps in the ability of the Agency to assist States, local governments, and Indian tribal governments in demonstrating fire risk.

(8) An evaluation of—

(A) the scope of the data available to the Agency regarding historical wildfire losses;

(B) how such data is utilized in benefit-cost analysis determinations by the Agency;

(C) what additional data, if any, may be pertinent to such determinations; and

(D) what, if any, alternative methods may be relevant to the determination of cost effectiveness.

(9) A discussion of the extent to which the decision process for relocation assistance appropriately considers the change in future risks for wildfires due to a changing climate.

(10) An analysis of whether statutes and regulations regarding relocation assistance by the Agency present barriers for States, local governments, or Indian tribal governments trying to access funding to reduce wildfire risk.

(11) An analysis of—

(A) how, if at all, the Agency has modified policies and procedures to determine the eligibility of proposed relocation or mitigation projects with respect to wildfires;

(B) the cost effectiveness of such projects, in light of the increasing losses and obligations for wildfires in recent years; and

(C) the effectiveness of any modifications described in subparagraph (A).

(12) An analysis of how, if at all, recent changes in the availability of fire insurance has resulted in modifications of policy or procedure with respect to determining the cost efficacy of relocation assistance for wildfires.

(13) An analysis of how to define repetitive loss and repetitively damaged properties in the context of wildfires.

(14) A discussion of whether any legislative, regulatory, or policy changes are necessary for the Agency to better implement relocation assistance to reduce risk from wildfires.

(15) Other related issues that the Administrator determines appropriate.

SEC. 4. RED FLAG WARNINGS AND PREDISASTER ACTIONS.

Not later than 1 year after the date of enactment of this Act, the Administrator, in coordination with the National Weather Service of the National Oceanic and Atmospheric Administration, shall—

(1) conduct a study of, develop recommendations for, and initiate a process for the use of Red Flag Warnings and similar weather alert and notification methods, including the use of emerging technologies, to establish—

(A) plans and actions, consistent with law, that can be implemented prior to a wildfire event, including pre-impact disaster declarations and surge operations, that can limit the impact, duration, or severity of the fire; and

(B) mechanisms to increase interagency collaboration to expedite the delivery of disaster assistance; and

(2) submit to the appropriate committees of Congress a comprehensive report regarding the study described in paragraph (1), including any recommendations of the Administrator, and the

activities of the Administrator to carry out paragraph (1).

SEC. 5. ASSISTANCE FOR WILDFIRE DAMAGE.

Not later than 180 days after the date of enactment of this Act, the Administrator shall brief the appropriate committees of Congress regarding—

(1) the application for assistance and consistency of assistance provided by the Agency in response to wildfires; and

(2) the kinds of damage that result from wildfires.

SEC. 6. GAO REPORT ON GAPS.

Not later than 1 year after the date of enactment of this Act, the Comptroller General of the United States shall submit to the appropriate committees of Congress a report that examines—

(1) gaps in the policies of the Agency related to wildfires, when compared to other hazards;

(2) disparities in regulations and guidance issued by the Administrator, including any oversight of the programs of the Agency, when addressing impacts of wildfires and other hazards;

(3) ways to shorten the period of time between the initiating of and the distribution of assistance, reimbursements, and grants;

(4) the effectiveness of the programs of the Agency in addressing wildfire hazards;

(5) ways to improve the ability of the Agency to assist States, local governments, and Indian tribal governments to prepare for, respond to, recover from, and mitigate against wildfire hazards;

(6) revising the application process for assistance relating to wildfires to more effectively assess uninsured and underinsured losses and serious needs; and

(7) ways to improve the disaster assistance programs of agencies other than the Agency.

SEC. 7. CRISIS COUNSELING CULTURAL COMPETENCY.

Section 416 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5183) is amended—

(1) by striking “The President” and inserting the following:

“(a) IN GENERAL.—The President”; and

(2) by adding at the end the following:

“(b) CULTURAL COMPETENCY.—The President shall, in consultation with affected States, local governments, and Indian tribal governments and cultural experts, ensure that any individual providing professional counseling services to victims of a major disaster as authorized under subsection (a), including those working for nonprofit partners and recovery organizations, is appropriately trained to address—

“(1) cultural competency and respectful care practices; and

“(2) impacts from major disasters in communities, and to individuals, with socio-economically disadvantaged backgrounds.”.

SEC. 8. CASE MANAGEMENT CULTURAL COMPETENCY.

Section 426 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5189d) is amended—

(1) by striking “The President” and inserting the following:

“(a) IN GENERAL.—The President”; and

(2) by adding at the end the following:

“(b) CULTURAL COMPETENCY.—The President shall, in consultation with affected States, local governments, and Indian tribal governments and cultural experts, ensure that any individual providing case management services to victims of a major disaster as authorized under subsection (a), including those working for nonprofit partners and recovery organizations, is appropriately trained to address—

“(1) cultural competency and respectful care practices; and

“(2) impacts from major disasters in communities, and to individuals, with socio-economically disadvantaged backgrounds.”.

SEC. 9. STUDY AND PLAN FOR DISASTER HOUSING ASSISTANCE.

(a) STUDY.—Not later than 180 days after the date of enactment of this Act, the Administrator shall—

(1) conduct a study and develop a plan, consistent with law, under which the Agency will address providing housing assistance to survivors of major disasters or emergencies when presented with challenges such as—

(A) the lack of proof of ownership or ownership documentation;

(B) the presence of multiple families within a single household; and

(C) the near loss of a community, with the majority of homes destroyed in that community, including as a result of a wildfire, earthquake, or other event causing a major disaster; and

(2) make recommendations for legislative changes needed to address—

(A) the unmet needs of survivors of major disasters or emergencies who are unable to document or prove ownership of the household;

(B) the presence of multiple families within a single household; and

(C) the near loss of a community, with the majority of homes destroyed in that community, including as a result of a wildfire, earthquake, or other event causing a major disaster.

(b) **COMPREHENSIVE REPORT.**—The Administrator shall submit to the appropriate committees of Congress a report that provides a detailed discussion of the plans developed under subsection (a)(1) and the recommendations of the Administrator under subsection (a)(2).

(c) **BRIEFING.**—Not later than 30 days after submission of the report and recommendations under subsection (b), the Administrator shall brief the appropriate committees of Congress on the findings and any recommendations made pursuant to this section.

SEC. 10. REIMBURSEMENT.

Not later than 180 days after the date of enactment of this Act, the Administrator shall brief the appropriate committees of Congress regarding the extent to which the Agency is using housing solutions proposed by a State or local government to reduce the time or cost required to implement housing solutions after a major disaster.

SEC. 11. WILDFIRE INSURANCE STUDY BY THE NATIONAL ACADEMIES.

(a) **STUDY.**—

(1) **IN GENERAL.**—Not later than 180 days after the date of enactment of this Act, the Administrator shall seek to enter into an agreement with the National Academy of Sciences to conduct a study of—

(A) potential solutions to address the availability and affordability of insurance for wildfire perils in all regions of the United States, including consideration of a national all natural hazards insurance program;

(B) the ability of States, communities, and individuals to mitigate wildfire risks, including the affordability and feasibility of such mitigation activities;

(C) the current and potential future effects of land use policies and building codes on the potential solutions;

(D) the reasons why many properties at risk of wildfire lack insurance coverage;

(E) the role of insurers in providing incentives for wildfire risk mitigation efforts;

(F) the state of catastrophic insurance and reinsurance markets and the approaches in providing insurance protection to different sectors of the population of the United States;

(G) the role of the Federal Government and State and local governments in providing incentives for feasible wildfire risk mitigation efforts and the cost of providing assistance in the absence of insurance;

(H) the state of modeling and mapping wildfire risk and solutions for accurately and adequately identifying future wildfire risk;

(I) approaches to insuring wildfire risk in the United States; and

(J) such other issues that may be necessary or appropriate for the report.

(2) **CONSULTATION.**—The agreement to conduct the study described in subsection (a) shall re-

quire that, in conducting the study, the National Academy of Sciences shall consult with State insurance regulators, consumer organizations, representatives of the insurance and reinsurance industry, policyholders, and other organizations and experts, as appropriate.

(b) **SUBMISSION.**—Not later than 2 years after the date of enactment of this Act, the Administrator shall submit to Congress the results of the study commissioned under subsection (a).

SEC. 12. INCREASED CAP FOR EMERGENCY DECLARATIONS BASED ON REGIONAL COST OF LIVING.

Not later than 180 days after the date of enactment of this Act, the Administrator shall brief the appropriate committees of Congress regarding the benefits and drawbacks of establishing a maximum amount for assistance provided for an emergency that is based on the cost of living in the region in which the emergency occurs.

SEC. 13. FACILITATING DISPOSAL OF TEMPORARY TRANSPORTABLE HOUSING UNITS TO SURVIVORS.

Section 408(d)(2)(B)(i) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5174(d)(2)(B)(i)) is amended by inserting “, with priority given to a survivor of a major disaster who suffered a property loss as a result of the major disaster” after “any person”.

SEC. 14. DEADLINE ON CODE ENFORCEMENT AND MANAGEMENT COST ELIGIBILITY.

Section 406(a)(2)(D) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5172(a)(2)(D)) is amended by striking “180 days” and inserting “1 year”.

SEC. 15. PERMIT APPLICATIONS FOR TRIBAL UPGRADES TO EMERGENCY OPERATIONS CENTERS.

Section 614(a) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5196c(a)) is amended by inserting “and Indian tribal governments” after “grants to States”.

Mr. PADILLA. I further ask that the Padilla amendment, which is at the desk, be considered and agreed to, the committee-reported substitute amendment, as amended, be agreed to; the bill, as amended, be considered read a third time and passed; and the motion to reconsider be considered made and laid upon the table with no intervening action or debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 5934) was agreed to, as follows:

(Purpose: To improve the bill)

On page 19, line 16, strike “Red Flag” and all that follows through “technologies,” on line 18 and insert “forecasts and data, including information that supports the Red Flag Warnings of the National Oceanic and Atmospheric Administration and similar weather alert and notification methods.”.

On page 21, line 19, strike “CULTURAL COMPETENCY” and insert “EFFECTIVE COMMUNICATION”.

On page 22, strike lines 2 through 15 and insert the following:

“(b) **EFFECTIVE COMMUNICATION.**—The President shall, in consultation with affected States, local governments, and Indian tribal governments and cultural experts, ensure that any individual providing professional counseling services to victims of a major disaster as authorized under subsection (a), including those working for nonprofit partners and recovery organizations, is appropriately trained to address impacts from major disasters in communities, and to individuals, with socio-economically disadvantaged backgrounds.”.

SEC. 8. CASE MANAGEMENT EFFECTIVE COMMUNICATION.

On page 22, strike line 23 and all that follows through page 23, line 9, and insert the following:

“(b) **EFFECTIVE COMMUNICATION.**—The President shall, in consultation with affected States, local governments, and Indian tribal governments and cultural experts, ensure that any individual providing case management services to victims of a major disaster as authorized under subsection (a), including those working for nonprofit partners and recovery organizations, is appropriately trained to address impacts from major disasters in communities, and to individuals, with socio-economically disadvantaged backgrounds.”.

On page 25, strike line 8 and all that follows through page 27, line 8, and insert the following:

SEC. 11. INCREASED CAP FOR EMERGENCY DECLARATIONS BASED ON REGIONAL COST OF LIVING.

On page 27, strike lines 15 and 16 and insert the following:

SEC. 12. FACILITATING DISPOSAL OF TEMPORARY TRANSPORTABLE HOUSING UNITS TO SURVIVORS.

On page 28, strike lines 1 through 12 and insert the following:

SEC. 13. DEADLINE ON CODE ENFORCEMENT AND MANAGEMENT COST ELIGIBILITY.

(a) **IN GENERAL.**—Section 406(a)(2)(D) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5172(a)(2)(D)) is amended by striking “180 days” and inserting “1 year”.

(b) **APPLICABILITY.**—The amendment made by subsection (a) shall apply with respect to amounts appropriated on or after the date of enactment of this Act.

SEC. 14. PERMIT APPLICATIONS FOR TRIBAL UPGRADES TO EMERGENCY OPERATIONS CENTERS.

(a) **IN GENERAL.**—Section 614(a) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5196c(a)) is amended—

(1) by inserting “and Indian tribal governments” after “grants to States”; and

(2) by striking “State and local” and inserting “State, local, and Tribal”.

(b) **APPLICABILITY.**—The amendments made by subsection (a) shall apply with respect to amounts appropriated on or after the date of enactment of this Act.

The committee-reported amendment, in the nature of a substitute, as amended, was agreed to.

The bill (S. 3092), as amended, was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 3092

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “FEMA Improvement, Reform, and Efficiency Act of 2022” or the “FIRE Act”.

SEC. 2. DEFINITIONS.

In this Act—

(1) the term “Administrator” means the Administrator of the Agency;

(2) the term “Agency” means the Federal Emergency Management Agency;

(3) the term “appropriate committees of Congress” means—

(A) the Committee on Homeland Security and Governmental Affairs and the Committee on Appropriations of the Senate; and

(B) the Committee on Transportation and Infrastructure and the Committee on Appropriations of the House of Representatives;

(4) the term “emergency” means an emergency declared or determined to exist by the President under section 501 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5191);

(5) the terms “Indian tribal government”, “local government”, and “State” have the meanings given such terms in section 102 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5122); and

(6) the term “major disaster” means a major disaster declared by the President under section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5170).

SEC. 3. REPORT ON RELOCATION ASSISTANCE.

(a) IN GENERAL.—Not later than 180 days after the date of enactment of this Act, the Administrator shall submit a report regarding the use of relocation assistance under sections 203, 404, and 406 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5133, 5170c, 5172) for wildfire risk to the appropriate committees of Congress.

(b) CONTENTS.—The report submitted under subsection (a) shall include the following:

(1) Any information on relocation projects that have been carried out due to fire risks or denied by the Agency, including the number and value of projects either carried out or denied.

(2) A discussion of the possible benefits or disadvantages of providing relocation assistance that may reduce, but not eliminate, the risk of loss due to wildfires.

(3) A discussion of how the Agency may optimize relocation assistance when entire States or geographic areas are considered subject to a fire risk.

(4) An analysis of whether other mitigation measures are more cost-effective than relocation assistance when the applicant is applying to move from a high-risk to a medium-risk or low-risk area with respect to wildfires.

(5) An analysis of the need for the Federal Government to produce wildfire maps that identify high-risk, moderate-risk, and low-risk wildfire zones.

(6) An analysis of whether other mitigation measures promote greater resilience to wildfires when compared to relocation or, if additional data is required in order to carry out such an analysis, a discussion of the additional data required.

(7) A discussion of the ability of States, local governments, and Indian tribal governments to demonstrate fire risk, and whether the level of this ability impacts the ability of States, local governments, or Indian tribal governments to access relocation assistance, including an assessment of existing fire mapping products and capabilities and recommendations on redressing any gaps in the ability of the Agency to assist States, local governments, and Indian tribal governments in demonstrating fire risk.

(8) An evaluation of—

(A) the scope of the data available to the Agency regarding historical wildfire losses;

(B) how such data is utilized in benefit-cost analysis determinations by the Agency;

(C) what additional data, if any, may be pertinent to such determinations; and

(D) what, if any, alternative methods may be relevant to the determination of cost effectiveness.

(9) A discussion of the extent to which the decision process for relocation assistance appropriately considers the change in future risks for wildfires due to a changing climate.

(10) An analysis of whether statutes and regulations regarding relocation assistance by the Agency present barriers for States, local governments, or Indian tribal govern-

ments trying to access funding to reduce wildfire risk.

(11) An analysis of—

(A) how, if at all, the Agency has modified policies and procedures to determine the eligibility of proposed relocation or mitigation projects with respect to wildfires;

(B) the cost effectiveness of such projects, in light of the increasing losses and obligations for wildfires in recent years; and

(C) the effectiveness of any modifications described in subparagraph (A).

(12) An analysis of how, if at all, recent changes in the availability of fire insurance has resulted in modifications of policy or procedure with respect to determining the cost efficacy of relocation assistance for wildfires.

(13) An analysis of how to define repetitive loss and repetitively damaged properties in the context of wildfires.

(14) A discussion of whether any legislative, regulatory, or policy changes are necessary for the Agency to better implement relocation assistance to reduce risk from wildfires.

(15) Other related issues that the Administrator determines appropriate.

SEC. 4. RED FLAG WARNINGS AND PREDISASTER ACTIONS.

Not later than 1 year after the date of enactment of this Act, the Administrator, in coordination with the National Weather Service of the National Oceanic and Atmospheric Administration, shall—

(1) conduct a study of, develop recommendations for, and initiate a process for the use of forecasts and data, including information that supports the Red Flag Warnings of the National Oceanic and Atmospheric Administration and similar weather alert and notification methods, to establish—

(A) plans and actions, consistent with law, that can be implemented prior to a wildfire event, including pre-impact disaster declarations and surge operations, that can limit the impact, duration, or severity of the fire; and

(B) mechanisms to increase interagency collaboration to expedite the delivery of disaster assistance; and

(2) submit to the appropriate committees of Congress a comprehensive report regarding the study described in paragraph (1), including any recommendations of the Administrator, and the activities of the Administrator to carry out paragraph (1).

SEC. 5. ASSISTANCE FOR WILDFIRE DAMAGE.

Not later than 180 days after the date of enactment of this Act, the Administrator shall brief the appropriate committees of Congress regarding—

(1) the application for assistance and consistency of assistance provided by the Agency in response to wildfires; and

(2) the kinds of damage that result from wildfires.

SEC. 6. GAO REPORT ON GAPS.

Not later than 1 year after the date of enactment of this Act, the Comptroller General of the United States shall submit to the appropriate committees of Congress a report that examines—

(1) gaps in the policies of the Agency related to wildfires, when compared to other hazards;

(2) disparities in regulations and guidance issued by the Administrator, including any oversight of the programs of the Agency, when addressing impacts of wildfires and other hazards;

(3) ways to shorten the period of time between the initiating of and the distribution of assistance, reimbursements, and grants;

(4) the effectiveness of the programs of the Agency in addressing wildfire hazards;

(5) ways to improve the ability of the Agency to assist States, local governments, and Indian tribal governments to prepare for, respond to, recover from, and mitigate against wildfire hazards;

(6) revising the application process for assistance relating to wildfires to more effectively assess uninsured and underinsured losses and serious needs; and

(7) ways to improve the disaster assistance programs of agencies other than the Agency.

SEC. 7. CRISIS COUNSELING EFFECTIVE COMMUNICATION.

Section 416 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5183) is amended—

(1) by striking “The President” and inserting the following:

“(a) IN GENERAL.—The President”; and

(2) by adding at the end the following:

“(b) EFFECTIVE COMMUNICATION.—The President shall, in consultation with affected States, local governments, and Indian tribal governments and cultural experts, ensure that any individual providing professional counseling services to victims of a major disaster as authorized under subsection (a), including those working for nonprofit partners and recovery organizations, is appropriately trained to address impacts from major disasters in communities, and to individuals, with socio-economically disadvantaged backgrounds.”.

SEC. 8. CASE MANAGEMENT EFFECTIVE COMMUNICATION.

Section 426 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5189d) is amended—

(1) by striking “The President” and inserting the following:

“(a) IN GENERAL.—The President”; and

(2) by adding at the end the following:

“(b) EFFECTIVE COMMUNICATION.—The President shall, in consultation with affected States, local governments, and Indian tribal governments and cultural experts, ensure that any individual providing case management services to victims of a major disaster as authorized under subsection (a), including those working for nonprofit partners and recovery organizations, is appropriately trained to address impacts from major disasters in communities, and to individuals, with socio-economically disadvantaged backgrounds.”.

SEC. 9. STUDY AND PLAN FOR DISASTER HOUSING ASSISTANCE.

(a) STUDY.—Not later than 180 days after the date of enactment of this Act, the Administrator shall—

(1) conduct a study and develop a plan, consistent with law, under which the Agency will address providing housing assistance to survivors of major disasters or emergencies when presented with challenges such as—

(A) the lack of proof of ownership or ownership documentation;

(B) the presence of multiple families within a single household; and

(C) the near loss of a community, with the majority of homes destroyed in that community, including as a result of a wildfire, earthquake, or other event causing a major disaster; and

(2) make recommendations for legislative changes needed to address—

(A) the unmet needs of survivors of major disasters or emergencies who are unable to document or prove ownership of the household;

(B) the presence of multiple families within a single household; and

(C) the near loss of a community, with the majority of homes destroyed in that community, including as a result of a wildfire, earthquake, or other event causing a major disaster.

(b) COMPREHENSIVE REPORT.—The Administrator shall submit to the appropriate committees of Congress a report that provides a detailed discussion of the plans developed under subsection (a)(1) and the recommendations of the Administrator under subsection (a)(2).

(c) BRIEFING.—Not later than 30 days after submission of the report and recommendations under subsection (b), the Administrator shall brief the appropriate committees of Congress on the findings and any recommendations made pursuant to this section.

SEC. 10. REIMBURSEMENT.

Not later than 180 days after the date of enactment of this Act, the Administrator shall brief the appropriate committees of Congress regarding the extent to which the Agency is using housing solutions proposed by a State or local government to reduce the time or cost required to implement housing solutions after a major disaster.

SEC. 11. INCREASED CAP FOR EMERGENCY DECLARATIONS BASED ON REGIONAL COST OF LIVING.

Not later than 180 days after the date of enactment of this Act, the Administrator shall brief the appropriate committees of Congress regarding the benefits and drawbacks of establishing a maximum amount for assistance provided for an emergency that is based on the cost of living in the region in which the emergency occurs.

SEC. 12. FACILITATING DISPOSAL OF TEMPORARY TRANSPORTABLE HOUSING UNITS TO SURVIVORS.

Section 408(d)(2)(B)(i) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5174(d)(2)(B)(i)) is amended by inserting “, with priority given to a survivor of a major disaster who suffered a property loss as a result of the major disaster” after “any person”.

SEC. 13. DEADLINE ON CODE ENFORCEMENT AND MANAGEMENT COST ELIGIBILITY.

(a) IN GENERAL.—Section 406(a)(2)(D) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5172(a)(2)(D)) is amended by striking “180 days” and inserting “1 year”.

(b) APPLICABILITY.—The amendment made by subsection (a) shall apply with respect to amounts appropriated on or after the date of enactment of this Act.

SEC. 14. PERMIT APPLICATIONS FOR TRIBAL UPGRADES TO EMERGENCY OPERATIONS CENTERS.

(a) IN GENERAL.—Section 614(a) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5196(a)) is amended—

(1) by inserting “and Indian tribal governments” after “grants to States”; and

(2) by striking “State and local” and inserting “State, local, and Tribal”.

(b) APPLICABILITY.—The amendments made by subsection (a) shall apply with respect to amounts appropriated on or after the date of enactment of this Act.

Mr. PADILLA. Madam President, I rise to discuss and explain the matter we just took action on. It is relative to wildfires. All across the Western United States, historic wildfires continue to grow both more frequent and more severe. Every year, in recent years, entire communities have been destroyed by wildfires in a matter of hours. We have seen this in California, New Mexico, and Colorado. Families are forced to flee with only the belongings they could quickly pack into their vehicles.

Last year, I visited the incident command center in Quincy, CA, to see

firsthand the real-time response to the devastating Dixie fire. Separately, I met with local leaders in Santa Rosa, CA, to hear about problems with recovery from previous catastrophic wildfires.

So my bill—the bill we just took action on, the FEMA Improvement, Reform, and Efficiency Act or the FIRE Act—will help ensure FEMA better addresses the unique and increasing danger of wildfires.

FEMA's current procedures and requirements don't always work for postwildfire recovery needs. And this bill will close those gaps.

I give a lot of credit to FEMA. They have gotten pretty good at anticipating and responding to other types of disasters. We are seeing it, as we speak, with the hurricane impact in Florida. They do the same with tornadoes, floods, other disasters.

In all these scenarios, we know that it begins with preparation. The FIRE Act will begin the process of allowing FEMA to predeploy resources during times of extremely high risk. In the West, we know it as red flag warnings.

When it is hot, conditions are dry, and the wind kicks up, it is a recipe for disaster. And so to have FEMA be able to deploy in advance—just as they do already during hurricane warnings, as we are seeing in Florida at this very moment—is a smart thing to do.

Then, as communities rebuild after a devastating wildfire, this bill will work to ensure that FEMA takes wildfire-specific issues into account, like melted infrastructure and burned trees. It will also help local governments work with FEMA to more effectively relocate critical infrastructure away from fire-prone areas.

Now, in the aftermath of a fire, the bill will help provide better housing assistance, case management, and crisis counseling for survivors with a focus on equity for underserved communities and Tribal governments. Oftentimes these underserved communities and Tribal governments suffer the disproportionate impact of these wildfires.

So with the FIRE Act, we will be able to better prepare for and respond to the unique challenges of wildfires in California and throughout the Western United States.

The FIRE Act passed out of the Homeland Security and Governmental Affairs Committee by a voice vote on February 2 of this year. And I want to take a moment to thank both Chairman PETERS and Ranking Member PORTMAN and their staffs who contributed to this bill, as well as our partners at FEMA.

This is an overdue, commonsense bill to help communities on the frontlines of our wildfire crisis. And I thank my colleagues for joining me in supporting it.

With that, I yield the floor.

AFFORDABLE INSULIN ACT—
MOTION TO PROCEED—Continued
The PRESIDING OFFICER. The Senator from Louisiana.

ENERGY

Mr. CASSIDY. Madam President, I am constantly struggling that when people say there is no consensus in Washington, DC, there is often consensus. It is just a question of a different means by which to achieve the goals and consensus. If I were to say that we would want to have increased national security, lower global greenhouse gas emissions, a booming economy, and energy security, everybody would agree. The difference is how we achieve those means. And so what this process is, is to give the American people the opportunity to judge what is the best set of policies that will allow us to achieve that which we are speaking of.

Clearly, there is a nexus, a connection—you put them all together—between energy security, national security, the economy of our country and the economy of a family, and whether or not a country is lowering or increasing its contribution to global greenhouse gas emissions. This talk will be about that nexus between energy security, national security, global greenhouse gas emissions—how do we decrease them—and the economy of our country and the economy of a family.

Now, I am from Louisiana—I think that is pretty well known; the senior Senator from Louisiana—and we are privileged to host many of the facilities of the Strategic Petroleum Reserve, that connection between energy security and national security.

The Strategic Petroleum Reserve, for those who do not know, is where we have salt domes full of oil, millions of barrels, so that if ever there is another embargo, like there was in 1973, where Middle Eastern countries were attempting to punish the United States, we would have enough in our Strategic Petroleum Reserve so that we could draw from and we could preserve our national security and our economic security—again, that nexus between energy security, national security, and the economy of a country and the economy of a family.

President Biden has decided to drain the Strategic Petroleum Reserve to lower the price of gasoline. I am all for lowering the price of gasoline, but if you think about it, drawing oil from a Strategic Petroleum Reserve is basically the same as pumping it out of the ground if it is in West Texas or off the coast of Louisiana. One is just oil that has been produced and put in a salt dome, and the other is being produced naturally.

So rather than increasing production on Federal lands, the President made the decision to just draw from our Strategic Petroleum Reserve. Unfortunately, we are now at the lowest level of reserves since 1984. To the degree—and it is a great degree—that our national security depends upon being energy independent, we have lowered our

Reserve to the lowest since 1984, which is to say that we are less secure in terms of energy and therefore less secure in terms of our economy and less secure in terms of our national security.

The President needs a plan to refill that from domestically produced oil—period, end of story—and the swing production of that is going to be production on Federal lands, such as that off the coast of Louisiana.

Where does that leave us? Unfortunately, President Biden's energy plan is such that the Biden administration has set the record for the fewest oil leases on Federal lands in the first 19 months of his office. Both Presidents Obama and Trump approved over 10 times the number of leases as the Biden administration has over the same period.

So while Russia is attempting to blackmail the rest of the world by their energy production; where we have drained our Strategic Petroleum Reserve down to its lowest levels since 1984; where Europe is paying record prices for oil and natural gas, which may bring on a recession-depression there, which, of course, hurts our economy, this administration has had the fewest leases on record, and Obama and Trump had 10 times as many in the same period. This is hurting our energy security, which means it hurts our national security, which means it is going to hurt the economy of our country and the economy of a family.

My gosh, just ask what they are paying for their utility bills and what they are paying to fill up their tanks. Ask what they are paying at the grocery store, which is very dependent upon the supply of natural gas and oil in order to keep those prices lower. They would say they are hurting. This anti-energy policy has hurt across the board.

By the way, I think the rationale for not issuing those leases is that in some way, if the United States does not develop our own oil and gas resources, magically, global greenhouse gas emissions are going to decrease. That is the superstition of those who favor that policy—except, unfortunately, logic. You can't ignore facts.

A national laboratory has said that if you are speaking about oil, that which has the lowest life cycle of greenhouse gas emissions is the oil produced off the coast of Louisiana, which is far lower than the oil that we import from other countries.

If you are really concerned about lowering global greenhouse gas emissions, it is the environmental standards that we use in our country to produce our national resources—and, by the way, creating our American jobs—that have the lowest life cycle carbon emissions.

So that completes our nexus. We spoke about energy security related to national security, which in turn creates better jobs and a better economy for us all and actually has the effect of

lowering global greenhouse gas emissions. That is our nexus.

Unfortunately, this administration's policy is hurting American families, as they pay more through inflation; hurting our national security, as our Strategic Petroleum Reserve is at its lowest level, and therefore our energy security; and also contributing to increased global greenhouse gas emissions, as we have to import from countries without our environmental standards. Because we are unable to increase our production and supply, say Europe—they are burning coal instead of our oil and gas and, with that, increasing global greenhouse gas emissions.

There are some bright spots. On a bipartisan basis, the Congress just passed the Kigali Amendment, which recognizes—which is a form of hydrocarbons which were used in refrigerants. The use of this will lower global greenhouse gas emissions. The U.S. Congress just passed that. So other countries that persist in using older technology which increases global greenhouse gas emissions will be at a competitive disadvantage because Congress passed that. So in the midst of this kind of bad news—boy, it is just not working out the way it should—we actually have an example of how we can make it work better.

I am an advocate for a carbon border adjustment, not a carbon tax. I think carbon taxes are the wrong way to go. Let me explain. If we have a carbon border adjustment where the U.S. chemical industry, using our environmental standards, using natural gases of feedstock, everything we have done and invested in to lower global greenhouse gas emissions—we are competing with countries in Asia, specifically China, which don't use those measures, which pollute far more than we, but because they don't use their environmental standards, they have a lower cost of manufacturing. We are competing against cheaper goods, but they are cheaper precisely because they are producing more global greenhouse gas emissions.

The Kigali Amendment tells us what to do. If we had a carbon border adjustment where we say that this is the carbon intensity of our goods that are produced, and if a country in Asia—say, specifically, China—has a carbon emission profile that may be 5 to 10 times higher, if they want to import their goods, they would have to pay a fee based upon how their carbon intensity is greater than ours.

That is great. One, it is going to help us with our economy. Our workers who are losing their jobs to those in China because they don't enforce their environmental standards and we enforce ours and therefore our cost of production is higher—those jobs begin to return. It will be cheaper to produce here after all if China is forced to pay for the pollution they are putting into the atmosphere. It creates more jobs. That is good for Americans and good for our economy. It strengthens us relative to the Chinese, who are using their profits

to build a bigger army. It is good for greenhouse gas emissions. Now China is actually incentivized to lower emissions as opposed to now, where they have no incentive to do anything but to increase their emissions.

So we begin to decrease global greenhouse gas emissions. That is good for our national security. The stronger our economy is and the relative weakness of the Chinese economy means that we are better able to invest relative to the Chinese, which means that we are better able to spread Western values as opposed to the Chinese values, which involve bribery, which involve corruption of government, which involve coercion. Just look at what has happened in Hong Kong if someone thinks the Chinese Communist Party is a better system of government. We are able to export our values and push back upon theirs.

So if we are trying to have a policy, as I said at the outset, which combines the best instincts of the right and the left, where we all want to have energy security, national security—we want to have a better, stronger economy for working Americans, and we want to lower global greenhouse gas emissions—the Kigali Amendment, which passed on a bipartisan basis, gives us an example of how to do that.

Let's make a strength of our environmental regulations, and let's make others pay for their ignoring those same regulations. In so doing, we begin to attract jobs back here for Americans to strengthen our economy, lowering global greenhouse gas emissions, strengthening our energy security, our economy, and therefore our national security.

I yield the floor.

The PRESIDING OFFICER (Mr. OSSOFF). The Senator from Ohio.

REMEMBERING MAX AND BEN MORRISSEY

Mr. BROWN. Mr. President, I rise to ask my colleagues to join me in honoring Max Morrissey and Ben Morrissey, two brothers who went to work on September 20 at the BP-Husky oil refinery in Oregon, OH, and never returned home.

In the tragic explosion at the refinery that night, Max and Ben were fatally injured. At 34 and 32, their lives were cut short. Max and Ben were loving husbands and fathers, proud union steelworkers with Local 1-346, and lifelong Ohioans. They spent their lives serving their families, their community, their union, and their country through their dedication to their jobs and through Max Morrissey's distinguished service in the U.S. Navy. Their work at the plant powered our State, our economy, and provided for their families.

Family was everything to Max and Ben. They shared a dedication and commitment to each other, to their parents, to their wives, and to their young children.

On Friday, I visited the steelworkers hall. I had the honor of speaking with the Morrissey family and Max and

Ben's steelworker brothers and sisters in Local 1-346. From all I learned about Max and Ben, I know their memories will live on. I know their legacies will be upheld by those whom they loved and who loved them so.

We talked about this pin I wear, a canary pin given to me years ago at a Workers Memorial Day in Lorain, OH, by a steelworker honoring the workers who lost their lives on the job, working and supporting their economy and building a life, a future for their families.

This pin is a depiction of a canary in a birdcage. If you know labor history—and I know the Presiding Officer from Georgia knows this—the mineworkers used to take the canary in a cage down into the mines. If the canary died from lack of oxygen or toxic gas, the mineworker got quickly out of the mine. He had no union strong enough in those days to protect him and no government that cared enough to protect him. A strong union changed that because of worker safety laws and because of the labor movement.

This tragedy reminds us that our work to protect workers and make our workplaces safer never ever ends. No worker should ever have to worry about not returning home at the end of the day. No family should ever have to be concerned about that, not steelworkers like Max and Ben, not first responders who rush to their aid—no one.

I want to recognize those first responders—the steelworkers, the fire brigade, the Oregon Fire Department—those first responders at the scene whose bravery made a difference.

Today, we rededicate ourselves to Max and Ben's example of dignity of work, importance of family and community. Our thoughts are with the Morrissey family, with all those who knew and loved Max and Ben, and with those who worked alongside them.

I yield the floor.

THE PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, I want to compliment my friend the Senator from Ohio for always being willing to speak out on behalf of important people all across the country. I agree with him that organized labor for literally decades has always protected working people. We need to bear that in mind as we sort through the issues that confront us on a regular basis. So I thank him for his comments.

JOINT CONSOLIDATION LOAN SEPARATION ACT

Mr. President, I rise today to actually celebrate a major accomplishment for thousands of Americans who have been trapped for, many times, decades in exploitative joint student loans.

This is an issue that is actually near and dear to me because I have been working on it for 7 years, since hearing from a constituent way back in 2015.

Sara from Northern Virginia was part of a group of student loan borrowers who entered into something called a joint consolidation loan, which allowed married couples to combine

their student debt into a single loan. The truth was, though, that sounded good, but Congress didn't allow anyone to unwind those loans in the event of a divorce or an abusive relationship.

So finally, in 2006, Congress got rid of the whole program. But when they got rid of the whole program, they didn't retroactively create an option for those folks who had entered into these joint consolidation loans between 1993 and 2006.

So when my constituent Sara had divorced from her husband when she was living in Texas, she was still responsible for this loan. So all of the debt that had originally been his suddenly fell upon her shoulders. The divorced husband stopped paying the debt. Yet she was still responsible, and she, Sara, had to continue facing the consequences.

Now, she was a single mom of two, a public school teacher. Sara was financially on the hook for her defaulting husband's student debts. Her credit suffered dramatically. She even thought she was going to lose her teacher's license.

Now, she did a lot—great researcher. I talked to her a couple times. After looking for a way out, she found that the only way to fix this problem was for an act of Congress.

Well, she contacted my office, and we found out that this was not a one-off circumstance, but, literally, there were thousands of Americans all across the country who had fallen into this trap. A lot of them were domestic violence survivors, who, even though they had gotten out of an abusive relationship, were still stuck with paying off the debts of their abuser. Many of these were people who were victims of financial abuse and, again, completely responsible for a loan, in many cases, that they had never even taken out.

Others were unable to save for retirement, for their kids. We had a lot of teachers who were otherwise eligible for the public service loan forgiveness programs, but because they had entered into the joint consolidated student loans, they suddenly weren't eligible.

So we did some research and spent some time looking into it. In 2017, I introduced the Joint Consolidation Loan Separation Act to solve this problem and find a way for, oftentimes, innocent borrowers to get out of these consolidations.

Now, starting back in 2015—I have got to acknowledge, it took 7 years. Something that was this much of a no-brainer shouldn't have taken that long, but I am proud to be here today and report that we did get it through Congress on a bipartisan basis.

Here in the Senate, I am grateful for a lot of my colleagues on the other side of the aisle. I am grateful for the Presiding Officer. We actually passed it on a unanimous basis, and in the House we passed it with a broad bipartisan coalition.

That is a testament to what a critical, commonsense fix this is—one that

will actually change the lives of thousands of Americans, literally, overnight.

Now, since we introduced this law the first time, my office has heard from so many Americans who are desperate to get this done.

I remember hearing from Chris from Indiana, who said he spent over 16 years thinking about this loan every day and waking up at night trying to create a strategy to pay this loan off.

He got back to us and he said:

For the first time, I may be able to put my mind at peace.

We heard from Sharon, who is a seventh grade teacher, whose former partner was totally unresponsive on meeting their obligations on this joint consolidation. Now, she said:

I don't have to do this anymore. I get to live my life.

She gets to actually retire this year because, once President Biden signs this law, it will immediately relieve her of this obligation.

Or Jessica, who said:

I am finally about to be free . . . of one last way my ex controls me.

Again, I can't imagine entering into this arrangement and then getting out of a relationship, often sometimes an abusive relationship, and that ex still trying to control this person by not meeting their share of the obligations. It just was wrong.

Next, Amy, who falls into the category of otherwise—because, I believe, she was a teacher, she was able to get public service loan forgiveness and worked for years on something she should qualify for, but if you had entered into one of these joint consolidations, you didn't get this benefit.

So Amy said:

I've never been able to take advantage of a single debt-relief program.

This bill will change that, obviously in terms of public service loans but also in terms of some of the proposals that President Biden has put forward.

All these people have been asking for is a chance to not unduly bear the joint burden of a program that even the Congress and the Federal Government decided in 2006 wasn't fair, but when we unwound it, we didn't unwind it, literally, for thousands of people who had fallen into this program between 1993 and 2006.

Now, we are through the House. We are through the Senate. We still have to hit one thing. And while the White House has indicated that the President supports this legislation, we have to get it signed right away because, when we think about these teachers and nurses and other folks who met their goal of what they have to qualify in critical areas to qualify for public student debt forgiveness, you know, the truth is, if they are going to get that benefit this year, they have got to make that application by October 31.

So before Halloween, these folks and countless others are waiting for them to simply apply for a right that, in

many cases, they should have been granted 5, 10, 15 years ago.

And as I said, many of the folks in this category are public school teachers. They are government workers. They are nurses. They all have met the otherwise, oftentimes, stringent requirements for public service loan forgiveness, but this law has to be a law in time for them to be able to timely apply for this relief before Halloween.

So I am hoping—the President has indicated he supports this bill, but the President has got to sign this law as soon as possible so borrowers can finally experience freedom from financial and domestic abuse, freedom to control their own financial future, and freedom to enjoy the exact same benefits that other teachers and public servants have across the country.

I would like to close by saying that, this week, I actually had a chance to call Sara, who originally brought this issue to my attention. She told me that, without this law, and even if she had continued making all of her monthly payments for her divorced husband, it would have been impossible for her to get rid of this debt in her lifetime. She would literally have been tied to her ex-husband, and she left Texas to get away from that ex-husband, to move to Virginia. She would literally be tied to that former spouse for the rest of her life.

For Sara and for literally thousands of other borrowers impacted by this program, it is time for the President to sign this law and provide these borrowers the relief they deserve.

I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The senior assistant legislative clerk proceeded to call the roll.

Mr. MORAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNIZING HUMBOLDT, KANSAS

Mr. MORAN. Mr. President, this evening, I want to highlight a community in my State of Kansas that is a model for rural towns across our State and around the country. It is timely because, just yesterday, the New York City mayor joked that my home State of Kansas has “no brand” and then chuckled at his joke. I had planned to give this floor speech before the mayor of New York City used Kansas as a punch line, but now it seems a little more fitting and means even more.

Located in Allen County, KS, Humboldt is the home to about 2,000 residents. Like many small communities in rural America, Humboldt was facing declining population numbers as businesses moved away and buildings on Main Street were abandoned. Even the locally owned newspaper, which began business in 1864 and was the State’s longest continuously running paper, the Humboldt Union, had to close its doors.

However, in the last couple of years, Humboldt has defied the odds. The vacant buildings on Main Street now boast thriving businesses and welcoming storefronts. Since 2020, Humboldt has gained a coffee shop, a variety of bars and restaurants, a fitness center, a microbrewery, a grocery store, a hotel, and the Humboldt Union has been reestablished. Even as the pandemic created new challenges for many small businesses, Humboldt’s businesses were able to persevere.

In January, the travel desk of the New York Times selected Humboldt as a top destination in the world, alongside places like Greece, Australia, and Argentina—pretty ironic now.

The majority of growth and economic development in the community can be attributed to a civic organization called A Bolder Humboldt. This group was formed a few years ago by leaders like Paul Cloutier and is still going strong today.

Paul recently took me on a tour of downtown with the mayor, Mayor Nobby Davis, to see firsthand the renovations being done and to meet the owners of small businesses that are reshaping the town square.

Paul said:

I’ve lived in a lot of big cities, and the thing I loved about them was that they had complete neighborhoods, with a grocery store and a dry cleaner’s and a bar and little restaurants, which is basically what a small town is or used to be.

A Bolder Humboldt is working to rebuild that ideal—that ideal American small town—for the 21st century.

I visited a cafe and a coffee shop owned by Josh Works, who is also involved in A Bolder Humboldt. His father owns B&W Trailer Hitches, and he set a standard during the recession in 2008 to prioritize and care for his staff and his community.

In addition, the community has rebuilt 10 blocks of the downtown streetscape with the help from a local business, Monarch Cement Company. Owned and run by Walter Wulf, this is a 110-year-old business, and it is a staple of this community.

The city has also developed Southwind Industrial Park, with the latest addition of Murphy Tractor and Equipment Company, providing new jobs for locals and new residents.

Humboldt has also gained fame as the hometown of Biblesta, which is an annual festival taking place this weekend, that has been going for six decades and features the world’s largest Bible-themed parade.

Each year, City Manager Cole Herder addresses graduating high school seniors and presents them with mailboxes in the school’s colors—black boxes with orange lettering. Each box has the student’s name and “Humboldt, Kansas” stenciled in orange letters. Inside, there is an invitation. He appeals to students to pursue an education and new experiences, but he also encourages them to consider their hometown of Humboldt as the place to establish

their careers and raise their own families.

The community of Humboldt is a success story, and it is a role model. It demonstrates how teamwork, creative thinking, hard work, treating others with respect, and caring about the future of your community can make a positive difference for your city, the State, and for our entire Nation. That is our brand in Kansas.

I am proud to recognize the efforts of Humboldt with what we have called the Building Better Communities Award.

Today, in the U.S. Senate, I offer my congratulations and my gratitude for the kind of leadership and effort among all residents of the community to see that Humboldt is a good place to live today and, perhaps even more importantly, a great place to live tomorrow.

I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The senior assistant legislative clerk proceeded to call the roll.

Mr. SCHUMER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The majority leader.

VOTE ON MOTION

Mr. SCHUMER. Now, Mr. President, I know of no further debate on the motion to proceed to H.R. 6833.

The PRESIDING OFFICER. The question is on agreeing to the motion. The motion was agreed to.

AFFORDABLE INSULIN NOW ACT

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (H.R. 6833) to amend title XXVII of the Public Health Service Act, the Internal Revenue Code of 1986, and the Employee Retirement Income Security Act of 1974 to establish requirements with respect to cost-sharing for certain insulin products, and for other purposes.

AMENDMENT NO. 5745

(Purpose: In the nature of a substitute.)

Mr. SCHUMER. I call up substitute amendment No. 5745.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from New York [Mr. SCHUMER] proposes an amendment numbered 5745.

Mr. SCHUMER. I ask to dispense with further reading of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The amendment is printed in the RECORD of September 27, 2022, under “Text of Amendments.”)

Mr. SCHUMER. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The yeas and nays are ordered.

AMENDMENT NO. 6030 TO AMENDMENT NO. 5745

Mr. SCHUMER. I have an amendment at the desk.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from New York [Mr. SCHUMER] proposes an amendment numbered 6030 to amendment No. 5745.

The amendment is as follows:

(Purpose: To add an effective date)

At the end add the following:

SEC. EFFECTIVE DATE.

This Act shall take effect on the date that is 1 day after the date of enactment of this Act.

Mr. SCHUMER. I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

MOTION TO COMMIT WITH AMENDMENT NO. 6031

Mr. SCHUMER. I move to commit H.R. 6833 to the Committee on Appropriations with instructions to report back forthwith with an amendment.

The PRESIDING OFFICER. The clerk will report the motion.

The legislative clerk read as follows:

The Senator from New York [Mr. SCHUMER] moves to refer the bill to the Committee on Appropriations with instructions to report back with an amendment numbered 6031.

The amendment is as follows:

(Purpose: To add an effective date)

At the end add the following:

SEC. EFFECTIVE DATE.

This Act shall take effect on the date that is 5 days after the date of enactment of this Act.

Mr. SCHUMER. I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SCHUMER. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The yeas and nays are ordered.

AMENDMENT NO. 6032 TO INSTRUCTIONS

Mr. SCHUMER. I have an amendment to the instructions at the desk.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from New York [Mr. SCHUMER] proposes an amendment numbered 6032 to the instructions of the motion to commit.

The amendment is as follows:

(Purpose: To modify the effective date)

On page 1, line 3, strike "5" and insert "6".

Mr. SCHUMER. I ask to dispense with further reading of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

CLOTURE MOTION

Mr. SCHUMER. I send a cloture motion to the substitute to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The senior assistant legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, do hereby move to bring to a close debate on amendment No. 5745 to Calendar No. 389, H.R. 6833, a bill to amend title XXVII of the Public Health Service Act, the Internal Revenue Code of 1986, and the Employee Retirement Income Security Act of 1974 to establish requirements with respect to cost-sharing for certain insulin products, and for other purpose.

Charles E. Schumer, Patrick J. Leahy, Brian Schatz, Tina Smith, Michael F. Bennet, Alex Padilla, Richard J. Durbin, Tammy Duckworth, Mazie Hirono, Jack Reed, Gary C. Peters, Jacky Rosen, Ben Ray Lujan, Robert P. Casey, Jr., Sherrod Brown, Tim Kaine, Edward J. Markey.

CLOTURE MOTION

Mr. SCHUMER. I send a cloture motion to H.R. 6833 to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The senior assistant legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, do hereby move to bring to a close debate on H.R. 6833, as amended, a bill to amend title XXVII of the Public Health Service Act, the Internal Revenue Code of 1986, and the Employee Retirement Income Security Act of 1974 to establish requirements with respect to cost-sharing for certain insulin products, and for other purposes.

Charles E. Schumer, Patrick J. Leahy, Brian Schatz, Tina Smith, Michael F. Bennet, Alex Padilla, Richard J. Durbin, Tammy Duckworth, Mazie Hirono, Jack Reed, Gary C. Peters, Jacky Rosen, Ben Ray Lujan, Robert P. Casey, Jr., Sherrod Brown, Tim Kaine, Edward J. Markey.

Mr. SCHUMER. Finally, I ask unanimous consent that the mandatory quorum calls for the cloture motions filed today, September 28, be waived.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS CONSENT AGREEMENT

Mr. SCHUMER. Mr. President, I ask unanimous consent that the notice of adoption of substantive regulations and submission for congressional approval from the Office of Congressional Workplace Rights be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NOTICE OF ADOPTION OF SUBSTANTIVE REGULATIONS AND SUBMISSION FOR CONGRESSIONAL APPROVAL

U.S. CONGRESS, OFFICE OF CONGRESSIONAL WORKPLACE RIGHTS,

Washington, DC., September 28, 2022.

Hon. PATRICK J. LEAHY,
President Pro Tempore of the Senate,
Washington, DC.

DEAR MR. PRESIDENT: Section 304(b)(3) of the Congressional Accountability Act of 1995 (CAA), 2 U.S.C. 1384(b)(3), requires that, with regard to substantive regulations under the CAA, after the Board of Directors (Board) of the Office of Congressional Workplace Rights (OCWR) has published a general notice of proposed rulemaking as required by subsection (b)(1), and received comments as required by subsection (b)(2), the Board shall adopt regulations and shall transmit notice of such action together with a copy of such regulations to the Speaker of the House of Representatives and the President pro tempore of the Senate for publication in the Congressional Record on the first day on which both Houses are in session following such transmittal.

The OCWR Board has adopted the proposed regulations in the Notice of Adoption of Substantive Regulations and Transmittal for Congressional Approval that accompany this transmittal letter. The Board requests that the accompanying Notice be published in both the House and Senate versions of the Congressional Record on the first day on which both Houses are in session following receipt of this transmittal. The Board also requests that Congress approve the proposed Regulations, as further specified in the accompanying Notice.

Any inquiries regarding the accompanying Notice should be addressed to Teresa James, Acting Executive Director of the Office of Congressional Workplace Rights, 110 Second Street, SE, Room LA-200, Washington, DC 20540-1099; telephone: 202-724-9250; email: OCWRinfo@ocwr.gov.

Sincerely,

BARBARA CHILDS WALLACE,
Chair of the Board of Directors.

Attachment.

FROM THE BOARD OF DIRECTORS OF THE OFFICE OF CONGRESSIONAL WORKPLACE RIGHTS

NOTICE OF ADOPTION OF REGULATIONS AND TRANSMITTAL FOR CONGRESSIONAL APPROVAL

Procedural Summary:
Issuance of the Board's Initial Notice of Proposed Rulemaking.

On or about April 26, 2022, the Board of Directors (Board) of the Office of Congressional Workplace Rights (OCWR) issued a Notice of Proposed Rulemaking in the Congressional Record at 168 Cong. Rec. S2157-S2169 (daily ed.), and at 168 Cong. Rec. H4498-H4508 (daily ed.). The Notice of Proposed Rulemaking was prompted by the promulgation by the Secretary of Labor in 2004, 2016, 2019, and 2020, of amended regulations regarding the overtime pay requirements of the FLSA.

Why did the Board propose these new Regulations?

Section 203(c)(2) of the CAA, 2 U.S.C. 1313(c)(2), requires that the Board of Directors propose substantive regulations implementing the FLSA overtime requirements that are "the same as substantive regulations promulgated by the Secretary of Labor to implement the statutory provisions . . . except insofar as the Board may determine, for good cause shown and stated together with the regulation, that a modification of such regulation would be more effective for

the implementation of the rights and protections under this section.”

What procedure followed the Board's initial Notice of Proposed Rulemaking?

The April 26, 2022 Notice of Proposed Rulemaking included a thirty day comment period, which began on April 26, 2022. The OCWR received four comments to the proposed substantive regulations from stakeholders. The Board of Directors has reviewed these comments, made a number of changes to the proposed substantive regulations in response to the comments, and has adopted the amended regulations.

What is the effect of the Board's "adoption" of these substantive regulations?

Adoption of these substantive regulations by the Board of Directors does not complete the promulgation process. Pursuant to section 304 of the CAA, 2 U.S.C. 1384, the procedure for promulgating such substantive regulations requires that: (1) the Board of Directors issue proposed substantive regulations and publish a general notice of proposed rulemaking in the Congressional Record (the April 26, 2022 Notice); (2) there be a comment period of at least 30 days after the date of publication of the general notice of proposed rulemaking; and (3) after consideration of comments by the Board of Directors, that the Board adopt regulations and transmit notice of such action together with the regulations and a recommendation regarding the method for Congressional approval of the regulations to the Speaker of the House and President pro tempore of the Senate for publication in the Congressional Record. This Notice of Adoption of Substantive Regulations and Submission for Congressional Approval completes the third step described above.

What are the next steps in the process of promulgation of these regulations?

Pursuant to section 304(b)(4) of the CAA, 2 U.S.C. 1384(b)(4), the Board of Directors is required to “include a recommendation in the general notice of proposed rulemaking and in the regulations as to whether the regulations should be approved by resolution of the Senate, by resolution of the House of Representatives, by concurrent resolution, or by joint resolution.” The Board of Directors recommends that the procedure used by Congress to approve these overtime exemption regulations: that the House of Representatives approve the “H” version of the regulations by resolution; that the Senate approve the “S” version of the regulations by resolution; and that the House and Senate approve the “C” version of the regulations applied to the other employing offices by a concurrent resolution.

Are there regulations covering overtime exemptions currently in force under the CAA?

Yes, however, they are woefully outdated. Unless and until the House of Representatives and the Senate approve the regulations adopted by the OCWR Board, all employing offices and covered employees continue to be required to follow the existing Part 541 Regulations, which were adopted by the Board of Directors and approved by the House of Representatives and the Senate in 1996.

If approved by Congress, will these regulations completely replace the existing Part 541 overtime exemption regulations applicable under the CAA?

Yes, and they will provide the modernization necessary to properly remunerate Legislative Branch employees for overtime consistent with the Executive Branch and the private sector.

The Board's Responses to Comments

As the result of the April 26, 2022 Notice of Proposed Regulations, and the ensuing 30

day comment period, the Office received four comments from interested parties. Not surprisingly, a common theme among the comments was the difficulty in applying the Fair Labor Standards Act to real-life occupations within the legislative branch. Commenters requested that the Board add descriptive examples that discuss specific positions and opine on whether those positions should or should not be classified as exempt or non-exempt. Commenters recognized that these exempt status determinations are fact specific and often require complex analysis. For this reason, the Board remains unconvinced that including specific position titles plucked from Congressional employment would serve the legislative branch community. Many legislative branch employees share common job titles but nevertheless have different duties in actuality. These employees, and their employing offices, would not benefit from improper classification through rulemaking.

There exists a body of law which addresses the application of these exceptions in the context of government employees. See e.g., Wage and Hour Division (WHD) Opinion Letter FLSA2020-9, <https://www.dol.gov/sites/dolgov/files/WHD/opinion-letters/FLSA/2020-06-25-09-FLSA.pdf> (last viewed on 8/29/22). For example, the Department of Labor has applied the exemption as it relates to a government press officer. *Id.*

One commenter notified the Board that the U.S. Supreme Court granted certiorari in *Helix Energy Solutions Group v. Hewitt*, ___ S.Ct. ___, 2022 WL 1295708 (May 2, 2022) to address “highly compensated employee” regulations. The commenter suggests that any decision rendered by the Supreme Court could impact the application of the proposed regulations. The Board acknowledges that a decision in *Helix Energy Solutions Group v. Hewitt* may impact the application of 541.601 and 541.604. Nevertheless, a decision is likely more than a year away and the Board does not wish to further delay the adoption of these regulations. The Board will revisit these regulations consistent with any relevant U.S. Supreme Court decision and future Department of Labor amendments.

The Board has reviewed all comments, and has deliberated regarding the question whether comments establish “good cause” pursuant to section 203(c)(2) of the CAA, 2 U.S.C. 1313(c)(2), for varying the Office of Congressional Workplace Rights proposed regulations from the Department of Labor regulations. The following discussion outlines the comments, and the Board's response to them.

What changes to the regulations as proposed on April 26, 2022 have been made by the Board in response to comments received from interested parties?

The Board has made many changes in response to comments received from interested parties. First, the Board agrees that good cause exists to modify these regulations in several respects to further reflect the legislative branch's unique workplace. Several commenters applauded this Board's decision to eliminate references that have no application to Congressional employees. However, they requested that the Board tailor the Proposed Regulations even further. The Board has heeded this request and in large part removed additional private sector terminology and replaced it with language specific to legislative branch employees and employing offices. Second, a commenter recommended departing from the effective date maintained within the Department of Labor regulations so that the regulations, once applied to the legislative branch, are not deemed retroactive. The Board agrees that good cause exists to modify these regulations so that they are not deemed retroactive. Third, a com-

menter asked that the Board include in deleted sections the words “Intentionally Left Blank” or renumber those sections that remain so that they are consecutively numbered for typographical clarity. The Board agrees with this suggestion and has included the word “Reserved” for Department of Labor sections and subsections that are being eliminated. Additional changes are explained below by section.

Sec. 541.0: Commenters correctly pointed out that a principal statutory authority for adoption of these regulations was not included in the language of the proposed regulation itself. Therefore, one commenter proposed to add the words “and applies to covered employees by virtue of section 225(e)(1) of the CAA, as amended, 2 U.S.C. 1361(e)(1)” before the end of each sentence. The Board concurs with this recommendation; therefore, the proposed language was added as authority for the promulgation of these overtime exemption rules.

Sec. 541.3: At least one commenter requested the removal of “deputy sheriffs, state troopers, highway patrol officers . . . correctional officers, parole or probation officers, park rangers, fire fighters” and “or fight fires” to further tailor the regulations to reflect legislative branch terminology. Police officers, detectives and investigators are already referenced in the regulation. Thus, the Board agrees that the example of deputy sheriffs, state troopers, highway patrol officers, correctional officers, and parole and probation officers—positions that are not present within the legislative branch—are additional law enforcement positions that are unhelpful by analogy. However, the Board does not find good cause to remove “park rangers”, “fire fighters,” or individuals who “fight fires.” The park rangers’ functions may serve employing offices by analogy. With respect to fire fighters and fighting fires, although the legislative branch presently relies on the District of Columbia’s fire department, it is reasonably foreseeable that fire fighters or individuals whose main duty is to prevent fires may be employed by the legislative branch. Therefore, the Board finds good cause to remove the examples of deputy sheriffs, state troopers, highway patrol officers, correctional officers, and parole or probation officers, but not park rangers, fire fighters, and individuals who fight fires. Similarly, the commenter requested that “customers” be replaced with “constituents” to further tailor the regulations to reflect legislative branch terminology. The Board recognizes that the word “customers” is not inherently governmental. Nevertheless, the Board believes that “constituents” is too narrow. Thus, the Board finds good cause to modify the word “customers” with “customers, constituents or stakeholders”. Another commenter requested that “enterprise” be modified to “employing office” to further tailor the regulations to reflect legislative branch terminology. Although Section 541.1 defines “enterprise” to mean “employing office,” the Board concurs with this recommendation.

Section 541.4: Several commenters pointed out that the proposed section maintained an erroneous requirement that employing offices must comply with “. . . State or municipal laws, regulations, or ordinances establishing a higher minimum wage or lower maximum workweek than those established under the FLSA” as applied via the CAA. The Board concurs with the comment. That requirement has been deleted from the proposed regulation.

Sec. 541.100: At least one commenter requested that “enterprise” be modified to

“employing office” to further tailor the regulations to reflect legislative branch terminology. Although Section 541.1 defines “enterprise” to mean “employing office,” the Board concurs with this recommendation.

Sec. 541.101: A commenter asked the Board to either identify that the section was removed or renumber the sections thereafter for typographical clarity. The Board will include the word “Reserved” after the headings of removed sections.

Sec. 541.103: At least one commenter requested that “enterprise” be modified to “employing office” to further tailor the regulations to reflect legislative branch terminology. Although Section 541.1 defines “enterprise” to mean “employing office,” the Board concurs with this recommendation. Similarly, the commenter requested that “establishment” be modified to “location” to further tailor the regulations to reflect the legislative branch terminology. The Board concurs with this recommendation as well.

Sec. 541.200: One commenter requested that “customers” be replaced with “constituents” to further tailor the regulations to reflect legislative branch terminology. The Board recognizes that the word “customers” is not inherently governmental. Nevertheless, the Board believes that “constituents” is too narrow. Thus, the Board finds good cause to modify the word “customers” with “customers, constituents or stakeholders”.

Sec. 541.201: At least one commenter requested that “business” be modified to further tailor the regulations to reflect legislative branch terminology. Although Section 541.1 defines “business” and “company” to mean “employing office,” the Board concurs with all of these recommendations. Similarly, one commenter requested that “customers” be replaced with “constituents” to further tailor the regulations to reflect legislative branch terminology. The Board recognizes that the word “customers” is not inherently governmental. Nevertheless, the Board believes that “constituents” is too narrow. Thus, the Board finds good cause to modify the word “customers” with “customers, constituents or stakeholders”.

Sec. 541.202: At least one commenter requested that “business”, when used as a noun and not an adjective, “company”, “credit manager”, “large corporation”, “management consultant”, “large company”, and “client” be modified to further tailor the regulations to reflect legislative branch terminology. Although Section 541.1 defines “business” and “company” to mean “employing office,” the Board concurs with all of these recommendations.

Sec. 541.203: Multiple commenters questioned whether Congress had insurance adjusters (541.203(a)) and comparison shoppers (541.203(i)), or whether Congressional employees could be deemed “[e]mployees in the financial services industry generally” (541.203(b)). The Board agrees that the example of insurance adjusters is not applicable directly to any employing office. However, insurance adjusters’ investigative functions may serve employing offices by analogy to evaluate the administrative exemption. Similarly the Board believes that employees in financial services generally, as opposed to the financial services industry, is a function that may be applicable directly or by analogy for employing offices to analyze whether employees are covered by the administrative exemption. Lastly, the Board agrees that the comparison shoppers example is neither applicable directly or by analogy to any employing office. Therefore, the Board finds good cause to modify 541.203(a) to “employees who investigate claims”, remove the word “industry” in 541.203(b), and reserve all

of 541.203(i). In addition, at least one commenter asked that certain words or phrases, such as but not limited to “business owner,” “purchasing and selling”, “executive of a large business,” and “company,” be modified to legislative branch terminology in all of the remaining subsections. The Board agrees with these modifications generally, if not verbatim.

Sec. 541.303: One commenter recommends omitting “teachers of kindergarten or nursery school pupils” because, in the legislative branch, the daycare providers are not required to hold advanced degrees or required to graduate from a prolonged course of specialized instruction. In addition, the commenter recommends including salary requirements when evaluating whether a teacher should be included in the professional exemption. The Board does not believe good cause has been established for such a substantial departure from the Department of Labor regulations. Department of Labor Fact Sheet #46, “Daycare Centers and Preschools Under the Fair Labor Standards Act (revised July 2009), explains that nursery school teachers are exempt if their primary duty is “teaching, tutoring, instructing or lecturing”. However, “preschool employees whose primary duty is to care for the physical needs of the facility’s children would ordinarily not meet the requirement for exemption as teachers”. <https://www.dol.gov/agencies/whd/fact-sheets/46-flsa-daycare>. Whether an exemption applies is fact specific and should be decided through adjudication and not through rulemaking.

Sec. 541.402: One commenter requested that “customers” be replaced with “constituents” to further tailor the regulations to reflect legislative branch terminology. The Board recognizes that the word “customers” is not inherently governmental. Nevertheless, the Board believes that “constituents” is too narrow. Thus, the Board finds good cause to modify the word “customers” with “customers, constituents or stakeholders”.

Subpart F: A commenter asked the Board to either identify that the section was removed or renumber the sections thereafter for typographical clarity. The Board will include the word “Reserved” after the headings of removed sections.

Sec. 541.601: A commenter recommended departing from the Department of Labor’s effective dates in Section 541.601(a)(1), 541.601(a)(2), and 541.601(b)(2) so that the regulations are not deemed retroactive. The Board finds good cause to amend this language so that there is no ambiguity regarding retroactivity. In addition, the Board agrees that good cause exists to further modify 541.601(b)(2) by eliminating references to commissioned sales to further reflect the legislative branch’s unique workplace.

Sec. 541.602: At least one commenter requested that “business” be modified to further tailor the regulations to reflect legislative branch terminology. Although Section 541.1 defines “business” to mean “employing office,” the Board concurs with this recommendation. Similarly, a commenter pointed out that the proposed section maintained an erroneous requirement that employing offices may deduct for benefits received under State laws. The Board concurs with the comment.

Sec. 541.603: At least one commenter requested that “company” be modified to further tailor the regulations to reflect legislative branch terminology. Although Section 541.1 defines “company” to mean “employing office,” the Board concurs with this recommendation.

Sec. 541.606: Commenters recommended maintaining the original language. The Board agrees with the concern that incor-

porating by reference all of Part 531’s interpretation of “board, lodging, or other facilities” is overbroad and cumbersome. One commenter recommended creating a definition specific to legislative branch employees, including transit benefits in the definition of board, lodging or other facilities. The Board notes that private sector employees are also eligible for transit benefits but the Department of Labor did not include it in its regulation. The Board does not find good cause to stray from the original regulation.

Sec. 541.607: A commenter asked the Board to either identify that the section was removed or renumber the sections thereafter for typographical clarity. The Board will include the word “Reserved” after the headings of removed sections.

Sec. 541.702: Raising the same concern as addressed in Sec. 541.202, at least one commenter requested that “credit manager”, “employer”, and “customers” be modified to further tailor the regulations to reflect legislative branch terminology. Although “employing office” can be readily understood from the term “employer,” the Board concurs with all of these recommendations since the example of “credit manager” is not applicable directly to any employing office.

Sec. 541.706: At least one commenter requested that the example of a “mine superintendent” be eliminated, and the terms “establishment” and “industry” be modified to further tailor the regulations to reflect legislative branch terminology. The Board recognizes that there is no position of “mine superintendent” in the legislative branch and that this example will not be applicable directly or by analogy for employing offices to analyze whether employees are covered by any exemption. Therefore, the Board finds good cause to both eliminate and modify said language.

Sec. 541.709: A commenter asked the Board to either identify that the section was removed or renumber the sections thereafter for typographical clarity. The Board will include the word “Reserved” after the headings of removed sections.

Sec. 541.710: Commenters correctly observed that all legislative employees are essentially “Employees of public agencies.” The commenters thus requested that the language be modified to further tailor the regulations to reflect legislative branch terminology. The Board concurred with this recommendation.

What changes to the proposed substantive regulations suggested by commenters were not made by the Board of Directors?

The Board of Directors reviewed all suggestions included in comments pursuant to the statutory requirement that the regulations “shall be the same as substantive regulations promulgated by the Secretary of Labor to implement the statutory provisions . . . except insofar as the Board may determine, for good cause shown and stated together with the regulation, that a modification of such regulations would be more effective for the implementation of the rights and protections under this section.” (section 203(c)(2) of the CAA, 2 USC 1313(c)(2)). If the Board declined to adopt a suggestion, it determined that there was not good cause for such a change in implementing the FLSA.

One commenter was critical of the Board’s approach and questioned why the Board incorporated some of its suggestions in response to the proposed 2004 Substantive Regulations but not others. The April 2022 proposed regulations were created to mirror current Department of Labor regulations. This, in addition to the almost 20 year lapse of time since 2004, is why the Board diverged from the adopted 2005 Substantive Regulations.

As discussed previously, several commenters requested the Board to further amend the Proposed Rule to remove positions not presently found in the legislative branch and include examples of positions specific to the legislative branch employees. While the Board agreed with this suggestion in large part, the Board did not find good cause for all of the requested changes. First, as explained in 2005, the Board is aware that many of the job classifications and types of work processes treated in Part 541 are probably not found within the Legislative Branch of the Federal Government, that there may be job categories in the Legislative Branch not directly reflected in Part 541, and that there are differences among the work forces in the several employing offices covered by the CAA. However, the Board has concluded that adding or removing all exemplary and descriptive provisions from the regulations as applied to all employing offices could result in a basic misunderstanding of the purpose and goal of the new Part 541 of 29 CFR, and of the Congressional mandate in the CAA that the Board issue regulations based upon the Secretary of Labor's regulations promulgated for the private sector. Second, the Board did not remove positions which do not presently exist in the legislative branch but are reasonably foreseeable to exist in the future. The Board recognizes that this Proposed Rule, when adopted and issued, may be effective for many years to come. For example, although the legislative branch does not presently employ a chef, it may in the future for one of the multiple dining locations within the Capitol complex. Thus, descriptions of positions or functions that are not currently held by Congressional employees but could reasonably be foreseen to exist in the future were maintained. Third, the Board did not include position titles that are currently held by many legislative branch employees where the employees may have the same title but whose actual job duties may differ. The Board believes that such determinations should not be made through rulemaking but rather through adjudication.

Sec. 541.0: One commenter suggested the removal of the words "elementary or secondary schools" and in its stead the inclusion of "nursery school programs" as exempt from minimum wage and overtime requirements. The Board does not believe that good cause exists to make this change. The inclusion of "elementary or secondary schools" and the exclusion of "nursery schools" provides an employing office with the ability to evaluate whether a nursery school employee is exempt, or not exempt, consistent with the maxim of interpretation, *expressio unius, exclusio alterius*. Further, the Board believes that determinations regarding exemptions for nursery school program employees should be made through adjudication and not through rulemaking. Commenters also noted that the reference in the proposed regulation to "enforcement" by the Office of Congressional Workplace Rights of the equal pay provision found at section 6(d) of the FLSA reflected an authority not given to the Office under the CAA. The Office of Congressional Workplace Rights is authorized to administer the dispute resolution process for employee claims of a violation of the equal pay requirement at section 6(d) of the FLSA. Although the Office of Congressional Workplace Rights does not initiate enforcement, this remains a method of enforcement. Therefore, the reference to "enforcement" of section 6(d) was maintained.

Sec. 541.1: One commenter expressed concern that by defining the terms "employee", "intern", and "employing office" by reference to statutory citations, this causes confusion. It recommended, therefore, that the terms be defined pursuant to definitions

already extant in the Substantive Regulations for the FLSA at Section 501.102. The Board does not believe that citation to the Congressional Accountability Act causes confusion. Therefore, the statutory citations will remain.

Sec. 541.100: One commenter requested this section be revised to clarify that an executive must regularly direct the work of two or more full time employees or their equivalent. The Board does not find good cause to modify this subsection as section 541.104(a)(3) provides this exact clarification.

Sec. 541.104: One commenter suggested that the Board re-evaluate its 2005 determination declining to include interns as employees for the purpose of section 541.104 to the extent that they are now paid staff. In 2005, then Office of Compliance submitted an inquiry with the Department of Labor as to whether the Department interprets the term "employee" in regulation 541.104 to include individual workers who are not "employees" as defined under the balance of Part 541. The Department of Labor responded informally that such workers are not counted as "employees" for purposes of the application of section 541.104 of the regulations. The Board has concluded that there is no good cause to modify section 541.104 to expressly include interns. The Board has defined "interns" in this regulation pursuant to the Congressional Accountability Act's definition, i.e., an individual who performs work but is uncompensated. To the extent that an employee holds the position of "intern" but is nevertheless compensated, the employee may, in certain circumstances, be considered a full time employee or the equivalent. The Board believes that determinations regarding paid interns should be made through adjudication and not through rulemaking.

Sec. 541.202: One commenter requested that "segment" be modified to "department or division" to further tailor the regulations to reflect the legislative branch terminology. Because segment is a generic description for the words "department" and "division", and since "segment" would also capture other partitions within the employing office that are not called a department or division, the Board does not find good cause to modify this language.

Sec. 541.203: Multiple commenters requested that additional position titles and descriptions be included as examples of employees who are exempt based on the administrative exemption. For example, one commenter proposed to include the following examples of employees whose primary duty is to perform office or non-manual work directly related to the management or general business operations of the employer or the employer's stakeholders:

(k) "Employees who perform public relations work for an employing office, such as developing and implementing a media strategy or managing and coordinating media contacts and activities for the office, generally meet the duties requirements for the administrative exemption."

(l) "Employees who perform research and government relations functions for an employing office, such as devising and formulating legislative initiatives, serving as a Senator's principal advisor on legislative matters, and working with governmental and non-governmental offices to gather support for particular legislative proposals, generally meet the duties requirements for the administrative exemption."

(m) "Employees who act as a Senator's liaison to government, community and constituent groups and leaders in assigned geographic or issue areas and who research and advise the Senator on community, legislative or other developments in the assigned area, generally meet the duties requirements for the administrative exemption."

However, among other potential issues, it is unclear from these examples whether the employees exercise discretion and independent judgment with respect to matters of significance and whether the employee is paid the equivalent of at least \$684 per week on a salary basis. The Department of Labor's Wage and Hour Division has opined that for a government employee to qualify for the administrative exemption, the employee's primary duty should involve its management policies or the management policies of the government entity or political subdivision, i.e., "directly related to assisting with the 'running or servicing' of the . . . government itself." WHD Opinion Letter FLSA2020-9. Therefore, the Board cannot find good cause to include the commenter's language as the determination whether these employment positions and functions would qualify for the administrative exemption should be made on a case by case basis.

Sec. 541.204: One commenter suggested the substitution of "nursery school programs" for "elementary or secondary schools." As explained in Sec. 541.0 above, the Board does not believe that good cause exists to make this change. The inclusion of "elementary or secondary schools" and the exclusion of "nursery schools" in the original regulation provides an employing office with the ability to evaluate whether a nursery school employee is exempt, or not exempt, consistent with the maxim *expressio unius, exclusio alterius*. Further, the Board believes that determinations regarding exemptions for nursery school program management employees should be made through adjudication and not through rulemaking.

Sec. 541.301: Commenters broadly suggested that portions of the proposed regulations that arguably do not directly concern types or categories of employment in their component of the legislative branch should be deleted from the proposed regulations in its entirety. Thus, they recommend deleting Section 541.301(e)(1), pertaining to registered or certified technologists; Section 541.301(e)(2), pertaining to nurses; Section 541.301(e)(3), relating to dental hygienists; Section 541.301(e)(4), pertaining to physicians assistants; Section 541.301(e)(6), relating to chefs; and Section 541.301(e)(8), relating to athletic trainers. The Board does not find good cause to remove these positions and descriptions. Some of these functions may exist directly or by analogy within the Office of Attending Physician. Furthermore, for positions that do not presently exist in the legislative branch but are reasonably foreseeable to exist in the future, the Board believes these descriptions will assist employing offices either directly or by analogy for positions created in years to come.

Sec. 541.304: Commenters broadly suggested that portions of the proposed regulations which arguably do not directly concern types or categories of employment in their component of the legislative branch should be deleted from the proposed regulations in its entirety. For example, one commenter recommends deleting all references to the practice of medicine in 541.304. The Board does not find good cause to remove these positions and descriptions. These functions may exist directly or by analogy within the Office of Attending Physician. Furthermore, for positions that do not presently exist in the legislative branch but are reasonably foreseeable to exist in the future, the Board believes these descriptions will assist employing offices either directly or by analogy for positions created in years to come.

Sec. 541.605: One commenter suggested that this section in its entirety, and the many references to this section, should be eliminated since Congressional employees are paid on a salary basis. The Board does

not find good cause to remove the “fee basis” section. Although most, if not all, positions are paid on a salary basis, it is reasonably foreseeable that an employee could be hired on a fee basis in the future.

HOW TO READ THE ADOPTED AMENDMENTS

The text of the amendments adopted by the OCWR Board reproduces the text of the current regulations promulgated by the Secretary of Labor at 29 CFR Part 541, and shows changes adopted by the OCWR Board for the CAA version of these same regulations. Changes adopted by the Board are shown as follows: deletions are marked with a [bracket] and added text is within angled <<brackets>>. Therefore, if these regulations are adopted as proposed, the deletion within bracketed text will disappear from the regulations and the added text within angled brackets will remain. If these regulations are approved for the House of Representatives by resolution of the House, they will be promulgated with the prefix “H” appearing before each regulations section number. If these regulations are approved for the Senate by resolution of the Senate, they will be promulgated with the prefix “S” appearing before each regulation’s section number. If these regulations are approved for the other employing offices by joint or concurrent resolution of the House of Representatives and the Senate, they will be promulgated with the prefix “C” appearing before each regulation’s section number.

OVERTIME EXEMPTION REGULATIONS

PART 541—DEFINING AND DELIMITING THE EXEMPTIONS FOR EXECUTIVE, ADMINISTRATIVE, PROFESSIONAL, AND COMPUTER [AND OUTSIDE SALES] EMPLOYEES

SUBPART A—GENERAL REGULATIONS

Sec.

541.0 Introductory statement.

541.1 Terms used in regulations.

541.2 Job titles insufficient.

541.3 Scope of the section 13(a)(1) exemptions.

541.4 Other laws and collective bargaining agreements.

SUBPART B—EXECUTIVE EMPLOYEES

541.100 General rule for executive employees.

[541.101 Business owner.]<<541.101 Reserved.>>

541.102 Management.

541.103 Department or subdivision.

541.104 Two or more other employees.

541.105 Particular weight.

541.106 Concurrent duties.

SUBPART C—ADMINISTRATIVE EMPLOYEES

541.200 General rule for administrative employees.

541.201 Directly related to management or general business operations.

541.202 Discretion and independent judgment.

541.203 Administrative exemption examples.

541.204 Educational establishments.

SUBPART D—PROFESSIONAL EMPLOYEES

541.300 General rule for professional employees.

541.301 Learned professionals.

541.302 Creative professionals.

541.303 Teachers.

541.304 Practice of law or medicine.

SUBPART E—COMPUTER EMPLOYEES

541.400 General rule for computer employees.

541.401 Computer manufacture and repair.

541.402 Executive and administrative computer employees.

[SUBPART F—OUTSIDE SALES EMPLOYEES] <<SUBPART F—Reserved.>>

[541.500 General rule for outside sales employees.]

[541.501 Making sales or obtaining orders.]

[541.502 Away from employer’s place of business.]

[541.503 Promotion work.]

[541.504 Drivers who sell.]

SUBPART G—SALARY REQUIREMENTS

541.600 Amount of salary required.

541.601 Highly compensated employees.

541.602 Salary basis.

541.603 Effect of improper deductions from salary.

541.604 Minimum guarantee plus extras.

541.605 Fee basis.

541.606 Board, lodging or other facilities.

<<541.607—Reserved.>>

SUBPART H—DEFINITIONS AND MISCELLANEOUS PROVISIONS

541.700 Primary duty.

541.701 Customarily and regularly.

541.702 Exempt and nonexempt work.

541.703 Directly and closely related.

541.704 Use of manuals.

541.705 Trainees.

541.706 Emergencies.

541.707 Occasional tasks.

541.708 Combination exemptions.

[541.709 Motion picture producing industry.]

<<541.709 Reserved.>>

541.710 Employees of public agencies.

SUBPART A—GENERAL REGULATIONS (§§ 541.0–541.4)

§ 541.0 Introductory statement.

(a) Section 13(a)(1) of the Fair Labor Standards Act, as amended, provides an ex-

emption from the Act’s minimum wage and overtime requirements for any employee employed in a bona fide executive, administrative, or professional capacity (including any employee employed in the capacity of academic administrative personnel or teacher in elementary or secondary schools)[, or in the capacity of an outside sales employee, as such terms are defined and delimited from time to time by regulations of the Secretary, subject to the provisions of the Administrative Procedure Act.]<< and applies to covered employees by virtue of section 225(e)(1) of the CAA, as amended, 2 U.S.C. 1361(e)(1).>> Section 13(a)(17) of the Act provides an exemption from the minimum wage and overtime requirements for computer systems analysts, computer programmers, software engineers, and other similarly skilled computer employees << and applies to covered employees by virtue of section 225(e)(1) of the CAA, as amended, 2 U.S.C. 1361(e)(1).>>.

(b) The requirements for these exemptions are contained in this part as follows: executive employees, subpart B; administrative employees, subpart C; professional employees, subpart D; computer employees, subpart E; outside sales employees, subpart F]. Subpart G contains regulations regarding salary requirements applicable to most of the exemptions, including salary levels and the salary basis test. Subpart G also contains a provision for exempting certain highly compensated employees. Subpart H contains definitions and other miscellaneous provisions applicable to all or several of the exemptions.

(c) Effective July 1, 1972, the Fair Labor Standards Act was amended to include within the protection of the equal pay provisions those employees exempt from the minimum wage and overtime pay provisions as bona fide executive, administrative, and professional employees (including any employee employed in the capacity of academic administrative personnel or teacher in elementary or secondary schools)[, or in the capacity of an outside sales employee under section 13(a)(1) of the Act]. The equal pay provisions in section 6(d) of the Fair Labor Standards Act are administered and enforced by the [United States Equal Employment Opportunity Commission] <<Office of Congressional Workplace Rights>>.

§ 541.1 Terms used in regulations.

Act means the Fair Labor Standards Act of 1938, as amended. [Administrator means the Administrator of the Wage and Hour Division, United States Department of Labor. The Secretary of Labor has delegated to the Administrator the functions vested in the Secretary under sections 13(a)(1) and 13(a)(17) of the Fair Labor Standards Act.] <<CAA means Congressional Accountability Act of 1995, as amended. Office means the Office of Congressional Workplace Rights. Employee means a “covered employee” as defined in section 101(a)(3) through (a)(8) of the CAA, 2 U.S.C. 1301(a)(3) through (a)(8), but not an “intern” as defined in section 203(a)(2) of the CAA, 2 U.S.C. 1313(a)(2). Employer, company, business, or enterprise each mean an “employing office” as defined in section 101(a)(9) of the CAA, 2 U.S.C. 1301(a)(9).>>

§ 541.2 Job titles insufficient.

A job title alone is insufficient to establish the exempt status of an employee. The exempt or nonexempt status of any particular employee must be determined on the basis of whether the employee’s salary and duties meet the requirements of the regulations in this part.

§ 541.3 Scope of the section 13(a)(1) exemptions.

(a) The section 13(a)(1) exemptions and the regulations in this part do not apply to manual laborers or other “blue collar” workers

who perform work involving repetitive operations with their hands, physical skill and energy. Such nonexempt "blue collar" employees gain the skills and knowledge required for performance of their routine manual and physical work through apprenticeships and on-the-job training, not through the prolonged course of specialized intellectual instruction required for exempt learned professional employees such as medical doctors, architects and archeologists. Thus, for example, non-management production-line employees and non-management employees in maintenance, construction and similar occupations such as carpenters, electricians, mechanics, plumbers, iron workers, craftsmen, operating engineers, longshoremen, construction workers and laborers are entitled to minimum wage and overtime premium pay under the Fair Labor Standards Act, and are not exempt under the regulations in this part no matter how highly paid they might be.

(b)(1) The section 13(a)(1) exemptions and the regulations in this part also do not apply to police officers, detectives, [deputy sheriffs, state troopers, highway patrol officers,] investigators, inspectors, [correctional officers, parole or probation officers,] park rangers, fire fighters, paramedics, emergency medical technicians, ambulance personnel, rescue workers, hazardous materials workers and similar employees, regardless of rank or pay level, who perform work such as preventing, controlling or extinguishing fires of any type; rescuing fire, crime or accident victims; preventing or detecting crimes; conducting investigations or inspections for violations of law; performing surveillance; pursuing, restraining and apprehending suspects; detaining or supervising suspected and convicted criminals, including those on probation or parole; interviewing witnesses; interrogating and fingerprinting suspects; preparing investigative reports; or other similar work.

(2) Such employees do not qualify as exempt executive employees because their primary duty is not management of the [enterprise] <<employing office>> in which the employee is employed or a customarily recognized department or subdivision thereof as required under §541.100. Thus, for example, a police officer or fire fighter whose primary duty is to investigate crimes or fight fires is not exempt under section 13(a)(1) of the Act merely because the police officer or fire fighter also directs the work of other employees in the conduct of an investigation or fighting a fire.

(3) Such employees do not qualify as exempt administrative employees because their primary duty is not the performance of work directly related to the management or general business operations of the employer or the employer's customers<<, constituents or stakeholders>> as required under §541.200.

(4) Such employees do not qualify as exempt professionals because their primary duty is not the performance of work requiring knowledge of an advanced type in a field of science or learning customarily acquired by a prolonged course of specialized intellectual instruction or the performance of work requiring invention, imagination, originality or talent in a recognized field of artistic or creative endeavor as required under §541.300. Although some police officers, fire fighters, paramedics, emergency medical technicians and similar employees have college degrees, a specialized academic degree is not a standard prerequisite for employment in such occupations.

§541.4 Other laws and collective bargaining agreements.

The Fair Labor Standards Act provides minimum standards that may be exceeded,

but cannot be waived or reduced. Employers must comply, for example, with any Federal, State or municipal laws, regulations or ordinances establishing a higher minimum wage or lower maximum workweek than those established under the Act. Similarly, employers, on their own initiative or under a collective bargaining agreement with a labor union, are not precluded by the Act from providing a wage higher than the statutory minimum, a shorter workweek than the statutory maximum, or a higher overtime premium (double time, for example) than provided by the Act. While collective bargaining agreements cannot waive or reduce the Act's protections, nothing in the Act or the regulations in this part relieves employers from their contractual obligations under collective bargaining agreements.

SUBPART B—EXECUTIVE EMPLOYEES (§§ 541.100–541.106)

§541.100 General rule for executive employees.

(a) The term "employee employed in a bona fide executive capacity" in section 13(a)(1) of the Act shall mean any employee:

(1) Compensated on a salary basis pursuant to §541.600 at a rate of not less than \$684 per week [(or \$455 per week if employed in the Commonwealth of the Northern Mariana Islands, Guam, Puerto Rico, or the U.S. Virgin Islands by employers other than the Federal government, or \$380 per week if employed in American Samoa by employers other than the Federal government)], exclusive of board, lodging or other facilities;

(2) Whose primary duty is management of the [enterprise] <<employing office>> in which the employee is employed or of a customarily recognized department or subdivision thereof;

(3) Who customarily and regularly directs the work of two or more other employees; and

(4) Who has the authority to hire or fire other employees or whose suggestions and recommendations as to the hiring, firing, advancement, promotion or any other change of status of other employees are given particular weight.

(b) The phrase "salary basis" is defined at §541.602; "board, lodging or other facilities" is defined at §541.606; "primary duty" is defined at §541.700; and "customarily and regularly" is defined at §541.701.

§541.101 Business owner.

The term "employee employed in a bona fide executive capacity" in section 13(a)(1) of the Act also includes any employee who owns at least a bona fide 20-percent equity interest in the enterprise in which the employee is employed, regardless of whether the business is a corporate or other type of organization, and who is actively engaged in its management. The term "management" is defined in §541.102. The requirements of Subpart G (salary requirements) of this part do not apply to the business owners described in this section.]

§541.102 Management.

Generally, "management" includes, but is not limited to, activities such as interviewing, selecting, and training of employees; setting and adjusting their rates of pay and hours of work; directing the work of employees; maintaining production or sales records for use in supervision or control; appraising employees' productivity and efficiency for the purpose of recommending promotions or other changes in status; handling employee complaints and grievances; disciplining employees; planning the work; determining the techniques to be used; apportioning the work among the employees; determining the type of materials, supplies,

machinery, equipment or tools to be used or merchandise to be bought, stocked and sold; controlling the flow and distribution of materials or merchandise and supplies; providing for the safety and security of the employees or the property; planning and controlling the budget; and monitoring or implementing legal compliance measures.

§541.103 Department or subdivision.

(a) The phrase "a customarily recognized department or subdivision" is intended to distinguish between a mere collection of employees assigned from time to time to a specific job or series of jobs and a unit with permanent status and function. A customarily recognized department or subdivision must have a permanent status and a continuing function. For example, a large employer's human resources department might have subdivisions for labor relations, pensions and other benefits, equal employment opportunity, and personnel management, each of which has a permanent status and function.

(b) When an [enterprise] <<employing office>> has more than one [establishment] <<location>>, the employee in charge of each [establishment] <<location>> may be considered in charge of a recognized subdivision of the [enterprise] <<employing office>>.

(c) A recognized department or subdivision need not be physically within the employer's establishment and may move from place to place. The mere fact that the employee works in more than one location does not invalidate the exemption if other factors show that the employee is actually in charge of a recognized unit with a continuing function in the organization.

(d) Continuity of the same subordinate personnel is not essential to the existence of a recognized unit with a continuing function. An otherwise exempt employee will not lose the exemption merely because the employee draws and supervises workers from a pool or supervises a team of workers drawn from other recognized units, if other factors are present that indicate that the employee is in charge of a recognized unit with a continuing function.

§541.104 Two or more other employees.

(a) To qualify as an exempt executive under §541.100, the employee must customarily and regularly direct the work of two or more other employees. The phrase "two or more other employees" means two full-time employees or their equivalent. One full-time and two half-time employees, for example, are equivalent to two full-time employees. Four half-time employees are also equivalent.

(b) The supervision can be distributed among two, three or more employees, but each such employee must customarily and regularly direct the work of two or more other full-time employees or the equivalent. Thus, for example, a department with five full-time nonexempt workers may have up to two exempt supervisors if each such supervisor customarily and regularly directs the work of two of those workers.

(c) An employee who merely assists the manager of a particular department and supervises two or more employees only in the actual manager's absence does not meet this requirement.

(d) Hours worked by an employee cannot be credited more than once for different executives. Thus, a shared responsibility for the supervision of the same two employees in the same department does not satisfy this requirement. However, a full-time employee who works four hours for one supervisor and four hours for a different supervisor, for example, can be credited as a half-time employee for both supervisors.

§ 541.105 Particular weight.

To determine whether an employee's suggestions and recommendations are given "particular weight," factors to be considered include, but are not limited to, whether it is part of the employee's job duties to make such suggestions and recommendations; the frequency with which such suggestions and recommendations are made or requested; and the frequency with which the employee's suggestions and recommendations are relied upon. Generally, an executive's suggestions and recommendations must pertain to employees whom the executive customarily and regularly directs. It does not include an occasional suggestion with regard to the change in status of a co-worker. An employee's suggestions and recommendations may still be deemed to have "particular weight" even if a higher level manager's recommendation has more importance and even if the employee does not have authority to make the ultimate decision as to the employee's change in status.

§ 541.106 Concurrent duties.

(a) Concurrent performance of exempt and nonexempt work does not disqualify an employee from the executive exemption if the requirements of § 541.100 are otherwise met. Whether an employee meets the requirements of § 541.100 when the employee performs concurrent duties is determined on a case-by-case basis and based on the factors set forth in § 541.700. Generally, exempt executives make the decision regarding when to perform nonexempt duties and remain responsible for the success or failure of business operations under their management while performing the nonexempt work. In contrast, the nonexempt employee generally is directed by a supervisor to perform the exempt work or performs the exempt work for defined time periods. An employee whose primary duty is ordinary production work or routine, recurrent or repetitive tasks cannot qualify for exemption as an executive.

(b) For example, an assistant manager in a retail establishment may perform work such as serving customers, cooking food, stocking shelves and cleaning the establishment, but performance of such nonexempt work does not preclude the exemption if the assistant manager's primary duty is management. An assistant manager can supervise employees and serve customers at the same time without losing the exemption. An exempt employee can also simultaneously direct the work of other employees and stock shelves.

(c) In contrast, a relief supervisor or working supervisor whose primary duty is performing nonexempt work on the production line in a manufacturing plant does not become exempt merely because the nonexempt production line employee occasionally has some responsibility for directing the work of other nonexempt production line employees when, for example, the exempt supervisor is unavailable. Similarly, an employee whose primary duty is to work as an electrician is not an exempt executive even if the employee also directs the work of other employees on the job site, orders parts and materials for the job, and handles requests from the prime contractor.

SUBPART C—ADMINISTRATIVE EMPLOYEES (§§ 541.200–541.204)

§ 541.200 General rule for administrative employees.

(a) The term "employee employed in a bona fide administrative capacity" in section 13(a)(1) of the Act shall mean any employee:

(1) Compensated on a salary or fee basis pursuant to § 541.600 at a rate of not less than \$684 per week [(or \$455 per week if employed in the Commonwealth of the Northern Mar-

iana Islands, Guam, Puerto Rico, or the U.S. Virgin Islands by employers other than the Federal government, or \$380 per week if employed in American Samoa by employers other than the Federal government)], exclusive of board, lodging or other facilities;

(2) Whose primary duty is the performance of office or non-manual work directly related to the management or general business operations of the employer or the employer's customers<<, constituents or stakeholders>>; and

(3) Whose primary duty includes the exercise of discretion and independent judgment with respect to matters of significance.

(b) The term "salary basis" is defined at § 541.602; "fee basis" is defined at § 541.605; "board, lodging or other facilities" is defined at § 541.606; and "primary duty" is defined at § 541.700.

§ 541.201 Directly related to management or general business operations.

(a) To qualify for the administrative exemption, an employee's primary duty must be the performance of work directly related to the management or general business operations of the employer or the employer's customers<<, constituents or stakeholders>>. The phrase "directly related to the management or general business operations" refers to the type of work performed by the employee. To meet this requirement, an employee must perform work directly related to assisting with the running or servicing of the [business] <<employing office>>, as distinguished, for example, from working on a manufacturing production line or selling a product in a retail or service establishment.

(b) Work directly related to management or general business operations includes, but is not limited to, work in functional areas such as tax; finance; accounting; budgeting; auditing; insurance; quality control; purchasing; procurement; advertising; marketing; research; safety and health; personnel management; human resources; employee benefits; labor relations; public relations, government relations; computer network, internet and database administration; legal and regulatory compliance; and similar activities. Some of these activities may be performed by employees who also would qualify for another exemption.

(c) An employee may qualify for the administrative exemption if the employee's primary duty is the performance of work directly related to the management or general business operations of the employer's customers<<, constituents and/or stakeholders>>. Thus, for example, employees acting as advisers or consultants to their employer's [clients or] customer<<, constituents or stakeholders>> (as tax experts or financial consultants, for example) may be exempt.

§ 541.202 Discretion and independent judgment.

(a) To qualify for the administrative exemption, an employee's primary duty must include the exercise of discretion and independent judgment with respect to matters of significance. In general, the exercise of discretion and independent judgment involves the comparison and the evaluation of possible courses of conduct, and acting or making a decision after the various possibilities have been considered. The term "matters of significance" refers to the level of importance or consequence of the work performed.

(b) The phrase "discretion and independent judgment" must be applied in the light of all the facts involved in the particular employment situation in which the question arises. Factors to consider when determining whether an employee exercises discretion and independent judgment with respect to

matters of significance include, but are not limited to: whether the employee has authority to formulate, affect, interpret, or implement management policies or operating practices; whether the employee carries out major assignments in conducting the operations of the [business] <<employing office>>; whether the employee performs work that affects business operations <<of the employing office>> to a substantial degree, even if the employee's assignments are related to operation of a particular segment of the [business] <<employing office>>; whether the employee has authority to commit the employer in matters that have significant financial impact; whether the employee has authority to waive or deviate from established policies and procedures without prior approval; whether the employee has authority to negotiate and bind the [company] <<employing office>> on significant matters; whether the employee provides consultation or expert advice to management; whether the employee is involved in planning longer short-term [business] <<employing office>> objectives; whether the employee investigates and resolves matters of significance on behalf of management; and whether the employee represents the [company] <<employing office>> in handling complaints, arbitrating disputes or resolving grievances.

(c) The exercise of discretion and independent judgment implies that the employee has authority to make an independent choice, free from immediate direction or supervision. However, employees can exercise discretion and independent judgment even if their decisions or recommendations are reviewed at a higher level. Thus, the term "discretion and independent judgment" does not require that the decisions made by an employee have a finality that goes with unlimited authority and a complete absence of review. The decisions made as a result of the exercise of discretion and independent judgment may consist of recommendations for action rather than the actual taking of action. The fact that an employee's decision may be subject to review and that upon occasion the decisions are revised or reversed after review does not mean that the employee is not exercising discretion and independent judgment. For example, the policies formulated by the [credit] manager of a <<n>> [large corporation] <<employing office>> may be subject to review by higher [company] <<employing office>> officials who may approve or disapprove these policies. The [management consultant] <<department director>> who has made a study of the operations of a [business] <<department>> and who has drawn a proposed change in organization may have the plan reviewed or revised by superiors before it is [submitted to the client] <<approved>>.

(d) An employer's volume of [business] <<work>> may make it necessary to employ a number of employees to perform the same or similar work. The fact that many employees perform identical work or work of the same relative importance does not mean that the work of each such employee does not involve the exercise of discretion and independent judgment with respect to matters of significance.

(e) The exercise of discretion and independent judgment must be more than the use of skill in applying well-established techniques, procedures or specific standards described in manuals or other sources. See also § 541.704 regarding use of manuals. The exercise of discretion and independent judgment also does not include clerical or secretarial work, recording or tabulating data, or performing other mechanical, repetitive, recurrent or routine work. An employee who simply tabulates data is not exempt, even if labeled as a "statistician."

(f) An employee does not exercise discretion and independent judgment with respect to matters of significance merely because the employer will experience financial losses if the employee fails to perform the job properly. For example, a messenger who is entrusted with carrying large sums of money does not exercise discretion and independent judgment with respect to matters of significance even though serious consequences may flow from the employee's neglect. Similarly, an employee who operates very expensive equipment does not exercise discretion and independent judgment with respect to matters of significance merely because improper performance of the employee's duties may cause serious financial loss to the employer.

§ 541.203 Administrative exemption examples.

(a) [Insurance claims adjusters] <<Employees who investigate claims>> generally meet the duties requirements for the administrative exemption[, whether they work for an insurance company or other type of company,] if their duties include activities such as interviewing [insureds,] witnesses [and physicians]; inspecting property damage; reviewing factual information to prepare damage estimates; evaluating and making recommendations regarding coverage of claims; determining liability and total value of a claim; negotiating settlements; and making recommendations regarding litigation.

(b) Employees in [the] financial services [industry] generally meet the duties requirements for the administrative exemption if their duties include work such as collecting and analyzing information regarding the customer's income, assets, investments or debts; determining which financial products best meet the customer's needs and financial circumstances; advising the customer regarding the advantages and disadvantages of different financial products; and marketing, servicing or promoting the employer's financial products. However, an employee whose primary duty is selling financial products does not qualify for the administrative exemption.

(c) An employee who leads a team of other employees assigned to complete major projects for the employer (such as [purchasing, selling or closing all or part of the business,] negotiating a real estate transaction or a collective bargaining agreement, or designing and implementing productivity improvements) generally meets the duties requirements for the administrative exemption, even if the employee does not have direct supervisory responsibility over the other employees on the team.

(d) An executive assistant or administrative assistant to a [business owner or senior executive of a large business] <<senior management official of an employing office>> generally meets the duties requirements for the administrative exemption if such employee, without specific instructions or prescribed procedures, has been delegated authority regarding matters of significance.

(e) Human resources managers who formulate, interpret or implement employment policies and management consultants who study the operations of a [business] <<employing office>> and propose changes in organization generally meet the duties requirements for the administrative exemption. However, personnel clerks who "screen" applicants to obtain data regarding their minimum qualifications and fitness for employment generally do not meet the duties requirements for the administrative exemption. Such personnel clerks typically will reject all applicants who do not meet minimum standards for the particular job or for employment by the [company] <<employing office>>. The minimum stand-

ards are usually set by the exempt human resources manager or other [company] <<employing office>> officials, and the decision to hire from the group of qualified applicants who do meet the minimum standards is similarly made by the exempt human resources manager or other [company] <<employing office>> officials. Thus, when the interviewing and screening functions are performed by the human resources manager or personnel manager who makes the hiring decision or makes recommendations for hiring from the pool of qualified applicants, such duties constitute exempt work, even though routine, because this work is directly and closely related to the employee's exempt functions.

(f) Purchasing agents with authority to bind the [company] <<employing office>> on significant purchases generally meet the duties requirements for the administrative exemption even if they must consult with top management officials when making a purchase commitment for [raw] materials in excess of the contemplated [plant] needs.

(g) Ordinary inspection work generally does not meet the duties requirements for the administrative exemption. Inspectors normally perform specialized work along standardized lines involving well-established techniques and procedures which may have been catalogued and described in manuals or other sources. Such inspectors rely on techniques and skills acquired by special training or experience. They have some leeway in the performance of their work but only within closely prescribed limits.

(h) Employees usually called examiners or graders, such as employees that grade lumber, generally do not meet the duties requirements for the administrative exemption. Such employees usually perform work involving the comparison of products with established standards which are frequently catalogued. Often, after continued reference to the written standards, or through experience, the employee acquires sufficient knowledge so that reference to written standards is unnecessary. The substitution of the employee's memory for a manual of standards does not convert the character of the work performed to exempt work requiring the exercise of discretion and independent judgment.

(i) [Comparison shopping performed by an employee of a retail store who merely reports to the buyer the prices at a competitor's store does not qualify for the administrative exemption. However, the buyer who evaluates such reports on competitor prices to set the employer's prices generally meets the duties requirements for the administrative exemption.] <<Reserved.>>

(j) [Public sector i] <<[>nspectors or investigators of various types, such as fire prevention or safety, building or construction, health or sanitation, environmental or soils specialists and similar employees, generally do not meet the duties requirements for the administrative exemption because their work typically does not involve work directly related to the management or general business operations of the employer. Such employees also do not qualify for the administrative exemption because their work involves the use of skills and technical abilities in gathering factual information, applying known standards or prescribed procedures, determining which procedure to follow, or determining whether prescribed standards or criteria are met.

§ 541.204 Educational establishments.

(a) The term "employee employed in a bona fide administrative capacity" in section 13(a)(1) of the Act also includes employees:

(1) Compensated on a salary or fee basis at a rate of not less than \$684 per week [or \$455

per week if employed in the Commonwealth of the Northern Mariana Islands, Guam, Puerto Rico, or the U.S. Virgin Islands by employers other than the Federal government, or \$380 per week if employed in American Samoa by employers other than the Federal government)], exclusive of board, lodging, or other facilities; or on a salary basis which is at least equal to the entrance salary for teachers in the educational establishment by which employed; and

(2) Whose primary duty is performing administrative functions directly related to academic instruction or training in an educational establishment or department or subdivision thereof.

(b) The term "educational establishment" means an elementary or secondary school system, an institution of higher education or other educational institution. Sections 3(v) and 3(w) of the Act define elementary and secondary schools as those day or residential schools that provide elementary or secondary education, as determined under State law. Under the laws of most States, such education includes the curriculums in grades 1 through 12; under many it includes also the introductory programs in kindergarten. Such education in some States may also include nursery school programs in elementary education and junior college curriculums in secondary education. The term "other educational establishment" includes special schools for mentally or physically disabled or gifted children, regardless of any classification of such schools as elementary, secondary or higher. Factors relevant in determining whether post-secondary career programs are educational institutions include whether the school is licensed by a state agency responsible for the state's educational system or accredited by a nationally recognized accrediting organization for career schools. Also, for purposes of the exemption, no distinction is drawn between public and private schools, or between those operated for profit and those that are not for profit.

(c) The phrase "performing administrative functions directly related to academic instruction or training" means work related to the academic operations and functions in a school rather than to administration along the lines of general business operations. Such academic administrative functions include operations directly in the field of education. Jobs relating to areas outside the educational field are not within the definition of academic administration.

(1) Employees engaged in academic administrative functions include: the superintendent or other head of an elementary or secondary school system, and any assistants, responsible for administration of such matters as curriculum, quality and methods of instructing, measuring and testing the learning potential and achievement of students, establishing and maintaining academic and grading standards, and other aspects of the teaching program; the principal and any vice-principals responsible for the operation of an elementary or secondary school; department heads in institutions of higher education responsible for the administration of the mathematics department, the English department, the foreign language department, etc.; academic counselors who perform work such as administering school testing programs, assisting students with academic problems and advising students concerning degree requirements; and other employees with similar responsibilities.

(2) Jobs relating to building management and maintenance, jobs relating to the health of the students, and academic staff such as social workers, psychologists, lunch room managers or dietitians do not perform academic administrative functions. Although

such work is not considered academic administration, such employees may qualify for exemption under 541.200 or under other sections of this part, provided the requirements for such exemptions are met.

SUBPART D—PROFESSIONAL EMPLOYEES **(§§ 541.300–541.304)**

§ 541.300 General rule for professional employees.

(a) The term “employee employed in a bona fide professional capacity” in section 13(a)(1) of the Act shall mean any employee:

(1) Compensated on a salary or fee basis pursuant to § 541.600 at a rate of not less than \$684 per week [(or \$455 per week if employed in the Commonwealth of the Northern Mariana Islands, Guam, Puerto Rico, or the U.S. Virgin Islands by employers other than the Federal government, or \$380 per week if employed in American Samoa by employers other than the Federal government)], exclusive of board, lodging or other facilities; and

(2) Whose primary duty is the performance of work:

(i) Requiring knowledge of an advanced type in a field of science or learning customarily acquired by a prolonged course of specialized intellectual instruction; or

(ii) Requiring invention, imagination, originality or talent in a recognized field of artistic or creative endeavor.

(b) The term “salary basis” is defined at § 541.602; “fee basis” is defined at § 541.605; “board, lodging or other facilities” is defined at § 541.606; and “primary duty” is defined at § 541.700.

§ 541.301 Learned professionals.

(a) To qualify for the learned professional exemption, an employee's primary duty must be the performance of work requiring advanced knowledge in a field of science or learning customarily acquired by a prolonged course of specialized intellectual instruction. This primary duty test includes three elements:

(1) The employee must perform work requiring advanced knowledge;

(2) The advanced knowledge must be in a field of science or learning; and

(3) The advanced knowledge must be customarily acquired by a prolonged course of specialized intellectual instruction.

(b) The phrase “work requiring advanced knowledge” means work which is predominantly intellectual in character, and which includes work requiring the consistent exercise of discretion and judgment, as distinguished from performance of routine mental, manual, mechanical or physical work. An employee who performs work requiring advanced knowledge generally uses the advanced knowledge to analyze, interpret or make deductions from varying facts or circumstances. Advanced knowledge cannot be attained at the high school level.

(c) The phrase “field of science or learning” includes the traditional professions of law, medicine, theology, accounting, actuarial computation, engineering, architecture, teaching, various types of physical, chemical and biological sciences, pharmacy and other similar occupations that have a recognized professional status as distinguished from the mechanical arts or skilled trades where in some instances the knowledge is of a fairly advanced type, but is not in a field of science or learning.

(d) The phrase “customarily acquired by a prolonged course of specialized intellectual instruction” restricts the exemption to professions where specialized academic training is a standard prerequisite for entrance into the profession. The best prima facie evidence that an employee meets this requirement is possession of the appropriate academic degree. However, the word “customarily”

means that the exemption is also available to employees in such professions who have substantially the same knowledge level and perform substantially the same work as the degreed employees, but who attained the advanced knowledge through a combination of work experience and intellectual instruction. Thus, for example, the learned professional exemption is available to the occasional lawyer who has not gone to law school, or the occasional chemist who is not the possessor of a degree in chemistry. However, the learned professional exemption is not available for occupations that customarily may be performed with only the general knowledge acquired by an academic degree in any field, with knowledge acquired through an apprenticeship, or with training in the performance of routine mental, manual, mechanical or physical processes. The learned professional exemption also does not apply to occupations in which most employees have acquired their skill by experience rather than by advanced specialized intellectual instruction.

(e)(1) *Registered or certified medical technologists.* Registered or certified medical technologists who have successfully completed three academic years of pre-professional study in an accredited college or university plus a fourth year of professional course work in a school of medical technology approved by the Council of Medical Education of the American Medical Association generally meet the duties requirements for the learned professional exemption.

(2) *Nurses.* Registered nurses who are registered by the appropriate State examining board generally meet the duties requirements for the learned professional exemption. Licensed practical nurses and other similar health care employees, however, generally do not qualify as exempt learned professionals because possession of a specialized advanced academic degree is not a standard prerequisite for entry into such occupations.

(3) *Dental hygienists.* Dental hygienists who have successfully completed four academic years of pre-professional and professional study in an accredited college or university approved by the Commission on Accreditation of Dental and Dental Auxiliary Educational Programs of the American Dental Association generally meet the duties requirements for the learned professional exemption.

(4) *Physician assistants.* Physician assistants who have successfully completed four academic years of pre-professional and professional study, including graduation from a physician assistant program accredited by the Accreditation Review Commission on Education for the Physician Assistant, and who are certified by the National Commission on Certification of Physician Assistants generally meet the duties requirements for the learned professional exemption.

(5) *Accountants.* Certified public accountants generally meet the duties requirements for the learned professional exemption. In addition, many other accountants who are not certified public accountants but perform similar job duties may qualify as exempt learned professionals. However, accounting clerks, bookkeepers and other employees who normally perform a great deal of routine work generally will not qualify as exempt professionals.

(6) *Chefs.* Chefs, such as executive chefs and sous chefs, who have attained a four-year specialized academic degree in a culinary arts program, generally meet the duties requirements for the learned professional exemption. The learned professional exemption is not available to cooks who perform predominantly routine mental, manual, mechanical or physical work.

(7) *Paralegals.* Paralegals and legal assistants generally do not qualify as exempt

learned professionals because an advanced specialized academic degree is not a standard prerequisite for entry into the field. Although many paralegals possess general four-year advanced degrees, most specialized paralegal programs are two-year associate degree programs from a community college or equivalent institution. However, the learned professional exemption is available for paralegals who possess advanced specialized degrees in other professional fields and apply advanced knowledge in that field in the performance of their duties. For example, if a law firm hires an engineer as a paralegal to provide expert advice on product liability cases or to assist on patent matters, that engineer would qualify for exemption.

(8) *Athletic trainers.* Athletic trainers who have successfully completed four academic years of pre-professional and professional study in a specialized curriculum accredited by the Commission on Accreditation of Allied Health Education Programs and who are certified by the Board of Certification of the National Athletic Trainers Association Board of Certification generally meet the duties requirements for the learned professional exemption.

(9) *Funeral directors or embalmers.* Licensed funeral directors and embalmers who are licensed by and working in a state that requires successful completion of four academic years of pre-professional and professional study, including graduation from a college of mortuary science accredited by the American Board of Funeral Service Education, generally meet the duties requirements for the learned professional exemption.]

(f) The areas in which the professional exemption may be available are expanding. As knowledge is developed, academic training is broadened and specialized degrees are offered in new and diverse fields, thus creating new specialists in particular fields of science or learning. When an advanced specialized degree has become a standard requirement for a particular occupation, that occupation may have acquired the characteristics of a learned profession. Accrediting and certifying organizations similar to those listed in paragraphs (e)(1), (e)(3), (e)(4) and (e)(8) of this section also may be created in the future. Such organizations may develop similar specialized curriculums and certification programs which, if a standard requirement for a particular occupation, may indicate that the occupation has acquired the characteristics of a learned profession.

§ 541.302 Creative professionals.

(a) To qualify for the creative professional exemption, an employee's primary duty must be the performance of work requiring invention, imagination, originality or talent in a recognized field of artistic or creative endeavor as opposed to routine mental, manual, mechanical or physical work. The exemption does not apply to work which can be produced by a person with general manual or intellectual ability and training.

(b) To qualify for exemption as a creative professional, the work performed must be “in a recognized field of artistic or creative endeavor.” This includes such fields as music, writing, acting and the graphic arts.

(c) The requirement of “invention, imagination, originality or talent” distinguishes the creative professions from work that primarily depends on intelligence, diligence and accuracy. The duties of employees vary widely, and exemption as a creative professional depends on the extent of the invention, imagination, originality or talent exercised by the employee. Determination of exempt creative professional status, therefore, must be made on a case-by-case basis. This requirement generally is met by actors, musicians, composers, conductors, and soloists;

painters who at most are given the subject matter of their painting; cartoonists who are merely told the title or underlying concept of a cartoon and must rely on their own creative ability to express the concept; essayists, novelists, short-story writers and screen-play writers who choose their own subjects and hand in a finished piece of work to their employers (the majority of such persons are, of course, not employees but self-employed); and persons holding the more responsible writing positions in advertising agencies. This requirement generally is not met by a person who is employed as a copyist, as an "animator" of motion-picture cartoons, or as a retoucher of photographs, since such work is not properly described as creative in character.

(d) Journalists may satisfy the duties requirements for the creative professional exemption if their primary duty is work requiring invention, imagination, originality or talent, as opposed to work which depends primarily on intelligence, diligence and accuracy. Employees of newspapers, magazines, television and other media are not exempt creative professionals if they only collect, organize and record information that is routine or already public, or if they do not contribute a unique interpretation or analysis to a news product. Thus, for example, newspaper reporters who merely rewrite press releases or who write standard recounts of public information by gathering facts on routine community events are not exempt creative professionals. Reporters also do not qualify as exempt creative professionals if their work product is subject to substantial control by the employer. However, journalists may qualify as exempt creative professionals if their primary duty is performing on the air in radio, television or other electronic media; conducting investigative interviews; analyzing or interpreting public events; writing editorials, opinion columns or other commentary; or acting as a narrator or commentator.

§ 541.303 Teachers.

(a) The term "employee employed in a bona fide professional capacity" in section 13(a)(1) of the Act also means any employee with a primary duty of teaching, tutoring, instructing or lecturing in the activity of imparting knowledge and who is employed and engaged in this activity as a teacher in an educational establishment by which the employee is employed. The term "educational establishment" is defined in § 541.204(b).

(b) Exempt teachers include, but are not limited to: Regular academic teachers; teachers of kindergarten or nursery school pupils; teachers of gifted or disabled children; teachers of skilled and semi-skilled trades and occupations; teachers engaged in automobile driving instruction; aircraft flight instructors; home economics teachers; and vocal or instrumental music instructors. Those faculty members who are engaged as teachers but also spend a considerable amount of their time in extracurricular activities such as coaching athletic teams or acting as moderators or advisors in such areas as drama, speech, debate or journalism are engaged in teaching. Such activities are a recognized part of the schools' responsibility in contributing to the educational development of the student.

(c) The possession of an elementary or secondary teacher's certificate provides a clear means of identifying the individuals contemplated as being within the scope of the exemption for teaching professionals. Teachers who possess a teaching certificate qualify for the exemption regardless of the terminology (e.g., permanent, conditional, standard, provisional, temporary, emergency, or

unlimited) used by the State to refer to different kinds of certificates. However, private schools and public schools are not uniform in requiring a certificate for employment as an elementary or secondary school teacher, and a teacher's certificate is not generally necessary for employment in institutions of higher education or other educational establishments. Therefore, a teacher who is not certified may be considered for exemption, provided that such individual is employed as a teacher by the employing school or school system.

(d) The requirements of § 541.300 and Subpart G (salary requirements) of this part do not apply to the teaching professionals described in this section.

§ 541.304 Practice of law or medicine.

(a) The term "employee employed in a bona fide professional capacity" in section 13(a)(1) of the Act also shall mean:

(1) Any employee who is the holder of a valid license or certificate permitting the practice of law or medicine or any of their branches and is actually engaged in the practice thereof; and

(2) Any employee who is the holder of the requisite academic degree for the general practice of medicine and is engaged in an internship or resident program pursuant to the practice of the profession.

(b) In the case of medicine, the exemption applies to physicians and other practitioners licensed and practicing in the field of medical science and healing or any of the medical specialties practiced by physicians or practitioners. The term "physicians" includes medical doctors including general practitioners and specialists, osteopathic physicians (doctors of osteopathy), podiatrists, dentists (doctors of dental medicine), and optometrists (doctors of optometry or bachelors of science in optometry).

(c) Employees engaged in internship or resident programs, whether or not licensed to practice prior to commencement of the program, qualify as exempt professionals if they enter such internship or resident programs after the earning of the appropriate degree required for the general practice of their profession.

(d) The requirements of § 541.300 and subpart G (salary requirements) of this part do not apply to the employees described in this section.

SUBPART E—COMPUTER EMPLOYEES (§§ 541.400–541.402)

§ 541.400 General rule for computer employees.

(a) Computer systems analysts, computer programmers, software engineers or other similarly skilled workers in the computer field are eligible for exemption as professionals under section 13(a)(1) of the Act and under section 13(a)(17) of the Act. Because job titles vary widely and change quickly in the computer industry, job titles are not determinative of the applicability of this exemption.

(b) The section 13(a)(1) exemption applies to any computer employee who is compensated on a salary or fee basis at a rate of not less than \$684 per week [(or \$455 per week if employed in the Commonwealth of the Northern Mariana Islands, Guam, Puerto Rico, or the U.S. Virgin Islands by employers other than the Federal government, or \$380 per week if employed in American Samoa by employers other than the Federal government)], exclusive of board, lodging, or other facilities.

The section 13(a)(17) exemption applies to any computer employee compensated on an hourly basis at a rate of not less than \$27.63 an hour. In addition, under either section 13(a)(1) or section 13(a)(17) of the Act, the ex-

emptions apply only to computer employees whose primary duty consists of:

(1) The application of systems analysis techniques and procedures, including consulting with users, to determine hardware, software or system functional specifications;

(2) The design, development, documentation, analysis, creation, testing or modification of computer systems or programs, including prototypes, based on and related to user or system design specifications;

(3) The design, documentation, testing, creation or modification of computer programs related to machine operating systems; or

(4) A combination of the aforementioned duties, the performance of which requires the same level of skills.

(c) The term "salary basis" is defined at § 541.602; "fee basis" is defined at § 541.605; "board, lodging or other facilities" is defined at § 541.606; and "primary duty" is defined at § 541.700.

§ 541.401 Computer manufacture and repair.

The exemption for employees in computer occupations does not include employees engaged in the manufacture or repair of computer hardware and related equipment. Employees whose work is highly dependent upon, or facilitated by, the use of computers and computer software programs (e.g., engineers, drafters and others skilled in computer-aided design software), but who are not primarily engaged in computer systems analysis and programming or other similarly skilled computer-related occupations identified in § 541.400(b), are also not exempt computer professionals.

§ 541.402 Executive and administrative computer employees.

Computer employees within the scope of this exemption, as well as those employees not within its scope, may also have executive and administrative duties which qualify the employees for exemption under subpart B or subpart C of this part. For example, systems analysts and computer programmers generally meet the duties requirements for the administrative exemption if their primary duty includes work such as planning, scheduling, and coordinating activities required to develop systems to solve complex business, scientific or engineering problems of the employer or the employer's customers<<, constituents or stakeholders>>. Similarly, a senior or lead computer programmer who manages the work of two or more other programmers in a customarily recognized department or subdivision of the employer, and whose recommendations as to the hiring, firing, advancement, promotion or other change of status of the other programmers are given particular weight, generally meets the duties requirements for the executive exemption.

<<SUBPART F—Reserved>>[SUBPART F— OUTSIDE SALES EMPLOYEES (§§ 541.500– 541.504)]

§ 541.500 General rule for outside sales employees.

(a) The term "employee employed in the capacity of outside salesman" in section 13(a)(1) of the Act shall mean any employee:

(1) Whose primary duty is:

(i) making sales within the meaning of section 3(k) of the Act, or

(ii) obtaining orders or contracts for services or for the use of facilities for which a consideration will be paid by the client or customer; and

(2) Who is customarily and regularly engaged away from the employer's place or places of business in performing such primary duty.

(b) The term "primary duty" is defined at § 541.700. In determining the primary duty of

an outside sales employee, work performed incidental to and in conjunction with the employee's own outside sales or solicitations, including incidental deliveries and collections, shall be regarded as exempt outside sales work. Other work that furthers the employee's sales efforts also shall be regarded as exempt work including, for example, writing sales reports, updating or revising the employee's sales or display catalogue, planning itineraries and attending sales conferences.

(c) The requirements of subpart G (salary requirements) of this part do not apply to the outside sales employees described in this section.

§ 541.501 Making sales or obtaining orders.

(a) Section 541.500 requires that the employee be engaged in:

(1) Making sales within the meaning of section 3(k) of the Act, or

(2) Obtaining orders or contracts for services or for the use of facilities.

(b) Sales within the meaning of section 3(k) of the Act include the transfer of title to tangible property, and in certain cases, of tangible and valuable evidences of intangible property. Section 3(k) of the Act states that "sale" or "sell" includes any sale, exchange, contract to sell, consignment for sale, shipment for sale, or other disposition.

(c) Exempt outside sales work includes not only the sales of commodities, but also "obtaining orders or contracts for services or for the use of facilities for which a consideration will be paid by the client or customer." Obtaining orders for "the use of facilities" includes the selling of time on radio or television, the solicitation of advertising for newspapers and other periodicals, and the solicitation of freight for railroads and other transportation agencies.

(d) The word "services" extends the outside sales exemption to employees who sell or take orders for a service, which may be performed for the customer by someone other than the person taking the order.

§ 541.502 Away from employer's place of business.

An outside sales employee must be customarily and regularly engaged "away from the employer's place or places of business." The outside sales employee is an employee who makes sales at the customer's place of business or, if selling door-to-door, at the customer's home. Outside sales does not include sales made by mail, telephone or the Internet unless such contact is used merely as an adjunct to personal calls. Thus, any fixed site, whether home or office, used by a salesperson as a headquarters or for telephonic solicitation of sales is considered one of the employer's places of business, even though the employer is not in any formal sense the owner or tenant of the property. However, an outside sales employee does not lose the exemption by displaying samples in hotel sample rooms during trips from city to city; these sample rooms should not be considered as the employer's places of business. Similarly, an outside sales employee does not lose the exemption by displaying the employer's products at a trade show. If selling actually occurs, rather than just sales promotion, trade shows of short duration (i.e., one or two weeks) should not be considered as the employer's place of business.

§ 541.503 Promotion work.

(a) Promotion work is one type of activity often performed by persons who make sales, which may or may not be exempt outside sales work, depending upon the circumstances under which it is performed. Promotional work that is actually performed incidental to and in conjunction with an employee's own outside sales or solicitations is

exempt work. On the other hand, promotional work that is incidental to sales made, or to be made, by someone else is not exempt outside sales work. An employee who does not satisfy the requirements of this subpart may still qualify as an exempt employee under other subparts of this rule.

(b) A manufacturer's representative, for example, may perform various types of promotional activities such as putting up displays and posters, removing damaged or spoiled stock from the merchant's shelves or rearranging the merchandise. Such an employee can be considered an exempt outside sales employee if the employee's primary duty is making sales or contracts. Promotion activities directed toward consummation of the employee's own sales are exempt. Promotional activities designed to stimulate sales that will be made by someone else are not exempt outside sales work.

(c) Another example is a company representative who visits chain stores, arranges the merchandise on shelves, replenishes stock by replacing old with new merchandise, sets up displays and consults with the store manager when inventory runs low, but does not obtain a commitment for additional purchases. The arrangement of merchandise on the shelves or the replenishing of stock is not exempt work unless it is incidental to and in conjunction with the employee's own outside sales. Because the employee in this instance does not consummate the sale nor direct efforts toward the consummation of a sale, the work is not exempt outside sales work.

§ 541.504 Drivers who sell.

(a) Drivers who deliver products and also sell such products may qualify as exempt outside sales employees only if the employee has a primary duty of making sales. In determining the primary duty of drivers who sell, work performed incidental to and in conjunction with the employee's own outside sales or solicitations, including loading, driving or delivering products, shall be regarded as exempt outside sales work.

(b) Several factors should be considered in determining if a driver has a primary duty of making sales, including, but not limited to: a comparison of the driver's duties with those of other employees engaged as truck drivers and as salespersons; possession of a selling or solicitor's license when such license is required by law or ordinances; presence or absence of customary or contractual arrangements concerning amounts of products to be delivered; description of the employee's occupation in collective bargaining agreements; the employer's specifications as to qualifications for hiring; sales training; attendance at sales conferences; method of payment; and proportion of earnings directly attributable to sales.

(c) Drivers who may qualify as exempt outside sales employees include:

(1) A driver who provides the only sales contact between the employer and the customers visited, who calls on customers and takes orders for products, who delivers products from stock in the employee's vehicle or procures and delivers the product to the customer on a later trip, and who receives compensation commensurate with the volume of products sold.

(2) A driver who obtains or solicits orders for the employer's products from persons who have authority to commit the customer for purchases.

(3) A driver who calls on new prospects for customers along the employee's route and attempts to convince them of the desirability of accepting regular delivery of goods.

(4) A driver who calls on established customers along the route and persuades reg-

ular customers to accept delivery of increased amounts of goods or of new products, even though the initial sale or agreement for delivery was made by someone else.

(d) Drivers who generally would not qualify as exempt outside sales employees include:

(1) A route driver whose primary duty is to transport products sold by the employer through vending machines and to keep such machines stocked, in good operating condition, and in good locations.

(2) A driver who often calls on established customers day after day or week after week, delivering a quantity of the employer's products at each call when the sale was not significantly affected by solicitations of the customer by the delivering driver or the amount of the sale is determined by the volume of the customer's sales since the previous delivery.

(3) A driver primarily engaged in making deliveries to customers and performing activities intended to promote sales by customers (including placing point-of-sale and other advertising materials, price stamping commodities, arranging merchandise on shelves, in coolers or in cabinets, rotating stock according to date, and cleaning and otherwise servicing display cases), unless such work is in furtherance of the driver's own sales efforts.]

SUBPART G—SALARY REQUIREMENTS (§§ 541.600–541.607)

§ 541.600 Amount of salary required.

(a) To qualify as an exempt executive, administrative or professional employee under section 13(a)(1) of the Act, an employee must be compensated on a salary basis at a rate of not less than \$684 per week [(or \$455 per week if employed in the Commonwealth of the Northern Mariana Islands, Guam, Puerto Rico, or the U.S. Virgin Islands by employers other than the Federal Government, or \$380 per week if employed in American Samoa by employers other than the Federal Government)], exclusive of board, lodging or other facilities. Administrative and professional employees may also be paid on a fee basis, as defined in § 541.605.

(b) The required amount of compensation per week may be translated into equivalent amounts for periods longer than one week. For example, the \$684-per-week requirement will be met if the employee is compensated biweekly on a salary basis of not less than \$1,368, semimonthly on a salary basis of not less than \$1,482, or monthly on a salary basis of not less than \$2,964. However, the shortest period of payment that will meet this compensation requirement is one week.

(c) In the case of academic administrative employees, the compensation requirement also may be met by compensation on a salary basis at a rate at least equal to the entrance salary for teachers in the educational establishment by which the employee is employed, as provided in § 541.204(a)(1).

(d) In the case of computer employees, the compensation requirement also may be met by compensation on an hourly basis at a rate not less than \$27.63 an hour, as provided in § 541.400(b).

(e) In the case of professional employees, the compensation requirements in this section shall not apply to employees engaged as teachers (see § 541.303); employees who hold a valid license or certificate permitting the practice of law or medicine or any of their branches and are actually engaged in the practice thereof (see § 541.304); or to employees who hold the requisite academic degree for the general practice of medicine and are engaged in an internship or resident program pursuant to the practice of the profession (see § 541.304). In the case of medical occupations, the exception from the salary or fee

requirement does not apply to pharmacists, nurses, therapists, technologists, sanitarians, dietitians, social workers, psychologists, psychometrists, or other professions which service the medical profession.

§ 541.601 Highly compensated employees.

(a)(1) Beginning on [January 1, 2020]<<the effective date of these Substantive Regulations>>, an employee with total annual compensation of at least \$107,432 is deemed exempt under section 13(a)(1) of the Act if the employee customarily and regularly performs any one or more of the exempt duties or responsibilities of an executive, administrative or professional employee as identified in subparts B, C or D of this part.

(2) Where the annual period covers periods both prior to and after [January 1, 2020]<<the effective date of these Substantive Regulations>>, the amount of total annual compensation due will be determined on a proportional basis.

(b)(1) "Total annual compensation" must include at least \$684 per week paid on a salary or fee basis as set forth in §§ 541.602 and 541.605, except that 541.602(a)(3) shall not apply to highly compensated employees. Total annual compensation may also include commissions, nondiscretionary bonuses and other nondiscretionary compensation earned during a 52-week period. Total annual compensation does not include board, lodging and other facilities as defined in § 541.606, and does not include payments for medical insurance, payments for life insurance, contributions to retirement plans and the cost of other fringe benefits.

(2) If an employee's total annual compensation does not total at least the amount specified in the applicable subsection of paragraph (a) by the last pay period of the 52-week period, the employer may, during the last pay period or within one month after the end of the 52-week period, make one final payment sufficient to achieve the required level. For example, for a 52-week period [beginning January 1, 2020], an employee may earn \$90,000 in base salary, and the employer may anticipate [based upon past sales] that the employee also will earn \$17,432 in [commissions]<<other payments>>. However, [due to poor sales] in the final quarter of the year, the employee actually only earns \$12,000 in [commissions]<<other payments>>. In this situation, the employer may within one month after the end of the year make a payment of at least \$5,432 to the employee. Any such final payment made after the end of the 52-week period may count only toward the prior year's total annual compensation and not toward the total annual compensation in the year it was paid. If the employer fails to make such a payment, the employee does not qualify as a highly compensated employee, but may still qualify as exempt under subparts B, C, or D of this part.

(3) An employee who does not work a full year for the employer, either because the employee is newly hired after the beginning of the year or ends the employment before the end of the year, may qualify for exemption under this section if the employee receives a pro rata portion of the minimum amount established in paragraph (a) of this section, based upon the number of weeks that the employee will be or has been employed. An employer may make one final payment as under paragraph (b)(2) of this section within one month after the end of employment.

(4) The employer may utilize any 52-week period as the year, such as a calendar year, a fiscal year, or an anniversary of hire year. If the employer does not identify some other year period in advance, the calendar year will apply.

(c) A high level of compensation is a strong indicator of an employee's exempt status, thus eliminating the need for a detailed analysis of the employee's job duties. Thus, a highly compensated employee will qualify for exemption if the employee customarily and regularly performs any one or more of the exempt duties or responsibilities of an executive, administrative or professional employee identified in subparts B, C or D of this part. An employee may qualify as a highly compensated executive employee, for example, if the employee customarily and regularly directs the work of two or more other employees, even though the employee does not meet all of the other requirements for the executive exemption under § 541.100.

(d) This section applies only to employees whose primary duty includes performing office or non-manual work. Thus, for example, non-management production-line workers and non-management employees in maintenance, construction and similar occupations such as carpenters, electricians, mechanics, plumbers, iron workers, craftsmen, operating engineers, longshoremen, construction workers, laborers and other employees who perform work involving repetitive operations with their hands, physical skill and energy are not exempt under this section no matter how highly paid they might be.

§ 541.602 Salary basis.

(a) General rule. An employee will be considered to be paid on a "salary basis" within the meaning of this part if the employee regularly receives each pay period on a weekly, or less frequent basis, a predetermined amount constituting all or part of the employee's compensation, which amount is not subject to reduction because of variations in the quality or quantity of the work performed.

(1) Subject to the exceptions provided in paragraph (b) of this section, an exempt employee must receive the full salary for any week in which the employee performs any work without regard to the number of days or hours worked. Exempt employees need not be paid for any workweek in which they perform no work.

(2) An employee is not paid on a salary basis if deductions from the employee's predetermined compensation are made for absences occasioned by the employer or by the operating requirements of the [business] <<employing office>>. If the employee is ready, willing and able to work, deductions may not be made for time when work is not available.

(3) Up to ten percent of the salary amount required by § 541.600(a) may be satisfied by the payment of nondiscretionary bonuses, incentives and commissions, that are paid annually or more frequently. The employer may utilize any 52-week period as the year, such as a calendar year, a fiscal year, or an anniversary of hire year. If the employer does not identify some other year period in advance, the calendar year will apply. This provision does not apply to highly compensated employees under § 541.601.

(i) If by the last pay period of the 52-week period the sum of the employee's weekly salary plus nondiscretionary bonus, incentive, and commission payments received is less than 52 times the weekly salary amount required by § 541.600(a), the employer may make one final payment sufficient to achieve the required level no later than the next pay period after the end of the year. Any such final payment made after the end of the 52-week period may count only toward the prior year's salary amount and not toward the salary amount in the year it was paid.

(ii) An employee who does not work a full 52-week period for the employer, either because the employee is newly hired after the

beginning of this period or ends the employment before the end of this period, may qualify for exemption if the employee receives a pro rata portion of the minimum amount established in paragraph (a)(3) of this section, based upon the number of weeks that the employee will be or has been employed. An employer may make one final payment as under paragraph (a)(3)(i) of this section within one pay period after the end of employment.

(b) Exceptions. The prohibition against deductions from pay in the salary basis requirement is subject to the following exceptions:

(1) Deductions from pay may be made when an exempt employee is absent from work for one or more full days for personal reasons, other than sickness or disability. Thus, if an employee is absent for two full days to handle personal affairs, the employee's salaried status will not be affected if deductions are made from the salary for two full-day absences. However, if an exempt employee is absent for one and a half days for personal reasons, the employer can deduct only for the one full-day absence.

(2) Deductions from pay may be made for absences of one or more full days occasioned by sickness or disability (including work-related accidents) if the deduction is made in accordance with a bona fide plan, policy or practice of providing compensation for loss of salary occasioned by such sickness or disability. The employer is not required to pay any portion of the employee's salary for full-day absences for which the employee receives compensation under the plan, policy or practice. Deductions for such full-day absences also may be made before the employee has qualified under the plan, policy or practice, and after the employee has exhausted the leave allowance thereunder. Thus, for example, if an employer maintains a short-term disability insurance plan providing salary replacement for 12 weeks starting on the fourth day of absence, the employer may make deductions from pay for the three days of absence before the employee qualifies for benefits under the plan; for the twelve weeks in which the employee receives salary replacement benefits under the plan; and for absences after the employee has exhausted the 12 weeks of salary replacement benefits. [Similarly, an employer may make deductions from pay for absences of one or more full days if salary replacement benefits are provided under a State disability insurance law or under a State workers' compensation law.]

(3) While an employer cannot make deductions from pay for absences of an exempt employee occasioned by jury duty, attendance as a witness or temporary military leave, the employer can offset any amounts received by an employee as jury fees, witness fees or military pay for a particular week against the salary due for that particular week without loss of the exemption.

(4) Deductions from pay of exempt employees may be made for penalties imposed in good faith for infractions of safety rules of major significance. Safety rules of major significance include those relating to the prevention of serious danger in the workplace or to other employees, such as rules prohibiting smoking in explosive plants, oil refineries and coal mines.

(5) Deductions from pay of exempt employees may be made for unpaid disciplinary suspensions of one or more full days imposed in good faith for infractions of workplace conduct rules. Such suspensions must be imposed pursuant to a written policy applicable to all employees. Thus, for example, an employer may suspend an exempt employee without pay for three days for violating a

generally applicable written policy prohibiting sexual harassment. Similarly, an employer may suspend an exempt employee without pay for twelve days for violating a generally applicable written policy prohibiting workplace violence.

(6) An employer is not required to pay the full salary in the initial or terminal week of employment. Rather, an employer may pay a proportionate part of an employee's full salary for the time actually worked in the first and last week of employment. In such weeks, the payment of an hourly or daily equivalent of the employee's full salary for the time actually worked will meet the requirement. However, employees are not paid on a salary basis within the meaning of these regulations if they are employed occasionally for a few days, and the employer pays them a proportionate part of the weekly salary when so employed.

(7) An employer is not required to pay the full salary for weeks in which an exempt employee takes unpaid leave under the Family and Medical Leave Act. Rather, when an exempt employee takes unpaid leave under the Family and Medical Leave Act, an employer may pay a proportionate part of the full salary for time actually worked. For example, if an employee who normally works 40 hours per week uses four hours of unpaid leave under the Family and Medical Leave Act, the employer could deduct 10 percent of the employee's normal salary that week.

(c) When calculating the amount of a deduction from pay allowed under paragraph (b) of this section, the employer may use the hourly or daily equivalent of the employee's full weekly salary or any other amount proportional to the time actually missed by the employee. A deduction from pay as a penalty for violations of major safety rules under paragraph (b)(4) of this section may be made in any amount.

§ 541.603 Effect of improper deductions from salary.

(a) An employer who makes improper deductions from salary shall lose the exemption if the facts demonstrate that the employer did not intend to pay employees on a salary basis. An actual practice of making improper deductions demonstrates that the employer did not intend to pay employees on a salary basis. The factors to consider when determining whether an employer has an actual practice of making improper deductions include, but are not limited to: the number of improper deductions, particularly as compared to the number of employee infractions warranting discipline; the time period during which the employer made improper deductions; the number and geographic location of employees whose salary was improperly reduced; the number and geographic location of managers responsible for taking the improper deductions; and whether the employer has a clearly communicated policy permitting or prohibiting improper deductions.

(b) If the facts demonstrate that the employer has an actual practice of making improper deductions, the exemption is lost during the time period in which the improper deductions were made for employees in the same job classification working for the same managers responsible for the actual improper deductions. Employees in different job classifications or who work for different managers do not lose their status as exempt employees. Thus, for example, if a manager [at a company facility] routinely docks the pay of engineers at that facility for partial-day personal absences, then all engineers at that facility whose pay could have been improperly docked by the manager would lose the exemption; engineers at other facilities or working for other managers, however, would remain exempt.

(c) Improper deductions that are either isolated or inadvertent will not result in loss of the exemption for any employees subject to such improper deductions, if the employer reimburses the employees for such improper deductions.

(d) If an employer has a clearly communicated policy that prohibits the improper pay deductions specified in § 541.602(a) and includes a complaint mechanism, reimburses employees for any improper deductions and makes a good faith commitment to comply in the future, such employer will not lose the exemption for any employees unless the employer willfully violates the policy by continuing to make improper deductions after receiving employee complaints. If an employer fails to reimburse employees for any improper deductions or continues to make improper deductions after receiving employee complaints, the exemption is lost during the time period in which the improper deductions were made for employees in the same job classification working for the same managers responsible for the actual improper deductions. The best evidence of a clearly communicated policy is a written policy that was distributed to employees prior to the improper pay deductions by, for example, providing a copy of the policy to employees at the time of hire, publishing the policy in an employee handbook or publishing the policy on the employer's Intranet.

(e) This section shall not be construed in an unduly technical manner so as to defeat the exemption.

§ 541.604 Minimum guarantee plus extras.

(a) An employer may provide an exempt employee with additional compensation without losing the exemption or violating the salary basis requirement, if the employment arrangement also includes a guarantee of at least the minimum weekly-required amount paid on a salary basis. Thus, for example, an exempt employee guaranteed at least \$684 each week paid on a salary basis may also receive additional compensation of a one percent commission on sales. An exempt employee also may receive a percentage of the sales or profits of the employer if the employment arrangement also includes a guarantee of at least \$684 each week paid on a salary basis. Similarly, the exemption is not lost if an exempt employee who is guaranteed at least \$684 each week paid on a salary basis also receives additional compensation based on hours worked for work beyond the normal workweek. Such additional compensation may be paid on any basis (e.g., flat sum, bonus payment, straight-time hourly amount, time and one-half or any other basis), and may include paid time off.

(b) An exempt employee's earnings may be computed on an hourly, a daily or a shift basis, without losing the exemption or violating the salary basis requirement, if the employment arrangement also includes a guarantee of at least the minimum weekly required amount paid on a salary basis regardless of the number of hours, days or shifts worked, and a reasonable relationship exists between the guaranteed amount and the amount actually earned. The reasonable relationship test will be met if the weekly guarantee is roughly equivalent to the employee's usual earnings at the assigned hourly, daily or shift rate for the employee's normal scheduled workweek. Thus, for example, an exempt employee guaranteed compensation of at least \$725 for any week in which the employee performs any work, and who normally works four or five shifts each week, may be paid \$210 per shift without violating the \$684-per-week salary basis requirement. The reasonable relationship requirement applies only if the employee's pay is computed

on an hourly, daily or shift basis. It does not apply, for example, to an exempt store manager paid a guaranteed salary per week that exceeds the current salary level who also receives a commission of one-half percent of all sales in the store or five percent of the store's profits, which in some weeks may total as much as, or even more than, the guaranteed salary.

§ 541.605 Fee basis.

(a) Administrative and professional employees may be paid on a fee basis, rather than on a salary basis. An employee will be considered to be paid on a "fee basis" within the meaning of these regulations if the employee is paid an agreed sum for a single job regardless of the time required for its completion. These payments resemble piecework payments with the important distinction that generally a "fee" is paid for the kind of job that is unique rather than for a series of jobs repeated an indefinite number of times and for which payment on an identical basis is made over and over again. Payments based on the number of hours or days worked and not on the accomplishment of a given single task are not considered payments on a fee basis.

(b) To determine whether the fee payment meets the minimum amount of salary required for exemption under these regulations, the amount paid to the employee will be tested by determining the time worked on the job and whether the fee payment is at a rate that would amount to at least the minimum salary per week, as required by §§ 541.600(a) and 541.602(a), if the employee worked 40 hours. Thus, an artist paid \$350 for a picture that took 20 hours to complete meets the \$684 minimum salary requirement for exemption since earnings at this rate would yield the artist \$700 if 40 hours were worked.

§ 541.606 Board, lodging or other facilities.

(a) To qualify for exemption under section 13(a)(1) of the Act, an employee must earn the minimum salary amount set forth in § 541.600, "exclusive of board, lodging or other facilities." The phrase "exclusive of board, lodging or other facilities" means "free and clear" or independent of any claimed credit for non-cash items of value that an employer may provide to an employee. Thus, the costs incurred by an employer to provide an employee with board, lodging or other facilities may not count towards the minimum salary amount required for exemption under this part 541. Such separate transactions are not prohibited between employers and their exempt employees, but the costs to employers associated with such transactions may not be considered when determining if an employee has received the full required minimum salary payment.

(b) Regulations defining what constitutes "board, lodging, or other facilities" are contained in 29 CFR part 531. As described in 29 CFR 531.32, the term "other facilities" refers to items similar to board and lodging, such as meals furnished at company restaurants or cafeterias or by hospitals, hotels, or restaurants to their employees; meals, dormitory rooms, and tuition furnished by a college to its student employees; merchandise furnished at company stores or commissaries, including articles of food, clothing, and household effects; housing furnished for dwelling purposes; and transportation furnished to employees for ordinary commuting between their homes and work.

[§ 541.607][Reserved by 85 FR 34970 Effective: June 8, 2020] <<541.607—Reserved.>>

SUBPART H—DEFINITIONS AND MISCELLANEOUS PROVISIONS (§§ 541.700–541.710)

§ 541.700 Primary duty.

(a) To qualify for exemption under this part, an employee's "primary duty" must be

the performance of exempt work. The term "primary duty" means the principal, main, major or most important duty that the employee performs. Determination of an employee's primary duty must be based on all the facts in a particular case, with the major emphasis on the character of the employee's job as a whole. Factors to consider when determining the primary duty of an employee include, but are not limited to, the relative importance of the exempt duties as compared with other types of duties; the amount of time spent performing exempt work; the employee's relative freedom from direct supervision; and the relationship between the employee's salary and the wages paid to other employees for the kind of nonexempt work performed by the employee.

(b) The amount of time spent performing exempt work can be a useful guide in determining whether exempt work is the primary duty of an employee. Thus, employees who spend more than 50 percent of their time performing exempt work will generally satisfy the primary duty requirement. Time alone, however, is not the sole test, and nothing in this section requires that exempt employees spend more than 50 percent of their time performing exempt work. Employees who do not spend more than 50 percent of their time performing exempt duties may nonetheless meet the primary duty requirement if the other factors support such a conclusion.

(c) Thus, for example, assistant managers in a retail establishment who perform exempt executive work such as supervising and directing the work of other employees, ordering merchandise, managing the budget and authorizing payment of bills may have management as their primary duty even if the assistant managers spend more than 50 percent of the time performing nonexempt work such as running the cash register. However, if such assistant managers are closely supervised and earn little more than the nonexempt employees, the assistant managers generally would not satisfy the primary duty requirement.

§ 541.701 Customarily and regularly.

The phrase "customarily and regularly" means a frequency that must be greater than occasional but which, of course, may be less than constant. Tasks or work performed "customarily and regularly" includes work normally and recurrently performed every workweek; it does not include isolated or one-time tasks.

§ 541.702 Exempt and nonexempt work.

The term "exempt work" means all work described in §§ 541.100, 541.101, 541.200, 541.300, 541.301, 541.302, 541.303, 541.304, <<and>> 541.400 [and 541.500], and the activities directly and closely related to such work. All other work is considered "nonexempt."

§ 541.703 Directly and closely related.

(a) Work that is "directly and closely related" to the performance of exempt work is also considered exempt work. The phrase "directly and closely related" means tasks that are related to exempt duties and that contribute to or facilitate performance of exempt work. Thus, "directly and closely related" work may include physical tasks and menial tasks that arise out of exempt duties, and the routine work without which the exempt employee's exempt work cannot be performed properly. Work "directly and closely related" to the performance of exempt duties may also include recordkeeping; monitoring and adjusting machinery; taking notes; using the computer to create documents or presentations; opening the mail for the purpose of reading it and making decisions; and using a photocopier or fax machine. Work is not "directly and closely related" if the work is remotely related or completely unrelated to exempt duties.

(b) The following examples further illustrate the type of work that is and is not normally considered as directly and closely related to exempt work:

(1) Keeping time, production or sales records for subordinates is work directly and closely related to an exempt executive's function of managing a department and supervising employees.

(2) The distribution of materials, merchandise or supplies to maintain control of the flow of and expenditures for such items is directly and closely related to the performance of exempt duties.

(3) A supervisor who spot checks and examines the work of subordinates to determine whether they are performing their duties properly, and whether the product is satisfactory, is performing work which is directly and closely related to managerial and supervisory functions, so long as the checking is distinguishable from the work ordinarily performed by a nonexempt inspector.

(4) A supervisor who sets up a machine may be engaged in exempt work, depending upon the nature of the industry and the operation. In some cases the setup work, or adjustment of the machine for a particular job, is typically performed by the same employees who operate the machine. Such setup work is part of the production operation and is not exempt. In other cases, the setting up of the work is a highly skilled operation which the ordinary production worker or machine tender typically does not perform. In large plants, non-supervisors may perform such work. However, particularly in small plants, such work may be a regular duty of the executive and is directly and closely related to the executive's responsibility for the work performance of subordinates and for the adequacy of the final product. Under such circumstances, it is exempt work.

(5) A department manager in a retail or service establishment who walks about the sales floor observing the work of sales personnel under the employee's supervision to determine the effectiveness of their sales techniques, checks on the quality of customer service being given, or observes customer preferences is performing work which is directly and closely related to managerial and supervisory functions.

(6) A business consultant may take extensive notes recording the flow of work and materials through the office or plant of the client; after returning to the office of the employer, the consultant may personally use the computer to type a report and create a proposed table of organization. Standing alone, or separated from the primary duty, such note-taking and typing would be routine in nature. However, because this work is necessary for analyzing the data and making recommendations, the work is directly and closely related to exempt work. While it is possible to assign note-taking and typing to nonexempt employees, and in fact it is frequently the practice to do so, delegating such routine tasks is not required as a condition of exemption.

(7) A [credit] manager who makes and administers the [credit]<<budget>> policy of the [employer]<<employing office>>, establishes [credit]<<spending>> limits for [customers]<<the employing office>>, <<and>> authorizes [the shipment of orders on credit, and makes decisions on whether to exceed credit limits]<<expenditures>> would be performing work exempt under § 541.200. Work that is directly and closely related to these exempt duties may include checking the status of accounts to determine whether the credit limit would be exceeded by the shipment of a new order, removing credit reports from the files for analysis, and writing letters giving credit data and experience to other employers or credit agencies.

(8) A traffic manager in charge of planning a company's transportation, including the most economical and quickest routes for shipping merchandise to and from the plant, contracting for common-carrier and other transportation facilities, negotiating with carriers for adjustments for damages to merchandise, and making the necessary rearrangements resulting from delays, damages or irregularities in transit, is performing exempt work. If the employee also spends part of the day taking telephone orders for local deliveries, such order-taking is a routine function and is not directly and closely related to the exempt work.

(9) An example of work directly and closely related to exempt professional duties is a chemist performing menial tasks such as cleaning a test tube in the middle of an original experiment, even though such menial tasks can be assigned to laboratory assistants.

(10) A teacher performs work directly and closely related to exempt duties when, while taking students on a field trip, the teacher drives a school van or monitors the students' behavior in a restaurant.

§ 541.704 Use of manuals.

The use of manuals, guidelines or other established procedures containing or relating to highly technical, scientific, legal, financial or other similarly complex matters that can be understood or interpreted only by those with advanced or specialized knowledge or skills does not preclude exemption under section 13(a)(1) of the Act or the regulations in this part. Such manuals and procedures provide guidance in addressing difficult or novel circumstances and thus use of such reference material would not affect an employee's exempt status. The section 13(a)(1) exemptions are not available, however, for employees who simply apply well-established techniques or procedures described in manuals or other sources within closely prescribed limits to determine the correct response to an inquiry or set of circumstances.

§ 541.705 Trainees.

The executive, administrative, professional, [outside sales] and computer employee exemptions do not apply to employees training for employment in an executive, administrative, professional, [outside sales] or computer employee capacity who are not actually performing the duties of an executive, administrative, professional, [outside sales] or computer employee.

§ 541.706 Emergencies.

(a) An exempt employee will not lose the exemption by performing work of a normally nonexempt nature because of the existence of an emergency. Thus, when emergencies arise that threaten the safety of employees, a cessation of operations or serious damage to the employer's property, any work performed in an effort to prevent such results is considered exempt work.

(b) An "emergency" does not include occurrences that are not beyond control or for which the employer can reasonably provide in the normal course of business. Emergencies generally occur only rarely, and are events that the employer cannot reasonably anticipate.

(c) The following examples illustrate the distinction between emergency work considered exempt work and routine work that is not exempt work:

(1) [A mine superintendent who pitches in after an explosion and digs out workers who are trapped in the mine is still a bona fide executive.] <<Reserved.>>

(2) Assisting nonexempt employees with their work during periods of heavy workload or to handle rush orders is not exempt work.

(3) Replacing a nonexempt employee during the first day or partial day of an illness may be considered exempt emergency work depending on factors such as the size of the [establishment]<<location>> and of the executive's department, the nature of the [industry]<<work performed by the employing office>>, the consequences that would flow from the failure to replace the ailing employee immediately, and the feasibility of filling the employee's place promptly.

(4) Regular repair and cleaning of equipment is not emergency work, even when necessary to prevent fire or explosion; however, repairing equipment may be emergency work if the breakdown of or damage to the equipment was caused by accident or carelessness that the employer could not reasonably anticipate.

§ 541.707 Occasional tasks.

Occasional, infrequently recurring tasks that cannot practically be performed by nonexempt employees, but are the means for an exempt employee to properly carry out exempt functions and responsibilities, are considered exempt work. The following factors should be considered in determining whether such work is exempt work: Whether the same work is performed by any of the exempt employee's subordinates; practicability of delegating the work to a nonexempt employee; whether the exempt employee performs the task frequently or occasionally; and existence of an industry practice for the exempt employee to perform the task.

§ 541.708 Combination exemptions.

Employees who perform a combination of exempt duties as set forth in the regulations in this part for executive, administrative, professional, [outside sales] and computer employees may qualify for exemption. Thus, for example, an employee whose primary duty involves a combination of exempt administrative and exempt executive work may qualify for exemption. In other words, work that is exempt under one section of this part will not defeat the exemption under any other section.

§ [541.709 Motion picture producing industry.

The requirement that the employee be paid "on a salary basis" does not apply to an employee in the motion picture producing industry who is compensated at a base rate of at least \$1,043 per week (exclusive of board, lodging, or other facilities). Thus, an employee in this industry who is otherwise exempt under subparts B, C, or D of this part, and who is employed at a base rate of at least the applicable current minimum amount a week is exempt if paid a proportionate amount (based on a week of not more than 6 days) for any week in which the employee does not work a full workweek for any reason. Moreover, an otherwise exempt employee in this industry qualifies for exemption if the employee is employed at a daily rate under the following circumstances:

(a) The employee is in a job category for which a weekly base rate is not provided and the daily base rate would yield at least the minimum weekly amount if 6 days were worked; or

(b) The employee is in a job category having the minimum weekly base rate and the daily base rate is at least one-sixth of such weekly base rate.] <<541.709 Reserved.>>

§ 541.710 [Employees of public agencies]<<Effect of certain deductions on exempt employee pay>>.

(a) An employee [of a public agency] who otherwise meets the salary basis requirements of § 541.602 shall not be disqualified from exemption under §§ 541.100, 541.200, 541.300 or 541.400 on the basis that such employee is paid according to a pay system es-

tablished by statute, ordinance or regulation, or by a policy or practice established pursuant to principles of public accountability, under which the employee accrues personal leave and sick leave and which requires the [public agency] employee's pay to be reduced or such employee to be placed on leave without pay for absences for personal reasons or because of illness or injury of less than one work-day when accrued leave is not used by an employee because:

(1) Permission for its use has not been sought or has been sought and denied;

(2) Accrued leave has been exhausted; or

(3) The employee chooses to use leave without pay.

(b) Deductions from the pay of an employee [of a public agency] for absences due to a budget-required furlough shall not disqualify the employee from being paid on a salary basis except in the workweek in which the furlough occurs and for which the employee's pay is accordingly reduced.

TECHNOLOGICAL HAZARDS PREPAREDNESS AND TRAINING ACT OF 2022

Mr. SCHUMER. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 440, S. 4166.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (S. 4166) to authorize preparedness programs to support communities containing technological hazards and emerging threats.

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Homeland Security and Governmental Affairs, with amendments, as follows:

(The parts of the bill intended to be stricken are shown in boldface brackets, and the parts of the bill intended to be inserted are shown in italics.)

S. 4166

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Technological Hazards Preparedness and Training Act of 2022".

SEC. 2. DEFINITIONS.

In this Act:

(1) ADMINISTRATOR.—The term "Administrator" means the Administrator of the Federal Emergency Management Agency.

(2) INDIAN TRIBAL GOVERNMENT.—The term "Indian Tribal government" has the meaning given the term "Indian tribal government" in section 102 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5122).

(3) LOCAL GOVERNMENT; STATE.—The terms "local government" and "State" have the [meaning] meanings given those terms in section 102 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5122).

(4) TECHNOLOGICAL HAZARD AND RELATED EMERGING THREAT.—The term "technological hazard and related emerging threat"—

(A) means a hazard that involves materials created by humans that pose a unique hazard to the general public and environment and which may result from—

(i) an accident;

(ii) an emergency caused by another hazard; or

(iii) intentional use of the hazardous materials; and

(B) includes a chemical, radiological, biological, and nuclear hazard.

SEC. 3. ASSISTANCE AND TRAINING FOR COMMUNITIES WITH TECHNOLOGICAL HAZARDS AND RELATED EMERGING THREATS.

(a) IN GENERAL.—The Administrator shall maintain the capacity to provide States and local governments with technological hazards and related emerging threats technical assistance, training, and other preparedness programming to build community resilience to technological hazards and related emerging threats.

(b) AUTHORITIES.—The Administrator shall carry out subsection (a) in accordance with—

(1) the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et seq.);

(2) section 1236 of the Disaster Recovery Reform Act of 2018 (42 U.S.C. 5196g); and

(3) the Post-Katrina Emergency Management Reform Act of 2006 (Public Law 109-295; 120 Stat. 1394).

(c) ASSESSMENT AND NOTIFICATION.—In carrying out subsection (a), the Administrator shall—

(1) use any available and appropriate multi-hazard risk assessment and mapping tools and capabilities to identify the communities that have the highest risk of and vulnerability to a technological hazard in each State; and

(2) ensure each State and Indian Tribal government is aware of—

(A) the communities identified under paragraph (1); and

(B) the availability of programming under this section for—

(i) technological hazards and related emerging threats preparedness; and

(ii) building community capability.

(d) REPORT.—Not later than 1 year after the date of enactment of this Act, and annually thereafter, the Administrator shall submit to the Committee on Homeland Security and Governmental Affairs of the Senate, the Committee on Appropriations of the Senate, the Committee on Homeland Security of the House of Representatives, the Committee on Appropriations of the House of Representatives, and the Committee on Transportation and Infrastructure of the House of Representatives a report relating to—

(1) actions taken to implement this section; and

(2) technological hazards and related emerging threats preparedness programming provided under this section during the 1-year period preceding the date of submission of the report.

(e) CONSULTATION.—The Secretary of Homeland Security may seek continuing input relating to technological hazards and related emerging threats preparedness needs by consulting State, Tribal, [Territorial] territorial, and local emergency services organizations and private sector stakeholders.

SEC. 4. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to carry out this Act \$20,000,000 for each of fiscal years 2023 through 2024.

SEC. 5. SAVINGS PROVISION.

Nothing in this Act shall diminish or divert resources from—

(1) the full completion of federally-led chemical surety material storage missions or chemical demilitarization missions that are underway as of the date of enactment of this Act; or

(2) any transitional activities or other community assistance incidental to the completion of the missions described in paragraph (1).

Mr. SCHUMER. Mr. President, I ask unanimous consent that the committee-reported amendments be agreed

to, the bill, as amended, be considered read a third time and passed, and that the motion to reconsider be considered made and laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee-reported amendments were agreed to.

The bill (S. 4166), as amended, was ordered to be engrossed for a third reading, was read the third time, and passed as follows:

S. 4166

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Technological Hazards Preparedness and Training Act of 2022”.

SEC. 2. DEFINITIONS.

In this Act:

(1) **ADMINISTRATOR.**—The term “Administrator” means the Administrator of the Federal Emergency Management Agency.

(2) **INDIAN TRIBAL GOVERNMENT.**—The term “Indian Tribal government” has the meaning given the term “Indian tribal government” in section 102 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5122).

(3) **LOCAL GOVERNMENT; STATE.**—The terms “local government” and “State” have the meanings given those terms in section 102 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5122).

(4) **TECHNOLOGICAL HAZARD AND RELATED EMERGING THREAT.**—The term “technological hazard and related emerging threat”—

(A) means a hazard that involves materials created by humans that pose a unique hazard to the general public and environment and which may result from—

- (i) an accident;
- (ii) an emergency caused by another hazard; or
- (iii) intentional use of the hazardous materials; and

(B) includes a chemical, radiological, biological, and nuclear hazard.

SEC. 3. ASSISTANCE AND TRAINING FOR COMMUNITIES WITH TECHNOLOGICAL HAZARDS AND RELATED EMERGING THREATS.

(a) **IN GENERAL.**—The Administrator shall maintain the capacity to provide States and local governments with technological hazards and related emerging threats technical assistance, training, and other preparedness programming to build community resilience to technological hazards and related emerging threats.

(b) **AUTHORITIES.**—The Administrator shall carry out subsection (a) in accordance with—

- (1) the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et seq.);
- (2) section 1236 of the Disaster Recovery Reform Act of 2018 (42 U.S.C. 5196g); and
- (3) the Post-Katrina Emergency Management Reform Act of 2006 (Public Law 109-295; 120 Stat. 1394).

(c) **ASSESSMENT AND NOTIFICATION.**—In carrying out subsection (a), the Administrator shall—

- (1) use any available and appropriate multi-hazard risk assessment and mapping tools and capabilities to identify the communities that have the highest risk of and vulnerability to a technological hazard in each State; and
- (2) ensure each State and Indian Tribal government is aware of—

(A) the communities identified under paragraph (1); and

(B) the availability of programming under this section for—

- (i) technological hazards and related emerging threats preparedness; and
- (ii) building community capability.

(d) **REPORT.**—Not later than 1 year after the date of enactment of this Act, and annually thereafter, the Administrator shall submit to the Committee on Homeland Security and Governmental Affairs of the Senate, the Committee on Appropriations of the Senate, the Committee on Homeland Security of the House of Representatives, the Committee on Appropriations of the House of Representatives, and the Committee on Transportation and Infrastructure of the House of Representatives a report relating to—

(1) actions taken to implement this section; and

(2) technological hazards and related emerging threats preparedness programming provided under this section during the 1-year period preceding the date of submission of the report.

(e) **CONSULTATION.**—The Secretary of Homeland Security may seek continuing input relating to technological hazards and related emerging threats preparedness needs by consulting State, Tribal, territorial, and local emergency services organizations and private sector stakeholders.

SEC. 4. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to carry out this Act \$20,000,000 for each of fiscal years 2023 through 2024.

SEC. 5. SAVINGS PROVISION.

Nothing in this Act shall diminish or divert resources from—

(1) the full completion of federally-led chemical surety material storage missions or chemical demilitarization missions that are underway as of the date of enactment of this Act; or

(2) any transitional activities or other community assistance incidental to the completion of the missions described in paragraph (1).

COMMUNITY DISASTER RESILIENCE ZONES ACT OF 2022

Mr. SCHUMER. Mr. President, I ask unanimous consent the Senate proceed to the immediate consideration of Calendar No. 479, S. 3875.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (S. 3875) to require the President to develop and maintain products that show the risk of natural hazards across the United States, and for other purposes.

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Homeland Security and Governmental Affairs, with an amendment to strike all after the enacting clause and insert in lieu thereof the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the “Community Disaster Resilience Zones Act of 2022”.

SEC. 2. FINDINGS.

Section 101(b) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121(b)) is amended—

(1) in paragraph (5), by striking “and” at the end;

(2) in paragraph (6), by adding “; and” at the end; and

(3) by adding at the end the following:

“(7) identifying and improving the climate and natural hazard resilience of vulnerable communities.”.

SEC. 3. NATURAL HAZARD RISK ASSESSMENT.

(a) **IN GENERAL.**—Title II of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5131 et seq.) is amended by adding at the end the following:

“SEC. 206. NATURAL HAZARD RISK ASSESSMENT.

“(a) **DEFINITIONS.**—In this section:

“(1) **COMMUNITY DISASTER RESILIENCE ZONE.**—The term ‘community disaster resilience zone’ means a census tract designated by the President under subsection (d)(1).

“(2) **ELIGIBLE ENTITY.**—The term ‘eligible entity’ means—

“(A) a State;

“(B) an Indian tribal government; or

“(C) a local government.

“(b) **PRODUCTS.**—The President shall continue to maintain a natural hazard assessment program that develops and maintains products that—

“(1) are available to the public; and

“(2) define natural hazard risk across the United States.

“(c) **FEATURES.**—The products maintained under subsection (b) shall, for lands within States and areas under the jurisdiction of Indian tribal governments—

“(1) show the risk of natural hazards; and

“(2) include ratings and data for—

“(A) loss exposure, including population equivalence, buildings, and agriculture;

“(B) social vulnerability;

“(C) community resilience; and

“(D) any other element determined by the President.

“(d) **COMMUNITY DISASTER RESILIENCE ZONES DESIGNATION.**—

“(1) **IN GENERAL.**—Not later than 30 days after the date on which the President makes the update and enhancement required under subsection (e)(4), and not less frequently than every 5 years thereafter, the President shall identify and designate community disaster resilience zones, which shall be—

“(A) the 50 census tracts assigned the highest individual hazard risk ratings; and

“(B) subject to paragraph (3), in each State, not less than 1 percent of census tracts that are assigned high individual risk ratings.

“(2) **RISK RATINGS.**—In carrying out paragraph (1), the President shall use census tract risk ratings derived from a product maintained under subsection (b) that—

“(A) reflect—

“(i) high levels of individual hazard risk ratings based on an assessment of the intersection of—

“(I) loss to population equivalence;

“(II) building value; and

“(III) agriculture value;

“(ii) high social vulnerability ratings and low community resilience ratings; and

“(iii) any other elements determined by the President; and

“(B) reflect the principal natural hazard risks identified for the respective census tracts.

“(3) **GEOGRAPHIC BALANCE.**—In identifying and designating the community disaster resilience zones described in paragraph (1)(B)—

“(A) for the purpose of achieving geographic balance, when applicable, the President shall consider making designations in coastal, inland, urban, suburban, and rural areas; and

“(B) the President shall include census tracts on Tribal lands located within a State.

“(4) **DURATION.**—The designation of a community disaster resilience zone under paragraph (1) shall be effective for a period of not less than 5 years.

“(e) **REVIEW AND UPDATE.**—Not later than 180 days after the date of enactment of the Community Disaster Resilience Zones Act of 2022, and not less frequently than every 5 years thereafter, the President shall—

“(1) with respect to any product that is a natural hazard risk assessment—

“(A) review the underlying methodology of the product; and

“(B) receive public input on the methodology and data used for the product;

“(2) consider including additional data in any product that is a natural hazard risk assessment, such as—

“(A) the most recent census tract data;

“(B) data from the American Community Survey of the Bureau of the Census, a successor survey, a similar survey, or another data source, including data by census tract on housing characteristics and income;

“(C) information relating to development, improvements, and hazard mitigation measures;

“(D) data that assesses past and future loss exposure, including analysis on the effects of a changing climate on future loss exposure;

“(E) data from the Resilience Analysis and Planning Tool of the Federal Emergency Management Agency; and

“(F) other information relevant to prioritizing areas that have—

“(i) high risk levels of—

“(I) natural hazard loss exposure, including population equivalence, buildings, infrastructure, and agriculture; and

“(II) social vulnerability; and

“(ii) low levels of community resilience;

“(3) make publicly available any changes in methodology or data used to inform an update to a product maintained under subsection (b); and

“(4) update and enhance the products maintained under subsection (b), as necessary.

“(f) NATURAL HAZARD RISK ASSESSMENT INSIGHTS.—In determining additional data to include in products that are natural hazard risk assessments under subsection (e)(2), the President shall consult with, at a minimum—

“(1) the Administrator of the Federal Emergency Management Agency;

“(2) the Secretary of Agriculture and the Chief of the Forest Service;

“(3) the Secretary of Commerce, the Administrator of the National Oceanic and Atmospheric Administration, the Director of the Bureau of the Census, and the Director of the National Institute of Standards and Technology;

“(4) the Secretary of Defense and the Commanding Officer of the United States Army Corps of Engineers;

“(5) the Administrator of the Environmental Protection Agency;

“(6) the Secretary of the Interior and the Director of the United States Geological Survey;

“(7) the Secretary of Housing and Urban Development; and

“(8) the Director of the Federal Housing Finance Agency.

“(g) COMMUNITY DISASTER RESILIENCE ZONE.—With respect to financial assistance provided under section 203(i) to perform a resilience or mitigation project within, or that primarily benefits, a community disaster resilience zone, the President may increase the amount of the Federal share described under section 203(h) to not more than 90 percent of the total cost of the resilience or mitigation project.

“(h) RESILIENCE OR MITIGATION PROJECT PLANNING ASSISTANCE.—

“(1) IN GENERAL.—The President may provide financial, technical, or other assistance under this title to an eligible entity that plans to perform a resilience or mitigation project within, or that primarily benefits, a community disaster resilience zone.

“(2) PURPOSE.—The purpose of assistance provided under paragraph (1) shall be to carry out activities in preparation for a resilience or mitigation project or seek an evaluation and certification under subsection (i)(2) for a resilience or mitigation project before the date on which permanent work of the resilience or mitigation project begins.

“(3) APPLICATION.—If required by the President, an eligible entity seeking assistance under paragraph (1) shall submit an application in accordance with subsection (i)(1).

“(4) FUNDING.—In providing assistance under paragraph (1), the President may use amounts set aside under section 203(i).

“(i) COMMUNITY DISASTER RESILIENCE ZONE PROJECT APPLICATIONS.—

“(1) IN GENERAL.—If required by the President or other Federal law, an eligible entity shall submit to the President an application at such time, in such manner, and containing or accompanied by such information as the President may reasonably require.

“(2) EVALUATION AND CERTIFICATION.—

“(A) IN GENERAL.—Not later than 120 days after the date on which an eligible entity submits an application under paragraph (1), the President shall evaluate the application to determine whether the resilience or mitigation project that the entity plans to perform within, or that primarily benefits, a community disaster resilience zone—

“(i) meets or exceeds hazard-resistant, consensus-based codes, specifications, and standards;

“(ii) is designed to reduce injuries, loss of life, and damage and destruction of property, such as damage to critical services and facilities; and

“(iii) substantially reduces the risk of, or increases resilience to, future damage, hardship, loss, or suffering.

“(B) CERTIFICATION.—If the President determines that an application submitted under paragraph (1) meets the criteria described in subparagraph (A), the President shall certify the proposed resilience or mitigation project.

“(C) EFFECT OF CERTIFICATION.—The certification of a proposed resilience or mitigation project under subparagraph (B) shall not be construed to exempt the resilience or mitigation project from the requirements of any other law.

“(3) PROJECTS CAUSING DISPLACEMENT.—With respect to a resilience or mitigation project certified under paragraph (2)(B) that involves the displacement of a resident from any occupied housing unit, the entity performing the resilience or mitigation project shall—

“(A) provide, at the option of the resident, a suitable and habitable housing unit that is, with respect to the housing unit from which the resident is displaced—

“(i) of a comparable size;

“(ii) located in the same local community or a community with reduced hazard risk; and

“(iii) offered under similar costs, conditions, and terms;

“(B) ensure that property acquisitions resulting from the displacement and made in connection with the resilience or mitigation project—

“(i) are deed restricted in perpetuity to preclude future property uses not relating to mitigation or resilience; and

“(ii) are the result of a voluntary decision by the resident; and

“(C) plan for robust public participation in the resilience or mitigation project.”

(b) NATIONAL RISK INDEX FUNDING.—Nothing in section 206 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, as added by subsection (a) of this section, shall be construed to prohibit the Administrator of the Federal Emergency Management Agency from using amounts available to maintain and update the National Risk Index until the earlier of—

(1) the date on which those amounts are transferred to another source; and

(2) 3 years after the date of enactment of this Act.

Mr. SCHUMER. Mr. President, I ask that the committee-reported substitute amendment be withdrawn, the Peters substitute amendment, which is at the desk, be considered and agreed to, that the bill, as amended, be considered and read a third time and passed, and the motion to reconsider be considered made and laid upon the table with no intervening action or debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee-reported amendment in the nature of a substitute was withdrawn.

The amendment (No. 6026), in the nature of a substitute, was agreed to as follows:

(The amendment is printed in today's RECORD under "Text of Amendments.")

The bill (S. 3875), as amended, was ordered to be engrossed for a third reading, was read the third time, and passed.

CAPTAIN ROSEMARY BRYANT MARINER OUTPATIENT CLINIC

Mr. SCHUMER. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of H.R. 7698, which was received from the House and is at the desk.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (H.R. 7698) to designate the outpatient clinic of the Department of Veterans Affairs in Ventura, California, as the "Captain Rosemary Bryant Mariner Outpatient Clinic".

There being no objection, the Senate proceeded to consider the bill.

Mr. SCHUMER. Mr. President, I ask unanimous consent that the bill be considered read a third time and passed and the motion to reconsider be considered made and laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (H.R. 7698) was ordered to a third reading, was read the third time, and passed.

NATIONAL HYDROGEN AND FUEL CELL DAY

Mr. SCHUMER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration and the Senate now proceed to S. Res. 765.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 765) designating October 8, 2022, as "National Hydrogen and Fuel Cell Day".

There being no objection, the committee was discharged and the Senate proceeded to consider the resolution.

Mr. SCHUMER. I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, and the motions to reconsider be considered made and laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 765) was agreed to.

The preamble was agreed to.

(The resolution, with its preamble, is printed in the RECORD of September 15, 2022, under "Submitted Resolutions.")

RESOLUTIONS SUBMITTED TODAY

Mr. SCHUMER. I ask unanimous consent that the Senate now proceed to the en bloc consideration of the following Senate resolutions introduced

earlier today: S. Res. 804, S. Res. 805, S. Res. 806, and S. Res. 807.

There being no objection, the Senate proceeded to consider the resolutions en bloc.

Mr. SCHUMER. I ask unanimous consent that the resolutions be agreed to, that the preambles be agreed to, and that the motions to reconsider be considered made and laid upon the table, all en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolutions were agreed to.

The preambles were agreed to.

(The resolutions, with their preambles, are printed in today's RECORD under "Submitted Resolutions.")

APPOINTMENTS

PRESIDING OFFICER. The Chair, on behalf of the President pro tempore, pursuant to provisions of Public Law 110-315, announces the re-appointment of the following individual to be a member of the National Advisory Committee on Institutional Quality and Integrity: Dr. Claude Pressnell, of Tennessee.

The Chair, on behalf of the Majority Leader, pursuant to the provisions of Public Law 117-140, appoints the following individuals to serve as members of the Commission to Study the Potential Creation of a National Museum of Asian Pacific American History and Culture: Kevin Kim, of New York; Joanne Kwong, of New York.

DISASTER ASSISTANCE FOR RURAL COMMUNITIES ACT

Mr. SCHUMER. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 278, S. 1617.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (S. 1617) to modify the requirements for the Administrator of the Small Business Administration relating to declaring a disaster in a rural area, and for other purposes.

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Small Business and Entrepreneurship, with an amendment to strike all after the enacting clause and insert in lieu thereof the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Disaster Assistance for Rural Communities Act".

SEC. 2. DISASTER DECLARATION IN RURAL AREAS.

(a) IN GENERAL.—Section 7(b) of the Small Business Act (15 U.S.C. 636(b)) is amended by inserting after paragraph (15) the following:

"(16) DISASTER DECLARATION IN RURAL AREAS.—

"(A) DEFINITIONS.—In this paragraph—

"(i) the term 'rural area' means any county or other political subdivision of a State, the District of Columbia, or a territory or possession of the United States that is designated as a rural area by the Bureau of the Census; and

"(ii) the term 'significant damage' means, with respect to property, uninsured losses of not

less than 40 percent of the estimated fair replacement value or pre-disaster fair market value of the damaged property, whichever is lower.

"(B) DISASTER DECLARATION.—For the purpose of making loans under paragraph (1) or (2), the Administrator may declare a disaster in a rural area for which a major disaster was declared by the President under section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5170) and for which individual assistance was not authorized under section 408 of such Act (42 U.S.C. 5174) if—

"(i) the Governor of the State or the Chief Executive of the Indian tribal government in which the rural area is located requests such a declaration; and

"(ii) any home, small business concern, private nonprofit organization, or small agricultural cooperative has incurred significant damage in the rural area.

"(C) SBA REPORT.—Not later than 120 days after the date of enactment of this paragraph, and every year thereafter, the Administrator shall submit to the Committee on Small Business and Entrepreneurship of the Senate and the Committee on Small Business of the House of Representatives a report on, with respect to the 1-year period preceding submission of the report—

"(i) any economic injury that resulted from a major disaster declared by the President under section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5170) in a rural area;

"(ii) each request for assistance made by the Governor of a State or the Chief Executive of an Indian tribal government under subparagraph (B)(i) and the response of the Administrator, including the timeline for each response; and

"(iii) any regulatory changes that will impact the ability of communities in rural areas to obtain disaster assistance under this subsection."

(b) REGULATIONS.—Not later than 120 days after the date of enactment of this Act, the Administrator of the Small Business Administration shall issue regulations to carry out the amendment made by subsection (a).

(c) GAO REPORT.—

(1) DEFINITION OF RURAL AREA.—In this subsection, the term "rural area" means any county or other political subdivision of a State, the District of Columbia, or a territory or possession of the United States that is designated as a rural area by the Bureau of the Census.

(2) REPORT.—Not later than 1 year after the date of enactment of this Act, the Comptroller General of the United States shall submit to the Committee on Small Business and Entrepreneurship of the Senate and the Committee on Small Business of the House of Representatives a report on—

(A) any unique challenges that communities in rural areas face compared to communities in urbanized areas when seeking to obtain disaster assistance under section 7(b) of the Small Business Act (15 U.S.C. 636(b)); and

(B) legislative recommendations for improving access to disaster assistance for communities in rural areas.

Mr. SCHUMER. I further ask unanimous consent that the committee-reported substitute amendment be agreed to.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee-reported amendment, in the nature of a substitute, was agreed to.

Mr. SCHUMER. I ask unanimous consent that the bill, as amended, be considered read a third time.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill, as amended, was ordered to be engrossed for a third reading and was read the third time.

Mr. SCHUMER. I know of no further debate on the bill, as amended.

The PRESIDING OFFICER. If there is no further debate, and the bill having been read the third time, the question is, Shall the bill pass?

The bill (S. 1617), as amended, was passed.

Mr. SCHUMER. Finally, I ask unanimous consent that the motion to reconsider be considered made and laid upon the table with no intervening action or debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

SMALL BUSINESS CYBER TRAINING ACT OF 2022

Mr. SCHUMER. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 393, S. 1687.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (S. 1687) to amend section 21 of the Small Business Act to require cyber certification for small business development center counselors, and for other purposes.

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Small Business and Entrepreneurship, with an amendment to strike all after the enacting clause and insert in lieu thereof the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Small Business Cyber Training Act of 2022".

SEC. 2. DUTIES OF SMALL BUSINESS DEVELOPMENT CENTER COUNSELORS.

(a) CYBER TRAINING.—Section 21 of the Small Business Act (15 U.S.C. 648) is amended by adding at the end the following:

"(o) CYBER STRATEGY TRAINING FOR SMALL BUSINESS DEVELOPMENT CENTERS.—

"(1) DEFINITIONS.—In this subsection—

"(A) the term 'cyber strategy' means resources and tactics to assist in planning for cybersecurity and defending against cyber risks and attacks; and

"(B) the term 'lead small business development center' means a small business development center that receives reimbursement from the Administrator under paragraph (5).

"(2) CERTIFICATION PROGRAM.—The Administrator shall establish a cyber counseling certification program, or designate 1 or more substantially similar governmental or private cybersecurity certification programs, to certify the employees of lead small business development centers in providing cyber planning assistance to small business concerns.

"(3) NUMBER OF CERTIFIED EMPLOYEES.—The Administrator shall ensure that the number of employees of each lead small business development center who are certified in providing cyber planning assistance is not less than the lesser of—

"(A) 5; or

"(B) 10 percent of the total number of employees of the lead small business development center.

"(4) CYBER STRATEGY.—In carrying out paragraph (2), the Administrator, to the extent practicable, shall consider any cyber strategy methods included in the Small Business Development Center Cyber Strategy developed under section

1841(a)(3)(B) of the National Defense Authorization Act for Fiscal Year 2017 (Public Law 114-328; 130 Stat. 2662).

“(5) REIMBURSEMENT FOR CERTIFICATION.—

“(A) IN GENERAL.—Subject to the availability of appropriations, the Administrator shall reimburse each lead small business development center for costs relating to the certification of 1 or more employees of the lead small business center in providing cyber planning assistance under a program established or designated under paragraph (2).

“(B) LIMITATION.—The total amount reimbursed by the Administrator under subparagraph (A) may not exceed \$350,000 in any fiscal year.

“(6) FUNDING UNDER SBDC PROGRAM.—Amounts made available to fund grants under this section for fiscal year 2022, and each fiscal year thereafter, shall be available for reimbursements under this subsection.”

(b) IMPLEMENTATION.—Not later than 180 days after the date of enactment of this Act, the Administrator of the Small Business Administration shall implement paragraphs (2), (3), and (4) of section 21(o) of the Small Business Act, as added by subsection (a).

Mr. SCHUMER. I further ask that the committee-reported substitute amendment be agreed to.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee-reported amendment in the nature of a substitute was agreed to.

Mr. SCHUMER. I ask that the bill, as amended, be considered read a third time.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill was ordered to be engrossed for a third reading and was read the third time.

Mr. SCHUMER. I know of no further debate on the bill, as amended.

The PRESIDING OFFICER. If there is no further debate, the bill having been read the third time, the question is, Shall the bill pass?

The bill (S. 1687), as amended, was passed.

Mr. SCHUMER. Finally, I ask that the motion to reconsider be considered made and laid upon the table with no intervening action or debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

SMALL BUSINESS BROADBAND AND EMERGING INFORMATION TECHNOLOGY ENHANCEMENT ACT OF 2022

Mr. SCHUMER. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 395, S. 3906.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (S. 3906) to improve certain programs of the Small Business Administration to better assist small business customers in accessing broadband technology, and for other purposes.

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Small Business and Entrepreneurship, with amendments, as follows:

(The parts of the bill intended to be stricken are shown in boldface back-

ets, and the parts of the bill intended to be inserted are shown in italics.)

S. 3906

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Small Business Broadband and Emerging Information Technology Enhancement Act of 2022”.

SEC. 2. BROADBAND AND EMERGING INFORMATION TECHNOLOGY COORDINATOR.

The Small Business Act (15 U.S.C. 631 et seq.) is amended—

(1) by redesignating section 49 (15 U.S.C. 631 note) as section 50; and

(2) by inserting after section 48 (15 U.S.C. 657u) the following:

“SEC. 49. BROADBAND AND EMERGING INFORMATION TECHNOLOGY.

“(a) DEFINITIONS.—In this section—

“(1) the term ‘Associate Administrator’ means the Associate Administrator for the Office of Investment and Innovation;

“(2) the term ‘broadband’ means—

“(A) high-speed wired broadband internet; and

“(B) high-speed wireless internet;

“(3) the term ‘broadband and emerging information technology coordinator’ means the employee designated to carry out the broadband and emerging information technology coordination responsibilities of the Administration under subsection (b)(1); and

“(4) the term ‘emerging information technology’ includes—

“(A) data science technologies such as artificial intelligence and machine learning;

“(B) Internet of Things;

“(C) distributed ledger technologies such as blockchain;

“(D) cloud computing and software as a system technologies;

“(E) computer numerical control technologies such as 3D printing; and

“(F) robotics and automation.

“(b) ASSIGNMENT OF COORDINATOR.—

“(1) ASSIGNMENT OF COORDINATOR.—The Associate Administrator shall designate a senior employee of the Office of Investment and Innovation to serve as the broadband and emerging information technology coordinator, who—

“(A) shall report to the Associate Administrator;

“(B) shall work in coordination with—

“(i) the chief information officer, the chief technology officer, and the head of the Office of Technology of the Administration; and

“(ii) any other Associate Administrator of the Administration determined appropriate by the Associate Administrator;

“(C) has experience developing and implementing telecommunications policy in the private sector or government; and

“(D) has demonstrated significant experience in the area of broadband or emerging information technology.

“(2) RESPONSIBILITIES OF COORDINATOR.—The broadband and emerging information technology coordinator shall—

“(A) coordinate programs of the Administration that assist small business concerns in adopting, making innovations in, and using broadband and other emerging information technologies;

“(B) serve as the primary liaison of the Administration to other Federal agencies involved in broadband and emerging information technology policy, including the Department of Commerce, the Department of Agriculture, the Department of the Treasury, and the Federal Communications Commission;

“(C) identify best practices relating to broadband and emerging information tech-

nology that may benefit small business concerns; and

“(D) identify and catalog tools and training available through the resource partners of the Administration that assist small business concerns in adopting, making innovations in, and using broadband and emerging information technologies.

“(3) TRAVEL.—Not more than 20 percent of the hours of service by the broadband and emerging information technology coordinator during any fiscal year shall consist of travel outside the United States to perform official duties.

“(c) BROADBAND AND EMERGING INFORMATION TECHNOLOGY TRAINING.—The Associate Administrator shall provide to employees of the Administration training that—

“(1) familiarizes employees of the Administration with broadband and other emerging information technologies; and

“(2) includes—

“(A) instruction on counseling small business concerns regarding adopting, making innovations in, and using broadband and other emerging information technologies; and

“(B) information on programs of the Federal Government that provide assistance to small business concerns relating to broadband and emerging information technologies; and

“(3) to maximum extent practicable, uses the tools and training cataloged and identified under subsection (b)(2)(D).

“(1) TRAINING.—The Associate Administrator shall provide to employees of the Administration training that—

“(A) familiarizes employees of the Administration with broadband and other emerging information technologies;

“(B) includes—

“(i) instruction on counseling small business concerns regarding adopting, making innovations in, and using broadband and other emerging information technologies; and

“(ii) information on programs of the Federal Government that provide assistance to small business concerns relating to broadband and emerging information technologies; and

“(C) to maximum extent practicable, uses the tools and training cataloged and identified under subsection (b)(2)(D).

“(2) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as are necessary to carry out this subsection.]

“(d) REPORTS.—

“(1) BIENNIAL REPORT ON ACTIVITIES.—Not later than 2 years after the date on which the Associate Administrator makes the first designation of an employee under subsection (b), and every 2 years thereafter, the broadband and emerging information technology coordinator shall submit to the Committee on Small Business and Entrepreneurship of the Senate and the Committee on Small Business of the House of Representatives a report regarding the programs and activities of the Administration relating to broadband and other emerging information technologies.

“(2) IMPACT OF BROADBAND AVAILABILITY, SPEED, AND PRICE AND EMERGING INFORMATION TECHNOLOGY DEPLOYMENT ON SMALL BUSINESSES.—

“(A) IN GENERAL.—Subject to appropriations, the Chief Counsel for Advocacy shall conduct a study evaluating the impact of—

“(i) broadband availability, speed, and price on small business concerns; and

“(ii) emerging information technology deployment on small business concerns.

“(B) REPORT.—Not later than 3 years after the date of enactment of the Small Business Broadband and Emerging Information Technology Enhancement Act of 2022, the Chief Counsel for Advocacy shall submit to the

Committee on Commerce, Science, and Transportation and the Committee on Small Business and Entrepreneurship of the Senate and the Committee on Energy and Commerce and the Committee on Small Business of the House of Representatives a report on the results of the study under subparagraph (A), including—

- “(i) a survey of broadband speeds available to small business concerns;
- “(ii) a survey of the cost of broadband speeds available to small business concerns;
- “(iii) a survey of the type of broadband technology used by small business concerns;
- “(iv) a survey of the types of emerging information technologies used by small business concerns; and
- “(v) any policy recommendations that may improve the access of small business concerns to comparable broadband services or emerging information technologies at comparable rates in all regions of the United States.”.

SEC. 3. ENTREPRENEURIAL DEVELOPMENT.

Section 21(c)(3)(B) of the Small Business Act (15 U.S.C. 648(c)(3)(B)) is amended—

(1) in the matter preceding clause (i), by inserting “accessing broadband and other emerging information technology,” after “technology transfer,”;

(2) in clause (ii), by striking “and” at the end;

(3) in clause (iii), by adding “and” at the end; and

(4) by adding at the end the following:

“(iv) increasing the competitiveness and productivity of small business concerns by assisting entrepreneurs in accessing broadband and other emerging information technology.”.

Mr. SCHUMER. I further ask that the committee-reported amendments be withdrawn.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee-reported amendments were withdrawn.

Mr. SCHUMER. I ask that the Cardin substitute amendment, which is at the desk, be considered and agreed to.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 6027) in the nature of a substitute was agreed to, as follows:

(Purpose: In the nature of a substitute)

Strike all after the enacting clause and insert the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the “Small Business Broadband and Emerging Information Technology Enhancement Act of 2022”.

SEC. 2. BROADBAND AND EMERGING INFORMATION TECHNOLOGY COORDINATOR.

The Small Business Act (15 U.S.C. 631 et seq.) is amended—

(1) by redesignating section 49 (15 U.S.C. 631 note) as section 50; and

(2) by inserting after section 48 (15 U.S.C. 657u) the following:

“SEC. 49. BROADBAND AND EMERGING INFORMATION TECHNOLOGY.

“(a) DEFINITIONS.—In this section—

“(1) the term ‘Associate Administrator’ means the Associate Administrator for the Office of Investment and Innovation;

“(2) the term ‘broadband’ means—

“(A) high-speed wired broadband internet; and

“(B) high-speed wireless internet;

“(3) the term ‘broadband and emerging information technology coordinator’ means the employee designated to carry out the broadband and emerging information tech-

nology coordination responsibilities of the Administration under subsection (b)(1); and

“(4) the term ‘emerging information technology’ includes—

“(A) data science technologies such as artificial intelligence and machine learning;

“(B) Internet of Things;

“(C) distributed ledger technologies such as blockchain;

“(D) cloud computing and software as a system technologies;

“(E) computer numerical control technologies such as 3D printing; and

“(F) robotics and automation.

“(b) ASSIGNMENT OF COORDINATOR.—

“(1) ASSIGNMENT OF COORDINATOR.—The Associate Administrator shall designate a senior employee of the Office of Investment and Innovation to serve as the broadband and emerging information technology coordinator, who—

“(A) shall report to the Associate Administrator;

“(B) shall work in coordination with—

“(i) the chief information officer, the chief technology officer, and the head of the Office of Technology of the Administration; and

“(ii) any other Associate Administrator of the Administration determined appropriate by the Associate Administrator;

“(C) has experience developing and implementing telecommunications policy in the private sector or government; and

“(D) has demonstrated significant experience in the area of broadband or emerging information technology.

“(2) RESPONSIBILITIES OF COORDINATOR.—The broadband and emerging information technology coordinator shall—

“(A) coordinate programs of the Administration that assist small business concerns in adopting, making innovations in, and using broadband and other emerging information technologies;

“(B) serve as the primary liaison of the Administration to other Federal agencies involved in broadband and emerging information technology policy, including the Department of Commerce, the Department of Agriculture, the Department of the Treasury, and the Federal Communications Commission;

“(C) identify best practices relating to broadband and emerging information technology that may benefit small business concerns; and

“(D) identify and catalog tools and training available through the resource partners of the Administration that assist small business concerns in adopting, making innovations in, and using broadband and emerging information technologies.

“(3) TRAVEL.—Not more than 20 percent of the hours of service by the broadband and emerging information technology coordinator during any fiscal year shall consist of travel outside the United States to perform official duties.

“(c) BROADBAND AND EMERGING INFORMATION TECHNOLOGY TRAINING.—The broadband and emerging information technology coordinator shall provide to employees of the Administration training that—

“(1) familiarizes employees of the Administration with broadband and other emerging information technologies;

“(2) includes—

“(A) instruction on counseling small business concerns regarding adopting, making innovations in, and using broadband and other emerging information technologies; and

“(B) information on programs of the Federal Government that provide assistance to small business concerns relating to broadband and emerging information technologies; and

“(3) to maximum extent practicable, uses the tools and training cataloged and identified under subsection (b)(2)(D).

“(d) REPORTS.—

“(1) BIENNIAL REPORT ON ACTIVITIES.—Not later than 2 years after the date on which the Associate Administrator makes the first designation of an employee under subsection (b), and every 2 years thereafter, the broadband and emerging information technology coordinator shall submit to the Committee on Small Business and Entrepreneurship of the Senate and the Committee on Small Business of the House of Representatives a report regarding the programs and activities of the Administration relating to broadband and other emerging information technologies.

“(2) IMPACT OF BROADBAND AVAILABILITY, SPEED, AND PRICE AND EMERGING INFORMATION TECHNOLOGY DEPLOYMENT ON SMALL BUSINESSES.—

“(A) IN GENERAL.—Subject to appropriations, the Chief Counsel for Advocacy shall conduct a study evaluating the impact of—

“(i) broadband availability, speed, and price on small business concerns; and

“(ii) emerging information technology deployment on small business concerns.

“(B) REPORT.—Not later than 3 years after the date of enactment of the Small Business Broadband and Emerging Information Technology Enhancement Act of 2022, the Chief Counsel for Advocacy shall submit to the Committee on Commerce, Science, and Transportation and the Committee on Small Business and Entrepreneurship of the Senate and the Committee on Energy and Commerce and the Committee on Small Business of the House of Representatives a report on the results of the study under subparagraph (A), including—

“(i) a survey of broadband speeds available to small business concerns;

“(ii) a survey of the cost of broadband speeds available to small business concerns;

“(iii) a survey of the type of broadband technology used by small business concerns;

“(iv) a survey of the types of emerging information technologies used by small business concerns; and

“(v) any policy recommendations that may improve the access of small business concerns to broadband services or emerging information technologies.”.

SEC. 3. ENTREPRENEURIAL DEVELOPMENT.

Section 21(c)(3)(B) of the Small Business Act (15 U.S.C. 648(c)(3)(B)) is amended—

(1) in the matter preceding clause (i), by inserting “accessing broadband and other emerging information technology,” after “technology transfer,”;

(2) in clause (ii), by striking “and” at the end;

(3) in clause (iii), by adding “and” at the end; and

(4) by adding at the end the following:

“(iv) increasing the competitiveness and productivity of small business concerns by assisting entrepreneurs in accessing broadband and other emerging information technology.”.

Mr. SCHUMER. I further ask that the bill, as amended, be considered read a third time.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill was ordered to be engrossed for a third reading and was read the third time.

Mr. SCHUMER. I know of no further debate on the bill, as amended.

The PRESIDING OFFICER. If there is no further debate, the bill having been read the third time, the question is, Shall the bill pass?

The bill (S. 3906), as amended, was passed.

Mr. SCHUMER. Finally, I ask that the motion to reconsider be considered made and laid upon the table with no intervening action or debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

ONE STOP SHOP FOR SMALL BUSINESS COMPLIANCE ACT OF 2021

Mr. SCHUMER. Mr. President, I ask unanimous consent that the Committee on Small Business and Entrepreneurship be discharged from further consideration of H.R. 4877 and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (H.R. 4877) to amend the Small Business Act to require the Small Business and Agriculture Regulatory Enforcement Ombudsman to create a centralized website for compliance guides, and for other purposes.

There being no objection, the committee was discharged, and the Senate proceeded to consider the bill.

Mr. SCHUMER. I further ask that the bill be considered read a third time.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill was ordered to a third reading and was read the third time.

Mr. SCHUMER. I know of no further debate on the bill.

The PRESIDING OFFICER. If there is no further debate, the bill having been read the third time, the question is, Shall the bill pass?

The bill (H.R. 4877) was passed.

Mr. SCHUMER. I ask that the motion to reconsider be considered made and laid upon the table with no intervening action or debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

SBA CYBER AWARENESS ACT

Mr. SCHUMER. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 281, H.R. 3462.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (H.R. 3462) to require an annual report on the cybersecurity of the Small Business Administration, and for other purposes.

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Small Business and Entrepreneurship.

Mr. SCHUMER. I further ask that the Cardin substitute amendment, which is at the desk, be considered and agreed to; that the bill, as amended, be considered read a third time and passed; and that the motion to reconsider be considered made and laid upon the table with no intervening action or debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 6028), in the nature of a substitute, was agreed to as follows:

(Purpose: In the nature of a substitute)

Strike all after the enacting clause and insert the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the “SBA Cyber Awareness Act”.

SEC. 2. CYBERSECURITY AWARENESS REPORTING.

(a) IN GENERAL.—Section 10 of the Small Business Act (15 U.S.C. 639) is amended by inserting after subsection (a) the following:

“(b) CYBERSECURITY REPORTS.—

“(1) ANNUAL REPORT.—Not later than 180 days after the date of enactment of this subsection, and every year thereafter, the Administrator shall submit a report to the appropriate congressional committees that includes—

“(A) a strategy to increase the cybersecurity of information technology infrastructure of the Administration;

“(B) a supply chain risk management strategy and an implementation plan to address the risks of foreign manufactured information technology equipment utilized by the Administration, including specific risk mitigation activities for components originating from entities with principal places of business located in the People’s Republic of China; and

“(C) an account of—

“(i) any incident that occurred at the Administration during the 2-year period preceding the date on which the first report is submitted, and, for subsequent reports, the 1-year period preceding the date of submission; and

“(ii) any action taken by the Administrator to respond to or remediate any such incident.

“(2) FISMA REPORTS.—Each report required under paragraph (1) may be submitted as part of the report required under section 3554 of title 44, United States Code.

“(3) RULE OF CONSTRUCTION.—Nothing in this subsection shall be construed to affect the reporting requirements of the Administrator under chapter 35 of title 44, United States Code, in particular the requirement to notify the Federal information security incident center under section 3554(b)(7)(C)(ii) of such title, any guidance issued by the Office of Management and Budget, or any other provision of law or Federal policy.

“(4) DEFINITIONS.—In this subsection:

“(A) APPROPRIATE CONGRESSIONAL COMMITTEES.—The term ‘appropriate congressional committees’ means—

“(i) the Committee on Small Business and Entrepreneurship of the Senate;

“(ii) the Committee on Homeland Security and Governmental Affairs of the Senate;

“(iii) the Committee on Small Business of the House of Representatives; and

“(iv) the Committee on Oversight and Reform of the House of Representatives.

“(B) INCIDENT.—The term ‘incident’ has the meaning given the term in section 3552 of title 44, United States Code.

“(C) INFORMATION TECHNOLOGY.—The term ‘information technology’ has the meaning given the term in section 3502 of title 44, United States Code.”

(b) REPORT.—Not later than 1 year after the date of enactment of this Act, the Administrator of the Small Business Administration shall, to the greatest extent practicable, provide to the Committee on Small Business and Entrepreneurship of the Senate, the Committee on Homeland Security and Governmental Affairs of the Senate, the Committee on Small Business of the House of Representatives, and the Committee on Oversight and Reform of the House of Representatives a detailed account of information technology (as defined in section 3502 of title 44, United States Code) of the Small

Business Administration that was manufactured by an entity that has its principal place of business located in the People’s Republic of China.

The bill (H.R. 3462), as amended, was ordered to a third reading, was read the third time, and passed.

SBIC ADVISORY COMMITTEE ACT OF 2022

Mr. SCHUMER. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 280, S. 2521.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (S. 2521) to require the Administrator of the Small Business Administration to establish an SBIC Working Group, and for other purposes.

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Small Business and Entrepreneurship, with an amendment to strike all after the enacting clause and insert in lieu thereof the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the “SBIC Advisory Committee Act of 2022”.

SEC. 2. SBIC ADVISORY COMMITTEE.

(a) DEFINITIONS.—In this section—

(1) the terms “Administration” and “Administrator” mean the Small Business Administration and the Administrator thereof, respectively;

(2) the term “Advisory Committee” means the SBIC Advisory Committee established under subsection (b);

(3) the term “covered Members” means the Chair and Ranking Member of—

(A) the Committee on Small Business and Entrepreneurship of the Senate; and

(B) the Committee on Small Business of the House of Representatives;

(4) the terms “licensee”, “small business investment company”, and “underlicensed State” have the meanings given those terms in section 103 of the Small Business Investment Act of 1958 (15 U.S.C. 662);

(5) the term “low-income community” has the meaning given the term in section 45D(e) of the Internal Revenue Code of 1986;

(6) the term “rural area” has the meaning given the term by the Bureau of the Census;

(7) the terms “small business concern”, “small business concern owned and controlled by veterans”, and “small business concern owned and controlled by women” have the meanings given those terms in section 3 of the Small Business Act (15 U.S.C. 632);

(8) the term “socially or economically disadvantaged individual” means a socially disadvantaged individual or economically disadvantaged individual, as described in paragraphs (5) and (6)(A), respectively, of section 8(a) of the Small Business Act (15 U.S.C. 637(a));

(9) the term “underfinanced State” means a State that has below median financing, as determined by the Administrator; and

(10) the term “underserved community” means—

(A) a HUBZone, as defined in section 31(b) of the Small Business Act (15 U.S.C. 657a(b));

(B) a community that has been designated as an empowerment zone or an enterprise community under section 1391 of the Internal Revenue Code of 1986;

(C) a community that has been designated as a promise zone by the Secretary of Housing and Urban Development; and

(D) a community that has been designated as a qualified opportunity zone under section 1400Z-1 of the Internal Revenue Code of 1986.

(b) **ESTABLISHMENT.**—The Administrator shall establish an SBIC Advisory Committee to convene outside experts to advise on the small business investment program under title III of the Small Business Investment Act of 1958 (15 U.S.C. 681 et seq.).

(c) **COMPOSITION.**—

(1) **MEMBERSHIP.**—The Advisory Committee shall be composed of 16 members appointed by the Administrator as follows:

(A) The Associate Administrator of the Office of Investment and Innovation of the Small Business Administration, or another designee of the Administrator as determined by the Administrator.

(B) 7 members with competence, interest, or knowledge of the small business investment program under title III of the Small Business Investment Act of 1958 (15 U.S.C. 681 et seq.), of whom—

(i) not fewer than 3 shall have a demonstrated record of expertise in investing in—

(I) low-income communities;

(II) communities that have been designated as qualified opportunity zones under section 1400Z-1 of the Internal Revenue Code of 1986;

(III) businesses primarily engaged in research and development;

(IV) manufacturers;

(V) businesses primarily owned or controlled by individuals in underserved communities before receiving capital from the licensee;

(VI) rural areas; or

(VII) underfinanced States; and

(ii) not fewer than 1 member shall be a representative from a trade association for the small business investment program under title III of the Small Business Investment Act of 1958 (15 U.S.C. 681 et seq.).

(C) 8 members appointed by the Administrator as follows:

(i) 2 members shall be selected from among the individuals on the list submitted by the Chair of the Committee on Small Business and Entrepreneurship of the Senate under paragraph (2).

(ii) 2 members shall be selected from among the individuals on the list submitted by the Ranking Member of the Committee on Small Business and Entrepreneurship of the Senate under paragraph (2).

(iii) 2 members shall be selected from among the individuals on the list submitted by the Chair of the Committee on Small Business of the House of Representatives under paragraph (2).

(iv) 2 members shall be selected from among the individuals on the list submitted by the Ranking Member of the Committee on Small Business of the House of Representatives under paragraph (2).

(2) **RECOMMENDATIONS.**—Not later than 30 days after the date of enactment of this Act, each of the covered Members shall provide to the Administrator a list of 3 candidates for membership on the Advisory Committee, who shall be individuals who hold a high-ranking position or senior leadership role, and have no conflict of interest in the small business investment program under title III of the Small Business Investment Act of 1958 (15 U.S.C. 681 et seq.), in—

(A) a relevant industry trade association;

(B) the investment industry with expertise in pensions, endowments, and other non-banking institutions;

(C) academia with expertise in the investment industry; or

(D) a nonprofit institution, including one that serves any of the communities, entities, or areas described in subclauses (I) through (VII) of paragraph (1)(B)(i).

(3) **CHAIRPERSON.**—The Chairperson of the Advisory Committee shall be the member of the Advisory Committee appointed under paragraph (1)(A).

(4) **PERIOD OF APPOINTMENT.**—Members of the Advisory Committee shall be appointed for the life of the Advisory Committee.

(5) **VACANCIES.**—Any vacancy in the Advisory Committee shall be filled in the same manner as the original appointment.

(d) **DEADLINE FOR APPOINTMENT.**—Not later than 60 days after the date on which the covered Members provide the lists to the Administrator under subsection (c)(2), the Administrator shall—

(1) appoint the members of the Advisory Committee; and

(2) submit to Congress a list of the members so appointed.

(e) **DUTIES.**—The Advisory Committee shall provide advice and recommendations to the Administrator—

(1) concerning policy and program development and other matters of significance concerning activities under the Small Business Act (15 U.S.C. 631 et seq.) and the Small Business Investment Act of 1958 (15 U.S.C. 661 et seq.), including how the Administrator may increase the number of applicants to become small business investment companies, with a focus on management teams or companies investing in or located in—

(A) low-income communities;

(B) underserved communities;

(C) rural areas; or

(D) underfinanced States;

(2) concerning incentives for small business investment companies to—

(A) invest and locate in underlicensed States and underfinanced States; and

(B) invest in small business concerns, including those owned and controlled by socially or economically disadvantaged individuals, small business concerns owned and controlled by veterans, and small business concerns owned and controlled by women; and

(3) concerning metrics of success, and benchmarks for success, with respect to the goals described in this section.

(f) **REPORT.**—Not later than 18 months after the date on which the Administrator establishes the Advisory Committee under subsection (b), the Advisory Committee shall submit to the Administrator, the Committee on Small Business and Entrepreneurship of the Senate, and the Committee on Small Business of the House of Representatives a report that includes—

(1) the recommendations of the Advisory Committee; and

(2) a discussion of the impact of State, local, and financial institution investment in small business investment companies on small business concerns in rural areas, low-income communities, underserved communities, and underfinanced States.

(g) **TERMINATION.**—The Advisory Committee shall terminate on the date on which the Advisory Committee submits the report required under subsection (f).

Mr. SCHUMER. I further ask that the committee-reported substitute amendment be withdrawn.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee-reported amendment in the nature of a substitute was withdrawn.

Mr. SCHUMER. I ask that the Cardin substitute amendment, which is at the desk, be considered and agreed to.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 6029) in the nature of a substitute was agreed to as follows:

(Purpose: In the nature of a substitute)

Strike all after the enacting clause and insert the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the “SBIC Advisory Committee Act of 2022”.

SEC. 2. SBIC ADVISORY COMMITTEE.

(a) **DEFINITIONS.**—In this section—

(1) the terms “Administration” and “Administrator” mean the Small Business Ad-

ministration and the Administrator thereof, respectively;

(2) the term “covered Members” means the Chair and Ranking Member of—

(A) the Committee on Small Business and Entrepreneurship of the Senate; and

(B) the Committee on Small Business of the House of Representatives;

(3) the terms “licensee”, “small business investment company”, and “underlicensed State” have the meanings given those terms in section 301 of the Small Business Investment Act of 1958 (15 U.S.C. 662);

(4) the term “low-income community” has the meaning given the term in section 45D(e) of the Internal Revenue Code of 1986;

(5) the term “rural area” has the meaning given the term by the Bureau of the Census;

(6) the terms “small business concern”, “small business concern owned and controlled by veterans”, and “small business concern owned and controlled by women” have the meanings given those terms in section 3 of the Small Business Act (15 U.S.C. 632);

(7) the term “socially or economically disadvantaged individual” means a socially disadvantaged individual or economically disadvantaged individual, as described in paragraphs (5) and (6)(A), respectively, of section 8(a) of the Small Business Act (15 U.S.C. 637(a));

(8) the term “underfinanced State” means a State that has below median financing, as determined by the Administrator; and

(9) the term “underserved community” means—

(A) a HUBZone, as defined in section 31(b) of the Small Business Act (15 U.S.C. 657a(b));

(B) a community that has been designated as an empowerment zone or an enterprise community under section 1391 of the Internal Revenue Code of 1986;

(C) a community that has been designated as a promise zone by the Secretary of Housing and Urban Development; and

(D) a community that has been designated as a qualified opportunity zone under section 1400Z-1 of the Internal Revenue Code of 1986.

(b) **ESTABLISHMENT.**—The Administrator shall establish an SBIC Advisory Committee (referred to in this section as the “Advisory Committee”) to convene outside experts to advise on the small business investment program under title III of the Small Business Investment Act of 1958 (15 U.S.C. 681 et seq.).

(c) **COMPOSITION.**—

(1) **MEMBERSHIP.**—The Advisory Committee shall be composed of 16 members appointed by the Administrator as follows:

(A) The Associate Administrator of the Office of Investment and Innovation of the Small Business Administration, or another designee of the Administrator as determined by the Administrator.

(B) 7 members with competence, interest, or knowledge of the small business investment program under title III of the Small Business Investment Act of 1958 (15 U.S.C. 681 et seq.), of whom—

(i) not fewer than 3 shall have a demonstrated record of expertise in investing in—

(I) low-income communities;

(II) communities that have been designated as qualified opportunity zones under section 1400Z-1 of the Internal Revenue Code of 1986;

(III) businesses primarily engaged in research and development;

(IV) manufacturers;

(V) businesses primarily owned or controlled by individuals in underserved communities before receiving capital from the licensee;

(VI) rural areas; or

(VII) underfinanced States; and

(ii) not fewer than 1 member shall be a representative from a trade association for the small business investment program under title III of the Small Business Investment Act of 1958 (15 U.S.C. 681 et seq.).

(C) 8 members appointed by the Administrator as follows:

(i) 2 members shall be selected from among the individuals in the list submitted by the Chair of the Committee on Small Business and Entrepreneurship of the Senate under paragraph (2).

(ii) 2 members shall be selected from among the individuals in the list submitted by the Ranking Member of the Committee on Small Business and Entrepreneurship of the Senate under paragraph (2).

(iii) 2 members shall be selected from among the individuals in the list submitted by the Chair of the Committee on Small Business of the House of Representatives under paragraph (2).

(iv) 2 members shall be selected from among the individuals in the list submitted by the Ranking Member of the Committee on Small Business of the House of Representatives under paragraph (2).

(2) RECOMMENDATIONS.—Not later than 30 days after the date of enactment of this Act, each of the covered Members shall provide to the Administrator a list of 3 candidates for membership on the Advisory Committee, who shall be individuals who hold a high-ranking position or senior leadership role, and have no conflict of interest in the small business investment program under title III of the Small Business Investment Act of 1958 (15 U.S.C. 681 et seq.), in—

(A) a relevant industry trade association;

(B) the investment industry with expertise in pensions, endowments, and other non-banking institutions;

(C) academia with expertise in the investment industry; or

(D) a nonprofit institution, including one that serves any of the entities described in subclauses (I) through (VII) of paragraph (1)(B)(i).

(3) PRIVATE SECTOR MEMBERS.—Not fewer than 2 and not more than 4 of the members of the Advisory Committee shall be investors in the private sector who—

(A) invest in small business concerns; and

(B) as of the date of appointment, do not participate in the small business investment program under title III of the Small Business Investment Act of 1958 (15 U.S.C. 681 et seq.).

(4) CHAIRPERSON.—The Chairperson of the Advisory Committee shall be the member of the Advisory Committee appointed under paragraph (1)(A).

(5) PERIOD OF APPOINTMENT.—Members of the Advisory Committee shall be appointed for the life of the Advisory Committee.

(6) VACANCIES.—Any vacancy in the Advisory Committee shall be filled in the same manner as the original appointment.

(d) DEADLINE FOR APPOINTMENT.—Not later than 60 days after the date on which the covered Members provide the lists to the Administrator under subsection (c)(2), the Administrator shall—

(1) appoint the members of the Advisory Committee; and

(2) submit to Congress a list of the members so appointed.

(e) DUTIES.—The Advisory Committee shall provide advice and recommendations to the Administrator—

(1) concerning policy and program development and other matters of significance concerning activities under the Small Business Act (15 U.S.C. 631 et seq.) and the Small Business Investment Act of 1958 (15 U.S.C. 661 et seq.), including diversifying management teams or companies;

(2) concerning incentives for small business investment companies to—

(A) invest and locate in underlicensed States and underfinanced States; and

(B) invest in small business concerns, including those owned and controlled by socially or economically disadvantaged individuals, small business concerns owned and controlled by veterans, and small business concerns owned and controlled by women;

(3) concerning metrics of success, and benchmarks for success, with respect to the goals described in this section; and

(4) concerning the impact of the small business investment program under title III of the Small Business Investment Act of 1958 (15 U.S.C. 681 et seq.) on the private investment market, including whether investments under the program compete with the private sector.

(f) REPORT.—Not later than 18 months after the date on which the Administrator establishes the Advisory Committee under subsection (b), the Advisory Committee shall submit to the Administrator, the Committee on Small Business and Entrepreneurship of the Senate, and the Committee on Small Business of the House of Representatives a report that includes the recommendations of the Advisory Committee described in subsection (e).

(g) TERMINATION.—The Advisory Committee shall terminate on the date on which the Advisory Committee submits the report required under subsection (f).

Mr. SCHUMER. I further ask that the bill, as amended, be considered read a third time.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill, as amended, was ordered to be engrossed for a third reading and was read the third time.

Mr. SCHUMER. I know of no further debate on the bill, as amended.

The PRESIDING OFFICER. If there is no further debate, the bill having been read the third time, the question is, Shall the bill pass, as amended?

The bill (S. 2521), as amended, was passed.

Mr. SCHUMER. Finally, I ask that the committee-reported title amendment be agreed to and that the motion to reconsider be considered made and laid upon the table with no intervening action or debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee-reported amendment to the title was agreed to as follows:

(Purpose: To amend the title)

Amend the title so as to read: "A bill to require the Administrator of the Small Business Administration to establish an SBIC Advisory Committee, and for other purposes."

Mr. SCHUMER. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The senior assistant legislative clerk proceeded to call the roll.

Mr. SCHUMER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MORNING BUSINESS

HISPANIC HERITAGE MONTH

Mr. DURBIN. Mr. President, every year since 1988, we have honored the

achievements of the Latino community in the United States through Hispanic Heritage Month. My friend and mentor, Senator Paul Simon, was part of the effort to establish this important time to honor the contributions of Hispanic and Latino communities throughout American history, filled with stories of inspiration and courage. Today, I continue Paul's work by taking the time to honor this rich history and celebrate the leaders paving the way for a brighter future of this Nation.

Illinois is home to a large and vibrant Latino community. I have had the privilege of meeting Latino people from many walks of life, from Dreamers who grew up here, to newly arrived refugees fleeing tyranny. While their stories all differ, they share common themes of hope, resilience, and determination. In their stories, I see my family's story. My mother and her family escaped oppression to find freedom here in America. Many families have followed that same journey to provide a better life in Illinois and across the country. It is not easy to leave your home to travel to an unfamiliar place. But with their courage, they brought diverse cultures, sharing music, food, traditions, and history. The Latino community has made an indelible mark on Illinois through small businesses, top-performing Hispanic-serving institutions, and beautiful cultural centers and museums.

Commitment to family is a core tenant of Latino culture and extends to care for the community at large, where Latino leaders use their talents to help others. Juan and Maria Pedroza emigrated from Mexico in 1989 to Little Village with their small children. Like the story of many families across the country, they, too, came to the United States in search of the American dream, doing whatever it took to ensure a brighter future for their children. Their children—Juan Manuel Jr., Maria Socorro, Gabriela, and Pedro—went on to attend prestigious colleges and universities, including Harvard, DePauw, Cornell, and the University of Illinois at Champaign-Urbana. Pedro's courage and spirit of service led him to serve in then-Mayor Rahm Emmanuel's office—the first Deferred Action for Childhood Arrivals—DACA—recipient to serve in the mayor's office. Pedro recognized the needs of his community and answered the call to public service so others could grow and succeed. The Pedrozas' success has not come without great sacrifices, similar to those that many Latino families have had to make. But through extraordinary determination and resilience, they go above and beyond out of love of family and community.

Chicago also is home to a vibrant Puerto Rican community that has displayed great resilience in the face of serious challenges. Tragically, more than 900,000 Puerto Ricans have lost power in the aftermath of Hurricane Fiona. Some areas received more than 30 inches of rain and, sadly, this devastation is a trend. Latinos in the United

States are more likely than non-Hispanic Whites to experience heat waves, powerful hurricanes, sea level rises, and floods. It is estimated that Hispanic and Latino people are 43 percent more likely to live in an area expected to be too hot to work a full day outside due to climate change. And communities are responding. Across the United States, thousands of people have joined together to help Puerto Rico—including in Illinois—where the Puerto Rican Agenda is working to provide immediate relief to those affected by natural disasters. I support their efforts and President Biden's approval of a major disaster declaration for Puerto Rico.

Tackling environmental injustice doesn't end there. Earlier this year, activists and community leaders in southeast Chicago raised concerns with the development of a metal shredder facility. The Chicago Health Department and the Environmental Protection Agency conducted a health impact assessment, finding the metal recycling plant would have increased air pollution and negatively impacted the mental health of residents. As a result, the city blocked the development. This story is not unique to Chicago; Latino communities across the United States have mobilized to make their voices heard and protect our communities.

We also saw this tenacity during the pandemic. Millions of Hispanic and Latino people served as frontline workers—treating patients, feeding communities, and working around the clock to disinfect schools, stores, and health centers at a grave personal cost. Today, Hispanic or Latino persons are twice as likely to be hospitalized for COVID-19 and 1.8 times more likely to die from the virus, due to health disparities and continuous exposure. We must never forget the contributions they made, which have supported our Nation during one of its most difficult moments.

Countless Latino leaders have overcome systemic injustices to succeed and inspire the next generation of leaders. As we celebrate Hispanic Heritage Month, we recognize the value the Latino community brings to our country through its work and culture. Resilience and love shine through in all that the community does and will continue to make us a stronger country for years to come.

NOTICE OF A TIE VOTE UNDER S. RES. 27

Mr. PETERS. Mr. President, I ask unanimous consent to print the following letter in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON HOMELAND SECURITY AND
GOVERNMENTAL AFFAIRS,
Washington, DC, September 28, 2022.
To the Secretary of the Senate:

PN 2457, the nomination of Colleen Joy Shogan, to be Archivist of the United States,

vice David S. Ferriero, having been referred to the Committee on Homeland Security and Governmental Affairs, the Committee with a quorum present, has voted on the nomination as follows—

On the question of reporting the nomination favorably with the recommendation that the nomination be confirmed 7 yeas to 7 nays.

In accordance with section 3, paragraph (1) (A) of S. Res. 27 of the 117th Congress, I hereby give notice that the Committee on Homeland Security and Governmental Affairs has not reported the nomination because of a tie vote and ask that this notice be printed in the RECORD pursuant to the resolution.

GARY C. PETERS,
Chairman.

INFLATION REDUCTION ACT OF 2022

Ms. CORTEZ MASTO. Mr. President, I rise today to clarify a colloquy between myself and Chairman WYDEN placed in the CONGRESSIONAL RECORD on August 6, 2022. The statement in the RECORD references geothermal energy as applicable to the new "section 48D" of the Tax Code added by section 13702 of the Inflation Reduction Act. The statement should have referenced that section as "section 48E." As explained in that colloquy, geothermal will qualify for the production and investment tax credits included in sections 13701 and 13702 of the Inflation Reduction Act.

FOOD AND DRUG ADMINISTRATION USER FEE REAUTHORIZATION

Mrs. MURRAY. Mr. President, I ask unanimous consent to have printed in the RECORD a copy of the transmittal and commitment letters from the Secretary of Health and Human Services to the chair and ranking member of the Committee on Health, Education, Labor, and Pensions of the Senate and the chair and ranking member of the Committee on Energy and Commerce of the House of Representatives regarding reauthorization of the Prescription Drug User Fee Act, Medical Device User Fee Amendments, Generic Drug User Fee Amendments, and Biosimilar User Fee Act.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF HEALTH
AND HUMAN SERVICES,
Washington, DC, January 12, 2022.
Hon. PATTY MURRAY,
*Chair, Committee on Health, Education, Labor
and Pensions, U.S. Senate, Washington,
DC.*

DEAR CHAIR MURRAY: The Prescription Drug User Fee Act [PDUFA] as reauthorized by the Food and Drug Administration Reauthorization Act [FDARA P.L. 115-52], expires at the end of Fiscal Year 2022. With this letter the Administration is providing our recommendations for the reauthorization of PDUFA for the Fiscal Years 2023-2027 [PDUFA VII].

Under PDUFA, the revenues generated from fees paid by the pharmaceutical industry have been used to expedite the process for the review of new prescription drugs and to support and augment regulatory science

and drug development. The expenditure of these funds is in accordance with the statute and provides resources to meet the performance goals and procedures that were developed by the Food and Drug Administration [FDA] in consultation with representatives of regulated industry. FDA estimates that the fees negotiated in PDUFA VII will average approximately \$1.4 billion per year. PDUFA has proven to be an extremely effective program that has transformed the U.S. drug review to be the fastest in the world, while setting the global gold standard for quality, efficacy, and safety.

Throughout this process, the FDA has solicited input and worked with various stakeholders, including representatives from consumer and patient advocates, academic research, and health provider groups, and negotiated with the pharmaceutical and biotechnology industries, to develop reauthorization recommendations for PDUFA that would build upon and enhance the success of the program. In addition, we have complied with the statutory requirements to solicit public comments on our recommendations, and the summary of public comments is posted on the agency web site and enclosed with this letter.

Our recommendations build upon the successes of existing programs and performance goals with improvements and expansions to address areas of emerging regulatory science and drug development. For example, this includes, but is not limited to:

Investing critical resources in the Center for Biologics Evaluation and Research to support development, review, and approval of cell and gene therapy products;

Introducing new pilot programs to expedite patient access to novel uses for existing therapies, advance rare diseases development through efficacy endpoint development, and improve the quality and acceptability of real-world evidence;

Enhancing the drug safety system through optimizing the Sentinel Initiative capabilities and improving Risk Evaluation and Mitigation Strategy (REMS) assessments;

Introducing new enhancements related to product quality reviews, chemistry, manufacturing, and control approaches, and advancing the utilization of innovative manufacturing technologies;

Enhancing the use of digital health technologies to support drug development and review, along with leveraging modern technology to accelerate FDA's data and technology modernization;

Improving management of user fee resources through advancing FDA's Resource Capacity Planning function and continuing activities to enhance financial transparency.

The following five enclosures are provided for your consideration: The proposed PDUFA VII statutory language; a redline of current law; the Justifications of Proposed Statutory Changes for Reauthorization of PDUFA in Fiscal Years 2023 through 2027; the PDUFA Reauthorization Performance Goals and Procedures in Fiscal Years 2023 through 2027; and the summary of public comments.

Thank you for the opportunity to present our recommendations to reauthorize this vital program. We would be pleased to brief your staff on the details and want to work closely with Congress to reauthorize the program in a timely manner. The Office of Management and Budget has advised that the bill and the enclosed performance goals are in accord with the Administration's program.

Sincerely,

XAVIER BECERRA.

THE SECRETARY OF HEALTH
AND HUMAN SERVICES
Washington, DC, January 12, 2022.

Hon. RICHARD BURR,
Raking Member, Committee on Health, Education, Labor and Pensions, U.S. Senate, Washington, DC.

DEAR SENATOR BURR: The Prescription Drug User Fee Act [PDUFA] as reauthorized by the Food and Drug Administration Reauthorization Act [FDARA P. L. 115-52], expires at the end of Fiscal Year 2022. With this letter the Administration is providing our recommendations for the reauthorization of PDUFA for the Fiscal Years 2023-2027 [PDUFA VII].

Under PDUFA, the revenues generated from fees paid by the pharmaceutical industry have been used to expedite the process for the review of new prescription drugs and to support and augment regulatory science and drug development. The expenditure of these funds is in accordance with the statute and provides resources to meet the performance goals and procedures that were developed by the Food and Drug Administration [FDA] in consultation with representatives of regulated industry. FDA estimates that the fees negotiated in PDUFA VII will average approximately \$1.4 billion per year. PDUFA has proven to be an extremely effective program that has transformed the U.S. drug review to be the fastest in the world, while setting the global gold standard for quality, efficacy, and safety.

Throughout this process, the FDA has solicited input and worked with various stakeholders, including representatives from consumer and patient advocates, academic research, and health provider groups, and negotiated with the pharmaceutical and biotechnology industries, to develop reauthorization recommendations for PDUFA that would build upon and enhance the success of the program. In addition, we have complied with the statutory requirements to solicit public comments on our recommendations, and the summary of public comments is posted on the agency web site and enclosed with this letter.

Our recommendations build upon the successes of existing programs and performance goals with improvements and expansions to address areas of emerging regulatory science and drug development. For example, this includes, but is not limited to:

Investing critical resources in the Center for Biologics Evaluation and Research to support development, review, and approval of cell and gene therapy products;

Introducing new pilot programs to expedite patient access to novel uses for existing therapies, advance rare diseases development through efficacy endpoint development, and improve the quality and acceptability of real-world evidence;

Enhancing the drug safety system through optimizing the Sentinel Initiative capabilities and improving Risk Evaluation and Mitigation Strategy (REMS) assessments;

Introducing new enhancements related to product quality reviews, chemistry, manufacturing, and control approaches, and advancing the utilization of innovative manufacturing technologies;

Enhancing the use of digital health technologies to support drug development and review, along with leveraging modern technology to accelerate FDA's data and technology modernization;

Improving management of user fee resources through advancing FDA's Resource Capacity Planning function and continuing activities to enhance financial transparency.

The following five enclosures are provided for your consideration: The proposed PDUFA VII statutory language; a redline of current law; the Justifications of Proposed Statu-

tory Changes for Reauthorization of PDUFA in Fiscal Years 2023 through 2027; the PDUFA Reauthorization Performance Goals and Procedures in Fiscal Years 2023 through 2027; and the summary of public comments.

Thank you for the opportunity to present our recommendations to reauthorize this vital program. We would be pleased to brief your staff on the details and want to work closely with Congress to reauthorize the program in a timely manner. The Office of Management and Budget has advised that the bill and the enclosed performance goals are in accord with the Administration's program.

Sincerely,

XAVIER BECERRA.

THE SECRETARY OF HEALTH
AND HUMAN SERVICES,
Washington, DC, January 12, 2022.

Hon. FRANK PALLONE, JR.,
Chairman, Committee on Energy and Commerce, House of Representatives, Washington, DC.

DEAR CHAIR PALLONE: The Prescription Drug User Fee Act [PDUFA] as reauthorized by the Food and Drug Administration Reauthorization Act [FDARA P. L. 115-52], expires at the end of Fiscal Year 2022. With this letter the Administration is providing our recommendations for the reauthorization of PDUFA for the Fiscal Years 2023-2027 [PDUFA VII].

Under PDUFA, the revenues generated from fees paid by the pharmaceutical industry have been used to expedite the process for the review of new prescription drugs and to support and augment regulatory science and drug development. The expenditure of these funds is in accordance with the statute and provides resources to meet the performance goals and procedures that were developed by the Food and Drug Administration [FDA] in consultation with representatives of regulated industry. FDA estimates that the fees negotiated in PDUFA VII will average approximately \$1.4 billion per year. PDUFA has proven to be an extremely effective program that has transformed the U.S. drug review to be the fastest in the world, while setting the global gold standard for quality, efficacy, and safety.

Throughout this process, the FDA has solicited input and worked with various stakeholders, including representatives from consumer and patient advocates, academic research, and health provider groups, and negotiated with the pharmaceutical and biotechnology industries, to develop reauthorization recommendations for PDUFA that would build upon and enhance the success of the program. In addition, we have complied with the statutory requirements to solicit public comments on our recommendations, and the summary of public comments is posted on the agency web site and enclosed with this letter.

Our recommendations build upon the successes of existing programs and performance goals with improvements and expansions to address areas of emerging regulatory science and drug development. For example, this includes, but is not limited to:

Investing critical resources in the Center for Biologics Evaluation and Research to support development, review, and approval of cell and gene therapy products;

Introducing new pilot programs to expedite patient access to novel uses for existing therapies, advance rare diseases development through efficacy endpoint development, and improve the quality and acceptability of real-world evidence;

Enhancing the drug safety system through optimizing the Sentinel Initiative capabilities and improving Risk Evaluation and Mitigation Strategy (REMS) assessments;

Introducing new enhancements related to product quality reviews, chemistry, manu-

facturing, and control approaches, and advancing the utilization of innovative manufacturing technologies;

Enhancing the use of digital health technologies to support drug development and review, along with leveraging modern technology to accelerate FDA's data and technology modernization;

Improving management of user fee resources through advancing FDA's Resource Capacity Planning function and continuing activities to enhance financial transparency.

The following five enclosures are provided for your consideration: The proposed PDUFA VII statutory language; a redline of current law; the Justifications of Proposed Statutory Changes for Reauthorization of PDUFA in Fiscal Years 2023 through 2027; the PDUFA Reauthorization Performance Goals and Procedures in Fiscal Years 2023 through 2027; and the summary of public comments.

Thank you for the opportunity to present our recommendations to reauthorize this vital program. We would be pleased to brief your staff on the details and want to work closely with Congress to reauthorize the program in a timely manner. The Office of Management and Budget has advised that the bill and the enclosed performance goals are in accord with the Administration's program.

Sincerely,

XAVIER BECERRA.

THE SECRETARY OF HEALTH
AND HUMAN SERVICES,
Washington, DC, January 12, 2022.

Hon. CATHY MCMORRIS RODGERS,
Ranking Member, Committee on Energy and Commerce,

House of Representatives, Washington, DC.

DEAR REPRESENTATIVE MCMORRIS RODGERS: The Prescription Drug User Fee Act [PDUFA] as reauthorized by the Food and Drug Administration Reauthorization Act [FDARA P.L. 115-52], expires at the end of Fiscal Year 2022. With this letter the Administration is providing our recommendations for the reauthorization of PDUFA for the Fiscal Years 2023-2027 [PDUFA VII].

Under PDUFA, the revenues generated from fees paid by the pharmaceutical industry have been used to expedite the process for the review of new prescription drugs and to support and augment regulatory science and drug development. The expenditure of these funds is in accordance with the statute and provides resources to meet the performance goals and procedures that were developed by the Food and Drug Administration [FDA] in consultation with representatives of regulated industry. FDA estimates that the fees negotiated in PDUFA VII will average approximately \$1.4 billion per year. PDUFA has proven to be an extremely effective program that has transformed the U.S. drug review to be the fastest in the world, while setting the global gold standard for quality, efficacy, and safety.

Throughout this process, the FDA has solicited input and worked with various stakeholders, including representatives from consumer and patient advocates, academic research, and health provider groups, and negotiated with the pharmaceutical and biotechnology industries, to develop reauthorization recommendations for PDUFA that would build upon and enhance the success of the program. In addition, we have complied with the statutory requirements to solicit public comments on our recommendations, and the summary of public comments is posted on the agency web site and enclosed with this letter.

Our recommendations build upon the successes of existing programs and performance goals with improvements and expansions to address areas of emerging regulatory science and drug development. For example, this includes, but is not limited to:

Investing critical resources in the Center for Biologics Evaluation and Research to support development, review, and approval of cell and gene therapy products;

Introducing new pilot programs to expedite patient access to novel uses for existing therapies, advance rare diseases development through efficacy endpoint development, and improve the quality and acceptability of real-world evidence;

Enhancing the drug safety system through optimizing the Sentinel Initiative capabilities and improving Risk Evaluation and Mitigation Strategy (REMS) assessments;

Introducing new enhancements related to product quality reviews, chemistry, manufacturing, and control approaches, and advancing the utilization of innovative manufacturing technologies;

Enhancing the use of digital health technologies to support drug development and review, along with leveraging modern technology to accelerate FDA's data and technology modernization;

Improving management of user fee resources through advancing FDA's Resource Capacity Planning function and continuing activities to enhance financial transparency.

The following five enclosures are provided for your consideration: The proposed PDUFA VII statutory language; a redline of current law; the Justifications of Proposed Statutory Changes for Reauthorization of PDUFA in Fiscal Years 2023 through 2027; the PDUFA Reauthorization Performance Goals and Procedures in Fiscal Years 2023 through 2027; and the summary of public comments.

Thank you for the opportunity to present our recommendations to reauthorize this vital program. We would be pleased to brief your staff on the details and want to work closely with Congress to reauthorize the program in a timely manner. The Office of Management and Budget has advised that the bill and the enclosed performance goals are in accord with the Administration's program.

Sincerely,

XAVIER BECERRA.

—
THE SECRETARY OF HEALTH
AND HUMAN SERVICES,
Washington, DC, May 10, 2022.

Hon. PATTY MURRAY,
*Chair, Committee on Health, Education, Labor
and Pensions, U.S. Senate,*
Washington, DC.

DEAR CHAIR MURRAY: The Medical Device User Fee Amendments of 2017 (MDUFA IV), as reauthorized by the Food and Drug Administration Reauthorization Act (P.L. 115-52), expires at the end of Fiscal Year (FY) 2022. With this letter, the Administration is providing our recommendations for the reauthorization of MDUFA for FY 2023-2027 (MDUFA V).

Under MDUFA, the revenues generated from fees paid by the medical device industry have been used to expedite the process for the review of device applications and to support and augment regulatory science and medical device development. The expenditure of these funds is in accordance with the statute and provides resources to meet the performance goals and procedures that were developed by the U.S. Food and Drug Administration (FDA) in consultation with representatives of regulated industry.

FDA estimates that the fees negotiated in MDUFA V provide for the following five-year total revenue, prior to adjustments for inflation. They provide a minimum total revenue of approximately \$1.784 billion. In addition, if specific performance goals are met in FY 2023-2025, FDA may collect up to an additional total of approximately \$116 million in FY 2025-2027, for a maximum potential total of approximately \$1.9 billion.

The MDUFA V package also reflects use of an additional \$118 million in funding from

the current MDUFA IV carryover balance to support MDUFA V activities.

Throughout this process, FDA negotiated with the regulated industry and has solicited input and worked with various stakeholders, including representatives from patient, consumer, academic research, and health provider groups, to develop reauthorization recommendations for MDUFA that would build upon and enhance the success of the program. In addition, FDA complied with the statutory requirements to solicit public comments on the draft recommendations, and the summary of public comments is posted on the agency web site.

Now pending its fourth reauthorization, MDUFA has proven to be a highly effective program for supporting the device review process. The program is designed to help ensure patient access to safe, effective, and high-quality medical devices. During the current reauthorization cycle, negotiations with industry primarily focused on: enhancements to certain performance goals; filling funding needs that had not been adequately addressed in MDUFA IV; the launch of a pilot program designed to speed patient access to certain innovative medical devices; programs to advance the development of regulatory science and to advance opportunities for patient input and collaboration in the device development process; and proposals to enhance FDA's accountability and transparency in its use of fees.

The following enclosures are provided for your consideration: the MDUFA Reauthorization Performance Goals and Procedures—Fiscal Years 2023 through 2027 (the MDUFA V Commitment Letter); a redline showing the proposed MDUFA V statutory changes compared to the current law; the Justifications of Proposed Statutory Changes for reauthorization of MDUFA in FY 2023-2027; and the summary of public comments.

Thank you for the opportunity to present our recommendations to reauthorize this vital program. We were pleased to brief your staff on the details of the Commitment Letter and hope to continue working closely with Congress to reauthorize the program in a timely manner. The Office of Management and Budget has advised that the bill and the enclosed performance goals are in accordance with the Administration's program.

Sincerely,

XAVIER BECERRA.

—
THE SECRETARY OF HEALTH AND
HUMAN SERVICES,
Washington, DC, May 10, 2022.

Hon. RICHARD BURR,
*Ranking Member, Committee on Health, Edu-
cation, Labor and Pensions, U.S. Senate,*
Washington, DC.

DEAR SENATOR BURR: The Medical Device User Fee Amendments of 2017 (MDUFA IV), as reauthorized by the Food and Drug Administration Reauthorization Act (P.L. 115-52), expires at the end of Fiscal Year (FY) 2022. With this letter, the Administration is providing our recommendations for the reauthorization of MDUFA for FY 2023-2027 (MDUFA V).

Under MDUFA, the revenues generated from fees paid by the medical device industry have been used to expedite the process for the review of device applications and to support and augment regulatory science and medical device development. The expenditure of these funds is in accordance with the statute and provides resources to meet the performance goals and procedures that were developed by the U.S. Food and Drug Administration (FDA) in consultation with representatives of regulated industry.

FDA estimates that the fees negotiated in MDUFA V provide for the following five-year total revenue, prior to adjustments for infla-

tion. They provide a minimum total revenue of approximately \$1.784 billion. In addition, if specific performance goals are met in FY 2023-2025, FDA may collect up to an additional total of approximately \$116 million in FY 2025-2027, for a maximum potential total of approximately \$1.9 billion.

The MDUFA V package also reflects use of an additional \$118 million in funding from the current MDUFA IV carryover balance to support MDUFA V activities.

Throughout this process, FDA negotiated with the regulated industry and has solicited input and worked with various stakeholders, including representatives from patient, consumer, academic research, and health provider groups, to develop reauthorization recommendations for MDUFA that would build upon and enhance the success of the program. In addition, FDA complied with the statutory requirements to solicit public comments on the draft recommendations, and the summary of public comments is posted on the agency web site.

Now pending its fourth reauthorization, MDUFA has proven to be a highly effective program for supporting the device review process. The program is designed to help ensure patient access to safe, effective, and high-quality medical devices. During the current reauthorization cycle, negotiations with industry primarily focused on: enhancements to certain performance goals; filling funding needs that had not been adequately addressed in MDUFA IV; the launch of a pilot program designed to speed patient access to certain innovative medical devices; programs to advance the development of regulatory science and to advance opportunities for patient input and collaboration in the device development process; and proposals to enhance FDA's accountability and transparency in its use of fees.

The following enclosures are provided for your consideration: the MDUFA Reauthorization Performance Goals and Procedures—Fiscal Years 2023 through 2027 (the MDUFA V Commitment Letter); a redline showing the proposed MDUFA V statutory changes compared to the current law; the Justifications of Proposed Statutory Changes for reauthorization of MDUFA in FY 2023-2027; and the summary of public comments.

Thank you for the opportunity to present our recommendations to reauthorize this vital program. We were pleased to brief your staff on the details of the Commitment Letter and hope to continue working closely with Congress to reauthorize the program in a timely manner. The Office of Management and Budget has advised that the bill and the enclosed performance goals are in accordance with the Administration's program.

Sincerely,

XAVIER BECERRA.

—
THE SECRETARY OF HEALTH AND
HUMAN SERVICES,
Washington, DC, May 10, 2022.

Hon. FRANK PALLONE, Jr.,
Chairman, Committee on Energy and Commerce,
House of Representatives, Washington, DC.

DEAR CHAIR PALLONE: The Medical Device User Fee Amendments of 2017 (MDUFA IV), as reauthorized by the Food and Drug Administration Reauthorization Act (P.L. 115-52), expires at the end of Fiscal Year (FY) 2022. With this letter, the Administration is providing our recommendations for the reauthorization of MDUFA for FY 2023-2027 (MDUFA V).

Under MDUFA, the revenues generated from fees paid by the medical device industry have been used to expedite the process for the review of device applications and to support and augment regulatory science and medical device development. The expenditure of these funds is in accordance with the

statute and provides resources to meet the performance goals and procedures that were developed by the U.S. Food and Drug Administration (FDA) in consultation with representatives of regulated industry.

FDA estimates that the fees negotiated in MDUFA V provide for the following five-year total revenue, prior to adjustments for inflation. They provide a minimum total revenue of approximately \$1.784 billion. In addition, if specific performance goals are met in FY 2023–2025, FDA may collect up to an additional total of approximately \$116 million in FY 2025–2027, for a maximum potential total of approximately \$1.9 billion.

The MDUFA V package also reflects use of an additional \$118 million in funding from the current MDUFA IV carryover balance to support MDUFA V activities.

Throughout this process, FDA negotiated with the regulated industry and has solicited input and worked with various stakeholders, including representatives from patient, consumer, academic research, and health provider groups, to develop reauthorization recommendations for MDUFA that would build upon and enhance the success of the program. In addition, FDA complied with the statutory requirements to solicit public comments on the draft recommendations, and the summary of public comments is posted on the agency web site.

Now pending its fourth reauthorization, MDUFA has proven to be a highly effective program for supporting the device review process. The program is designed to help ensure patient access to safe, effective, and high-quality medical devices. During the current reauthorization cycle, negotiations with industry primarily focused on: enhancements to certain performance goals; filling funding needs that had not been adequately addressed in MDUFA IV; the launch of a pilot program designed to speed patient access to certain innovative medical devices; programs to advance the development of regulatory science and to advance opportunities for patient input and collaboration in the device development process; and proposals to enhance FDA's accountability and transparency in its use of fees.

The following enclosures are provided for your consideration: the MDUFA Reauthorization Performance Goals and Procedures—Fiscal Years 2023 through 2027 (the MDUFA V Commitment Letter); a redline showing the proposed MDUFA V statutory changes compared to the current law; the Justifications of Proposed Statutory Changes for reauthorization of MDUFA in FY 2023–2027; and the summary of public comments.

Thank you for the opportunity to present our recommendations to reauthorize this vital program. We were pleased to brief your staff on the details of the Commitment Letter and hope to continue working closely with Congress to reauthorize the program in a timely manner. The Office of Management and Budget has advised that the bill and the enclosed performance goals are in accordance with the Administration's program.

XAVIER BECERRA.

Hon. CATHY MCMORRIS RODGERS,
Ranking Member, Committee on Energy and
Commerce, House of Representatives, Wash-
ington, DC.

DEAR REPRESENTATIVE MCMORRIS RODGERS: The Medical Device User Fee Amendments of 2017 (MDUFA IV), as reauthorized by the Food and Drug Administration Reauthorization Act (P.L. 115–52), expires at the end of Fiscal Year (FY) 2022. With this letter, the Administration is providing our recommendations for the reauthorization of MDUFA for FY 2023–2027 (MDUFA V).

Under MDUFA, the revenues generated from fees paid by the medical device industry have been used to expedite the process for the review of device applications and to support and augment regulatory science and medical device development. The expenditure of these funds is in accordance with the statute and provides resources to meet the performance goals and procedures that were developed by the U.S. Food and Drug Administration (FDA) in consultation with representatives of regulated industry.

FDA estimates that the fees negotiated in MDUFA V provide for the following five-year total revenue, prior to adjustments for inflation. They provide a minimum total revenue of approximately \$1.784 billion. In addition, if specific performance goals are met in FY 2023–2025, FDA may collect up to an additional total of approximately \$116 million in FY 2025–2027, for a maximum potential total of approximately \$1.9 billion.

The MDUFA V package also reflects use of an additional \$118 million in funding from the current MDUFA IV carryover balance to support MDUFA V activities.

Throughout this process, FDA negotiated with the regulated industry and has solicited input and worked with various stakeholders, including representatives from patient, consumer, academic research, and health provider groups, to develop reauthorization recommendations for MDUFA that would build upon and enhance the success of the program. In addition, FDA complied with the statutory requirements to solicit public comments on the draft recommendations, and the summary of public comments is posted on the agency web site.

Now pending its fourth reauthorization, MDUFA has proven to be a highly effective program for supporting the device review process. The program is designed to help ensure patient access to safe, effective, and high-quality medical devices. During the current reauthorization cycle, negotiations with industry primarily focused on: enhancements to certain performance goals; filling funding needs that had not been adequately addressed in MDUFA IV; the launch of a pilot program designed to speed patient access to certain innovative medical devices; programs to advance the development of regulatory science and to advance opportunities for patient input and collaboration in the device development process; and proposals to enhance FDA's accountability and transparency in its use of fees.

The following enclosures are provided for your consideration: the MDUFA Reauthorization Performance Goals and Procedures—Fiscal Years 2023 through 2027 (the MDUFA V Commitment Letter); a redline showing the proposed MDUFA V statutory changes compared to the current law; the Justifications of Proposed Statutory Changes for reauthorization of MDUFA in FY 2023–2027; and the summary of public comments.

Thank you for the opportunity to present our recommendations to reauthorize this vital program. We were pleased to brief your staff on the details of the Commitment Letter and hope to continue working closely with Congress to reauthorize the program in a timely manner. The Office of Management and Budget has advised that the bill and the enclosed performance goals are in accordance with the Administration's program.

Sincerely,

XAVIER BECERRA.

THE SECRETARY OF HEALTH AND
HUMAN SERVICES,

Washington, DC, January 12, 2022.

Hon. PATTY MURRAY,
Chair, Committee on Health, Education, Labor
and Pensions,
U.S. Senate, Washington, DC.

DEAR CHAIR MURRAY: The Generic Drug User Fee Amendments of 2017 [GDUFA II], as reauthorized by the Food and Drug Administration Reauthorization Act [FDARA P. L. 115–52], expires at the end of Fiscal Year 2022. With this letter, the Administration is providing our recommendations for the reauthorization of GDUFA for the Fiscal Years 2023–2027 [GDUFA III].

Under GDUFA, the revenues generated from fees paid by the generic pharmaceutical industry have been used to expedite the process for the review of generic drugs and to support and augment regulatory science and generic drug development. The expenditure of these funds is in accordance with the statute and provides resources to meet the performance goals and procedures that were developed by the Food and Drug Administration [FDA] in consultation with representatives of regulated industry. FDA estimates that the fees negotiated in GDUFA III will be over \$600 million per year, adjusted annually for inflation.

Throughout this process, FDA has solicited input and worked with various stakeholders, including representatives from consumer, patient, academic research, and health provider groups, and negotiated with the regulated industry, to develop reauthorization recommendations for GDUFA that would build upon and enhance the success of the program. In addition, we have complied with the statutory requirements to solicit public comments on our recommendations, and the summary of public comments is posted on the agency web site.

Our recommendations build upon the successes of existing programs and performance goals with enhancements to advance approvals in fewer review cycles, proposals to enhance regulatory science and expedite complex generic drug development, and financial proposals to support the generic drug program as it evolves. For example, minimizing the issuance of complete response letters through the use of “imminent actions” to approve an application within 60 days after the goal date will reduce the number of review cycles. The pre-ANDA program, which was initiated as part of GDUFA II, has several enhancements, including new goal dates for Product-Specific Guidances (PSGs) that expedite complex generic drug development. The proposals also include improvements for FDA to enhance the operational agility of the GDUFA program through maturation of the Resource Capacity Planning (RCP) capability and the proposed implementation of a Capacity Planning Adjustment (CPA) in fee-setting to generally allow for up to a three percent increase in inflation-adjusted target revenue for the upcoming fiscal year if sustained increases in the workload are predicted, using a methodology developed and evaluated during GDUFA II.

The following five enclosures are provided for your consideration: the proposed GDUFA III statutory language; a redline of these changes compared to the current law; the Justifications of Proposed Statutory Changes for reauthorization of GDUFA in Fiscal Years 2023 through 2027; the GDUFA Reauthorization Performance Goals and Procedures—Fiscal Years 2023 through 2027 [the GDUFA III Commitment Letter]; and the summary of public comments.

Thank you for the opportunity to present our recommendations to reauthorize this vital program. We were pleased to brief your staff on the details of the Commitment Letter and hope to continue working closely

with Congress to reauthorize the program in a timely manner. The Office of Management and Budget has advised that the bill and the enclosed performance goals are in accordance with the Administration's program.

Sincerely,

XAVIER BECERRA.

THE SECRETARY OF HEALTH AND
HUMAN SERVICES,

Washington, DC, January 12, 2022.

Hon. RICHARD BURR,
Ranking Member, Committee on Health, Edu-
cation, Labor and Pensions,
U.S. Senate, Washington, DC.

DEAR SENATOR BURR: The Generic Drug User Fee Amendments of 2017 [GDUFA II], as reauthorized by the Food and Drug Administration Reauthorization Act [FDARA P.L. 115-52], expires at the end of Fiscal Year 2022. With this letter, the Administration is providing our recommendations for the reauthorization of GDUFA for the Fiscal Years 2023-2027 [GDUFA III].

Under GDUFA, the revenues generated from fees paid by the generic pharmaceutical industry have been used to expedite the process for the review of generic drugs and to support and augment regulatory science and generic drug development. The expenditure of these funds is in accordance with the statute and provides resources to meet the performance goals and procedures that were developed by the Food and Drug Administration [FDA] in consultation with representatives of regulated industry. FDA estimates that the fees negotiated in GDUFA III will be over \$600 million per year, adjusted annually for inflation.

Throughout this process, FDA has solicited input and worked with various stakeholders, including representatives from consumer, patient, academic research, and health provider groups, and negotiated with the regulated industry, to develop reauthorization recommendations for GDUFA that would build upon and enhance the success of the program. The pre-ANDA program, which was initiated as part of GDUFA II, has several enhancements, including new goal dates for Product-Specific Guidances [PSGs] that expedite complex generic drug development. The proposals also include improvements for FDA to enhance the operational agility of

the GDUFA program through maturation of the Resource Capacity Planning (RCP) capability and the proposed implementation of a Capacity Planning Adjustment (CPA) in fee-setting to generally allow for up to a three percent increase in inflation-adjusted target revenue for the upcoming fiscal year if sustained increases in the workload are predicted, using a methodology developed and evaluated during GDUFA II.

The following five enclosures are provided for your consideration: the proposed GDUFA III statutory language; a redline of these changes compared to the current law; the Justifications of Proposed Statutory Changes for reauthorization of GDUFA in Fiscal Years 2023 through 2027; the GDUFA Reauthorization Performance Goals and Procedures—Fiscal Years 2023 through 2027 [the GDUFA III Commitment Letter]; and the summary of public comments.

Thank you for the opportunity to present our recommendations to reauthorize this vital program. We were pleased to brief your staff on the details of the Commitment Letter and hope to continue working closely with Congress to reauthorize the program in a timely manner. The Office of Management and Budget has advised that the bill and the enclosed performance goals are in accordance with the Administration's program.

Sincerely,

XAVIER BECERRA.

THE SECRETARY OF HEALTH
AND HUMAN SERVICES,

Washington, DC, January 12, 2022.

Hon. PATTY MURRAY,
Chair, Committee on Health, Education, Labor
and Pensions,
U.S. Senate, Washington, DC.

DEAR CHAIR MURRAY: The Biosimilar User Fee Act [BsUFA] as reauthorized by the FDA Reauthorization Act of 2017 [Pub. L. 115-52], expires at the end of Fiscal Year 2022. With this letter the Administration is providing our recommendations for the reauthorization of BsUFA for the Fiscal Years 2023–2027 [BsUFA III].

Under BsUFA, the revenues generated from fees paid by the pharmaceutical industry have been used to support the process for the review of biosimilar biological products. The expenditure of these funds is in accordance with the statute and provides resources to meet the performance goals and procedures that were developed by the Food and Drug Administration [FDA] in consultation with representatives of regulated industry. FDA estimates that the fees negotiated in BsUFA III will average approximately \$51 million per year.

As part this process, the FDA has negotiated with the pharmaceutical and biotechnology industries to develop reauthorization recommendations for BsUFA that would build upon and enhance the success of the program. In addition, we have complied with the statutory requirements to solicit public comments on our recommendations, and the summary of public comments is posted on the agency web site and enclosed with this letter.

Our recommendations build upon the successes of the BsUFA program by refining elements of the existing program and including new enhancements where appropriate. For example, these recommendations include, but are not limited to:

Introducing new supplement categories, review timelines, and performance goals to expedite the review of certain supplements, including safety labeling updates

Advancing the development of safe and effective interchangeable biosimilar biological products through foundational guidance development, stakeholder engagement, and other activities

Piloting a regulatory science program focused on enhancing regulatory decision-making and facilitating science-based recommendations in areas foundational to biosimilar and interchangeable biological product development

Improving management of user fee resources through advancing FDA's Resource Capacity Planning function and continuation of activities to enhance financial transparency

The following five enclosures are provided for your consideration: The proposed BsUFA III statutory language; a redline of current law; the Justifications of Proposed Statutory Changes for Reauthorization of BsUFA in Fiscal Years 2023 through 2027; the BsUFA Reauthorization Performance Goals and Procedures in Fiscal Years 2023 through 2027; and the summary of public comments.

Thank you for the opportunity to present our recommendations to reauthorize this vital program. We would be pleased to brief your staff on the details and want to work closely with Congress to reauthorize the program in a timely manner. The Office of Management and Budget has advised that the bill and the enclosed performance goals are in accord with the Administration's program.

Sincerely,

XAVIER BECERRA.

THE SECRETARY OF HEALTH
AND HUMAN SERVICES,

Washington, DC, January 12, 2022.

Hon. RICHARD BURR,
Ranking Member, Committee on Health, Edu-
cation, Labor and Pensions,
U.S. Senate, Washington, DC.

DEAR SENATOR BURR:

The Biosimilar User Fee Act [BsUFA] as reauthorized by the FDA Reauthorization Act of 2017 [Pub. L. 115-52], expires at the end of Fiscal Year 2022. With this letter the Administration is providing our recommendations for the reauthorization of BsUFA for the Fiscal Years 2023–2027 [BsUFA III].

Under BsUFA, the revenues generated from fees paid by the pharmaceutical industry have been used to support the process for the review of biosimilar biological products. The expenditure of these funds is in accordance with the statute and provides resources to meet the performance goals and procedures that were developed by the Food and Drug Administration [FDA] in consultation with representatives of regulated industry. FDA estimates that the fees negotiated in BsUFA III will average approximately \$51 million per year.

As part this process, the FDA has negotiated with the pharmaceutical and biotechnology industries to develop reauthorization recommendations for BsUFA that would build upon and enhance the success of the program. In addition, we have complied with the statutory requirements to solicit public comments on our recommendations, and the summary of public comments is posted on the agency web site and enclosed with this letter.

Our recommendations build upon the successes of the BsUFA program by refining elements of the existing program and including new enhancements where appropriate. For example, these recommendations include, but are not limited to:

Introducing new supplement categories, review timelines, and performance goals to expedite the review of certain supplements, including safety labeling updates

Advancing the development of safe and effective interchangeable biosimilar biological products through foundational guidance development, stakeholder engagement, and other activities

Piloting a regulatory science program focused on enhancing regulatory decision-

making and facilitating science-based recommendations in areas foundational to biosimilar and interchangeable biological product development

Improving management of user fee resources through advancing FDA's Resource Capacity Planning function and continuation of activities to enhance financial transparency

The following five enclosures are provided for your consideration: The proposed BsUFA III statutory language; a redline of current law; the Justifications of Proposed Statutory Changes for Reauthorization of BsUFA in Fiscal Years 2023 through 2027; the BsUFA Reauthorization Performance Goals and Procedures in Fiscal Years 2023 through 2027; and the summary of public comments.

Thank you for the opportunity to present our recommendations to reauthorize this vital program. We would be pleased to brief your staff on the details and want to work closely with Congress to reauthorize the program in a timely manner. The Office of Management and Budget has advised that the bill and the enclosed performance goals are in accord with the Administration's program.

Sincerely,

XAVIER BECERRA.

THE SECRETARY OF HEALTH AND HUMAN
SERVICES,

Washington, DC, January 12, 2022.

Hon. FRANK PALLONE JR.,
Chairman, Committee on Energy and Commerce,
House of Representatives,
Washington, DC.

DEAR CHAIR PALLONE: The Biosimilar User Fee Act [BsUFA] as reauthorized by the FDA Reauthorization Act of 2017 [Pub. L. 115-52], expires at the end of Fiscal Year 2022. With this letter the Administration is providing our recommendations for the reauthorization of BsUFA for the Fiscal Years 2023–2027 [BsUFA III].

Under BsUFA, the revenues generated from fees paid by the pharmaceutical industry have been used to support the process for the review of biosimilar biological products. The expenditure of these funds is in accordance with the statute and provides resources to meet the performance goals and procedures that were developed by the Food and Drug Administration [FDA] in consultation with representatives of regulated industry. FDA estimates that the fees negotiated in BsUFA III will average approximately \$51 million per year.

As part this process, the FDA has negotiated with the pharmaceutical and biotechnology industries to develop reauthorization recommendations for BsUFA that would build upon and enhance the success of the program. In addition, we have complied with the statutory requirements to solicit public comments on our recommendations, and the summary of public comments is posted on the agency web site and enclosed with this letter.

Our recommendations build upon the successes of the BsUFA program by refining elements of the existing program and including new enhancements where appropriate. For example, these recommendations include, but are not limited to:

Introducing new supplement categories, review timelines, and performance goals to expedite the review of certain supplements, including safety labeling updates

Advancing the development of safe and effective interchangeable biosimilar biological products through foundational guidance development, stakeholder engagement, and other activities

Piloting a regulatory science program focused on enhancing regulatory decision-making and facilitating science-based recommendations in areas foundational to biosimilar and interchangeable biological product development

Improving management of user fee resources through advancing FDA's Resource Capacity Planning function and continuation of activities to enhance financial transparency

The following five enclosures are provided for your consideration: The proposed BsUFA III statutory language; a redline of current law; the Justifications of Proposed Statutory Changes for Reauthorization of BsUFA in Fiscal Years 2023 through 2027; the BsUFA Reauthorization Performance Goals and Procedures in Fiscal Years 2023 through 2027; and the summary of public comments.

Thank you for the opportunity to present our recommendations to reauthorize this vital program. We would be pleased to brief your staff on the details and want to work closely with Congress to reauthorize the program in a timely manner. The Office of Management and Budget has advised that the bill and the enclosed performance goals are in accord with the Administration's program.

Sincerely,

XAVIER BECERRA.

THE SECRETARY OF HEALTH AND HUMAN SERVICES,

Washington, DC, January 12, 2022.

Hon. CATHY MCMORRIS RODGERS,
Ranking Member, Committee on Energy and Commerce,
House of Representatives,
Washington, DC.

DEAR REPRESENTATIVE MCMORRIS RODGERS: The Biosimilar User Fee Act [BsUFA] as reauthorized by the FDA Reauthorization Act of 2017 [Pub. L. 115-52], expires at the end of Fiscal Year 2022. With this letter the Administration is providing our recommendations for the reauthorization of BsUFA for the Fiscal Years 2023-2027 [BsUFA III].

Under BsUFA, the revenues generated from fees paid by the pharmaceutical industry have been used to support the process for the review of biosimilar biological products. The expenditure of these funds is in accordance with the statute and provides resources to meet the performance goals and procedures that were developed by the Food and Drug Administration [FDA] in consultation with representatives of regulated industry. FDA estimates that the fees negotiated in BsUFA III will average approximately \$51 million per year.

As part of this process, the FDA has negotiated with the pharmaceutical and biotechnology industries to develop reauthorization recommendations for BsUFA that would build upon and enhance the success of the program. In addition, we have complied with the statutory requirements to solicit public comments on our recommendations, and the summary of public comments is posted on the agency web site and enclosed with this letter.

Our recommendations build upon the successes of the BsUFA program by refining elements of the existing program and including new enhancements where appropriate. For example, these recommendations include, but are not limited to:

Introducing new supplement categories, review timelines, and performance goals to expedite the review of certain supplements, including safety labeling updates

Advancing the development of safe and effective interchangeable biosimilar biological products through foundational guidance development, stakeholder engagement, and other activities

Piloting a regulatory science program focused on enhancing regulatory decision-making and facilitating science-based recommendations in areas foundational to biosimilar and interchangeable biological product development

Improving management of user fee resources through advancing FDA's Resource

Capacity Planning function and continuation of activities to enhance financial transparency

The following five enclosures are provided for your consideration: The proposed BsUFA III statutory language; a redline of current law; the Justifications of Proposed Statutory Changes for Reauthorization of BsUFA in Fiscal Years 2023 through 2027; the BsUFA Reauthorization Performance Goals and Procedures in Fiscal Years 2023 through 2027; and the summary of public comments.

Thank you for the opportunity to present our recommendations to reauthorize this vital program. We would be pleased to brief your staff on the details and want to work closely with Congress to reauthorize the program in a timely manner. The Office of Management and Budget has advised that the bill and the enclosed performance goals are in accord with the Administration's program.

Sincerely,

XAVIER BECERRA.

PDUFA REAUTHORIZATION PERFORMANCE GOALS AND PROCEDURES FISCAL YEARS 2023 THROUGH 2027

I. Ensuring the Effectiveness of the Human Drug Review Program

- A. Review Performance Goals
- B. Program for Enhanced Review Transparency and Communication for NME NDAs and Original BLAs
- C. New Molecular Entity (NME) Milestones and Postmarketing Requirements (PMRs)
- D. Split Real Time Application Review (STAR) Pilot Program
- E. Expedited Reviews
- F. Review of Proprietary Names to Reduce Medication Errors
- G. Major Dispute Resolution
- H. Clinical Holds
- I. Special Protocol Question Assessment and Agreement
- J. Meeting Management Goals
- K. Enhancing Regulatory Science and Expediting Drug Development
- L. Enhancing Regulatory Decision Tools to Support Drug Development and Review
- M. Enhancement and Modernization of the FDA Drug Safety System
- N. Enhancements Related to Product Quality Reviews, Chemistry, Manufacturing, and Controls Approaches, and Advancing the Utilization of Innovative Manufacturing Technologies
- O. Enhancing CBER's Capacity to Support Development, Review, and Approval of Cell and Gene Therapy Products
- P. Supporting Review of New Allergenic Extract Products

II. Continued Enhancement of User Fee Resource Management

- A. Resource Capacity Planning
 - B. Financial Transparency
- ##### III. Improving FDA Hiring and Retention of Review Staff
- A. Set Clear Goals for Human Drug Review Program Hiring
 - B. Assessment of Hiring and Retention
- ##### IV. Information Technology and Bioinformatics Goals
- A. Enhancing Transparency and Leveraging Modern Technology
 - B. Expanding and Enhancing Bioinformatics Support
 - C. Enhancing Use of Digital Health Technologies to Support Drug Development and Review
 - V. Improving FDA Performance Management
 - A. Studies will include:
- ##### VI. Progress Reporting for PDUFA VII and Continuing PDUFA VI Initiatives
- ##### Appendix. Definitions and Explanation of Terms

PDUFA REAUTHORIZATION PERFORMANCE GOALS AND PROCEDURES FISCAL YEARS 2023 THROUGH 2027

This document contains the performance goals and procedures for the Prescription

Drug User Fee Act (PDUFA) reauthorization for fiscal years (FYs) 2023-2027, known as PDUFA VII. It is commonly referred to as the "goals letter" or "commitment letter." The goals letter represents the product of FDA's discussions with the regulated industry and public stakeholders, as mandated by Congress. The performance and procedural goals and other commitments specified in this letter apply to aspects of the human drug review program that are important for facilitating timely access to safe, effective, and innovative new medicines for patients. While much of FDA's work is associated with formal tracked performance goals, the Agency and industry mutually agree that it is appropriate to manage some areas of the human drug review program with internally tracked timeframes. This provides FDA the flexibility needed to respond to a highly diverse workload, including unanticipated public health needs. FDA is committed to meeting the performance goals specified in this letter and to continuous improvement of its performance regarding other important areas specified in relevant published documents that relate to preapproval drug development and post-approval activities for marketed products. FDA and the regulated industry will periodically and regularly assess the progress of the human drug review program throughout PDUFA VII. This will allow FDA and the regulated industry to identify emerging challenges and develop strategies to address these challenges to ensure the efficiency and effectiveness of the human drug review program.

Unless otherwise stated, goals apply to cohorts of each fiscal year (FY).

I. ENSURING THE EFFECTIVENESS OF THE HUMAN DRUG REVIEW PROGRAM

A. REVIEW PERFORMANCE GOALS

1. NDA/BLA Submissions and Resubmissions
 - a. Review and act on 90 percent of standard NME NDA and original BLA submissions within 10 months of the 60-day filing date.
 - b. Review and act on 90 percent of priority NME NDA and original BLA submissions within 6 months of the 60-day filing date.
 - c. Review and act on 90 percent of standard non-NME original NDA submissions within 10 months of receipt.
 - d. Review and act on 90 percent of priority non-NME original NDA submissions within 6 months of receipt.
 - e. Review and act on 90 percent of Class 1 resubmitted original applications within 2 months of receipt.
 - f. Review and act on 90 percent of Class 2 resubmitted original applications within 6 months of receipt.
2. Original Efficacy Supplements
 - a. Review and act on 90 percent of standard efficacy supplements within 10 months of receipt.
 - b. Review and act on 90 percent of priority efficacy supplements within 6 months of receipt.
3. Resubmitted Efficacy Supplements
 - a. Review and act on 90 percent of Class 1 resubmitted efficacy supplements within 2 months of receipt.
 - b. Review and act on 90 percent of Class 2 resubmitted efficacy supplements within 6 months of receipt.
4. Original Manufacturing Supplements
 - a. Review and act on 90 percent of manufacturing supplements requiring prior approval within 4 months of receipt.
 - b. Review and act on 90 percent of all other manufacturing supplements within 6 months of receipt.
5. Review Performance Goal Extensions
 - a. Major Amendments
 - i. A major amendment to an original application, efficacy supplement, or resubmission

of any of these applications, submitted at any time during the review cycle, may extend the goal date by three months.

ii. A major amendment may include, for example, a major new clinical safety/efficacy study report; major re-analysis of previously submitted study(ies); submission of a Risk Evaluation and Mitigation Strategy (REMS) with Element to Assure Safe Use (ETASU) not included in the original application; or significant amendment to a previously submitted REMS with ETASU. Generally, changes to REMS that do not include ETASU and minor changes to REMS with ETASU will not be considered major amendments.

iii. A major amendment to a manufacturing supplement submitted at any time during the review cycle may extend the goal date by two months.

iv. Only one extension can be given per review cycle.

v. Consistent with the underlying principles articulated in the GRMP guidance, FDA's decision to extend the review clock should, except in rare circumstances, be limited to occasions where review of the new information could address outstanding deficiencies in the application and lead to approval in the current review cycle.

b. Inspection of Facilities Not Adequately Identified in an Original Application or Supplement

i. All original applications, including those in the "Program," (see Section I.B.2) and supplements are expected to include a comprehensive and readily located list of all manufacturing facilities included or referenced in the application or supplement. This list provides FDA with information needed to schedule inspections of manufacturing facilities that may be necessary before approval of the original application or supplement.

ii. If, during FDA's review of an original application or supplement, the Agency identifies a manufacturing facility that was not included in the comprehensive and readily located list, the goal date may be extended.

1) If FDA identifies the need to inspect a manufacturing facility that is not included as part of the comprehensive and readily located list in an original application or efficacy supplement, the goal date may be extended by three months.

2) If FDA identifies the need to inspect a manufacturing facility that is not included as part of the comprehensive and readily located list in a manufacturing supplement, the goal date may be extended by two months.

6. These review goals are summarized in the following tables:

TABLE 1

Submission Cohort	Standard	Priority
NME NDAs and original BLAs	90% in 10 months of the 60-day filing date	90% in 6 months of the 60-day filing date
Non NME NDAs	90% in 10 months of the receipt date	90% in 6 months of the receipt date
Class 1 Resubmissions	90% in 2 months of the receipt date	90% in 2 months of the receipt date
Class 2 Resubmissions	90% in 6 months of the receipt date	90% in 6 months of the receipt date
Original Efficacy Supplements	90% in 10 months of the receipt date	90% in 6 months of the receipt date
Class 1 Resubmitted Efficacy Supplements	90% in 2 months of the receipt date	90% in 2 months of the receipt date
Class 2 Resubmitted Efficacy Supplements	90% in 6 months of the receipt date	90% in 6 months of the receipt date

TABLE 2

	Prior Approval	All Other
Manufacturing Supplements	90% in 4 months of the receipt date	90% in 6 months of the receipt date

B. Program for Enhanced Review Transparency and Communication for NME NDAs and Original BLAs

To promote transparency and communication between the FDA review team and the applicant, FDA will apply the following model ("the Program") to the review of all New Molecular Entity New Drug Applications (NME NDAs) and original Biologics License Applications (BLAs), including applications that are resubmitted following a Refuse-to-File decision, received from October 1, 2022, through September 30, 2027. The goal of the Program is to promote the efficiency and effectiveness of the first cycle review process and minimize the number of review cycles necessary for approval, ensuring that patients have timely access to safe, effective, and high quality new drugs and biologics.

Approach to Application Review. The standard approach for the review of NME NDAs and original BLAs is described in this section. However, the FDA review team and the applicant may discuss and reach mutual agreement on an alternative approach to the timing and nature of interactions and information exchange between the applicant and FDA, i.e., a Formal Communication Plan for the review of the NME NDA or original BLA. The Formal Communication Plan may include elements of the standard approach (e.g., a mid-cycle communication or a late-cycle meeting) as well as other interactions that sometimes occur during the review process (e.g., a meeting during the filing period to discuss the application, i.e., an "application orientation meeting"). If appropriate, the Formal Communication Plan should specify those elements of the Program that FDA and the applicant agree are unnecessary for the application under review. If the review team and the applicant anticipate developing a Formal Communication Plan, the elements of the plan should be discussed and agreed to at the pre-submission meeting (see Section I.B.1) and reflected in the meeting minutes. The Formal Communication Plan may be reviewed and

amended at any time based on the progress of the review and the mutual agreement of the review team and the applicant. For example, the review team and the applicant may mutually agree at any time to cancel future specified interactions in the Program (e.g., the late-cycle meeting) that become unnecessary (e.g., because previous communications between the review team and the applicant are sufficient). Any amendments made to the Formal Communication Plan should be consistent with the goal of an efficient and timely first cycle review process and not impede the review team's ability to conduct its review.

The remainder of Section I.B describes the parameters that will apply to FDA's review of applications in the Program.

1. Pre-submission meeting: The applicant is strongly encouraged to discuss the planned content of the application with the appropriate FDA review division at a pre-NDA/BLA meeting. This meeting will be attended by the FDA review team, including appropriate senior FDA staff.

a. The pre-NDA/BLA meeting should be held sufficiently in advance of the planned submission of the application to allow for meaningful response to FDA feedback and should generally occur not less than 2 months prior to the planned submission of the application.

b. In addition to FDA's preliminary responses to the applicant's questions, other potential discussion topics include preliminary discussions on the need for REMS or other risk management actions, and, where applicable, the development of a Formal Communication Plan and a timeline for review activities associated with a scheduling recommendation under the Controlled Substances Act for drugs with abuse potential. These discussions will be summarized at the conclusion of the meeting and reflected in the FDA meeting minutes.

c. The FDA and the applicant will agree on the content of a complete application for the proposed indication(s) at the pre-submission meeting. The FDA and the applicant may

also reach agreement on submission of a limited number of application components not later than 30 calendar days after the submission of the original application. These submissions must be of a type that would not be expected to materially impact the ability of the review team to begin its review. These agreements will be summarized at the conclusion of the meeting and reflected in the FDA meeting minutes.

i. Examples of application components that may be appropriate for delayed submission include updated stability data (e.g., 15-month data to update 12-month data submitted with the original submission) or the final audited report of a preclinical study (e.g., carcinogenicity) where the final draft report is submitted with the original application.

ii. Major components of the application (e.g., the complete study report of a Phase 3 clinical trial or the full study report of required long-term safety data) are expected to be submitted with the original application and are not subject to agreement for late submission.

2. Original application submission: Applications are expected to be complete, as agreed between the FDA review team and the applicant at the pre-NDA/BLA meeting, at the time of original submission of the application. If the applicant does not have a pre-NDA/BLA meeting with FDA, and no agreement exists between FDA and the applicant on the contents of a complete application or delayed submission of certain components of the application, the applicant's submission is expected to be complete at the time of original submission.

a. All applications are expected to include a comprehensive and readily located list of all clinical sites and manufacturing facilities included or referenced in the application.

b. Any components of the application that FDA agreed at the pre-submission meeting could be submitted after the original application are expected to be received not later than 30 calendar days after receipt of the original application.

c. Incomplete applications, including applications with components that are not received within 30 calendar days after receipt of the original submission, will be subject to a Refuse-to-File decision.

d. The following parameters will apply to applications that are subject to a Refuse-to-File decision and are subsequently filed over protest:

i. The original submission of the application will be subject to the review performance goal as described in Section I.B.4.

ii. The application will not be eligible for the other parameters of the Program (e.g., mid-cycle communication, late-cycle meeting).

iii. FDA generally will not review amendments to the application during any review cycle. FDA also generally will not issue information requests to the applicant during the agency's review.

iv. The resubmission goals described in Sections I.A.1.e and I.A.1.f will not apply to any resubmission of the application following an FDA complete response action. Any such resubmission will be reviewed as available resources permit.

e. Since applications are expected to be complete at the time of submission, unsolicited amendments are expected to be rare and not to contain major new information or analyses. Review of unsolicited amendments, including those submitted in response to an FDA communication of deficiencies, will be handled in accordance with the GRMP guidance. This guidance includes the underlying principle that FDA will consider the most efficient path toward completion of a comprehensive review that addresses application deficiencies and leads toward a first cycle approval when possible.

3. Day 74 Letter: FDA will follow existing procedures regarding identification and communication of filing review issues in the "Day 74 letter." For applications subject to the Program, the timeline for this communication will be within 74 calendar days from the date of FDA receipt of the original submission. The planned review timeline included in the Day 74 letter for applications in the Program will include the planned date for the internal mid-cycle review meeting. The letter will also include preliminary plans on whether to hold an Advisory Committee (AC) meeting to discuss the application. If applicable, the Day 74 letter will serve as notification to the applicant that the review division intends to conduct an expedited review (See Section I.E).

4. Review performance goals: For NME NDA and original BLA submissions that are filed by FDA under the Program, the PDUFA review clock will begin at the conclusion of the 60-day filing review period that begins on the date of FDA receipt of the original submission. The review performance goals for these applications are as follows:

a. Review and act on 90 percent of standard NME NDA and original BLA submissions within 10 months of the 60-day filing date.

b. Review and act on 90 percent of priority NME NDA and original BLA submissions within 6 months of the 60-day filing date.

5. Mid-Cycle Communication: The FDA Regulatory Project Manager (RPM), and other appropriate members of the FDA review team (e.g., Cross Discipline Team Leader (CDTL)), will call the applicant, generally within 2 weeks following the Agency's internal mid-cycle review meeting, to provide the applicant with an update on the status of the review of their application. An agenda will be sent to the applicant prior to the mid-cycle communication. Scheduling of the internal mid-cycle review meeting will be handled in accordance with the GRMP guidance. The RPM will coordinate the specific date and time of the telephone call with the applicant.

a. The update should include any significant issues identified by the review team to date, any information requests, information regarding major safety concerns and preliminary review team thinking and rationale regarding:

1. risk management,

2. the potential need for any post-marketing requirement(s) (PMRs), and

3. the ability of adverse event reporting and FDA's Active Risk Identification and Analysis (ARIA) system under the Sentinel Initiative to provide sufficient information about product risk.

b. The update should also include proposed date(s) for the late-cycle meeting, updates regarding plans for the AC meeting (if an AC meeting is anticipated), an update regarding FDA's review activities associated with a scheduling recommendation under the Controlled Substances Act (if applicable), and other projected milestone dates for the remainder of the review cycle.

c. In the case of an expedited review, FDA will communicate the timelines for the Late-Cycle Meeting and the Late-Cycle Meeting background package (see Section I.B.6) which may occur earlier with more condensed timeframes compared to a review that is not expedited.

6. Late-Cycle and Advisory Committee Meetings: A meeting will be held between the FDA review team and the applicant to discuss the status of the review of the application late in the review cycle. Late-cycle meetings will generally be face-to-face meetings; however, the meeting may be held by teleconference if FDA and the applicant agree. Since the application is expected to be complete at the time of submission, FDA intends to complete primary and secondary reviews of the application in advance of the planned late-cycle meeting.

a. FDA representatives at the late-cycle meeting are expected to include the signatory authority for the application, review team members from appropriate disciplines, and appropriate team leaders and/or supervisors from disciplines for which substantive issues have been identified in the review to date.

b. For applications that will be discussed at an AC meeting, the following parameters apply:

1. FDA intends to convene AC meetings no later than 2 months (standard review) or no later than 6 weeks (priority review) prior to the PDUFA goal date. The late-cycle meeting will occur not less than 12 calendar days before the date of the AC meeting.

2. FDA intends to provide final questions for the AC to the applicant and the AC not less than 2 calendar days before the AC meeting.

3. Following an AC Meeting, FDA and the applicant may agree on the need to discuss feedback from the AC for the purpose of facilitating the remainder of the review. Such a meeting will generally be held by teleconference without a commitment for formal meeting minutes issued by the agency.

c. For applications that will not be discussed at an AC meeting, the late-cycle meeting will generally occur not later than 3 months (standard review) or two months (priority review) prior to the PDUFA goal date.

d. Late-Cycle Meeting Background Packages: The Agency background package for the late-cycle meeting will be sent to the applicant not less than 10 calendar days (or 2 calendar days for an expedited review) before the late-cycle meeting. The package will consist of a brief memorandum from the review team outlining substantive application issues (e.g., deficiencies identified by primary and secondary reviews), the Agency's background package for the AC meeting (in-

corporated by reference if previously sent to the applicant), potential questions and/or points for discussion for the AC meeting (if planned) and the current assessment of the need for REMS or other risk management actions. If the application is subject to an expedited review, the background package may be streamlined using a bulleted list to identify issues to be discussed.

e. Late-Cycle Meeting Discussion Topics: Potential topics for discussion at the late-cycle meeting include major deficiencies identified to date; issues to be discussed at the AC meeting (if planned); current assessment of the need for REMS and current assessment of the sufficiency of adverse event reporting and the ARIA system to provide information on product risk and the rationale for potential need for a PMR to characterize product risk or other risk management actions; status update of FDA's review activities associated with a scheduling recommendation under the Controlled Substances Act, if applicable; information requests from the review team to the applicant; and additional data or analyses the applicant may wish to submit.

i. With regard to submission of additional data or analyses, the FDA review team and the applicant will discuss whether such data will be reviewed by the Agency in the current review cycle and, if so, whether the submission will be considered a major amendment and trigger an extension of the PDUFA goal date.

7. Inspections: FDA's goal is to complete all GCP, GLP, and GMP inspections for applications in the Program within 6 months of the date of original receipt for priority applications and within 10 months of the date of original receipt for standard applications. This will allow 2 months at the end of the review cycle to attempt to address any deficiencies identified by the inspections.

C. New Molecular Entity (NME) Milestones and Postmarketing Requirements (PMRs)

FDA will continue to review, oversee, track, and communicate postmarketing drug safety issues.

1. Pre-approval review of PMRs: The Agency recognizes the importance of PMRs to ensure the timely availability of information on the safety and efficacy of therapies to the United States public. Therefore, FDA will establish processes to support consistency and predictability for both the Agency and applicants throughout the identification, determination, and evaluation of postmarketing studies.

FDA will establish the following pre-approval process enhancements and guidelines in PDUFA VII:

a. For standard NME NDAs and original BLAs, FDA will communicate details on anticipated PMRs required under Section 505(o)(3), PREA, Accelerated Approval, and the Animal Rule to the applicant no later than 8 weeks prior to the PDUFA action goal date.

b. For priority NME NDAs and original BLAs, FDA will communicate details on anticipated PMRs required under Section 505(o)(3), PREA, Accelerated Approval, and the Animal Rule to the applicant no later than 6 weeks prior to the PDUFA action goal date.

c. The communications described above in clauses (a) and (b) will summarize FDA's preliminary evaluation of required postmarketing studies, including the study purpose, critical study design elements including type of study and study population, timelines for discussions and engagement on the PMR for the remainder of the review cycle, and for 505(o)(3) PMRs the specific serious risk.

d. If a major safety issue which requires a PMR is identified based on data submitted

subsequent to submission of the application these timelines may not apply.

FDA's performance goals for standard NME NDAs and original BLAs will be phased in, starting in FY 2023 as follows:

a. In FY 2023, communicate anticipated PMRs to the applicant no later than 8 weeks prior to the PDUFA action goal date for 60% of standard NME NDAs and original BLAs.

b. In FY 2024, communicate anticipated PMRs to the applicant no later than 8 weeks prior to the PDUFA action goal date for 70% of standard NME NDAs and original BLAs.

c. In FY 2025, communicate anticipated PMRs to the applicant no later than 8 weeks prior to the PDUFA action goal date for 80% of standard NME NDAs and original BLAs.

d. In FY 2026, communicate anticipated PMRs to the applicant no later than 8 weeks prior to the PDUFA action goal date for 80% of standard NME NDAs and original BLAs.

e. In FY 2027, communicate anticipated PMRs to the applicant no later than 8 weeks prior to the PDUFA action goal date for 80% of standard NME NDAs and original BLAs.

FDA's performance goals for priority NME NDAs and original BLAs will be phased in, starting in FY 2023 as follows:

a. In FY 2023, communicate anticipated PMRs to the applicant no later than 6 weeks prior to the PDUFA action goal date for 60% of priority NME NDAs and original BLAs.

b. In FY 2024, communicate anticipated PMRs to the applicant no later than 6 weeks prior to the PDUFA action goal date for 70% of priority NME NDAs and original BLAs.

c. In FY 2025, communicate anticipated PMRs to the applicant no later than 6 weeks prior to the PDUFA action goal date for 80% of priority NME NDAs and original BLAs.

d. In FY 2026, communicate anticipated PMRs to the applicant no later than 6 weeks prior to the PDUFA action goal date for 80% of priority NME NDAs and original BLAs.

e. In FY 2027, communicate anticipated PMRs to the applicant no later than 6 weeks prior to the PDUFA action goal date for 80% of priority NME NDAs and original BLAs.

For the purposes of tracking and reporting metrics on all PMR goals described above, FDA will calculate metrics based on all NME and original BLA applications with issued PMRs, including Section 505(o)(3), PREA, Accelerated Approval, and the Animal Rule.

In addition, FDA will enhance clarity and transparency for the NME Review Program by updating all relevant Manuals of Policies and Procedures (MAPPs), Standard Operating Procedures and Policies (SOPPs), and guidances regarding the pre-approval processes for establishing PMRs beginning FY 2023 and finalizing by the end of FY 2027. The Agency will also conduct training for all relevant review and program support staff on updated processes related to postmarketing studies beginning FY 2023, including:

a. Preliminary communication with applicants at mid-cycle for PMRs, PMCs, and REMS.

b. Processes and procedures for ARIA sufficiency determination.

2. Post-approval review of existing PMRs: In addition to mechanisms currently in place for FDA to review existing PMRs (e.g., Annual Status Reports (ASRs), protocol submissions), applicants may also request review of existing PMRs for release. FDA will establish an additional process for reviewing sponsor-initiated requests as summarized below:

a. The applicant will submit a request summarizing their rationale for why an existing PMR is no longer needed, including all necessary supporting data and information.

b. The relevant FDA review division/office and discipline will initiate review of the request. FDA will notify the applicant of any additional information considered necessary

to evaluate the request within 45 days of receipt.

c. FDA will respond to the applicant with a decision within 60 days of receipt of the original request or within 60 days of receipt of the additional information requested by FDA described in the previous step, whichever is later. FDA's response can be an agreement letter or a non-agreement letter. In a case of a non-agreement letter, the FDA will provide a rationale for their decision.

d. If FDA's response is a non-agreement letter, the applicant may submit a request to the review division for reconsideration by the appropriate committee(s) described in (e) below with justification, and any additional information, and/or data if appropriate.

e. Upon receipt of a reconsideration request, the review division/office will discuss with the appropriate internal committee that includes senior Agency leadership (e.g., Medical Policy and Program Review Committee, Medical Policy Coordinating Committee, and Pediatric Review Committee).

f. The review division/office will issue a written response within 45 days of receipt of the reconsideration request. FDA's response can be an agreement letter or a non-agreement letter. In a case of a non-agreement letter, the FDA will provide a rationale for their decision.

The process and timelines described above will be incorporated into all relevant MAPPs, SOPPs, and guidances beginning FY 2023 and finalizing by the end of FY 2027 and will not be PDUFA-tracked metrics or subject to performance goals.

D. Split Real Time Application Review (STAR) Pilot Program

FDA will establish a STAR pilot program, which has the goal of shortening the time from the date of complete submission to the action date, in order to allow earlier patient access to therapies that address an unmet medical need. The STAR pilot program will apply to efficacy supplements across all therapeutic areas and review disciplines that meet specific criteria. Accepted STAR applications will be submitted in a "split" fashion, specifically in two parts (with the components submitted approximately 2 months apart).

1. Scope: The STAR program will seek to expedite patient access to novel uses for existing therapies by supporting initiation of review earlier than would otherwise occur and therefore allowing earlier approval for qualified efficacy supplements. This program will apply across all therapeutic areas and review disciplines for applications that meet specific criteria. An application will be considered eligible for STAR if each of the following criteria are met:

a. Clinical evidence from adequate and well-controlled investigation(s) indicates that the drug may demonstrate substantial improvement on a clinically relevant endpoint(s) over available therapies.

i. Breakthrough Therapy Designation (BTD) or Regenerative Medicine Advanced Therapy Designation (RMAT) is not required, but above criteria must be met.

b. The application is for a drug intended to treat a serious condition with an unmet medical need.

c. No aspect of the submission is likely to require a longer review time (e.g., requirement for new REMS, etc.).

d. There is no chemistry, manufacturing, or control information that would require a foreign manufacturing site inspection (i.e., domestic site inspections may be allowed if it does not affect the expedited timeframe).

2. Process and Timeline: The following steps summarize the process for applying to and participating in the STAR program:

a. An applicant who believes an efficacy supplement qualifies for review under the

STAR program will request an informal pre-submission teleconference with FDA and provide FDA with topline trial results and proposed labeling.

i. Alternatively, the preliminary discussion may take place as part of a pre-sNDA/sBLA meeting.

b. If FDA agrees that the pre-submission request meets the STAR program eligibility criteria, the application will be accepted into the STAR program, and the applicant will agree to provide the complete application in two parts (these two parts are described in the Split Submission Components section below or as agreed to with the Review Division).

c. FDA will initiate review of the data upon receipt of the Part 1 submission.

d. The PDUFA timeline will begin upon receipt of the Part 2 submission (which completes the application). FDA intends to follow the expedited review timelines (as described in Section I.E below). These timelines target taking an action at least 1 month earlier than the applicable PDUFA goal date.

e. The filing meeting will be scheduled within 30 days of FDA's receipt of the Part 2 submission. During the filing meeting, FDA will determine an action date at least 1 month in advance of the priority 6-month PDUFA goal date.

i. FDA will notify the applicant of the intended action date in the filing letter. The PDUFA goal date will remain unchanged.

3. Split Submission Components: Applications reviewed under the STAR program will comprise two separate submissions.

a. The Part 1 submission initiates FDA's review and will contain:

i. All components of the NDA/BLA efficacy supplement (e.g., complete datasets, proposed labeling, clinical protocols and amendments, topline efficacy and safety results), except for final clinical study reports for the adequate and well-controlled investigation(s) supporting the proposed claim and the eCTD module 2 clinical summaries, and

ii. A document providing topline results for each of the adequate and well-controlled investigations will also be provided in the Part 1 submission.

Any modifications to submission content are at the discretion of the OND/CDER clinical division or CBER review office and must be agreed to in advance.

b. The Part 2 submission initiates the PDUFA timeline and will contain:

i. The clinical study reports for the adequate and well-controlled investigation(s) (e.g., Phase 3 studies) intended to support the proposed indication, and

ii. The eCTD module 2 clinical summaries not included in the Part 1 submission.

Part 1 will be submitted approximately 2 months, and not longer than 3 months, in advance of Part 2. If the Part 1 submission is incomplete (i.e., it does not include every component described in Section D.3.a. above, except for easily correctable minor deficiencies of components not essential to initiating review, as determined by the OND/CDER division or CBER review office), the review will not be initiated until the application is complete and the application will no longer be considered within the STAR program.

4. Transparency: The Agency will develop a public-facing webpage outlining detailed criteria for potential acceptance and participation in the STAR program by October 1, 2022. FDA will conduct an interim assessment that includes internal activities related to STAR by the end of FY 2025. FDA will also conduct a public workshop by the end of Q2 in FY 2026 to discuss the potential value and feasibility of expanding the pilot program to select NME NDAs and BLAs and solicit feedback on experiences with the pilot program

from industry stakeholders. Outputs from the assessment and workshop will be published in a publicly available report summarizing both overall metrics for the pilot program and external stakeholder feedback, including the percentage of applications accepted into the program based on the number of requests and the percentage of applications that had an action date at least 1 month in advance of the priority 6-month PDUFA goal date. FDA will also commit to training review staff on STAR processes and providing a publicly available report summarizing training activities conducted.

5. Implementation: The STAR program will be available to applicants beginning in FY 2023. Expediting reviews will be fully implemented by FY 2024 to allow time for FDA to hire necessary staff to support the expedited timeline.

E. Expedited Reviews

The term “expedited review” in this letter refers to FDA’s review of either 1) a human drug application in the Program that has received priority review designation and the FDA review team identifies as meeting an important public health need, or 2) an efficacy supplement in the STAR pilot program, where the review team plans to act at least 1 month before the PDUFA goal date provided that no significant application deficiencies prevent an early action. In such cases the FDA review team intends to make every effort to conduct an expedited review and act early on the application. FDA conducts expedited reviews to promote timely access to critically needed therapies for patients without compromising FDA’s high standards for demonstrating the safety, efficacy, and quality of new medicines. If significant application deficiencies are identified by the review team at any time during an expedited review, FDA intends to revert, for the remainder of the review, to the normal priority review approach, and will inform the applicant accordingly.

F. Review of Proprietary Names to Reduce Medication Errors

To enhance patient safety, FDA is committed to various measures to reduce medication errors related to look-alike and sound-alike proprietary names and such factors as unclear label abbreviations, acronyms, dose designations, and error-prone label and packaging design. The following performance goals apply to FDA’s review of drug and biological product proprietary names during development (as early as end-of-phase 2) and during FDA’s review of a marketing application:

1. Proprietary Name Review Performance Goals During Drug Development

a. Review 90% of proprietary name submissions filed within 180 days of receipt. Notify sponsor of tentative acceptance or non-acceptance.

b. In the proprietary name is found to be unacceptable, the sponsor can request reconsideration by submitting a written rebuttal with supporting data or request a meeting within 60 days to discuss the initial decision (meeting package required).

c. In the proprietary name is found to be unacceptable, the above review performance goals also would apply to the written request for reconsideration with supporting data or the submission of a new proprietary name.

d. A complete submission is required to begin the review clock.

2. Proprietary Name Review Performance Goals During Application Review

a. Review 90% of NDA/BLA proprietary name submissions filed within 90 days of receipt. Notify applicant of tentative acceptance/non-acceptance.

b. A supplemental review will be done meeting the above review performance goals

if the proprietary name has been submitted previously (investigational new drug (IND) phase after end-of-phase 2) and has received tentative acceptance.

c. In the proprietary name is found to be unacceptable, the applicant can request reconsideration by submitting a written rebuttal with supporting data or request a meeting within 60 days to discuss the initial decision (meeting package required).

d. In the proprietary name is found to be unacceptable, the above review performance goals apply to the written request for reconsideration with supporting data or the submission of a new proprietary name.

e. A complete submission is required to begin the review clock.

G. Major Dispute Resolution

1. Procedure:

For procedural or scientific matters involving the review of human drug applications and supplements (as defined in PDUFA) that cannot be resolved at the signatory authority level (including a request for reconsideration by the signatory authority after reviewing any materials that are planned to be forwarded with an appeal to the next level), the response to appeals of decisions will occur within 30 calendar days of the Center’s receipt of the written appeal.

2. Performance goal:

90% of such answers are provided within 30 calendar days of the Center’s receipt of the written appeal.

3. Conditions:

a. Sponsors should first try to resolve the procedural or scientific issue at the signatory authority level. If it cannot be resolved at that level, it should be appealed to the next higher organizational level (with a copy to the signatory authority) and then, if necessary, to the next higher organizational level.

b. Responses should be either verbal (followed by a written confirmation within 14 calendar days of the verbal notification) or written and should ordinarily be to either grant or deny the appeal.

c. If the decision is to deny the appeal, the response should include reasons for the denial and any actions the sponsor might take to persuade the Agency to reverse its decision.

d. In some cases, further data or further input from others might be needed to reach a decision on the appeal. In these cases, the “response” should be the plan for obtaining that information (e.g., requesting further information from the sponsor, scheduling a meeting with the sponsor, scheduling the issue for discussion at the next scheduled available advisory committee (AC)).

e. In these cases, once the required information is received by the Agency (including any advice from an AC), the person to whom the appeal was made again has 30 calendar days from the receipt of the required information in which to either grant or deny the appeal.

f. Again, if the decision is to deny the appeal, the response should include the reasons for the denial and any actions the sponsor might take to persuade the Agency to reverse its decision.

g. N.B. If the Agency decides to present the issue to an AC and there are not 30 days before the next scheduled AC, the issue will be presented at the following scheduled committee meeting to allow conformance with AC administrative procedures.

H. Clinical Holds

1. Procedure:

The Center should respond to a sponsor’s complete response to a clinical hold within 30 days of the Agency’s receipt of the submission of such sponsor response.

2. Performance goal:

90% of such responses are provided within 30 calendar days of the Agency’s receipt of the sponsor’s response.

I. Special Protocol Question Assessment and Agreement

1. Procedure:

Upon specific request by a sponsor (including specific questions that the sponsor desires to be answered), the Agency will evaluate certain protocols and issues to assess whether the design is adequate to meet scientific and regulatory requirements identified by the sponsor.

a. The sponsor should submit a limited number of specific questions about the protocol design and scientific and regulatory requirements for which the sponsor seeks agreement (e.g., is the dose range in the carcinogenicity study adequate, considering the intended clinical dosage; are the clinical endpoints adequate to support a specific efficacy claim).

b. Within 45 days of Agency receipt of the protocol and specific questions, the Agency will provide a written response to the sponsor that includes a succinct assessment of the protocol and answers to the questions posed by the sponsor. If the Agency does not agree that the protocol design, execution plans, and data analyses are adequate to achieve the goals of the sponsor, the reasons for the disagreement will be explained in the response.

c. Protocols that qualify for this program include: carcinogenicity protocols, stability protocols, and Phase 3 protocols for clinical trials that will form the primary basis of an efficacy claim. For such Phase 3 protocols to qualify for this comprehensive protocol assessment, the sponsor must have had an end-of-Phase 2/pre-Phase 3 meeting with the review division so that the division is aware of the developmental context in which the protocol is being reviewed and the questions being answered.

d. N.B. For products that will be using Subpart E or Subpart H development schemes, the Phase 3 protocols mentioned in this paragraph should be construed to mean those protocols for trials that will form the primary basis of an efficacy claim no matter what phase of drug development in which they happen to be conducted.

e. If a protocol is reviewed under the process outlined above and agreement with the Agency is reached on design, execution, and analyses and if the results of the trial conducted under the protocol substantiate the hypothesis of the protocol, the Agency agrees that the data from the protocol can be used as part of the primary basis for approval of the product. The fundamental agreement here is that having agreed to the design, execution, and analyses proposed in protocols reviewed under this process, the Agency will not later alter its perspective on the issues of design, execution, or analyses unless public health concerns unrecognized at the time of protocol assessment under this process are evident.

2. Performance goal:

90% of special protocol assessments and agreement requests completed and returned to sponsor within the timeframe.

3. Reporting:

The Agency will track and report the number of original special protocol assessments and resubmissions per original special protocol assessment.

J. Meeting Management Goals

Formal PDUFA meetings between sponsors and FDA consist of Type A, B, B(EOP), C, Type D and INTERACT meetings. FDA plays an active role during drug development by providing advice and feedback to sponsors on the overall drug development programs during meetings conducted between sponsors

and FDA. In general, FDA’s guidance provided at these meetings describe the Agency’s current thinking on a topic and should be viewed only as recommendations, unless specific regulatory or statutory requirements are cited. These meetings are further described below.

Type A meetings are those meetings that are necessary for an otherwise stalled drug development program to proceed (i.e., a “critical path” meeting) or to address an important safety issue. Post-action meetings requested within three months after an FDA regulatory action other than approval (i.e., issuance of a complete response letter) will also generally be considered Type A meetings.

Type B meetings include pre-IND meetings and pre-NDA/BLA meetings, while Type B(EOP) meetings are reserved for certain End-of-Phase 1 meetings (i.e., for 21 CFR Part 312 Subpart E or 21 CFR Part 314 Subpart H or similar products) and End-of-Phase 2/pre-Phase 3 meetings. Meetings regarding REMS or postmarketing requirements that occur outside the context of the review of a marketing application will also generally be considered Type B meetings.

A Type C meeting is any type of meeting other than Type A, B, B(EOP), D, or INTERACT.

A Type D meeting is focused on a narrow set of issues (e.g., often one, but typically not more than two issues and associated questions). Requests could include:

A follow-up question that raises a new issue after a formal meeting (i.e., more than just a clarifying question about an FDA response from a prior meeting);

A narrow issue on which the sponsor is seeking Agency input with only a few associated questions; or

A general question about an innovative development approach that does not require extensive, detailed advice.

Type D meetings should be limited to no more than 2 focused topics. If the sponsor has several issues or a complex single issue with multiple questions, a Type C meeting should be requested rather than requesting several Type D meetings. In addition, the issue should not require input from more than 3 disciplines or Divisions. If the scope of the meeting is broad or includes complex questions/issues that require input from more than 3 disciplines or Divisions, then FDA will inform the sponsor that the Agency will be converting the meeting to the appropriate meeting type (Type B or C) and the sponsor can either withdraw their request or accept the FDA’s meeting-type conversion without re-submitting a new meeting request.

1. Initial Targeted Engagement for Regulatory Advice on CBER/CDER Products (INTERACT) meetings are intended for novel questions and unique challenges in early development (i.e., prior to filing of an IND). The issues typically relate to IND requirements for example: questions regarding design of IND-enabling toxicity studies (e.g., species, endpoints), complex manufacturing technologies or processes, development of innovative devices used with a drug or biologic, or the use of cutting-edge testing methodologies. INTERACT meetings are intended to facilitate IND-enabling efforts where the sponsor is facing a novel, challenging issue that might otherwise delay progress of the product towards entry into the clinic in the absence of this early FDA input. Typically, the issue is early in a development program—prior to when a pre-IND meeting might be requested—and the issue may delay initiation of, or progress of, IND-enabling studies. The sponsor needs to have selected a specific investigational product or a product-derivation strategy to evaluate in a clinical

study before requesting an INTERACT meeting.

a. Questions and topics within the scope of an INTERACT meeting include:

i. Novel questions for all CDER and CBER products (i.e., questions where there is no existing guidance or other information in writing the company could reference from FDA).

ii. These meetings are intended to provide FDA input on issues that a sponsor needs to address prior to a pre-IND meeting, including issues such as:

1) Choice of appropriate preclinical models or necessary toxicology studies for novel drug platforms or drug candidates;

2) CMC issues or testing strategies aimed to demonstrate product safety, adequate to support first-in-human study;

3) Overall advice related to the design of proof-of-concept or other pilot safety/biodistribution studies necessary to support administration of an investigational product in a first-in-human clinical trial;

4) General recommendations regarding a future first-in-human trial in a target clinical population where the population is novel and there is no prior precedent or guidance;

5) Recommendations on approach for further development of an early-stage product with limited CMC, pharmacology/toxicology, and/or clinical data that were collected outside of a US IND; and

6) Other topics that would be agreed upon by FDA.

2. Responses to Meeting Requests

a. Procedure: FDA will notify the requester in writing of the date, time, and place for the meeting, as well as expected Center participants following receipt of a formal meeting request. Table 3 below indicates the timeframes for FDA’s response to a meeting request.

TABLE 3

Meeting Type	Response Time (calendar days)
A	14
B	21
B(EOP)	14
C	21
D	14
INTERACT	21

i. For any type of meeting, the sponsor may request a written response to its questions rather than a face-to-face or teleconference meeting. FDA will review the request and make a determination on whether a written response is appropriate or whether a face-to-face or teleconference meeting is necessary. If a written response is deemed appropriate, FDA will notify the requester of the date it intends to send the written response in the Agency’s response to the meeting request. This date will be consistent with the timeframes specified in Table 4 below for the specific meeting type.

ii. For pre-IND, Type C, Type D, and INTERACT meetings, while the sponsor may request a face-to-face meeting, the Agency may determine that a written response to the sponsor’s questions would be the most appropriate means for providing feedback and advice to the sponsor. When it is determined that the meeting request can be appropriately addressed through a written response, FDA will notify the requester of the date it intends to send the written response in the Agency’s response to the meeting request. This date will be consistent with the timeframes specified in Table 4 below for the specific meeting type. If the sponsor believes a face-to-face Pre-IND meeting is valuable and warranted, then the sponsor may provide a rationale in a follow-up correspondence explaining why a face-to-face meeting is valuable and warranted, and FDA will convert

where possible WRO to a face-to-face meeting for requests that includes novel approaches to clinical development and/or where precedents are not well established.

b. Performance Goal: FDA will respond to meeting requests and provide notification within the response times noted in Table 3 for 90% of each meeting type.

3. Scheduling Meetings

a. Procedure: FDA will schedule the meeting on the next available date at which all applicable Center personnel are available to attend, consistent with the component’s other business; however, the meeting should be scheduled consistent with the type of meeting requested. Table 4 below indicates the timeframes for the scheduled meeting date following receipt of a formal meeting request, or in the case of a written response, the timeframes for the Agency to send the written response. If the requested date for any meeting type is greater than the specified timeframe, the meeting date should be within 14 calendar days of the requested date.

Table 4

Meeting Type	Meeting Scheduling or Written Response Time
A	30 calendar days from receipt of meeting request
B	60 calendar days from receipt of meeting request
B(EOP)	70 calendar days from receipt of meeting request
C	75 calendar days from receipt of meeting request
D	50 calendar days from receipt of meeting request
INTERACT	75 calendar days from receipt of meeting request

b. Performance goal:

i. Type A, B, B(EOP) and C meetings: 90% of meetings are held within the timeframe for each meeting type, and 90% of written responses are sent within the timeframe for each meeting type.

ii. Type D meeting: performance goals for FDA will be phased in, starting in FY 2023 as follows:

1) By FY 2023, hold 50% of Type D meetings, or send written response, within 50 calendar days from receipt of meeting request.

2) By FY 2024, hold 60% of Type D meetings, or send written response, within 50 calendar days from receipt of meeting request.

3) By FY 2025, hold 70% of Type D meetings, or send written response, within 50 calendar days from receipt of meeting request.

4) By FY 2026, hold 80% of Type D meetings, or send written response, within 50 calendar days from receipt of meeting request.

5) By FY 2027, hold 90% of Type D meetings, or send written response, within 50 calendar days from receipt of meeting request.

INTERACT meeting: performance goals for FDA will be phased in, starting in FY 2023 as follows:

1) By FY 2023, hold 50% of INTERACT meetings, or send written response, within 75 calendar days from receipt of meeting request.

2) By FY 2024, hold 60% of INTERACT meetings, or send written response, within 75 calendar days from receipt of meeting request.

3) By FY 2025, hold 70% of INTERACT meetings, or send written response, within 75 calendar days from receipt of meeting request.

4) By FY 2026, hold 80% of INTERACT meetings, or send written response, within 75 calendar days from receipt of meeting request.

5) By FY 2027, hold 90% of INTERACT meetings, or send written response, within 75 calendar days from receipt of meeting request.

4. Meeting Background Packages

The timing of the Agency’s receipt of the sponsor background package for each meeting type (including those meetings for which a written response will be provided) is specified in Table 5 below.

TABLE 5

Meeting Type	Receipt of Background Package
A	At the time of the meeting request
B	30 calendar days before the date of the meeting or expected written response
B(EOP)	50 calendar days before the date of the meeting or expected written response*
C	47 calendar days before the date of the meeting or expected written response*
D	At the time of the meeting request
INTERACT	At the time of the meeting request

* If the scheduled date of a Type B(EOP) or C meeting is earlier than the timeframes specified in Table 4, the meeting background package will be due no sooner than 6 calendar days and 7 calendar days following the response time for Type B(EOP) and C meetings specified in Table 3, respectively.

5. Preliminary Responses to Sponsor Questions

a. Procedure: The Agency will send preliminary responses to the sponsor's questions contained in the background package no later than five calendar days before the meeting date for Type B(EOP), C, D, and INTERACT meetings. For all other meeting types, the FDA intends to send the requester its preliminary responses no later than 2 calendar days before the meeting.

b. Performance goal: 90% of preliminary responses to questions for Type B(EOP), D, and INTERACT meetings are issued by FDA no later than five calendar days before the meeting date.

6. Sponsor Notification to FDA

Not later than three calendar days following the sponsor's receipt of FDA's preliminary responses for a Type B(EOP), D, INTERACT, or C meeting, the sponsor will notify FDA of whether the meeting is still needed, and if it is, the anticipated agenda of the meeting given the sponsor's review of the preliminary responses.

7. Meeting Minutes

a. Procedure: The Agency will prepare minutes that will be available to the sponsor 30 calendar days after the meeting for Type A, B, B(EOP), C, and D. The minutes will clearly outline the important agreements, disagreements, issues for further discussion, and action items from the meeting in bulleted form and need not be in great detail. Meeting minutes are not required if the Agency transmits a written response for any meeting type. For INTERACT meetings, preliminary responses will be annotated and resent within 30 calendar days if advice provided changes as a result of the meeting. In cases of a WRO, the WRO will serve as meeting minutes from FDA.

b. Performance goal: 90% of minutes are issued within 30 calendar days of the date of the meeting.

8. Conditions

For a meeting to qualify for these performance goals:

A written request must be submitted to the review division.

b. The written request must provide:

i. A brief statement of the purpose of the meeting and the sponsor's proposal for either a face-to-face/virtual/teleconference meeting or a written response from the Agency;

ii. A listing of the specific objectives/outcomes the requester expects from the meeting;

iii. A proposed agenda, including estimated times needed for each agenda item;

iv. A listing of planned external attendees;

v. A listing of requested participants/disciplines representative(s) from the Center with an explanation for the request as appropriate; and

vi. The date that the meeting background package will be sent to the Center. Refer to Table 5 for timeframes for the Agency's receipt of background packages.

c. The Agency concurs that the meeting will serve a useful purpose (i.e., it is not premature or clearly unnecessary). However, re-

quests for a Type B or B(EOP) meeting will be honored except in the most unusual circumstances.

9. Guidance, Clarity, and Transparency

a. By September 30, 2023, FDA will issue a revised draft of the existing draft guidance on "Formal Meetings Between the FDA and Sponsors or Applicants of PDUFA Products" with information pertaining to INTERACT, Type D meetings, and the follow-up opportunity described below. In addition, FDA will update relevant MAPPs and SOPPs.

b. Follow-up opportunity: For all meeting types, to ensure the sponsor's understanding of FDA feedback from meeting discussions or a WRO, sponsors may submit clarifying questions to the agency. Only questions of a clarifying nature will be permitted, i.e., to confirm something in minutes or a WRO issued by FDA, rather than raising new issues or new proposals. FDA will develop criteria and parameters for permissible requests, and FDA may exercise discretion about whether requests are in-scope. The clarifying questions should be sent in writing as a "Request for Clarification" to the FDA within 20 calendar days following receipt of meeting minutes or a WRO. For questions that meet the criteria, FDA will issue a response in writing within 20 calendar days of receipt of the clarifying questions. FDA's response will reference the original meeting minutes or WRO.

c. Training: FDA will conduct external training to ensure the best practices outlined in the draft guidances are communicated to Industry.

K. Enhancing Regulatory Science and Expediting Drug Development

To ensure that new and innovative products are developed and available to patients in a timely manner, FDA will continue to advance the use of biomarkers and pharmacogenomics, enhancing communications between FDA and sponsors during drug development, and advancing the development of drugs for rare diseases. The extension and continuation of this work will encompass further evaluation and enhancement of FDA-sponsor communications, ensuring the sustained success of the breakthrough therapy program, continuing early consultations between FDA and sponsors on the use of new surrogate endpoints as the primary basis for product approval, advancing rare disease drug development, advancing the development of combination products, and exploring the use of real world evidence for use in regulatory decision-making.

1. Promoting Innovation Through Enhanced Communication Between FDA and Sponsors During Drug Development

FDA's philosophy is that timely interactive communication with sponsors during drug development is a core Agency activity to help achieve the Agency's mission to facilitate the conduct of efficient and effective drug development programs, which can enhance public health by making new safe and effective drugs available to the American public in a timely manner. Accordingly, FDA will maintain dedicated drug development communication and training staffs in CDER and CBER, focused on enhancing communication between FDA and sponsors during drug development.

One function of the staff is to serve as a liaison that will facilitate general and, in some cases, specific interactions between sponsors and each Center. The liaison will serve as a point of contact for sponsors who have general questions about drug development or who need clarification on which review division to contact with their questions. The liaison will also serve as a secondary point of contact in each Center for sponsors who are encountering challenges in

communication with the review team for their IND (e.g., in instances when they have not received a response from the review team to a simple or clarifying question or referral to the formal meeting process within 30 days of the sponsor's initial request). In such cases, the liaison will work with the review team and the sponsor to facilitate resolution of the issue.

The second function of the staff is to provide ongoing training to the review organizations on best practices in communication with sponsors. The content of training includes, but is not limited to, FDA's philosophy regarding timely interactive communication with sponsors during drug development as a core Agency activity, best practices for addressing sponsor requests for advice and timely communication of responses through appropriate mechanisms (e.g., teleconferences, secure email, or when questions are best addressed through the formal meetings process), and the role of the liaison staff in each Center in facilitating communication between the review staff and sponsor community, including the staff's role in facilitating resolution of individual communication requests. The staff will also collaborate with sponsor stakeholders (e.g., through participation in workshops, webinars, and other meetings) to communicate FDA's philosophy and best practices regarding communication with sponsors during drug development.

Best Practices for meetings are the responsibility of both Industry and FDA. Efforts from both Industry and FDA are needed in order to continue advancement, improvement, and updating of best practices. To continue to enhance timely interactive communication with sponsors during drug development in PDUFA VII, FDA will do the following:

a. Public Workshop. FDA will hold a public meeting to discuss best practices for meeting management by July 30, 2024, including issues related to submission of meeting requests, efficient time management, coordinating meeting agenda, development and submission of meeting background packages and lessons learned from the Coronavirus Disease 2019 ("COVID-19") pandemic including virtual meeting platforms. Learnings from the public meeting could inform FDA's internal process improvement efforts and, as appropriate, be reflected in updating guidances, as noted below. This public workshop will also discuss and share experience and metrics related to all PDUFA meeting activities, including Type D and INTERACT meetings. FDA will discuss the number of meeting requests granted and denied for INTERACT meetings, including a summary of rationales for denied meeting requests. Reported metrics will include the number of requests granted and denied for in-person pre-IND, Type C, Type D, and INTERACT meetings. FDA and Industry will agree on the information that FDA may share publicly in this meeting.

b. Guidance. Based on the discussion at the public meeting mentioned above in paragraph (a), and FDA's experience with conducting meetings effectively, FDA will update public documents, as appropriate, including publishing revised draft or final version of the Best Practices for Communication Between IND Sponsors and FDA During Drug Development guidance mentioned below, 18 months after the public meeting is held.

c. Training. FDA will conduct external training to ensure the best practices outlined in the guidances are communicated to Industry.

2. Ensuring Sustained Success of Breakthrough Therapy Program

Breakthrough therapy designation is intended to expedite the development and review of drug and biological products, alone or in combination, for serious or life-threatening diseases or conditions when preliminary clinical evidence indicates that the drug may demonstrate substantial improvement over existing therapies. A breakthrough therapy designation includes the features of the fast track program, intensive FDA guidance on an efficient drug development program, and an organizational commitment by FDA involving senior managers. FDA will continue to retain current resources to enable the Agency to continue to work closely with sponsors throughout the breakthrough therapy designation, development, and review processes. Both FDA and the regulated industry are committed to ensuring the expedited development and review of innovative therapies for serious or life-threatening diseases or conditions by investing additional resources into the breakthrough therapy program.

3. Early Consultation on the Use of New Surrogate Endpoints

FDA and industry believe that early consultation between review teams and sponsors is important for development programs where the sponsor intends to use a biomarker as a new surrogate endpoint that has never been previously used as the primary basis for product approval in the proposed context of use. Early consultation in the drug development program allows the review team to consult with FDA senior management to evaluate the sponsor's proposal before providing advice regarding the proposed biomarker as a new surrogate endpoint to support accelerated or traditional approval. Requests to engage with FDA on this topic will be considered a Type C meeting request. The purpose of this meeting is to discuss the feasibility of the surrogate as a primary endpoint and identify any gaps in knowledge and how they might be addressed. The outcome of this meeting may require further investigation by the sponsor and discussion and agreement with the agency before the surrogate endpoint could be used as the primary basis for product approval. To qualify for this consultation, these Type C meeting requests must be accompanied by the complete meeting background package at the time the request is made that includes preliminary human data indicating impact of the drug on the biomarker at a dose that appears to be generally tolerable. The remaining meeting procedures as described in Section I.J of this document will apply.

4. Advancing Development of Drugs for Rare Diseases

FDA will build on the success of rare disease programs in CDER and CBER by continuing to advance and facilitate the development and timely approval of drugs and biologics for rare diseases, including rare diseases in children. The Rare Diseases Team staff in CDER will continue to be integrated into review teams for rare disease development programs and application review to provide their unique expertise on flexible and feasible approaches to studying and reviewing such drugs to include, for example, innovative use of biomarkers, consideration of non-traditional clinical development programs, use of adaptive study designs, evaluation of novel endpoints, application of new approaches to statistical analysis, and appropriate use of FDA's expedited development and review programs (i.e., Fast Track, Breakthrough, Priority Review, and Accelerated Approval). CBER, through its Rare Disease Program Staff, will also ensure that its review offices consider such flexible and feasible approaches in review.

The rare disease staff will also continue to provide training to all CDER and CBER re-

view staff related to development, review, and approval of drugs for rare diseases as part of the reviewer training core curriculum. The objective of the training will be to familiarize review staff with the challenges associated with rare disease applications and strategies to address these challenges; to promote best practices for review and regulation of rare disease applications; and to encourage flexibility and scientific judgment among reviewers in the review and regulation of rare disease drug development and application review. The training will also emphasize the important role of the rare disease staff as members of the core review team to help ensure consistency of scientific and regulatory approaches across applications and review teams.

Rare disease staff will continue to engage in outreach to industry, patient groups, and other stakeholders to provide training on FDA's rare disease programs. The staff will continue to foster collaborations in the development of tools (e.g., patient reported outcome measures) and data (e.g., natural history studies) to support development of drugs for rare diseases. In addition, the staff will also facilitate interactions between stakeholders and FDA review divisions to increase awareness of FDA regulatory programs and engagement of patients in FDA's regulatory decision-making.

FDA will include updates on the activities and success of the rare disease programs in the PDUFA annual performance report to include, for example, the number of training courses offered and staff trained, the number of review programs where rare disease staff participated as core team members, and metrics related to engagement with external stakeholders. FDA will also continue to include information on rare disease approvals in its annual reports on innovative drug approvals, including utilization of expedited programs and regulatory flexibility and appropriate comparative metrics to non-rare disease innovative approvals.

a. Rare Disease Endpoint Advancement (RDEA) Pilot Program

The lack of regulatory precedent, small trial populations, and/or limited understanding of disease natural history associated with rare diseases creates unique challenges when determining the appropriate efficacy endpoint(s) for clinical trials intended to evaluate the effectiveness of rare disease therapies.

Though difficult to establish, well-developed efficacy endpoints, especially those that could apply to other rare diseases with similar manifestations, drive the general advancement of rare disease drug development. In addition to challenges associated with developing endpoints that appropriately capture key signs and symptoms of a rare disease and directly measure how patients feel, function, or survive, surrogate endpoint development is also challenging in diseases with slow progression, small patient populations, or other challenges commonly associated with drug development in rare diseases.

Current mechanisms for sponsors of rare disease drug development programs to collaborate with FDA are not structured to provide repeated, intensive interactions with the Agency. To support the advancement of rare disease treatments, FDA will establish a pilot program for supporting efficacy endpoint development for drugs that treat rare diseases by offering additional engagement opportunities with the Agency to sponsors of development programs that meet specific criteria. In addition, FDA will develop the staff capacity to enable and facilitate appropriate development and use of these types of novel endpoints. This staff will support the complex and intensive review work nec-

essary to evaluate novel endpoint development with a focus on the challenges of trial designs utilizing small populations.

Scope. The RDEA pilot program will seek to advance rare disease drug development programs by providing a mechanism for sponsors to collaborate with FDA throughout the efficacy endpoint development process. An endpoint, or endpoints, will be considered eligible for proposal submission to RDEA if each of the following criteria are met:

(1) The associated development program should be active and address a rare disease, with an active IND or pre-IND for the rare disease.

(a) Sponsors who do not yet have an active development program but have, or are initiating, a natural history study where the proposed endpoint is intended to be studied are also eligible to apply.

(b) The FDA may also consider accepting a proposal for a development program for a common disease that includes innovative or novel endpoint elements, including the specific endpoint and/or the methodology being developed, if there is sufficient justification that the proposal could be applicable to a rare disease.

(2) The proposed endpoint is a novel efficacy endpoint intended to establish substantial evidence of effectiveness for a rare disease treatment.

(a) An endpoint is considered novel if it has never been used to support drug approval or if it has been substantially modified from previous use to support drug approval.

(b) Preference will be given to proposals that have the potential to impact drug development more broadly, such as one that uses a novel approach to develop an efficacy endpoint or an endpoint that could potentially be relevant to other diseases. Preference will also be given to accepting proposals that reflect a range of different types of endpoints.

(c) For surrogate endpoint proposals, preference will be given to those with novel approaches for collecting additional clinical data in the pre-market stage to advance the validation of these endpoints. If the sponsor is proposing to develop a surrogate endpoint as part of a rare disease application, participation in a prior Type C Surrogate Endpoint meeting is encouraged.

(3) FDA will select a limited number of qualified proposals for admission into RDEA that increases after the first year of PDUFA VII:

(a) FY 2023: Sponsors may submit proposals beginning in Q4, and FDA will accept a maximum of 1 proposal.

(b) FY 2024-FY 2027: FDA will accept up to 1 proposal per quarter with a maximum of 3 proposals per year.

(c) Expansion of the program may be dependent on FDA staffing.

Process and Timeline. The following steps summarize the process for applying to and participating in the RDEA pilot program:

(1) A sponsor who believes a development program qualifies for participation in RDEA will submit a proposal to FDA that includes a justification addressing each of the criteria described above, including scientific justification for why the endpoint is being explored to measure meaningful clinical benefit in the disease/condition, relevant summaries of pertinent information related to the endpoint from prior studies, as well as a statement indicating if the company is willing to allow disclosure of information for broader development and educational purposes.

(2) FDA will confirm receipt of the sponsor's proposal within 14 days of receipt.

(3) FDA will notify the sponsor with a final selection decision no later than 60 days following the end of the FY quarter during which it is submitted.

(4) Before FDA grants the initial meeting, FDA and the sponsor will agree on the information that FDA may share publicly. When feasible, FDA will notify a sponsor in advance when the sponsor's program is the planned focus of a public discussion. Participation in the pilot program, including such agreement on information disclosure, will be voluntary and at the discretion of the sponsor. If FDA and the sponsor of an accepted proposal are unable to reach agreement on elements for public disclosure, however, that proposal will no longer be part of the RDEA pilot program and the Agency will proceed with an alternate submission.

(5) Sponsors admitted to the RDEA pilot may participate in up to 4 focused meetings with relevant FDA staff to discuss endpoint development.

(a) The sponsor will provide a briefing document upon submission of each meeting request.

(b) Each meeting will be scheduled within 45 days following FDA's receipt of the sponsor's meeting request and complete briefing document.

(c) The scheduling timeline may be shortened for meeting requests to discuss narrow issues and/or questions at FDA's discretion.

(d) The timing between each meeting is flexible and depends on how much time the sponsor needs to identify new issues and/or questions and prepare required materials for the next meeting.

(6) Sponsors who have completed the maximum of 4 RDEA meetings or do not have additional endpoint-focused questions or issues to discuss with FDA may proceed with the standard regulatory submission process.

(a) FDA's advice provided during and between RDEA meetings does not constitute a regulatory decision and is considered non-binding. Completing the 4 RDEA meetings does not guarantee approval for a regulatory submission that includes efficacy endpoints discussed during RDEA meetings.

(b) After completion of 4 RDEA meetings, the sponsor can request additional input from FDA, as needed, through other formal meeting mechanisms, such as Type B, Type C, Type C Surrogate Endpoint, or Type D meetings.

(7) Sponsors who do not participate in the pilot will have an opportunity to interact with the Agency through traditional channels.

iii. Transparency and Endpoint Advancement. As part of RDEA, FDA will conduct up to 3 public workshops by the end of FY 2027 to discuss various topics relevant to endpoint development for rare diseases, such as the use of multidomain analysis methods. To promote innovation and evolving science, novel endpoints developed through RDEA may be presented by FDA, such as in guidance documents, on a public-facing website, or at public workshops as case studies, including prior to FDA's approval for the drug studied in the trial. However, as noted above, before FDA grants the initial RDEA meeting the Agency and the sponsor will agree on the information that FDA may share publicly in these case studies. When feasible, FDA will notify a sponsor in advance when the sponsor's program is the planned focus of a public discussion.

5. Advancing Development of Drug-Device and Biologic-Device Combination Products Regulated by CBER and CDER

a. For Use-Related Risk Analysis (URRA)
Sponsors employ URRA to identify the need for risk mitigation strategies and to design a human factors (HF) validation study. Based on a URRA, a sponsor may propose that a HF validation study is not needed to be submitted to support the safe and effective use of a drug-device or biologic-device combination product. FDA will establish the

following procedures for review of URRA for combination products:

i. The sponsor should submit a request for review of their URRA to their IND. The submission should include specific questions, justification that a HF validation study is not needed to be submitted including any supporting information, and scientific and regulatory requirements for which the sponsor seeks agreement.

ii. Within 60 days of Agency receipt of the URRA and specific questions, the Agency will provide a written response to the sponsor that includes a succinct assessment of the URRA and answers to the questions posed by the sponsor. If the Agency does not agree that either the URRA or the sponsor's justification are adequate to support the absence of a HF validation study, the reasons for the disagreement will be explained in the response.

iii. URRA submission: performance goals for FDA will be phased in, starting FY 2024 as follows:

1) By FY 2024, review and notify sponsor of agreement or non-agreement with comments for 50% of filed submissions, within 60 days of receipt of submission.

2) By FY 2025, review and notify sponsor of agreement or non-agreement with comments for 70% of filed submissions, within 60 days of receipt of submission.

3) By FY 2026, review and notify sponsor of agreement or non-agreement with comments for 90% of filed submissions, within 60 days of receipt of submission.

4) By FY 2027, review and notify sponsor of agreement or non-agreement with comments for 90% of filed submissions, within 60 days of receipt of submission.

iv. By the end of FY 2024, FDA will publish new draft or revised guidance for review staff and industry describing considerations related to drug-device and biologic-device combination products on the topics noted below.

Guidance that will convey FDA's current thinking regarding how a URRA along with other information can be used to inform when the results from an HF validation study may need to be submitted to a marketing application. The guidance will provide a comprehensive, systematic and stepwise approach with examples, when applicable, to illustrate how to make this determination.

v. Sponsors may still elect to submit a URRA with a HF validation protocol and will only be subject to timelines in Section I.K.5.b, For Human Factor Validation Study Protocols.

b. For Human Factor Validation Study Protocols

Human factors studies are conducted to evaluate the user interface of a drug-device or biologic-device combination product to eliminate or mitigate use-related hazards that may affect the safe and effective use of the combination product. Over the past decade, more combination products have been developed to deliver therapeutics via different routes of administration (e.g., parenteral, inhalation) with complex engineering designs. HF validation protocols are reviewed during the IND stage with the goal towards developing a final finished combination product that supports the marketing application. To achieve this objective, FDA will establish the following procedures for review of HF validation study protocols:

i. The sponsor should submit a human factors protocol to the IND with specific questions, including scientific and regulatory requirements for which the sponsor seeks agreement (e.g., are the study participant groups appropriate to represent intended users, is the study endpoint adequate, are the critical tasks that should be evaluated appropriately identified).

ii. Within 60 days of Agency receipt of the protocol and specific questions, the Agency will provide a written response to the sponsor that includes a succinct assessment of the protocol and answers to the questions posed by the sponsor. If the Agency does not agree that the protocol design, execution plans, and data analyses are adequate to achieve the goals of the sponsor, the reasons for the disagreement will be explained in the response.

Performance goals for FDA will be as follows:

i. Beginning in FY 2023, review and provide sponsor with written comments for 90% of human factors validation protocol submissions within 60 days of receipt of protocol submission.

6. Advancing Real-World Evidence for Use in Regulatory Decision-Making

In accordance with Section 3022 of the 21st Century Cures Act, and by providing earlier and increased Agency advice, the Advancing RWE Program seeks to improve the quality and acceptability of RWE-based approaches in support of new intended labeling claims, including approval of new indications of approved medical products or to satisfy post-approval study requirements. Specifically, FDA will do the following:

a. By no later than December 31, 2022, FDA will establish and communicate publicly a pilot Advancing RWE Program intended to:

i. Identify approaches for generating RWE that meet regulatory requirements in support of labeling for effectiveness (e.g., new indications, populations, dosing information) or for meeting post-approval study requirements;

ii. Develop agency processes that promote consistent decision-making and shared learning regarding RWE;

iii. Promote awareness of characteristics of RWE that can support regulatory decisions by allowing FDA to discuss study designs considered in the Advancing RWE Program in a public forum.

b. The Advancing RWE Program will include but not be limited to the following activities and components:

i. FDA will solicit applications for the Advancing RWE Program twice (i.e., two cycles) each year, asking sponsors to describe—before protocol development or study initiation—the regulatory question(s) they seek to address with RWE, the proposed RWE study design, and the potential real-world data (RWD) source(s) to support that design;

ii. FDA will use a structured review process to evaluate and rank applications, based on the information they present that the data may be fit-for-use, the study design will be adequate, and the proposed study conduct can be anticipated to meet regulatory requirements. Consideration will be given to promoting diversity of data sources, study designs, analytical methodologies and regulatory indications, as well as to diversity of diseases under study and FDA Centers and Offices involved;

iii. FDA will accept one to two eligible and appropriate proposals each cycle in the first and second year (FY 2023–2024) of the Advancing RWE Program and one to four eligible and appropriate proposals each cycle thereafter (FY 2025–2027);

iv. FDA will notify sponsors regarding acceptance or non-acceptance of their submission within 45 days of the application deadline;

v. FDA will convene the first of up to four dedicated Advancing RWE Program meetings within 75 days of the application deadline, with subsequent meetings to be scheduled within 45 days after receiving a request for such meetings from the sponsor;

vi. The Advancing RWE Program represents an optional pathway for sponsors

submitting RWE proposals to an IND with CDER or CBER. Regardless of whether an Advancing RWE application is accepted, not accepted, or was never submitted to the Advancing RWE Program, established procedures (e.g., formal PDUFA meetings with the review division) will continue to be available;

vii. Before FDA grants the initial meeting, FDA and the sponsor will agree on the information that FDA may share publicly. When feasible, FDA will notify a sponsor in advance when the sponsor's program is the planned focus of a public discussion. Participation in the pilot program, including such agreement on information disclosure, will be voluntary and at the discretion of the sponsor;

viii. If FDA and the sponsor of an accepted proposal are unable to reach agreement on elements for public disclosure, however, that proposal will no longer be part of the Advancing RWE Program and the Agency will proceed with an alternate submission (The timelines for meetings described above would shift based on the dates of accepting alternate submissions, if applicable.);

ix. Discussions at Advancing RWE program-related meetings will focus on data, design, and regulatory issues that have the potential to generate RWE in support of a proposed regulatory decision;

x. FDA participation in the Advancing RWE Program, including the selection process and program-related meetings, will include representatives from relevant review divisions, other offices with RWE expertise, and senior leadership with expertise in RWE;

xi. Sponsors and FDA can decide that four meetings may not be necessary if an agreed-upon protocol is identified. Conversely, if FDA determines that key data- or design-related problems make the protocol unlikely to support the intended regulatory decision, then subsequent meetings within the Advancing RWE Program may not be conducted;

xii. FDA and sponsors agree that the goal of the Advancing RWE Program is general agreement on key design elements. The acceptability of evidence generated from any completed study is a subsequent review issue;

xiii. Sponsors who do not participate in the pilot will have an opportunity to interact with the Agency through traditional channels.

c. By no later than June 30, 2024, FDA will report aggregate and anonymized information, on at least an annual basis and based on available sources (e.g., information provided by review divisions), describing RWE submissions to CDER and CBER. The reports will describe application type (e.g., primary focus on safety or effectiveness), data sources used (e.g., medical claims, electronic health records, registries, digital health technologies), study design employed (e.g., randomized trial, externally controlled trial, observational study), and regulatory request (e.g., new indication, population, dosing information, post-approval study requirement for a marketed product). This reporting will include but not be limited to protocols emerging from the Advancing RWE Program.

d. By no later than December 31, 2025, FDA will convene a public workshop or meeting to discuss RWE case studies with a particular focus on approaches for generating RWE that can potentially meet regulatory requirements in support of labeling for effectiveness (e.g., new indications, populations, dosing information) or for meeting post-approval study requirements.

e. By no later than December 31, 2026, experience gained with the Advancing RWE Program, as well as CDER's and CBER's RWE program in general, will be used to update

existing RWE-related guidance documents or generate new draft guidance, as appropriate.

L. Enhancing Regulatory Decision Tools to Support Drug Development and Review

Delivering new medicines to patients through biomedical innovation requires advances in regulatory decision tools to support drug development and review. FDA will build on the successes of its efforts on Patient Focused Drug Development (PFDD), benefit-risk assessment in regulatory decision-making, and the drug development tools qualification pathway for biomarkers. FDA will also continue to advance modern approaches to enhance the efficiency of the drug development and review processes, such as complex adaptive, Bayesian, and other novel clinical trial designs and model-informed drug development (MIDD).

1. Enhancing the Incorporation of the Patient's Voice in Drug Development and Decision-Making

To facilitate the advancement and use of systematic approaches to collect and utilize robust and meaningful patient and caregiver input that can more consistently inform drug development and, as appropriate, regulatory decision making, FDA will conduct the following activities during PDUFA VII:

a. FDA will continue to strengthen capacity to facilitate development and use of Patient-Focused methods to inform drug development and regulatory decisions. This includes expanded internal staff training and external outreach to industry sponsors and other involved stakeholders with emphasis on patient-focused drug development (PFDD) methods and tools-related guidance and practice to achieve broad acceptance and integration into regulatory decision making across review divisions and industry development programs. FDA will also engage external experts, through a mechanism called the Intergovernmental Personnel Act, to support the review of patient experience data. These external methodological experts will possess extensive knowledge in methods and approaches related to patient experience data and will augment existing internal expertise.

i. FDA will undertake a broad-based effort to conduct outreach and training across review divisions, with follow-up consultation as these methods gain broad acceptance and integration, including development of methodology training courses for review staff that will be conducted at least two times per year.

ii. FDA will conduct targeted outreach to industry and methodological consulting organizations to provide presentations, sessions, and resources to increase understanding, acceptance, and integration into development programs.

b. FDA will issue a Request for Information (RFI) to elicit public input on methodological issues, including the submission and evaluation of patient experience data in the context of the benefit-risk assessment and product labeling, and other areas of greatest interest or concern to public stakeholders. This RFI will be issued by no later than the end of June 2023.

i. FDA will issue a Federal Register Notice summarizing the input to the RFI by no later than the end of December 2023 and, based on the input received in response to the RFI, FDA will plan to conduct at least 2 public workshops focused on methodological issues.

ii. The first workshop will be held no later than the end of FY 2024.

iii. The second workshop will be held no later than the end of FY 2025.

iv. Based on the RFI and the learnings from the workshops, FDA will produce a written summary with identified priorities for future work no later than the end of FY 2026.

c. FDA will continue to work to develop a virtual catalog of standard core sets of Clinical Outcome Assessments (COAs) and Related Endpoints, pursuing non-user fee funding for the work to develop standard core sets, which will be available for public use. FDA will also work to enhance understanding of how patient preference informs meaningful benefit or benefit-risk tradeoffs in therapeutic areas.

d. A public input process through either the Federal Register or Public Meetings will allow FDA to understand stakeholder's perspectives on diseases and domains of greatest need or highest priority for development of Standard Core COAs and Endpoints as well as priority areas where decisions are preference-sensitive and patient preference information (PPI) data can inform regulatory decision-making.

e. By September 30, 2026, FDA will publish draft guidance on use and submission of patient preference information to support regulatory decision making. FDA will work towards the goal of publishing final guidance within 18 months after the close of the public comment period on the draft guidance. If, after receiving comments on the draft guidance, FDA determines that the guidance requires substantive changes on which further public comments are warranted, FDA will issue a revised draft guidance within those 18 months instead. It then will work towards publishing a final guidance within 18 months after the close of the public comment period on the revised draft guidance.

2. Benefit-Risk Assessment in Regulatory Decision-Making

Benefit-risk assessment is a foundation of FDA's regulatory review of marketing applications for new human drugs and biologics. FDA currently includes the Benefit-Risk Framework in its NDA and BLA review training, processes, and templates to support the conduct and communication of its benefit-risk assessment. CBER incorporates benefit-risk assessment through interdisciplinary review and has integrated the Benefit-Risk Framework into its clinical review template for its new BLA and supplement assessments. CDER has similarly integrated the Benefit-Risk Framework into its clinical review and decisional memo templates.

FDA is committed to continuing its implementation and application of structured benefit-risk assessment in its regulatory review processes and documentation. FDA will continue to explore additional opportunities to enhance its use and communication of its benefit-risk assessments for new drug and biological review.

3. Advancing Model-Informed Drug Development

FDA will build on the success of the "model-informed drug development" (MIDD) approaches by continuing to advance and integrate the development and application of exposure-based, biological, and statistical models derived from preclinical and clinical data sources in drug development and regulatory review. FDA will conduct the following activities during PDUFA VII:

a. By no later than the end of 1st Quarter of FY 2023, FDA will publish a Federal Register Notice announcing the continuation of the MIDD paired meeting program, outlining program eligibility, and describing the proposal submission and selection process.

b. For sponsors participating in the MIDD paired meeting program, FDA will grant a pair of meetings specifically designed for this program, consisting of an initial and a follow-up meeting on the same drug development issues. The second meeting will occur within approximately 60 days of receiving the briefing materials. These meetings will be led by the clinical pharmacology or biostatistical review components within CDER

or CBER in partnership with clinical staff at the relevant center to ensure alignment with decision makers.

c. Starting in FY 2023, FDA will select 1-2 eligible and appropriate proposals per quarter each year (i.e. up to 8 per year). Additional proposals that meet the eligibility criteria may be selected depending upon the availability of resources. The internal review group instituted by FDA will continue to review proposals on a quarterly basis and provide recommendations on prioritization and selection of proposals and share knowledge and experience.

d. Sponsors who do not participate in the MIDD paired meeting program will have an opportunity to interact with the Agency through traditional channels.

e. FDA will issue a Request for Information (RFI) to elicit public input for identifying priority focus areas for future policy or guidance development and stakeholder engagement. This RFI will be issued by no later than the end of FY 2024.

4. Enhancing Capacity to Review Complex Innovative Designs

To facilitate the advancement and use of complex adaptive, Bayesian, and other novel clinical trial designs, FDA will conduct the following activities during PDUFA VII:

a. FDA will continue to develop CDER and CBER staff capacity to enable processes to facilitate appropriate use of these types of methods. This staff will support the computationally intensive review work necessary to evaluate complex adaptive, Bayesian, and other novel clinical trial designs, with a particular focus on clinical trial designs for which simulations are necessary to evaluate the operating characteristics. FDA will also engage external experts through existing FDA mechanisms (e.g., Intergovernmental Personnel Act assignment) to support the review of complex innovative designs. These methodological experts will possess extensive knowledge in the aforementioned topics and will augment existing internal expertise.

b. FDA will maintain the paired meeting program, selecting 1-2 eligible and appropriate proposals per quarter each year (i.e. up to 8 per year) for highly innovative trial designs for which analytically derived properties (e.g., Type I error) may not be feasible, and simulations are necessary to determine trial operating characteristics. Additional proposals that meet the eligibility criteria may be selected depending upon the availability of resources. For INDs in the program, FDA will grant a pair of meetings, consisting of an initial and follow-up meeting on the same design. The second meeting will occur within approximately 90 days of receiving the briefing materials. Management of the overall program as well as specific meetings to discuss innovative designs will be led by the biostatistical review components within CDER or CBER in partnership with clinical staff at each center. The opportunity for increased interaction with the agency will provide better understanding of the agency's requirements for trial simulations involved in the use of the pilot study design and allow for iteration of design modifications, if needed. In return, FDA's ability to publicly discuss example designs as agreed upon with participating sponsors will provide better clarity on the acceptance of different types of trial designs that should facilitate their use in future development programs.

i. By no later than the end of 1st Quarter of FY 2023, FDA will publish a Federal Register Notice announcing the continuation of the paired meeting program, outlining program eligibility, and describing the proposal submission, selection process, and example topics that will advance the use of complex

innovative designs and inform the development of a guidance document.

ii. FDA will select up to 8 proposals each year from proposals submitted to either CDER or CBER. The selections are expected to be made on a quarterly basis. Program selection will be prioritized based on trial design features and therapeutic areas of high unmet need.

iii. To promote innovation in this area, trial designs developed through the paired meeting program may be presented by FDA (e.g., in a guidance, at public workshops and conferences, on the Complex Innovative Design website) as case studies, including while the drug studied in the trial has not yet been approved by FDA. Before FDA grants the initial meeting, FDA and the sponsor will agree on the information that FDA may share publicly in these case studies. When feasible, FDA will notify a sponsor in advance when the sponsor's program is the planned focus of a public discussion. Participation in the paired meeting program, including such agreement on information disclosure, will be voluntary and at the discretion of the sponsor.

c. In order to encourage increased submissions by CBER-regulated sponsors to the complex innovative design (CID) paired meeting program, CBER staff will continue to engage in outreach to industry and other stakeholders. Such outreach will include providing information on the paired meeting program and its benefits, such as enhanced attention regarding CID proposals and advancing the leveraging and sharing of knowledge to support efficient product development; clarifying policies and procedures for submitting CID proposals for review; and presenting FDA's current thinking on CID-related technical topics.

d. Sponsors who do not participate in this paired meeting program will have an opportunity to interact with the Agency through traditional channels. This program will not affect FDA's existing procedures for providing advice on trial designs.

e. By the end of 2nd Quarter FY 2024, FDA will convene a public workshop to discuss aspects of complex adaptive, Bayesian, and other novel clinical trial designs. Discussion topics will include considerations for external data sources, Bayesian statistical methods, simulations, and clinical trial implementation (e.g. examples of defining and mitigating bias when using select trial design methods) and will be based on FDA accumulated experience both within and outside of the paired meeting program.

f. By the end of FY 2025, FDA will publish draft guidance on the Use of Bayesian Methodology in Clinical Trials of Drugs and Biologics. FDA will work towards the goal of publishing final guidance within 18 months after the close of the public comment period on the draft guidance. If, after receiving comments on the draft guidance, FDA determines that the guidance requires substantive changes on which further public comments are warranted, FDA will issue a revised draft guidance within those 18 months instead. It then will work towards publishing a final guidance within 18 months after the close of the public comment period on the revised draft guidance.

5. Enhancing Drug Development Tools Qualification Pathway for Biomarkers

To facilitate the enhancement of the drug development tools qualification pathway for biomarkers, FDA will conduct the following activities during PDUFA VII:

a. FDA will continue to retain and enhance the staff capacity to enhance biomarker qualification review by increasing base capacity. FDA will also pilot processes to engage external experts to support review of biomarker qualification submissions.

b. FDA will continue to publish information on its website regarding biomarker qualification submissions under section 507 of the FD&C Act, consistent with the requirements in section 507(c), and to update the website quarterly.

c. Sponsors who do not use this qualification pathway will have an opportunity to interact with the Agency through traditional channels.

M. Enhancement and Modernization of the FDA Drug Safety System

FDA will continue to use user fees to enhance the drug safety system, including adopting new scientific approaches, improving the utility of existing tools for the detection, evaluation, prevention, and mitigation of adverse events, modernizing REMS assessments, and coordinating regulatory activity in the pre-market and post-market settings. Enhancements to the drug safety system will improve public health by increasing patient protection while continuing to enable access to needed medical products.

User fees will provide support for 1) modernization and improvement of REMS assessments and 2) optimization of the Sentinel Initiative through a) maintenance of Sentinel Initiative capabilities and continued integration into FDA drug safety activities and b) enhancement of the analytic capabilities of the Sentinel Initiative to address questions of product safety and advance the understanding of how real-world evidence can be used for studying effectiveness.

1. Modernization and Improvement of REMS Assessments

FDA will use user fee funds to modernize and improve REMS assessments by incorporating REMS assessment planning into the design of REMS, clarifying its expectations regarding methods to evaluate the performance of REMS, increasing the efficiency of FDA's review of REMS assessment reports, and establishing FDA performance goals for review of REMS assessment methods and study protocols.

a. By March 31, 2024, update relevant guidances to incorporate REMS assessment planning into the design of the REMS by providing recommendations regarding: 1) linking the design with the assessments 2) ensuring sufficient and appropriate data collection, and 3) identifying key metrics for success (e.g., primary and secondary).

b. By March 31, 2024, FDA will issue new or update existing policies and procedures for reviewing methodological approaches and study protocols used to assess a REMS program.

c. Improve the efficiency of FDA's review of REMS assessment reports.

i. By March 31, 2024, FDA will issue new or update existing policies and procedures to systematically determine, as part of the review of REMS assessment reports, if modifications to the REMS or revisions to the REMS assessment plan are needed, including the timing of the REMS assessments and to determine whether the REMS is still necessary to ensure the benefits outweigh the risks of the drug.

ii. By March 31, 2026, FDA will develop draft guidance regarding the format and content of a REMS assessment report, including the type of data that can support elimination of a REMS. FDA will work towards the goal of publishing final guidance within 18 months after the close of the public comment period on the draft guidance. If, after receiving comments on the draft guidance, FDA determines that the guidance requires substantive changes on which further public comments are warranted, FDA will issue a revised draft guidance within those 18 months instead. It then will work towards publishing a final guidance within 18 months

after the close of the public comment period on the revised draft guidance.

d. Establish FDA review performance goals and provide feedback and comments on REMS methodological approaches and study protocols used to assess a REMS program for products within 90 days of receipt. FDA proposes the following staged implementation of review performance goals for review of methodological approaches and study protocols for REMS assessments in PDUFA VII:

i. FY 2024, review and notify sponsor with concurrence or comments within 90 days of receipt for 50% of REMS assessment methods and protocols

ii. FY 2025, review and notify sponsor with concurrence or comments within 90 days of receipt for 70% of REMS assessment methods and protocols

iii. FY 2026 and FY 2027, review and notify sponsor with concurrence or comments within 90 days of receipt for 90% of REMS assessment methods and protocols

2. Optimization of the Sentinel Initiative

The user fee funds initially provided in PDUFA VI to expand the Sentinel program will continue to systematically implement and integrate Sentinel and BEST (Biologics Effectiveness and Safety) Systems in FDA drug safety activities by sustaining the high quality and large quantity of data available, allowing continued application of advanced methods for determining when and how those data are utilized, and ensuring comprehensive training of review staff on the use of Sentinel and BEST. These capabilities will support the use of the Sentinel Initiative for regulatory decision making to address questions of product safety and advance our understanding of how real-world evidence can be used for studying effectiveness.

a. Maintenance of the Sentinel Initiative Capabilities and Continued Integration into FDA Drug Safety Activities

FDA will use user fee funds to maintain the quality and quantity of data available through the Sentinel Initiative (Sentinel and BEST), to maintain the processes and tools for determining when and how those data are utilized, and to support comprehensive training of review staff on the use of Sentinel.

i. FDA will maintain the Sentinel's sources of data and core capabilities for the safety surveillance of drugs and biologics, including the multisite ARIA system.

ii. FDA will continue its communication with sponsors and the public regarding general methodologies for Sentinel queries, including what the Agency has learned regarding the most appropriate ways to query and use Sentinel data.

iii. By the end of FY 2025, FDA will publish on its website an update on facilitation of public and sponsor access to Sentinel's distributed data network to conduct safety surveillance.

iv. FDA will continue to post study results, study parameters and analysis code online and maintain a strong Sentinel web presence to host this information.

v. FDA will continue to maintain a comprehensive FDA Sentinel training program for all relevant staff (e.g., epidemiologists, statisticians, project managers, medical officers, clinical analysts, and other review team members) to ensure that staff have a working knowledge of Sentinel, can identify when Sentinel can inform important regulatory questions and decisions, and are able to consistently participate in use of Sentinel to evaluate safety issues.

vi. By the end of FY 2025, FDA will analyze, and report on the use of Sentinel for regulatory purposes, e.g., in the contexts of labeling changes, PMRs, or PMCs.

vii. For FY 2023–2027, FDA will report its obligations for updated PDUFA VI commit-

ments for PDUFA VII Sentinel Initiative annually in the PDUFA Financial Report. This reporting will provide detail for spending categories (e.g., data infrastructure, analytical capabilities, safety issue analyses, dissemination of relevant product and safety information, and Sentinel system development).

b. Enhancement of the Analytic Capabilities of the Sentinel Initiative to Address Questions of Product Safety and Advance the Understanding of How Real-World Evidence Can Be Used for Studying Effectiveness

FDA will use user fee funds to advance the analytic capabilities of the Sentinel Initiative by i) developing a consistent approach to post-market requirements and commitments during NDA and BLA review related to assessing the outcomes of pregnancies in women exposed to drugs and biological products and clarifying the optimal use and value of pregnancy registries and electronic healthcare data for assessing pregnancy safety and ii) supporting the use of real-world evidence to address questions of product safety and advancing our understanding of how real-world evidence may be used for studying effectiveness.

i. Pregnancy Safety

The goal of pregnancy safety post-market requirements and commitments studies is to inform labeling on the safety of use in pregnancy and to detect or evaluate safety signals in a timely manner.

(1) FDA will develop a framework describing how data from different types of post-market pregnancy safety studies might optimally be used, incorporating knowledge of how different types of postmarket studies have been used by FDA and industry and identifying gaps in knowledge needed to be filled by demonstration projects. The framework would consider factors such as, but not limited to, purpose of study, types of post-market studies, anticipated exposure in females of reproductive potential (FRP) and pregnant women, potential toxicity of the drug and proposed risk mitigation, benefits of the drug, and magnitude and type of risk to be detected. The framework would specifically address the use of pregnancy registries and electronic healthcare data sources including Sentinel, with a goal of ensuring the most efficient means of obtaining highest quality safety data available.

(a) FDA will review published literature and conduct a review of types of post-market pregnancy data that have been included in pregnancy labeling.

(b) By September 30, 2023, FDA will hold a public workshop on post-market safety studies in pregnant women to facilitate determination of the ideal post-market study design(s), including industry experience and use of Sentinel Initiative and other real-world data resources.

(c) By September 30, 2024, FDA will publish a workshop report describing the proposed framework.

(2) Incorporating feedback from (1), conduct 5 demonstration projects to address gaps in knowledge about performance characteristics of different study designs. FDA will initiate the following demonstration projects which may be modified as needed, before September 30, 2024:

(a) Assess the performance of pregnancy registries versus electronic healthcare database studies to detect a signal when the exposure to medication in pregnancy is relatively common.

(b) Assess the performance of single arm safety studies versus signal identification methods using electronic healthcare data to detect a signal when the exposure to medication in pregnancy is anticipated to be low.

(c) Assess the performance of pregnancy registries versus electronic healthcare data-

base studies to evaluate a signal when the exposure to medication in pregnancy is relatively common.

(d) Assess the performance of major congenital malformations

(MCM) as a composite outcome in signal detection and evaluation when there is true risk for some but not all specific malformations.

(e) Assess the performance of an algorithm using electronic health record (EHR) and claims-linked healthcare data for a pregnancy-related outcome, or composite of outcomes (e.g., spontaneous abortion, stillbirth, congenital malformations), after use of vaccines in pregnant women. The parameters of the pregnancy-outcome algorithm will be developed to have general usability with therapeutic products.

(3) By September 30, 2027, based on the results of demonstration projects in (2) update the proposed framework and develop a guidance or MAPP/SOPP as appropriate to implement a standardized process for determining necessity and type of pregnancy post-marketing studies including PMRs.

ii. Use of Real-World Evidence—Negative Controls

FDA is building Sentinel/BEST methodology to improve understanding of robustness evaluations used to address the consistency of RWE with respect to study design, analysis, or variable measurement. FDA will develop new methods to support causal inference in Sentinel/BEST that could address product safety questions and advance our understanding of how RWE may be used for studying effectiveness.

(1) By September 30, 2023, FDA will hold a public workshop on use of negative controls for assessing the validity of non-interventional studies of treatment and the proposed Sentinel Initiative projects.

(2) FDA will initiate two methods development projects by September 30, 2024 to 1) develop an empirical method to automate the negative control identification process in Sentinel and integrate it into the Sentinel System tools; and 2) develop a method to use a double negative control adjustment to reduce unmeasured confounding in studying effectiveness of vaccines.

(3) By September 30, 2027, FDA will publish a report on the results of the development projects.

N. Enhancements Related to Product Quality Reviews, Chemistry, Manufacturing, and Controls Approaches, and Advancing the Utilization of Innovative Manufacturing Technologies

To ensure new and innovative products are developed and available to patients in a timely manner, FDA and industry will focus on enhancing communications during drug development and application review, enhancing support for CMC development and facilitating the CMC readiness of products with accelerated clinical development timelines, and advancing the implementation of innovative manufacturing technologies.

1. Enhancing Communication Between FDA and Sponsors During Application Review

To promote an efficient and effective application review process, FDA will conduct the following activities during PDUFA VII to enhance communication between the FDA review teams and sponsors:

a. The four essential components of CMC information requests (referred to as Four-Part Harmony) are intended to ensure that the FDA requests information that is appropriate to address the question or issue, in an efficient manner, and at the appropriate timepoint within the review cycle or product lifecycle, as applicable. Use of Four-Part Harmony includes acknowledging what was

provided and where (e.g., modules, page numbers, as applicable), identifying the issue or deficiency, clearly identifying the information needed to achieve resolution and make a regulatory decision, and identifying specific references or other information to support FDA's request. These four essential components of Four-Part Harmony are:

- i. What was provided
- ii. What is the issue or deficiency
- iii. What is needed
- v. Why it is needed

By the end of FY 2023, to promote FDA reviewers' use of Four-Part Harmony, FDA will update and conduct training on CDER MAPP 5016.8, "Communication Guidelines for Quality-Related Information Request and Deficiencies" and CDER SOPP 8401.1, "Issuance of and Review of Responses to Information Request Communications to Pending Applications" describing the guidelines for the content of information requests, based on the principles of Four-Part Harmony.

b. By the end of FY 2023, FDA will update and conduct training on CMC assessment processes associated with mid-cycle and late-cycle review meetings with the goal of ensuring that mid-cycle and late-cycle meeting expectations are met, including communicating the status of the NDA and BLA CMC assessment and any identified issues that would preclude approval.

c. FDA will contract with an independent third party to assess current practices of FDA (CDER and CDER) and sponsors in communicating through product quality information requests (IRs) during application review, not including supplements.

The assessment will focus on the application of Four-Part Harmony as described in the MAPPs and SOPPs (e.g., did FDA state why the information is needed for the review of the application) as well as seek to identify trends across IRs. The statement of work for this effort will be published for public comment prior to beginning the assessment. The third party will be expected to separately engage both FDA staff and individual sponsors through contractor-led interviews as part of the assessment. The contractor-led interviews will be designed to provide feedback from individual sponsors on the effectiveness of Four-Part Harmony. Due to the significant volume of IRs in a given year, the assessment will be based on a subset of drug and biologic applications, not including supplements, balanced across CDER and CDER, proportional to the number of applications received by each Center. The third party will identify best practices and areas for improvement in communication between FDA review staff and sponsors through IRs. FDA will publish the final report of the assessment on FDA's website no later than June 30, 2025, for public comment.

2. Enhancing Inspection Communication for Applications, not Including Supplements

FDA and industry believe enhanced communication between review teams and industry on certain pre-license inspections and pre-approval inspections can facilitate an efficient application review process.

When FDA determines for an application, not including supplements, that it is necessary to conduct the inspection at a time when the product identified in the application is being manufactured, FDA's goal is to communicate its intent to inspect a manufacturing facility at least 60 days in advance of BLA Pre-license Inspections and NDA Pre-approval Inspections and no later than mid-cycle. FDA reserves the right to conduct manufacturing facility inspections at any time during the review cycle, whether or not FDA has communicated to the facility the intent to inspect.

3. Alternative Tools to Assess Manufacturing Facilities Named in Pending Applications

During the COVID-19 public health emergency, the FDA expanded its use of alternate tools for assessing facilities named in applications, including exercising its authority to request records and other information in advance of or in lieu of an inspection, granted per section 704(a)(4) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 374(a)). Where appropriate, the agency also increased the use of information, including inspection reports, shared by trusted foreign regulatory partners through mutual recognition agreements and other confidentiality agreements. As FDA continues to gain experience and lessons learned from the use of these tools, FDA will communicate its thinking on the use of such methods beyond the pandemic.

By September 30, 2023, FDA will issue draft guidance on the use of alternative tools to assess manufacturing facilities named in pending applications (e.g., requesting existing inspection reports from other trusted foreign regulatory partners through mutual recognition and confidentiality agreements, requesting information from applicants, requesting records and other information directly from facilities and other inspected entities, and, as appropriate, utilizing new or existing technology platforms to assess manufacturing facilities). The guidance will incorporate best practices, including those in existing published documents, from the use of such tools during the COVID-19 pandemic. FDA will work towards the goal of publishing final guidance within 18 months after the close of the public comment period on the draft guidance. If, after receiving comments on the draft guidance, FDA determines that the guidance requires substantive changes on which further public comments are warranted, FDA will issue a revised draft guidance within those 18 months instead. It then will work towards publishing a final guidance within 18 months after the close of the public comment period on the revised draft guidance.

4. Facilitating Chemistry, Manufacturing, and Controls Readiness for Products with Accelerated Clinical Development

Development programs for CDER- and CDER-regulated drugs and biologics intended to diagnose, treat, or prevent a serious disease or condition where there is an unmet medical need may have accelerated clinical development timelines. Products with accelerated clinical development activities often face challenges in expediting CMC development activities to align with the accelerated clinical timelines. Overcoming these CMC challenges often requires additional interaction with FDA during product development and the use of science- and risk-based regulatory approaches so that the clinical benefits of earlier patient access to these products can be realized.

a. MAPP: By December 31, 2022, FDA will issue a new MAPP on approaches to address CMC challenges for CDER-regulated products (drugs, biologics) with accelerated clinical development timelines (e.g., products used to diagnose, treat, or prevent a serious disease or condition where there is unmet medical need). To address the CMC challenges, the MAPP will describe early engagement with sponsors of such products and the different science- and risk-based approaches, including those described in the FDA Guidance for Industry: Expedited Programs for Serious Conditions-Drugs and Biologics, that may be warranted and utilized in CMC development based upon the anticipated clinical benefit of earlier patient access to the product. The MAPP will incorporate modern pharmaceutical principles as well as modern regulatory tools, such as those detailed in ICH Q12.

b. Pilot: Starting in FY 2023, FDA (CDER and CDER) will conduct a CMC Development

and Readiness Pilot (CDRP) to facilitate the expedited CMC development of products under an IND application, where warranted, based upon the anticipated clinical benefit of earlier patient access to the products. The goal of the Pilot will be to facilitate CMC readiness for CDER- and CDER-regulated products with accelerated clinical development timelines. Due to the differences in product complexity between CDER- and CDER-regulated products, Pilot selection criteria may differ between the Centers. In order to accelerate CMC development and facilitate CMC readiness, the Pilot will incorporate, as applicable, contemporary learnings and the use of science- and risk-based approaches and submission strategies, such as those described in the FDA Guidance for Industry: Expedited Programs for Serious Conditions-Drugs and Biologics.

For sponsors participating in the CMC Development and Readiness Pilot, FDA will provide specific CMC advice during product development by providing two additional CMC-focused Type B meetings and an additional limited number of CMC-focused discussions based on readiness and defined CMC milestones. The increased communication between FDA review staff and applicants is intended to ensure a mutual understanding of what activities must be completed, and what information should be provided at the appropriate timepoint (i.e., at the time of NDA or BLA submission, prior to the end of the review cycle, or post-approval), to ensure CMC readiness of the product.

i. By December 31, 2022, FDA will publish a Federal Register Notice (FRN) announcing the Pilot and outlining the eligibility criteria and process for submitting a request to participate in the Pilot. For CDER, the eligibility criteria will focus on the selection of products with accelerated clinical development timelines that could expand or enhance the approaches in the CDER MAPP described above. For CDER, the eligibility criteria will include considerations for products with accelerated clinical development timelines (e.g., vaccines and cell and gene therapies).

The FRN will give more specifics on products to be included in the Pilot and will consider Industry's interest in CDER-regulated products such as cell and gene therapies. FDA will select between 8-10 proposals per fiscal year over a 4-year period.

ii. To promote innovation and understanding in this area, lessons learned through the Pilot may be presented by FDA (e.g., in a public workshop) as case studies, including when the product studied in the Pilot has not yet been approved by FDA. To be eligible for the Pilot, the sponsor and FDA will reach an agreement on the information to be publicly disclosed. When feasible, FDA will notify a sponsor in advance when the sponsor's program is the planned focus of a public discussion. Participation in the pilot program, including such agreement on information disclosure, will be voluntary and at the discretion of the sponsor.

iii. Sponsors who do not participate in the Pilot will have an opportunity to interact with the Agency through existing channels.

c. Public Workshop: By July 31, 2025, FDA will conduct a public workshop, potentially through a qualified third party, focused on CMC aspects of expedited development including case studies, lessons learned, and stakeholder input regarding the CMC Development and Readiness Pilot. The workshop will solicit and include industry and public feedback.

Topics for the workshop will include, but are not limited to, the use of science and risk-based approaches and submission strategies to accelerate CMC development, including predictive stability modeling, risk-based approaches to product specification setting,

and alternate process validation approaches, as well as experiences related to quality by design and platform technologies.

d. Strategy Document: Following the close of the public comment period for the public workshop, and no later than April 30, 2026, FDA will issue a strategy document outlining the Agency's plans, including proposed timeframes, to develop or revise, as appropriate, relevant MAPPs or SOPPs, and other applicable documents (e.g., guidance and process documents) to incorporate lessons learned from the Agency's experiences with the CMC Development and Readiness Pilot and other submissions for products with accelerated clinical development timelines, as well as industry and public input, including feedback from the public workshop.

5. Advancing Utilization and Implementation of Innovative Manufacturing

By the end of FY 2023, FDA will conduct a public workshop on the utilization of innovative manufacturing technologies for CDER- and CBER-regulated products, including barriers to their adoption and submission strategies. The workshop will solicit and include industry and public feedback.

Topics for the workshop will include but are not limited to:

a. Best practices and lessons learned from both the CDER Emerging Technology Team and CBER Advanced Technology Team programs from both industry and regulatory perspectives;

b. Case studies from previous innovative technology submissions presented by sponsors;

c. Barriers (technical, regulatory, etc.) to the adoption of innovative manufacturing technologies;

d. Regulatory strategies for the adoption of advanced manufacturing technologies, including, but not limited to, submission strategies for the implementation of certain innovative technologies across multiple commercial products and/or multiple manufacturing sites; and

e. Science- and risk-based approaches for developing and assessing innovative technologies across platform products and sites to streamline adoption.

Following the close of the public comment period for the public workshop, and no later than September 30, 2024, FDA will issue a draft strategy document for public comment that outlines the specific actions the agency will take over the course of PDUFA VII to facilitate the utilization of innovative manufacturing technologies, including addressing barriers to their adoption. The actions described in the draft strategy document will be based on lessons learned from the Agency's experiences with submissions involving advanced manufacturing technologies as well as feedback from the workshop and other public input. The strategy document may include updating or creating new procedures, MAPPs, SOPPs, guidances, and scientific/other relevant programs related to the topics discussed in the workshop. The strategy document will also include proposed timeframes for the specific actions outlined in the document.

FDA will consider public input and finalize the strategy document within 9 months after the close of the public comment period on the draft strategy document.

O. Enhancing CBER's Capacity to Support Development, Review, and Approval of Cell and Gene Therapy Products

To ensure that new and innovative cell and gene therapy products are developed and available to patients in a timely manner, FDA will build on the success of the Cell and Gene Therapy Program (CGTP) in CBER to further support and advance a balanced approach to product development and regula-

tion. To this end, FDA will substantially strengthen staff capacity and capability in order to meet the increasing challenges and demands in this growing field. Increasing staff capacity will overcome existing resource limitations, allowing staff to spend additional time on meetings and submission reviews including those with breakthrough or regenerative medicine advanced therapy designations, expand stakeholder outreach, invest in new policy and guidance, and facilitate development and use of regulatory tools and scientific technologies.

The CGTP will be augmented with additional resources to sustain and expand the program. Staff will be hired for direct review activities, indirect activities (e.g., policy, external outreach, postmarket safety), and supporting activities in the CGTP, with a focus on hiring staff with technical, scientific, clinical, or other specialized expertise necessary to understand and advance cell and gene therapies. Recruiting and hiring of staff will be actively pursued as a CBER priority and be facilitated by support staff whose dedicated focus will be attracting and retaining talent for the CGTP. CBER recognizes the importance of integration of new staff into the CGTP and will effectively facilitate growth in staffing using external consultants when appropriate. For PDUFA VII, resources will also support onboarding and integration of new staff, regulatory support and outreach (e.g., webinars, recorded training) to facilitate industry and stakeholder education and interaction.

CBER will continue to maintain a highly trained and experienced CGTP staff, with an emphasis on remaining current in regulatory science, and the latest scientific, manufacturing, and clinical advances. The current staff training will be reviewed, with input from external consultants, and modified as needed to accommodate and facilitate training of new staff and maintain the competency of existing staff.

CBER will continue to organize and manage the CGTP for optimal performance, leveraging and implementing best practices from relevant sources. The current CGTP organization will be evaluated, with input from external consultants, to determine the optimal organization to effectively integrate new staff and facilitate operations and customer service. As part of CBER's modernization program, CBER will evaluate, streamline, and harmonize CGTP procedures, processes, and interactions to facilitate communications, enhance regulatory consistency and review standards, reduce regulatory burden, optimize operational efficiency, and update relevant SOPPs and documents as needed. Change management will be tailored to ensure success of organizational changes and business modernization.

The CGTP staff will enhance communications with stakeholders, on an individual and collective level, by refining and improving best practices for communication, through public meetings and workshops, and issuance of guidance, updating relevant SOPPs, and other mechanisms. CBER will continue to issue new guidance on current cell and gene therapy topics and update existing guidance to be current with evolving science and approaches. Staff will increase awareness of FDA's regulatory programs through on-demand training (e.g., recorded webcast), to facilitate navigation by industry through the phases of product development and approval. CGTP staff will continue to engage in outreach to industry, patient groups, and other stakeholders in several areas soliciting views on specific topics and proposals.

Staff will continue to participate in external collaborations, including public-private partnerships and international organizations in a variety of areas, including development

of tools (e.g., standards), technologies, and approaches that support development of cell and gene therapies. Interactions will also focus on advancing manufacturing and testing, including facilitating implementation of new technologies. With stakeholders, staff will continue discussing use of existing approaches (e.g., surrogate endpoints, real world evidence, complex innovative designs, natural histories) and explore new approaches for obtaining efficacy and safety information with specific consideration and attention to rare and ultra-rare diseases.

To advance the field and support the next generation of cell and gene therapy products, CBER will conduct the following activities during PDUFA VII.

1. Patient Focused Drug Development

a. By the end of FY 2023, FDA will convene a public patient focused drug development meeting with key stakeholders, including patients and patient advocacy organizations, to better understand patient perspectives on gene therapy products, including cell-mediated gene therapy. This meeting should address, among other things, the patient and caregiver's level of understanding and expectations regarding the benefits and risks of these therapies, and their involvement in clinical study design and execution. Within 6 months of the public meeting, FDA will issue a report summarizing the views expressed at the meeting including:

i. Analysis of current tools or methods used to capture patient experience data, and/or patient involvement in clinical studies, including identification of existing challenges and gaps;

ii. Whether there is a need for the community to develop specific tools or methods to capture patient experience data, and/or patient involvement in clinical studies that are unique to these products, and if so, suggestions for community engagement strategies; and

iii. Approaches to leveraging existing tools or methods to capture patient experience and patient preference data that are unique to these products;

2. Novel Approaches to Development of Cell and Gene Therapy

a. FDA will continue to work with stakeholders including public-private partnerships to seek public input on questions and challenges faced by cell and gene therapy developers, including the use of novel endpoints and the role of less defined natural histories, and to facilitate development and approval for cell and gene therapies, including but not limited to, individualized therapies, rare disease and therapies for small patient populations.

b. By the end of FY 2025, FDA will issue a draft guidance on the evaluation of efficacy in small patient populations using novel trial designs and statistical methods, and how these concepts can be applied to more common diseases. FDA will work towards the goal of publishing final guidance within 18 months after the close of the public comment period on the draft guidance. If, after receiving comments on the draft guidance, FDA determines that the guidance requires substantive changes on which further public comments are warranted, FDA will issue a revised draft guidance within those 18 months instead. It then will work towards publishing a final guidance within 18 months after the close of the public comment period on the revised draft guidance.

c. In order to promote development of cell and gene therapy products, FDA will issue a Questions and Answers draft guidance by the end of FY 2024 based on frequently asked questions, and commonly faced-issues identified by sponsors or by public-private partnerships. FDA will work towards the goal of publishing final guidance within 18 months

after the close of the public comment period on the draft guidance. If, after receiving comments on the draft guidance, FDA determines that the guidance requires substantive changes on which further public comments are warranted, FDA will issue a revised draft guidance within those 18 months instead. It then will work towards publishing a final guidance within 18 months after the close of the public comment period on the revised draft guidance.

d. By the end of FY 2024, FDA will convene a public meeting to solicit input on methods and approaches (e.g., use of RWE, registries) for capturing post-approval safety and efficacy data for cell and gene therapy products. Within 6 months of the public meeting, FDA will issue a summary report or a transcript of the meeting. Input from this meeting will be used to inform development of a draft guidance on this topic. FDA will issue a draft guidance on this topic by the end of FY 2025. FDA will work towards the goal of publishing final guidance within 18 months after the close of the public comment period on the draft guidance. If, after receiving comments on the draft guidance, FDA determines that the guidance requires substantive changes on which further public comments are warranted, FDA will issue a revised draft guidance within those 18 months instead. It then will work towards publishing a final guidance within 18 months after the close of the public comment period on the revised draft guidance.

3. Expedited Programs for the Development of Regenerative Medicine Therapies:

a. By the end of FY 2025, FDA will update the Guidance for Industry: Expedited Programs for Regenerative Medicine Therapies for Serious Conditions. Updates will include, for example, additional thinking on post-approval requirements, including the use of real-world evidence to confirm clinical benefit, for products approved under accelerated approval, as well as for safety monitoring and long-term follow-up. Updates will also include additional thinking on approaches and processes relating to CMC including considerations regarding CMC readiness to take advantage of the expedited programs. FDA will work towards the goal of publishing final guidance within 18 months after the close of the public comment period on the draft guidance. If, after receiving comments on the draft guidance, FDA determines that the guidance requires substantive changes on which further public comments are warranted, FDA will issue a revised draft guidance within those 18 months instead. It then will work towards publishing a final guidance within 18 months after the close of the public comment period on the revised draft guidance.

4. Leveraging Knowledge

a. FDA will continue to work with organizations, including public-private partnerships, that foster development and accessibility of non-proprietary knowledge (e.g., standards), manufacturing advances, and manufacturing components for use in cell and gene therapy products. FDA will continue to participate in international organizations sharing knowledge and perspective to harmonize cell and gene therapy guidance as appropriate.

b. By the end of FY 2025, FDA will convene a public meeting to solicit the perspective of cell and gene therapy manufacturers on how individual sponsors might leverage internal prior knowledge and public knowledge, including Chemistry, Manufacturing, and Controls, non-clinical, and clinical knowledge, across therapeutic contexts in order to facilitate product development and application review. Input from this meeting will be used to inform development of a draft guidance on this topic that FDA will issue by the end of

FY 2026. FDA will work towards the goal of publishing final guidance within 18 months after the close of the public comment period on the draft guidance. If, after receiving comments on the draft guidance, FDA determines that the guidance requires substantive changes on which further public comments are warranted, FDA will issue a revised draft guidance within those 18 months instead. It then will work towards publishing a final guidance within 18 months after the close of the public comment period on the revised draft guidance.

P. Supporting Review of New Allergenic Extract Products

FDA will use fee revenues to support the review of new allergenic extract products that have been incorporated in the PDUFA program by PDUFA VII. Allergenic extract products licensed after October 1, 2022 will generally be included in user fees. Allergenic extract products licensed before October 1, 2022, and standardized allergenic extract products submitted pursuant to a notification to the applicant from the Secretary regarding the existence of a potency test that measures the allergenic activity of an allergenic extract product licensed by the applicant before October 1, 2022 will remain excluded from PDUFA. All performance goals, procedures, and commitments in this letter apply to the allergenic products included in the PDUFA program under PDUFA VII.

II. CONTINUED ENHANCEMENT OF USER FEE RESOURCE MANAGEMENT

FDA is committed to ensuring the sustainability of PDUFA program resources and to enhancing the operational agility of the PDUFA program. FDA will build on the financial enhancements included in PDUFA VI and continue activities in PDUFA VII to ensure optimal use of user fee resources and the alignment of staff to workload through the continued maturation and assessment of the Agency's resource capacity planning capability. FDA will also continue activities to promote transparency of the use of financial resources in support of the PDUFA program.

A. Resource Capacity Planning

FDA will continue activities to mature the Agency's resource capacity planning function, including utilization of modernized time reporting, to support enhanced management of PDUFA resources in PDUFA VII and help ensure alignment of user fee resources to staff workload.

1. Resource Capacity Planning Implementation

a. By the end of the 2nd quarter of FY 2023, FDA will publish an implementation plan that will describe how resource capacity planning and time reporting will continue to be implemented during PDUFA VII. This implementation plan will address topics relevant to the maturation of resource capacity planning, including, but not limited to, detailing FDA's approach to:

i. The continued implementation of the Agency's resource capacity planning capability, including:

1) The continual improvement of the Capacity Planning Adjustment (CPA); and
2) The continual improvement of time reporting and its utilization in the CPA.

ii. The integration of resource capacity planning analyses in the Agency's resource and operational decision-making processes.

b. FDA will provide annual updates on the FDA website on the Agency's progress relative to activities detailed in this implementation plan by the end of the 2nd quarter of each subsequent fiscal year.

c. FDA will document in the annual PDUFA Financial Report how the CPA fee revenues are being utilized.

2. Resource Capacity Planning Assessment

By the end of FY 2025, an independent contractor will complete and publish an evaluation of the resource capacity planning capability. This will include an assessment of the following topics:

a. The ability of the CPA to forecast resource needs for the PDUFA program, including an assessment of the scope of the workload drivers in the CPA and their ability to represent the overall workload of the PDUFA program;

b. Opportunities for the enhancement of time reporting toward informing resource needs; and

c. The integration and utilization of resource capacity planning information within resource and operational decision-making processes of the PDUFA program.

The contractor will provide options and recommendations in the evaluation regarding the continued enhancement of the above topics as warranted. The evaluation findings and any related recommendations will be discussed at the FY 2026 PDUFA 5-year financial plan public meeting. After review of the findings and recommendations of the evaluation, FDA will, as appropriate, continue improving the resource capacity planning capability and the CPA.

B. Financial Transparency

1. FDA will publish a PDUFA 5-year financial plan no later than the end of the 2nd quarter of FY 2023. The plan shall recognize that the retention of the strategic hiring and retention adjustment required by section 736(b)(1)(C) of the FD&C Act is subject to renegotiation under a subsequent reauthorization of PDUFA. FDA will publish updates to the 5-year plan no later than the end of the 2nd quarter of each subsequent fiscal year. The annual updates will include the following topics:

a. The changes in the personnel compensation and benefit costs for the process for the review of human drug applications that exceed the amounts provided by the personnel compensation and benefit costs portion of the inflation adjustment; and

b. FDA's plan for managing costs related to strategic hiring and retention after the adjustment required by section 736(b)(1)(C) of the FD&C Act expires at the end of fiscal year 2027, given this adjustment is not intended to be reauthorized in a subsequent reauthorization of PDUFA.

2. FDA will convene a public meeting no later than the end of the 3rd quarter of each fiscal year to discuss the PDUFA 5-year financial plan and the Agency's progress in implementing resource capacity planning, including the continual improvement of the CPA and time reporting, and the integration of resource capacity planning in resource and operational decision-making processes.

3. FDA will include in the annual PDUFA Financial Report an accounting of appropriated user fee funds included in the operating reserve at the end of each fiscal year, as well as the carryover balance of user fee funds that are considered unappropriated and therefore not included in the operating reserve.

III. IMPROVING FDA HIRING AND RETENTION OF REVIEW STAFF

Enhancements to the human drug review program require that FDA hire and retain sufficient numbers and types of technical and scientific experts to efficiently conduct reviews of human drug applications. During PDUFA VII, FDA will commit to do the following:

A. Set Clear Goals for Human Drug Review Program Hiring

1. FDA will establish priorities for management of the metric goals for targeted hires within the human drug review program staff

for the years of PDUFA VII. These goals for targeted hires are summarized in Table 6 below:

TABLE 6

	FY 2023	FY 2024	FY 2025	FY 2026	FY 2027
CBER	132	48	29	15	4
CDER	77	31	15	0	0
Other FDA	1	0	0	0	0
Total FTE	210	79	44	15	4

2. FDA will confirm progress in the hiring of PDUFA VI new staff. FDA will also report on progress against the hiring goals for FY 2023–2027 on a quarterly basis posting updates to the FDA website PDUFA Performance webpage.

B. Assessment of Hiring and Retention

The Directors of CDER and CBER will utilize a qualified, independent contractor with expertise in assessing HR operations to conduct a targeted assessment of the hiring and retention of staff for the human drug review program. The contractor will assess the factors that contribute to HR successes and challenges, including factors outside of FDA’s control. The assessment will build upon the findings of previous evaluations conducted under PDUFA VI with a focus on the changes and adjustments that have improved FDA’s hiring and retention outcomes and which challenges remain. In addition to evaluating the outcomes of various hiring changes, the assessment will include metrics related to recruiting and retention in the human drug review program, including, but not limited to, specific targeted scientific disciplines, attrition, and utilization of pay authorities. The report will include the contractor’s findings and recommendations on further enhancements to hiring and retention of staff for the human drug review program, if warranted.

The assessment will be published on FDA’s website no later than the June 30th, 2025 for public comment. FDA will also hold a public meeting no later than the September 30th, 2025 to discuss the report, its findings, and the Agency’s specific plans to address the report recommendations.

IV. INFORMATION TECHNOLOGY AND BIOINFORMATICS GOALS

A. Enhancing Transparency and Leveraging Modern Technology

Under PDUFA VII, FDA will:

1. Enhance Transparency

FDA will further enhance transparency of its IT activities and modernization plans, as well as continue to ensure the usability and improvement of the electronic submissions gateway (ESG):

a. Quarterly, FDA and industry will jointly plan and conduct meetings on challenges, emerging needs, and progress on initiatives relevant to PDUFA, including continued sustainability of initiatives after completion in PDUFA VII, progress or activities on harmonization and convergence, where appropriate, across Center systems for streamlined compatibility, interoperability, and extensibility. Agendas and meeting materials will be shared prior to each meeting.

b. Annually, appropriate FDA and industry IT leadership (e.g., enterprise IT leadership, Center IT leadership) will participate in a review of PDUFA IT initiatives and provide an opportunity for industry input.

c. FDA will engage industry to provide feedback and/or participate in pilot testing in advance of implementing significant changes that impact industry’s interaction with the enterprise-wide systems.

d. FDA will maintain a current published FDA Data Standards Catalog, and quarterly publish an updated data standards action plan.

2. Develop Data and Technology Modernization Strategy

FDA will progress a Data and Technology Modernization Strategy (“Strategy”) that provides FDA’s strategic direction for current and future state data-driven regulatory initiatives.

a. No later than Q4 FY 2023, FDA will establish a Data and Technology Modernization Strategy that reflects the vision in FDA’s Technology and Data Modernization Action Plans, including:

i. outlining key areas of focus and approach including leveraging cloud technologies to support Applicant-FDA regulatory interaction;

ii. articulating enterprise-wide approaches for both technology and data governance; and

iii. aligning strategic initiatives in support of PDUFA review goals, drawing a line of sight between initiatives and the enterprise strategy (i.e. the agency-wide strategy also supporting components outside PDUFA).

b. The Strategy will be shared and annually updated to reflect progress and any needed adjustments. Milestones and metrics for PDUFA initiatives will be included in the updates.

3. Promote Convergence

As appropriate, FDA will engage with stakeholders and international consortia (e.g., ICH, ICMRA) on technology and innovation initiatives that promote convergence in data interoperability and interpretability for current and future FDA initiatives throughout the regulatory lifecycle.

a. FDA will seek to adopt international standards where feasible and appropriate, giving considerations to cybersecurity risk, international commitments, legal constraints, and other relevant factors.

4. Accelerate CBER Modernization

During PDUFA VII, CBER will retire its older IT systems and capabilities, leverage capabilities in other Centers where feasible, and utilize new data management tools and technologies in line with Agency strategic plans and effective use of resources.

In coordination with CDER and CDRH, CBER will accelerate its data and IT modernization in order to leverage or develop state-of-the-art IT technology to provide cloud-based, agile, and stable integrated platforms, to streamline and improve its ability to perform complex reviews, access, utilize and protect data, and redirect IT spending from maintenance of older IT systems to improving the reviewer experience. Modernization efforts will enable new capabilities such as knowledge management, data and analytic reporting, decision tools, and, workflow and workload management to be developed sooner. CBER will share its experience and new capabilities with other Centers.

b. By the end of Q4 FY 2022, CBER will have established a multi-year modernization roadmap, including concrete implementation phases and milestones with defined success and performance criteria and anticipated costs.

i. Criteria may include, for example, retiring a minimum 25% of CBER legacy systems and capabilities by the end of PDUFA VII; leveraging existing adverse events reporting capabilities for CBER adverse event report-

ing; transitioning regulatory data and analytics to a new shared environment; using a new electronic review management tool and knowledge management system.

ii. These and other modernization efforts will allow for measurable improved review and internal management of novel and scientifically complex PDUFA biologics, leading to enhanced review efficiency, effectiveness and quality.

iii. Modernization outcomes will facilitate external interactions with developers, manufacturers, and other stakeholders—resulting in faster information exchange, data analysis, and dissemination of safety information; and better consistency of advice and decisions to guide and foster product development and review.

c. Annually and at key milestones, CBER will share its roadmap, provide updates on its progress including successes, issues, performance metrics, accomplishments and any issues or necessary adjustments to accommodate unexpected events (e.g., contracting, delays outside of CBER control) or reasonable deviations from its modernization roadmap. This information will be shared at regularly scheduled FDA-industry meetings.

d. In order to ensure successful modernization, CBER maintains active management and oversight of its IT and Data projects through a structured system of controls that covers all phases of projects. CBER will not progress to the next phase of implementation for an IT modernization project without successful completion of the previous phase.

e. CBER will scope and plan its IT modernization activities to conclude by the end of FY 2027 with no expectation of continued additional direct costs funding to support the effort beyond PDUFA VII.

5. Monitor and Modernize ESG

FDA will continue to ensure the usability and improvement of the ESG.

a. Annually, FDA will provide on the ESG website historic and current metrics on ESG performance in relation to published targets, characterizations and volume of submissions, and standards adoption and conformance.

FDA will advance the ESG cloud-based modernization with an improved architecture that supports greatly expanding data submission bandwidth and storage, while continuing to ensure its stable operation.

a. By the end of FY 2025, FDA will complete ESG transition to the cloud, including set-up and integration of an enterprise Identity and Access Management solution that will streamline applicant access to FDA resources.

b. Annually, FDA will share progress against the implementation project plan.

c. FDA will engage industry to provide feedback and/or participate in pilot testing in advance of implementing significant changes that impact industry’s interaction with the enterprise-wide systems.

6. Leverage Cloud Technology to Progress Regulatory Digital Transformation

Cloud and cloud-based technology offer significant advantages over traditional on-premise data repositories and analytics. Combined with interoperable information exchange mechanisms, these advantages open a host of new opportunities to explore, promote and implement innovation in the drug development and regulatory review process.

The outcomes of demonstration projects in PDUFA VII will be the building blocks, informing and positioning FDA and regulated industry to take best advantage of third-party hosted capabilities in conjunction with their own infrastructure, as well as investigating the potential for such capabilities to be jointly leveraged by other regulatory authorities and applicants.

a. FDA will engage with external parties to develop and test reusable and portable core capabilities that can be supported both with FDA's environment and in trusted third-party environments. This engagement will be through mechanisms such as, but not limited to, cooperative agreements, contracts, Cooperative Research and Development Agreements (CRADAs) and public-private partnerships.

b. By the end of Q3 FY 2023, FDA will assess challenges or barriers in FDA's adoption of cloud-based technologies in applicant-regulator interactions and within 6 months will publish the findings of this assessment.

c. In FY 2023, FDA, in consultation with industry, will prioritize and initiate the first of at least 3 demonstration projects to explore application of cloud-based technologies to streamline, improve and enable a variety of applicant-regulator interactions.

i. In support of the use of DHT-derived data in applications, FDA will enhance its capability to effectively receive, aggregate, store, and process large volumes of static or continuously updated DHT-derived data captured as part of a clinical trial.

ii. Projects will demonstrate applications of cloud technology to applicant-regulator interactions and secure shared environments for specific regulatory activities (e.g., support labeling negotiations between FDA and applicants, develop a standard protocol template to accelerate review and provide usable archive, improve statistical analysis plan between FDA and applicants).

iii. Projects will develop increasingly rich and flexible technical capabilities that can be leveraged for multiple purposes by regulators and industry, either internally within a regulator's or industry's environment, or through a trusted third-party, thus promoting convergence through common components such as Cloud-hosted Individualized Secure Collaboration Hubs (ISCH) which provide secure and effective environments for various cloud-based collaboration initiatives;

1) An example might be to utilize an ISCH for applicant-regulator label negotiations; another might be to hold continuously updated DHT-derived data for analysis.

d. Within 6 months of completion of a demonstration project, a summary of outcomes and next steps will be compiled and shared with industry at the regularly scheduled FDA-industry meetings. A description of the project and summary of outcomes will be posted on the FDA website.

e. FDA will engage industry to provide feedback and/or participate in testing in advance of implementing significant changes that impact industry's interaction with the enterprise-wide systems.

i. FDA will review progress and plans at quarterly meetings with industry.

f. Demonstration projects and associated capabilities development will be completed by the end of FY 2027 with no expectation of additional funding for those activities beyond PDUFA VII.

7. Provide Bioinformatics IT Support

CDER and CBER are seeing increasing volume and diversity of bioinformatics and computational biology information and data, such as Next Generation Sequencing, in sponsor-regulator interactions. Bioinformaticists play an essential and expanding role in new drug and biologic appli-

cation reviews, providing in-depth independent analysis of submitted data to support review decisions in close coordination with clinical and product experts. To be effective entails appropriate IT support.

a. FDA will assess its bioinformatics capabilities, and annually, ensure that IT resources are provided to support bioinformatics activities, including software licensing, cloud-based storage and computing capacity, operations support and maintenance.

b. Outcomes will be shared at regularly scheduled FDA-industry meetings.

B. Expanding and Enhancing Bioinformatics Support

Bioinformatics and computational biology are increasingly being used to assess product quality, safety and efficacy and facilitate the development, characterization and manufacture of human drugs and biologics. Recognizing the substantial increase in the volume and diversity of bioinformatics and computational biology information and data, such as Next Generation Sequencing, in regulatory submissions, FDA will develop additional expertise and staff capacity in both CDER and CBER to efficiently review and provide technical and timely feedback on information and accompanying data in submissions and meet performance goals, especially for those submitted early in development. FDA will hire technical expertise necessary to assess the approaches and evaluate data as appropriate, validating the results and/or analytic process using existing tools or through independent analysis when necessary. Staff with specialized expertise in specific product/therapeutic areas will also be developed to facilitate translation of bioinformatic information to subject matter review experts. FDA will also assess and strengthen its computational infrastructure to support and advance its informatics platforms, allowing FDA to remain current with the most recent technology in the field. To facilitate submission and review of bioinformatics and computational biology information, FDA will continue to develop data standards and revise guidance or issue draft guidance on this topic including how to submit, and format submissions, and technical validation criteria. FDA will work globally to advance harmonization of these standards and methodologies.

C. Enhancing use of Digital Health Technologies to Support Drug Development and Review

A Digital Health Technology (DHT) in the context of this commitment may be considered as a system that uses computing platforms, connectivity, software, and sensors for healthcare and related uses. These technologies may span a wide range of uses, from applications in general wellness to applications as a medical device to applications generating data that may be used in the evaluation of drug or biologic products.

DHTs can allow for remote data acquisition from patients and clinical trial participants to measure a wide range of activities, behaviors, and functioning in real life settings that can inform important clinical endpoints. DHTs may include wearable, implantable, ingestible, and environmental sensors or software applications on mobile devices, among other approaches. The use of DHTs can support and enable the conduct of decentralized clinical trials (DCTs), the clinical investigations in which some or all trial-related procedures and data acquisition take place at locations remote from the investigator.

While the biomedical field has experienced rapid development and implementation of DHTs, FDA has limited experience evaluating novel DHT-based measurements in

human drug development. FDA recognizes the potential for DHTs to provide scientific and practical advantages in supporting the assessment of patients by generating information outside of the traditional clinic visit and needs to build capacity and expertise to advise the biopharmaceutical industry in their development and implementation and to evaluate DHT outputs including the impact of regulatory initiatives (or regulatory science). To support new drug registration, label expansion, and safety monitoring, DHT-based data need to be fit for the intended purpose. Toward these ends, FDA will do the following:

1. By the end of Q2 FY 2023, FDA will establish a DHT framework document guide the use of DHT-derived data in regulatory decision-makings for drugs and biological products. The framework will guide activities such as to:

a. Define objectives for workshops and demonstration projects;

b. Develop methodologies for evaluating DHTs proposed as measuring key (primary or important secondary) endpoints or other important measures (e.g., for safety monitoring, or baseline characterization) in clinical trials;

c. Manage submissions with extensive and continuous data, e.g., in order to develop acceptable approaches to capture adverse events; and

d. Develop a standardized process for data management and analysis of large datasets from DHTs.

2. By the end of Q2 FY 2023, FDA will establish a committee including members from CDER and CBER to support implementation of the commitments in this section. The establishment of the committee and its purpose will be made public on the FDA website. Responsibilities will include, but not be limited to:

a. Oversee the design and implementation of the DHT framework;

b. Promote consistency across centers regarding DHT-based policy, procedure, and analytic tool development;

c. Work with the FDA Digital Health Center of Excellence (DHCoE) to increase consistency across regulatory programs, to incorporate relevant learnings from review of digital tools and devices by CDRH, and to consider cross-center topics;

d. Gather information about the present state of DHTs, including specific challenges in their use; and

e. Engage with external stakeholders on DHT-related issues.

3. By the end of Q2 FY 2023, FDA will convene the first of a series of 5 public meetings or workshops with key stakeholders including patients, biopharmaceutical companies, DHT companies, and academia to gather input into issues related to the use of DHTs in regulatory decision-making. The meetings and workshops will be designed with objectives such as to:

a. Understand priorities for development of DHTs to support clinical trials, including the potential for DHTs to increase diverse patient populations in clinical trials;

b. Identify approaches to DHT validation;

c. Gain understanding of DHT data processing and analysis and inform need for novel analytical techniques; and

d. Address the regulatory acceptance of safety monitoring tools that utilize artificial intelligence/machine learning-based algorithms for pharmacovigilance purposes, e.g., continuous data streams from DHT.

4. FDA will identify at least 3 issue-focused demonstration projects to inform methodologies for efficient DHT evaluation. These projects may include engagement with researchers from academia, biopharmaceutical industry, patient groups and other stakeholders, and will:

a. Cover key issues to inform regulatory policy development and regulatory advice. E.g., the projects may examine such areas as validation methods, analytic approaches to missing data, the use of multi-channel inputs to characterize an endpoint, evaluation of continuous data vs discrete measurements, use and limitations of use of DHTs in DCTs, and other related efforts.

5. By the end of Q1 FY 2023, FDA will publish draft, revised or final guidance on the use of DHTs in traditional and decentralized clinical trials, addressing the validation of measurements made by DHTs, the development of novel endpoints using DHTs, the use of DHTs as new ways to measure existing endpoints, approaches to using the patients' own DHTs such as cell phones or smart watches, usability considerations for patients, detection of safety signals during continuous data acquisition, and issues related to security and confidentiality of data.

a. Beginning in FY 2024, FDA will publish additional draft guidances in identified areas of need informed by stakeholder engagement.

i. For example, acceptable approaches to capturing and reporting adverse events in clinical trials using DHTs.

b. FDA will work towards the goal of publishing final guidance within 18 months after the close of the public comment period on the draft guidance. If, after receiving comments on the draft guidance, FDA determines that the guidance requires substantive changes on which further public comments are warranted, FDA will issue a revised draft guidance within those 18 months instead. It then will work towards publishing a final guidance within 18 months after the close of the public comment period on the revised draft guidance.

6. By the end of FY 2023, FDA will publish draft, revised or final guidance on regulatory considerations for Prescription Drug Use-Related Software that includes information about software that is disseminated by a drug applicant for use with a prescription drug or biologic product that may be described in labeling, including prescribing information. This guidance will cover software that is distributed with a drug or integrated as part of a drug- or biologic-led combination product, as well as software that is distributed by an applicant independent of an approved product.

7. FDA will expand its capacity to achieve its stated objectives in this section and to enhance consistency across the human drugs and biologics program (and as appropriate with the medical devices program) with regards to development, use, and review of DHT's and associated endpoints. Through a combination of expanded staff and contract support, FDA will:

a. Build technical expertise within the human drugs and biologics program to enhance internal knowledge, capabilities for review of IND-and NDA/BLA submissions including DHT derived endpoints, policy, standards and guidance development;

b. Train FDA staff in evaluation of DHTs;

c. Develop statistical methodology for the design, analysis, and interpretation of DHT-derived clinical trial endpoints;

d. Build review capacity and expertise to respond to DHT developers and biopharmaceutical applicants who want to use DHTs; and

e. Apply a consistent approach to review of DHTs across CDER, CBER, and CDRH as appropriate.

8. FDA will enhance its IT capabilities to support the review of DHT-generated data:

a. By end of Q2 FY 2023, FDA will enhance its internal systems to support review of DHT-related submissions including capturing key information about clinical trials

utilizing DHTs to support tracking the number and rate of change of DHT-related submissions.

b. In FY 2023, FDA will establish a secure cloud technology to enhance its infrastructure and analytics environment that will enable FDA to effectively receive, aggregate, store, and process large volumes of data from trials conducted using DHTs.

c. After establishing the cloud environment, FDA will pilot a secure cloud-based mechanism to support submission and review of DHT-generated data sets.

d. FDA will work to enhance, recommend and implement standards that reduce the handling necessary to make data analyzable.

V. IMPROVING FDA PERFORMANCE MANAGEMENT

A. *Studies Will Include:*

1. Assessment of the internal activities related to the STAR pilot program as described in Section I.D.4.

2. Assessment of the current practices of FDA and sponsors in communicating through product quality IRs during application review as described in Section I.N.1.c.

3. Evaluation of the resource capacity planning capability as described in Section II.A.2.

4. Assessment of the hiring and retention of staff for the human drug review program in CDER and CBER as described in Section III.B.

5. Assessment of challenges or barriers in FDA's adoption of cloud-based technologies as described in Section IV.A.6.b.

VI. PROGRESS REPORTING FOR PDUFA VII AND CONTINUING PDUFA VI INITIATIVES

A. FDA will include in the annual PDUFA Performance Report information on the Agency's progress in meeting the specific commitments identified in this document as prescribed in statute.

B. FDA will include in the annual PDUFA Financial Report information identified in Section II in this document and as prescribed in statute.

APPENDIX. DEFINITIONS AND EXPLANATION OF TERMS

1. "Human drug applications" refers to new drug applications submitted under section 505(b) of the Federal Food, Drug, and Cosmetic Act and biologics license applications submitted under section 351(a) of the Public Health Service Act, as defined in the Prescription Drug User Fee Act.

2. "Human drug review program" refers to the activities to conduct "the process for the review of human drug applications," as defined in the Prescription Drug User Fee Act.

3. The term "review and act on" means the issuance of a complete action letter after the complete review of a filed complete application. The action letter, if it is not an approval, will set forth in detail the specific deficiencies and, where appropriate, the actions necessary to place the application in condition for approval.

4. A resubmitted original application is a complete response to an action letter addressing all identified deficiencies.

5. Class 1 resubmitted applications are applications resubmitted after a complete response letter (or a not approvable or approvable letter) that include the following items only (or combinations of these items):

a. Final printed labeling

b. Draft labeling

c. Safety updates submitted in the same format, including tabulations, as the original safety submission with new data and changes highlighted (except when large amounts of new information including important new adverse experiences not previously reported with the product are presented in the resubmission)

d. Stability updates to support provisional or final dating periods

e. Commitments to perform Phase 4 studies, including proposals for such studies

f. Assay validation data

g. Final release testing on the last 1-2 lots used to support approval

h. A minor reanalysis of data previously submitted to the application

i. Other minor clarifying information (determined by the Agency as fitting the Class 1 category)

j. Other specific items may be added later as the Agency gains experience with the scheme and will be communicated via guidance documents to industry

6. Class 2 resubmissions are resubmissions that include any other items, including any items that would require presentation to an advisory committee.

7. The performance goals and procedures also apply to original applications and supplements for human drugs initially marketed on an over-the-counter (OTC) basis through an NDA or switched from prescription to OTC status through an NDA or supplement.

8. As used in this commitment letter, "regulatory decision making" may include, for example, FDA's process for making a regulatory decision regarding a drug or biological product throughout the product lifecycle, such as during drug development, following FDA's review of a marketing application, including review of proposed labeling for the product, or in the post-approval period (e.g., FDA's decision regarding a supplement to an approved application).

9. "Serious disease or condition," "available therapy," "unmet medical need," and "may demonstrate substantial improvement on clinically significant endpoint(s)" have the meanings given in FDA's Guidance for Industry: Expedited Programs for Serious Conditions, Drugs and Biologics (May 2014).

MDUFA PERFORMANCE GOALS AND PROCEDURES, FISCAL YEARS 2023 THROUGH 2027

GENERAL

The performance goals and procedures agreed to by the Center for Devices and Radiological Health (CDRH) and the Center for Biologics Evaluation and Research (CBER) of the United States Food and Drug Administration ("FDA" or "the Agency") for the medical device user fee program in the Medical Device User Fee Amendments of 2022, are summarized below.

FDA and the industry are committed to protecting and promoting public health by providing timely access to safe and effective medical devices. Nothing in this letter precludes the Agency from protecting the public health by exercising its authority to provide a reasonable assurance of the safety and effectiveness of medical devices. Both FDA and the industry are committed to the spirit and intent of the goals described in this letter.

I. SHARED OUTCOME GOALS

The program and initiatives outlined in this document are predicated on significant interaction between the Agency and applicants. FDA and representatives of the industry agree that the process improvements outlined in this letter, when implemented by all parties as intended, should reduce the average Total Time to Decision for premarket approval applications (PMAs) and premarket notification (510(k)) submissions, provided that the total funding of the device review program adheres to the assumptions underlying this agreement. FDA and applicants share the responsibility for achieving this objective of reducing the average Total Time to Decision, while maintaining standards for safety and effectiveness. Success of this program will require the cooperation and dedicated efforts of FDA and applicants to reduce their respective portions of the Total Time to Decision.

FDA will be reporting Total Time to Decision performance as described in Section VII. FDA and industry will participate in the independent assessment of progress toward this outcome, as described in Section VI below. As appropriate, key findings and recommendations from this assessment will be implemented by FDA.

A. PMA

PMA Shared Outcome Total Time to Decision goal: FDA will report on an annual basis the average Total Time to Decision as defined in Section VIII.G for the three most recent closed receipt cohorts. The following PMA Shared Outcome Total Time to Decision goals are subject to adjustment per Section III below:

For Original PMA and Panel Track Supplement submissions received in Fiscal Years (FY) 2023 through 2024, the average shared outcome Total Time to Decision goal for FDA and industry is 290 calendar days.

For Original PMA and Panel Track Supplement submissions received in FYs 2025 through 2027, the average shared outcome Total Time to Decision goal for FDA and industry is 285 calendar days.

B. 510(k)

510(k) Shared Outcome Total Time to Decision goal: FDA will report on an annual basis the average Total Time to Decision as defined in Section VIII.G for the most recent closed receipt cohort. The following 510(k) Shared Outcome Total Time to Decision goals are subject to adjustment per Section III below:

For 510(k) submissions received in FY 2023, the average Total Time to Decision goal for FDA and industry is 128 calendar days.

For 510(k) submissions received in FY 2024, the average Total Time to Decision goal for FDA and industry is 124 calendar days.

For 510(k) submissions received in FY 2025, the average Total Time to Decision goal for FDA and industry is 112 calendar days.

For 510(k) submissions received in FY 2026, the average Total Time to Decision goal for FDA and industry is 112 calendar days.

For 510(k) submissions received in FY 2027, the average Total Time to Decision goal for FDA and industry is 112 calendar days.

II. REVIEW PERFORMANCE GOALS—FISCAL YEARS 2023 THROUGH 2027 AS APPLIED TO MDUFA COHORTS

The overall objective of the review performance goals stated herein is to assure more timely access to safe and effective medical devices.

A. Pre-Submissions

FDA will continue the Pre-Submission program as described in the guidance on “Requests for Feedback and Meetings for Medical Device Submissions: The Q-Submission Program” with process improvements and performance goals as noted in this section.

For all Pre-Submissions in which the applicant requests a meeting or teleconference, the applicant will provide a minimum of three proposed meeting dates in the initial submission.

Within 15 calendar days of receipt of a Pre-Submission, FDA will communicate with the applicant regarding whether the application has been accepted and, if applicable, regarding scheduling of the meeting or teleconference. Acceptance will be determined based on the definition of Pre-Submission in Section VIII.E below and an acceptance checklist in published guidance. This communication consists of a written communication that a) identifies the reviewer assigned to the submission, b) acknowledges acceptance/rejection of the submission, and c) if the submission included a request for a meeting or teleconference and is accepted, either confirms one of the applicant’s requested meet-

ing dates or provides two alternative dates prior to day 75 from receipt of accepted submission. A determination that the request does not qualify as a Pre-Submission will require the concurrence of the appropriate management or designee and the reason for this determination will be provided to the applicant in the above written communication. FDA intends to reach agreement with the applicant regarding a meeting date within 30 days from receipt of accepted submission. For all requests for meetings or teleconferences that do not have such a meeting or teleconference scheduled by 30 days from receipt of an accepted submission, a FDA manager will contact the applicant to resolve scheduling issues by the 40th day.

Pre-Submission Written Feedback goal: FDA will provide written feedback that addresses the issues raised in the Pre-Submission request within 70 calendar days of receipt date or five calendar days prior to a scheduled meeting, whichever comes sooner, for:

In FY 2023, 90% of Pre-Submissions in the MDUFA Cohort if the MDUFA Cohort is fewer than 3585, or 75% of Pre-Submissions in the MDUFA Cohort if the MDUFA Cohort is 3585 or more, up to 4300 submissions.

In FY 2024, 90% of Pre-Submissions in the MDUFA Cohort if the MDUFA Cohort is fewer than 4060, or 80% of Pre-Submissions in the MDUFA Cohort if the MDUFA Cohort is 4060 or more, up to 4300 submissions.

In FY 2025–2027, 90% of Pre-Submissions in the MDUFA Cohort up to 4300 submissions.

These Pre-Submission Written Feedback goals are subject to adjustment per Section III below.

The MDUFA Cohort will only include Pre-Submissions (as defined in Section VIII.E below) for devices that are accepted for review up to a maximum number of accepted submissions subject to the goal. Pre-Submissions will be accepted in accordance with the Pre-Submission acceptance checklist described in FDA’s guidance “Requests for Feedback and Meetings for Medical Device Submissions: The Q-Submission Program.”. In addition, the following types of requests for feedback available to Breakthrough-designated products and/or products included in the Safer Technologies Program (STeP) are considered accepted for review upon receipt:

- Sprint discussions;
- Requests for review of a data development plan; and
- Requests for review of a clinical protocol agreement.

The MDUFA Cohort will not include Pre-Submissions that are withdrawn at request of applicant or closed due to lack of applicant response.

For any Pre-Submissions in the MDUFA Cohort for which FDA does not meet the Pre-Submission Written Feedback goal, FDA will communicate with the applicant in a timely manner regarding a timeline for providing written feedback.

After the Pre-Submission MDUFA Cohort reaches the maximum number of submissions subject to the goal in a fiscal year, FDA still intends to provide timely feedback for Pre-Submissions for Breakthrough-designated products and products included in the Safer Technologies Program (STeP). After the Pre-Submission MDUFA Cohort reaches the maximum number of submissions subject to the goal, FDA intends to provide feedback for other Pre-Submissions as resources permit, but not to the detriment of meeting quantitative review timelines and statutory obligations.

Written feedback provided to the applicant will include: written responses to the applicant’s questions; FDA’s suggestions for additional topics for the meeting or teleconference, if applicable; or, a combination of both.

If all of the applicant’s questions are addressed through written responses to the applicant’s satisfaction, FDA and the applicant can agree that a meeting or teleconference is no longer necessary, and the written responses will be considered the final written feedback to the Pre-Submission.

Applicants will be responsible for developing draft minutes for a Pre-Submission meeting or teleconference, and providing the draft minutes to FDA within 15 calendar days of the meeting. At the beginning and end of each meeting, the applicant will affirmatively state that they will draft minutes and provide them to FDA within 15 calendar days. The minutes will summarize the meeting discussions and include agreements and any action items. FDA will provide any edits to the draft minutes to the applicant via email within a timely manner. These minutes will become final 15 calendar days after the applicant receives FDA’s edits, unless the applicant indicates that there is a disagreement with how a significant issue or action item has been documented. In this case, within a timely manner, the applicant and FDA will conduct a teleconference to discuss that issue with FDA. At the conclusion of that teleconference, within 15 days FDA will finalize the minutes either to reflect the resolution of the issue or note that this issue remains a point of disagreement.

FDA intends that feedback the Agency provides in a Pre-Submission will not change, provided the information submitted in a future IDE or marketing application is consistent with that provided in the Pre-Submission and documented in the Pre-Submission, and that the data in the future submission, changes in the science, or changes in the standards of care do not raise any important new issues materially affecting safety or effectiveness. The minutes described above will serve as the record of the Agency’s Pre-Submission feedback. Modifications to FDA’s feedback will be limited to situations in which FDA concludes that the feedback does not adequately address important new issues materially relevant to a determination of safety and/or effectiveness or substantial equivalence. Such a determination will be supported by the appropriate management concurrence consistent with applicable guidance and SOPs.

By March 31, 2024, the Agency will issue draft guidance to update the guidance on “Requests for Feedback and Meetings for Medical Device Submissions: The Q-Submission Program” to include additional information to assist applicants and review staff in identifying the circumstances in which an applicant’s question is most appropriate for informal communication instead of a Pre-Submission. FDA will provide an opportunity for the public to comment on the updated guidance. No later than 18 months after the close of the public comment period, the Agency will issue a final guidance. FDA will implement this guidance once final. FDA will train staff and managers on the updated guidance.

B. Original PMAs, Product Development Protocols, Panel-Track Supplements, and Pre-market Reports

The performance goals in this section apply to all Original PMAs, Product Development Protocols (PDPs), Panel-Track Supplements, and Premarket Reports.

FDA will communicate with the applicant regarding whether the application has been accepted for filing review within 15 calendar days of receipt of the application. This communication consists of a written communication that a) identifies the reviewer assigned to the submission, and b) acknowledges acceptance/rejection of the submission based upon the review of the submission

against objective acceptance criteria outlined in a published guidance document and consistent with the statute and its implementing regulations.

If the application is not accepted for filing review, FDA will notify the applicant of those items necessary for the application to be considered accepted for filing review.

For those applications that are accepted for filing review, FDA will communicate the filing status within 45 calendar days of receipt of the application.

For those applications that are not filed, FDA will communicate to the applicant the specific reasons for rejection and the information necessary for filing.

If the application is filed, FDA will communicate with the applicant through a Substantive Interaction within 90 calendar days of the filing date of the application for 95% of submissions.

When FDA issues a major deficiency letter, that letter will be based upon a complete review of the application and will include all deficiencies. Deficiency letters will include a statement of the basis for the deficiencies, as provided in Section V.B below. Deficiency letters will undergo supervisory review prior to issuance to ensure the deficiencies cited are relevant to a determination of safety and effectiveness. Any subsequent deficiencies will be limited to issues raised by the information provided by the applicant in its response, unless FDA concludes that the initial deficiencies identified do not adequately address important new issues materially relevant to a determination of safety or effectiveness. Such a determination will be supported by the appropriate management concurrence consistent with applicable guidance and SOPs. Issues related to post-approval studies, if applicable, and revisions to draft labeling will typically be addressed through interactive review once major deficiencies have been adequately addressed.

PMA decision goal: For Original PMAs, PDPs, Panel-Track Supplements, and Pre-market Reports that do not require Advisory Committee input, FDA will issue a MDUFA decision within 180 FDA Days for 90% of submissions. This PMA decision goal is relevant for purposes of Section III below.

For submissions that require Advisory Committee input, FDA will issue a MDUFA decision within 320 FDA Days for 90% of submissions. FDA will issue a MDUFA decision within 60 days of the Advisory Committee recommendation, as resources permit, but not to the detriment of meeting the quantitative review timelines and statutory obligations. The Office Director shall review each request for Advisory Committee input for appropriateness and need for this input.

If in any one fiscal year, the number of submissions that require Advisory Committee input is less than 10, then it is acceptable to combine such submissions with the submissions for the following year(s) in order to form a cohort of 10 or more submissions, upon which the combined years' submissions will be subject to the performance goal. If the number of submissions that require Advisory Committee input is less than 10 for FY 2027, it is acceptable to combine such submissions in the prior year(s) to form a cohort of 10 or more submissions; in such cases, FDA will be held to the FY 2027 performance goal for the combined years' submissions.

To facilitate an efficient review prior to the Substantive Interaction, and to incentivize submission of a complete application, submission of an unsolicited major amendment prior to the Substantive Interaction extends the FDA Day review clock by the number of FDA Days that have elapsed. Submission of an unsolicited major amendment after the Substantive Interaction extends the FDA Day goal by the number of

FDA Days equal to 75% of the difference between the filing date and the date of receipt of the amendment. Requests from FDA that a submission be made will not be considered unsolicited.

For all PMA submissions that do not reach a MDUFA decision by 20 days after the applicable FDA Day goal, FDA will provide written feedback to the applicant to be discussed in a meeting or teleconference, including all outstanding issues with the application preventing FDA from reaching a decision. The information provided will reflect appropriate management input and approval and will include action items for FDA and/or the applicant, as appropriate, with an estimated date of completion for each party to complete their respective tasks. Issues should be resolved through interactive review. If all of the outstanding issues are adequately presented through written correspondence, FDA and the applicant can agree that a meeting or teleconference is not necessary.

For PMA submissions that receive a MDUFA decision of Approvable, FDA will issue a decision within 60 days of the sponsor's response to the Approvable letter, as resources permit, but not to the detriment of meeting the quantitative review timelines and statutory obligations.

In addition, information about submissions that miss the FDA Day goal will be provided as part of FDA's Performance Reports, as described in Section VII.

C. 180-Day PMA Supplements

FDA will communicate with the applicant through a Substantive Interaction within 90 calendar days of receipt of 95% of submissions.

FDA will issue a MDUFA decision within 180 FDA Days for 95% of submissions.

D. Real-Time PMA Supplements

FDA will issue a MDUFA decision within 90 FDA Days for 95% of submissions.

E. De Novo Requests

De Novo decision goal: FDA will issue a MDUFA decision within 150 FDA Days for 70% of De Novo requests. This De Novo decision goal is subject to adjustment per Section III below.

Deficiencies identified will be based upon a complete review of the submission and will include all deficiencies. Deficiency letters will include a statement of the basis for the deficiencies, as provided in Section V.B below. Deficiency letters will undergo supervisory review prior to issuance to ensure the deficiencies cited are relevant to a classification determination. Any subsequent deficiencies will be limited to issues raised by the information provided by the applicant in its response, unless FDA concludes that the initial deficiencies identified do not adequately address important new issues materially relevant to a classification determination. Such a determination will be supported by the appropriate management concurrence consistent with applicable guidance and SOPs. Issues related to revisions to draft labeling will typically be addressed through interactive review once major deficiencies have been adequately addressed.

At the applicant's request and as resources permit, but not to the detriment of meeting the quantitative review timelines, if a final decision has not been rendered within 180 FDA days, FDA will discuss with the applicant all outstanding issues with the submission preventing FDA from reaching a decision. This discussion will reflect appropriate management input and approval and will include action items for FDA and/or the applicant, as appropriate, with an estimated date of completion for each party to complete their respective tasks.

F. 510(k) Submissions

FDA will communicate with the applicant regarding whether the submission has been

accepted for review within 15 calendar days of receipt of the submission. For those submissions that are not accepted for review, FDA will notify the applicant of those items necessary for the submission to be considered accepted.

FDA will provide written communication that a) identifies the reviewer assigned to the submission, and b) acknowledges acceptance/rejection of the submission based upon the review of the submission against objective acceptance criteria outlined in a published guidance document. This communication represents a preliminary review of the submission and is not indicative of deficiencies that may be identified later in the review cycle.

For 510(k) submissions received under the eSTAR program, a submission that passes the initial technical screening will be considered accepted for review as of the date the submission was received.

FDA will communicate with the applicant through a Substantive Interaction within 60 calendar days of receipt of the submission for 95% of submissions.

Deficiencies identified in a Substantive Interaction, such as a telephone/email hold or Additional Information Letter, will be based upon a complete review of the submission and will include all deficiencies. Deficiency letters will include a statement of the basis for the deficiencies, as provided in section V.B below. Deficiency letters will undergo supervisory review prior to issuance to ensure the deficiencies cited are relevant to a determination of substantial equivalence. Any subsequent deficiencies will be limited to issues raised by the information provided by the applicant in its response, unless FDA concludes that the initial deficiencies identified do not adequately address important new issues materially relevant to a determination of substantial equivalence. Such a determination will be supported by the appropriate management concurrence consistent with applicable guidance and SOPs.

510(k) decision goal: FDA will issue a MDUFA decision for 95% of 510(k) submissions within 90 FDA Days. This 510(k) decision goal is relevant for purposes of Section III below.

For all 510(k) submissions that do not reach a MDUFA decision within 100 FDA Days, FDA will provide written feedback to the applicant to be discussed in a meeting or teleconference, including all outstanding issues with the application preventing FDA from reaching a decision. The information provided will reflect appropriate management input and approval and will include action items for FDA and/or the applicant, as appropriate, with an estimated date of completion for each party to complete their respective tasks. Issues should be resolved through interactive review. If all of the outstanding issues are adequately presented through written correspondence, FDA and the applicant can agree that a meeting or teleconference is not necessary.

In addition, information about submissions that miss the 510(k) decision goal will be provided as part of FDA's Performance Reports, as described in Section VII.

G. CLIA Waiver by Application

FDA will engage in a Substantive Interaction with the applicant within 90 days for 90% of the applications.

Pre-Submission review timeframes in Section II.A apply to Pre-Submissions for CLIA Waiver by Application and Dual submission 510(k)/CLIA Waiver applications.

Industry will inform FDA that it plans to submit a dual submission (510(k) and CLIA Waiver application) during the Pre-Submission process. FDA will issue a decision for 90% of dual submission applications within 180 FDA days.

For “CLIA Waiver by application” submissions FDA will issue a MDUFA decision for 90% of the applications that do not require Advisory Committee input within 150 FDA days.

For “CLIA Waiver by application” submissions FDA will issue a MDUFA decision for 90% of the applications that require Advisory Committee input within 320 FDA days.

If in any one fiscal year, the number of submissions in any CLIA Waiver by Application category is less than 10, then it is acceptable to combine such submissions with the submissions for the following year(s) in order to form a cohort of 10 or more submissions, upon which the combined years’ submissions will be subject to the performance goal.

For all CLIA waiver by application submissions and dual submissions that do not reach a decision by 20 days after the applicable FDA Day goal, FDA will provide written feedback to the applicant to be discussed in a meeting or teleconference, including all outstanding issues with the application preventing FDA from reaching a decision. The information provided will reflect appropriate management input and approval, and will include action items for FDA and/or the applicant, as appropriate, with an estimated date of completion for each party to complete their respective tasks. Issues should be resolved through interactive review. If all of the outstanding issues are adequately presented through written correspondence, FDA and the applicant can agree that a meeting or teleconference is not necessary.

In addition, information about submissions that miss the FDA Day goal will be provided as part of FDA’s Performance Reports, as described in Section VII.

H. Original Biologics Licensing Applications (BLAs)

FDA will review and act on standard original BLA submissions within 10 months of receipt for 90% of submissions.

FDA will review and act on priority original BLA submissions within 6 months of receipt for 90% of submissions.

I. BLA Efficacy Supplements

FDA will review and act on standard BLA efficacy supplement submissions within 10 months of receipt for 90% of submissions.

FDA will review and act on priority BLA efficacy supplement submissions within 6 months of receipt for 90% of submissions.

J. Original BLA and BLA Efficacy Supplement Resubmissions

FDA will review and act on Class 1 original BLA and BLA efficacy supplement resubmissions within 2 months of receipt for 90% of submissions.

FDA will review and act on Class 2 original BLA and BLA efficacy supplement resubmissions within 6 months of receipt for 90% of submissions.

K. BLA Manufacturing Supplements Requiring Prior Approval

FDA will review and act on BLA manufacturing supplements requiring prior approval within 4 months of receipt for 90% of submissions.

III. OPPORTUNITY FOR PERFORMANCE IMPROVEMENTS

MDUFA V will provide for increases in fee revenue above the annual total revenue amount to support performance improvements in FY 2025, FY 2026, and/or FY 2027, as detailed below. If such fee revenue adjustments are not made, the performance goals in Section II apply.

For the purpose of fee revenue adjustments, performance of all goals in this section, except for the Pre-Submission Written Feedback goal, will be determined based on

data available as of 18 months following the close of the fiscal year at issue. Thus, for a FY 2023 goal, the performance will be determined based on data available as of March 31, 2025. For a FY 2024 goal, the performance will be determined based on data available as of March 31, 2026. For the Pre-Submission Written Feedback goal, performance will be determined based on data available as of 6 months following the close of the fiscal year at issue. Thus, for example, for the Pre-Submission Written Feedback goal for FY 2023, performance will be determined based on data available as of March 31, 2024.

A. PMA and 510(k): Decision Goals and Shared Outcome Total Time to Decision Goals

I. FDA’s 510(k) decision goal, the FDA/Industry 510(k) Shared Outcome Total Time to Decision goal, FDA’s PMA decision goal, and the FDA/Industry PMA Shared Outcome Total Time to Decision goal are met for FY 2023, and fee revenue above the annual total revenue amount is provided in FY 2026 and FY 2027 to support performance improvements, the 510(k) Shared Outcome Total Time to Decision goal will be adjusted to 108 days for FY 2026 and FY 2027 and the PMA Shared Outcome Total Time to Decision goal will be adjusted to 275 days for FY 2026 and FY 2027.

If FDA’s 510(k) decision goal, the FDA/Industry 510(k) Shared Outcome Total Time to Decision goal, FDA’s PMA decision goal, and the FDA/Industry PMA Shared Outcome Total Time to Decision goal are met in FY 2024, and fee revenues above the annual total revenue amount are provided in FY 2027 to support performance improvements, the 510(k) Shared Outcome Total Time to Decision goal will be adjusted to 108 days and the PMA Shared Outcome Total Time to Decision goal will be adjusted to 270 days for FY 2027.

B. De Novo Requests

If the De Novo decision goal is met for FY 2023, and fee revenue above the annual total revenue amount is provided in FY 2026 and FY 2027 to support performance improvements, the goal will be adjusted to 80% of De Novo requests receiving a MDUFA decision within 150 FDA days for FY 2026 and 2027.

If the De Novo decision goal is met for FY 2024, and fee revenue above the annual total revenue amount is provided in FY 2027 to support performance improvements, the goal will be adjusted to 90% of De Novo requests receiving a MDUFA decision within 150 FDA days in FY 2027.

C. Pre-Submissions

If the Pre-Submission Written Feedback goal is met for FY 2023, and fee revenue above the annual total revenue amount is provided to support performance improvements, the maximum number of submissions subject to the goal will escalate to 4700 Pre-Submissions in FYs 2025, 2026 and 2027.

If the Pre-Submission Written Feedback goal is met for FY 2024, and fee revenue above the annual total revenue amount is provided to support performance improvements, the maximum number of submissions subject to the goal will escalate to 4800 Pre-Submissions in FY 2026 and FY 2027.

If the Pre-Submission Written Feedback goal is met for FY 2025, and fee revenue above the annual total revenue amount is provided to support performance improvements, the goal will not be subject to a maximum number of submissions in FY 2027.

The goal for percent of Pre-Submissions in the MDUFA Cohort receiving timely feedback, as described in Section II.A, will remain at 90% for FYs 2025, 2026, and 2027.

IV. INFRASTRUCTURE

A. Quality Management

The CDRH Quality Management and Organizational Excellence (QMOE) Program is

comprised of a team of certified quality management staff who report to the Center Director. This QMOE staff are focused on meeting customers’ needs by improving consistency, efficiency, timeliness, and effectiveness of operations. The QMOE Program establishes and leads the CDRH Quality Management System (QMS) activities, facilitates process improvements, independently audits CDRH processes and activities, and assesses the effectiveness of actions taken to prevent potential (risk management) and resolve existing issues (nonconformity management).

At least once per year, the Agency will discuss with industry the specific areas it intends to incorporate in its ongoing audit plan with the QMOE Program. FDA will identify, with industry input, areas to audit, which will include the effectiveness of CDRH’s nonconformity management process. FDA will continue to expand the scope of its annual audits as it implements and builds up its auditing capability, as resources permit. At a minimum, FDA audits in the following areas will be completed: Pre-Submissions and Third Party Review Program.

As part of these ongoing audits, high-performing premarket review best practices utilized in one Office of Health Technology (OHT) will be identified and shared accordingly with other OHTs to improve efficiencies and effectiveness.

At least once per year, FDA will report on the results of the audits, best practices identified and shared across OHTs, and the actions taken in response to nonconformities associated with the nonconformity management process.

B. Financial Transparency and Hiring

1. Financial Transparency

FDA will publish a MDUFA 5-year financial plan no later than the end of the 2nd quarter of FY 2023. The financial plan will include the Agency’s annual hiring targets. No later than the end of the 2nd quarter of each subsequent fiscal year, FDA will publish updates to the 5-year plan as of the end of the prior fiscal year. The annual updates will include information concerning:

The number of new MDUFA V hires by Office;

The number of new MDUFA V hires made from outside the Center, as well as the number of new MDUFA V hires made from current Center employees (if any);

The number of unfilled new MDUFA V hires;

The changes in the personnel compensation and benefit costs for the process for the review of medical device applications that exceed the amounts provided by the personnel compensation and benefit costs portion of the inflation adjustment;

An accounting of appropriated user fee funds included in the operating reserves at the end of each fiscal year, as well as the carryover balance of user fee funds that are considered unappropriated or unearned and therefore not included in the operating reserves; and

An accounting of the amount excluded from the designated amount within the operating reserves, which is intended to support the Third Party Review program and the Total Product Life Cycle Advisory Program Pilot.

2. Carryover Balance

MDUFA V will provide for FDA to decrease registration fees if the Agency has more than 13 weeks of operating reserves in the carryover balance. In addition, during MDUFA V FDA will use funds in the carryover balance to support the Third Party Review program and the Total Product Life Cycle Advisory Program Pilot. The amount of carryover balance funds intended to support these programs will be excluded when

calculating the amount of operating reserves to determine if registration fees will be decreased. The current statutory one-month reserve will also be excluded when calculating the amount of operating reserves to determine if registration fees will be decreased. User fee funds in the carryover balance that are considered unappropriated or unearned are not included in the operating reserves.

No less than annually, FDA and industry will work together to seek alignment on how best to utilize available funds in the carryover balance to improve the process for the review of device applications—e.g., performance on submission types with performance goals and/or quality management programs. FDA and industry will use, as input for the discussion, workload information, performance objectives, and ongoing reported performance.

3. Hiring Goals

Enhancements to the medical device review program require that FDA recruit, hire and retain sufficient numbers and types of technical, scientific, and other program experts to support the process for the review of device applications. MDUFA V provides significant new resources to FDA to support these activities.

To help ensure that FDA accomplishes hiring in accordance with the assumptions underlying the agreement, FDA will establish annual hiring goals for each year of MDUFA V.

The minimum hiring goals for FY 2023–2025 are:

FY 2023: 144 hires
FY 2024: 42 hires
FY 2025: 24 hires

As described in Section III, the MDUFA V agreement provides for enhancements to the shared outcome total time to decision goals and to specified review performance goals, provided that specified goals were met in prior years. These enhanced goals will be applicable in FY 2025 (for the Pre-Submission Written Feedback goal) and FY 2026–2027 (for the Pre-Submission Written Feedback goal, the PMA Shared Outcome Total Time to Decision goal, the 510(k) Shared Outcome Total Time to Decision goal, and the De Novo Decision goal).

FDA and Industry have agreed that, if performance improvement adjustments are triggered for each year per Section III, the Agency will increase hiring to support the enhanced goals.

FY 2025

In FY 2025, if performance improvement adjustments are made to the Pre-Submission Written Feedback goal per Section III, FDA will increase the hiring goal by 59 hires to a total of 83 hires. As part of the process for establishing the user fee rates for FY 2025, FDA will also calculate the hiring goal for that year and include the goal in the associated Federal Register fee-setting notice.

FY 2026 and FY 2027

In FY 2026 and FY 2027, the number of hires will depend on (1) which performance improvement adjustments are triggered for that year, and (2) whether the hiring goal was increased the prior year. For FY 2026 and FY 2027, as part of the process for establishing the user fee rates for that year, FDA will also calculate the hiring goal for that year and include the goal in the associated Federal Register fee-setting notice.

Pre-hires

For purposes of determining whether the hiring goal is met for FY 2023, FDA will include “pre-hires” that are made in FY 2022 for MDUFA V positions. In addition, for subsequent fiscal years, if FDA exceeds the hiring goal, the additional hires made above the goal will be counted towards the following fiscal year goal.

4. Fee Adjustment Related to Hiring

For FY 2023, if the hiring goal is missed by more than 15% at the end of the fiscal year (i.e., if fewer than 123 hires are made in FY 2023, including FY 2022 pre-hires), unused fees that were projected to support these hires for FY 2023 will be used to decrease registration fees for FY 2025.

For FY 2024 or FY 2025, if the hiring goal is missed by more than 10% at the end of the fiscal year (i.e., if fewer than 38 hires are made in FY 2024), unused fees that were projected to support these positions for the applicable fiscal year will be used to decrease registration fees for FY 2026 and FY 2027, respectively.

The amount of the hiring adjustment fee decrease will be the product of the number of hires by which the hiring goal was missed and one-quarter of the inflation-adjusted cost per full-time equivalent (FTE).

For the purpose of calculating progress toward meeting these hiring goals, a hire is defined as someone who has been confirmed as on board by the date indicated in a full-time position. Hires may be recruited from outside the FDA, or, in some cases, a hire can also be a current FDA employee who is changing positions within the agency.

C. IT Infrastructure for Submission Management

FDA will continue to enhance IT infrastructure to support the process for the review of device applications.

FDA will maintain and improve on the Customer Collaboration Portal, including the submission progress tracking system that provides near real-time submission status. By the end of MDUFA V, the progress tracking system will include 510(k), Original PMA and Panel-Track Supplements, De Novo, Pre-Submissions, and IDEs.

FDA will continue to develop electronic submission templates that will serve as guided submission preparation tools for industry to improve submission consistency and enhance efficiency in the review process. Templates for Original PMA and Panel-Track Supplements, De Novo, Pre-Submissions, and IDEs will be completed and made available for voluntary use by the end of MDUFA V.

D. Training

FDA will continue to evaluate and improve training for new and existing reviewers under this agreement. FDA training efforts will also be closely coordinated with the QMOE Program to provide more targeted and personalized training to staff.

E. Time Reporting

FDA will continue to perform complete time reporting such that data from time reporting can be used to conduct workload analysis and capacity planning.

V. PROCESS IMPROVEMENTS

A. Interactive Review

The Agency will continue to incorporate an interactive review process to provide for, and encourage, informal communication between FDA and applicants to facilitate timely completion of the review process based on accurate and complete information. Interactive review entails responsibilities for both FDA and applicants. As described in the 2014 guidance document, “Types of Communication During the Review of Medical Devices Submissions,” both FDA and industry believe that an interactive review process for premarket medical device submissions should help facilitate timely completion of the review based on accurate and complete information. Interactive review is intended to facilitate the efficient and timely review and evaluation by FDA of premarket submissions and is expected to support reductions in total time to decision. The interactive re-

view process contemplates increased informal interaction between FDA and applicants, including the exchange of scientific and regulatory information.

B. Deficiency Letters

By January 1, 2023, the Agency will update the 2017 guidance “Developing and Responding to Deficiencies in Accordance with the Least Burdensome Provisions; Guidance for Industry and FDA Staff” to clarify what constitutes a statement of the basis for the deficiency and continue alignment with the following:

Deficiency letters should include a statement of the basis for the deficiencies (e.g., a specific reference to applicable section of a rule, final guidance, recognized standard unless the entire or most of document is applicable). In the instance when the deficiency cannot be traced in the manner above and relates to a scientific or regulatory issue pertinent to the determination, FDA will cite the specific scientific issue and the information to support its position.

Deficiency letters will undergo supervisory review prior to issuance to ensure the deficiencies cited are relevant to a marketing authorization decision (e.g., 510(k) clearance, PMA approval, and de novo classification).

FDA will train staff and managers on the updated guidance and work to make improvements (including incorporating best practices), as appropriate, to address findings from audits and consistent with the guidance.

FDA will provide a statement of the basis for the deficiency, consistent with the updated guidance, in deficiency letters as follows: 75% of deficiencies in FY 2023, 80% of deficiencies in FY 2024, 85% of deficiencies in FY 2025, 90% of deficiencies in FY 2026, and 95% of deficiencies in FY 2027 for Original PMA, Panel-Track Supplement, 510(k) and De Novo request submissions. Performance will be determined by means of annual audit conducted by QMOE. Sampling procedures will incorporate ISO 2859-1:1999 (“Sampling Procedures for inspection by attributes—Part 1: Sampling schemes indexed by acceptance quality limit (AQL) for lot-by-lot inspection”). FDA will review each fiscal year’s audit results with industry no later than the first quarterly meeting of the following fiscal year.

C. Enhanced Use of Consensus Standards

The voluntary Accreditation Scheme for Conformity Assessment (ASCA) Pilot is intended to enhance product reviewers’ and device manufacturers’ confidence in medical device testing when manufacturers rely on testing completed by ASCA-accredited testing laboratories. This should generally decrease the need for the FDA to request additional information regarding testing methodologies when a premarket submission includes ASCA testing. ASCA also incorporates existing international conformity assessment standards and practices where practical.

FDA will use lessons learned from implementation of the ASCA Pilot Program during MDUFA IV to transition from a pilot to a sustainable and expanded program. Specifically, the Agency will:

1. By the end of FY 2023, FDA will complete the pilot. In Q2 of FY 2024, FDA will provide a report on the performance of the ASCA Pilot Program (to replace the report specified in the MDUFA IV Commitment Letter, Commitment IV.D.8.a). In the report, FDA will provide at least the following information:

- a. Adequacy of the standards selected to support confidence by FDA and industry in the methods used and results reported by ASCA-accredited testing laboratories;

- b. Testing laboratory participation in the training and ASCA program, and areas where any nonconformities were observed;

c. Number of submissions containing the ASCA Summary Report;

d. Summary Report acceptance rate by FDA reviewers; and

e. Summary of commonly cited deficiencies regarding the Summary Report.

2. FDA will train staff and supervisors so that specific deficiencies are relevant to the requirements of the Summary Report.

3. FDA will continue to provide adequate training to testing laboratories and reviewers to accurately execute the ASCA process.

4. FDA will report annually on the progress of the ASCA program.

5. FDA will work with stakeholders for further input on programmatic improvements and/or consideration for expansion.

D. Third Party Review

The Agency will continue to support the Third Party Review program, with the objective of eliminating routine re-review by FDA of Third Party reviews through continuation of the following activities:

1. Provide training for Third Parties seeking accreditation by FDA. This training shall include the opportunity for Third Parties to have access to redacted review memos and other information as appropriate.

2. When FDA's expectations for a particular device type change, FDA will maintain a process to convey this information to the Third Parties and to industry.

3. Audit and provide tailored re-training to accredited Third Parties based on the results of audits.

4. Publish performance of individual accredited Third Parties with at least five completed submissions on FDA's website (e.g., rate of NSE, average number of holds, average time to SE).

FDA will consider the factors described in the guidance, "510(k) Third Party Review Program," in determining device type eligibility for the Third Party Review program. Consistent with that guidance, some device types that rely on clinical data to demonstrate substantial equivalence may be eligible for Third Party Review.

E. Patient Science and Engagement

The Agency will take the following actions to continue engaging patients and incorporating their perspectives in the regulatory process. Where appropriate, the Agency will leverage collaborations and partnerships with patients, healthcare providers, industry, and others, as well as collaborations across FDA Centers, to advance these actions.

1. Expand clinical, statistical, and other scientific expertise and staff capacity to respond to submissions containing applicant-proposed use of voluntary patient preference information (PPI), voluntary patient reported outcomes (PROs), and/or patient generated health data (PGHD). These staff will provide submission review and early consultation/advice to industry during study planning.

2. Issue a draft guidance providing best practices on incorporating into premarket studies clinical outcome assessments including their use as primary or co-primary endpoints. A clinical outcome assessment (COA) describes or reflects how a person feels, functions, or survives and can be reported by a health care provider or a non-clinical observer (such as a parent), through performance of an activity or task, or by the patient.

3. Support the use of innovative technologies to capture patient input and reduce patient burden to inform clinical study design and conduct, with a goal of reducing barriers to patient participation and facilitating recruitment and retention.

4. By the end of FY 2024, hold a public meeting to explore ways to use patient-gen-

erated health data to help advance remote clinical trial data collection and support clinical outcome assessments.

5. FDA will undertake the following activities to improve the regulatory predictability and impact of patient science:

a. Develop case examples of modified or adapted PRO instruments to make efficient use of existing validated PRO instruments which may be improved or adapted to other subpopulations or other regulatory uses in a more streamlined and expeditious manner than creating novel PROs.

b. Strengthen efforts to expand staff understanding of Patient Science and Engagement (PSE) topics, and consistent evaluation in submissions through training curriculum and internal infrastructure to improve consistency (e.g., Focal Point Program).

c. Update FDA's existing guidance, "Patient Preference Information—Voluntary Submission, Review in Premarket Approval Applications, Humanitarian Device Exemption Applications, and De Novo Requests, and Inclusion in Decision Summaries and Device Labeling," with pragmatic insights and to address common questions for those interested in the voluntary use of PPI in regulatory submissions.

d. Explore opportunities to improve patient science tools for medical devices and advance health equity through targeted incorporation of diverse patient perspectives and integration of data from diverse patients.

e. Identify high impact opportunities to incorporate patient perspectives.

6. Facilitate industry efforts to collaborate with patients in key areas by generating patient-friendly educational modules on device trials, real-world data, device development tools, and regulatory frameworks. FDA will also make these educational modules publicly available, as appropriate.

7. The existing dispute resolution process should be used in the event of disagreement between the applicant and the Agency on the need for PPI, PRO and/or other tools to capture PGHD.

F. Real World Evidence (RWE)

The Agency will use user fee revenue for the continued development of Real-World Data (RWD) and RWE methods and policies to advance regulatory acceptance for premarket submissions, including expanded indications for use and new clearance/approval of new devices, and clarify related reporting requirements.

1. FDA will update the 2017 guidance document *Use of Real-World Evidence to Support Regulatory Decision-Making for Medical Devices* to provide more clarity on:

a. Least burdensome general expectations on what is needed to demonstrate the "Fit-for-Purpose of RWD" for premarket regulatory purposes, including expanded indications for use and new clearance/approval of new devices;

b. More information, including generalized examples, on previously used and accepted methodologies; and

c. Best practices for RWE review.

2. FDA will continue to advance CDRH's RWD/RWE Training program for FDA review teams including the medical review staff. Topics will include best practices for RWE review and when to engage with CDRH RWE subject matter experts.

3. FDA will provide transparent program development updates and financial accounting of User Fee revenue specifically intended for the activities in this section.

a. FDA will update stakeholders on the RWE program activities at two or more open public meetings during the course of MDUFA V.

b. FDA hiring of internal experts to support the review of RWD/RWE-related submissions will be tracked.

c. In any portion of the user fee funding is distributed to the National Evaluation System for health Technology (NEST), the funding should be used to transparently:

i. Support the development of RWD resources to facilitate appropriate access for research studies;

ii. Convene experts to develop best practices and, advance innovative methodology approaches with respect to RWE development and analysis;

iii. Include, on the organization's governing board, no fewer than 4 representatives of the trade associations that participated in the MDUFA V negotiations (AdvaMed, MDMA, MITA, and ACLA), with each association appointing an individual to serve. Industry representation on the governing board, if applicable, will make up at least 25% of the governing board membership at all times, and shall be selected by the industry associations. The representative from each trade association may be part of the staff of the association or appointed from a member company. If any of the trade associations elects not to participate on the governing board or for any additional seats allocated to industry, the participating trade associations will determine how to fill any vacant industry positions.

d. By the end of FY 2023, FDA will publish a document requesting public comment on how FDA should use any portion of the user fee funding that may be distributed to any external organization(s) other than NEST to support premarket RWE.

e. If any portion of the user fee funding is distributed to an external organization(s) other than NEST, the funding will be accounted for in FDA's quarterly MDUFA report.

G. Digital Health

The Agency will continue to build its digital health expertise and continue working to streamline and align FDA review processes with software lifecycles for digital health products. Specifically, the Agency will:

1. Continue to develop software and digital health technical expertise to provide assistance for premarket submissions that include software, interoperable devices, or otherwise incorporate digital health technologies, such as artificial intelligence or machine learning (AI/ML), Virtual, Mixed, and Augmented Reality (VR/MR/AR) and wearables.

2. Strengthen efforts to expand staff understanding of digital health topics and enhance consistent evaluation in submissions through training and internal infrastructure (e.g., Focal Point Program).

3. Continue to participate in international harmonization efforts related to digital health, including work on developing software and other digital health convergence efforts.

4. Finalize the draft guidance, "Content of Premarket Submissions for Device Software Functions," by 18 months from close of the comment period.

5. Publish draft guidance describing a process to evaluate a predetermined change control plan for digital health devices.

6. Engage with stakeholders, including patients, users, and industry, through roundtables, informal meetings, and teleconferences to explore regulatory approaches to digital health technologies.

H. Guidance Document Development

FDA will apply user fee revenues to ensure timely completion of Draft Guidance documents. The Agency will strive to finalize, withdraw, reopen the comment period, or issue a new draft guidance for 80% of draft guidance documents within 3 years of the close of the comment periods as resources permit. The Agency will strive to finalize,

withdraw, reopen the comment period, or issue a new draft guidance for 100% of draft guidance documents within 5 years of the close of the comment periods as resources permit. The Agency will continue to develop guidance documents and improve the development process as resources permit, but not to the detriment of meeting quantitative review timelines and statutory obligations.

I. International Harmonization

FDA is committed to improving the efficiency of the global regulatory systems for medical devices through international harmonization and convergence of regulatory requirements. The Agency will take the following actions to advance such international harmonization. Specifically, the Agency will:

1. Expand engagement in international harmonization and convergence efforts through participation with international regulators and other key stakeholders in forums, working groups, projects, and committees to promote alignment with international best practices and internationally developed policies, including exploring the development of harmonized premarket review processes.

2. Further support regulatory convergence by creating a mechanism for FDA to work with regulatory partners with whom we have appropriate confidentiality commitments to inform and align international regulatory strategy. This may include, for example, sharing of scientific, clinical, or other technical information, or policies and practices, as needed and consistent with applicable disclosure law and policy.

3. Commencing in FY 2023, assess the extent of CDRH implementation of International Medical Device Regulators Forum (IMDRF) technical documents and make this information publicly available to enhance clarity and transparency.

4. Support the creation of a forum to engage with relevant stakeholders, including industry representatives and other regulators, to identify opportunities for regulators to leverage one another's approach to decision making.

5. Participate in outreach activities to other regulatory authorities that encourage harmonization and may also encourage such authorities to rely in whole or in part on FDA marketing authorizations.

6. By the end of FY 2023, issue for public comment a draft strategic plan with additional details and timelines associated with achieving the international harmonization objectives described above.

7. Commencing with FY 2024, publish an annual assessment of the international harmonization activities described the strategic plan above, including the progress assessment described in subparagraph 3 above.

J. Total Product Life Cycle (TPLC) Advisory Program

FDA will establish a pilot of the Total Product Life Cycle (TPLC) Advisory Program (TAP Pilot) during the course of MDUFA V.

1. Vision: The long-term vision for a successful TPLC Advisory Program (TAP) is to help spur more rapid development as well as more rapid and widespread patient access to safe, effective, high-quality medical devices of public health importance. A mature TAP will also help ensure the sustained success of the Breakthrough devices program.

2. TAP Pilot Objective: The TAP Pilot is intended to demonstrate the feasibility and benefits of process improvements to FDA's early interactions with participants and FDA's facilitation of interactions between participants and stakeholders that support the vision for TAP. Through the TAP Pilot, the FDA will provide the following types of

strategic engagement for innovative devices of public health importance:

Improving participants' experiences with FDA by providing for more timely premarket interactions;

Enhancing the experience of all participants throughout the device development and review process, including FDA staff;

Facilitating improved strategic decision-making during product development, including earlier identification, assessment, and mitigation of product development risk;

Facilitating regular, solutions-focused engagement between FDA review teams, participants, and other stakeholders such as patients, providers, and payers, beginning early in device development; and

Collaborating to better align expectations regarding evidence generation, improve submission quality, and improve the efficiency of the premarket review process

3. Goals: To achieve the above TAP Pilot objective, FDA will:

- a. Begin and support a TAP Pilot, scoped to include the following:

- In FY 2023, enroll up to 15 products in a "soft launch" in one Office of Health Technology (OHT); selection of the OHT will include consideration of the OHT's historical number of granted Breakthrough designations, workload, and available staffing and expertise;

- In FY 2024, continue to support products enrolled in the previous fiscal year and expand to enroll up to 45 additional products in at least two OHTs (i.e., up to 60 total products enrolled through FY 2024);

- In FY 2025, continue to support products enrolled in previous fiscal years and expand to enroll up to 65 additional products in at least four OHTs (i.e., up to 125 total products enrolled through FY 2025); and

- In FY 2026–FY 2027, continue to support products enrolled in previous fiscal years and expand to enroll up to 100 additional products each fiscal year within existing OHTs or expand to additional OHTs, depending on lessons learned from FY 2023–FY 2025 experience (i.e., up to 225 total products enrolled through FY 2026 and up to 325 total products enrolled through FY 2027).

- For FY 2024–FY 2027, in addition to the considerations above, selection of the OHTs will include consideration of experience from prior years and input from industry and other stakeholders.

- b. Beginning in FY 2024, implement and track the following quantitative performance metrics:

FDA will engage in a teleconference with the participant on requested topic(s) pertaining to the TAP device within 14 days of the request for 90% of requests for interaction.

FDA will provide written feedback on requested biocompatibility and sterility topics(s) pertaining to the TAP device within 21 days of the request for 90% of such requests for written feedback.

FDA will provide written feedback on requested topic(s) pertaining to the TAP device other than biocompatibility and sterility within 40 days of the request for 90% of requests for written feedback.

- c. Regularly review TAP pilot progress with industry, share feedback, and assess the impact of the TAP Pilot and opportunities for improvement.

- d. Publish an assessment of the TAP Pilot on the FDA web site no later than January 30, 2026.

For purposes of the annual performance report and corrective action report, the goals of the TAP pilot are set forth in Section V.J.3 above.

4. Enrollment. FDA intends to enroll participants in the pilot using the following criteria:

- a. Participation in the pilot will be voluntary.

- b. For FY 2023–FY 2025, products will be those with a granted Breakthrough designation. For FY 2026–FY 2027, products will be those with a granted Breakthrough designation or request for inclusion in the Safer Technologies Program (STeP).

- c. Participants have not submitted a Pre-Submission about the product after granted Breakthrough designation or request for inclusion in STeP.

- d. Products will be early in their product development process (e.g., have not yet initiated a pivotal study) at time of pilot enrollment.

- e. Each participant will have a maximum of one product enrolled in the pilot per fiscal year.

- f. Participants will be enrolled on first-come, first-served basis.

FDA will inform potential participants of the TAP Pilot as part of the Breakthrough designation process or request for inclusion in STeP process.

If spaces remain available in a participating OHT or if resources permit, FDA may consider enrolling devices from additional OHT(s).

5. TAP Pilot Assessment. For informational purposes, FDA will conduct an assessment of the TAP Pilot using an independent third party (or parties) to assess the TAP pilot. This assessment will include a participant survey and quantitative and qualitative success metrics, starting in FY 2024, that include but are not limited to:

- a. The extent to which FDA is successful at meeting the quantitative goals described in V.J.3.b. above.

- b. Participant satisfaction with the timeliness, frequency, quality, and efficiency of interactions with and written feedback from FDA.

- c. Participant satisfaction with the timeliness, frequency, quality, and efficiency of voluntary interactions with non-FDA stakeholders facilitated by FDA (if utilized).

- d. An overall assessment of the outcomes of the Pilot and opportunities for improvement.

6. Other Measures. For informational purposes, FDA will begin to track other measures of program success, which will include:

Time from granting of Breakthrough designation or request for inclusion in the Safer Technologies Program (STeP) to receipt of marketing submission;

Time from receipt of marketing submission to marketing authorization; and

Requests for additional information during submission review.

VI. INDEPENDENT ASSESSMENTS

A. Independent Assessment of MDUFA Workforce Metrics

FDA will retain a qualified, independent contractor with expertise in assessing public sector workforce data analysis and reporting to conduct an assessment of current methodologies and data/metrics available to represent the MDUFA workforce. This will include assessment of positions (filled/vacant) and MDUFA process FTEs, including the subset funded by user fees, for each applicable FDA Center and Office.

The report will include the contractor's findings from the assessment and recommendations for improved methodologies to represent MDUFA FTE resources, including the subset funded by user fees. The assessment will be published on FDA's website by March 31, 2025.

B. Independent Assessment of Review Process Management

FDA and the industry will participate in a targeted assessment of the process for the review of device applications. The assessment

will include consultation with both FDA and industry at the start of the assessment and prior to issuance of the final report. The assessment shall be conducted under contract to FDA by a private, independent consulting firm capable of performing the technical analysis, management assessment, and program evaluation tasks required to address the assessment scope described below within the budget provided under this user fee agreement.

The contractor will:

1. Evaluate FDA's premarket review program to identify efficiencies that were realized as a result of the process improvements and investments under MDUFA IV and V;
2. Assess the alignment of resource needs with the training and expertise of hires;
3. Identify and share best practices across OHTs in OPEQ;
4. Assess the effectiveness of program areas targeted for improvement under this agreement, including the following:
 - a. Implementation and impact of changes to the guidance "Developing and Responding to the Deficiencies in Accordance with the Least Burdensome Provisions,"
 - b. Implementation and impact of changes to the guidance "Requests for Feedback and Meetings for Medical Device Submissions: The Q-Submission Program,"
 - c. Third Party Review program (continued reduction of routine re-review by FDA of Third Party reviews),
 - d. Digital Health program,
 - e. Patient Science and Engagement program,
 - f. Real World Evidence program, and
 - g. International Harmonization.
5. Assess other key areas identified by FDA and industry as resources permit.

FDA will award the contract no later than March 31, 2025. However, the contractor would not begin the audit of Pre-Submissions before October 1, 2025. The contractor will publish comprehensive findings and recommendations within 1 year, after reviews with FDA and industry and opportunities to provide feedback for the contractor's consideration prior to finalizing the final report. For all recommendations the contractor will provide an estimate of additional resources needed or efficiencies gained, as applicable.

FDA will incorporate findings and recommendations, as appropriate, into its management of the process for the review of device applications. FDA will analyze the recommendations for improvement opportunities identified in the assessment and, as appropriate, develop and implement a corrective action plan, and assure its effectiveness.

VII. PERFORMANCE REPORTS

The Agency will report its progress toward meeting the goals described in this letter, as follows. If, throughout the course of MDUFA V, the Agency and Industry agree that a different format or different metrics would be more useful, the reporting will be modified accordingly as per the agreement of both FDA and Industry.

1. Quarterly reporting at the CDRH OHT level/CBER Center level (in recognition of the significantly smaller number of submissions reviewed at CBER):

1.1. For 510(k) submissions that do not go through a Third Party, reporting will include:

- i. Average and quintiles of the number of calendar days to Substantive Interaction
- ii. Average, and quintiles of the number of FDA Days, Industry Days, and Total Days to a MDUFA decision
- iii. Average number of review cycles
- iv. Rate of submissions not accepted for review

1.2. For PMA submissions, reporting will include:

i. Average and quintiles of the number of calendar days to Substantive Interaction for Original PMA, Panel-Track PMA Supplement, and Premarket Report Submissions

ii. Average and quintiles of the of FDA Days, Industry Days, and Total Days to a MDUFA decision

iii. Rate of applications not accepted for filing review, and rate of applications not filed

1.3. For De Novo requests, reporting will include:

i. Average, and quintiles of the number of FDA Days, Industry Days, and Total Days to a MDUFA decision

ii. Average number of review cycles

iii. Rate of submissions not accepted for review

1.4. For Pre-Submissions, reporting will include:

i. Number of Pre-Submissions in the MDUFA cohort

ii. Rate of submissions not accepted for review

iii. Average and quintiles of the number of calendar days from submission to written feedback

iv. Number of Pre-Submissions that require a meeting

v. Percent of submissions with meetings for which industry provided minutes within 15 days

1.5. For IDE applications, reporting will include:

i. Number of original IDEs received

ii. Average number of amendments prior to approval or conditional approval of the IDE

1.6. In FY 2023, for marketing submissions for In Vitro Diagnostics, FDA will report on the status of submissions received in FY 2020–2021 that remain under review as a result of being paused while the Agency focused on COVID–19-related submissions.

2. CDRH will report quarterly, and CBER will report annually, the following data at the Center level:

2.1. Rate of NSE decisions for 510(k) submissions

2.2. Rate of withdrawals for 510(k), De Novo, and PMA submissions

2.3. Rate of Not Approvable decisions for PMA submissions

2.4. Rate of Denial decisions for De Novo requests

2.5. Key product areas or other issues that FDA identifies as noteworthy because of a potential effect on performance, including significant rates of Additional Information requests

2.6. Specific topic or product area as it relates to performance goals, agreed upon at the previous meeting

2.7. Number of submissions that missed the goals and the total number of elapsed calendar days broken down into FDA days and industry days

2.8. Newly released draft and final guidance documents, and status of other priority guidance documents

2.9. Agency level summary of fee collections

2.10. Independent assessment implementation plan status

2.11. Results of independent assessment and subsequent periodic audits and progress toward implementation of the recommendations and any corrective action

2.12. Number of fee waivers or reductions granted by type of submission

3. The Agency will report quarterly the following data for the MDUFA program:

3.1. Progress towards meeting annual hiring goals

3.2. Per Section V.F.3.e, if any portion of the user fee funding intended for real world evidence activities is distributed to an external organization(s) other than NEST, information regarding use of the user fee funding

4. In addition, the Agency will provide the following information on an annual basis:

4.1. Review time devoted to direct review of applications

4.2. The number of Premarket Report Submissions received

4.3. Summary information on training courses available to CDRH and CBER employees, including new reviewers, regarding device review and the percentage of applicable staff that have successfully completed each such course. CDRH will provide information concerning any revisions to the new reviewer training program curriculum.

4.4. Performance on the shared outcome goal for average Total Time to Decision

4.5. For 510(k) submissions, reporting will include:

i. Number of submissions reviewed by a Third Party

ii. Number of Special Submissions

iii. Number of Traditional Submissions

iv. Average and number of days to Accept/Refuse to Accept

v. Number of Abbreviated Submissions

4.6. For 510(k) submissions that go through a Third Party, reporting will include:

i. Time from FDA receipt of Third Party report to FDA decision at the 90% percentile

ii. Rate of NSE

iii. Average number of holds

iv. Average time to SE

4.7. For PMA submissions, reporting will include the number of the following types of PMA submissions received:

i. Original PMAs

ii. Priority PMAs

iii. Premarket Reports

iv. Panel-Track PMA Supplement

v. PMA Modules

vi. 180-Day PMA Supplements

vii. Real-Time PMA Supplements

viii. Number of submissions FDA classifies as unsolicited major, solicited major, and minor amendments

4.8. For De Novo requests, reporting will include:

i. Number of submissions received

ii. Average and number of days to Accept/Refuse to Accept

4.9. For CLIA waiver applications, reporting will include:

i. Number of CLIA waiver applications received

ii. Average and quintiles of the number of calendar days to Substantive Interaction

iii. Average and quintiles of the number of FDA Days, Industry Days, and Total Days to a MDUFA decision and a discussion of any trends in the data

4.10. Report on the ASCA program

4.11. Data regarding the reviewer to manager ratio

4.12. Report on QMOE program

4.13. Summary of QMOE audits, including annual audit of Deficiency Letters under Section V.B above

4.14. Summary of primary cost drivers that contribute to change in personnel compensation and benefits costs (e.g., cost of living adjustments and increases in agency benefits contributions, if applicable)

4.15. The return on investment, which may include process improvements, improved performance, and other enhancements, under MDUFA V.

FDA will report annual and quarterly data on performance within goals for 510(k), De Novo, and PMA MDUFA decisions for devices identified as LDTs by the submitter compared to all non-LDT IVD devices. The following elements will be reported:

Number and percentage of LDT 510(k)s and non-LDT IVD 510(k)s completed within 90 FDA days

Number and percentage of LDT De Novo requests and non-LDT IVD De Novo requests completed within 150 FDA days

Number and percentage of LDT PMAs and non-LDT IVD PMAs completed within 180 FDA days

To the extent that laboratories make submissions regarding LDTs that are covered by the MDUFA V agreement, FDA will treat such LDT submissions no less favorably than other submissions to which MDUFA V performance goals apply.

VIII. DEFINITIONS AND EXPLANATIONS OF TERMS

A. Applicant

Applicant means a person who makes any of the following submissions to FDA:

- an application for premarket approval under section 515 of the Federal Food, Drug, and Cosmetic Act (FD&C Act);

- a premarket notification under section 510(k) of the FD&C Act;

- an application for investigational device exemption under section 520(g) of the FD&C Act;

- a Pre-Submission;

- a De Novo classification request (De Novo request) under section 513(f)(2) of the FD&C Act;

- a CLIA Waiver by application.

B. eSTAR (electronic Submission Template And Resource)

An electronic submission template built within a structured dynamic PDF that guides a user through construction of an eSubmission. eSTAR is the only type of electronic submission template that is currently available to facilitate the preparation of 510(k) submissions as eSubmissions. For simplicity, the electronic submission created with this electronic submission template is often referred to as an eSTAR.

C. FDA Days

FDA Days are those calendar days when a submission is considered to be under review at the Agency for submissions that have been accepted (510(k) or De Novo request), filed (PMA) or submitted (CLIA Waiver by application). FDA Days begin on the date of receipt of the submission or of the amendment to the submission that enables the submission to be accepted (510(k) or De Novo request) or filed (PMA).

D. MDUFA Decisions

Original PMAs, Product Development Protocols, Panel-Track Supplements, and Premarket Report Applications: Decisions are approval, approvable, approvable pending GMP inspection, not approvable, withdrawal, and denial.

180-Day PMA Supplements: Decisions for 180-Day PMA Supplements are approval, approvable, and not approvable.

Real-Time PMA Supplements: Decisions for Real-Time PMA supplements are approval, approvable, and not approvable.

510(k)s: Decisions for 510(k)s are substantially equivalent (SE) or not substantially equivalent (NSE).

De Novo Requests: Decisions for De Novo requests are grant, withdrawal, and decline.

CLIA Waiver by Application Submissions: Decisions for CLIA Waiver by Application Submissions are approval, withdrawal, and denial.

Submissions placed on Application Integrity Hold will be removed from the MDUFA cohort.

E. Pre-Submission

A Pre-Submission includes a formal written request from an applicant for feedback from FDA that is provided in the form of a formal written response or, if the manufacturer chooses, formal written feedback followed by a meeting or teleconference in which any additional feedback or clarifications are documented in meeting minutes.

A Pre-Submission provides the opportunity for an applicant to obtain FDA feedback

prior to intended submission of an investigational device exemption or marketing application. The request must include specific questions regarding review issues relevant to a planned investigational device exemption (IDE), CLIA Waiver by Application, Accessory Classification Request, or marketing application (e.g., questions regarding pre-clinical testing protocols or data requirements; design and performance of clinical studies and acceptance criteria). A Pre-Submission is appropriate when FDA's feedback on specific questions is necessary to guide product development and/or submission preparation.

The following forms of FDA feedback to applicants are not considered Pre-Submissions.

Interactions requested by either the applicant or FDA during the review of a marketing application (i.e., following submission of a marketing application, but prior to reaching an FDA Decision).

TPLC Advisory Program Pilot interactions.

General information requests initiated through the Division of Industry and Consumer Assistance (DICE).

General questions regarding FDA policy or procedures.

Meetings or teleconferences that are intended to be informational only, including, but not limited to, those intended to educate the review team on new device(s) with significant differences in technology from currently available devices, or to update FDA about ongoing or future product development, without a request for FDA feedback on specific questions related to a planned submission.

Requests for clarification on technical guidance documents, especially where contact is recommended by FDA in the guidance document. However, the following requests will generally need to be submitted as a Pre-Submission in order to ensure appropriate input from multiple reviewers and management: recommendations for device types not specifically addressed in the guidance document; recommendations for nonclinical or clinical studies not addressed in the guidance document; requests regarding use of alternative means to address recommendations specified in a guidance document.

Phone calls or email messages to reviewers that can be readily answered based on a reviewer's experience and knowledge and do not require the involvement of a broader number of FDA staff beyond the routine involvement of the reviewer's supervisor and more experienced mentors.

F. Substantive Interaction

Substantive Interaction is an email, letter, teleconference, video conference, or other form of communication such as a request for Additional Information or Major Deficiency letters by FDA notifying the applicant of substantive deficiencies identified in initial submission review, or a communication stating that FDA has not identified any deficiencies in the initial submission review and any further minor deficiencies will be communicated through interactive review. An approval or clearance letter issued prior to the Substantive Interaction goal date will qualify as a Substantive Interaction.

If substantive issues warranting issuance of an Additional Information or Major Deficiency letter are not identified, interactive review should be used to resolve any minor issues and facilitate an FDA decision. In addition, interactive review will be used, where, in FDA's estimation, it leads to a more efficient review process during the initial review cycle (i.e., prior to a Substantive Interaction) to resolve minor issues such as revisions to administrative items (e.g., 510(k)

Summary/Statement, Indications for Use statement, environmental impact assessment, financial disclosure statements); a more detailed device description; omitted engineering drawings; revisions to labeling; or clarification regarding nonclinical or clinical study methods or data.

Minor issues may still be included in an Additional Information or Major Deficiency letter where related to the resolution of the substantive issues (e.g., modification of the proposed Indications for Use may lead to revisions in labeling and administrative items), or if they were still unresolved following interactive review attempts. Both interactive review and Substantive Interactions will occur on the review clock except upon the issuance of an Additional Information or Major Deficiency Letter which stops the review clock.

G. Total Time to Decision

Total Time to Decision is the number of calendar days from the date of receipt of an accepted (with respect to 510(k)s) or filed (with respect to Original PMAs and Panel Track Supplements) submission to a MDUFA decision.

For the purpose of calculating and reporting on 510(k) shared outcome Total Time to Decision goals in section II, the average Total Time to Decision for 510(k) submissions is calculated as the average of Total Times to Decision for 510(k) submissions within a 99% closed cohort, with the following provisions:

FY 2023, the cohort excludes submissions with any one hold greater than 180 days and excluding the highest 5% of Total Time to Decision on the remaining cohort.

FY 2024–2027, the cohort excludes the highest 2% and lowest 2% of values and includes all 510(k)s with a MDUFA decision.

In the number of submissions in any MDUFA V receipt cohort exceeds the number of submissions in the FY 2021 or FY 2022 receipt cohort (whichever is higher) by 5% or more, a 1% increase in the trim will be applied to the highest values.

A cohort for a FY is closed when 99% of the MDUFA cohort has reached a MDUFA decision. For the purpose of determining whether improved performance and fee revenue adjustments in Section III are applicable, the 510(k) Shared Outcome Total Time to Decision goal is calculated in the same manner except that the calculation is conducted based on data available as of 18 months following the close of the fiscal year to which the goal applies, and the cohort does not need to be 99% closed. See Section III.

For the purpose of calculating and reporting on PMA shared outcome Total Time to Decision goals in Section II, the average Total Time to Decision for PMAs is calculated as the three-year rolling average of the annual Total Times to Decision for Original PMAs and Panel Track supplements (for example, for FY 2024, the average PMA Total Time to Decision would be the average of FY 2022 through FY 2024) within a closed cohort, excluding the highest 5% and the lowest 5% of values. A cohort for a FY is closed when 95% of the MDUFA V cohort has reached a MDUFA decision. For the purpose of determining whether increased performance and fee revenue adjustments in Section III are applicable, the PMA shared outcome Total Time to Decision goal is calculated in the same manner except that the calculation is conducted based on data available as of 18 months following the close of the fiscal year to which the goal applies and the cohort does not need to be 95% closed.

H. Application Types

Original PMA means an application for an approval of a device submitted under section 515(c) of the FD&C Act. It does not include a

supplement to such an application after it has been approved or a Premarket Report.

Premarket Report means a report submitted under section 515(c)(2) of the FD&C Act seeking premarket approval for a class III reprocessed single use device.

Panel-Track Supplement means a supplement to an approved Original PMA or Premarket Report that requests a significant change in design or performance of the device, or a new indication for use of the device, and for which substantial clinical data are necessary to provide a reasonable assurance of safety and effectiveness.

180-Day PMA Supplement means a supplement to an approved Original PMA or Premarket Report that is not a panel-track supplement and requests a significant change in components, materials, design, specification, software, color additives, or labeling.

Real-Time PMA Supplement means a supplement to an approved Original PMA or Premarket Report that requests a minor change to the device, such as a minor change to the design of the device, software, sterilization, or labeling, and for which the applicant has requested and the agency has granted a meeting or similar forum to jointly review and determine the status of the supplement.

De Novo Classification Request (De Novo Request) means a request made under section 513(f)(2) of the FD&C Act with respect to the classification of a device.

Premarket Notification (510(k)) Submission means a report submitted under section 510(k) of the FD&C Act.

I. BLA-related Definitions

Review and act on—the issuance of a complete action letter after the complete review of a filed complete application. The action letter, if it is not an approval, will set forth in detail the specific deficiencies and, where appropriate, the actions necessary to place the application in condition for approval.

Class 1 resubmitted applications applications resubmitted after a complete response letter that includes the following items only (or combinations of these items):

- (a) Final printed labeling
- (b) Draft labeling
- (c) Safety updates submitted in the same format, including tabulations, as the original safety submission with new data and changes highlighted (except when large amounts of new information including important new adverse experiences not previously reported with the product are presented in the resubmission)
- (d) Stability updates to support provisional or final dating periods
- (e) Commitments to perform Phase 4 studies, including proposals for such studies
- (f) Assay validation data
- (g) Final release testing on the last 1–2 lots used to support approval
- (h) A minor reanalysis of data previously submitted to the application (determined by the Agency as fitting the Class 1 category)
- (i) Other minor clarifying information (determined by the Agency as fitting the Class 1 category)
- (j) Other specific items may be added later as the Agency gains experience with the scheme and will be communicated via guidance documents to industry

Class 2 resubmitted applications resubmissions that include any other items, including any item that would require presentation to an advisory committee.

GDUFA REAUTHORIZATION PERFORMANCE GOALS AND PROGRAM ENHANCEMENTS FISCAL YEARS 2023–2027

I. Submission Assessment Performance Goals

- A. Original ANDAs and Amendments
- B. PASs and PAS Amendments

C. Unsolicited Amendments and PAS Amendments

D. DMFs

E. Controlled Correspondence

II. Original ANDA Assessment Program Enhancements

A. ANDA Receipt

B. ANDA Assessment Transparency and Communications Enhancements

C. Assessment Classification Changes During the Assessment Cycle

D. ANDA Approval and Tentative Approval

E. Dispute Resolution

F. Pre-Submission Facility Correspondence

G. Other ANDA Assessment Program Aspirations

III. Pre-ANDA Program

A. Goal of Pre-ANDA Program

B. Suitability Petitions

C. Product-Specific Guidance

D. Product Development Meetings

E. Pre-Submission Meetings

IV. ANDA ASSESSMENT MEETING PROGRAM

A. Goal of the ANDA Assessment Meeting Program

B. Mid-Cycle Review Meetings and Enhanced Mid-Cycle Review Meetings

C. Post-CRL Scientific Meeting

V. Additional Program Enhancements and Aspirations

A. Inactive Ingredient Database Enhancement

B. Regulatory Science Enhancements

GDUFA REAUTHORIZATION PERFORMANCE GOALS AND PROGRAM ENHANCEMENTS FISCAL YEARS 2023–2027

This document contains the performance goals and program enhancements for the Generic Drug User Fee Amendments (GDUFA) reauthorization for fiscal years (FYs) 2023–2027, known as GDUFA III. It is commonly referred to as the “Goals Letter” or “Commitment Letter.” The Goals Letter represents the product of the Food and Drug Administration’s (FDA or the Agency) discussions with the regulated industry and public stakeholders, as mandated by Congress. The performance goals and program enhance-

ments specified in this letter apply to aspects of the generic drug assessment program and build on the GDUFA program established and enhanced through previous authorizations. New enhancements to the program are designed to maximize the efficiency and utility of each assessment cycle, with the intent to reduce the number of assessment cycles for abbreviated new drug applications (ANDAs) and facilitate timely access to quality, affordable, safe and effective generic medicines. Certain new enhancements are specifically designed to foster the development, assessment, and approval of Complex Generic Products. FDA is committed to meeting the performance goals specified in this letter and to continuous improvement of the Agency’s performance.

GDUFA REAUTHORIZATION PERFORMANCE GOALS AND PROCEDURES FISCAL YEARS 2023–2027

The performance goals and procedures of FDA, as agreed to under the third authorization of the generic drug user fee program, are summarized below.

Unless otherwise stated, goals apply to cohorts of each fiscal year. For the purposes of calculating all time periods in this Commitment Letter, FDA will calculate the goal date from the day after a submission, to be consistent with FDA’s other user fee programs.

I. SUBMISSION ASSESSMENT PERFORMANCE GOALS

A. Original ANDAs and Amendments

1. Assess and act on 90 percent of standard original ANDAs within 10 months of the date of ANDA submission, subject to any adjustments to the goal dates described in section I(A)(3).

2. Assess and act on 90 percent of priority original ANDAs within the applicable assessment goal, subject to any adjustments to the goal dates described in section I(A)(3).

a. Assess and act on priority original ANDAs within 8 months of the date of ANDA submission if the applicant submits a Pre-Submission Facility Correspondence (PFC) not later than 60 days prior to the date of ANDA submission, and the PFC is found to be complete and accurate, subject to the limitations set forth in section I(A)(2)(b).

b. Assess and act on priority original ANDAs within 10 months of the date of ANDA submission if:

i. the applicant submits a PFC later than 60 days prior to the date of ANDA submission, or does not submit a PFC;

ii. information in a PFC is found to be incomplete or inaccurate;

iii. the information submitted in the ANDA differs significantly from what was submitted in the PFC; or

iv. FDA, upon assessment of a final bioequivalence study report submitted in the ANDA, determines that an inspection of the relevant site or sites is necessary.

3. If, upon initial submission, a standard or priority original ANDA contains a certification that a site/facility listed on the Form FDA 356h is not ready for inspection (i.e., the box “no” is checked in response to “is the site ready for inspection?” in section 28), FDA will set a goal date that is 15 months from the date of submission. FDA will conduct a filing review of such an ANDA but will not commence substantive assessment of the application until an amendment described in subsection I(A)(3)(a) is submitted, or the goal date is reset pursuant to I(A)(3)(b).

a. During the initial 15-month review period, if the applicant submits an amendment with a Form FDA 356h that certifies all facilities are ready for inspection, FDA will set a new goal date that is 8 months from the

date of submission for priority amendments (if a PFC was submitted per I(A)(2)(a)), or 10 months from the date of submission for other amendments.

b. If the applicant does not submit an amendment described in I(A)(3)(a) by 30 days before the goal date, FDA will reset the goal date for an additional 15 months, i.e., 30 months from the date of original ANDA submission. FDA will assess and act on 90 percent of such ANDAs within 30 months of the date of the original submission as applicable.

4. Assess and act on 90 percent of standard Major Amendments within the applicable assessment goal.

a. Assess and act on standard Major Amendments within 8 months of the date of amendment submission if preapproval inspection is not required.

b. Assess and act on standard Major Amendments within 10 months of the date of amendment submission if preapproval inspection is required.

5. Assess and act on 90 percent of priority Major Amendment submissions within the applicable assessment goal.

a. Assess and act on priority Major Amendments within 6 months of the date of amendment submission if preapproval inspection is not required.

b. Assess and act on priority Major Amendments within 8 months of amendment submission if a preapproval inspection is required, the applicant submits a PFC not later than 60 days prior to the date of amendment submission, and the PFC is found to be complete and accurate, subject to the limitations set forth in section I(A)(6).

6. Assess and act on priority Major Amendments within 10 months of amendment submission if a preapproval inspection is required and if:

a. the applicant submits a PFC later than 60 days prior to the date of the amendment, or does not submit a PFC;

b. information in a PFC is found to be incomplete or inaccurate;

c. the information submitted in the amendment differs significantly from what was submitted in the PFC; or

d. FDA, upon assessment of a final bioequivalence study report submitted in the amendment, determines that an inspection of the relevant site or sites is necessary.

7. Assess and act on 90 percent of standard and priority Minor Amendments within 3 months of the date of amendment submission.

TABLE FOR SECTION I(A)(1) AND (2): ORIGINAL ANDAs

Submission Type	Goal
Standard Original ANDAs.	90% within 10 months of submission date, subject to any adjustment to the goal date described in section I(A)(3).
Priority Original ANDAs.	90% within 8 months of submission date if applicant meets requirements under section I(A)(2)(a), subject to any adjustment to the goal date described in section I(A)(3). 90% within 10 months of submission date if applicant meets any limitations as described under section I(A)(2)(b), subject to any adjustment to the goal date described in section I(A)(3).

TABLE FOR SECTION I(A)(4)–(7): AMENDMENTS

Submission Type	Goal
Standard Major Amendments.	90% within 8 months of submission date if preapproval inspection not required. 90% within 10 months of submission date if preapproval inspection required.
Priority Major Amendments.	90% within 6 months of submission date if preapproval inspection not required. 90% within 8 months of submission date if preapproval inspection required and applicant meets requirements under section I(A)(5)(b). 90% within 10 months of submission date if preapproval inspection required and applicant meets any limitations as described under section I(A)(6).
Standard and Priority Minor Amendments.	90% within 3 months of submission date.

B. PASs and PAS Amendments

1. Assess and act on 90 percent of standard prior approval supplements (PASs) within the applicable assessment goal.

a. Assess and act on standard PASs within 6 months of the date of PAS submission if preapproval inspection is not required.

b. Assess and act on standard PASs within 10 months of the date of PAS submission if preapproval inspection is required.

2. Assess and act on 90 percent of priority PASs within the applicable assessment goal.

a. Assess and act on priority PASs within 4 months of the date of PAS submission if preapproval inspection is not required.

b. Assess and act on priority PASs within 8 months of the date of PAS submission if a preapproval inspection is required, the applicant submits a PFC not later than 60 days prior to the date of PAS submission, and the PFC is found to be complete and accurate, subject to the limitations set forth in section I(B)(2)(c).

c. Assess and act on priority PASs within 10 months of PAS submission if a preapproval inspection is required and if:

i. the applicant submits a PFC later than 60 days prior to the date of PAS submission, or does not submit a PFC;

ii. information in a PFC is found to be incomplete or inaccurate;

iii. the information submitted in the PAS differs significantly from what was submitted in the PFC; or

iv. FDA, upon assessment of a final bioequivalence study report submitted in the PAS, determines that an inspection of the relevant site or sites is necessary.

3. Assess and act on 90 percent of Major Amendments to standard PASs within the applicable assessment goal.

a. Assess and act on Major Amendments to standard PASs within 6 months of the date of amendment submission if preapproval inspection is not required.

b. Assess and act on Major Amendments to standard PASs within 10 months of the date of amendment submission if preapproval inspection is required.

4. Assess and act on 90 percent of Major Amendments to priority PASs within the applicable assessment goal.

a. Assess and act on Major Amendments to priority PASs within 4 months of the date of amendment submission if preapproval inspection is not required.

b. Assess and act on priority Major Amendments to priority PASs within 8 months of amendment submission if a preapproval inspection is required, if the applicant submits a PFC not later than 60 days prior to the date of amendment submission, and the PFC is found to be complete and accurate, subject to the limitations set forth in section I(B)(4)(c).

c. Assess and act on priority Major Amendments to priority PASs within 10 months of amendment submission if a preapproval inspection is required and if:

i. the applicant submits a PFC later than 60 days prior to the date of the PAS amendment, or does not submit a PFC;

ii. information in a PFC is found to be incomplete or inaccurate;

iii. the information submitted in the PAS amendment differs significantly from what was submitted in the PFC; or

iv. FDA, upon assessment of a final bioequivalence study report submitted in the amendment, determines that an inspection of the relevant site or sites is necessary.

5. Assess and act on 90 percent of Minor Amendments to standard and priority PASs within 3 months of the date of amendment submission.

TABLE FOR SECTION I(B)(1) AND (2): PASs

Submission Type	Goal
Standard PASs	90% within 6 months of submission date if preapproval inspection not required. 90% within 10 months of submission date if preapproval inspection required.
Priority PASs	90% within 4 months of submission date if preapproval inspection not required. 90% within 8 months of submission date if preapproval inspection required and applicant meets requirements under section I(B)(2)(b). 90% within 10 months of submission date if preapproval inspection required and applicant meets any limitations as described under section I(B)(2)(c).

TABLE FOR SECTION I(B)(3)–(5): PAS AMENDMENTS

Submission Type	Goal
Standard PAS Major Amendments.	90% within 6 months of submission date if preapproval inspection not required. 90% within 10 months of submission date if preapproval inspection required.
Priority PAS Amendments.	90% within 4 months of submission date if preapproval inspection not required. 90% within 8 months of submission date if preapproval inspection required and applicant meets requirements under section I(B)(4)(b). 90% within 10 months of submission date if preapproval inspection required and applicant meets any limitations as described under section I(B)(4)(c).
Standard and Priority Minor PAS Amendments.	90% within 3 months of submission date.

C. Unsolicited Amendments and PAS Amendments

1. Assess and act on Unsolicited Amendments and PAS amendments submitted during the assessment cycle by the later of the goal date for the original submission/solicited amendment or the goal date assigned in accordance with sections I(A)(4), (5), (6) and (7) and I(B)(3), (4) and (5), respectively, for the Unsolicited Amendment.

2. Assess and act on Unsolicited ANDA Amendments and PAS amendments submitted between assessment cycles by the later of the goal date for the subsequent solicited amendment or the goal date assigned in accordance with sections I(A)(4), (5), (6), and (7) and I(B)(3), (4), and (5), respectively, for the Unsolicited Amendment.

D. Drug Master Files (DMFs)

Complete the initial completeness assessment for 90 percent of Type II active pharmaceutical ingredient (API) DMFs within 60 days of the later of the date of DMF submission or DMF fee payment.

TABLE FOR SECTION I(D): DMFs

Submission Type	Goal
Type II API DMF ...	90% of initial completeness assessments within 60 days of the later of the date of DMF submission or DMF fee payment.

E. Controlled Correspondence

1. A Controlled Correspondence may be submitted by or on behalf of a generic drug manufacturer or related industry prior to ANDA submission. Under the GDUFA II framework, correspondence seeking regulatory and/or scientific advice after issuance of a Complete Response Letter (CRL) or tentative approval, or after ANDA approval, was considered general correspondence. Under GDUFA III, these types of correspondence can be submitted as Controlled Correspondence. During an ANDA assessment cycle, a Controlled Correspondence may only be submitted if an applicant seeks further feedback from FDA after a product-specific guidance (PSG) Teleconference, as described in section III(C)(5)(c), below, or to seek a Covered Product Authorization. During an ANDA assessment cycle, all other correspondence will be general correspondence.

2. Review and respond to 90 percent of Controlled Correspondence within the applicable review goal.

- a. Review and respond to Level 1 Controlled Correspondence within 60 days of the date of submission.
- b. Review and respond to Level 2 Controlled Correspondence within 120 days of the date of submission.
- 3. FDA will review and respond to 90 percent of submitter requests to clarify ambiguities in the Controlled Correspondence response within 21 days of receipt of the request. The response to the submitter's request will provide clarification or advice concerning the ambiguity in the Controlled Correspondence response.

TABLE FOR SECTION I(E): CONTROLLED CORRESPONDENCE

Submission Type	Goal
Level 1 Controlled Correspondence.	90% within 60 days of submission date.
Level 2 Controlled Correspondence.	90% within 120 days of submission date.

FDA will review and respond to 90% of submitter requests to clarify ambiguities in the Controlled Correspondence response within 21 days of request receipt.

II. ORIGINAL ANDA ASSESSMENT PROGRAM ENHANCEMENTS

A. ANDA Receipt

- 1. FDA will strive to determine whether to receive ANDAs within 60 days of the date of ANDA submission.
- 2. To enable FDA to rapidly determine whether to receive an ANDA pursuant to 21 CFR 314.101, and with consideration of final Agency guidances that address ANDA receipt determinations, FDA will communicate minor technical deficiencies (e.g., document legibility) and deficiencies potentially resolved with information in the ANDA at original submission within 10 days of original ANDA submission. If a deficiency is resolved within 10 days, that deficiency will not be a basis for a refuse-to-receive decision.
- 3. At the time of receipt, FDA will notify the applicant in the acceptance letter whether the ANDA or PAS is subject to priority or standard assessment.

B. ANDA Assessment Transparency and Communications Enhancements

To promote transparency and communication between FDA and ANDA applicants, FDA will apply the assessment program enhancements below to the assessment of all ANDAs. The goal of these program enhancements is to improve predictability and transparency, promote the efficiency and effectiveness of the review process, minimize the number of assessment cycles necessary for approval, increase the overall rate of approval, and facilitate greater access to generic drug products.

- 1. Information Requests (IRs) and Discipline Review Letters (DRLs):
 - a. IRs and DRLs do not stop the assessment clock.
 - b. In the first assessment cycle, FDA will issue the appropriate IR(s) and/or DRL(s) from each assessment discipline by the midpoint of the assessment, with the exception of the Labeling discipline as described in subsection II(B)(2) below.
 - i. In a Mid-Cycle DRL, the assessment discipline will assign a due date for response and identify major and minor deficiencies.
 - ii. If an applicant responds by the response due date, FDA will assess a response to minor deficiencies within the originally assigned goal date for the submission, subject to the exceptions described in II(B)(1)(iii).
 - iii. Responses to any major deficiencies, or to minor deficiencies that include data and information that require comparable FDA assessment resources to those required for major deficiencies, for example, a consult, will be considered Major Amendments. FDA will extend the goal date consistent with the

number of months needed to assess a comparable standard or priority Major Amendment (see section I(A)(4)–(6)).

- c. FDA will issue IRs and DRLs after the midpoint of the first assessment cycle and at any time in subsequent assessment cycles, when, in FDA's judgment, there are one or more minor deficiencies in a discipline that, if resolved using an IR or DRL, could lead to approval or tentative approval of an ANDA in the current assessment cycle. FDA will issue the IR or DRL and provide a due date for the applicant's response before the goal date.
 - i. If the applicant responds to the minor deficiencies in the IR or DRL by the due date, and FDA finds the amendment to satisfactorily address all of the issues identified in the IR or DRL, and the response does not contain unsolicited information, FDA may extend the goal date by 90 days from the date of the applicant's response.
 - ii. FDA's decision to extend the goal date will be communicated in an amendment acknowledgment letter.
 - iii. FDA will continue to issue IRs and/or DRLs late in the assessment cycle for original submissions and amendments until it is no longer feasible within the current assessment cycle for the applicant to develop and FDA to assess a response to the IR and/or DRL. For IRs and DRLs issued past the midpoint of the assessment cycle, the assessment discipline generally will assign a due date for response and identify major and minor deficiencies. DRLs issued without a response due date likely will signify a forthcoming CRL.
 - d. If the applicant does not provide a complete response to an IR and/or DRL by the response due date (or any agreed-upon extension), FDA may include the same deficiencies from the IR or DRL in a CRL and assess the response during the next assessment cycle.
 - e. If a discipline identifies a Significant Major deficiency, that deficiency will be communicated in a CRL as soon as is feasible.
- 2. Specific commitments related to IRs and DRLs for labeling:
 - a. In the first assessment cycle, the Labeling Discipline will:
 - i. upon receiving an ANDA for assessment, make an initial determination whether there is a need for a consult to be issued to another review discipline, including for a consult regarding an applicant's request to "carve out" language in the proposed labeling protected by patents or exclusivities, and will initiate such consults;
 - ii. strive to issue any DRL at approximately months 6–7 of the assessment for those ANDAs with a 10-month goal date, or months 5–6 of the assessment for those ANDAs with an 8-month goal date, with the exception that there may be a delay of the issuance of any labeling deficiencies that result from changes to the labeling of the reference listed drug (RLD) or a new exclusivity or patent listing;
 - iii. limit the assessment of labeling to one IR/DRL if other disciplines will not be acceptable during the first cycle; and
 - iv. continue to assess labeling to enable an action within the assessment cycle if other disciplines are acceptable.
 - b. Labeling IRs and DRLs in all assessment cycles:
 - FDA will minimize issuing CRLs that contain only labeling deficiencies by, for example, utilizing later-cycle IRs and the imminent action process.
- 3. Imminent Actions:
 - a. FDA will continue assessment of an ANDA past the goal date if, in FDA's judgment, it may be possible to approve or tentatively approve an ANDA within 60 days

after the goal date. Such circumstances may include:

- i. When the application meets the requirements for tentative approval by the goal date, but the legally permissible ANDA approval date is within 60 days after the goal date, and FDA may be able to approve the ANDA when it becomes legally permissible to do so.
- ii. When FDA may be able to approve or tentatively approve an application submitted by a first applicant by the 30-month forfeiture date described in section 505(j)(5)(D)(i)(IV) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 355(j)(5)(D)(i)(IV)).
- iii. When, at the sole discretion of FDA, and subject to resources, one or more small issues remain from one or more disciplines that in FDA's judgment may be resolved within 60 days after the goal date.
- b. If an ANDA is approved or tentatively approved within 60 days after the goal date, the goal date will be considered to have been met.
- 4. FDA will strive to act prior to a goal date, or the 60-day period for an imminent action, when the assessment is complete and there are no outstanding deficiencies.
- 5. To facilitate the labeling assessment, an applicant will clearly state in the cover letter to an ANDA, amendment, PAS, or PAS Amendment that the submission includes a proposed labeling carve-out.
- 6. Communication regarding Deficiencies and Actions:
 - a. With respect to imminent actions, applicants may inquire and FDA will promptly respond to an applicant inquiry seeking information as to whether FDA intends to work through the goal date in accordance with section II(B)(3). This communication will be preliminary and subject to change.
 - b. If a regulatory project manager (RPM) learns that a major deficiency is likely forthcoming, the RPM will notify the applicant. The RPM will not be expected to discuss the nature of the specific forthcoming deficiencies prior to issuance of the CRL.
 - c. If an RPM learns that FDA is likely to miss the goal date for an ANDA, the RPM will notify the applicant of the delay in taking an action, identify the general reason for the delay including the outstanding discipline(s), if any, and the estimated time for FDA's action on the application.
 - d. The applicant may periodically request a Review Status Update for each discipline. In response to the applicant's request, the RPM will timely provide a Review Status Update for each discipline.
- 7. FDA will indicate the assessment classification for a responding amendment in a CRL and include FDA's basis for classifying a responding amendment as Major.
- 8. Applicants who receive a CRL have the following options with respect to engaging with FDA prior to responding to the CRL:
 - a. A post-CRL teleconference to seek clarification concerning deficiencies identified in a CRL. FDA will grant appropriate requests for teleconferences requested by applicants upon receiving first-cycle CRLs and upon receiving subsequent CRLs. An appropriate request is one that clearly identifies the specific deficiencies to be discussed and the reason why such deficiencies are not clear. FDA will provide a scheduled date for 90 percent of post-CRL teleconferences within 14 days of the request for a teleconference and conduct 90 percent of such post-CRL teleconferences, if granted, within 30 days of receipt of the written request;
 - b. Submission of a Controlled Correspondence as described in section I(E); or
 - c. A post-CRL Scientific Meeting to request scientific advice on possible approaches to address deficiencies identified in

a CRL related to establishing equivalence, subject to the conditions described in section IV(C).

C. *Assessment Classification Changes During the Assessment Cycle*

1. If during the assessment of an ANDA, ANDA amendment, PAS, or PAS amendment, the assessment classification changes from Standard to Priority, FDA will notify the applicant within 14 days of the date of the change.
2. An applicant may request a change in the assessment classification at any time during the assessment.
3. Once an ANDA or PAS submission is classified as being subject to priority assessment, the application will retain such priority assessment classification status for the duration of that assessment cycle.
4. FDA will include an explanation of the reasons for any denial of an assessment status reclassification request.
5. If an applicant requests a teleconference as part of its request to reclassify a Major Amendment or standard assessment status, FDA will schedule and conduct the teleconference and decide 90 percent of such reclassification requests within 30 days of the date of FDA's receipt of the request for a teleconference. This goal only applies when the applicant accepts the first scheduled teleconference date offered by FDA. This

goal does not apply to a Major Amendment in response to a CRL that was deemed major only due to a facility deficiency ("Facility-Based Major CRL Amendment") described in section II(C)(7).

6. An amendment in response to a CRL classified by FDA as Minor that is submitted more than one year after the date FDA issued the CRL will be reclassified as a Major Amendment, except for ANDAs for products that are on the drug shortage list under section 506E of the FD&C Act (21 U.S.C. 356e), or are the subject of a response to a Public Health Emergency as declared by the Secretary of the U.S. Department of Health and Human Services under section 319 of the Public Health Service Act (PHS Act) (42 U.S.C. 247d), or are anticipated to be subject to the same criteria as apply to such a declaration, at the time of submission.

7. *Reclassification of Facility-Based Major CRL Amendments*

- a. Upon submission of a Facility-Based Major CRL Amendment, an applicant can request that FDA reclassify the Major Amendment to minor.
- b. A request for reclassification must be made at the time of amendment submission and include supporting information detailing why the facility deficiency has been resolved and no additional facility assessment is needed.

c. FDA will grant the request to reclassify the Facility-Based Major CRL Amendment if FDA determines that none of the following are necessary to complete the assessment of the amendment:

- i. A facility inspection
- ii. Use of alternate tools for facility assessment
- iii. Continued assessment of inspection deficiency responses
- d. If FDA denies the request, the Agency will communicate the substantive basis of the denial to the applicant and the ANDA amendment will be assigned a 6-, 8- or 10-month goal date, as applicable, from the original date of the amendment submission.
- e. FDA will make a decision on a request for reclassification of a Facility-Based Major CRL Amendment within 30 days from the date of submission for priority amendments, and within 60 days from the date of submission for standard amendments. If the Facility-Based Major CRL Amendment is reclassified as minor, the goal date will be 3 months from the end of the 30- or 60-day decisional period, as applicable.
- f. The goal dates for decisions on requests for reclassification and amendment assessment for which a request for reclassification is submitted are as follows:

Submission Type	FDA Response Regarding Major to Minor Reclassification	New ANDA Goal Date if Reclassification Granted	ANDA Goal Date if Reclassification Denied
Standard Major Amendment	Within 60 days of submission date	Within 5 months of submission date	Within 8 months of submission date if preapproval inspection is not required. Within 10 months of submission date if preapproval inspection is required.
Priority Major Amendment	Within 30 days of submission date	Within 4 months of submission date	Within 6 months of submission date if preapproval inspection is not required. Within 8 months of submission date if preapproval inspection required and applicant meets the requirements under section I(A)(5)(b). Within 10 months of submission date if preapproval inspection required and applicant meets any limitations as described under section I(A)(6).

D. *ANDA Approval and Tentative Approval*

If applicants submit and maintain ANDAs consistent with the statutory requirements for approval under 505(j) of the FD&C Act; respond to IRs and DRLs completely and within the time frames requested by FDA; and timely submit all required information under 21 CFR parts 314 and 210, including information concerning notice (21 CFR 314.95), litigation status (21 CFR 314.107), and commercial marketing (21 CFR 314.107); then FDA will strive to:

1. Approve approvable ANDAs in the first assessment cycle;
2. Approve First Generics on the earliest lawful approval date, if known to FDA; and
3. Tentatively approve or approve ANDAs for "First Applicants" as described in section 505(j)(5)(B)(iv)(II)(bb) of the FD&C Act to avoid forfeiture of 180-day exclusivity.

E. *Dispute Resolution*

1. An applicant may pursue a request for reconsideration within the assessment discipline at the Division level or original signatory authority, as needed.
2. The Office of Generic Drugs, Office of Regulatory Operations Associate Director will track each request for Division-level reconsideration through resolution.
3. Following resolution of a request for reconsideration, an applicant may pursue formal dispute resolution above the Division level, pursuant to procedures set forth in Formal Dispute Resolution: Sponsor Appeals Above the Division Level Guidance for Industry and Review Staff (May 2019).
4. FDA will respond to 90 percent of appeals above the Division level within 30 days of CDER's receipt of the written appeal.
5. CDER's Formal Dispute Resolution Project Manager (or designee) will track

each formal appeal above the Division level through resolution.

F. *Pre-Submission Facility Correspondence*

1. For the purposes of section I.A. and I.B. above, FDA will consider a PFC to be complete and accurate if the submission consists of the following:

a. For each manufacturing and testing facility involved in manufacturing processes and testing for the ANDA and corresponding Type II API DMF:

- i. facility name, operation(s) performed, facility contact name, address, FDA Establishment Identifier (FEI) number (if a required registrant or one has been assigned), DUNS number, registration information (for required registrants), and a confirmation that the facility is ready for inspection,
- ii. information needed to inform FDA's decision regarding the need for a preapproval inspection, such as a description of the manufacturing process and controls of critical steps, identification of any anticipated differences between pilot/exhibit scale and commercial scale processes, and as otherwise described in the guidance for industry on ANDAs: Pre-Submission of Facility Information Related to Prioritized Generic Drug Applications (Pre-Submission Facility Correspondence) (November 2017) and any revisions, and
- iii. a certification by the applicant that any Type II DMF has similarly complete and accurate facility information, including complete facility information (i.e., facility name, operation, facility contact name, address, FEI number and DUNS number, and a confirmation that the facility is ready for inspection).
- b. Information needed to inform FDA's decision regarding the need for a preapproval

inspection, such as a description of the drug substance manufacturing process, that is included in a corresponding Type II DMF is not required to be duplicated in the PFC for the ANDA if it is included in a corresponding Type II DMF.

c. For all sites or organizations involved in all bioequivalence and clinical studies used to support the ANDA submission: site names, addresses, and website; the study numbers; a list and description of all study investigators consistent with the guidance ICH E3 Structure and Content of Clinical Study Reports (July 1996) section 16.1.4; the study conduct dates; and study protocols and any available amendments.

d. For all sites or organizations involved in analytical studies used to support the ANDA application submission the following are required: analytical site name, address, and website. For those studies that were initiated no later than 60 days prior to the ANDA submission, additional requirements are:

- i. a list of investigator name(s)
- ii. study conduct dates; and
- iii. if the analytical method validation was completed before dosing, the analytical method validation study report(s).
- e. This information is provided using a standardized electronic format and includes unique identifiers that are current and accurate.
2. Changes to information contained in a PFC when submitted in an ANDA that are considered a "significant change" include changes in the identified facilities for manufacture of the drug substance or drug product, the proposed manufacturing operations or operating principles, and the order of manufacturing unit operations, as described in the guidance ANDAs: Pre-Submission of

Facility Information Related to Prioritized Generic Drug Applications (Pre-Submission Facility Correspondence) (November 2017) and any revisions.

G. Other ANDA Assessment Program Aspirations

1. FDA aspires to continually improve the efficiency of the ANDA Assessment program.
2. The absence of a GDUFA III commitment for a specific program function does not imply that the program function is not important. For example, other program functions include determining whether listed drugs were voluntarily withdrawn from sale for reasons of safety or effectiveness and ANDA proprietary name evaluations.

III. PRE-ANDA PROGRAM

A. Goal of Pre-ANDA Program

1. The goal of the pre-ANDA program is to clarify regulatory expectations for prospective applicants early in product development, assist applicants in developing more complete submissions, promote a more efficient and effective ANDA assessment process, and reduce the number of assessment cycles required to obtain ANDA approval.
2. Some elements of these programs are tailored to enhance the development of Complex Generic Products. Complex Generic Products can raise unique scientific and regulatory considerations, and FDA is committed to providing further transparency and clarity on Complex Generic Product development and assessment to help increase the availability of these products.

B. Suitability Petitions

1. In FY 2023, FDA will work diligently to enhance the Agency's processes for reviewing and responding to petitions submitted under section 505(j)(2)(C) of the FD&C Act (commonly referred to as "suitability petitions"), and to review and respond to pending suitability petitions.
2. Prior to FY 2024, FDA will take appropriate action to determine if petitioners who submitted suitability petitions prior to FY 2023 remain interested in a response.
3. FDA will conduct a completeness assessment for suitability petitions submitted in FY 2024–2027. The timeframe for the completeness assessment will be:
 - a. 21 days after the date of petition submission; or
 - b. If an IR is issued as part of the completeness assessment and the petitioner submits a response, FDA will finish the completeness assessment within 21 days after the date of receipt of the IR response.
4. Any suitability petition submitted in FY 2024–2027 will receive a goal date described in section III(B)(7). Any suitability petitions submitted to FDA prior to FY 2024 will not receive a goal date. If a petitioner wants to receive a goal date on a suitability petition submitted prior to FY 2024, the petitioner may withdraw and submit a new suitability petition in FY 2024–2027.
5. The date of submission for the purposes of determining the fiscal year of submission will be the date of FDA's completion of the completeness assessment.
6. FDA will prioritize the review of suitability petitions for a drug product that:
 - a. could mitigate or resolve a drug shortage and prevent future shortages;
 - b. address a public health emergency declared by the Secretary of the U.S. Department of Health and Human Services under section 319 of the PHS Act, or anticipated under the same criteria as apply to such a declaration;
 - c. is for a new strength of a parenteral product that could aid in eliminating pharmaceutical waste or mitigating the number of vials needed per dose by addressing differences in patient weight, body size, or age; or

d. is subject to special review programs under the President's Emergency Plan for AIDS Relief (PEPFAR).

7. Beginning in FY 2024, FDA will review and respond to suitability petitions that have been assigned a goal date pursuant to the following goals:

- a. In FY 2024, 50 percent of submissions within 6 months after completeness assessment, up to a maximum of 50 suitability petitions completed;
- b. In FY 2025, 70 percent of submissions within 6 months after completeness assessment, up to a maximum of 70 suitability petitions completed;
- c. In FY 2026, 80 percent of submissions within 6 months after completeness assessment, up to a maximum of 80 suitability petitions completed; and
- d. In FY 2027, 90 percent of submissions within 6 months after completeness assessment, up to a maximum of 90 suitability petitions completed.

8. As a general matter, if FDA misses goal dates on suitability petitions due to increased submissions, FDA will prioritize the review of suitability petitions for which a goal date was missed prior to reviewing newly submitted suitability petitions for the current fiscal year, except for those suitability petitions that are prioritized under section III(B)(6). See Appendix for additional information on FDA's review of suitability petitions in GDUFA III.

C. Product-Specific Guidance

1. FDA will continue to issue PSG identifying the methodology for generating evidence needed to support ANDA approval.
2. FDA will issue PSGs consistent with the following goals:
 - a. For Complex Products approved in new drug applications (NDAs) on or after October 1, 2022, a PSG will be issued for 50 percent of such NDA products within 2 years after the date of approval, and for 75 percent of such NDA products within 3 years after the date of approval.
 - b. FDA will continue to develop PSGs for Complex Products approved prior to October 1, 2022, for which no PSG has been published.
 - c. For non-complex drug products approved in NDAs on or after October 1, 2022, that contain a new chemical entity (NCE) (as described in section 505(j)(5)(F)(ii) of the FD&C Act), a PSG will be issued within 2 years after the date of approval for 90 percent of such products.
3. Information on PSG Development:
 - a. FDA will provide on its website information related to upcoming new and revised PSGs to support the development and approval of safe and effective generic drug products, including the projected date of PSG publication, which may be subject to change. When FDA becomes aware that it will not meet the issuance date listed on the website, FDA will update the website to provide a new projected issuance date in the next scheduled update.
 - b. FDA routinely will update the information on this website approximately every 4 months.
 - c. PSGs will be developed (or revised) and issued in accordance with FDA's Good Guidance Practices and will be reviewed by senior management and other designated subject matter experts prior to publication and after consideration of any public comments submitted to the relevant docket of a published draft or final PSG.
4. Prioritization of PSG Development:
 - a. FDA will make available on its website information on how the Agency prioritizes the development of PSGs.
 - b. Industry may request via the portal for Controlled Correspondence that FDA develop a PSG. FDA will consider this request in

prioritizing PSG development but will not consider this to be a Controlled Correspondence.

c. FDA will seek public input on prioritization of PSGs annually during the public meeting on research prioritization described in section V(B)(2).

d. For Complex Products, FDA generally will prioritize the development of PSGs for Complex Products that contain a NCE (as described in section 505(j)(5)(F)(ii) of the FD&C Act) over Complex Products that do not contain an NCE.

5. When a new or revised PSG is published and an applicant or prospective applicant has already commenced an in vivo bioequivalence study (i.e., the study protocol has been signed by the study sponsor and/or the contract research organization) the applicant or prospective applicant may request a PSG Teleconference to obtain Agency feedback on the potential impact of the new or revised PSG on its development program.

a. To be eligible for a PSG Teleconference, the applicant or prospective applicant must submit with the meeting request the signature page of the relevant in vivo study protocol signed by the study sponsor and/or the contract research organization.

b. FDA will hold a PSG Teleconference within 30 days after the receipt of the meeting request. The PSG Teleconference will be scheduled for 60 minutes.

c. If the applicant seeks further feedback from FDA after a PSG Teleconference, the applicant may utilize the Controlled Correspondence process or request an additional meeting. The purpose of this meeting is to provide a forum in which industry can discuss the scientific rationale for an approach other than the approach recommended in the PSG to ensure that the approach complies with the relevant statutes and regulations.

i. If the applicant has not submitted an ANDA, the prospective applicant can submit a request for a Pre-Submission PSG Meeting. FDA will grant or deny the meeting within 14 days after receipt of the request and if granted, will schedule the meeting within 120 days after receipt of the request.

ii. If the applicant has submitted an ANDA, the applicant can submit a request for a Post-Submission PSG Meeting. FDA will grant or deny the meeting within 14 days after receipt of the request, and if granted, will schedule the meeting within 90 days after receipt of the request.

iii. FDA may deny a Pre- or Post-Submission PSG Meeting if the request is incomplete, or the inquiry would be more appropriately resolved through a Controlled Correspondence. FDA may grant a Pre- or Post-Submission Meeting request after such a Controlled Correspondence if the Agency determines that any issue(s) remain unresolved or would be more appropriately resolved in a meeting.

iv. Applicants and prospective applicants are eligible to request a Pre-Submission PSG Meeting or Post-Submission PSG Meeting regardless of whether they have had a Product Development Meeting or a post-CRL Scientific Meeting.

6. When FDA intends to issue a new or revised PSG and there are ANDAs under review that may be impacted by changes to the new or revised PSG, FDA will ensure that at least division-level program leadership is aware of the potential impact on the pending ANDAs for drug products with related new or revised PSGs.

D. Product Development Meetings

1. A prospective applicant can request a pre-ANDA submission Product Development Meeting. The purpose of the meeting is to provide a forum for a scientific exchange on specific issues (e.g., a proposed study design,

alternative approach, additional study expectations, or questions) in which FDA will provide targeted advice regarding an ongoing ANDA development program.

2. FDA will grant a prospective applicant a Product Development Meeting if, in FDA's judgment:

a. The requested Product Development Meeting concerns:

i. Development of a Complex Generic Product for which FDA has not issued a PSG; or
ii. An alternative equivalence evaluation, i.e., change in study type, such as in vitro to clinical, for a Complex Generic Product for which FDA has issued a PSG;

b. The prospective applicant submits a complete meeting package, including a data package and specific proposals;

c. A Controlled Correspondence response would not adequately address the prospective applicant's questions; and

d. A Product Development Meeting would significantly improve ANDA assessment efficiency.

3. Dependent on available resources, FDA may grant a prospective applicant a Product Development Meeting concerning development issues other than those described in Section III(D)(2) if, in FDA's judgment:

a. The prospective applicant submits a complete meeting package, including a data package and specific proposals;

b. A Controlled Correspondence response would not adequately address the prospective applicant's questions; and

c. A Product Development Meeting would significantly improve ANDA assessment efficiency.

4. FDA will grant or deny 90 percent of Product Development Meeting requests within 14 days after receipt of the meeting request.

5. FDA will conduct 90 percent of Product Development Meetings within 120 days after the meeting is granted.

6. FDA can meet the Product Development Meeting goal by either conducting a meeting or providing a meaningful written response that will inform drug development and/or regulatory decision-making to the prospective applicant, within the applicable goal date.

7. Unless FDA is providing a written response to satisfy the Product Development Meeting goal, FDA will provide preliminary written comments before each Product Development Meeting (and aspire to provide the written comments 5 days before the meeting) and will provide meeting minutes within 30 days following the meeting.

E. Pre-Submission Meetings

1. Prospective applicants may request a Pre-Submission Meeting. The purpose of a Pre-Submission Meeting is to provide an applicant the opportunity to present unique or novel data or information that will be included in the ANDA submission such as formulation, key studies, justifications, and/or methods used in product development, as well as the interrelationship of the data and information in the ANDA. FDA will grant a Pre-Submission Meeting, if the applicant was granted a Product Development Meeting for the same Complex Generic Product or FDA believes in its sole discretion that the Pre-Submission Meeting would improve assessment efficiency.

2. For Pre-Submission Meetings, FDA will:

a. Identify the ANDA assessment team members who will attend the meeting;

b. Identify additional content for the meeting in the letter granting the meeting request, including information on what topics should be addressed in the meeting in addition to those identified in the meeting request by the applicant; and

c. Identify at the meeting, items or information for clarification before the applicant's submission of the ANDA.

3. FDA will not provide a substantive assessment of summary data or full study reports at the meeting.

4. An applicant's decision not to request a Pre-Submission Meeting will not prejudice the receipt or assessment of an ANDA.

5. FDA will grant or deny 90 percent of Pre-Submission Meeting requests within 30 days.

6. If granted, FDA will conduct 90 percent of Pre-Submission Meetings within 60 days of the meeting request.

7. FDA will provide preliminary written comments 5 days before each meeting, and meeting minutes within 30 days after the meeting.

IV. ANDA ASSESSMENT MEETING PROGRAM

A. Goal of the ANDA Assessment Meeting Program

1. The goal of the ANDA Assessment Meeting Program is to provide or continue to provide targeted, robust advice to ANDA applicants as they work to meet the standards for ANDA approval.

2. Some elements of this program are tailored to enhance the development of Complex Generic Products.

B. Mid-Cycle Review Meetings and Enhanced Mid-Cycle Review Meetings

1. If an applicant for a Complex Generic Product was granted a Product Development Meeting for the same product, they may, within 7 days of receiving the last mid-cycle DRL, submit a request for a Mid-Cycle Review Meeting or an Enhanced Mid-Cycle Meeting. The request should describe the specific deficiency(ies) to be discussed.

2. Mid-Cycle Review Meetings:

a. The purpose of a Mid-Cycle Review Meeting is for the applicant to ask for the rationale for any deficiency identified in the mid-cycle DRL(s), and/or to ask questions related to FDA's assessment of the data or information in the ANDA. An applicant may not present any new data or information at this meeting.

b. The Mid-Cycle Review Meeting will take place within 30 days after the date the sponsor submits a meeting request.

3. Enhanced Mid-Cycle Review Meetings:

a. The purpose of this meeting is for the applicant to ask questions related to a proposed scientific path to address possible deficiencies identified in the mid-cycle DRL(s). An applicant may ask questions about potential new data or information to address any possible deficiencies identified in the mid-cycle DRL(s). FDA will discuss the data and information but will not provide substantive assessment of data or information provided by the applicant at the meeting.

b. If an Enhanced Mid-Cycle Review Meeting is requested, the meeting will take place within 90 days after issuance of the last mid-cycle DRL.

c. FDA will extend the ANDA goal date by 60 days if an applicant requests an Enhanced Mid-Cycle Review Meeting. FDA also will extend the response due date for the relevant DRL(s) by recalculating the response due date starting from the date of the meeting, e.g., if the response was due 30 days after the DRL was issued, it will now be due 30 days after the Enhanced Mid-Cycle Review Meeting.

d. An applicant may submit an Unsolicited Amendment after an Enhanced Mid-Cycle Review Meeting, which could result in an additional goal date extension consistent with section I(C).

C. Post-CRL Scientific Meetings

1. An applicant can request a Post-CRL Scientific Meeting. The purpose of this meeting is to provide an applicant scientific advice on possible approaches to address deficiencies identified in a CRL related to establishing equivalence.

a. An applicant's meeting request must discuss:

iii. a new equivalence study needed to address the deficiencies in the design identified in the CRL,

iv. an approach that is different from that submitted in the ANDA, e.g., a change in study type from in vivo to in vitro,

v. a new comparative use human factors study, or

vi. a new approach to demonstrating sameness of a complex active ingredient; and

b. FDA will grant the meeting if it is for a Complex Generic Product or in FDA's judgment the request raises issues that are best addressed via this meeting process and cannot be adequately addressed through Controlled Correspondence.

c. An applicant may have a post-CRL teleconference described in section II(B)(8)(a) prior to requesting this meeting.

2. FDA will grant or deny the Post-CRL Scientific Meeting request within 14 days after receipt of the request.

3. FDA will hold the Post-CRL Scientific Meeting within 90 days after the date the meeting is granted.

4. Applicants are eligible to request a Post-CRL Scientific Meeting even if they have not had a Product Development Meeting.

V. ADDITIONAL PROGRAM ENHANCEMENTS AND ASPIRATIONS

A. Inactive Ingredient Database Enhancement

FDA will update the Inactive Ingredient Database on an ongoing basis, and post quarterly notices of updates made. Such notices will include for each change made during the previous quarter, the new information, and the information that was replaced.

B. Regulatory Science Enhancements

1. FDA will conduct internal and external research to support fulfillment of submission assessment and pre-ANDA commitments set forth in Sections I and III, respectively.

2. Annually, FDA will conduct a public workshop to solicit input from industry and stakeholders for inclusion in an annual list of GDUFA III regulatory science initiatives. Interested parties may propose regulatory science initiatives via email to genericdrugs@fda.hhs.gov. After considering Industry and stakeholder input, FDA will post the list on FDA's website.

3. If Industry forms a GDUFA III regulatory science working group, then upon request of the working group to the Director of the Office of Research and Standards in the Office of Generic Drugs, FDA will meet with the working group twice yearly to discuss current and emerging challenges and concerns. FDA will post minutes of these meetings on its website.

4. Annually, FDA will report on its website the extent to which GDUFA regulatory science-funded projects support the development of generic drug products, the generation of evidence needed to support efficient assessment and timely approval of ANDAs, and the establishment of new approaches to evaluate generic drug equivalence.

C. Other Pre-ANDA and Assessment Meeting Program Aspirations

FDA aspires to continually improve the effectiveness of its Pre-ANDA and ANDA Assessment Meeting activities.

VI. DMF ASSESSMENT PROGRAM ENHANCEMENTS

A. Communication of DMF Assessment Comments

1. FDA will ensure that DMF assessment comments submitted to the DMF holder are issued at least in parallel with the issuance of review comments relating to the DMF for the ANDA.

2. This commitment applies to comments to the applicant issued in any ANDA CRL

and comments issued in the first IR letter by the drug product assessment discipline.

B. Teleconferences to Clarify DMF First Cycle Assessment Deficiencies

1. FDA will grant and conduct teleconferences when requested to clarify deficiencies in first cycle DMF deficiency letters.

2. DMF holders must request such teleconferences in writing within 30 days of issuance of the first cycle DMF deficiency letter, identifying specific issues to be addressed. FDA may initially provide a written response to the request for clarification, but if the DMF holder indicates that a teleconference is still desired, FDA will schedule the teleconference.

3. FDA will strive to grant such teleconferences within 30 days of receipt of the initial teleconference request, giving priority to DMFs based on the priority of the referencing ANDA.

4. In lieu of a teleconference, the DMF holder may submit a request for an email exchange between FDA and the DMF holder. The request must identify specific issues to be addressed. After FDA responds to the request, the DMF holder may submit, and FDA will respond to, one follow-up email to obtain additional clarification.

C. DMF First Adequate Letters

Once a DMF has undergone a full scientific assessment and has no open issues related to the assessment of the referencing ANDA, FDA will issue a First Adequate Letter.

D. DMF No Further Comment Letters

Once a DMF has undergone a full scientific assessment and the ANDA referencing the DMF has been approved or tentatively approved, FDA will issue a “no further comment” letter.

E. DMF Review Prior to ANDA Submission

1. A holder of a DMF may submit a request for assessment of the DMF six months prior to the planned submission date for: 1) an original ANDA, 2) an ANDA amendment containing a response to a CRL, or 3) an amendment seeking approval of an ANDA that previously received a tentative approval. In each case, the submission must include reference to a DMF for which FDA has not conducted a substantive assessment, and one of the following criteria must be met:

a. All patents and exclusivities will expire within 12 months of the planned submission date;

b. The submission is for a drug product for which there are not more than three approved drug products listed in FDA’s Approved Drug Products With Therapeutic Equivalence Evaluations (the “Orange Book”), for which there are no blocking patents or exclusivities listed for the RLD, and the ANDA applicant is not seeking approval for less than all of the conditions of use on the RLD labeling, e.g., a “carve-out.” In other words, there are fewer than four approved therapeutically equivalent drug products, including the RLD, listed in the Orange Book, no blocking patents or unexpired exclusivities for the RLD in the Orange Book, and the applicant is not seeking to “carve out” any conditions of use;

c. The submission is for a drug product that could help mitigate or resolve a drug shortage and prevent future shortages, including submissions related to products that are listed on FDA’s Drug Shortage List at the time of the submission;

d. The submission is for a drug product that either could help address a public health emergency declared by the Secretary of the U.S. Department of Health and Human Services under section 319 of the PHS Act, or anticipated under the same criteria as apply to such a declaration; or

e. The submission is for a drug product for which (1) there is only one approved drug product listed in the Prescription Drug Product List (i.e., the “Active Section”) of the Orange Book and that product is approved under an ANDA (i.e., the RLD is in the “Discontinued Section” and there is not more than one ANDA in the “Active Section”); (2) the approved ANDA for the drug product listed in the “Active Section” was not approved pursuant to a suitability petition under section 505(j)(2)(C) of the FD&C Act; (3) there are no blocking patents or exclusivities for the RLD; and (4) the submission does not qualify for prioritization under any other factor listed in MAPP 5240.3 Rev. 5: Prioritization of the Review of Original ANDAs, Amendments, and Supplements.

2. A holder of a DMF may submit a request for assessment of the DMF six months prior to the planned submission date for a PAS to add a new API source, provided that:

a. The PAS is for a drug product that could help mitigate or resolve a drug shortage and prevent future shortages, including submissions related to products that are listed on FDA’s Drug Shortage List at the time of the submission; or

b. The PAS is for a drug product that either could help address a public health emergency declared by the Secretary of the U.S. Department of Health and Human Services under section 319 of the PHS Act, or anticipated under the same criteria as apply to such a declaration.

3. To be eligible for this review, a DMF holder must submit with its request for review:

a. at least one Letter of Authorization with one pre-assigned ANDA number;

b. a reference to the corresponding RLD listed in the Orange Book; and

c. documentation that the DMF holder has paid a GDUFA DMF fee as described in section 744B(a)(2)(A) of the FD&C Act (21 U.S.C. 379j-41(a)(2)(A)) for the current fiscal year.

F. FDA Assessment of Solicited DMF Amendments

1. FDA will assess solicited DMF amendments related to original ANDAs and PASs upon receipt even if the original ANDA or PAS in which the DMF is referenced is not currently under assessment.

2. Such assessments will be conducted based on the assessment status of the DMF and other disciplines in the related ANDAs, with priority being given to those amendments related to ANDAs for which acceptability of the DMF assessment may result in an approval.

G. FDA Communication Related to DMF Amendments and ANDAs

FDA will communicate publicly to industry that prior to submitting a DMF amendment, the DMF holder should coordinate with the ANDA applicant that references the DMF to avoid delaying approval or tentative approval of the ANDA.

VII. FACILITIES

A. Foreign Regulators

1. Export Support and Education of Other Health Authorities: FDA will support the export of safe and effective pharmaceutical products by the U.S.-based pharmaceutical industry, including but not limited to providing timely updates to FDA’s Inspection Classification Database as described below, and educating other health authorities regarding FDA’s surveillance inspection program and the meaning of inspection classifications.

2. Communications to Foreign Regulators: Upon receipt of a written or email request by an establishment physically located in the U.S. that has been included as part of a marketing application submitted to a foreign

regulator, issue within 30 days of the date of receipt of the request a written communication to that foreign regulator conveying the current compliance status for the establishment.

B. Communication Regarding Inspections

1. When FDA conducts a preapproval inspection of a facility or site named in the ANDA, PAS, or associated Type II DMF and identifies outstanding issues that could prevent approval of an ANDA or PAS, the applicant will be notified that issues exist through an IR, DRL or CRL pursuant to Section II(B) above.

2. FDA agrees to communicate to the facility owner final inspection classifications that do not negatively impact approvability of any pending application within 90 days of the end of the inspection.

3. FDA agrees to ongoing periodic engagement with industry stakeholders to provide updates on Agency activities and seek stakeholder feedback.

C. GDUFA III Inspection Classification Database

The Inspection Classification Database will be updated every 30 days and will reflect FDA’s final assessment of the facility or site following an FDA inspection and assessment of the inspected entity’s timely response to any documented observations. FDA will update the existing publicly available Inspection Classification Database webpage and will develop communication materials to provide further information to industry and foreign regulators on how FDA determines which facilities to select for a drug surveillance inspection, including how FDA uses its risk-based site selection model to determine the frequency of surveillance inspections.

D. Post-Warning Letter Meetings

1. An eligible facility described in section VII(D)(3) may request a meeting with FDA regarding the facility’s remediation for deviations identified in a warning letter (Post-Warning Letter Meeting).

a. This meeting generally will take place 6 months or later after the facility submits an initial response to an FDA warning letter.

b. A facility may request that the meeting take place prior to 6 months after an initial response to a warning letter has been submitted. However, it is at FDA’s discretion to grant an earlier meeting if the Agency determines it would be beneficial to both parties.

2. The purpose of the Post-Warning Letter Meeting is to obtain preliminary feedback from FDA on the adequacy and completeness of the facility’s corrective action plans.

3. To be eligible for the Post-Warning Letter Meeting:

a. The facility Current Good Manufacturing Practice (CGMP) compliance status is “Official Action Indicated” as a result of an FDA inspection;

b. The facility has paid a GDUFA facility fee as described in section 744B(a)(4) of the FD&C Act for the current fiscal year, or is named in a pending ANDA application; and

c. The regulatory action (e.g., warning letter) is limited only to violations or deviations from Section 501 of the FD&C Act (21 U.S.C. 351) related to human drug manufacturing, including manufacturing of a drug-device combination product.

4. The meeting request will be granted only if the facility has submitted to FDA a thorough and complete corrective action and preventive action (CAPA) plan that addresses all items cited in the warning letter, and reasonable progress has been made toward remediation.

5. Any supplemental information submitted by a facility on remediation progress to be discussed at the meeting must be submitted at least 60 days prior to the meeting.

6. FDA may deny a request for a Post-Warning Letter Meeting if FDA determines that a facility is ineligible for a meeting or does not appear to be ready for a meeting as evidenced by an incomplete CAPA plan, and/or insufficient progress being made to remediate the facility issues. If FDA denies the meeting:

a. In general, FDA intends to respond briefly with comments regarding why the meeting package is not sufficiently developed or complete (e.g., where the facility has not presented a proposed CAPA plan for all items in the warning letter or where the firm does not appear to have made reasonable efforts to implement its proposed CAPA plan).

b. A facility may resubmit a new meeting request no sooner than 3 months after the first meeting request is denied by FDA.

7. Only two Post-Warning Letter Meeting requests per warning letter may be made under this section.

8. FDA may defer a Post-Warning Letter Meeting if FDA has made a decision that a reinspection is the most appropriate next step (i.e., defer in favor of re-inspection). In this case, FDA will notify the facility of the decision to re-inspect rather than grant a meeting.

9. FDA may schedule meetings by video conference, teleconference, or face-to-face, at FDA's discretion.

10. The following goals apply to FDA's decision to grant, deny, or defer in favor of reinspection a Post-Warning Letter Meeting:

a. In FY 2024, 50 percent of eligible requests within 30 days of request.

b. In FY 2025, 70 percent of eligible requests within 30 days of request.

c. In FY 2026 and FY 2027, 80 percent of eligible requests within 30 days of request.

11. The commitment to hold a Post-Warning Letter Meeting:

a. Does not preclude FDA from taking any regulatory actions necessary, including a follow-up inspection at any time (including prior to the Post-Warning Letter Meeting); and

b. As with other regulatory meetings, FDA advice is not binding on the Agency.

12. Guidance related to Post-Warning Letter Meeting process set forth in this section VII(D):

a. FDA will issue guidance regarding the Post-Warning Letter Meeting process, including recommendations on items facilities should submit as part of a meeting request.

b. If more than 50 percent of first-time meeting requests are denied because FDA makes an assessment that the facility is not ready, FDA agrees to take appropriate action to provide additional information on meeting requests, which could include updating the guidance described in VII(D)(12)(a) to provide further information on how facilities can avoid issues that have commonly led to meeting requests being denied.

E. Generic Drug Manufacturing Facility Re-inspection

1. An eligible facility as described in section VII(E)(2) may request a re-inspection.

2. To be eligible for the facility re-inspection process reflected in this section:

a. The facility CGMP compliance status is "Official Action Indicated" as a result of an FDA inspection;

b. The facility has paid a GDUFA facility fee as described in section 744B(a)(4) of the FD&C Act for the current fiscal year, or is named in a pending ANDA application; and

c. The regulatory action (e.g., warning letter) is limited only to violations or deviations from Section 501 of the FD&C Act related to human drug manufacturing, including manufacturing of a drug-device combination product.

3. FDA will review the request and if FDA determines that the requesting facility has

appropriately completed CAPAs that sufficiently address all of the deficiencies in a warning letter, with the exception of ongoing monitoring, and FDA agrees that the facility appears ready for inspection, FDA will generate an inspectional assignment.

4. FDA agrees to notify the facility of the Agency's decision to re-inspect within 30 days of receipt of the request for re-inspection.

5. If FDA declines the request to reinspect:

a. FDA agrees to notify the facility of its decision and provide a brief high-level explanation, for example, that the firm has not made sufficient progress to complete certain CAPAs identified as necessary to resolve a violation cited in the warning letter.

b. The facility may submit a second request for a re-inspection no earlier than 3 months after receiving FDA's initial decision.

c. If the second request is denied, facility will be considered to no longer meet the eligibility criteria in section VII(E)(2).

6. The processes and timelines set forth in this section apply only to the first reinspection after a warning letter. If the warning letter is not resolved after reinspection, the facility will be considered to no longer meet the eligibility criteria in section VII(E)(2).

7. If a re-inspection request is granted, FDA agrees to notify the facility and issue an inspectional assignment in conjunction with the notification. The applicable goals for domestic facilities are:

a. In FY 2024, for 60 percent of the requests for reinspection that are granted, FDA will re-inspect the facility within 4 months of the letter to the facility indicating FDA's intent to reinspect.

b. In FY 2025, for 70 percent of the requests for reinspection that are granted, FDA will re-inspect the facility within 4 months of the letter to the facility indicating FDA's intent to reinspect.

c. In FY 2026 and FY 2027, for 80 percent of the requests for reinspection that are granted, FDA will re-inspect the facility within 4 months of the letter to the facility indicating FDA's intent to reinspect.

8. The applicable goals for international facilities are:

a. In FY 2024, for 60 percent of the requests for reinspection that are granted, FDA will re-inspect the facility within 8 months of the letter to the facility indicating FDA's intent to re-inspect.

b. In FY 2025, for 70 percent of requests for reinspection that are granted, FDA will re-inspect the facility within 8 months of the letter to the facility indicating FDA's intent to re-inspect.

c. In FY 2026 and FY 2027, for 80 percent of requests for reinspection that are granted, FDA will re-inspect the facility within 8 months of the letter to the facility indicating FDA's intent to re-inspect.

VIII. CONTINUED ENHANCEMENT OF USER FEE RESOURCE MANAGEMENT

A. Sustainability of GDUFA Program Resources

1. FDA is committed to ensuring the sustainability of the GDUFA program resources and to enhancing the operational agility of the GDUFA program.

2. FDA will build on the financial enhancements included in GDUFA II and continue activities in GDUFA III to ensure optimal use of user fee resources and the alignment of staff to workload through the continued maturation and assessment of the Agency's resource capacity planning capability.

3. FDA also will continue activities to promote transparency of the use of financial resources in support of the GDUFA program.

B. Resource Capacity Planning

1. FDA will continue activities to mature the Agency's resource capacity planning

function, including utilization of modernized time reporting to support enhanced management of GDUFA resources in GDUFA III and implementation of the Capacity Planning Adjustment (CPA).

2. Resource Capacity Planning Implementation

a. By the end of the second quarter of FY 2023, FDA will publish an implementation plan that will describe how resource capacity planning and time reporting will continue to be utilized during GDUFA III. This implementation plan will address topics relevant to the maturation of resource capacity planning including, but not limited to, detailing FDA's approach to:

i. The continued maturation of the Agency's resource capacity planning capability;

ii. The continual improvement of time reporting and its utilization in the CPA;

iii. The integration of resource capacity planning analyses in the Agency's resource and operational decision-making processes; and

iv. The implementation of the CPA, with a first year of adjustment for FY 2024 user fees.

b. FDA will provide annual updates on the FDA website on the Agency's progress relative to activities detailed in this implementation plan by the end of the second quarter of each subsequent fiscal year.

c. FDA will document in the annual GDUFA Financial Report how any CPA fee revenues are being utilized.

d. Resources obtained from the CPA shall be used, consistent with user fee appropriations, to support CDER or ORA staff engaged in GDUFA program work, or other non-CDER staff who are directly supporting GDUFA review work.

e. The CPA shall be limited to workload driven by:

i. ANDA Originals and Resubmissions/Amendments

ii. ANDA Supplements (PAS and "Changes Being Effected" (CBE) supplements) and Amendments

iii. Controlled Correspondence as defined in Section XI(I)-(J)

iv. Pre-ANDA Meetings, which include Pre-Submission, Product Development, and Pre-Submission PSG Meetings

v. Surveillance inspections

vi. Post-marketing safety activities

vii. Suitability Petitions

C. Resource Capacity Planning Assessment

1. By the end of FY 2025, an independent contractor will complete and publish an evaluation of the resource capacity planning capability. This will include an assessment of the following topics:

a. The ability of the CPA to forecast resource needs for the GDUFA program, including an assessment of the scope of the workload drivers in the CPA and their ability to represent the overall workload of the GDUFA program;

b. Opportunities for the enhancement of time reporting toward informing resource needs; and

c. The integration and utilization of resource capacity planning information within resource and operational decision-making processes of the GDUFA program.

2. The contractor will provide options and recommendations in the evaluation regarding the continued enhancement of the above topics as warranted. The evaluation findings and any related recommendations will be discussed at the FY 2026 GDUFA 5-year financial plan public meeting. The findings and recommendations of the evaluation may inform the CPA methodology for future re-authorizations.

D. Financial Transparency and Efficiency

1. FDA is committed to ensuring GDUFA user fee resources are administered, allocated, and reported in an efficient and transparent manner. FDA will conduct activities

to evaluate the financial administration of the GDUFA program to help identify areas to enhance operational and fiscal efficiency. FDA will also conduct activities to enhance transparency of how GDUFA program resources are used.

2. FDA will publish a GDUFA 5-year financial plan no later than the second quarter of FY 2023. FDA will publish updates to the 5-year plan no later than the second quarter of each subsequent fiscal year.

3. FDA will convene a public meeting no later than the third quarter of each fiscal year starting in FY 2024 to discuss the GDUFA 5-year financial plan, along with the Agency's progress in implementing modernized time reporting and resource management planning.

E. Improving the Hiring of Review Staff

1. Enhancements to the generic drug review program require that FDA hire the necessary technical and scientific experts to efficiently conduct assessments of generic drug applications and supporting activities.

2. During GDUFA III, FDA will:

a. Hire 128 staff for the generic drug review program in FY 2023; and

b. Confirm progress in the hiring of GDUFA III staff in the GDUFA 5-year financial plan.

IX. GUIDANCE AND MAPPS

A. FDA will draft or modify relevant Manuals of Policies and Procedures (MAPPs) to reflect the commitments and goals in this Commitment Letter, including, but not limited to, the following:

1. To direct project managers, assessors, and other assessment program staff to actively work towards an action for an ANDA with a missed or extended goal date.

2. To revise MAPP 5200.12 Communicating Abbreviated New Drug Application Review Status Updates with Industry, to include communications related to imminent actions on or before April 30, 2023.

B. FDA will issue a Federal Register Notice on or before April 30, 2023, to solicit public comment on the content of Appendix A in the guidance for industry on ANDA Submissions—Amendments to Abbreviated New Drug Applications Under GDUFA (July 2018) and will use evaluations and/or training to assure consistency in ANDA amendment classification.

C. FDA will issue a MAPP on the process for Reclassification of Facility-Based Major CRL Amendments set forth in section II(C)(7) on or before June 30, 2024.

D. FDA will issue a MAPP on the prioritization of FDA assessment of solicited DMF amendments described in section VI(F)(2) on or before June 30, 2024.

E. FDA will issue guidance clarifying the regulatory status of active pharmaceutical ingredient-exipient mixtures for GDUFA purposes.

X. PERFORMANCE REPORTING

A. Monthly Reporting Metrics: FDA will publish the following monthly metrics on its website, using a consistent, publicly disclosed reporting methodology:

Number of ANDAs and amendments, CBE supplements, and PASs submitted in the reporting month delineated by type of submission:

2. Number of ANDAs and PASs FDA refused for receipt in the reporting month:

3. Number of actions taken in the reporting month delineated by the type of action. For purposes of the metrics, actions shall include final approvals, tentative approvals, CRLs, IRs, and DRLs (or other such nomenclature as FDA determines to reflect the concepts of an information request or CRL):

4. Number of finalized DMF Completeness Assessments in the reporting month;

5. Number of DMF fees paid in the reporting month; and

6. Number of first-cycle approvals and tentative approvals in the reporting month.

B. Quarterly Reporting Metrics: FDA will publish the following quarterly metrics on its website, using a consistent, publicly disclosed reporting methodology:

1. Number of ANDAs and PASs withdrawn in each reporting month;

2. Number of ANDAs awaiting applicant action;

3. Number of ANDAs awaiting FDA action;

4. Mean and median approval and tentative approval times for the quarterly action cohort;

5. Number of original ANDAs for Complex Generic Products submitted;

6. Number of requests for reclassification of a Facility-Based Major CRL Amendment received, and number of requests granted and denied; and

7. Number of Level 1 and Level 2 Controlled Correspondence submitted.

C. Fiscal Year Performance Report Metrics: FDA will publish the following metrics annually as part of the GDUFA Performance Report:

1. Mean and median approval and tentative approval times for ANDAs by FY receipt cohort;

2. Mean and median ANDA approval times, including separate reporting of mean and median times for first-cycle approvals FY receipt cohort;

3. Mean and median number of ANDA assessment cycles to approval and tentative approval by FY receipt cohort;

4. Number of applications received and refused to receive, and average time to receipt decision;

5. Number of GDUFA-related meetings and teleconferences requested, granted, denied, and conducted, broken down by type of meeting or teleconference, and in addition for Post-Warning Letter Meetings, the number deferred in favor of re-inspection;

6. Number of inspections conducted by domestic or foreign establishment location and inspection type (preapproval inspection, surveillance, bioequivalence clinical and bioequivalence analytical) and facility type (finished dosage form, API);

7. Median time from beginning of inspection to Form FDA 483 issuance;

8. Median time from Form FDA 483 issuance to Warning Letter, Import Alert and Regulatory Meeting for inspections with final classification of "Official Action Indicated" (or equivalent);

9. Median time from date of Warning Letter, Import Alert or Regulatory Meeting to resolution of the "Official Action Indicated" status (or equivalent);

10. Number of ANDAs accepted for standard assessment and priority assessment;

11. Percentage of suitability petitions completed within 6 months after FDA completes the completeness assessment, the total number submitted, and total number completed;

12. Number of citizen petitions to determine whether a listed drug has been voluntarily withdrawn from sale for reasons of safety or effectiveness pending a substantive response for more than 270 days from the date of receipt;

13. Percentage of ANDA proprietary name requests evaluated within 180 days of receipt;

14. Number of DMF First Adequate Letters issued;

15. Number of teleconferences granted, and number of email exchanges requested and conducted in lieu of teleconferences to clarify deficiencies in first cycle DMF deficiency letters;

16. Percent of PSGs for non-Complex Product NCE NDAs within two years of NDA approval;

17. Percent of PSGs for Complex Product NDAs, including NCEs, published within two and three years of NDA approval;

18. Percentage of facility re-inspections carried out within 4 or 8 months after the letter to the facility indicating FDA's intent to reinspect for domestic or foreign facilities, respectively;

19. For the total number of original ANDAs, amendments, PASs, PAS amendments, and meeting requests submitted in a fiscal year, FDA will publish the number of actions completed (as of the annual publication date), and the percent completed by the goal date. FDA also will publish this data annually on its website, further enumerated by goal-date subcategory, and will include metrics regarding timeframes for acting on meeting requests;

a. For example, in the GDUFA Performance Report, the priority PAS submission goal will be reported as the number of actions and the percent completed combined for the 4-, 8- and 10-month goals

b. For the Annual Web Posting, the priority PAS submission goals will be reported as the number of actions and the percent completed individually for the 4-, 8- and 10-month goals; and

20. Percent Controlled Correspondence Level 1 and Level 2 responded to within the applicable goal date (i.e., 60 and 120 days, respectively);

21. Number of missed goal dates for original ANDAs by more than 6, 9, and 12 months.

D. Fiscal Year Web Posting

In addition to the data that will be reported annually on the web described in section XI(C)(19), FDA will also post the following data annually on its website:

1. The number of requests for review of a DMF prior to ANDA or PAS submission, as describe in sections VI(E)(1) and VI(E)(2), the number granted, and the number completed;

2. Number of priority and non-priority "off-cycle" solicited DMF amendments reviewed as described in section VI(F); and

3. Number of original approvals taken that are Imminent Actions.

XI. DEFINITIONS

A. Act on—with respect to an application, means FDA will either issue a CRL, an approval, a tentative approval, or a refuse-to-receive action.

B. Ambiguity in the Controlled Correspondence response—means the Controlled Correspondence response or a critical portion of it merits further clarification.

C. Review Status Update—means a response from the RPM to the applicant to update the applicant concerning, at a minimum, the categorical status of relevant assessment disciplines with respect to the submission at that time. The RPM will advise the applicant that the update is preliminary only, based on the RPM's interpretation of the submission, and subject to change at any time.

D. Capacity Planning Adjustment—Methodology that annually adjusts inflation-adjusted target revenue to account for additional resource needs due to sustained increases in workload for the GDUFA program.

E. Complete Response Letter—refers to a written communication to an applicant or DMF holder from FDA usually describing all of the deficiencies that the Agency has identified in an ANDA (including pending amendments) or a DMF that must be satisfactorily addressed before the ANDA can be approved. Complete response letters will reflect a Complete Assessment, which includes an application-related facilities assessment and will require a complete response from industry to restart the clock. Refer to 21 CFR 314.110 for additional details. When a citizen petition may impact the approvability of the ANDA,

FDA will strive to address, where possible, valid issues raised in a relevant citizen petition in the complete response letter. If a citizen petition raises an issue that would delay only part of a complete response, a response that addresses all other issues will be considered a complete response.

F. Complete Assessment—refers to a full division-level assessment from all relevant assessment disciplines, including inspections, and includes other matters relating to the ANDAs and associated DMFs as well as consults with other Agency components.

G. Complex Product—generally includes:

1. Products with complex active ingredients (e.g., peptides, polymeric compounds, complex mixtures of APIs, naturally sourced ingredients); complex formulations (e.g., liposomes, colloids); complex routes of delivery (e.g., locally acting drugs such as dermatological products, complex ophthalmological products, and otic dosage forms that are formulated as suspensions, emulsions or gels) or complex dosage forms (e.g., transdermal systems, metered dose inhalers, extended release injectables)

2. Complex drug-device combination products (e.g., pre-filled auto-injector products, metered dose inhalers); and

3. Other products where complexity or uncertainty concerning the approval pathway or possible alternative approach would benefit from early scientific engagement.

H. Complex Generic Product—refers to a generic version of a Complex Product.

I. Controlled Correspondence—Level 1—means correspondence submitted to the Agency, by or on behalf of a generic drug manufacturer or related industry:

1. Requesting information on a specific element of generic drug product development:

- a. Prior to ANDA submission;
- b. After a PSG Teleconference if a prospective applicant or applicant seeks further feedback from FDA;
- c. After issuance of a CRL or tentative approval;
- d. After ANDA approval; or

2. Concerning post-approval submission requirements that are not covered by CDER post-approval changes guidance and are not specific to an ANDA.

J. Controlled Correspondence—Level 2—means correspondence that meets the definition of Level 1 correspondence, and:

1. Involves evaluation of clinical content;
2. Requests a Covered Product Authorization and review of bioequivalence protocols for development and testing that involves human clinical trials for an ANDA where the RLD is subject to a Risk Evaluation and Mitigation Strategy (REMS) with Elements to Assure Safe Use (ETASU);

3. Requests a Covered Product Authorization to obtain sufficient quantities of an individual covered product subject to a REMS with ETASU when development and testing does not involve clinical trials;

4. Requests evaluations of alternative bioequivalence approaches (e.g., pharmacokinetic, in vitro, clinical); or

5. Requires input from another office or center, e.g., questions regarding device constituent parts of a combination product.

K. Covered Product Authorization—a letter from FDA authorizing an eligible product developer to obtain sufficient quantities of an individual covered product subject to a REMS with ETASU for product development and testing purposes, as described in section 610 of Division N of the Further Consolidated Appropriations Act, 2020 (21 U.S.C. 355-2), commonly referred to as the “CREATES Act.”

L. Days—unless otherwise specified, means calendar days.

M. Discipline Review Letter—means a letter used to convey preliminary thoughts on

possible deficiencies found by a discipline assessor and/or assessment team for its portion of the pending application at the conclusion of the discipline assessment.

N. Earliest lawful ANDA approval date—the first date on which no patent or exclusivity prevents approval of an ANDA.

O. First Adequate Letter—a communication from FDA to DMF holder indicating that the DMF has no open issues related to the assessment of the referencing ANDA. This communication is issued only at the conclusion of the first DMF assessment cycle that determines the DMF does not have any open issues.

P. First Generic—any received ANDA: (1) for a First Applicant as described in section 505(j)(5)(B)(iv)(II)(bb) of the FD&C Act or for which there are no blocking patents or exclusivities; and (2) for which there is no previously approved ANDA for the drug product.

Q. Information Request—means a communication that is sent to an applicant during an assessment to request further information or clarification that is needed or would be helpful to allow completion of the discipline assessment.

R. Major Amendment—means a Major Amendment as described in the guidance for industry on ANDA Submissions Amendments to Abbreviated New Drug Applications Under GDUFA (July 2018), and any subsequent revision.

S. Mid-point of assessment cycle The midpoint of an assessment cycle is half the length of an assessment period plus or minus 30 days.

T. Minor Amendment—means a minor amendment as described in the guidance for industry on ANDA Submissions Amendments to Abbreviated New Drug Applications Under GDUFA (July 2018), and any subsequent revision.

U. Priority—means submissions affirmatively identified as eligible for expedited assessment pursuant to MAPP 5240.3, Prioritization of the Review of Original ANDAs, Amendments and Supplements, as revised (the CDER Prioritization MAPP).

V. Significant Major deficiency—means a major deficiency, the resolution of which is required before the continued assessment by multiple disciplines, e.g., a reformulation, or a major deficiency that impacts the test drug product used in a bioequivalence study.

W. Small Issue—for the purposes of Imminent Actions in section II(B)(3), means a deficiency that can be assessed by FDA within 60 days because it can be addressed by: 1) a clarification of scientific information regarding data already submitted, 2) the limited submission of additional data, or 3) the submission of administrative information (e.g., completion of a form or a change in an address).

X. Standard—means submissions not affirmatively identified as eligible for expedited assessment pursuant to the CDER Prioritization MAPP.

Y. Teleconference—means a verbal communication by telephone, and not a written response, unless otherwise agreed to by the applicant.

Z. Unsolicited Amendment—an amendment with information not requested by FDA except for those unsolicited amendments considered routine or administrative in nature that do not require scientific review (e.g., requests for final ANDA approval, patent amendments, and general correspondence).

APPENDIX: PRIORITIZATION OF SUITABILITY PETITIONS

Prior to GDUFA III, FDA received approximately 20–30 suitability petitions per year and had approximately 170 suitability peti-

tions currently pending as of July 2021. Pursuant to this Commitment Letter, in GDUFA III FDA has agreed to set goal dates for review and response to suitability petitions. To receive a goal date, pending petitions submitted prior to FY 2024 must be withdrawn and resubmitted.

If FDA does not respond to all petitions submitted in a given fiscal year, FDA has committed to prioritizing suitability petitions that are carried over to the following fiscal year over new petitions received in that fiscal year (subject to the prioritization outlined in section III(B)(6)). The following hypothetical example describes how FDA will prioritize suitability petitions if FDA is unable to respond to all suitability petitions in a given fiscal year. This example assumes a significantly higher number of incoming petitions and a high number of carryover petitions to illustrate how petitions that are carried over will be prioritized.

Example

For FY 2024, FDA's goal is to respond to 50 percent of all suitability petitions received within six months of the completeness assessment, up to a maximum of 50 suitability petitions. In FY 2024, FDA receives and performs the completeness assessment for 100 suitability petitions. To meet the goal, FDA must respond to 50 of those petitions within six months after the completeness assessment. At the end of FY 2024, FDA has responded to 50 petitions within 6 months, and 10 in greater than six months. FDA therefore met the FY 2024 goal of 50 percent within six months (i.e., 50 petitions), and the additional 40 petitions still pending roll into FY 2025.

For FY 2025, FDA's goal is to respond to 70 percent of all suitability petitions received within six months of the completeness assessment, up to a maximum of 70 suitability petitions. In FY 2025, FDA receives 40 suitability petitions. To meet the FY 2025 goal, FDA must respond to 28 of those petitions within six months of the completeness assessment. FDA will prioritize any suitability petitions received in FY 2025 prioritized as outlined in section III(B)(6) and the 40 pending petitions from FY 2024 over any other suitability petitions received in FY 2025, in that order. By the end of FY 2025, FDA has responded to all 40 petitions from the FY 2024 cohort and 28 of the 40 from FY 2025 within 6 months of the completeness assessment. Twelve petitions from the FY 2025 cohort remain pending. FDA has met the FY 2025 goal, and the remaining 12 petitions still pending will be carried over into FY 2026 and prioritized.

BIOSIMILAR BIOLOGICAL PRODUCT REAUTHORIZATION PERFORMANCE GOALS AND PROCEDURES FISCAL YEARS 2023 THROUGH 2027

I. ENSURING THE EFFECTIVENESS OF THE BIOSIMILAR BIOLOGICAL PRODUCT REVIEW PROGRAM

- A. Review Performance Goals
- B. Program for Enhanced Review Transparency and Communication for Original 351(k) BLAs
- C. Guidance
- D. Review of Proprietary Names to Reduce Medication Errors
- E. Major Dispute Resolution
- F. Clinical Holds
- G. Special Protocol Question Assessment and Agreement
- H. Meeting Management Goals

II. ENHANCING BIOSIMILAR AND INTERCHANGEABLE BIOLOGICAL PRODUCT DEVELOPMENT AND REGULATORY SCIENCE

- A. Promoting Best Practices in Communication between FDA and Sponsors During Application Review
- B. Inspections and Alternate Tools to Evaluate Facilities

C. Advancing Development of Biosimilar Biological-Device Combination Products Regulated by CDER and CBER

D. Advancing Development of Interchangeable Biosimilar Biological Products

E. Regulatory Science to Enhance the Development of Biosimilar and Interchangeable Biological Products

III. CONTINUED ENHANCEMENT OF USER FEE RESOURCE MANAGEMENT

A. Resource Capacity Planning

B. Financial Transparency

C. Management of Carryover Balance

IV. IMPROVING FDA HIRING AND RETENTION OF REVIEW STAFF

A. Set Clear Goals for Biosimilar Biological Product Review Program Hiring

B. Comprehensive and Continuous Assessment of Hiring and Retention

V. INFORMATION TECHNOLOGY GOALS

A. Develop Data and Technology Modernization Strategy

B. Monitor and Modernize Electronic Submission Gateway (ESG)

VI. DEFINITIONS AND EXPLANATION OF TERMS

BIOSIMILAR BIOLOGICAL PRODUCT AUTHORIZATION PERFORMANCE GOALS AND PROCEDURES FOR FISCAL YEARS 2023 THROUGH 2027

This document contains the performance goals and procedures for the Biosimilar User Fee Act (BsUFA) reauthorization for fiscal years (FYs) 2023–2027, known as BsUFA III. It is commonly referred to as the “goals letter” or “commitment letter.” The goals letter represents the product of FDA’s discussions with the regulated industry and public stakeholders, as mandated by Congress. The performance and procedural goals and other commitments specified in this letter apply to aspects of the biosimilar biological product review program that are important for facilitating timely access to safe and effective biosimilar medicines for patients. FDA is committed to meeting the performance goals specified in this letter, enhancing management of BsUFA resources, and ensuring BsUFA user fee resources are administered, allocated, and reported in an efficient and transparent manner.

Under BsUFA III, FDA is committed to ensuring effective scientific coordination and review consistency, as well as efficient governance and operations across the biosimilar biological product review program.

FDA and the regulated industry will periodically and regularly assess the progress of the biosimilar biological product review pro-

gram throughout BsUFA III. This will allow FDA and the regulated industry to identify emerging challenges and develop strategies to address these challenges to ensure the efficiency and effectiveness of the biosimilar biological product review program.

I. ENSURING THE EFFECTIVENESS OF THE BIOSIMILAR BIOLOGICAL PRODUCT REVIEW PROGRAM

A. REVIEW PERFORMANCE GOALS

1. Original and Resubmitted Biosimilar Biological Product Applications

a. Review and act on 90 percent of original biosimilar biological product application submissions within 10 months of the 60 day filing date.

b. Review and act on 90 percent of resubmitted original biosimilar biological product applications within 6 months of receipt.

2. Original and Resubmitted Supplemental Biosimilar Biological Product Applications

a. Review and act on the following supplements within 3 months of receipt:

i. Category A: Supplements seeking to update the labeling for a licensed biosimilar or interchangeable product with regards to safety information that has been updated in the reference product labeling and is applicable to one or more indications for which the biosimilar or interchangeable product is licensed.

b. Review and act on the following supplements within 4 months of receipt:

i. Category B: Supplements seeking licensure for an additional indication for a licensed biosimilar or interchangeable product when the submission does not include new data sets (other than analytical in vitro data obtained by use of physical, chemical and/or biological function assays, if needed to support the scientific justification for extrapolation), provided that:

1) The supplement does not seek a new route of administration, dosage form, dosage strength, formulation or presentation; and

2) If the supplement is subject to section 505B(a) of the Federal Food, Drug, and Cosmetic Act (FD&C Act), the supplement contains an up-to-date agreed initial pediatric study plan (iPSP).

ii. Category C: Supplements seeking to remove an approved indication for a licensed biosimilar or interchangeable product.

c. Review and act on the following supplements within 6 months of receipt:

i. Category D: Supplements seeking licensure for an additional indication for a li-

censed biosimilar or interchangeable product when the submission:

1) Contains new data sets (other than efficacy data, data to support a supplement seeking an initial determination of interchangeability, or only analytical in vitro data obtained by use of physical, chemical and/or biological function assays); or

2) Does not contain new data sets (other than analytical in vitro data obtained by use of physical, chemical and/or biological function assays) but is subject to section 505B(a) of the FD&C Act, and the supplement does not contain an up-to-date agreed iPSP.

d. Review and act on the following supplements within 10 months of receipt for the original submissions, and within 6 months of receipt for resubmissions:

i. Category E: Supplements seeking licensure for an additional indication for a licensed biosimilar or interchangeable product and containing efficacy data sets.

ii. Category F: Supplements seeking an initial determination of interchangeability.

e. FDA will issue a letter to the applicant for 90% of original Category A through D supplements within 60 calendar days of receipt. The letter will acknowledge receipt of the submission and provide the date for FDA to take action on the supplement.

i. Applicants may include in their cover letter a request that FDA not approve the supplement before a certain date, as long as that date is not later than the BsUFA goal date.

f. A filing letter will be issued to the applicant for 90% of original Category E and F supplements within 74 calendar days of receipt. Consistent with the underlying principles articulated in the Good Review Management Principles and Practices (GRMP) guidance, the letter will acknowledge receipt of the submission and inform the applicant of the planned review timeline and whether substantive review issues were identified. If no substantive review issues were identified during the filing review, FDA will so notify the applicant.

3. Original Manufacturing Supplements

a. Review and act on 90 percent of manufacturing supplements requiring prior approval within 4 months of receipt.

b. Review and act on 90 percent of all other manufacturing supplements within 6 months of receipt.

4. Goals Summary Tables

TABLE 1—ORIGINAL AND RESUBMITTED APPLICATIONS AND CATEGORY A–F SUPPLEMENTS

Original Biosimilar Biological Product Application Submissions	90% in 10 months of the 60 day filing date
Resubmitted Original Biosimilar Biological Product Applications	90% in 6 months of the receipt date
Category A Supplements.	
(original and resubmitted).	
	• FY 2023: 70% in 3 months of the receipt date
	• FY 2024: 80% in 3 months of the receipt date
	• FY 2025: 90% in 3 months of the receipt date
	• FY 2026: 90% in 3 months of the receipt date
	• FY 2027: 90% in 3 months of the receipt date
Category B and C Supplements.	
(original and resubmitted).	
	• FY 2023: 70% in 4 months of the receipt date
	• FY 2024: 80% in 4 months of the receipt date
	• FY 2025: 90% in 4 months of the receipt date
	• FY 2026: 90% in 4 months of the receipt date
	• FY 2027: 90% in 4 months of the receipt date
Category D Supplements.	
(original and resubmitted).	
	• FY 2023: 70% in 6 months of the receipt date
	• FY 2024: 80% in 6 months of the receipt date
	• FY 2025: 90% in 6 months of the receipt date
	• FY 2026: 90% in 6 months of the receipt date
	• FY 2027: 90% in 6 months of the receipt date
Original Category E and F Supplements	90% in 10 months of the receipt date
Resubmitted Category E and F Supplements	90% in 6 months of the receipt date

TABLE 2—MANUFACTURING SUPPLEMENTS

	Prior approval	All other
Manufacturing Supplements.	90% in 4 months of the receipt date.	90% in 6 months of the receipt date

5. Review Performance Goal Extensions

a. Major Amendments

i. A major amendment to an original application, supplement with clinical data, or re-submission of any of these applications, submitted at any time during the review cycle, may extend the goal date by three months.

ii. A major amendment may include, for example, a major new clinical study report; major re-analysis of previously submitted study(ies); submission of a risk evaluation and mitigation strategy (REMS) with elements to assure safe use (ETASU) not included in the original application; or significant amendment to a previously submitted REMS with ETASU. Generally, changes to REMS that do not include ETASU and minor changes to REMS with ETASU will not be considered major amendments.

iii. A major amendment to a manufacturing supplement submitted at any time during the review cycle may extend the goal date by two months.

iv. Only one extension can be given per review cycle.

v. Consistent with the underlying principles articulated in the Good Review Management Principles and Practices (GRMP) guidance, FDA's decision to extend the review clock should, except in rare circumstances, be limited to occasions where review of the new information could address outstanding deficiencies in the application and lead to approval in the current review cycle.

b. Inspection of Facilities Not Adequately Identified in an Original Application or Supplement

i. All original applications and supplements are expected to include a comprehensive and readily located list of all manufacturing facilities included or referenced in the application or supplement. This list provides FDA with information needed to schedule inspections of manufacturing facilities that may be necessary before approval of the original application or supplement.

ii. If, during FDA's review of an original application or supplement, the Agency identifies a manufacturing facility that was not included in the comprehensive and readily located list, the goal date may be extended.

1) If FDA identifies the need to inspect a manufacturing facility that is not included as part of the comprehensive and readily located list in an original application or supplement with clinical data, the goal date may be extended by three months.

2) If FDA identifies the need to inspect a manufacturing facility that is not included as part of the comprehensive and readily located list in a manufacturing supplement, the goal date may be extended by two months.

B. PROGRAM FOR ENHANCED REVIEW TRANSPARENCY AND COMMUNICATION FOR ORIGINAL 351(K) BLAS

To promote transparency and communication between the FDA review team and the applicant, FDA will apply the following model ("the Program") to the review of all original Biologics License Applications (BLAs) submitted under section 351(k) of the Public Health Service Act ("351(k) BLAs"), including applications that are resubmitted following a Refuse-to-File decision, received from October 1, 2022, through September 30, 2027. The goal of the Program is to promote the efficiency and effectiveness of the first cycle review process and minimize the number of review cycles necessary for approval,

ensuring that patients have timely access to safe, effective, and high quality biosimilar and interchangeable biological products.

The standard approach for the review of original 351(k) BLAs is described in this section. However, the FDA review team and the applicant may discuss and reach mutual agreement on an alternative approach to the timing and nature of interactions and information exchange between the applicant and FDA, i.e., a Formal Communication Plan for the review of the original 351(k) BLA. The Formal Communication Plan may include elements of the standard approach (e.g., a midcycle communication or a late-cycle meeting) as well as other interactions that sometimes occur during the review process (e.g., a meeting during the filing period to discuss the application, i.e., an "application orientation meeting"). If appropriate, the Formal Communication Plan should specify those elements of the Program that FDA and the sponsor agree are unnecessary for the application under review. If the review team and the applicant anticipate developing a Formal Communication Plan, the elements of the plan should be discussed and agreed to at the pre-submission meeting (see Section I.B.1) and reflected in the meeting minutes. The Formal Communication Plan may be reviewed and amended at any time based on the progress of the review and the mutual agreement of the review team and the applicant. For example, the review team and the applicant may mutually agree at any time to cancel future specified interactions in the Program (e.g., the late-cycle meeting) that become unnecessary (e.g., because previous communications between the review team and the applicant are sufficient). Any amendments made to the Formal Communication Plan should be consistent with the goal of an efficient and timely first cycle review process and not impede the review team's ability to conduct its review.

The remainder of this Section I.B. describes the parameters that will apply to FDA's review of applications in the Program.

1. Pre-submission meeting: The applicant is strongly encouraged to discuss the planned content of the application with the appropriate FDA review division at a BPD Type 4 (pre-351(k) BLA) meeting. This meeting will be attended by the FDA review team, including appropriate senior FDA staff.

a. The BPD Type 4 (pre-351(k) BLA) meeting should be held sufficiently in advance of the planned submission of the application to allow for meaningful response to FDA feedback and should generally occur not less than 2 months prior to the planned submission of the application.

b. In addition to FDA's preliminary responses to the applicant's questions, other potential discussion topics include preliminary discussions regarding the approach to developing the content for REMS, where applicable, patient labeling (e.g., Medication Guide and Instructions For Use) and, where applicable, the development of a Formal Communication Plan. These discussions will be summarized at the conclusion of the meeting and reflected in the FDA meeting minutes.

The FDA and the applicant will agree on the content of a complete application for the proposed indication(s) at the pre-submission meeting. The FDA and the applicant may also reach agreement on submission of a limited number of application components not later than 30 calendar days after the submission of the original application. These submissions must be of a type that would not be expected to materially impact the ability of the review team to begin its review. These agreements will be summarized at the conclusion of the meeting and reflected in the FDA meeting minutes.

i. Examples of application components that may be appropriate for delayed submission include; stability updates, the final audited report of a preclinical study (e.g., toxicology) where the final draft report is submitted with the original application, or a limited amount of the data from an assessment of a single transition from the reference product to the proposed biosimilar biological product, where applicable.

ii. Major components of the application (e.g., the complete analytical similarity assessment, the complete study report of a comparative clinical study or the full study report of necessary immunogenicity data) are expected to be submitted with the original application and are not subject to agreement for late submission.

2. Original application submission: Applications are expected to be complete, as agreed between the FDA review team and the applicant at the BPD Type 4 (pre-351(k) BLA) meeting, at the time of original submission of the application. If the applicant does not have a BPD Type 4 (pre-351(k) BLA) meeting with FDA, and no agreement exists between FDA and the applicant on the contents of a complete application or delayed submission of certain components of the application, the applicant's submission is expected to be complete at the time of original submission.

a. All applications are expected to include a comprehensive and readily located list of all clinical sites and manufacturing facilities included or referenced in the application.

b. Any components of the application that FDA agreed at the pre-submission meeting could be submitted after the original application are expected to be received not later than 30 calendar days after receipt of the original application.

c. Incomplete applications, including applications with components that are not received within 30 calendar days after receipt of the original submission, will be subject to a Refuse-to-File decision.

d. The following parameters will apply to applications that are subject to a Refuse-to-File decision and are subsequently filed over protest:

i. The original submission of the application will be subject to the review performance goal as described in Section I.A.1.a.

ii. The application will not be eligible for the other parameters of the Program (e.g., mid-cycle communication, late-cycle meeting).

iii. FDA generally will not review amendments to the application during any review cycle. FDA also generally will not issue information requests to the applicant during the agency's review.

iv. The resubmission goal described in Section I.A.1.b will not apply to any resubmission of the application following an FDA complete response action. Any such resubmission will be reviewed as available resources permit.

e. Since applications are expected to be complete at the time of submission, unsolicited amendments are expected to be rare and not to contain major new information or analyses. Review of unsolicited amendments, including those submitted in response to an FDA communication of deficiencies, will be handled in accordance with the GRMP guidance. This guidance includes the underlying principle that FDA will consider the most efficient path toward completion of a comprehensive review that addresses application deficiencies and leads toward a first cycle approval when possible.

3. Day 74 Letter: FDA will follow existing procedures regarding identification and communication of substantive review issues identified during the initial filing review to the applicant in the "Day 74 letter." If no

substantive review issues were identified during the filing review, FDA will so notify the applicant. FDA's filing review represents a preliminary review of the application and is not indicative of deficiencies that may be identified later in the review cycle.

For applications subject to the Program, the timeline for this communication will be within 74 calendar days from the date of FDA receipt of the original submission. The planned timeline for review of the application included in the Day 74 letter for applications in the Program will include:

- a. the planned date for the internal mid-cycle review meeting;
 - b. preliminary plans on whether to hold an Advisory Committee (AC) meeting to discuss the application;
 - c. a target date for communication of feedback from the review division to the applicant regarding proposed labeling and any postmarket requirements or postmarket commitments the Agency will be requesting.
4. Review performance goals: For original 351(k) BLA submissions that are filed by FDA under the Program, the BsUFA review clock will begin at the conclusion of the 60 calendar day filing review period that begins on the date of FDA receipt of the original submission. The review performance goals for these applications are as follows:

- a. Review and act on 90 percent of original 351(k) BLA submissions within 10 months of the 60 day filing date.
5. Mid-Cycle Communication: The FDA Regulatory Project Manager (RPM), and other appropriate members of the FDA review team (e.g., Cross Discipline Team Leader (CDTL)), will call the applicant, generally within 2 weeks following the Agency's internal mid-cycle review meeting, to provide the applicant with an update on the status of the review of their application. An agenda will be sent to the applicant prior to the mid-cycle communication. Scheduling of the internal mid-cycle review meeting will be handled in accordance with the GRMP guidance. The RPM will coordinate the specific date and time of the telephone call with the applicant.

The update should include any significant issues identified by the review team to date, any information requests, and information regarding major concerns with the following:

- a. The analytical similarity data, including the potential relevance of any issues (e.g. data analysis issues or potential clinical impact of observed analytical differences), intended to support a demonstration that the proposed biosimilar biological product is highly similar to the reference product.
- b. The data intended to support a demonstration of no clinically meaningful differences, including discussion of any immunogenicity issues.
- c. The data intended to support a demonstration of interchangeability.
- d. CMC issues.

In addition, the update should include preliminary review team thinking regarding the content of the proposed REMS, where applicable, proposed date(s) for the late-cycle meeting, updates regarding plans for the AC meeting (if an AC meeting is anticipated), and other projected milestone dates for the remainder of the review cycle.

6. Late-Cycle and Advisory Committee Meetings: A meeting will be held between the FDA review team and the applicant to discuss the status of the review of the application late in the review cycle. Late-cycle meetings will generally be face-to-face meetings; however, the meeting may be held by teleconference if FDA and the applicant agree. Since the application is expected to be complete at the time of submission, FDA intends to complete primary and secondary reviews of the application in advance of the planned late-cycle meeting.

a. FDA representatives at the late-cycle meeting are expected to include the signatory authority for the application, review team members from appropriate disciplines, and appropriate team leaders and/or supervisors from disciplines for which substantive issues have been identified in the review to date.

b. For applications that will be discussed at an Advisory Committee (AC) meeting, the following parameters apply:

- i. FDA intends to convene AC meetings no later than 2 months prior to the BsUFA goal date. The late-cycle meeting will occur not less than 12 calendar days before the date of the AC meeting.
- ii. FDA intends to provide final questions for the AC to the sponsor and the AC not less than 2 calendar days before the AC meeting.
- iii. Following an AC meeting, FDA and the applicant may agree on the need to discuss feedback from the committee for the purpose of facilitating the remainder of the review. Such a meeting will generally be held by teleconference without a commitment for formal meeting minutes issued by the agency.

c. For applications that will not be discussed at an AC meeting, the late-cycle meeting will generally occur not later than 3 months prior to the BsUFA goal date.

d. Late-Cycle Meeting Background Packages: The Agency background package for the late-cycle meeting will be sent to the applicant not less than 10 calendar days before the late-cycle meeting. The package will consist of any discipline review (DR) letters issued to date, a brief memorandum from the review team outlining substantive application issues (e.g., deficiencies identified by primary and secondary reviews), the Agency's background package for the AC meeting (incorporated by reference if previously sent to the applicant), potential questions and/or points for discussion for the AC meeting (if planned) and the current assessment of the content of proposed REMS or other risk management actions, where applicable.

e. Late-Cycle Meeting Discussion Topics: Potential topics for discussion at the late-cycle meeting include:

- i. major deficiencies identified to date;
- ii. analytical similarity data, including the potential relevance of any issues (e.g. data analysis issues or potential clinical impact of observed analytical differences), intended to support a demonstration that the proposed biosimilar biological product is highly similar to the reference product;
- iii. data intended to support a demonstration of no clinically meaningful differences, including discussion of any immunogenicity issues;
- iv. data intended to support a demonstration of interchangeability;
- v. CMC issues;
- vi. inspectional findings identified to date;
- vii. issues to be discussed at the AC meeting (if planned);
- viii. current assessment of the content of proposed REMS or other risk management actions, where applicable;
- ix. information requests from the review team to the applicant; and additional data or analyses the applicant may wish to submit.

With regard to submission of additional data or analyses, the FDA review team and the applicant will discuss whether such data will be reviewed by the Agency in the current review cycle and, if so, whether the submission will be considered a major amendment and trigger an extension of the BsUFA goal date.

7. Inspections: FDA's goal is to complete all GCP, GLP, and GMP inspections for applications in the Program within 10 months of the date of original receipt of the application. This will allow 2 months at the end of

the review cycle to attempt to address any deficiencies identified by the inspections.

C. GUIDANCE

FDA and industry share a commitment to ensuring an efficient and effective review process for all applications subject to the BsUFA program.

In light of the new, expedited timelines for supplements, FDA will issue guidance and/or a MAPP on classifying supplements to a licensed 351(k) BLA for purposes of determining review timelines. FDA will publish a draft guidance for public comment and/or a MAPP no later than the end of FY 2023. FDA will work toward the goal of publishing a revised draft or final guidance within 18 months after the close of the public comment period.

D. REVIEW OF PROPRIETARY NAMES TO REDUCE MEDICATION ERRORS

To enhance patient safety, FDA is committed to various measures to reduce medication errors related to look-alike and sound-alike proprietary names and such factors as unclear label abbreviations, acronyms, dose designations, and error prone label and packaging design. The following performance goals apply to FDA's review of biosimilar biological product proprietary names during the biosimilar biological product development (BPD) phase and during FDA's review of a marketing application:

1. Proprietary Name Review Performance Goals During The BPD Phase

- a. Review 90% of proprietary name submissions filed within 180 days of receipt. Notify sponsor of tentative acceptance or non-acceptance.
- b. In the proprietary name is found to be unacceptable, the sponsor can request reconsideration by submitting a written rebuttal with supporting data or request a meeting within 60 days to discuss the initial decision (meeting package required).
- c. If the proprietary name is found to be unacceptable, the above review performance goals also would apply to the written request for reconsideration with supporting data or the submission of a new proprietary name.
- d. A complete submission is required to begin the review clock.

2. Proprietary Name Review Performance Goals During Application Review

- a. Review 90% of biosimilar biological product proprietary name submissions filed within 90 days of receipt. Notify sponsor of tentative acceptance/nonacceptance.
- b. A supplemental review will be done meeting the above review performance goals if the proprietary name has been submitted previously (during the BPD phase) and has received tentative acceptance.
- c. If the proprietary name is found to be unacceptable, the sponsor can request reconsideration by submitting a written rebuttal with supporting data or request a meeting within 60 days to discuss the initial decision (meeting package required).
- d. If the proprietary name is found to be unacceptable, the above review performance goals apply to the written request for reconsideration with supporting data or the submission of a new proprietary name.
- e. A complete submission is required to begin the review clock.

E. MAJOR DISPUTE RESOLUTION

1. Procedure: For procedural or scientific matters involving the review of biosimilar biological product applications and supplements (as defined in BsUFA) that cannot be resolved at the signatory authority level (including a request for reconsideration by the signatory authority after reviewing any materials that are planned to be forwarded with an appeal to the next level), the response to

appeals of decisions will occur within 30 calendar days of the Center's receipt of the written appeal.

2. Performance goal: 90% of such responses are provided within 30 calendar days of the Center's receipt of the written appeal.

3. Conditions:

a. Sponsors should first try to resolve the procedural or scientific issue at the signatory authority level. If it cannot be resolved at that level, it should be appealed to the next higher organizational level (with a copy to the signatory authority) and then, if necessary, to the next higher organizational level.

b. Responses should be either verbal (followed by a written confirmation within 14 calendar days of the verbal notification) or written and should ordinarily be to either grant or deny the appeal.

c. If the decision is to deny the appeal, the response should include reasons for the denial and any actions the sponsor might take to persuade the Agency to reverse its decision.

d. In some cases, further data or further input from others might be needed to reach a decision on the appeal. In these cases, the "response" should be the plan for obtaining that information (e.g., requesting further information from the sponsor, scheduling a meeting with the sponsor, scheduling the issue for discussion at the next scheduled available advisory committee).

e. In these cases, once the required information is received by the Agency (including any advice from an advisory committee), the person to whom the appeal was made, again has 30 calendar days from the receipt of the required information in which to either deny or grant the appeal.

f. Again, if the decision is to deny the appeal, the response should include the reasons for the denial and any actions the sponsor might take to persuade the Agency to reverse its decision.

g. Note: If the Agency decides to present the issue to an advisory committee and there are not 30 days before the next scheduled advisory committee, the issue will be presented at the following scheduled committee meeting to allow conformance with advisory committee administrative procedures.

F. CLINICAL HOLDS

1. Procedure: The Center should respond to a sponsor's complete response to a clinical hold within 30 days of the Agency's receipt of the submission of such sponsor response.

2. Performance goal: 90% of such responses are provided within 30 calendar days of the Agency's receipt of the sponsor's response.

G. SPECIAL PROTOCOL QUESTION ASSESSMENT AND AGREEMENT

1. Procedure: Upon specific request by a sponsor (including specific questions that the sponsor desires to be answered), the Agency will evaluate certain protocols and related issues to assess whether the design is adequate to meet scientific and regulatory requirements identified by the sponsor.

a. The sponsor should submit a limited number of specific questions about the protocol design and scientific and regulatory requirements for which the sponsor seeks agreement (e.g., are the clinical endpoints adequate to assess whether there are clinically meaningful differences between the proposed biosimilar biological product and the reference product).

b. Within 45 days of Agency receipt of the protocol and specific questions, the Agency will provide a written response to the sponsor that includes a succinct assessment of the protocol and answers to the questions posed by the sponsor. If the Agency does not agree that the protocol design, execution plans, and data analyses are adequate to

achieve the goals of the sponsor, the reasons for the disagreement will be explained in the response.

c. Protocols that qualify for this program include any necessary clinical study or studies to prove biosimilarity and/or interchangeability (e.g., protocols for pharmacokinetics and pharmacodynamics studies, protocols for comparative clinical studies that will form the primary basis for demonstrating that there are no clinically meaningful differences between the proposed biosimilar biological product and the reference product, and protocols for clinical studies intended to support a demonstration of interchangeability). For such protocols to qualify for this comprehensive protocol assessment, the sponsor must have had a BPD Type 2b or 3 Meeting, as defined in section I.I, below, with the review division so that the division is aware of the developmental context in which the protocol is being reviewed and the questions being answered.

d. If a protocol is reviewed under the process outlined above, and agreement with the Agency is reached on design, execution, and analyses, and if the results of the trial conducted under the protocol substantiate the hypothesis of the protocol, the Agency agrees that the data from the protocol can be used as part of the primary basis for approval of the product. The fundamental agreement here is that having agreed to the design, execution, and analyses proposed in protocols reviewed under this process, the Agency will not later alter its perspective on the issues of design, execution, or analyses unless public health concerns unrecognized at the time of protocol assessment under this process are evident.

2. Performance goal: 90% of special protocols assessments and agreement requests completed and returned to sponsor within 45 days.

3. Reporting: The Agency will track and report the number of original special protocol assessments and resubmissions per original special protocol assessment.

H. MEETING MANAGEMENT GOALS

Formal BsUFA meetings between sponsors and FDA consist of Biosimilar Initial Advisory and BPD Type 1-4 meetings. These meetings are further described below.

A Biosimilar Initial Advisory Meeting is an initial assessment limited to a general discussion regarding whether licensure under section 351(k) of the Public Health Service Act may be feasible for a particular product, and, if so, general advice on the expected content of the development program. Such term does not include any meeting that involves substantive review of summary data or full study reports. Only one BIA meeting may be granted per program. While preliminary comparative analytical data from at least one lot of the proposed biosimilar or interchangeable product compared to the U.S.-licensed reference product is not required for the meeting request, sufficient information should be provided with the meeting request to enable FDA to make such a preliminary determination related to potential licensure under section 351(k) and to provide meaningful advice. This should include, as appropriate:

Identification of reference product.

The indications intended to be sought for licensure.

A comparative analytical similarity plan, including preliminary identification of the Critical Quality Attributes and planned characterization methods.

If a sponsor seeks to utilize a non-US-licensed comparator during development, the proposed bridging strategy for US-licensed reference product and that comparator should be provided.

A conceptual plan for non-clinical studies or rationale and justification of why such studies may not be needed.

A conceptual description of the planned clinical pharmacokinetics and/or pharmacodynamic study(ies), including proposed endpoints.

If the sponsor plans to conduct a comparative clinical safety and efficacy study, a conceptual plan should be provided. This would include the patient population and proposed endpoints.

Any guidance already received from other health authorities on product development.

Identification to the FDA of the regulatory status in other jurisdictions.

A BPD Type 1 Meeting is a meeting which is necessary for an otherwise stalled drug development program to proceed (e.g. meeting to discuss clinical holds, dispute resolution meeting), a special protocol assessment meeting, or a meeting to address an important safety issue.

A BPD Type 2a Meeting is a meeting focused on a narrow set of issues (e.g., often one, but not more than two issues and associated questions), requiring input from no more than 3 disciplines or review divisions. In order to request a Type 2a meeting, sponsors must first have had a BIA or other BPD meeting with the Agency. Requests could include:

Defined CMC post-approval commitments (e.g., related to analytical methods) discussing the approach in advance of conducting the study to ensure the approach is in line with the Agency's expectations.

Immunogenicity testing strategy following prior FDA recommendations/feedback.

Feedback on revised study design when revisions are based on prior FDA feedback.

A BPD Type 2b Meeting is a meeting to discuss a specific issue (e.g., proposed study design or endpoints) or questions where FDA will provide advice regarding an ongoing biosimilar biological product development program. This meeting may include substantive review of summary data, but does not include review of full study reports.

A BPD Type 3 Meeting is an in depth data review and advice meeting regarding an ongoing biosimilar biological product development program. This meeting includes substantive review of full study reports, FDA advice regarding the similarity between the proposed biosimilar biological product and the reference product, and FDA advice regarding additional studies, including design and analysis.

A BPD Type 4 Meeting is a pre-submission meeting to discuss the format and content of a complete application for an original biosimilar biological product application under the Program or supplement submitted under 351(k) of the PHS Act. The purpose of this meeting is to discuss the format and content of the planned submission and other items, including identification of those studies that the sponsor is relying on to support a demonstration of biosimilarity or interchangeability, discussion of any potential review issues identified based on the information provided, identification of the status of ongoing or needed studies to adequately address the Pediatric Research Equity Act (PREA), acquainting FDA reviewers with the general information to be submitted in the marketing application (including technical information), and discussion of the best approach to the presentation and formatting of data in the marketing application.

1. Response to Meeting Requests

a. Procedure: FDA will notify the sponsor in writing of the date, time, and place for the meeting, as well as expected Center participants following receipt of a formal meeting request and background package. Table 1 below indicates the timeframes for FDA's response to a meeting request.

TABLE 1

Meeting Type	Response Time (calendar days)
Biosimilar Initial Advisory	21
BPD Type 1	14
BPD Type 2a, 2b, 3 and 4	21

i. For Biosimilar Initial Advisory and BPD Type 2a or 2b meetings, the sponsor may request a written response to its questions, rather than a face-to-face meeting or teleconference. If a written response is deemed appropriate, FDA will notify the sponsor of the date it intends to send the written response. This date will be consistent with the timeframes specified in Table 2 below for the specific meeting type.

ii. For the BPD Type 2a meeting, while the sponsor may request a face-to-face meeting, the Agency may determine that a written response to the sponsor's questions would be the most appropriate means for providing feedback and advice to the sponsor. When it is determined that the meeting request can be appropriately addressed through a written response, FDA will notify the sponsor of the date it intends to send the written response in the Agency's response to the meeting request. This date will be consistent with the timeframe for a Type 2a meeting. If the sponsor believes a face-to-face Type 2a meeting is valuable and warranted, then the sponsor may provide a rationale in a follow-up correspondence explaining why a face-to-face meeting is valuable and warranted, and FDA will reconsider this request. If FDA agrees to grant the face-to-face format, the Agency will strive to schedule the meeting to occur within 60 days of FDA's receipt of the meeting request.

b. Performance Goal: FDA will respond to meeting requests and provide notification within the response times noted in Table 1 for 90 percent of each meeting type.

2. Scheduling Meetings

a. Procedure: FDA will schedule the meeting on the next available date at which all applicable Center personnel are available to attend, consistent with the component's other business; however, the meeting should be scheduled consistent with the type of meeting requested in Table 2. Table 2 below indicates the timeframes for FDA to schedule the meeting following receipt of a formal meeting request and background package, or in the case of a written response for Biosimilar Initial Advisory and BPD Type 2a and 2b meetings, the timeframes for the Agency to send the written response. If the requested date for any meeting type is greater than the specified timeframe, the meeting date should be within 14 calendar days of the requested date.

TABLE 2

Meeting Type	Meeting Scheduling or Written Response Time
Biosimilar Initial Advisory	75 calendar days from receipt of meeting request and background package
BPD Type 2a	60 calendar days from receipt of meeting request and background package
BPD Type 2b	90 calendar days from receipt of meeting request and background package
Meeting Scheduling Time	
BPD Type 1	30 calendar days from receipt of meeting request and background package
BPD Type 3	120 calendar days from receipt of meeting request and background package
BPD Type 4	60 calendar days from receipt of meeting request*

* Note the background package for BPD Type 4 meetings must be received no later than 14 calendar days after FDA receipt of the meeting request.

b. Performance goal:

TABLE 3

Meeting Type	Goal
BPD Type 2a	FY 2023: 50% of meetings are held or written responses are sent within the timeframe FY 2024: 60% of meetings are held or written responses are sent within the timeframe FY 2025: 70% of meetings are held or written responses are sent within the timeframe FY 2026: 80% of meetings are held or written responses are sent within the timeframe FY 2027: 90% of meetings are held or written responses are sent within the timeframe
Biosimilar Initial Advisory and BPD Type 2b, BPD Type 1, 3, and 4 ...	90% of meetings are held or written responses are sent within the timeframe 90% of meetings are held within the timeframe for each meeting type

3. Preliminary Responses

a. Procedure: The Agency will send preliminary responses to the sponsor's questions contained in the background package no later than five calendar days before the face-to-face or teleconference meeting date for BPD Type 2b and Type 3 meetings.

b. Performance goal:

TABLE 4

Meeting Type	Goal
BPD Types 2b and 3	90% of preliminary responses to questions are issued by FDA no later than five calendar days before the meeting date

4. Meeting Minutes

a. Procedure: The Agency will prepare minutes which will be available to the sponsor 30 calendar days after the meeting. The minutes will clearly outline the important agreements, disagreements, issues for further discussion, and action items from the meeting in bulleted form and need not be in great detail. Meeting minutes are not necessary if the Agency transmits a written response for Biosimilar Initial Advisory, BPD Type 2a, or 2b meetings.

b. Performance Goal: 90% of minutes are issued within 30 calendar days of the date of the meeting.

5. Conditions: For a meeting to qualify for these performance goals:

a. A written request and supporting documentation (i.e., the background package) must be submitted to the appropriate review division or office. The background package must be submitted at the same time as the written request for Biosimilar Initial Advisory, BPD Type 1, 2a, 2b and 3 meetings. For BPD Type 4 meetings, the background package must be received no later than 14 calendar days after FDA receipt of the written request.

b. The request must provide:

i. A brief statement of the purpose of the meeting, the sponsor's proposal for the type of meeting, and the sponsor's proposal for a face-to-face meeting, teleconference, or for a written response (Biosimilar Initial Advisory and BPD Type 2a and 2b meetings only);

ii. A listing of the specific objectives/outcomes the sponsor expects from the meeting;

iii. A proposed agenda, including estimated times needed for each agenda item;

iv. A list of questions, grouped by discipline (For each question there should be a brief explanation of the context and purpose of the question);

v. A listing of planned external attendees; and

vi. A listing of requested participants/disciplines representative(s) from the Center with an explanation for the request as appropriate.

vii. Suggested dates and times (e.g., morning or afternoon) for the meeting that are within or beyond the appropriate time frame of the meeting type being requested.

c. The Agency concurs that the meeting will serve a useful purpose (i.e., it is not premature or clearly unnecessary). However, requests for BPD Type 2b, 3, and 4 Meetings

will be honored except in the most unusual circumstances.

The Center may determine that a different type of meeting (i.e., Biosimilar Initial Advisory, or BPD Type 1-4) is more appropriate and it may grant a meeting of a different type than requested, which may require the payment of a biosimilar biological product development fee as described in section 744H of the Federal Food, Drug, and Cosmetic Act before the meeting will be provided. If a biosimilar biological product development fee is required under section 744H, and the sponsor does not pay the fee within the time frame required under section 744H, the meeting will be canceled. If the sponsor pays the biosimilar biological product development fee after the meeting has been cancelled due to non-payment, the time frame described in section I.I.1.a will be calculated from the date on which FDA received the payment, not the date on which the sponsor originally submitted the meeting request.

Sponsors are encouraged to consult available FDA guidance to obtain further information on recommended meeting procedures.

6. Guidance, Clarity, and Transparency

a. Guidance: By September 30, 2023, FDA will issue a revised draft of the existing draft guidance on "Formal Meetings Between the FDA and Sponsors or Applicants of BsUFA Products" with information pertaining to BIA, Type 2a, and Type 4 meetings, as well as the follow-up opportunity described below. In addition, FDA will update relevant MAPPs and SOPPs.

b. Follow-up opportunity: For all meeting types, to ensure the sponsor's understanding of FDA feedback from meeting discussions or a WRO, sponsors may submit clarifying questions to the agency. Only questions of a clarifying nature will be permitted, i.e., to confirm something in minutes or a WRO issued by FDA, rather than raising new issues or new proposals. FDA will develop criteria and parameters for permissible requests, and FDA may exercise discretion about whether requests are in-scope. The clarifying questions should be sent in writing as a "Request for Clarification" to the FDA within 20 calendar days following receipt of meeting minutes or a WRO. For questions that meet the criteria, FDA will issue a response in writing within 20 calendar days of receipt of the clarifying questions. FDA's response will reference the original meeting minutes or WRO.

c. Transparency: On or before March 31st, 2025, FDA will publish on its public webpage certain metrics regarding the new Type 2a meeting and sponsor requests for face-to-face meetings for year 1 and year 2 of BsUFA III.

II. ENHANCING BIOSIMILAR AND INTERCHANGEABLE BIOLOGICAL PRODUCT DEVELOPMENT AND REGULATORY SCIENCE

To facilitate the timely development of biosimilar and interchangeable biological products and their availability to patients, FDA will focus on enhancing communications during application review, including inspection communications, and advancing the development of combination and interchangeable products. FDA will also pilot a regulatory science program focused on enhancing regulatory decision-making and facilitating science-based recommendations in areas foundational to biosimilar and interchangeable biological development.

A. PROMOTING BEST PRACTICES IN COMMUNICATION BETWEEN FDA AND SPONSORS DURING APPLICATION REVIEW

The utilization of best practices in communication during application review are the responsibility of both industry and FDA. Efforts from both industry and FDA are needed

in order to continue advancement, improvement, and updating of best practices.

To continue to enhance communication with sponsors during biosimilar application review in BsUFA III, FDA will update relevant guidances, MAPPs and SOPPs, as appropriate, on or before December 31st, 2023 regarding best practices in communication. FDA will utilize input from the BsUFA II final assessment of the Program, FDA experiences, and discussion from a meeting with industry on best practices in FY 2022 to update the above documents, as appropriate.

B. INSPECTIONS AND ALTERNATIVE TOOLS TO EVALUATE FACILITIES

1. Enhancing Inspection Communication for Applications, not Including Supplements

FDA and industry believe enhanced communication between review teams and industry on certain pre-license inspections can facilitate an efficient application review process.

When FDA determines for an application, not including supplements, that it is necessary to conduct a pre-license inspection at a time when the product identified in the application is being manufactured, FDA's goal is to communicate its intent to inspect a manufacturing facility at least 60 days in advance of the pre-license inspection and no later than mid-cycle. FDA reserves the right to conduct manufacturing facility inspections at any time during the review cycle, whether or not FDA has communicated to the facility the intent to inspect.

2. Alternative Tools to Assess Manufacturing Facilities Named in Pending Applications

During the COVID-19 public health emergency, the FDA expanded its use of alternate tools for assessing facilities named in applications, including exercising its authority to request records and other information in advance of or in lieu of an inspection, granted per section 704(a)(4) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 374(a)). Where appropriate, the Agency also increased the use of information, including inspection reports, shared by trusted foreign regulatory partners through mutual recognition agreements and other confidentiality agreements. As FDA continues to gain experience and lessons learned from the use of these tools, FDA will communicate its thinking on the use of such methods beyond the pandemic.

On or before September 30, 2023, FDA will issue draft guidance on the use of alternative tools to assess manufacturing facilities named in pending applications (e.g., requesting existing inspection reports from other trusted foreign regulatory partners through mutual recognition and confidentiality agreements, requesting information from applicants, requesting records and other information directly from facilities and other inspected entities, and, as appropriate, utilizing new or existing technology platforms to assess manufacturing facilities). The guidance will incorporate best practices, including those in existing published documents, from the use of such tools during the COVID-19 pandemic. FDA will work towards the goal of publishing final guidance within 18 months after the close of the public comment period on the draft guidance. If, after receiving comments on the draft guidance, FDA determines that the guidance requires substantive changes on which further public comments are warranted, FDA will issue a revised draft guidance within those 18 months instead. It then will work towards publishing a final guidance within 18 months after the close of the public comment period on the revised draft guidance.

C. ADVANCING THE DEVELOPMENT OF BIOSIMILAR BIOLOGICAL-DEVICE COMBINATION PRODUCTS REGULATED BY CDER AND CBER

1. Use-Related Risk Analysis (URRA)

Sponsors employ URRA to identify the need for risk mitigation strategies and to design a human factors (HF) validation study. Based on a URRA, a sponsor may propose that a HF validation study is not needed to be submitted to support the safe and effective use of a biosimilar biologic-device combination product. FDA will establish the following procedures for review of URRAs for combination products:

a. The sponsor should submit a request for review of their URRA to their IND. The submission should include specific questions, justification that a HF validation study is not needed to be submitted including any supporting information, and scientific and regulatory requirements for which the sponsor seeks agreement.

b. Within 60 days of Agency receipt of the URRA and specific questions, the Agency will provide a written response to the sponsor that includes a succinct assessment of the URRA and answers to the questions posed by the sponsor. If the Agency does not agree that either the URRA or the sponsor's justification are adequate to support the absence of a HF validation study, the reasons for the disagreement will be explained in the response.

c. URRA submission: performance goals for FDA will be phased in, starting FY 2024 as follows:

i. By FY 2024, review and notify sponsor of agreement or non-agreement with comments for 50% of filed submissions, within 60 days of receipt of submission.

ii. By FY 2025, review and notify sponsor of agreement or non-agreement with comments for 70% of filed submissions, within 60 days of receipt of submission.

iii. By FY 2026, review and notify sponsor of agreement or non-agreement with comments for 90% of filed submissions, within 60 days of receipt of submission.

iv. By FY 2027, review and notify sponsor of agreement or non-agreement with comments for 90% of filed submissions, within 60 days of receipt of submission.

d. On or before the end of FY 2024, FDA will publish new draft or revised guidance for review staff and industry describing considerations related to biosimilar biologic-device combination products on the topics noted below.

Guidance will convey FDA's current thinking regarding how a URRA along with other information can be used to inform when the results from an HF validation study may need to be submitted to a marketing application. The guidance will provide a comprehensive, systematic and stepwise approach with examples, when applicable, to illustrate how to make this determination.

e. Sponsors may still elect to submit a URRA with a HF validation protocol and will only be subject to timelines in Section II.C.2., For Human Factor Validation Study Protocols.

2. Human Factor Validation Study Protocols

Human factors studies are conducted to evaluate the user interface of a biosimilar biologic-device combination product to eliminate or mitigate use-related hazards that may affect the safe and effective use of the combination product. Over the past decade, more combination products have been developed to deliver therapeutics via different routes of administration (e.g., parenteral, inhalation) with complex engineering designs. HF validation protocols are reviewed during the IND stage with the goal

towards developing a final finished combination product that supports the marketing application. To achieve this objective, FDA will establish the following procedures for review of HF validation study protocols:

a. The sponsor should submit a human factors protocol to the IND with specific questions, including scientific and regulatory requirements for which the sponsor seeks agreement (e.g., are the study participant groups appropriate to represent intended users, is the study endpoint adequate, are the critical tasks that should be evaluated appropriately identified).

b. Within 60 days of Agency receipt of the protocol and specific questions, the Agency will provide a written response to the sponsor that includes a succinct assessment of the protocol and answers to the questions posed by the sponsor. If the Agency does not agree that the protocol design, execution plans, and data analyses are adequate to achieve the goals of the sponsor, the reasons for the disagreement will be explained in the response.

Performance goals for FDA will be as follows:

c. Beginning in FY 2023, review and provide sponsor with written comments for 90% of human factors validation protocol submissions within 60 days of receipt of protocol submission.

D. ADVANCING DEVELOPMENT OF INTERCHANGEABLE BIOSIMILAR BIOLOGICAL PRODUCTS

FDA is committed to a focused effort to further advance the development of safe and effective interchangeable biosimilar biological products. The effort will address current needs, prospectively identify future needs and incorporate the following components:

1. Research: FDA will leverage the BsUFA III Regulatory Science Program to advance product development, assist regulatory decision-making, and support guidance development for interchangeable biosimilar products.

2. Foundational guidance development: FDA will develop foundational guidances for the development of interchangeable biosimilar biological products:

a. On or before September 30, 2025, FDA will publish a draft guidance describing considerations for developing presentations, container closure systems and device constituent parts for proposed interchangeable biosimilar biological products. FDA will work towards the goal of publishing final guidance within 18 months after the close of the public comment period on the draft guidance. If, after receiving comments on the draft guidance, FDA determines that the guidance requires substantive changes on which further public comments are warranted, FDA will issue a revised draft guidance within those 18 months instead. It will then work towards publishing a final guidance within 18 months after the close of the public comment period on the revised draft guidance.

b. On or before September 30, 2023, FDA will publish draft guidance on labeling for interchangeable biosimilar biological products. FDA will work towards the goal of publishing final guidance within 18 months after the close of the public comment period on the draft guidance. If, after receiving comments on the draft guidance, FDA determines that the guidance requires substantive changes on which further public comments are warranted, FDA will issue a revised draft guidance within those 18 months instead. It will then work towards publishing a final guidance within 18 months after the close of the public comment period on the revised draft guidance.

c. On or before September 30, 2024, FDA will publish a draft guidance on promotional

labeling and advertising considerations for interchangeable biosimilar biological products. FDA will work towards the goal of publishing final guidance within 18 months after the close of the public comment period on the draft guidance. If, after receiving comments on the draft guidance, FDA determines that the guidance requires substantive changes on which further public comments are warranted, FDA will issue a revised draft guidance within those 18 months instead. It will then work towards publishing a final guidance within 18 months after the close of the public comment period on the revised draft guidance.

d. On or before September 30, 2024, FDA will publish a draft guidance on the nature and type of information, for different reporting categories, a sponsor should provide to support post-approval manufacturing changes to approved biosimilar and interchangeable biosimilar biological products. FDA will work towards the goal of publishing final guidance within 18 months after the close of the public comment period on the draft guidance. If, after receiving comments on the draft guidance, FDA determines that the guidance requires substantive changes on which further public comments are warranted, FDA will issue a revised draft guidance within those 18 months instead. It then will work towards publishing a final guidance within 18 months after the close of the public comment period on the revised draft guidance.

3. Stakeholder Engagement: FDA will hold a scientific workshop on the development of interchangeable products to help identify future needs (e.g., guidance, research) on or before October 31, 2025. Within 12 months following the public workshop, FDA will issue a draft strategy document for public comment that outlines the specific actions the agency will take to facilitate the development of interchangeable biosimilar biological products. The strategy document may identify activities and deliverables including updating or creating new procedures, MAPPs, SOPPs, guidances, and other changes to FDA's scientific and other programs related to the topics discussed in the workshop. The strategy document will also include proposed timeframes for the specific actions outlined in the document. FDA will consider public input and will publish a final strategy document within 9 months after the close of the public comment period on the draft strategy document.

E. REGULATORY SCIENCE TO ENHANCE THE DEVELOPMENT OF BIOSIMILAR AND INTERCHANGEABLE BIOLOGICAL PRODUCTS

FDA is committed to enhancing regulatory decision-making and facilitating science-based recommendations in areas foundational to biosimilar development. Starting in FY 2023, FDA will pilot a regulatory science program broadly applicable to facilitating biosimilar and interchangeable biological product development. Project goals should not be specific to a product or product class. The pilot program will focus on two demonstration projects: (1) advancing the development of interchangeable products, and (2) improving the efficiency of biosimilar product development.

1. Advancing Development of Interchangeable Products

This demonstration project will be focused on progressing research to advance the development of interchangeable products. Specifically, this demonstration project will:

a. Investigate and evaluate the data and information (including Real World Evidence) needed to meet the safety standards for determining interchangeability under section 351(k)(4) of the PHS Act, including:

i. Investigate and evaluate informative, scientifically appropriate methodologies to assess the potential impact of differences between proposed interchangeable biosimilar and reference product presentations and container closure systems.

ii. Investigate and evaluate informative, scientifically appropriate methodologies to predict immunogenicity by advancing the knowledge of analytical (including physical, chemical and biological function assays), pharmacological and clinical correlations as relates to interchangeability.

2. Improving the Efficiency of Biosimilar Product Development

This demonstration project will be focused on progressing research to advance the efficiency of biosimilar product development, enhance regulatory decision-making based on the latest scientific knowledge, and advance the use of innovative scientific methodologies and experience with biosimilars. Specifically, this demonstration project will:

a. Review and evaluate opportunities for streamlining and targeting biosimilar product development in consideration of scientific advancements in analytical (including physical, chemical and biological function assays), and pharmacological assessments and experience with prior biosimilar product development and marketed biosimilar products.

b. Investigate and evaluate informative, scientifically appropriate methodologies to predict immunogenicity by advancing the knowledge of analytical (including physical, chemical and biological function assays), pharmacological and clinical correlations as it relates to biosimilarity.

3. Stakeholder Engagement: On or before October 31, 2025, FDA will hold a public meeting to review the progress of the demonstration projects and solicit input on future priorities. An interim report will be posted on FDA's website in advance of the public meeting. On or before September 30, 2027, a final summary report of outcomes from the pilot program will be posted on FDA's website.

4. Deliverables: Within 12 months of the completion of the demonstration projects, FDA will use the learnings from the demonstration projects to publish a comprehensive strategy document outlining specific actions the agency will take to facilitate the development of biosimilar and interchangeable biological products. The comprehensive strategy document may include updating or creating new procedures, MAPPs, SOPPs, and guidances and will also include proposed timeframes for the specific actions outlined in the document. The comprehensive strategy document will be distinct from the final summary report of the pilot program.

III. CONTINUED ENHANCEMENT OF USER FEE RESOURCE MANAGEMENT

FDA is committed to ensuring the sustainability of BsUFA program resources and to enhancing the operational agility of the BsUFA program. FDA will build on the financial enhancements included in BsUFA II and continue activities in BsUFA III to ensure optimal use of user fee resources and the alignment of staff to workload through the continued maturation and assessment of the Agency's resource capacity planning capability. FDA will also continue activities to promote transparency of the use of financial resources in support of the BsUFA program.

A. RESOURCE CAPACITY PLANNING

FDA will continue activities to mature the Agency's resource capacity planning function, including utilization of modernized time reporting, to support enhanced management of BsUFA resources in BsUFA III and help ensure alignment of user fee resources to staff workload.

1. Resource Capacity Planning Implementation

a. On or before the end of the 2nd quarter of FY 2023, FDA will publish an implementation plan that will describe how resource capacity planning and time reporting will continue to be implemented during BsUFA III. This implementation plan will address topics relevant to the maturation of resource capacity planning, including, but not limited to, detailing FDA's approach to:

i. The continued implementation of the Agency's resource capacity planning capability, including:

1) The continual improvement of the Capacity Planning Adjustment (CPA); and

2) The continual improvement of time reporting and its utilization in the CPA.

ii. The integration of resource capacity planning analyses in the Agency's resource and operational decision-making processes.

b. FDA will provide annual updates on the FDA website on the Agency's progress relative to activities detailed in this implementation plan on or before the end of the 2nd quarter of each subsequent fiscal year.

c. FDA will document in the annual BsUFA Financial Report how the CPA fee revenues are being utilized.

2. Resource Capacity Planning Assessment

On or before the end of FY 2025, an independent contractor will complete and publish an evaluation of the resource capacity planning capability. This will include an assessment of the following topics:

a. The ability of the CPA to forecast resource needs for the BsUFA program, including an assessment of the scope of the workload drivers in the CPA and their ability to represent the overall workload of the BsUFA program;

b. Opportunities for the enhancement of time reporting toward informing resource needs; and

c. The integration and utilization of resource capacity planning information within resource and operational decision-making processes of the BsUFA program.

The contractor will provide options and recommendations in the evaluation regarding the continued enhancement of the above topics as warranted. The evaluation findings and any related recommendations will be discussed at the FY 2026 BsUFA 5-year financial plan public meeting. After review of the findings and recommendations of the evaluation, FDA will, as appropriate, continue improving the resource capacity planning capability and the CPA.

B. FINANCIAL TRANSPARENCY

1. FDA will publish a BsUFA 5-year financial plan on or before the end of the 2nd quarter of FY 2023. The plan shall recognize that the retention of the strategic hiring and retention adjustment required by section 744H(b)(1)(C) of the FD&C Act is subject to renegotiation under a subsequent reauthorization of BsUFA. FDA will publish updates to the 5-year plan on or before the end of the 2nd quarter of each subsequent fiscal year. The annual updates will include the following topics:

a. The changes in the personnel compensation and benefit costs for the process for the review of biosimilar biological product applications that exceed the amounts provided by the personnel compensation and benefit costs portion of the inflation adjustment; and

b. FDA's plan for managing costs related to strategic hiring and retention after the adjustment required by section 744H(b)(1)(C) of the FD&C Act expires at the end of fiscal year 2027, given this adjustment is not intended to be reauthorized in a subsequent reauthorization of BsUFA.

2. FDA will convene a public meeting on or before the end of the 3rd quarter of each fiscal year to discuss the BsUFA 5-year financial plan and the Agency's progress in implementing resource capacity planning, including the continual improvement of the CPA and time reporting, and the integration of resource capacity planning in resource and operational decision-making processes.

C. MANAGEMENT OF CARRYOVER BALANCE

FDA is committed to reducing the carryover balance to no greater than 21 weeks of the target revenue by the end of FY 2025.

In the annual updates to the BsUFA five-year financial plan, FDA will provide updates on its progress towards implementing its plan to reduce the carryover balance as outlined in the FY 2022 BsUFA financial report and the five-year financial plan.

IV. IMPROVING FDA HIRING AND RETENTION OF REVIEW STAFF

Enhancements to the biosimilar biological product review program require that FDA hire and retain sufficient numbers and types of technical and scientific experts to efficiently conduct reviews of 351

(k) applications. During BsUFA III, the FDA will commit to do the following:

A. SET CLEAR GOALS FOR BIOSIMILAR BIOLOGICAL PRODUCT REVIEW PROGRAM HIRING

1. The BsUFA III agreement provides FDA additional user fee funding to hire additional staff for the biosimilar biological product review program in BsUFA III. FDA will set clear goals to hire the new staff outlined in Table 1.

TABLE 1

	FY 2023	FY 2024	FY 2025	FY 2026	FY 2027
CDER	14	1	0	0	0

2. FDA will report on progress against the hiring goal for BsUFA III on a quarterly basis posting updates to the FDA BsUFA Performance webpage.

B. COMPREHENSIVE AND CONTINUOUS ASSESSMENT OF HIRING AND RETENTION

The Directors of CDER and CBER will utilize a qualified, independent contractor with expertise in assessing HR operations to conduct a targeted assessment of the hiring and retention of staff for the biosimilar biological product review program. The BsUFA III assessment will be conducted under the same contract and by the same independent contractor that will conduct the assessment related to hiring and retention of staff for the human drug review program in PDUFA VII. The contractor will assess the factors that contribute to HR successes and challenges, including factors outside of FDA's control. The assessment will build upon the findings of previous evaluations conducted under BsUFA II and PDUFA VI with a focus on the changes and adjustments that have improved FDA's hiring and retention outcomes and which challenges remain. In addition to evaluating the outcomes of various hiring changes, the assessment will include metrics related to recruiting and retention in the biosimilar biological product review program, including, but not limited to, specific targeted scientific disciplines, attrition, and utilization of pay authorities. The report will include the contractor's findings and recommendations on further enhancements to hiring and retention of staff for the biosimilar biological product review program, if warranted.

The assessment will be published on FDA's website on or before June 30th, 2025 for public comment. FDA will also hold a public

meeting on or before September 30th, 2025 to discuss the report, its findings, and the Agency's specific plans to address the report recommendations.

V. INFORMATION TECHNOLOGY GOALS

Under BsUFA III, FDA will:

A. DEVELOP DATA AND TECHNOLOGY MODERNIZATION STRATEGY

FDA will progress a Data and Technology Modernization Strategy ("Strategy") that provides FDA's strategic direction for current and future state data-driven regulatory initiatives.

1. No later than Q4 FY 2023, FDA will establish a Data and Technology Modernization Strategy that reflects the vision in FDA's Technology and Data Modernization Action Plans, including:

a. outlining key areas of focus and approach including leveraging cloud technologies to support Applicant-FDA regulatory interaction;

b. articulating enterprise-wide approaches for both technology and data governance; and

c. aligning strategic initiatives in support of BsUFA review goals, drawing a line of sight between initiatives and the enterprise strategy (i.e. the agency-wide strategy also supporting components outside BsUFA).

2. The Strategy will be shared and annually updated to reflect progress and any needed adjustments. Milestones and metrics for BsUFA initiatives will be included in the updates.

B. MONITOR AND MODERNIZE ELECTRONIC SUBMISSION GATEWAY (ESG)

FDA will continue to ensure the usability and improvement of the ESG.

1. Annually, FDA will provide on the ESG website historic and current metrics on ESG performance in relation to published targets, characterizations and volume of submissions, and standards adoption and conformance.

FDA will advance the ESG cloud-based modernization with an improved architecture that supports greatly expanding data submission bandwidth and storage, while continuing to ensure its stable operation.

2. Annually, FDA will provide on the ESG website historic and current metrics on ESG performance in relation to published targets, characterizations and volume of submissions, and standards adoption and conformance.

3. By the end of FY 2025, FDA will complete ESG transition to the cloud, including set-up and integration of an enterprise Identity and Access Management solution that will streamline applicant access to FDA resources.

4. Annually, FDA will share progress against the implementation project plan.

5. FDA will engage industry to provide feedback and/or participate in pilot testing in advance of implementing significant changes that impact industry's interaction with the enterprise-wide systems.

VI. DEFINITIONS AND EXPLANATION OF TERMS

A. The term "review and act on" means the issuance of a complete action letter after the complete review of a filed complete application. The action letter, if it is not an approval, will set forth in detail the specific deficiencies and, where appropriate, the actions necessary to place the application in condition for approval.

B. A resubmitted original application is a complete response to an action letter addressing all identified deficiencies.

RECOGNIZING THE 38TH ANNIVERSARY OF ANTI-SIKH VIOLENCE IN INDIA

Mr. TOOMEY. Mr. President, as a proud member of the American Sikh

Caucus, I would like to join my Sikh friends in Pennsylvania's Sikh community and Sikhs around the world in recognizing the 38th anniversary of the November 1984 anti-Sikh violence in India.

For those of you who are not familiar, Sikhism traces its nearly 600-year history to the Punjab region of India. With nearly 30 million followers globally and 700,000 here in the U.S., Sikhism is one of the world's major religions.

Historically, Sikhs have showcased a commitment to serving individuals from all religious, cultural, and ethnic backgrounds—demonstrating their generosity and deep sense of community. During the COVID-19 pandemic, Sikh communities across Pennsylvania and the United States came together to deliver groceries, masks, and other supplies to tens of thousands of families in need no matter their race, gender, religion, or creed. In my many years serving the Commonwealth, I have personally witnessed the spirit of Sikhs and have come to better understand the Sikh tradition that is founded on equality, respect, and peace. It is clear that the presence and contributions of Sikh communities have thoroughly enriched their neighborhoods across the country.

1984 marks one of the darkest years in modern Indian history. The world watched as several violent incidents broke out among ethnic groups in India, with several notably targeting the Sikh community. Today we are here to remember the tragedy that commenced on November 1, 1984, following decades of ethnic tension between Sikhs in the Punjab province and the central Indian Government. As so often in such cases, the official estimates likely do not tell the whole story, but it is estimated that over 30,000 Sikh men, women, and children were deliberately targeted, raped, slaughtered, and displaced by mobs across India.

To prevent future human rights abuses, we must recognize their past forms. We must remember the atrocities committed against Sikhs so that those responsible may be held accountable and that this type of tragedy is not repeated against the Sikh community or other communities across the globe.

ADDITIONAL STATEMENTS

100 YEARS OF THE LEBANON AMERICAN CLUB IN DANBURY, CONNECTICUT

● Mr. BLUMENTHAL. Mr. President, today I rise to recognize the Lebanon American Club of Danbury, CT, as they celebrate 100 years of devoted cultural engagement and civic service in their community.

The Lebanon American Club—or "the Club," as it is affectionately known as by its members—was founded in 1922 as

the Syrian American Club. In its early days, this organization assisted members in becoming American citizens, learning English, and served as a vital social support system for Lebanese and Syrian immigrants. After initially meeting at various locations across Danbury, the Club established a permanent home in "Little Lebanon" on New Street in Danbury in the 1930s, before moving to its current West Street location in 1993.

Highly active in the civic and cultural life of the Arabic speaking community in Danbury, the Lebanon American Club boasted many members who were major contributors to the economic, professional, and social fabric of the region. After the election of Chicory Buzaid as Danbury City Sheriff in 1937—the first Lebanese American elected to public office in the State of Connecticut—the Club's members became more politically active as well.

From the 1940s through the 1960s, the Club's activities expanded with regular dinners, scholarship programs for students, fundraisers to aid members in need, and an annual Labor Day weekend "Mahrajan" festival celebrating their Lebanese and Syrian heritage.

In the 1970s, a new wave of Lebanese immigrants sparked a revitalization of the Lebanon American Club and their activities expanded. New Club programs were established—and continue today—including a children's Christmas party and a scholarship award dinner which has grown tremendously over the years, providing tens of thousands of dollars in college scholarships to high school graduates. Additionally, the Lebanon American Club Ladies Auxiliary routinely holds dinners and wine tastings and is a significant contributor to the Club's overall activities.

In recent years, the Lebanon American Club has continued to expand and flourish. The Lebanon American Teacher Exchange program was established in 2002, and the annual Lebanon American Day flag raising ceremony was first held the next year in 2003. In 2009, the Club established a heritage monument committee to pay tribute to their immigrant ancestors, and the monument was unveiled at city hall during the 2010 Lebanon Day celebration. The Club has continued to thrive of late, including hosting regular blood drives throughout the COVID-19 pandemic to provide lifesaving aid to the community.

For a century, the Lebanon American Club has provided cultural, civic, and social support to its members, the Lebanese community, and the Danbury community at large. I have attended many Club activities and greatly appreciate and admire their long-standing commitment to preserving and promoting their cultural heritage while selflessly serving their community through their many activities and programs. I hope my colleagues will join me in congratulating the Lebanon American Club of Danbury, CT, on this

momentous occasion of their 100th anniversary.●

TRIBUTE TO DR. JOAN PHILLIPS

Mr. MANCHIN. Mr. President, I rise today to honor the legacy of Dr. Joan Phillips for her many years of service dedicated to child well-being and to all people of West Virginia.

I have often said there is no greater accomplishment than to find yourself in a position to give back to the community you love. Dr. Phillips embodies giving, always willing to lend support and knowledge to those in need throughout her career.

Protecting and serving vulnerable people was her passion, one that motivated her throughout four decades of professional work. Dr. Phillips is viewed by her colleagues, and rightfully so, as an advocate for vulnerable children of West Virginia. Most recently serving as the co-medical director of Child Advocacy Center of Charleston Area Medical Center, her list of accomplishments is staggering, continuously pioneering child advocacy standards across the region.

As West Virginia's first ever board-certified child abuse pediatrician, Dr. Phillips has always been pivotal in ensuring that the children of our State receive the correct level of care. Over the course of her admirable career, Dr. Phillips has changed countless lives, both internally through the Child Advocacy Network and externally consulting through private practice. As a result of her efforts, she was in the first round of child abuse subspecialty recognized by the American Academy of Pediatrics.

Dr. Phillips always made time to consult on cases and never turned down the opportunity to assist regardless of location. Other physicians, law enforcement officers and child protective services workers regularly sought her expertise and advice.

Over the years, Dr. Phillips held many leadership roles, including president of the American Academy of Pediatrics, numerous boards of local and statewide organizations, community health agencies, family service agencies, as well as State and national committees related to issues regarding child well-being.

Not only did Dr. Phillips fiercely dedicate her time to advancing child healthcare, but she also found time to pass her knowledge along to others. She regularly presented at conferences, mentored other child abuse medical providers and taught within medical and residency programs at West Virginia University and Marshall University. I know she has inspired many young leaders throughout her illustrious career, and I am confident they will carry the torch to ensure a brighter tomorrow. Truly, her legacy of dedication to health and childcare services is one we should all instill in ourselves.

With an unrivaled, strong spirit of optimism and innovation, her commit-

ment to preventing and treating child abuse in our communities is something to admire. Her work has undoubtedly changed the quality of healthcare in the State of West Virginia. I will always be grateful to Dr. Phillips for her lifetime of influential work.

While she is retiring and everyone is sure to miss her strong leadership, Dr. Phillips' unwavering dedication will leave a lasting legacy on the countless lives she has touched. Again, I congratulate Dr. Phillips for her remarkable years of service and her outstanding dedication to improving our great Nation, and I am honored to wish good health and much happiness to her and her family in the days and years ahead.●

TRIBUTE TO KEVIN FERN

● 1Mr. MORAN. Mr. President, I rise today to pay tribute to a notable Kansan, Kevin Fern. Mr. Fern is currently executive director of Visit Shawnee, a division of the Shawnee Chamber of Commerce and the official Destination Marketing Organization for the city of Shawnee. He has served the city of Shawnee since 2008 and was also nominated by Governor Laura Kelly to the Kansas Council on Travel and Tourism.

Prior to his current position he spent a number of years in politics, working a variety of campaigns, including for Presidential candidate Dick Gephardt's campaign in 1988—always noting that he "wanted to be the guy behind the scenes, making everything happen." Following a number of years in campaign politics, Mr. Fern entered the hospitality industry, where he worked for more than 15 years in the hotel industry.

Mr. Fern is a long-time native of Shawnee, KS, and his passion for the city mixed with his ethos to "make our world just a little better" embodies the true Kansas spirit. I can confidently say Mr. Fern's impactful career has truly made the world and the city of Shawnee a better place.●

REMEMBERING P.J. O'ROURKE

● Mr. PORTMAN. Mr. President, I rise today in tribute to P.J. O'Rourke, one of America's greatest humorists. P.J. passed away after a brief illness earlier this year, leaving behind his beloved wife Tina and his three children, as well as countless readers who will miss the laughter and delight he brought them over a career that spanned nearly half a century.

P.J. was born 74 years ago in Toledo, OH. We are proud to call him an Ohio native. His father owned a car dealership; his mother was a homemaker. P.J. was the product of Toledo's public schools, then of Miami University in southwest Ohio. One of his English professors, spotting a unique talent, arranged a scholarship that allowed him to continue in school and get his degree in English, with honors.

In the 1970s, P.J. moved to New York. There, he became editor of the legendary satirical magazine "National Lampoon," then in its prime. After the Lampoon came stints at "Rolling Stone," the "Atlantic Monthly," and many other magazines, as well as 20 books known for their energy and wit.

Frequently, he turned his attention to American politics. Some here in Washington can still feel the sting. He even found humor in the world's trouble spots; He was in Beirut in the 1980s, Somalia and Afghanistan in the 1990s, Iraq in the 2000s.

One of my favorite P.J. O'Rourke quotes is: "Politics is a necessary evil, a necessary annoyance, a necessary conundrum." His tone was always one of mischievous irreverence, tempered by an abiding sympathy for our common humanity.

And he was never far from Toledo or from Ohio. "No Toledoan ever outgrows Toledo," he wrote several years ago, in a tribute to his hometown. He was clear-eyed about the charms of a Midwestern upbringing and blind to any imperfections.

"Toledo is better than exciting," he went on, "it's happy. Nothing is more conducive to unhappiness than taking yourself seriously, and taking yourself seriously is difficult when your baseball team is called the Mud Hens."

In truth, P.J. O'Rourke, while not taking himself too seriously, achieved much success in life—best-selling books, packed lecture halls in America and Europe, a journalistic career that took him to every corner of the world. But he never forgot he was from Toledo, from Ohio, from the heart of the country. And the country's heart always beat within him.

My fellow Buckeyes join me in bidding farewell and offering our thanks to a treasured native son.●

MESSAGE FROM THE HOUSE

ENROLLED BILL SIGNED

At 10:02 a.m., a message from the House of Representatives, delivered by Mrs. Cole, one of its reading clerks, announced that the Speaker pro tempore (Mr. RASKIN) has signed the following enrolled bill:

S. 2293. An act to amend the Robert T. Stafford Disaster Relief and Emergency Assistance Act to provide certain employment rights to reservists of the Federal Emergency Management Agency, and for other purposes.

The enrolled bill was subsequently signed by the President pro tempore (Mr. LEAHY).

ENROLLED BILLS PRESENTED

The Secretary of the Senate reported that on today, September 28, 2022, she had presented to the President of the United States the following enrolled bills:

S. 2293. An act to amend the Robert T. Stafford Disaster Relief and Emergency Assistance Act to provide certain employment

rights to reservists of the Federal Emergency Management Agency, and for other purposes.

S. 3895. An act to extend and authorize annual appropriations for the United States Commission on International Religious Freedom through fiscal year 2024.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, and were referred as indicated:

EC-5156. A communication from the Director of the Regulatory Management Division, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Thymol; Exemption from the Requirement of a Tolerance" (FRL No. 10188-01-OCSP) received in the Office of the President of the Senate on September 20, 2022; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5157. A communication from the Associate Director of the Regulatory Management Division, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Glufosinate; Pesticide Tolerances" (FRL No. 9521-01-OCSP) received in the Office of the President of the Senate on September 20, 2022; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5158. A communication from the Associate Director of the Regulatory Management Division, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Novaluron; Pesticide Tolerances" (FRL No. 10187-01-OCSP) received in the Office of the President of the Senate on September 20, 2022; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5159. A communication from the Associate Director of the Regulatory Management Division, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Oxirane, 2-methyl-, polymer with oxirane, mono-C9-11-isoalkyl ethers, C10-rich, phosphates, potassium salts; Tolerance Exemption" (FRL No. 9934-01-OCSP) received in the Office of the President of the Senate on September 20, 2022; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5160. A communication from the Associate Director of the Regulatory Management Division, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Eugenol; Exemption from the Requirement of a Tolerance" (FRL No. 10130-01-OCSP) received in the Office of the President of the Senate on September 20, 2022; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5161. A communication from the Director of the Regulatory Management Division, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "IN-11470: Styrene, copolymers with acrylic acid and/or methacrylic acid, with none and/or one or more monomers or polymers; Tolerance Exemption Amendment" (FRL No. 10099-01-OCSP) received in the Office of the President of the Senate on September 20, 2022; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5162. A communication from the Director of the Regulatory Management Division, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "IN-11645: Oxirane, 2-(phenoxyethyl)-, polymer with oxirane, onobutyl ether, block (A CI); Tolerance Exemption" (FRL No. 10122-01-OCSP) received

in the Office of the President of the Senate on September 20, 2022; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5163. A communication from the Director of the Regulatory Management Division, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Pesticides; Expansion of Crop Grouping Program VI" ((RIN2070-AJ28) (FRL No. 5031-13-OCSP)) received in the Office of the President of the Senate on September 20, 2022; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5164. A communication from the Associate Director of the Regulatory Management Division, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Hypochlorous Acid; Exemption from the Requirement of a Tolerance" (FRL No. 10167-01-OCSP) received in the Office of the President of the Senate on September 20, 2022; to the Committee on Agriculture, Nutrition, and Forestry.

EC-5165. A communication from the Chairman, Farm Credit System Insurance Corporation, transmitting, pursuant to law, the Corporation's annual report for calendar year 2021; to the Committee on Agriculture, Nutrition, and Forestry.

other weapons from the definition of firearms for purposes of the National Firearms Act, and for other purposes; to the Committee on Finance.

By Mr. GRASSLEY:

S. 4987. A bill to require certain nonprofit and not-for-profit social welfare organizations to submit disclosure reports on foreign funding to the Attorney General, and for other purposes; to the Committee on the Judiciary.

By Mr. OSSOFF (for himself, Mr. BRAUN, and Mr. DURBIN):

S. 4988. A bill to establish an inspections regime for the Bureau of Prisons, and for other purposes; to the Committee on the Judiciary.

By Ms. ERNST:

S. 4989. A bill to amend title 10, United States Code, to include additional special considerations for developing and implementing the energy performance goals and energy performance master plan of the Department of Defense and to require a report on the feasibility of terminating energy procurement from foreign entities of concern; to the Committee on Armed Services.

By Mr. TILLIS (for himself and Mr. BURR):

S. 4990. A bill to amend title 40, United States Code, to increase the mileage of the Appalachian Development Highway System to provide for improvements to and expansion of Corridor K in North Carolina, and for other purposes; to the Committee on Environment and Public Works.

By Mr. LEE:

S. 4991. A bill to prevent the distribution of intimate visual depictions without consent; to the Committee on the Judiciary.

By Mr. SCOTT of South Carolina (for himself and Mr. WARNER):

S. 4992. A bill to amend the Securities Act of 1933 to extend the maximum period for which a company can be an emerging growth company from 5 years to 10 years; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. HEINRICH:

S. 4993. A bill to authorize the Secretary of Education to award grants for outdoor learning spaces and to develop living schoolyards; to the Committee on Health, Education, Labor, and Pensions.

By Mr. LANKFORD:

S. 4994. A bill to amend the Federal Reserve Act to prohibit the Board of Governors of the Federal Reserve System from discontinuing Federal Reserve notes if a central bank digital currency is issued, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. HEINRICH (for himself and Mr. DAINES):

S. 4995. A bill to require the Secretary of Agriculture and the Secretary of the Interior to prioritize the completion of the Continental Divide National Scenic Trail, and for other purposes; to the Committee on Energy and Natural Resources.

By Mrs. SHAHEEN (for herself and Mr. GRAHAM):

S. 4996. A bill to amend the National Defense Authorization Act for Fiscal Year 2020 to modify the establishment of a coordinator for detained ISIS members and relevant displaced populations in Syria, and for other purposes; to the Committee on Foreign Relations.

By Mr. LEE:

S. 4997. A bill to prohibit agencies of the government from soliciting or entering into agreements with nongovernmental organizations to conduct voter registration or voter mobilization activities on the property or website of the agency or from using Federal funds to carry out activities directed under Executive Order 14019, and for other purposes; to the Committee on Rules and Administration.

By Ms. DUCKWORTH (for herself, Mr. CASEY, Mr. SCHATZ, and Mr. MARKEY):

S. 4998. A bill to establish uniform accessibility standards for websites and applications of employers, employment agencies, labor organizations, joint labor-management committees, public entities, public accommodations, testing entities, and commercial providers, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

By Mr. LEE:

S. 4999. A bill to provide exemptions from certain Jones Act restrictions to vessels providing disaster relief to Puerto Rico for the areas affected by Hurricane Fiona; to the Committee on Commerce, Science, and Transportation.

By Mr. LEE:

S. 5000. A bill to amend title 5, United States Code, to prohibit investments under the Thrift Savings Plan in certain mutual funds that make investment decisions based primarily on environmental, social, or governance criteria, and for other purposes; to the Committee on Homeland Security and Governmental Affairs.

By Mr. HEINRICH (for himself, Mr. HOEVEN, and Mr. LUJAN):

S. 5001. A bill to amend the Communications Act of 1934 to improve access by Indian Tribes to support from universal service programs of the Federal Communications Commission, and for other purposes; to the Committee on Indian Affairs.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Ms. HIRONO (for herself and Mr. SCHATZ):

S. Res. 801. A resolution recognizing the 50th anniversary of the establishment of Hanalei National Wildlife Refuge and Pearl Harbor National Wildlife Refuge in the State of Hawaii; to the Committee on Environment and Public Works.

By Mr. GRAHAM (for himself and Mr. BLUMENTHAL):

S. Res. 802. A resolution condemning any attempts by Russia to claim sovereignty over any portion of Ukraine; to the Committee on Foreign Relations.

By Mr. COONS (for himself, Mr. LANKFORD, Mr. RISCH, Mrs. SHAHEEN, Mr. BOOKER, Mr. KAINE, Mr. CARDIN, Mr. HICKENLOOPER, Mr. VAN HOLLEN, Mr. BLUMENTHAL, Mr. PETERS, Mrs. MURRAY, Mr. SANDERS, Mr. DURBIN, Ms. ROSEN, Mrs. FEINSTEIN, Mr. PADILLA, Mr. BROWN, Mr. BENNET, Mrs. GILLIBRAND, Mr. MURPHY, Mr. MORAN, Ms. COLLINS, Mr. CASSIDY, Mrs. FISCHER, Mr. TILLIS, Mr. DAINES, Mr. BRAUN, Mr. BOOZMAN, Mr. SULIVAN, Mr. BLUNT, Mr. INHOFE, Mr. ROMNEY, Mrs. BLACKBURN, Ms. ERNST, Mr. CRUZ, Mr. CORNYN, Mrs. CAPITO, Mr. COTTON, Mr. GRAHAM, and Mr. MARKEY):

S. Res. 803. A resolution condemning the detention and death of Mahsa Amini and calling on the Government of Iran to end its systemic persecution of women; to the Committee on Foreign Relations.

By Mr. MANCHIN (for himself, Mr. SCOTT of South Carolina, Mr. REED, Mr. CASEY, Mrs. CAPITO, Mr. GRAHAM, and Mr. HAWLEY):

S. Res. 804. A resolution designating September 2022 as "National Childhood Cancer Awareness Month"; considered and agreed to.

By Mr. SCHATZ (for himself, Mr. WICKER, Mr. CARDIN, Mr. THUNE, Mr. WARNER, and Mrs. HYDE-SMITH):

S. Res. 805. A resolution supporting the designation of the week of September 18 through September 24, 2022 as "Telehealth Awareness Week"; considered and agreed to.

By Ms. CORTEZ MASTO (for herself and Ms. ROSEN):

S. Res. 806. A resolution commending and congratulating the Las Vegas Aces basketball team on winning the 2022 Women's National Basketball Association championship; considered and agreed to.

By Mr. HOEVEN (for himself, Mr. HEINRICH, Mr. MORAN, Mr. THUNE, Mr. CRAMER, Mr. BRAUN, Mr. INHOFE, Mr. MARSHALL, Ms. SMITH, Ms. LUMMIS, Mr. LUJAN, Mr. BENNET, Mr. PORTMAN, Mr. BOOZMAN, and Mr. TESTER):

S. Res. 807. A resolution designating November 5, 2022, as "National Bison Day"; considered and agreed to.

ADDITIONAL COSPONSORS

S. 445

At the request of Ms. HASSAN, the name of the Senator from Nevada (Ms. ROSEN) was added as a cosponsor of S. 445, a bill to amend section 303(g) of the Controlled Substances Act (21 U.S.C. 823(g)) to eliminate the separate registration requirement for dispensing narcotic drugs in schedule III, IV, or V, such as buprenorphine, for maintenance or detoxification treatment, and for other purposes.

S. 766

At the request of Ms. CORTEZ MASTO, the name of the Senator from Oregon (Mr. MERKLEY) was added as a cosponsor of S. 766, a bill to amend the Internal Revenue Code of 1986 to allow an above-the-line deduction for attorney fees and costs in connection with consumer claim awards.

S. 864

At the request of Mr. KAINE, the name of the Senator from New Jersey (Mr. BOOKER) was added as a cosponsor of S. 864, a bill to extend Federal Pell Grant eligibility of certain short-term programs.

S. 1024

At the request of Mr. DURBIN, the name of the Senator from California (Mr. PADILLA) was added as a cosponsor of S. 1024, a bill to enhance our Nation's nurse and physician workforce during the COVID-19 crisis by recapturing unused immigrant visas.

S. 1079

At the request of Mr. HEINRICH, the names of the Senator from Connecticut (Mr. MURPHY) and the Senator from Colorado (Mr. HICKENLOOPER) were added as cosponsors of S. 1079, a bill to award a Congressional Gold Medal to the troops from the United States and the Philippines who defended Bataan and Corregidor, in recognition of their personal sacrifice and service during World War II.

S. 1216

At the request of Mr. GRASSLEY, the name of the Senator from Nevada (Ms. CORTEZ MASTO) was added as a cospon-

sor of S. 1216, a bill to extend the temporary scheduling order for fentanyl-related substances.

S. 1408

At the request of Mr. MARKEY, the names of the Senator from Nevada (Ms. ROSEN) and the Senator from Hawaii (Ms. HIRONO) were added as cosponsors of S. 1408, a bill to posthumously award the Congressional Gold Medal, collectively, to Glen Doherty, Tyrone Woods, J. Christopher Stevens, and Sean Smith, in recognition of their contributions to the Nation.

S. 1457

At the request of Mr. MARKEY, the name of the Senator from Oregon (Mr. WYDEN) was added as a cosponsor of S. 1457, a bill to establish programs to address addiction and overdoses caused by illicit fentanyl and other opioids, and for other purposes.

S. 1670

At the request of Ms. ERNST, the name of the Senator from Alaska (Ms. MURKOWSKI) was added as a cosponsor of S. 1670, a bill to amend the Internal Revenue Code of 1986 to provide a non-refundable credit for working family caregivers.

S. 1793

At the request of Mr. MANCHIN, the names of the Senator from Arkansas (Mr. BOOZMAN) and the Senator from New Hampshire (Ms. HASSAN) were added as cosponsors of S. 1793, a bill to amend title XXVII of the Public Health Service Act to improve health care coverage under vision and dental plans, and for other purposes.

S. 1893

At the request of Mr. TESTER, the name of the Senator from Arizona (Ms. SINEMA) was added as a cosponsor of S. 1893, a bill to amend title XVIII of the Social Security Act to support rural residency training funding that is equitable for all States, and for other purposes.

S. 2287

At the request of Ms. BALDWIN, the names of the Senator from Ohio (Mr. BROWN), the Senator from Illinois (Mr. DURBIN) and the Senator from Connecticut (Mr. MURPHY) were added as cosponsors of S. 2287, a bill to improve Federal population surveys by requiring the collection of voluntary, self-disclosed information on sexual orientation and gender identity in certain surveys, and for other purposes.

S. 2981

At the request of Ms. BALDWIN, her name was added as a cosponsor of S. 2981, a bill to amend the National Housing Act to establish a mortgage insurance program for first responders, and for other purposes.

S. 3357

At the request of Mr. BOOKER, the names of the Senator from New Hampshire (Mrs. SHAHEEN), the Senator from Connecticut (Mr. BLUMENTHAL) and the Senator from Vermont (Mr. LEAHY) were added as cosponsors of S. 3357, a bill to substantially restrict the use of animal testing for cosmetics.

S. 3531

At the request of Mr. COONS, the name of the Senator from California (Mr. PADILLA) was added as a cosponsor of S. 3531, a bill to require the Federal Government to produce a national climate adaptation and resilience strategy, and for other purposes.

S. 3638

At the request of Mr. DURBIN, the names of the Senator from Washington (Ms. CANTWELL) and the Senator from Connecticut (Mr. MURPHY) were added as cosponsors of S. 3638, a bill to provide lawful permanent resident status for certain advanced STEM degree holders, and for other purposes.

S. 3678

At the request of Mr. WARNOCK, the name of the Senator from Montana (Mr. TESTER) was added as a cosponsor of S. 3678, a bill to authorize the National Detector Dog Training Center, and for other purposes.

S. 3855

At the request of Mr. LUJAN, the names of the Senator from California (Mrs. FEINSTEIN) and the Senator from Wisconsin (Ms. BALDWIN) were added as cosponsors of S. 3855, a bill to amend section 7014 of the Elementary and Secondary Education Act of 1965 to advance toward full Federal funding for impact aid, and for other purposes.

S. 3972

At the request of Mr. BOOKER, the names of the Senator from Georgia (Mr. WARNOCK) and the Senator from West Virginia (Mrs. CAPITO) were added as cosponsors of S. 3972, a bill to improve research and data collection on stillbirths, and for other purposes.

S. 4168

At the request of Mr. PORTMAN, the name of the Senator from California (Mr. PADILLA) was added as a cosponsor of S. 4168, a bill to amend title 54, United States Code, to reauthorize the National Park Foundation.

S. 4295

At the request of Mr. CRAPO, the name of the Senator from South Carolina (Mr. SCOTT) was added as a cosponsor of S. 4295, a bill to amend securities and banking laws to make the information reported to financial regulatory agencies electronically searchable, to further enable the development of regulatory technologies and artificial intelligence applications, to put the United States on a path towards building a comprehensive Standard Business Reporting program to ultimately harmonize and reduce the private sector's regulatory compliance burden, while enhancing transparency and accountability, and for other purposes.

S. 4325

At the request of Ms. SINEMA, the names of the Senator from Nevada (Ms. ROSEN) and the Senator from Alaska (Ms. MURKOWSKI) were added as cosponsors of S. 4325, a bill to amend the Federal Credit Union Act to modify the frequency of board of directors meetings, and for other purposes.

S. 4505

At the request of Mr. ROUNDS, the name of the Senator from Michigan (Mr. PETERS) was added as a cosponsor of S. 4505, a bill to amend title 38, United States Code, to improve the program for direct housing loans made to Native American veterans, and for other purposes.

S. 4565

At the request of Mr. BOOZMAN, the name of the Senator from Nevada (Ms. ROSEN) was added as a cosponsor of S. 4565, a bill to amend title 38, United States Code, to repeal the copayment requirement for recipients of Department of Veterans Affairs payments or allowances for beneficiary travel, and for other purposes.

S. 4573

At the request of Ms. COLLINS, the names of the Senator from Minnesota (Ms. KLOBUCHAR), the Senator from Missouri (Mr. BLUNT), the Senator from Arizona (Mr. KELLY) and the Senator from Kentucky (Mr. McCONNELL) were added as cosponsors of S. 4573, a bill to amend title 3, United States Code, to reform the Electoral Count Act, and to amend the Presidential Transition Act of 1963 to provide clear guidelines for when and to whom resources are provided by the Administrator of General Services for use in connection with the preparations for the assumption of official duties as President or Vice President.

S. 4649

At the request of Mr. CASEY, the names of the Senator from Ohio (Mr. BROWN) and the Senator from Iowa (Mr. GRASSLEY) were added as cosponsors of S. 4649, a bill to amend the Global Food Security Act of 2016 to improve the comprehensive strategic approach for United States foreign assistance to developing countries to reduce global poverty and hunger, achieve food and nutrition security, promote inclusive, sustainable, agricultural-led economic growth, improve nutritional outcomes, especially for women and children, build resilience among vulnerable populations, and for other purposes.

S. 4702

At the request of Mr. KAINE, the name of the Senator from Hawaii (Ms. HIRONO) was added as a cosponsor of S. 4702, a bill to impose limits on excepting competitive service positions from the competitive service, and for other purposes.

S. 4709

At the request of Mr. LUJAN, the name of the Senator from Kansas (Mr. MARSHALL) was added as a cosponsor of S. 4709, a bill to direct the Secretary of Agriculture to amend regulations to allow for certain packers to have an interest in market agencies, and for other purposes.

S. 4717

At the request of Mr. BENNET, the name of the Senator from Nevada (Ms. ROSEN) was added as a cosponsor of S. 4717, a bill to authorize the Director of the Bureau of Land Management and

the Director of the National Park Service to carry out activities to control the movement of aquatic invasive species into, across, and out of Federal land and waters, to provide for financial assistance from the Commissioner of Reclamation to Reclamation States for watercraft inspection and decontamination stations, to amend the Nonindigenous Aquatic Nuisance Prevention and Control Act of 1990 to make certain technical corrections, and for other purposes.

S. 4837

At the request of Mr. WYDEN, the name of the Senator from Oregon (Mr. MERKLEY) was added as a cosponsor of S. 4837, a bill to amend the Omnibus Public Land Management Act of 2009 to establish within the Mount Hood National Forest in the State of Oregon Indian Treaty Resources Emphasis Zones, and for other purposes.

S. 4840

At the request of Mr. GRAHAM, the names of the Senator from North Dakota (Mr. HOEVEN) and the Senator from Mississippi (Mrs. HYDE-SMITH) were added as cosponsors of S. 4840, a bill to amend title 18, United States Code, to protect pain-capable unborn children, and for other purposes.

S. 4867

At the request of Mr. LUJAN, the name of the Senator from Ohio (Mr. BROWN) was added as a cosponsor of S. 4867, a bill to provide enhanced student loan relief to educators.

S. 4876

At the request of Mr. DAINES, his name was added as a cosponsor of S. 4876, a bill to punish the distribution of fentanyl resulting in death as felony murder.

At the request of Mr. MARSHALL, his name was added as a cosponsor of S. 4876, *supra*.

S. 4882

At the request of Mr. PETERS, the names of the Senator from Delaware (Mr. CARPER) and the Senator from Maine (Ms. COLLINS) were added as cosponsors of S. 4882, a bill to amend the Federal Fire Prevention and Control Act of 1974 to authorize appropriations for the United States Fire Administration and firefighter assistance grant programs.

S. 4892

At the request of Mr. SCOTT of South Carolina, the names of the Senator from Florida (Mr. SCOTT), the Senator from Idaho (Mr. RISCH), the Senator from Idaho (Mr. CRAPO) and the Senator from Mississippi (Mrs. HYDE-SMITH) were added as cosponsors of S. 4892, a bill to require elementary and middle schools that receive Federal funds to obtain parental consent before changing a minor child's gender markers, pronouns, or preferred name on any school form, allowing a child to change the child's sex-based accommodations, including locker rooms or bathrooms.

S. CON. RES. 10

At the request of Ms. STABENOW, the name of the Senator from Arizona (Ms.

SINEMA) was added as a cosponsor of S. Con. Res. 10, a concurrent resolution expressing the sense of Congress that tax-exempt fraternal benefit societies have historically provided and continue to provide critical benefits to the people and communities of the United States.

S. RES. 774

At the request of Mr. GRASSLEY, the names of the Senator from Florida (Mr. SCOTT), the Senator from Mississippi (Mrs. HYDE-SMITH), the Senator from Maine (Ms. COLLINS) and the Senator from Wyoming (Mr. BARRASSO) were added as cosponsors of S. Res. 774, a resolution designating September 2022 as National Democracy Month as a time to reflect on the contributions of the system of government of the United States to a more free and stable world.

AMENDMENT NO. 5524

At the request of Mr. DURBIN, the name of the Senator from Nevada (Ms. ROSEN) was added as a cosponsor of amendment No. 5524 intended to be proposed to H.R. 7900, to authorize appropriations for fiscal year 2023 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, and for other purposes.

AMENDMENT NO. 5546

At the request of Mr. LANKFORD, the name of the Senator from Arizona (Ms. SINEMA) was added as a cosponsor of amendment No. 5546 intended to be proposed to H.R. 7900, to authorize appropriations for fiscal year 2023 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, and for other purposes.

AMENDMENT NO. 5585

At the request of Mr. CORNYN, the name of the Senator from Nevada (Ms. ROSEN) was added as a cosponsor of amendment No. 5585 intended to be proposed to H.R. 7900, to authorize appropriations for fiscal year 2023 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, and for other purposes.

AMENDMENT NO. 5601

At the request of Mrs. FEINSTEIN, the names of the Senator from Colorado (Mr. HICKENLOOPER) and the Senator from Arizona (Ms. SINEMA) were added as cosponsors of amendment No. 5601 intended to be proposed to H.R. 7900, to authorize appropriations for fiscal year 2023 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, and for other purposes.

AMENDMENT NO. 5639

At the request of Mr. WARNOCK, the name of the Senator from California

(Mrs. FEINSTEIN) was added as a cosponsor of amendment No. 5639 intended to be proposed to H.R. 7900, to authorize appropriations for fiscal year 2023 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, and for other purposes.

AMENDMENT NO. 5640

At the request of Mr. WARNOCK, the name of the Senator from New Jersey (Mr. BOOKER) was added as a cosponsor of amendment No. 5640 intended to be proposed to H.R. 7900, to authorize appropriations for fiscal year 2023 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, and for other purposes.

AMENDMENT NO. 5643

At the request of Mr. WARNOCK, the name of the Senator from Colorado (Mr. HICKENLOOPER) was added as a cosponsor of amendment No. 5643 intended to be proposed to H.R. 7900, to authorize appropriations for fiscal year 2023 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, and for other purposes.

AMENDMENT NO. 5706

At the request of Mr. CRUZ, the name of the Senator from Texas (Mr. CORNYN) was added as a cosponsor of amendment No. 5706 intended to be proposed to H.R. 7900, to authorize appropriations for fiscal year 2023 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, and for other purposes.

AMENDMENT NO. 5707

At the request of Mr. CRUZ, the name of the Senator from Florida (Mr. RUBIO) was added as a cosponsor of amendment No. 5707 intended to be proposed to H.R. 7900, to authorize appropriations for fiscal year 2023 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, and for other purposes.

AMENDMENT NO. 5709

At the request of Mr. CRUZ, the name of the Senator from Montana (Mr. DAINES) was added as a cosponsor of amendment No. 5709 intended to be proposed to H.R. 7900, to authorize appropriations for fiscal year 2023 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, and for other purposes.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. THUNE (for himself and Mr. CARDIN):

S. 4969. A bill to amend the Internal Revenue Code of 1986 to disallow a deduction for charitable contributions for certain purposes relating to college athletics; to the Committee on Finance.

Mr. THUNE. Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

Mr. THUNE. Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 4969

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Athlete Opportunity and Taxpayer Integrity Act".

SEC. 2. DISALLOWANCE OF DEDUCTION FOR CONTRIBUTIONS FOR CERTAIN PURPOSES RELATING TO COLLEGE ATHLETICS.

(a) IN GENERAL.—Section 170 of the Internal Revenue Code of 1986 is amended by redesignating subsections (p) and (q) as subsections (q) and (r), respectively, and by inserting after subsection (o) the following new subsection:

“(p) CONTRIBUTIONS FOR CERTAIN PURPOSES RELATING TO COLLEGE ATHLETICS.—

“(1) IN GENERAL.—No deduction shall be allowed for any contribution any portion of which is used by the donee to compensate 1 or more secondary or post-secondary school athletes for the use of their name, image, or likeness by reason of their status as athletes.

“(2) EXCEPTION.—Paragraph (1) shall not apply to any contribution made directly to an organization which is an eligible educational institution (as defined in section 25A(f)(2)).”

(b) CONFORMING AMENDMENT.—Section 63(b)(4) of the Internal Revenue Code of 1986 is amended by striking “170(p)” and inserting “170(q)”.’

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to contributions made in taxable years beginning after the date of the enactment of this Act.

By Mr. PADILLA (for himself, Ms. WARREN, Mr. LUJÁN, and Mr. DURBIN):

S. 4974. A bill to amend section 249 of the Immigration and Nationality Act to render available to certain long-term residents of the United States the benefit under that section; to the Committee on the Judiciary.

Mr. PADILLA. Mr. President, I rise to introduce the Renewing Immigration Provisions of the Immigration Act of 1929 Act.

There are currently 11 million non-citizens in the United States. It is not feasible or productive to remove all them. The vast majority of these non-citizens have established roots in the United States and are law-abiding citizens. They have made contributions to

their communities and have served as essential workers during the pandemic. Leaving them without a path to permanent residence denies them the opportunity to become full participants in our society.

This legislation would ensure that long-term residents who have lived in the United States continuously for at least 7 years are able to apply for lawful permanent residence.

The Renewing Immigration Provisions of the Immigration Act of 1929 Act would amend the existing registry statute in the Immigration and Nationality Act by establishing a rolling cutoff date of 7 years prior to the date that an immigrant files an application to register permanent or adjusted status.

This bill would ensure that long-term residents already in the United States who have been waiting for a visa number to become available for over 7 years can immediately file an application to register permanent or adjust status.

This legislation also provides a much needed pathway to a green card for Dreamers and forcibly displaced citizens, such as TPS holders, who have been in legal limbo for many years.

Finally, the bill would preempt the need for further congressional action by making the eligibility cutoff rolling, instead of tying it to a specific date, as it is now.

Advancing the registry date is not unprecedented. Congress has updated the registry in a bipartisan fashion four times since it was first codified in 1929. As a result of the 1958 changes, the registry mechanism became available to immigrants who had entered the country improperly or who had overstayed or who violated the terms of a temporary period of entry. With this change, Congress intended the registry to be a mechanism for noncitizens to adjust to lawful permanent resident status.

Currently, the eligibility cutoff date is January 1, 1972, more than 50 years ago. Fewer and fewer immigrants are able to meet this cutoff entry date requirement, rendering this provision all but useless. From 2015 to 2019 only 305 individuals were able to adjust their status based on the registry, down from 58,914 from 1985 to 1989.

It is imperative that we provide immigrants who have been living with uncertainty about their futures a path to permanent residence status.

SUBMITTED RESOLUTIONS

SENATE RESOLUTION 801—RECOGNIZING THE 50TH ANNIVERSARY OF THE ESTABLISHMENT OF HANALEI NATIONAL WILDLIFE REFUGE AND PEARL HARBOR NATIONAL WILDLIFE REFUGE IN THE STATE OF HAWAII

Ms. HIRONO (for herself and Mr. SCHATZ) submitted the following reso-

lution; which was referred to the Committee on Environment and Public Works:

S. RES. 801

Whereas, on October 17, 1972, Pearl Harbor National Wildlife Refuge was established as mitigation for the construction of the Honolulu International Airport Reef Runway;

Whereas effective management of Pearl Harbor National Wildlife Refuge has necessitated partnerships between the U.S. Fish and Wildlife Service, the Navy, the Federal Aviation Administration, the State of Hawaii, and several private conservation organizations, as well as the general public;

Whereas Pearl Harbor National Wildlife Refuge protects some of the last remaining wetlands on Oahu and is home to threatened and endangered wildlife and plants;

Whereas the Honouliuli and Waiawa units of Pearl Harbor National Wildlife Refuge are managed under a cooperative agreement with the Navy to provide wetland habitat for 4 endangered waterbirds: the aeo (Hawaiian stilt), the alae keokeo (Hawaiian coot), the alae ula (Hawaiian moorhen), and the koloa maoli (Hawaiian duck);

Whereas the Honouliuli unit of Pearl Harbor National Wildlife Refuge has served as a conservation site for the endangered endemic Ko oloa ula shrub (*Abutilon menziesii*) since its translocation there in 2002 and 2003;

Whereas the Kalaeloa unit of Pearl Harbor National Wildlife Refuge was established in 2001 to protect and enhance the habitat for 2 endangered plants, the akoko and the ewa hinahina, and is home to the largest and second largest populations of these plants, respectively;

Whereas all 3 units of Pearl Harbor National Wildlife Refuge are closed to the general public to protect endangered wildlife but provide educational and volunteer opportunities during the nonbreeding season of the aeo;

Whereas the Honouliuli unit of Pearl Harbor National Wildlife Refuge serves as the site of the wetlands education program conducted by the Hawaii Nature Center, bringing more than 4,000 third-grade students to the Honouliuli unit during the fall semester to learn about the recovery of Hawaii's waterbirds and the value of wetlands;

Whereas Hanalei National Wildlife Refuge was established under the Endangered Species Conservation Act of 1969 (Public Law 89-669; 80 Stat. 926) on November 30, 1972, to aid in the recovery of threatened and endangered species, including the aeo, the alae keokeo, the alae ula, the koloa maoli, and the nene (Hawaiian goose);

Whereas Hanalei National Wildlife Refuge consists of 917 acres in Hanalei Valley on the north shore of Kauai island and includes a portion of the Hanalei River, a designated American Heritage River;

Whereas Hanalei National Wildlife Refuge provides an important habitat for a diverse array of fish, wildlife, and plants, including 27 species of migratory waterfowl, 23 species of migratory shorebirds, and all 5 species of endemic Hawaiian oopu (amphidromous gobies);

Whereas kalo farming has occurred for several hundred years in Hanalei Valley and remains an ecologically, culturally, and economically important practice on Hanalei National Wildlife Refuge;

Whereas kalo farming in the greater Hanalei watershed, including Hanalei National Wildlife Refuge, provides shallow-water habitat for threatened and endangered waterbirds and generates at least 40 percent of all kalo grown in the State of Hawaii; and

Whereas the U.S. Fish and Wildlife Service is opening the new Hanalei Viewpoint to provide residents and visitors with increased op-

portunities to learn about and connect with the natural and cultural history of Hanalei Valley and the Hanalei National Wildlife Refuge; Now, therefore, be it

Resolved, That the Senate—

(1) congratulates and celebrates Pearl Harbor National Wildlife Refuge and Hanalei National Wildlife Refuge on the 50th anniversary of their establishment;

(2) acknowledges the range of natural and cultural wonders that make up the other national wildlife refuges of the State of Hawaii, including—

(A) Hawaiian Islands National Wildlife Refuge;

(B) Huleia National Wildlife Refuge;

(C) Kakahaia National Wildlife Refuge;

(D) James Campbell National Wildlife Refuge;

(E) Kilauea Point National Wildlife Refuge;

(F) Hakalau Forest National Wildlife Refuge;

(G) Kealia Pond National Wildlife Refuge; and

(H) Oahu Forest National Wildlife Refuge; and

(3) encourages the people of Hawaii and of the United States to learn about, support, and appreciate those national wildlife refuges, which are national treasures.

SENATE RESOLUTION 802—CONDEMNING ANY ATTEMPTS BY RUSSIA TO CLAIM SOVEREIGNTY OVER ANY PORTION OF UKRAINE

Mr. GRAHAM (for himself and Mr. BLUMENTHAL) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 802

Whereas the Russian Federation violated the sovereignty of Ukraine beginning with the illegal annexation of Crimea and its invasion into eastern Ukraine;

Whereas beginning in February 2022, the Russian Federation sought to further violate Ukraine's sovereignty by launching unprovoked military action against Ukraine;

Whereas on September 22, 2022, the North Atlantic Treaty Organization condemned the then upcoming referendum stating that the "[s]ham referenda in the Donetsk, Luhansk, Zaporizhzhia, and Kherson regions of Ukraine have no legitimacy and will be a blatant violation of the UN Charter. NATO Allies will not recognize their illegal and illegitimate annexation. These lands are Ukraine. We call on all states to reject Russia's blatant attempts at territorial conquest";

Whereas on September 23, 2022, President Joe Biden stated, "The United States will never recognize Ukrainian territory as anything other than part of Ukraine.";

Whereas beginning on September 23, 2022, Russia conducted sham referenda in 4 Ukrainian regions (Donetsk, Luhansk, Kherson, and Zaporizhzhia) in an attempt to validate Moscow's illegal annexation of the territory;

Whereas reports indicate that—

(1) Ukrainians have been forced to vote in the sham referenda "under a gun barrel"; and

(2) Russian officials have visited schools, hospitals, and other workplaces to force Ukrainians to vote in favor of annexation; and

Whereas the Kremlin has stated that once the sham referenda are concluded, the process of absorbing the annexed areas into Russia will be completed "promptly": Now, therefore, be it

Resolved, That the Senate—

(1) refuses to recognize any claim of sovereignty by the Russian Federation over any portion of Ukraine;

(2) views the recent sham referenda beginning on September 23, 2022, directed by the Government of the Russian Federation, as a violation of international law; and

(3) calls upon the President of the United States to restrict all economic and military aid and assistance to any nation that recognizes Russian sovereignty over any portion of Ukraine.

SENATE RESOLUTION 803—CON-DEMNING THE DETENTION AND DEATH OF MAHSA AMINI AND CALLING ON THE GOVERNMENT OF IRAN TO END ITS SYSTEMIC PERSECUTION OF WOMEN

Mr. COONS (for himself, Mr. LANKFORD, Mr. RISCH, Mrs. SHAHEEN, Mr. BOOKER, Mr. Kaine, Mr. CARDIN, Mr. HICKENLOOPER, Mr. VAN HOLLEN, Mr. BLUMENTHAL, Mr. PETERS, Mrs. MURRAY, Mr. SANDERS, Mr. DURBIN, Ms. ROSEN, Mrs. FEINSTEIN, Mr. PADILLA, Mr. BROWN, Mr. BENNET, Mrs. GILLIBRAND, Mr. MURPHY, Mr. MORAN, Ms. COLLINS, Mr. CASSIDY, Mrs. FISCHER, Mr. TILLIS, Mr. DAINES, Mr. BRAUN, Mr. BOOZMAN, Mr. SULLIVAN, Mr. BLUNT, Mr. INHOFE, Mr. ROMNEY, Mrs. BLACKBURN, Ms. ERNST, Mr. CRUZ, Mr. CORNYN, Mrs. CAPITO, Mr. COTTON, Mr. GRAHAM, and Mr. MARKEY) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 803

Whereas Mahsa Amini, a 22-year-old Iranian woman, died in the custody of the Morality Police of Iran after being detained for purportedly wearing a hijab “improperly”;

Whereas the Morality Police of Iran, an element of the Law Enforcement Forces of Iran, continually suppress Iranian women’s right to freedom of expression and opinion, including restrictions on women’s clothing such as compulsory wearing of the hijab;

Whereas the protests over the death of Ms. Amini are the largest in Iran since 2019 and have spread throughout the capital of Iran, all of the 31 provinces of Iran, and at least 80 other cities and towns nationwide;

Whereas the Government of Iran has instituted a violent crackdown against peaceful protesters following the death of Ms. Amini, resulting in the injury and detention of hundreds of protesters and the deaths of at least 41 people as of September 26, 2022;

Whereas, to prevent protests from spreading, the biggest telecommunications operator in Iran largely shut down mobile internet access—the most severe internet restriction in the country since 2019;

Whereas the Government of Iran consistently engages in a range of human rights abuses in addition to its systematic persecution of women and peaceful protesters, including—

- (1) unlawful or arbitrary killings;
- (2) trials without due process;
- (3) forced disappearances;
- (4) torture;
- (5) arbitrary arrest and detention;
- (6) harsh and life-threatening prison conditions;
- (7) transnational attacks against dissidents;
- (8) severe restrictions on free expression and the media;
- (9) substantial interference with the freedom of peaceful assembly and freedom of association;

(10) severe restrictions on religious freedom; and

(11) restrictions on the ability of citizens to change their government peacefully through free and fair elections;

Whereas the Government of Iran is ranked as one of the worst human rights violators in the world, having received a 14 out of 100 “Global Freedom Score” and a 16 out of 100 “Internet Freedom Score” from Freedom House;

Whereas Iran has been designated as a “country of particular concern” by the Department of State for its suppression of religious freedom every year since 1999; and

Whereas improvements in the human rights of women, freedom of expression, and other human rights are fundamental to strengthening the accountability of the Government of Iran to its citizens: Now, therefore, be it

Resolved, That the Senate—

(1) condemns the detention and death of Mahsa Amini;

(2) recognizes the bravery and right of the Iranian people protesting the death of Ms. Amini, including many Iranian women;

(3) calls on the Government of Iran to end its systemic persecution of women;

(4) calls on the Government of Iran to allow peaceful protest and free elections;

(5) supports human rights, including the human rights of women in Iran; and

(6) supports holding all human rights violators in Iran to account.

SENATE RESOLUTION 804—DESIGNATING SEPTEMBER 2022 AS “NATIONAL CHILDHOOD CANCER AWARENESS MONTH”

Mr. MANCHIN (for himself, Mr. SCOTT of South Carolina, Mr. REED, Mr. CASEY, Mrs. CAPITO, Mr. GRAHAM, and Mr. HAWLEY) submitted the following resolution; which was considered and agreed to:

S. RES. 804

Whereas, each year, more than 15,500 children under the age of 19 in the United States are diagnosed with cancer;

Whereas, every year, more than 1,700 children in the United States lose their lives to cancer;

Whereas childhood cancer is the leading cause of death from disease and the second overall leading cause of death for children in the United States;

Whereas the 5-year survival rate for children with cancer in the United States has increased from 58 percent in the mid-1970s to 85 percent in 2022, representing a significant improvement from previous decades;

Whereas approximately two-thirds of children in the United States who survive cancer will develop at least one chronic health condition, and many survivors will face a late effect from treatment that can be severe or life-threatening;

Whereas cancer patients face a higher risk of contracting COVID-19 due to weakened immune systems; and

Whereas childhood cancer occurs regularly and randomly and spares no racial or ethnic group, socioeconomic class, or geographic region: Now, therefore, be it

Resolved, That the Senate—

(1) designates September 2022 as “National Childhood Cancer Awareness Month”;

(2) requests that the Federal Government, States, localities, and nonprofit organizations observe the month with appropriate programs and activities, with the goal of increasing public knowledge of the risks of cancer;

(3) encourages survivors of childhood cancer to continue to receive ongoing monitoring and physical and psychosocial care throughout their adult lives;
