

Union Calendar No. 42

118TH CONGRESS
1ST SESSION**H. R. 1735****[Report No. 118–62]**

To coordinate Federal research and development efforts focused on modernizing mathematics in STEM education through mathematical and statistical modeling, including data-driven and computational thinking, problem, project, and performance-based learning and assessment, interdisciplinary exploration, and career connections, and for other purposes.

IN THE HOUSE OF REPRESENTATIVES

MARCH 23, 2023

Ms. HOULAHAN (for herself and Mr. BAIRD) introduced the following bill; which was referred to the Committee on Science, Space, and Technology

MAY 16, 2023

Additional sponsors: Ms. LEE of Pennsylvania and Ms. STEVENS

MAY 16, 2023

Reported with an amendment, committed to the Committee of the Whole House on the State of the Union, and ordered to be printed

[Strike out all after the enacting clause and insert the part printed in *italic*]

[For text of introduced bill, see copy of bill as introduced on March 23, 2023]

A BILL

To coordinate Federal research and development efforts focused on modernizing mathematics in STEM education through mathematical and statistical modeling, including data-driven and computational thinking, problem, project, and performance-based learning and assessment, interdisciplinary exploration, and career connections, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 *This Act may be cited as the “Mathematical and Sta-*
5 *tistical Modeling Education Act”.*

6 **SEC. 2. MATHEMATICAL AND STATISTICAL MODELING EDU-**
7 **CATION.**

8 *(a) FINDINGS.—Congress finds the following:*

9 *(1) The mathematics taught in schools, including*
10 *statistical problem solving and data science, is not*
11 *keeping pace with the rapidly evolving needs of the*
12 *public and private sector, resulting in a STEM skills*
13 *shortage and employers needing to expend resources to*
14 *train and upskill employees.*

15 *(2) According to the Bureau of Labor Statistics,*
16 *the United States will need 1,000,000 additional*
17 *STEM professionals than it is on track to produce in*
18 *the coming decade.*

19 *(3) The field of data science, which is relevant in*
20 *almost every workplace, relies on the ability to work*
21 *in teams and use computational tools to do mathe-*
22 *matical and statistical problem solving.*

23 *(4) Many STEM occupations offer higher wages,*
24 *more opportunities for advancement, and a higher de-*
25 *gree of job security than non-STEM jobs.*

1 (5) *The STEM workforce relies on computational*
2 *and data-driven discovery, decision making, and pre-*
3 *dictions, from models that often must quantify uncer-*
4 *tainty, as in weather predictions, spread of disease, or*
5 *financial forecasting.*

6 (6) *Most fields, including analytics, science, eco-*
7 *nomics, publishing, marketing, actuarial science, op-*
8 *erations research, engineering, and medicine, require*
9 *data savvy, including the ability to select reliable*
10 *sources of data, identify and remove errors in data,*
11 *recognize and quantify uncertainty in data, visualize*
12 *and analyze data, and use data to develop under-*
13 *standing or make predictions.*

14 (7) *Rapidly emerging fields, such as artificial*
15 *intelligence, machine learning, quantum computing*
16 *and quantum information, all rely on mathematical*
17 *and statistical concepts, which are critical to prove*
18 *under what circumstances an algorithm or experi-*
19 *ment will work and when it will fail.*

20 (8) *Military academies have a long tradition in*
21 *teaching mathematical modeling and would benefit*
22 *from the ability to recruit students with this expertise*
23 *from their other school experiences.*

24 (9) *Mathematical modeling has been a strong*
25 *educational priority globally, especially in China,*

1 *where participation in United States mathematical*
 2 *modeling challenges in high school and higher edu-*
 3 *cation is orders of magnitude higher than in the*
 4 *United States, and Chinese teams are taking a major-*
 5 *ity of the prizes.*

6 (10) *Girls participate in mathematical modeling*
 7 *challenges at all levels at similar levels as boys, while*
 8 *in traditional mathematical competitions girls par-*
 9 *ticipate less and drop out at every stage. Students cite*
 10 *opportunity for teamwork, using mathematics and*
 11 *statistics in meaningful contexts, ability to use com-*
 12 *putation, and emphasis on communication as reasons*
 13 *for continued participation in modeling challenges.*

14 (b) *DEFINITIONS.—In this section:*

15 (1) *DIRECTOR.—The term “Director” means the*
 16 *Director of the National Science Foundation.*

17 (2) *FEDERAL LABORATORY.—The term “Federal*
 18 *laboratory” has the meaning given such term in sec-*
 19 *tion 4 of the Stevenson-Wydler Technology Innovation*
 20 *Act of 1980 (15 U.S.C. 3703).*

21 (3) *FOUNDATION.—The term “Foundation”*
 22 *means the National Science Foundation.*

23 (4) *INSTITUTION OF HIGHER EDUCATION.—The*
 24 *term “institution of higher education” has the mean-*

1 *ing given such term in section 101(a) of the Higher*
 2 *Education Act of 1965 (20 U.S.C. 1001(a)).*

3 (5) *MATHEMATICAL MODELING.*—*The term*
 4 *“mathematical modeling” has the meaning given the*
 5 *term in the 2019 Guidelines to Assessment and In-*
 6 *struction in Mathematical Modeling Education*
 7 *(GAIMME) report, 2nd edition.*

8 (6) *OPERATIONS RESEARCH.*—*The term “oper-*
 9 *ations research” means the application of scientific*
 10 *methods to the management and administration of or-*
 11 *ganized military, governmental, commercial, and in-*
 12 *dustrial processes to maximize operational efficiency.*

13 (7) *STATISTICAL MODELING.*—*The term “statis-*
 14 *tical modeling” has the meaning given the term in the*
 15 *2021 Guidelines to Assessment and Instruction in*
 16 *Statistical Education (GAISE II) report.*

17 (8) *STEM.*—*The term “STEM” means the aca-*
 18 *demic and professional disciplines of science, tech-*
 19 *nology, engineering, and mathematics, including com-*
 20 *puter science.*

21 (c) *PREPARING EDUCATORS TO ENGAGE STUDENTS IN*
 22 *MATHEMATICAL AND STATISTICAL MODELING.*—*The Direc-*
 23 *tor shall make awards on a merit-reviewed, competitive*
 24 *basis to institutions of higher education, and nonprofit or-*
 25 *ganizations (or a consortium thereof) for research and de-*

1 *velopment to advance innovative approaches to support and*
 2 *sustain high-quality mathematical modeling education in*
 3 *schools that are private, faith-based, or homeschools, or op-*
 4 *erated by local educational agencies, including statistical*
 5 *modeling, data science, operations research, and computa-*
 6 *tional thinking. The Director shall encourage applicants to*
 7 *form partnerships to address critical transitions, such as*
 8 *middle school to high school, high school to college, and*
 9 *school to internships and jobs.*

10 *(d) APPLICATION.—An entity seeking an award under*
 11 *subsection (c) shall submit an application at such time, in*
 12 *such manner, and containing such information as the Di-*
 13 *rector may require. The application shall include the fol-*
 14 *lowing:*

15 *(1) A description of the target population to be*
 16 *served by the research activity for which such an*
 17 *award is sought, including student subgroups de-*
 18 *scribed in section 1111(b)(2)(B)(xi) of the Elementary*
 19 *and Secondary Education Act of 1965 (20 U.S.C.*
 20 *6311(b)(2)(B)(xi)), and students experiencing home-*
 21 *lessness and children and youth in foster care.*

22 *(2) A description of the process for recruitment*
 23 *and selection of students, educators, or local edu-*
 24 *cational agencies to participate in such research ac-*
 25 *tivity.*

1 (3) *A description of how such research activity*
 2 *may inform efforts to promote the engagement and*
 3 *achievement of students, including students from*
 4 *groups historically underrepresented in STEM, in*
 5 *prekindergarten through grade 12 in mathematical*
 6 *modeling and statistical modeling using problem-*
 7 *based learning with contextualized data and com-*
 8 *putational tools.*

9 (4) *In the case of a proposal consisting of a part-*
 10 *nership or partnerships with 1 or more local edu-*
 11 *cational agencies and 1 or more researchers, a plan*
 12 *for establishing a sustained partnership that is joint-*
 13 *ly developed and managed, draws from the capacities*
 14 *of each partner, and is mutually beneficial.*

15 (e) *PARTNERSHIPS.—In making awards under sub-*
 16 *section (c), the Director shall encourage applications that*
 17 *include—*

18 (1) *partnership with a nonprofit organization or*
 19 *an institution of higher education that has extensive*
 20 *experience and expertise in increasing the participa-*
 21 *tion of students in prekindergarten through grade 12*
 22 *in mathematical modeling and statistical modeling;*

23 (2) *partnership with a local educational agency,*
 24 *a consortium of local educational agencies, or Tribal*
 25 *educational agencies;*

1 (3) *an assurance from school leaders to making*
 2 *reforms and activities proposed by the applicant a*
 3 *priority;*

4 (4) *ways to address critical transitions, such as*
 5 *middle school to high school, high school to college,*
 6 *and school to internships and jobs;*

7 (5) *input from education researchers and cog-*
 8 *nitive scientists, as well as practitioners in research*
 9 *and industry, so that what is being taught is up-to-*
 10 *date in terms of content and pedagogy;*

11 (6) *a communications strategy for early con-*
 12 *versations with parents, school leaders, school boards,*
 13 *community members, employers, and other stake-*
 14 *holders; and*

15 (7) *resources for parents, school leaders, school*
 16 *boards, community members, and other stakeholders*
 17 *to build skills in modeling and analytics.*

18 (f) *USE OF FUNDS.—An entity that receives an award*
 19 *under this section shall use the award for research and de-*
 20 *velopment activities to advance innovative approaches to*
 21 *support and sustain high-quality mathematical modeling*
 22 *education in public schools, private schools (including faith-*
 23 *based schools), or homeschools, including statistical mod-*
 24 *eling, data science, operations research, and computational*
 25 *thinking, which may include—*

1 (1) *engaging prekindergarten through grade 12*
2 *educators in professional learning opportunities to*
3 *enhance mathematical modeling and statistical prob-*
4 *lem solving knowledge, and developing training and*
5 *best practices to provide more interdisciplinary learn-*
6 *ing opportunities;*

7 (2) *conducting research on curricula and teach-*
8 *ing practices that empower students to choose the*
9 *mathematical, statistical, computational, and techno-*
10 *logical tools that they will apply to a problem, as is*
11 *required in life and the workplace, rather than pre-*
12 *scribing a particular approach or method;*

13 (3) *providing students with opportunities to ex-*
14 *plore and analyze real data sets from contexts that*
15 *are meaningful to the students, which may include—*

16 (A) *missing or incorrect values;*

17 (B) *quantities of data that require choice*
18 *and use of appropriate technology;*

19 (C) *multiple data sets that require choices*
20 *about which data are relevant to the current*
21 *problem; and*

22 (D) *data of various types including quan-*
23 *tities, words, and images;*

1 (4) *taking a school or district-wide approach to*
2 *professional development in mathematical modeling*
3 *and statistical modeling;*

4 (5) *engaging rural local agencies;*

5 (6) *supporting research on effective mathematical*
6 *modeling and statistical modeling teaching practices,*
7 *including problem- and project-based learning, uni-*
8 *versal design for accessibility, and rubrics and mas-*
9 *tery-based grading practices to assess student per-*
10 *formance;*

11 (7) *designing and developing pre-service and in-*
12 *service training resources to assist educators in adopt-*
13 *ing transdisciplinary teaching practices within math-*
14 *ematics and statistics courses;*

15 (8) *coordinating with local partners to adapt*
16 *mathematics and statistics teaching practices to lever-*
17 *age local natural, business, industry, and community*
18 *assets in order to support community-based learning;*

19 (9) *providing hands-on training and research*
20 *opportunities for mathematics and statistics educators*
21 *at Federal laboratories, institutions of higher edu-*
22 *cation, or in industry;*

23 (10) *developing mechanisms for partnerships be-*
24 *tween educators and employers to help educators and*
25 *students make connections between their mathematics*

1 *and statistics projects and topics of relevance in to-*
2 *day's world;*

3 (11) *designing and implementing professional*
4 *development courses and experiences, including men-*
5 *toring for educators, that combine face-to-face and on-*
6 *line experiences;*

7 (12) *reduce gaps in access to learning opportuni-*
8 *ties for students from groups historically underrep-*
9 *resented in STEM;*

10 (13) *provide support and resources for students*
11 *from groups historically underrepresented in STEM;*

12 (14) *addressing critical transitions, such as mid-*
13 *dle school to high school, high school to college, and*
14 *school to internships and jobs;*

15 (15) *researching effective approaches for engag-*
16 *ing students from groups historically underrep-*
17 *resented in STEM; and*

18 (16) *any other activity the Director determines*
19 *will accomplish the goals of this section.*

20 (g) *EVALUATIONS.—All proposals for awards under*
21 *this section shall include an evaluation plan that includes*
22 *the use of outcome oriented measures to assess the impact*
23 *and efficacy of the award. Each recipient of an award*
24 *under this section shall include results from these evaluative*
25 *activities in annual and final projects.*

1 (h) *ACCOUNTABILITY AND DISSEMINATION.*—

2 (1) *EVALUATION REQUIRED.*—*The Director shall*
3 *evaluate the portfolio of awards made under this sec-*
4 *tion. Such evaluation shall—*

5 (A) *use a common set of benchmarks and*
6 *tools to assess the results of research conducted*
7 *under such awards and identify best practices;*
8 *and*

9 (B) *to the extent practicable, integrate the*
10 *findings of research resulting from the activities*
11 *funded through such awards with the findings of*
12 *other research on student's pursuit of degrees or*
13 *careers in STEM.*

14 (2) *REPORT ON EVALUATIONS.*—*Not later than*
15 *180 days after the completion of the evaluation under*
16 *paragraph (1), the Director shall submit to Congress*
17 *and make widely available to the public a report that*
18 *includes—*

19 (A) *the results of the evaluation; and*

20 (B) *any recommendations for administra-*
21 *tive and legislative action that could optimize*
22 *the effectiveness of the awards made under this*
23 *section.*

24 (i) *FUNDING.*—*From amounts appropriated or other-*
25 *wise made available for the Directorate for STEM Edu-*

1 cation of the National Science Foundation, the Director
 2 shall allocate up to \$10,000,000 for each of fiscal years 2024
 3 through 2028 to carry out this section.

4 **SEC. 3. NASEM REPORT ON MATHEMATICAL AND STATIS-**
 5 **TICAL MODELING EDUCATION IN PREKINDER-**
 6 **GARTEN THROUGH 12TH GRADE.**

7 (a) *STUDY*.—Not later than 60 days after the date of
 8 enactment of this Act, the Director shall seek to enter into
 9 an agreement with the National Academies of Sciences, En-
 10 gineering and Medicine (in this section referred to as
 11 “NASEM”) (or if NASEM declines to enter into such an
 12 agreement, another appropriate entity) under which
 13 NASEM, or such other appropriate entity, agrees to conduct
 14 a study on the following:

15 (1) *Factors that enhance or barriers to the im-*
 16 *plementation of mathematical modeling and statis-*
 17 *tical modeling in elementary and secondary edu-*
 18 *cation, including opportunities for and barriers to use*
 19 *modeling to integrate mathematical and statistical*
 20 *ideas across the curriculum, including the following:*

21 (A) *Pathways in mathematical modeling*
 22 *and statistical problem solving from kinder-*
 23 *garten to the workplace so that students are able*
 24 *to identify opportunities to use their school*
 25 *mathematics and statistics in a variety of jobs*

1 *and life situations and so that employers can*
 2 *benefit from students' school learning of data*
 3 *science, computational thinking, mathematics,*
 4 *statistics, and related subjects.*

5 *(B) The role of community-based problems,*
 6 *service-based learning, and internships for con-*
 7 *necting students with career preparatory experi-*
 8 *ences.*

9 *(C) Best practices in problem-, project-, per-*
 10 *formance-based learning and assessment.*

11 *(2) Characteristics of teacher education programs*
 12 *that successfully prepare teachers to engage students*
 13 *in mathematical modeling and statistical modeling,*
 14 *as well as gaps and suggestions for building capacity*
 15 *in the pre-service and in-service teacher workforce.*

16 *(3) Mechanisms for communication with stake-*
 17 *holders, including parents, administrators, and the*
 18 *public, to promote understanding and knowledge of*
 19 *the value of mathematical modeling and statistical*
 20 *modeling in education.*

21 *(b) PUBLIC STAKEHOLDER MEETING.—In the course*
 22 *of completing the study described in subsection (a), NASEM*
 23 *or such other appropriate entity shall hold not less than*
 24 *one public meeting to obtain stakeholder input on the topics*
 25 *of such study.*

1 (c) *REPORT.*—*The agreement under subsection (a)*
2 *shall require NASEM, or such other appropriate entity, not*
3 *later than 24 months after the effective date of such agree-*
4 *ment, to submit to the Secretary of Education and the ap-*
5 *propriate committees of jurisdiction of Congress a report*
6 *containing—*

7 (1) *the results of the study conducted under sub-*
8 *section (a);*

9 (2) *recommendations to modernize the processes*
10 *described in subsection (a)(1); and*

11 (3) *recommendations for such legislative and ad-*
12 *ministrative action as NASEM, or such other appro-*
13 *priate entity, determines appropriate.*

14 (d) *FUNDING.*—*From amounts appropriated or other-*
15 *wise made available for the Directorate for STEM Edu-*
16 *cation of the National Science Foundation, the Director*
17 *shall allocate up to \$1,000,000 for fiscal year 2024 to carry*
18 *out this section.*

19 **SEC. 4. LIMITATIONS.**

20 (a) *LIMITATION ON FUNDING.*—*Amounts made avail-*
21 *able to carry out sections 2 and 3 shall be derived from*
22 *amounts appropriated or otherwise made available to the*
23 *National Science Foundation.*

24 (b) *SUNSET.*—*The authority to provide awards under*
25 *this Act shall expire on September 30, 2028.*
