

119TH CONGRESS  
1ST SESSION

# H. R. 1594

To support the sustainable aviation fuel market, and for other purposes.

---

## IN THE HOUSE OF REPRESENTATIVES

FEBRUARY 26, 2025

Ms. BROWNLEY (for herself and Mr. SCHNEIDER) introduced the following bill; which was referred to the Committee on Energy and Commerce, and in addition to the Committees on Transportation and Infrastructure, Armed Services, Science, Space, and Technology, and Ways and Means, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned

---

## A BILL

To support the sustainable aviation fuel market, and for other purposes.

1       *Be it enacted by the Senate and House of Representa-*

2       *tives of the United States of America in Congress assembled,*

3       **SECTION 1. SHORT TITLE.**

4       This Act may be cited as the “Sustainable Aviation

5       Fuel Act”.

6       **SEC. 2. NATIONAL GOAL.**

7       It is hereby declared that it is the national goal for

8       the United States to reach—

(2) net zero greenhouse gas emissions for United States domestic and international aviation flights by 2050.

8 SEC. 3. DEFINITIONS.

**9**      In this Act:

1       use change emissions, as calculated using appropriate  
2       modeling techniques approved by a regulating  
3       authority.

4                     (4) INDUCED LAND-USE CHANGE EMISSIONS.—  
5       The term “induced land-use change emissions”  
6       means the greenhouse gas emissions resulting from  
7       the conversion of land to the production of feed-  
8       stocks and from the conversion of other land due to  
9       the displacement of crops or animals for which the  
10      original land was previously used, as calculated  
11      using appropriate modeling techniques approved by  
12      a regulating authority.

13                    (5) CONVENTIONAL JET FUEL.—The term  
14       “conventional jet fuel” means liquid hydrocarbon  
15       fuel used for aviation that is derived or refined from  
16       petrochemicals.

17   **SEC. 4. ALTERNATIVE FUEL AND LOW-EMISSION AVIATION  
18                    TECHNOLOGY PROGRAM.**

19       Section 40007 of the Inflation Reduction Act (49  
20   U.S.C. 44504 note) is amended by adding at the end the  
21   following:

22                   “(f) ADDITIONAL PROJECTS.—For purposes of con-  
23       tinuing the competitive grant program established under  
24       subsection (a) for eligible entities to carry out projects lo-  
25       cated in the United States that produce, transport, blend,

1 or store sustainable aviation fuel, or develop, demonstrate,  
2 or apply low- emission aviation technologies, in addition  
3 to amounts otherwise available, there are authorized to be  
4 appropriated to the Secretary for each of fiscal years 2026  
5 through 2030, out of any money in the Treasury not oth-  
6 erwise appropriated, to remain available until September  
7 30, 2030, \$200,000,000 for the purposes described in sub-  
8 section (a).”.

9 **SEC. 5. LOW CARBON AVIATION FUEL STANDARD.**

10 (a) ESTABLISHMENT OF LOW CARBON AVIATION  
11 FUEL STANDARD.—Section 211 of the Clean Air Act (42  
12 U.S.C. 7545) is amended by adding at the end the fol-  
13 lowing:

14 “(w) LOW CARBON AVIATION FUEL STANDARD.—

15 “(1) DEFINITIONS.—In this subsection:

16 “(A) AVIATION FUEL.—The term ‘aviation  
17 fuel’ means fuel that is produced, sold, or dis-  
18 pensed in the United States, for civil or military  
19 purposes, for turbine-powered aviation.

20 “(B) CARBON INTENSITY.—The term ‘car-  
21 bon intensity’ means the quantity of lifecycle  
22 greenhouse gas emissions per unit of fuel en-  
23 ergy.

24 “(C) CREDIT EXCHANGE.—The term ‘cred-  
25 it exchange’ means a central marketplace with

1           established rules and regulations where buyers  
2           and sellers meet to conduct trades.

3           “(D) FUEL STANDARD.—The term ‘fuel  
4           standard’ means the low carbon fuel standard  
5           established under paragraph (2).

6           “(2) ESTABLISHMENT.—Not later than 1 year  
7           after the date of enactment of this subsection, the  
8           Administrator shall promulgate regulations to estab-  
9           lish a low carbon fuel standard for aviation fuels  
10          that requires a reduction in carbon intensity for  
11          aviation fuels each calendar year such that by 2050,  
12          and thereafter, the average carbon intensity of all  
13          aviation fuel used annually in the United States is  
14          reduced by at least 50 percent, as compared to the  
15          average carbon intensity of all aviation fuel used in  
16          the United States in 2005.

17          “(3) TARGETS.—In promulgating regulations  
18          under paragraph (2), the Administrator shall set a  
19          target of a reduction of at least 20 percent in the  
20          average carbon intensity of all aviation fuel used an-  
21          nually in the United States by 2030, and of at least  
22          50 percent by 2050, as compared to the average car-  
23          bon intensity of all aviation fuel used in the United  
24          States in 2005.

1               “(4) REQUIREMENTS.—In promulgating regulations under paragraph (2), the Administrator  
2               shall—

3               “(A) establish a benchmark for the average  
4               carbon intensity of aviation fuels for each calendar year, beginning with the first full calendar year that begins 2 years after the date of  
5               enactment of this subsection, suitable to achieving  
6               the targets specified in paragraph (3);  
7

8               “(B) apply the fuel standard to persons  
9               who produce or import aviation fuel;

10               “(C) establish procedures for calculating  
11               the carbon intensity of an aviation fuel, expressed in grams of carbon dioxide equivalent  
12               per megajoule, in accordance with—  
13

14               “(i) the standards, recommended  
15               practices, requirements and criteria, supporting documents, implementation elements, and any other technical guidance  
16               for sustainable aviation fuels that are adopted by the International Civil Aviation  
17               Organization with the agreement of the  
18               United States; and  
19

20               “(ii) any other more stringent accounting practices determined by the Ad-

1 ministrator to be the best lifecycle green-  
2 house gas emission accounting practices,  
3 provided that such practices account for  
4 the aggregate quantity of greenhouse gas  
5 emissions (including direct emissions and  
6 significant indirect emissions such as sig-  
7 nificant emissions from land use changes),  
8 as determined by the Administrator, re-  
9 lated to the full fuel lifecycle, including all  
10 stages of fuel and feedstock production and  
11 distribution, from feedstock generation or  
12 extraction through the distribution and de-  
13 livery and use of the finished fuel to the  
14 ultimate consumer, where the mass values  
15 for all greenhouse gases are adjusted to ac-  
16 count for their relative global warming po-  
17 tential;

18 “(D) determine how long the calculation of  
19 the carbon intensity of an aviation fuel (pursu-  
20 ant to the procedures established under sub-  
21 paragraph (C)), will remain in effect before  
22 needing to be reevaluated;

23 “(E) allow a person described in subpara-  
24 graph (B), who, for a calendar year, produces  
25 or imports aviation fuel—

1                     “(i) that has an average carbon inten-  
2                     sity that is less than the benchmark for av-  
3                     erage carbon intensity for that calendar  
4                     year to, except as provided in paragraph  
5                     (8), generate credits, to be used, or trans-  
6                     ferred to another person, to demonstrate  
7                     compliance with this subsection; and

8                     “(ii) that has an average carbon in-  
9                     tensity that is greater than the benchmark  
10                    for average carbon intensity for that cal-  
11                    endar year to purchase credits to be used  
12                    to demonstrate compliance with this sub-  
13                    section;

14                    “(F) determine the—

15                    “(i) appropriate amount of credits  
16                    generated and used to demonstrate compli-  
17                    ance pursuant to subparagraph (E);

18                    “(ii) appropriate conditions, if any,  
19                    on—

20                    “(I) the duration of such credits;  
21                    and

22                    “(II) the transfer of such credits  
23                    through a credit exchange; and

24                    “(G) consult with all relevant stakeholders,  
25                    including aviation industry groups, renewable

1           fuel industry groups, researchers at institutions  
2           of higher education, labor unions, consumer ad-  
3           vocates, and any other stakeholders the Admin-  
4           istrator determines to be appropriate.

5           “(5) CONSULTATION.—In carrying out this sub-  
6           section, the Administrator shall consult with the Ad-  
7           ministrator of the Federal Aviation Administration,  
8           the Secretary of Energy, and the Secretary of Agri-  
9           culture.

10          “(6) COORDINATION WITH STATES.—The Ad-  
11           ministrator shall, after notice and opportunity for  
12           public hearing, waive application of the fuel stand-  
13           ard in any State that has adopted a standard for  
14           aviation fuels that the Administrator determines is  
15           at least as stringent as the fuel standard.

16          “(7) REVISION.—If Congress enacts a standard  
17           or similar law that the Administrator, in consulta-  
18           tion with the Administrator of the Federal Aviation  
19           Administration, determines accomplishes the pur-  
20           poses of the fuel standard for sectors of the economy  
21           that include the aviation sector, the Administrator  
22           may revoke the fuel standard in favor of the other  
23           standard or law.

24          “(8) RELATIONSHIP TO RENEWABLE FUEL PRO-  
25           GRAM.—No credit may be generated under this sub-

1 section with respect to renewable fuel for which a  
2 credit is generated under subsection (o).

3       “(9) REPORT.—Not later than 180 days after  
4 the date of enactment of this subsection, the Admin-  
5 istrator shall submit to Congress and make publicly  
6 available a report describing—

7           “(A) the status of the development of the  
8 fuel standard; and

9           “(B) the considerations the Administrator  
10 is using in developing the fuel standard.”.

11       (b) ENFORCEMENT.—Section 211(d) of the Clean Air  
12 Act (42 U.S.C. 7545(d)) is amended—

13           (1) in paragraph (1)—

14              (A) by striking “or (o) of this section or  
15 the regulations” and inserting “(o), or (w) of  
16 this section or the regulations”;

17              (B) by striking “or (o) of this section or  
18 who fails” and inserting “(o), or (w) of this sec-  
19 tion or who fails”; and

20              (C) by striking “or (o) of this section  
21 which establishes” and inserting “(o), or (w) of  
22 this section which establishes”; and

23           (2) in paragraph (2), by striking “and (o) of  
24 this section” each place it appears and inserting  
25 “(o), and (w) of this section”.

1 **SEC. 6. PROCUREMENT OF SUSTAINABLE AVIATION FUEL**2 **BY THE DEPARTMENT OF DEFENSE.**

3 (a) IN GENERAL.—Effective October 1, 2025, the  
4 Secretary of Defense shall make a bulk purchase of an  
5 amount of sustainable aviation fuel that is not less than  
6 10 percent of the total amount of aviation fuel procured  
7 for operational purposes (as defined in section 2922h of  
8 title 10, United States Code) if—

9 (1) the cost of sustainable aviation fuel is com-  
10 petitive with the fully burdened cost of conventional  
11 jet fuel available for the same purpose; and

12 (2) the sustainable aviation fuel is refined or  
13 produced in the United States.

14 (b) BLENDED FUEL.—If the Secretary of Defense  
15 purchases sustainable aviation fuel that is blended with  
16 conventional jet fuel, the percentage of sustainable avia-  
17 tion fuel in such blend will be counted towards the per-  
18 centage described in subsection (a).

19 (c) CERTIFICATION.—Before making a purchase  
20 under subsection (a), the Secretary of Defense or the Sec-  
21 retary concerned (as defined in section 101(a)(9) of title  
22 10, United States Code) shall certify that the sustainable  
23 aviation fuel is suitable for use in aircrafts of the Depart-  
24 ment of Defense.

25 (d) WAIVER.—

1                     (1) IN GENERAL.—Subject to the requirements  
2                     of paragraph (2), the Secretary of Defense may  
3                     waive the requirement under subsection (a) for rea-  
4                     sons of national security, including the lack of avail-  
5                     able, qualifying sustainable aviation fuel.

6                     (2) NOTICE.—Not later than 30 days after  
7                     issuing a waiver under this subsection, the Secretary  
8                     shall submit to the congressional defense committees  
9                     (as defined in section 101(a)(16) of title 10, United  
10                    States Code) notice of the waiver. Any such notice  
11                     shall include each of the following:

12                     (A) The rationale of the Secretary for  
13                     issuing the waiver.

14                     (B) A certification that the waiver is in the  
15                     national security interest of the United States.

16                     (e) DEFINITIONS.—The terms “fully burdened cost”  
17                     and “operational purposes” have the meanings given such  
18                     terms, respectively, in section 2922h of title 10, United  
19                     States Code.

20 **SEC. 7. FEDERAL AVIATION ADMINISTRATION RESEARCH.**

21                     (a) IN GENERAL.—Section 911(a) of the FAA Mod-  
22                     ernization and Reform Act of 2012 (49 U.S.C. 44504  
23                     note) is amended—

24                     (1) by striking “assist in the development” and  
25                     inserting the following:

1               “(1) assist in the development”;  
2               (2) by striking “and other” and inserting “,  
3       other”;  
4               (3) by striking the period and inserting “, and  
5       sustainable fuel that can be used without the need  
6       to blend with any other type of aviation fuel;”; and  
7               (4) by adding at the end the following:

8               “(2) promote the efforts of the aviation sector  
9       to become a net-zero greenhouse gas emitting sector;  
10              “(3) study the climate impacts of non-carbon  
11       dioxide greenhouse gas emissions, water vapor, and  
12       contrails and ways to minimize such impacts; and  
13              “(4) develop a methodology for quantifying the  
14       non-carbon dioxide climate impacts of aviation in a  
15       lifecycle analysis, including the benefits of sustain-  
16       able aviation fuel other than the reduction in carbon  
17       dioxide emissions.”.

18       (b) DEFINITIONS.—Section 911 of such Act is

19       amended by adding at the end the following:

20              “(e) DEFINITIONS.—In this section:

21              “(1) SUSTAINABLE AVIATION FUEL.—The term  
22       ‘sustainable aviation fuel’ means liquid fuel con-  
23       sisting of synthesized hydrocarbons that—

24              “(A) is derived from a qualified feedstock;

25              and

1                 “(B) conforms to the standards, rec-  
2                 ommended practices, requirements and criteria,  
3                 supporting documents, implementation ele-  
4                 ments, and any other technical guidance for  
5                 sustainable aviation fuels that are adopted by  
6                 the International Civil Aviation Organization  
7                 with the agreement of the United States.

8                 “(2) QUALIFIED FEEDSTOCK.—The term ‘quali-  
9                 fied feedstock’ means sources of hydrogen and car-  
10                 bon not originating from unrefined or refined petro-  
11                 chemicals.

12                 “(f) AUTHORIZATION OF APPROPRIATIONS.—There  
13                 is authorized to be appropriated to the Administrator of  
14                 the Federal Aviation Administration \$35,000,000 for each  
15                 of fiscal years 2026 through 2030 to carry out this sec-  
16                 tion.”.

17 **SEC. 8. DEPARTMENT OF ENERGY RESEARCH.**

18                 (a) IN GENERAL.—The Secretary of Energy shall  
19                 carry out a program to research the use of cover crops  
20                 or other crops grown for conservation purposes rather  
21                 than for sale in the production of sustainable aviation fuel.

22                 (b) COLLABORATION.—In carrying out the program  
23                 under subsection (a), the Secretary shall collaborate with  
24                 the national laboratories, the Department of Agriculture,  
25                 and industry partners.

1 (c) DEFINITIONS.—In this section:

(1) SUSTAINABLE AVIATION FUEL.—The term “sustainable aviation fuel” means liquid fuel consisting of synthesized hydrocarbons that—

(A) is derived from a qualified feedstock;

6 and

(B) conforms to the standards, recommended practices, requirements and criteria, supporting documents, implementation elements, and any other technical guidance for sustainable aviation fuels that are adopted by the International Civil Aviation Organization with the agreement of the United States.

18       (d) AUTHORIZATION OF APPROPRIATIONS.—There  
19 are authorized to be appropriated such sums as may be  
20 necessary to carry out this section.

**21 SEC. 9. EXTENSION OF CLEAN FUEL PRODUCTION CREDIT**  
**22 FOR SUSTAINABLE AVIATION FUEL.**

23 (a) IN GENERAL.—Section 45Z(g) of the Internal  
24 Revenue Code of 1986 is amended to read as follows:

25        "(g) TERMINATION.—This section shall not apply—

1           “(1) in the case of transportation fuel which is  
2       not sustainable aviation fuel, to fuel sold after De-  
3       cember 31, 2027, and

4           “(2) in the case of sustainable aviation fuel, to  
5       fuel sold after December 31, 2032.”.

6       (b) EFFECTIVE DATE.—The amendments made by  
7       this section shall apply to fuel produced after December  
8       31, 2027.

9       **SEC. 10. SUSTAINABLE AVIATION FUEL PRODUCTION PROP-**

10           **ERTY ADDED TO ENERGY CREDIT.**

11       (a) IN GENERAL.—Section 48 of the Internal Rev-  
12 enue Code of 1986 is amended—

13           (1) in subsection (a)—

14           (A) in paragraph (2)(A)(i)—

15           (i) in subclause (VIII), by striking  
16       “and”, and

17           (ii) by adding at the end the following  
18       new subclause:

19           “(X) sustainable aviation fuel  
20       production property, and”,

21           (B) in paragraph (3)(A), by striking “or”  
22       at the end of clause (x), inserting “or” at the  
23       end of clause (xi), and by adding at the end the  
24       following new clause:

1                     “(xii) sustainable aviation fuel produc-  
2                     tion property,”, and

3                     (C) by redesignating paragraph (16) as  
4                     paragraph (17) and by inserting after para-  
5                     graph (15) the following new paragraph:

6                     “(16) PHASEOUT FOR SUSTAINABLE AVIATION  
7                     FUEL PRODUCTION PROPERTY.—In the case of any  
8                     energy property described in paragraph (3)(A)(xii)  
9                     the construction of which begins before January 1,  
10                     2039, the energy percentage determined under para-  
11                     graph (2) shall be equal to—

12                     “(A) in the case of any property the con-  
13                     struction of which begins after December 31,  
14                     2030, and before January 1, 2032, 24 percent,

15                     “(B) in the case of any property the con-  
16                     struction of which begins after December 31,  
17                     2031, and before January 1, 2033, 18 percent,  
18                     and

19                     “(C) in the case of any property the con-  
20                     struction of which begins after December 31,  
21                     2032, and before January 1, 2039, 12 per-  
22                     cent.”, and

23                     (2) in subsection (c), by adding at the end the  
24                     following new paragraph:

1           “(9) SUSTAINABLE AVIATION FUEL PRODUC-  
2       TION PROPERTY.—

3           “(A) IN GENERAL.—The term ‘sustainable  
4       aviation fuel production property’ means—

5           “(i) property which produces sustain-  
6       able aviation fuel (as defined in section  
7       40B(d)), or

8           “(ii) property directly related to ena-  
9       bling the production or distribution of sus-  
10      tainable aviation fuel.

11          “(B) RECAPTURE OF CREDIT.—The Sec-  
12       etary shall, by regulations, provide for recap-  
13       turing the benefit of any credit allowable under  
14       subsection (a)(3)(A)(xii) with respect to any  
15       sustainable aviation fuel production property if  
16       the sustainable aviation fuel production of such  
17       property comprises less than 80 percent of the  
18       total fuel production of such property in any of  
19       the 5 taxable years immediately following the  
20       taxable year in which such property was placed  
21       in service.”.

22          (b) EFFECTIVE DATE.—The amendments made by  
23       this section shall apply to fuel produced after December  
24       31, 2025.
