# A BILL

To establish a Strategic Bitcoin Reserve and other programs to ensure the transparent management of Bitcoin holdings of the Federal Government, to offset costs utilizing certain resources of the Federal Reserve System, and for other purposes.

1       *Be it enacted by the Senate and House of Representa-  
2       tives of the United States of America in Congress assembled,*

3       **SECTION 1. SHORT TITLE.**

4       This Act may be cited as the “Boosting Innovation,  
5       Technology, and Competitiveness through Optimized In-

1 vestment Nationwide Act of 2025” or the “BITCOIN Act  
2 of 2025”.

3 **SEC. 2. FINDINGS.**

4 Congress finds the following:

5 (1) The global financial landscape is rapidly  
6 evolving, with digital assets playing an increasingly  
7 significant role in the world economy.

8 (2) Bitcoin has demonstrated resilience, wide-  
9 spread adoption, and served as a medium of ex-  
10 change and a store of value for more than a decade.

11 (3) Just as gold reserves have historically  
12 served as a cornerstone of national financial secu-  
13 rity, Bitcoin represents a digital-age asset capable of  
14 enhancing the financial leadership and security of  
15 the United States in the 21st century global econ-  
16 omy.

17 (4) The acquisition and long-term storage of  
18 substantial quantities of Bitcoin by the United  
19 States can strengthen the financial condition of the  
20 United States, providing a hedge against economic  
21 uncertainty and monetary instability.

22 (5) Bitcoin, as a decentralized and finitely  
23 scarce digital asset, offers unique properties that  
24 complement existing national reserves, strengthening

1       the position of the United States dollar in the global  
2       financial system.

3                 (6) Diversification of the national assets of the  
4       United States to include Bitcoin can enhance financial  
5       resilience and position the United States at the  
6       forefront of global financial innovation.

7   **SEC. 3. DEFINITIONS.**

8       In this Act:

9                 (1) AIRDROP.—The term “airdrop” means a  
10      gratuitous distribution of digital assets to holders of  
11      Bitcoin in a broad, equitable, and non-discretionary  
12      manner.

20      isolated from any network connections.

21                 (4) FORK.—The term “fork” means a change  
22      to the consensus mechanism of a distributed ledger  
23      that creates a separate ledger, resulting in a new  
24      digital asset that shares a common transaction his-  
25      tory with Bitcoin up to the point of the change.

1                             (5) SECRETARY.—The term “Secretary” means
