

threats by enhancing the self-defense of its forces. The recipient will have no difficulty absorbing this equipment and services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor(s) will be selected through competitive procurements conducted by the U.S. Government in accordance with the Federal Acquisition Regulation. At this time, the U.S. Government is not aware of any offset agreement proposed in connection with this potential sale. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will require the assignment of three U.S. contractor representatives for a period of three years and two U.S. contractor representatives for a period of one year to provide engineering and technical support services as well as program and technical reviews.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

TRANSMITTAL NO. 26-01

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex Item No. vii

(vii) Sensitivity of Technology:

1. The M142 High Mobility Artillery Rocket System (HIMARS) is a C-130 transportable wheeled launcher mounted on a five-ton Family of Medium Tactical Vehicles (FMTV) truck chassis. HIMARS is the modern Army-fielded version of the Multiple Launch Rocket System (MLRS) M270 launcher and can fire all the MLRS Family of Munitions (FOM), including the Guided Multiple Launch Rocket System (GMLRS) and Army Tactical Missile System (ATACMS). Utilizing the MLRS FOM, the HIMARS can engage targets between 15 and 300 kilometers with Global Positioning System-aided (GPS) precision accuracy.

2. The GMLRS M31A2 Unitary is the Army's primary munition for units fielding the M142 HIMARS and M270A1 MLRS launchers. The M31 Unitary is a solid propellant artillery rocket that uses GPS/Precise Positioning Service (GPS/PPS)-aided inertial guidance provided by Selective Availability Anti-Spoofing Module (SAASM) or M-Code. It accurately and quickly delivers a single high-explosive blast fragmentation warhead to targets at ranges between 15 and 70 kilometers. The rockets are fired from a launch pod container that also serves as the storage and transportation container for the rockets. Each rocket pod holds six (6) total rockets.

3. The M30A2 GMLRS Alternative Warhead shares a greater than ninety percent commonality with the M31A1 Unitary. The primary difference between the GMLRS-U and GMLRS-AW is the replacement of the GMLRS-U's high explosive warhead with a 200-pound fragmentation warhead of preformed tungsten penetrators which is optimized for effectiveness against large area and imprecisely located targets. The munitions otherwise share a common motor, GPS/PPS-aided inertial guidance provided by SAASM or M-Code, control system, fusing mechanism, multi-option height of burst capability, and effective range between 15 and 70 kilometers.

4. The M57 ATACMS is a conventional, semi-ballistic missile that utilizes a 500-pound high explosive warhead. It has an effective range of between 70 and 300 kilometers and has increased lethality and accuracy over previous versions of the ATACMS due to a GPS/PPS aided navigation system provided by SAASM or M-Code.

5. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

6. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

7. A determination has been made that the recipient can provide substantially the same-degree of protection for the sensitive technology being released as the U.S. Government. This proposed sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

8. All defense articles and services listed in this transmittal have been authorized for release and export to the recipient.

ARMS SALES NOTIFICATION

Mr. RISCH. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive prior notification of certain proposed arms sales as defined by that statute. Upon such notification, the Congress has 30 calendar days during which the sale may be reviewed. The provision stipulates that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Senate Foreign Relations Committee.

In keeping with the committee's intention to see that relevant information is still available to the full Senate, I ask unanimous consent to have printed in the RECORD the notifications that have been received. If the cover letter references a classified annex, then such an annex is available to all Senators in the office of the Foreign Relations Committee, room SD-423.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DEFENSE SECURITY
COOPERATION AGENCY,
Washington, DC.

Hon. MIKE JOHNSON,
Speaker, House of Representatives,
Washington, DC.

DEAR MR. SPEAKER: Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, as amended, we are forwarding herewith Transmittal No. 26-02, concerning the Army's proposed Letter(s) of Offer and Acceptance to the Taipei Economic and Cultural Representative Office in the United States (TECRO) for defense articles and services estimated to cost \$353 million. We will issue a news release to notify the public of this proposed sale upon delivery of this letter to your office.

Sincerely,

MICHAEL F. MILLER,
Director.

TRANSMITTAL NO. 26-02

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) Prospective Purchaser: Taipei Economic and Cultural Representative Office in the United States (TECRO).

(ii) Total Estimated Value:

Major Defense Equipment * \$336 million.

Other \$17 million.

Total \$353 million.

Funding Source: National Funds.

(iii) Description and Quantities of Articles or Services under Consideration for Purchase:

Major Defense Equipment (MDE):

One thousand five hundred forty-five (1,545) tube-launched, optically-tracked, wire-guided (TOW) 2B BGM-71F-7-RF missiles.

Fourteen (14) TOW 2B BGM-71F-7-RF fly-to-buy lot acceptance missiles.

Twenty-four (24) Improved Target Acquisition Systems (ITAS).

Non-Major Defense Equipment: The following non-MDE items will also be included: lithium-ion battery box; missile simulation rounds; ITAS High Mobility Multipurpose Wheeled Vehicle (HMMWV) mounting kits; engineering and logistics support services; technical assistance; training; and other related elements of logistics and program support.

(iv) Military Department: Army (TW-B-ZFH and TW-B-ZFI).

(v) Prior Related Cases, if any: TW-B-ZBT.

(vi) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: None known at this time.

(vii) Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold: See Attached Annex.

(viii) Date Report Delivered to Congress: December 17, 2025.

*As defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Taipei Economic and Cultural Representative Office in the United States—Tube-launched, Optically-tracked, Wire-guided missile system

The Taipei Economic and Cultural Representative Office in the United States (TECRO) has requested to buy one thousand

five hundred forty-five (1,545) tube-launched, optically tracked, wire-guided (TOW) 2B BGM-71F-7-RF missiles; fourteen (14) TOW 2B BGM-71F-7-RF fly-to-buy lot acceptance missiles; and twenty-four (24) Improved Target Acquisition Systems. The following non-MDE items will also be included: lithium-ion battery box; missile simulation rounds; ITAS High Mobility Multipurpose Wheeled Vehicle (HMMWV) mounting kits; engineering and logistics support services; technical assistance; training; and other related elements of logistics and program support. The estimated total cost is \$353 million.

The proposed sale is consistent with U.S. law and policy as expressed in Public Law 96-8.

This proposed sale serves U.S. national, economic, and security interests by supporting the recipient's continuing efforts to modernize its armed forces and to maintain a credible defensive capability. The proposed sale will help improve the security of the recipient and assist in maintaining political stability, military balance, and economic progress in the region.

The proposed sale will improve the recipient's capability to meet current and future threats by enhancing defense capability of its forces. The recipient will have no difficulty absorbing these articles and services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be selected through competitive procurements conducted by the U.S. Government in accordance with the Federal Acquisition Regulation. At this time, the U.S. Government is not aware of any offset agreement proposed in connection with this potential sale. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government and contractor representatives to the recipient.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

TRANSMITTAL NO. 26-02

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex Item No. vii

(vii) Sensitivity of Technology:

1. The radio frequency (RF) TOW 2B missile (BGM-71F-3-RF) is a top attack missile designed to defeat armored vehicles, reinforced urban structures, field fortifications, and other similar targets. TOW missiles are fired from a variety of TOW launchers in use by the U.S. Army, U.S. Marine Corps, and Foreign Military Sales partner nations. The TOW 2B RF missile can be launched from the same launcher platforms as the existing wire-guided TOW 2B missile without modification to the launcher. The TOW 2B missile (both wire and RF) contains two tracker beacons (Xenon and thermal) for the launcher to track and guide the missile in flight. Guidance commands from the launcher are provided to the missile by the RF link contained within the missile case. The hardware, software, and technical publications provided with the sale thereof are unclassified. However, the system itself contains sensitive technology that instructs the system on how to operate in the presence of countermeasures.

2. The highest level of classification of defense articles, components, and services included in this potential sale is Controlled Unclassified Information.

3. If a technologically advanced adversary were to obtain knowledge of the specific

hardware and software elements, the information could be used to develop countermeasures that might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that the recipient can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This proposed sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been authorized for release and export to the recipient.

ARMS SALES NOTIFICATION
