

DEPLOYING AMERICAN BLOCKCHAINS ACT OF 2025

APRIL 24, 2025.—Committed to the Committee of the Whole House on the State of the Union and ordered to be printed

Mr. GUTHRIE, from the Committee on Energy and Commerce,
submitted the following

R E P O R T

[To accompany H.R. 1664]

The Committee on Energy and Commerce, to whom was referred the bill (H.R. 1664) to direct the Secretary of Commerce to take actions necessary and appropriate to promote the competitiveness of the United States related to the deployment, use, application, and competitiveness of blockchain technology or other distributed ledger technology, and for other purposes, having considered the same, reports favorably thereon without amendment and recommends that the bill do pass.

PURPOSE AND SUMMARY

H.R. 1664, the Deploying American Blockchains Act of 2025, was introduced by Representative Cammack on February 27, 2025, and

was referred to the Committee on Energy and Commerce. H.R. 1664 would direct the Secretary of Commerce to take actions necessary and appropriate to promote the competitiveness of the United States related to the deployment, use, application, and competitiveness of blockchain technology or other distributed ledger technology, and for other purposes.

BACKGROUND AND NEED FOR LEGISLATION

Blockchains, a subset of distributed ledger technology, are an emerging general-purpose technology with many possible applications. Through various design approaches, blockchains can be used to track products through a supply chain,¹ give Americans increased control over their data and digital identity,² and assist in the auditing of companies.³ Congress is working to promote the competitiveness of the United States with regard to blockchain technologies.

One unique aspect of blockchains is the use of tokens. A token is a transferrable, digital representation of information recorded on blockchain technology or other distributed ledger technology. As a general-purpose container of information, tokens are used to represent all types of information, including collectibles like a digital baseball card,⁴ a ticket to a live event,⁵ or even a state-issued driver's license.⁶

Today, many of the challenges facing the United States are digital and technological, with the leading countries writing technical standards for those lagging behind. It is critical that America—not China—set the rules of the road for the technologies of tomorrow. In a March 2023 report titled “The New American Foreign Policy of Technology,” the German Marshall Fund stated that “U.S. leadership is needed to ensure that nationalist and authoritarian forces do not fill the resulting structural vacuum in an increasingly digital world.”⁷

Blockchains are a central component of the Chinese Communist Party's (CCP's) strategy to undermine the U.S.-led global order. In remarks to the Political Bureau of the Central Committee of the CCP in 2019, President Xi remarked, “We must take the blockchain as an important breakthrough for independent innovation of core technologies.”⁸ In its 14th Five-Year plan, the CCP's

Central Commission for Cybersecurity and Information makes clear its goal to become the global leader in the digital economy by 2025.⁹ In 2019, the CCP established the Blockchain-based Service Network (BSN),¹⁰ a low-cost blockchain infrastructure layer closely tied with the CCP's Digital Yuan project and described as "the backbone of a potential new phase of the global internet."¹¹ Services provided by BSN, such as the Interchain Communications Hub, Key Trust Mode, and Oracles Services, enabled the BSN to mediate and observe user activity on-chain.¹² According to the BSN Introduction Whitepaper, "[a]ll matters of the BSN, including regulatory design, technical standards, development and operations management, business models and pricing are determined by the BSN Development Association."¹³ The BSN Development Association is composed of government agencies like the State Information Center of China and sanctioned entities such as China Mobile Communications.¹⁴ The BSN Secretary General, stated that they were building a global blockchain network where "China controls the rights to internet access."¹⁵

On December 19, 2023, the Ministry of Industry and Information Technology of the People's Republic of China released "Reply to Proposal No. 02969 of the First Session of the 14th Chinese People's Political Consultative Conference (CPPCC) National Committee."¹⁶ This statement outlines the Ministry's previous work and future plans to "seize the opportunity to seize Web3.0."¹⁷ Previous work of the Ministry includes continuously optimizing the policy environment, deepening technical expertise, accelerating pilots of blockchain applications in 16 characteristic fields, and promoting the establishment of a blockchain technical standards committee.¹⁸ Future plans of the Ministry include developing a national strategy document for blockchain development, to strengthen research into the core technologies that underpin blockchains, leadership in the development of international blockchain standards, and to improve the public's understanding of blockchain technology by promoting application pilots such as distributed digital identity.¹⁹

The Committee on Energy and Commerce plays a vital role in advancing American competitiveness and global technological leadership. In March 2016, the Subcommittee on Commerce, Manufacturing, and Trade held one of the first hearings on blockchains. The title of that hearing was “Disruptor Series: Digital Currency and Blockchain Technology.”²⁰ Other efforts followed over the years, which culminated in the inclusion of legislation championed by Rep. Brett Guthrie²¹ and Rep. Darren Soto²² in Former Chair Cathy McMorris Rodgers’ bipartisan legislation with then-Rep. Bobby Rush, known as the American COMPETE Act.²³ That legislation became Title XV of the “Consolidated Appropriations Act, 2021”²⁴ and was signed into law on December 27, 2020.

The American COMPETE Act required the Department of Commerce to study and report on emerging technologies like blockchain.²⁵ The reports, completed in August 2023, included nine outstanding challenges and recommendations on “. . . how the U.S. Federal Government can ensure that the technology develops in the service of U.S. values.”²⁶ The report further described numerous applications for blockchain technology such as supply chains, personal data and identity management, loyalty programs, and fraud reduction, to name a few.²⁷

In September 2022, the Department of Commerce completed a report titled “Responsible Advancement of U.S. Competitiveness in Digital Assets.”²⁸ This report noted “[o]utside of explicit financial use cases, the ability to tokenize many different types of assets could lead to a world in which many physical assets (i.e. objects) have a digital counterpart, thus opening the door to numerous use cases for tracking and recording actions on those assets.”²⁹ The report states that “U.S. competitiveness in this space . . . could be important to continued U.S. economic leadership.”³⁰

These two blockchain reports from the Department of Commerce underline the agency’s mission:

The Department of Commerce’s mission is to create the conditions for economic growth and opportunity for all communities. Through its 13 bureaus, the Department works to drive U.S. economic competitiveness, strengthen domestic industry, and spur the growth of quality jobs in all communities across the country. The Department serves as the voice of business in

the Federal Government, and at the same time, the Department touches and serves every American every day.³¹

Building on its mission statement, the Department of Commerce’s 2022–2026 Strategic Plan includes Strategic Objective 1.2, “Accelerate the development, commercialization, and deployment of critical and emerging technologies.”³² The objective states that “[t]o maintain its global leadership, the Nation must innovate more and innovate faster than the rest of the world” and that “[t]he Department will also work closely with industry to create the necessary conditions for innovation in the public and private sectors.”³³

The U.S. should develop policies that support the competitiveness of the United States with regard to blockchain technology to ensure China does not control the world’s rights to access the internet. Despite the dominance of Silicon Valley during the early days of the internet, recent reports show that the United States is losing market share amongst blockchain developers.³⁴ Meaningful support for American technological leadership depends on open dialogue and collaboration among the Federal government, industry, academia, civil society, and other engaged stakeholders. The mission of the Department of Commerce is to promote American leadership and global competitiveness, making it the federal agency best positioned agency to promote the growth, development, and deployment of blockchains, applications built on blockchains, and tokens.

H.R. 1664, the Deploying American Blockchains Act ensures that the Department of Commerce is taking actions necessary and appropriate to promote the competitiveness of the United States related to blockchain technologies. It is best to take such actions now with our values driving the process, rather than allowing our adversaries to set the rules of the road. Congress can ensure we lead the next era of American innovation and entrepreneurship with a regulatory environment that keeps pace with the constantly evolving tech sector.

COMMITTEE ACTION

On June 7, 2023, the Subcommittee on Innovation, Data, and Commerce held a hearing on blockchains. The title of the hearing was “Building Blockchains: Exploring Web3 and Other Applications for Distributed Ledger Technologies.” Witness testimony focused on the ways blockchains and other distributed ledger technologies are a general-purpose technology with a wide array of commercial applications. The Subcommittee received testimony from:

- Carla L. Reyes, Associate Professor of Law, SMU Dedman School of Law;
- Hasshi Sudler, Professor and Chief Executive Officer, Villanova University College of Engineering and Internet Think Tank, Inc.;
- Ryan Wyatt, President, Polygon Labs; and

³⁴ Electric Capital, *Developer Report* (October 1, 2023), <https://www.developerreport.com/developer-report-geography>.

- Ross Schulman, Senior Fellow, Decentralization, Electronic Frontier Foundation.

On September 20, 2023, the Subcommittee on Innovation, Data, and Commerce held a hearing on multiple bills, including draft text of the bill “To establish a supply chain resiliency and crisis response program in the Department of Commerce, and for other purposes.” The title of the hearing was “Mapping America’s Supply Chains: Solutions to Unleash Innovation, Boost Economic Resilience, and Beat China.” The Subcommittee received testimony from:

- Chris Griswold, Policy Director, American Compass;
- Deena Ghazarian, Founder and Chief Executive Officer, Austere;
- Justin Slaughter, Policy Director, Paradigm; and
- Scott Paul, President, Alliance for American Manufacturing.

On April 8, 2025, the full Committee on Energy and Commerce met in open markup session and ordered H.R. 1664, without amendment, favorably reported to the House by a voice vote.

COMMITTEE VOTES

Clause 3(b) of rule XIII requires the Committee to list the recorded votes on the motion to report legislation and amendments thereto. There were no record votes taken in connection with ordering H.R. 1664 reported.

OVERSIGHT FINDINGS AND RECOMMENDATIONS

Pursuant to clause 2(b)(1) of rule X and clause 3(c)(1) of rule XIII, the Committee held hearings and made findings that are reflected in this report.

NEW BUDGET AUTHORITY, ENTITLEMENT AUTHORITY, AND TAX EXPENDITURES

Pursuant to clause 3(c)(2) of rule XIII, the Committee finds that H.R. 1664 would result in no new or increased budget authority, entitlement authority, or tax expenditures or revenues.

CONGRESSIONAL BUDGET OFFICE ESTIMATE

Pursuant to clause 3(c)(3) of rule XIII, at the time this report was filed, the cost estimate prepared by the Director of the Congressional Budget Office pursuant to section 402 of the Congressional Budget Act of 1974 was not available.

FEDERAL MANDATES STATEMENT

The Committee adopts as its own the estimate of Federal mandates prepared by the Director of the Congressional Budget Office pursuant to section 423 of the Unfunded Mandates Reform Act.

STATEMENT OF GENERAL PERFORMANCE GOALS AND OBJECTIVES

Pursuant to clause 3(c)(4) of rule XIII, the general performance goal or objective of this legislation is to direct the Secretary of Commerce to take actions necessary and appropriate to promote the competitiveness of the United States related to the deployment,

use, application, and competitiveness of blockchains technology or other distributed ledger technology.

DUPLICATION OF FEDERAL PROGRAMS

Pursuant to clause 3(c)(5) of rule XIII, no provision of H.R. 1664 is known to be duplicative of another Federal program, including any program that was included in a report to Congress pursuant to section 21 of Public Law 111–139 or the most recent Catalog of Federal Domestic Assistance.

RELATED COMMITTEE AND SUBCOMMITTEE HEARINGS

Pursuant to clause 3(c)(6) of rule XIII, the following related hearings were used to develop or consider H.R. 1664:

- On February 1, 2023, the Subcommittee on Innovation, Data, and Commerce held a hearing entitled “Economic Danger Zone: How America Competes to Win the Future Versus China.” The Subcommittee received testimony from:
 - Brandon Pugh, Policy and Resident Senior Fellow, R Street Institute;
 - Jeff Farrah, Executive Director, Autonomous Vehicle Industry Association;
 - Samm Sacks, Cyber Policy Fellow, International Security Program, New America; and
 - Marc Jarsulic, Senior Fellow and Chief Economist, Center for American Progress.
- On June 7, 2023, the Subcommittee on Innovation, Data, and Commerce held a hearing titled “Building Blockchains: Exploring Web3 and Other applications for Distributed Ledger Technologies.” The Subcommittee received testimony from:
 - Carla L. Reyes, Associate Professor of Law, SMU Dedman School of Law;
 - Hasshi Sudler, Professor and Chief Executive Officer, Villanova University College of Engineering and Internet Think Tank, Inc.;
 - Ryan Wyatt, President, Polygon Labs; and
 - Ross Schulman, Senior Fellow, Decentralization, Electronic Frontier Foundation.
- On September 20, 2023, the Subcommittee on Innovation, Data, and Commerce held a hearing titled “Mapping America’s Supply Chains: Solutions to Unleash Innovation, Boost Economic Resilience, and Beat China.” The Subcommittee received testimony from:
 - Chris Griswold, Policy Director, American Compass;
 - Deena Ghazarian, Founder and Chief Executive Officer, Austere;
 - Justin Slaughter, Policy Director, Paradigm; and
 - Scott Paul, President, Alliance for American Manufacturing.

COMMITTEE COST ESTIMATE

Pursuant to clause 3(d)(1) of rule XIII, the Committee adopts as its own the cost estimate prepared by the Director of the Congressional Budget Office pursuant to section 402 of the Congressional

Budget Act of 1974. At the time this report was filed, the estimate was not available.

EARMARK, LIMITED TAX BENEFITS, AND LIMITED TARIFF BENEFITS

Pursuant to clause 9(e), 9(f), and 9(g) of rule XXI, the Committee finds that H.R. 1664 contains no earmarks, limited tax benefits, or limited tariff benefits.

ADVISORY COMMITTEE STATEMENT

No advisory committees within the meaning of section 5(b) of the Federal Advisory Committee Act were created by this legislation.

APPLICABILITY TO LEGISLATIVE BRANCH

The Committee finds that the legislation does not relate to the terms and conditions of employment or access to public services or accommodations within the meaning of section 102(b)(3) of the Congressional Accountability Act.

SECTION-BY-SECTION ANALYSIS OF THE LEGISLATION

Section 1. Short title

Section 1 provides that the Act may be cited as the “Deploying American Blockchains Act of 2025”.

Section 2. Definitions

Section 2 defines key terms throughout the legislation.

Section 3. Department of Commerce leadership on blockchain

Section 3 designates the Secretary of Commerce to serve as a principal advisor to the President pertaining to the deployment, use, application and competitiveness of blockchain technology or other distributed ledger technology, applications built on blockchain technology or other distributed ledger technology, tokens, or tokenization.

Section 3 states that the Secretary shall support the leadership of the United States with respect to the deployment, use, application, and competitiveness of blockchain technology, other distributed ledger technology, applications built on blockchain technology or other distributed ledger technology, tokens, or tokenization. Such activities shall include the establishment of a “Blockchain Deployment Program” at the Department of Commerce and an advisory committee to support the deployment, use, application, and competitiveness of blockchains technology or other distributed ledger technology, applications built on blockchain technology or other distributed ledger technology, tokens, and tokenization.

Section 3 states that the Secretary shall, on an ongoing basis, facilitate and support the development of a compendium of identified or recommended guidelines or best practices for the deployment of blockchain technology or other distributed ledger technology, applications built on blockchain technology or other distributed ledger technology, tokens, and tokenization. Such best practices shall be designed to support interoperability, reduce cybersecurity risk, support operations, and quantify the value and potential cost savings associated with adoption.

Section 3 states that, in carrying out the section, the Secretary shall consult regularly with stakeholders, collaborate with private-sector stakeholder to identify approaches to the deployment of blockchains, make public research and information on the use of blockchains, develop standardized terminology, develop best practices which ease the use of blockchains, support open-source infrastructure, and consider the needs of both the public and private sector.

Section 3 states that nothing in the section may be construed to require a private entity to share information with, request assistance from, implement any measure or recommendation suggested by, or adopt the best practices developed by, the Secretary of Commerce.

Section 3 states that in implementing the section, the Secretary of Commerce may consult with the heads of relevant Federal agencies. The Blockchain Deployment Program established in Section 3 shall terminate on the date that is 7 years after the date of the enactment of this Act.

Section 4. Report to Congress

Section 4 states that not later than 2 years after the date of the enactment of this Act, and annually thereafter, the Secretary of Commerce shall make publicly available and submit to the Committee on Energy and Commerce of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate a report on the activities of the Secretary under this Act for the previous year, any recommendation for additional legislation to strengthen American competitiveness with respect to blockchains, and a description of any emerging risks and long term trends with respect to blockchains.

CHANGES IN EXISTING LAW MADE BY THE BILL, AS REPORTED

This legislation does not amend any existing Federal statute.
