

Richard A. Williams, Ph.D. is the Board Chair of the Center for Truth in Science and has served for five years. He is also a Senior Affiliated Scholar with the Mercatus Center at George Mason University. He is the author of *Fixing Food: An FDA Insider Unravels the Myths and the Solutions* and is currently working on a science thriller. Dr. Williams is an expert in benefit-cost analysis and risk analysis and has been managing and analyzing regulations for over 45 years. He has 27 years of experience at the U.S. Food and Drug Administration, retiring as Director for Social Sciences; worked in the Office of Information and Regulatory Affairs. Most recently, he was a Vice President of Policy Research at the Mercatus Center as well as Director of the Regulatory Studies Program for nine years.

Dr. Williams has testified before the U.S. Congress on regulatory policy numerous times, has created and taught classes on risk analysis for USDA and FDA, taught economics at Washington and Lee University, George Mason University, and Virginia Tech. He has given invited presentations around the world including the United Kingdom, South Korea, Yugoslavia and Australia. His media appearances include NPR, Reuters, Bloomberg, the New York Times and the Wall Street Journal. He routinely publishes op-eds in outlets such as The Hill, RealClearHealth and The Washington Post. He writes a weekly post at richardawilliams.com about "Public health without politics." Dr. Williams received his Ph.D. in economics from Virginia Tech and his BS in business administration from Old Dominion University. He is a decorated Army veteran who served in Vietnam and was awarded the Bronze Star with two bronze oak leaf clusters.
