

Christian Lau is the Co-founder, President, and Chief Product Officer at Dynamo AI, a company that delivers secure, compliance-ready generative AI solutions for enterprises. He leads product development for large-scale AI deployments with customers such as Experian and Lenovo.

A Ph.D. graduate in Electrical Engineering and Computer Science from MIT, Christian brings deep technical expertise to Dynamo's mission. Under his leadership, the team launched Dynamo's guardrail products—DynamoGuard, DynamoEval, and DynamoEnhance—to help enterprises safely scale AI with low latency and strong guardrails.

He and his cofounder were recognized by Forbes 30 Under 30 Asia 2025 for their work advancing secure AI, and Christian actively engages the AI community—demanding responsible innovation in defense, financial services, and global operations.
