Michael D. Griffin is the Co-President and Co-Founder of LogiQ, Inc., a company providing high-end management, scientific, and technical consulting services.

He was previously the Under Secretary of Defense for Research and Engineering and the Department's Chief Technology Officer, responsible for research, development, and prototyping activities across the DoD enterprise, mandated with ensuring technological superiority for the Department of Defense. He oversaw the activities of the Defense Advanced Research Projects Agency, the Missile Defense Agency, the Defense Innovation Unit, the Strategic Capabilities Office, the DoD Laboratory enterprise, and the Under Secretariate staff focused on developing advanced technology and capability for the U.S. military.

Prior to re-joining DoD, Mike was Chairman and Chief Executive Officer of Schafer Corporation, a professional services provider in the national security sector. He has served as the King-McDonald Eminent Scholar and professor of Mechanical and Aerospace Engineering at the University of Alabama in Huntsville, as the Administrator of NASA, and as the Space Department Head at the Johns Hopkins University Applied Physics Laboratory. He previously held numerous executive positions in industry, including President and Chief Operating Officer of In-Q-Tel, CEO of Magellan Systems, and EVP/General Manager of Orbital ATK's Space Systems Group.

Griffin's earlier career includes service as both Chief Engineer and Associate Administrator for Exploration at NASA, and as the Deputy for Technology at the Strategic Defense Initiative Organization. Prior to joining SDIO in an executive capacity, he played a key role in conceiving and directing several "first of a kind" space tests in support of strategic defense research, development, and flight-testing. These included the first space-to-space intercept of a ballistic missile in powered flight, the first broad-spectrum spaceborne reconnaissance of targets and decoys in midcourse flight, and the first space-to-ground reconnaissance of ballistic missiles during the boost phase. He also played a leading role in other space missions at the John Hopkins University Applied Physics Laboratory and NASA's Jet Propulsion Laboratory.

Mike has been an adjunct professor at the University of Maryland, Johns Hopkins University and George Washington University, teaching spacecraft design, applied mathematics, guidance and navigation, compressible flow, computational fluid dynamics, spacecraft attitude control, estimation theory, astrodynamics, mechanics of materials, and introductory aerospace engineering. He is a registered professional engineer in California and Maryland, and the lead author of some two dozen technical papers and the textbook *Space Vehicle Design*.

He is a member of the National Academy of Engineering and the International Academy of Astronautics, an Honorary Fellow and former president of the American Institute of Aeronautics and Astronautics, an Honorary Fellow of the Royal Aeronautical Society, a Fellow of the American Astronautical Society and of the Institute of Electrical and Electronic Engineers, and a member of the Alabama Engineering Hall of Fame. He is the recipient of numerous honors and awards, including the NASA Exceptional Achievement Medal, the AIAA Space Systems Medal, the AIAA Goddard Astronautics Award, the National Space Club's Goddard Trophy, the Rotary National Award for Space Achievement, the Missile Defense Agency's Ronald Reagan Award, and was twice awarded the Department of Defense Distinguished Public Service Medal, the highest award that can be conferred on a civilian. In recognition of his contributions to the *Pluto New Horizons* mission, Asteroid 159999 Michaelgriffin was named in his honor.

Griffin obtained his B.A. in Physics from the Johns Hopkins University, which he attended as the winner of a Maryland Senatorial Scholarship. He holds Master's degrees in aerospace science from Catholic University, electrical engineering from the University of Southern California, applied physics from Johns Hopkins, civil engineering from George Washington University, and business administration from Loyola University. He received his Ph.D. in aerospace engineering from the University of Maryland and has been recognized with honorary doctoral degrees from Florida Southern College and the University of Notre Dame.

Mike is a 6,000-hour commercial pilot and multiengine instrument flight instructor and holds an Extra Class Amateur Radio license.
