The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON TERRORISM, TECHNOLOGY AND GOVERNMENT INFORMATION

Mr. SPECTER. Mr. President, I ask unanimous consent that the Subcommittee on Terrorism, Technology and Government Information of the Committee on the Judiciary, be authorized to meet during the session of the Senate on Wednesday, February 28, 1996, at 9:30 a.m., in the Senate Dirksen Building room 106 to hold a hearing on legislation to combat economic espionage.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON YOUTH VIOLENCE

Mr. SPECTER. Mr. President, I ask unanimous consent that the Subcommittee on Youth Violence of the Committee on the Judiciary, be authorized to meet during the session of the Senate on Wednesday, February 28, 1996, at 10 a.m., in the Senate Dirksen Building room 226 to hold a hearing on "the changing nature of youth violence."

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

NATIONAL AUTISM AWARENESS MONTH

• Mr. DOMENICI. Mr. President, I have long been active in issues of importance for individuals suffering from a mental illness or disability. Through my efforts in this area, I have become familiar with the vast spectrum of these disorders, and I have found that we as a society have much to learn about both the causes and cures for these illnesses. Knowledge of the medical conditions underpinning these disorders has only recently begun to make progress by leaps and bounds, and I fear that public awareness and knowl-

edge has not grown in step. Because society is still unfamiliar with these advances, an aura of fear and suspicion persists with regard to any one of the illnesses or disorders which afflict so many Americans. It is because of this widespread lack of knowledge and understanding that I rise today in recognition of the Autism Society of America's designation of January as "National Autism Awareness Month."

Autism is a neurological disorder that interrupts the brain's ability to process and understand information. Nearly 400,000 Americans suffer from this disorder, making it more prevalent than Down's syndrome or muscular dystrophy.

Autism is a complex, spectrum disorder that manifests itself in many ways. Symptoms and characteristics present themselves in a variety of combinations, and no two children or adults are affected in the same way.

Autism is not curable, but it is treatable. Many types of treatments have proven effective in combating this disorder, and improvements are being discovered every day.

A generation ago, nearly 90 percent of those suffering from autism were placed in an institution. Today, group homes, assisted living arrangements, and home care are much more common. Thanks to the Individuals With Disabilities Education Act, many children with autism receive appropriate education and go on to become contributing members of the work force.

In April 1995, in response to direction from Congress, the National Institutes of Health [NIH] held a State-of-the-Sciences Conference on Autism. Conference participants included scientists, clinicians, and parents. The conference highlighted how far we have come in diagnosing and treating autism, but also illuminated how far we have yet to go. National Autism Awareness Month is designed to bring attention to these issues, and seeks to further the Nation's understanding of this complicated and debilitating disorder. I fully support the Autism Society of America's designation of January as National Autism Awareness Month, I share their goal of teaching America more about this disorder, and I welcome my colleagues' support as well. •

AID'S INTERNATIONAL FAMILY PLANNING PROGRAM

• Mr. LEAHY. Mr. President, about a month ago when we passed the last continuing resolution, I spoke about the damage a provision included in the CR by the House of Representatives would cause to our international family planning programs. Senator HATFIELD, the chairman of the Appropriations Committee, also spoke at that time. We both expressed real concerns about what the House had done, and the effect it would have on the lives of millions of couples around the world especially women.

We also pointed out that the House had essentially handed us a fait accompli, since it recessed immediately thereafter and our only alternative to passing what they sent us in the form they sent it was to close down the Federal Government again. We passed the CR under protest, and I have been very encouraged by the strong stand the chairman of the Appropriations Committee has taken on this issue. He has always been a strong opponent of abortion, but he has also supported family planning and has made the point as eloquently as anyone that the way to reduce the number of abortions is to give couples the means to avoid unwanted pregnancies.

I am not going to repeat all that I said back then. Suffice it to say that as a result of the House action, millions of couples will be denied family planning services, including contraceptives, who want them, need them, and have no other access to them. It does not take a genius to realize that the result will be many more unwanted pregnancies, and many more abortions. In the countries where these family planning programs are carried out, abortion is often unsafe and the incidence of maternal death is alarmingly high.

I cannot believe that was the intent of the authors of the House provision, but how they could have failed to anticipate that result is beyond me. I can only conclude that they do not want the U.S. Government to provide assistance to couples who want to limit their number of children, even though these people want the assistance and many of them live in countries where millions of people go hungry each day.

A February 16, 1996, article in the Baltimore Sun made this same point. Not only does it discuss the steps AID Administrator Atwood has taken to improve efficiency at his agency, it notes that Congress rewarded him by cutting several hundreds of millions of dollars in AID's budget, cuts that I opposed. It cites the example of AID's family planning program, and points out that what the House has done will not only hurt mothers and infants, it will increase the very redtape Congress has been urging AID to cut.

As the article indicates, once again ideology won out over common sense. That seems to be a recurring theme around here.

Mr. President, I ask that the article be printed in the RECORD.

The article follows:

[From the Baltimore Sun, Feb. 16, 1996]
AID LEARNS THAT GOOD DEEDS DO NOT GO UNPUNISHED
(By Sara Ingram)

When the Clinton Administration preached "reinvention" of government the State Department's Agency for International Development (AID) heeded the call.

Along with the Federal Emergency Management Agency, AID became one of two federal "reinvention laboratories" where all the talk about more efficient more effective and less costly management turned into reality.

AID has shed some 70 senior level positions, each paying about \$100,000 a year. It
