WINTER IN NORTH DAKOTA

Mr. DORGAN. Mr. President, I rise to introduce a piece of legislation and also to discuss an issue that is very important to residents of my home State of North Dakota and residents of a good many States, particularly in the northern Great Plains. Let me begin by talking about some of the hardships and some of the challenges faced by Dakotans and by others in our part of the country as a result of an extraordinarily severe winter.

North Dakota has had six blizzards, which others might already know about, having heard the reports of these blizzards on television, news reports, and elsewhere, six blizzards from November 17 to January 15. The blizzards have been about as tough as any I have seen in North Dakota in my years in that wonderful State. It has been a tough, hard winter—lots of snow, lots of wind, conditions that are dangerous to people and to livestock.

I want to talk just a little about the challenges that these winters blizzards portray for our citizens and what the response has been. I want to tell you first about a young boy named Wyatt Magike who lived about 20 miles from the nearest medical center near Mandan, ND, or Bismarck, ND. Steve Conmy, who is the coordinator of emergency services for Morton County, during the middle of a blizzard about a week and a half ago told me about some of his plow and truck operators and what they were facing. I went out in a big plow with Mr. Conmy and we drove on the north edge of Mandan, ND, where snow covered the trailer houses altogether. In other words, the snow was to the roof of a trailer house so you could not see the trailer house. Getting there, you could not see anything in front of you because it was almost total white-out conditions—high wind, snow, a lot of snow pack, with blowing snow. Those are the kind of conditions that road crews all across

North Dakota have faced for some long while.

November 17, a very large blizzard and storm in North Dakota in the northeastern part of the State; December 16, 17, and 18, a winter blizzard through most all of North Dakota; December 20, 21, and 22, again, a big winter blizzard in the northeastern part of the State; January 4 and 5, a very severe winter blizzard throughout the State; January 15, another severe winter blizzard throughout the State. That is what our citizens have faced.

Now Wyatt Magike was 2 years old, and on a recent morning, at 10 o'clock in the morning a call was received by the Morton County emergency management group regarding a medical emergency down near Flasher, ND. This young child was very, very ill and he needed to be transported to the bismarck hospital immediately. He was dehydrated, severely vomiting blood. Everyone was very concerned about him and knew that he had to get medical attention immediately or he might die. Due to the road conditions and the weather reports, travel was impossible. The roads were completely blocked and the conditions were near white-out conditions. For people who do not know because they are not from our part of the country, a white out is when snow and blowing snow make it impossible to see anything in front of you. All the roads, including the main highways, were blocked with snowdrifts and there was zero visibility that morning.

What the emergency group did was coordinate two snowplows dispatched from Flasher, ND, to escort and ambulance crew from Flasher, ND. And then two snowplows were dispatched from Mandan, ND, also with an ambulance. They met at a major snow block on the highway east of Flasher, ND, and it took 45 minutes just for all that equipment to punch a hole through the snow that was blocking that road. This journey took some 6 hours by these road

crews, again at zero visibility, with snowblock virtually everywhere.

James Gerhardt and Gerald Friesy ran the plow and the truck from Flasher; Leland Gross and Robert Jochinm ran the snowplow and the truck from Mandan. And Steve Conmy said when he asked the folks to go out and do this, they did not wring their hands and say, "Gee, there is a risk out here." They said, "What equipment shall we take." They hit the road, and 6 hours later the young boy was in the hospital at Bismarck. The doctor said he would have died except for the heroic efforts by these folks.

Now, James, Gerald, Leland, and Robert are not well known by their deeds. They are just a road crew. When I say "just a road crew," they are heroes. There are road crews all over North Dakota working 8-hour after 8-hour shifts and risking their lives doing things that save other people's lives.

I mentioned this story only because a lot people do not understand the severity of the winter storms we have had. Lives have been lost in the Dakotas. We are now doing an assessment to find out how much livestock has been lost. Undoubtedly, a substantial amount of livestock loss has occurred. People have not been able to get through roads to feed the livestock. If they did, feed was not available. The result has been a very, very serious problem for people and for livestock in our State.

In the November 16 and 17 storm, we had 13 inches of snow fall in North Dakota; November 20, 6 inches; the 16th, 8 inches; December 20, 8 inches; 10 inches; 7 inches; on it goes. In each case, we had winds of 30, 40 and 50 miles an hour. In December and January there have been 10 days where the wind chill has been recorded at or below 50 below zero—10 days at or below 50 below zero. The other evening the wind chill was 80 below zero.

I am not trying to diminish our tourism efforts in North Dakota, although I expect there was precious little tourism in early January with forecasts of blizzards in our State, but it has been a very difficult circumstance. January 9, 83 below zero wind chill in Minot, ND. For 11 days in November to January it did not get above zero.

What to make of all of this and the challenge that it poses for North Dakotans. Clearly, North Dakotans who were isolated and stuck out in the country with roads impassable, often in need of medical help or in need of food or in need of feeding the cattle who also were at risk, needed some assistance.

I mentioned the emergency crews that were available, and all over the State in unknown ways by unknown people, they have committed heroic acts. But North Dakotans needed more help than that. They needed low-income energy assistance, especially for some areas on Indian reservations and elsewhere. They needed emergency feed assistance. Cities and counties and townships and others who have not been able to clear the roads, have not had enough equipment, needed assistance.

I am pleased to say that the Federal Emergency Management Agency and others are now in North Dakota at the President's direction. The State of North Dakota, the counties, the townships and the Federal Government are working together to respond to an extraordinarily difficult circumstance. We are not nearly through this. Winter is only about a third over. We do not know what the next couple of months will be for our State. But we know that North Dakotans have endured a very difficult winter so far. We hope for better conditions. Whatever happens, North Dakota will be prepared to deal with it and respond to it.

I do want the President to know and my colleagues to know that just as when a tornado comes along and wreaks havoc in an area, or where a raging flood gathers homes and runs the homes down a river, just as those emergencies such as an earthquake, for example, that causes chaos, just as they need to be responded to and always are responded to by the Federal Government, so, too, must this snow emergency and the storms and the deadly blizzards that have crossed our States in the northern Great Plains in recent weeks, so, too, must they be responded to in an appropriate way.

We are continuing to work on snow clearing, on low-income energy assistance issues, on feed assistance for livestock, and on many other approaches to try to help people and respond to the needs that exist as a result of this very severe winter.

Today, I wanted to at least tell my colleagues of the circumstances that we face and thank the President, thank the administration and others who have joined to help. I also wanted to describe the people who assisted the 2-

year-old boy. That has gone on across our State every day and in every way. To those who work in public service, those who man those graders and trucks and keep the roads open, punch through snowdrifts with zero visibility to protect life in North Dakota, I say: You are the real heroes, and North Dakotans and all of America owe you a debt of gratitude.

Mr. GRASSLEY. Mr. President, today is the first day in which the Senate will entertain legislation for the 105th Congress. I rise today to compliment various tax bills introduced by my colleagues for myself. Some of this legislation is in the leadership package. Other legislation has been introduced separately by other Senators. All of this legislation will reduce taxes on Americans trying to live the American Dream. I applaud these efforts. In fact, I have had a hand in writing or cosponsoring much of it in the 104th Congress. With this new Congress, we must break down the barriers that stand in the way of the next generation's shot at the American Dream. Our future depends on it.

The initiatives I support include, reinstating the income tax deduction for interest on student loans, reducing the capital gains tax, expanding individual retirement accounts, extending the employer provided education assistance programs, and finally, reducing the estate taxes. Collectively, these tax bills will provide necessary relief for all taxpayers. Hard working families and individuals deserve nothing less from their Federal Government.

STUDENT LOAN INTEREST DEDUCTION

The leadership package includes legislation that includes my provisions from the 104th Congress to reinstate the tax deduction for interest on student loans. It would allow an "above the line" deduction for up to \$2,500 in qualified interest. This means that students or their families will not have to itemize their income tax deductions to benefit from the deduction.

In 1986, the income tax deduction for interest on student loans was repealed. I believed then, as I believe now, that the repeal was a major mistake. Education is an investment both for students and the Nation. In exchange for hard work the student gets a tax deduction to make education affordable. In exchange for the student's commitment, the Nation gets a new taxpayer and sometimes a better citizen.

I commend the leader for selecting this initiative, and I welcome the opportunity to work with him to expand it.

CAPITAL GAINS TAX REDUCTION

Senator HATCH introduced legislation to reduce the income tax on capital gains. It is substantially similar to legislation passed by the last Congress but vetoed by the President. Since the President has since committed himself to capital gains relief, I am encouraged about the prospects for enactment of our provision authored by Senator HATCH. The President has suggested

much more narrow relief targeted at residential real estate. However, our broad-based cut is better for the small businesses, family farms, and individual taxpayers.

This morning, in testimony to the Senate Budget Committee, Federal Reserve Board Chairman Alan Greenspan said that the ideal capital gains tax rate is zero percent. Our bill would cut it in half. The President must consider our provision. Reducing the capital gains tax rate by 50% for taxpayers across the board, is essential to help grow the economy.

SUPER IRA'S

Senate Finance Committee Chairman ROTH, has, once again introduced his legislation to expand the number of people who can invest in individual retirement accounts. This legislation is vital given the dismal rate of savings by Americans. Americans want to save money. The problem is that our current system of taxes does not allow it. The Super IRA provision will give taxpayers a better vehicle to save more for retirement. Since the miracle of compound interest means that saving sooner saves more, we must take up this bill as soon as possible.

EMPLOYER PROVIDED EDUCATION ASSISTANCE

Finance Chairman ROTH was joined by Finance Ranking Minority Member MOYNIHAN in legislation to make permanent the income tax exclusion for employer provided education assistance. I am a proud cosponsor of this bill. This provision is set to expire. Congress must step up to the plate and, finally, permanently extend it. Last time, over my objections, we failed to extend the provision for graduate assistance. All students must be eligible for this assistance program.

ESTATE TAX REDUCTION

The leadership package includes legislation to reduce the estate tax burden of all Americans. It is included as part of S. 2. Reducing the estate tax is something that we almost accomplished in the last Congress. We need to take it up right away in this Congress. Historically, the estate tax was initiated as a temporary tax on the super wealthy during times of war. Later, it became a permanent part of the tax system, but still applied only to the rich. Over time, the effects of inflation have taken their toll. Now, we have middle income taxpayers hit with an estate tax burden intended for the wealthy. In my State of Iowa, we have a problem unique to us and other farm States. Some taxpayers have a double tax identity. They are cash poor because they have just enough cash-flow off of the farm to make ends meet. However, they are land rich because their family farm has appreciated during the period that they were family farmers. The estate tax ignores the fact that the farm is as much their family home as it is a business. The estate tax also ignores that they are middle income people at best, and were not intended to even pay the estate tax when it first came into being.

The leadership package is a good start. It cuts the estate tax for all taxpayers, including small businesses and farmers. Congress must find a way to improve the estate tax crisis in my State of Iowa, and other States. I look forward to continuing my work with the leader to accomplish an estate tax reduction.

ALTERNATIVE MINIMUM TAX ON FARMER
DEFERRED CONTRACTS

Finally, I want to make quick reference to tax repeal legislation that will be introducing tomorrow for myself and over 50 other original sponsors. Senators DORGAN, GORTON, BAUCUS, and I have campaigned to eliminate an IRS imposed tax on farmers and ranchers who sell crops or livestock on deferred contracts. Congress did not intend this tax. Only the IRS intends this tax. The broad bipartisan support that we have gathered tells me that Congress is going to repeal it. We will have more on this initiative tomorrow.

REPORT ON THE CONTINUATION
OF THE EMERGENCY REGARDING
TERRORISTS—MESSAGE FROM
THE PRESIDENT—PM 6

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Banking, Housing, and Urban Affairs.

To the Congress of the United States:

Section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)) provides for the automatic termination of a national emergency unless, prior to the anniversary date of its declaration, the President publishes in the *Federal Register* and transmits to the Congress a notice stating that the emergency is to continue in effect beyond the anniversary date. In accordance with this provision, I have sent the enclosed notice to the *Federal Register* for publication, stating that the emergency declared with respect to grave acts of violence committed by foreign terrorists that disrupt the Middle East peace process, is to continue in effect beyond January 23, 1997. The first notice continuing this emergency was published in the *Federal Register* last year on January 22, 1996.

The crisis with respect to the grave acts of violence committed by foreign terrorists that threaten to disrupt the Middle East peace process that led to the declaration of a national emergency, on January 23, 1995, has not been resolved. Terrorist groups continue to engage in activities with the purpose or effect of threatening the Middle East peace process, and which are hostile to U.S. interests in the region. Such actions threaten vital interests of the national security, foreign policy, and economy of the United States. For these reasons, I have determined that it is necessary to maintain in force the broad authorities necessary to deny any financial support from the United States for foreign terrorists that threaten to disrupt the Middle East peace process.

WILLIAM J. CLINTON.

S. 1. A bill to provide for safe and affordable schools; to the Committee on Finance.

THE SAFE AND AFFORDABLE SCHOOLS ACT OF 1997

Mr. COVERDELL. Mr. President, for people to remain free, they must be educated. It is at the foundation of our liberty. This bill that has just been referred owes a great debt to Senator COATS of Indiana, Senator GREGG of New Hampshire, Senator ROTH of Delaware, Senator JEFFORDS of Vermont, Senator BOND of Missouri, Senator SHELBY of Alabama, and Senator GRASSLEY of Iowa.

Mr. President, there is a grave condition in our elementary and high schools across the land. Forty-six percent of our students have made at least one change in daily routine because of concerns about personal safety. Twenty-nine percent said it was easy to get illegal drugs. Seventy-nine percent have friends who are regular drinkers. Sixty-eight percent can buy marijuana within a day. Sixty-two percent have friends who use marijuana.

During the last 15 years, Mr. President, tuition at 4-year public colleges and universities rose 234 percent. In contrast, median household income rose only 82 percent, putting an ever tighter squeeze on those families that choose to and desire to send their children to college.

Since 1990, American college students have borrowed over \$100 billion, and borrowing among students and families to seek their higher education has skyrocketed.

Mr. President, since 1965, the United States has spent half a trillion dollars—\$500 billion—on Federal education

programs, yet 66 percent of 17-year-olds do not read at a proficient level, and reading scores have been declining for three decades. Moreover, 75 percent of fourth graders nationally scored below the proficient level of reading.

Mr. President, the Safe and Affordable Schools Act believes that no family—no family—in America should be forced to send their student to an unsafe, violent, and drug-infested school. I repeat, no family should be forced—forced—to put their child in a school that is certifiably unsafe, certifiably drug ridden.

This act will provide choice for children attending unsafe schools and provide an escape route from those kinds of schools. This act will ensure safe and drug-free schools and offers a grant program to those schools who are building better safety in the school place.

It is hard to believe, Mr. President, that 40 percent of our students today do not feel safe in school. One in five are taking a weapon to school. There are 2,000 acts of violence every hour in American classrooms.

Every student who chooses to go to college ought to have an affordable plan to do it. At the center point of this legislation is the Bob Dole Educational Investment Account. This will allow a family to put \$1,000 a year, after tax, into an investment account of their choice, and when they are ready to send their child to school, the funds withdrawn from that account will occur with no tax liability. In other words, a plan setting forth, under the name of our former colleague, an opportunity for families to plan for their child's future education.

It will provide for the deduction of student loan interest. It will protect State prepaid tuition plans. It will provide and extend employer-provided educational assistance, and it will make nontaxable work-study awards, all geared toward making it possible for that family, that student, to provide for their higher education.

The Presiding Officer is very familiar with the Federal Government's propensity to force unfunded mandates on State and local governments. Such is the case with the individuals in the Disabilities Education Act, which was mandated by the Federal Government but never really paid for by the Federal Government. We are only making about a 7 percent to 8 percent contribution.

This act will authorize spending up to \$10 billion over the next 7 years so that the Federal Government will be a true partner in that mandate and fund upwards to 40 percent of this act that was imposed on State government, freeing those State governments of funds that they can use to better improve their educational system.

Mr. President, when students arrive at college they ought to be proficient in the basic skills. I just cited figures that said they are not. This act will promote adult education and family

literacy. The legislation provides \$400 million in the form of block grants to States to establish programs to combat illiteracy. The bill creates a separate \$100 million fund to provide incentive grants to encourage local innovation in addressing the problem of illiteracy.

Mr. President, I began my remarks by saying that one of the fundamental extensions of freedom is education. This has always been the case in America. We have come to a time when the schoolroom is not safe. Therefore, the education that must emanate there is severely impaired. This education is a function of the States. The Federal Government has a role in leadership and innovation and assistance. That is at the core of this legislation we are offering today.

Mr. President, I appreciate the opportunity to describe the act today.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Safe and Affordable Schools Act of 1997".

SEC. 2. FINDINGS AND PURPOSE.

(a) FINDINGS.—Congress finds that—

(1) in too many of our Nation's elementary and secondary schools the test confronting our Nation's children is survival, not learning;

(2) our Nation's schools will not be restored to excellence unless parents, States, and local communities take the lead; and

(3) the Federal Government's role in education is quite properly to encourage, not to mandate.

(b) PURPOSE.—The purpose of this Act is—

(1) to ensure that parents, local communities and States have the primary role in educating our Nation's children;

(2) to restore excellence to our Nation's schools;

(3) to give local communities and States maximum flexibility in administering Federal education programs;

(4) to allow education reforms to be tailored to the unique needs of local communities and States;

(5) to place the highest priority on providing our Nation's students with safe, drug-free learning environments;

(6) to ensure that the choice of whether to attend college is to the greatest extent possible the result of individual student desire and initiative, not the result of economic circumstances that leave young parents wondering how they can best provide such an education in the face of staggering college tuition costs;

(7) to focus resources on adult education, realizing that education often is a lifelong process; and

(8) to promote literacy by attacking our Nation's unacceptably high level of illiteracy.

TITLE I—SAFE AND DRUG-FREE SCHOOLS INITIATIVE

Subtitle A—Student Opportunity and Safety

SEC. 111. SHORT TITLE.

This subtitle may be cited as the "Student Opportunity and Safety Act".

SEC. 112. FINDINGS AND PURPOSE.

(a) FINDINGS.—The Congress finds as follows:

(1) Violence, crime, and illegal drug activity have increased significantly in our Nation's public schools.

(2) It is estimated that 3,000,000 violent acts or thefts occur in or near schools, and that one in five public high school students carries a weapon.

(3) The incidence of violence, and criminal and illegal drug activity within public elementary and secondary schools threatens the school environment and interferes with the learning process.

(4) 2,000,000 more children are using drugs in 1997 than were doing so in 1993. For the first time in the 1990s, over half of our Nation's graduating high school seniors have experimented with drugs and approximately 1 out of every 4 of the students have used drugs in the past month.

(5) After 11 years of declining marijuana use among children aged 12 to 17, such use doubled between 1992 and 1995. The number of 8th graders who have used marijuana in the past month has more than tripled since 1991.

(6) More of our Nation's school children are becoming involved with hard core drugs at earlier ages, as use of heroin and cocaine by 8th graders has more than doubled since 1991.

(7) Students have a right to be safe and secure in their persons while attending school.

(8) Low-income families whose children attend high poverty public schools generally lack the financial ability to enroll their children in private schools or the opportunity to choose to enroll their children in public schools less impacted by poverty, illegal drugs, or violence, while such alternatives are typically available to more affluent families.

(9) Numerous research studies, including the 1993 National Assessment of the Chapter 1 Program, have concluded that students attending high poverty public schools have much lower levels of academic achievement than other students, regardless of the income level of the family of such students.

(10) Federally supported efforts to meet the educational needs of disadvantaged children attending high poverty schools have had little, if any, success in improving student achievement, especially in the highest poverty schools and school districts.

(11) Evidence obtained from systematic evaluations of school choice demonstration projects that involve public and private, including sectarian, schools will make an important contribution toward resolving debates over the most effective means of improving the academic achievement of disadvantaged children.

(12) It is increasingly important that children from families of all income levels meet high standards of academic achievement, in order to exercise the responsibilities of citizenship and to compete in globally competitive markets.

(b) PURPOSE.—It is the purpose of this subtitle—

(1) to provide children from low-income families who attend unsafe schools with the option of attending safer schools;

(2) to improve schools and academic programs by providing certain low-income parents with increased consumer power and dollars to choose safer and drug-free schools and programs that such parents determine best fit the needs of their children;

(3) to engage more fully certain low-income parents in their children's schooling;

(4) through families, to provide at the school site new dollars that teachers and principals may use to help certain children achieve high educational standards; and

(5) to demonstrate, through a discretionary demonstration grant program, the effects of

projects that provide certain low-income families with more of the same choices regarding all schools, including public, private, or sectarian schools, that wealthier families have.

By Mr. ROTH (for himself and Mr. LOTT):

S. 2. A bill to amend the Internal Revenue Code of 1986 to provide tax relief for American families, and for other purposes; to the Committee on Finance.

THE AMERICAN FAMILY TAX RELIEF ACT

Mr. ROTH. Mr. President, the comedian Henny Youngman told a joke that highlights America's family friendly tax system.

"The people who make our taxes are very nice," he said. "They're letting me keep my mother."

Certainly, our tax laws were never quite this bad, but the humor hinted at the fact that the laws were not altogether family friendly. The family, in fact, has taken it right in the pocketbook. More and more, we are hearing that oft-quoted fact that today the average American family spends more on taxes than it spends on food, clothing and shelter combined. Today, many families need a second earner to make ends meet, because too much of their income is taken by Government.

At the end of World War II, the median income for a family of four was \$3,468. At the time, the first \$2,667 of income for such families were tax exempt, meaning that three-quarters of median family income was exempt from taxation.

Over the years, inflation ate away at the value of the standard deduction and personal exemptions. The result was that average families paid more and more of their income in taxes.

In 1983, the median family income for a family of four was \$29,184, but only the first \$8,783 of income was exempt from tax—less than one-third. As my good friend and distinguished colleague, DANIEL PATRICK MOYNIHAN, has

pointed out with these statistics, Government tax policies have adversely affected family life.

In 1948, a family of four at the median income level paid 2 percent—2 percent—of its income in Federal taxes. Today, a family of four pays 24 percent.

The time has come to address this disturbing trend. Our tax policies must be changed in light of current realities and critical needs. The American family has been shackled with the excess burden of taxes, I believe, in part because family was such a constant and stable foundation for our society, an enduring unit that could be depended on to carry the burden. But the consequences of that burden and other economic and social factors have succeeded in ravaging the family. Indeed, in society today, the family is under assault, and too many of the policies that are coming out of Washington are increasing the problem rather than providing the solution.

As chairman of the Senate Finance Committee, I intend to work with my colleagues to address these policies and trends, and I laud the spirit of the tax bill introduced today and believe that we can build bipartisan support to advance its overall objectives. The American Family Tax Relief Act is a strong first step towards restoring a sense of economic equilibrium to our families and offers a \$500-per-child tax credit, a capital gains tax cut, estate and gift tax relief, and expanded individual retirement accounts.

At one time or another, each of these proposals has found bipartisan support, and I believe Senators on both sides of the aisle will see this bill as a strong first step toward achieving a mutually shared objective. This legislation sets the spirit for debate. It has the welfare and future of the family at heart.

As introduced, this bill calls for a permanent \$500-per-child tax credit for children under 18 years of age. The capital gains tax cut allows individuals to deduct 50 percent of their capital gains and allows families that sell their homes at a loss to treat it as a capital loss for purposes of a tax deduction. This bill allows an individual to pass up to \$1 million tax free as a gift during life or at the time of death. It excludes from estate taxes the first \$1.5 million in value of certain qualified family-owned businesses or farm interests and 50 percent of the value in excess of \$1.5 million.

The American Family Tax Relief Act expands the power and availability of IRAs by permitting homemakers to have IRAs, regardless of their spouse's participation in a pension program, and by raising income limits to include more families. It also creates a backloaded IRA that permits after-tax contribution and tax-free withdrawals of earnings after the taxpayer reaches age 59½. This is a provision I have sought for some time, along with allowing for penalty-free withdrawal for education expenses, which is also included in the package.

Again, Mr. President, this is a strong place to start. I appreciate the leadership—particularly our majority leader TRENT LOTT—for working with us to establish this foundation. Now we must go about the legislative process, building the consensus we need to see it implemented and achieving the real tax relief American families not only desire but need.

Mr. President, I ask unanimous consent that additional material be printed in the RECORD.

There being no objection, the materials were ordered to be printed in the RECORD, as follows:

S. 2

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

**DESCRIPTION OF S. 2—AMERICAN FAMILY TAX RELIEF ACT
INTRODUCTION**

This document,¹ prepared by the staff of the Joint Committee on Taxation, provides a description of S. 2 (“American Family Tax Relief Act”). S. 2 was introduced on January 21, 1997, by Senators Roth and Lott.

Part I of the document is a summary of the bill. Part II is a description of the provisions of the bill: Title I of the bill provides a child tax credit for children under age 18; Title II relates to capital gains and loss provisions; Title III relates to estate and gift tax provisions; and Title IV relates to individual retirement account (“IRA”) provisions.

The document (Part III) also provides estimated revenue effects of the bill for fiscal years 1997–2007.

I. SUMMARY OF S. 2 (“AMERICAN FAMILY TAX RELIEF ACT”)

Child tax credit (title I)

The bill would allow taxpayers a non-refundable tax credit of \$500 for each qualifying child under the age of 18. The credit amount would not be indexed for inflation. For taxpayers with AGI in excess of certain thresholds, the allowable child credit would

be reduced by \$25 for each \$1,000 of AGI (or fraction thereof) in excess of the threshold. For married taxpayers filing joint returns, the threshold would be \$110,000. For taxpayers filing single or head of household returns, the threshold would be \$75,000. For married taxpayers filing separate returns, the threshold would be \$55,000. These thresholds are not indexed for inflation. The provision would be effective for taxable years beginning after December 31, 1996.

Capital gains provisions (title II)

This bill would allow individuals a deduction equal to 50 percent of net capital gain for the taxable year. The bill repeals the present-law maximum 28-percent rate. Thus, the effective rate under the regular tax on the net capital gain of an individual in the highest (i.e., 39.6 percent) marginal rate bracket would be 19.8 percent. In addition, the bill would provide an alternative tax of 28 percent on the net capital gain of a corporation if that rate is less than the corporation's regular tax rate.

The bill generally would provide for an inflation adjustment to (i.e., indexing of) the adjusted basis of certain assets for purposes of determining gain (but not loss) upon a sale or other disposition of such assets by a taxpayer other than a C corporation. To be eligible for indexing, an asset must be held by the taxpayer for more than three years.

In addition, the bill would make certain modifications related to the present-law exclusion for gain from certain small business stock. The bill would repeal the minimum tax preference applicable to such gain, increase the size of an eligible corporation from gross assets of \$50 million to gross assets of \$100 million, repeal the limitation on the amount of gain an individual can exclude with respect to the stock of any corporation, modify the working capital requirements, and provide corporate taxpayers an alternative rate of 21 percent on the gain from the sale or exchange of qualified small business stock (other than stock of a subsidiary corporation).

The bill would provide that losses recognized by a taxpayer on the sale of his or her personal residence may be deducted as capital losses rather than be treated as non-deductible personal losses.

The changes generally would be effective for dispositions occurring after December 31, 1996. In the case of the indexing of the basis of assets, the bill would be effective for dispositions occurring after December 31, 1996, with respect to assets the holding period of which begins after December 31, 1996.

Estate and gift tax provisions (title III)

Increases in Estate and Gift Tax Unified Credit

The bill would increase ratably the present-law unified estate and gift tax credit over an 8-year period beginning in 1997, from an effective exemption of \$600,000 to an effective exemption of \$1,000,000. The full \$1,000,000 effective exemption would be available for decedents dying, and gifts made, after December 31, 2003.

Estate Tax Exclusion for Qualified Family-Owned Businesses

The bill would provide special estate tax treatment for qualified “family-owned business interests” if such interests comprise more than 50 percent of a decedent's estate. Subject to certain requirements, the bill would exclude the first \$1,500,000 in value of qualified family-owned business interests from the decedent's estate and would also exclude 50 percent of the remaining value of qualified family-owned business interests. In general, a qualified family-owned business interest would be any nonpublicly-traded interest in a trade or business (regardless of

the form in which it is held) with a principal place of business in the United States if ownership of the trade or business is held at least 50 percent by one family, 70 percent by two families, or 90 percent by three families, as long as the decedent's family owns at least 30 percent of the trade or business. To qualify for the beneficial treatment, the decedent (or a member of the decedent's family) must have owned and materially participated in the trade or business for at least five of the eight years preceding the decedent's death, and each qualified heir (or a member of the qualified heir's family) would be required to materially participate in the trade or business for at least five years of each eight-year period ending within ten years after the decedent's death.

The provision would be effective for decedents dying after December 31, 1996.

Installment Payments of Estate Tax Attributable to Closely Held Business

The bill would extend the period for which Federal estate tax installments could be made under section 6166 to a maximum period of 24 years. If the election were made, the estate would pay only interest for the first four years, followed by up to 20 annual installments of principal and interest. Under the bill, there would be no interest imposed on the amount of deferred estate tax attributable to the first \$1,000,000 in value of the closely held business. The interest rate imposed on the amount of deferred estate tax attributable to the value of the closely held business in excess of \$1,000,000 would remain as under present law (i.e., the rate applicable to underpayments of tax under section 6621, which is the Federal short-term rate plus 3 percentage points). The provision would be effective for decedents dying after December 31, 1996.

IRA provisions (title IV)

Restoration of IRA Deduction for All Taxpayers

The bill would increase the AGI limits applicable to deductible IRA contributions for active participants in 1997, 1998, 1999, and 2000. Thereafter, the bill would repeal the limits on IRA deductions for active participants in employer-sponsored retirement plans. Thus, under the bill, after 2000, an individual would be entitled to make a \$2,000 deductible IRA contribution without regard to whether the individual was an active participant in an employer-sponsored retirement plan. The bill would be effective for taxable years beginning after December 31, 1996.

Allow Full Spousal IRA Deduction for Nonworking Spouses

The bill would permit nonworking spouses to make a full deductible IRA contribution, effective for taxable years beginning after December 31, 1996.

Nondeductible Contributions to Tax-Free IRA Plus Accounts

The bill would permit taxpayers to make nondeductible contributions to new IRA Plus accounts. Generally, IRA Plus accounts would be treated in the same manner as and be subject to the same rules applicable to deductible IRAs.

Under the bill, any qualified distribution from an IRA Plus account would not be included in gross income and would not be subject to the 10-percent additional income tax on early withdrawals. A qualified distribution from an IRA Plus account would include any payment or distribution (1) made on or after the date the IRA Plus owner attains age 59½, (2) made to a beneficiary of the IRA Plus owner after death, (3) on account of disability of the IRA Plus owner, or (4) which is a qualified special purpose distribution (i.e.,

a distribution for medical expenses, the costs of starting a business of the IRA Plus owner or the owner's spouse, long-term unemployment, and higher education expenses).

The bill would permit amounts withdrawn from IRAs to be transferred into an IRA Plus. The amount transferred would be includible in gross income in the year the withdrawal was made, except that amounts transferred to an IRA Plus before January 1, 1999, would be includible in income rapidly over a 4-year period. The 10-percent early withdrawal tax would not apply to amounts transferred from an IRA to an IRA Plus account.

The provisions of the bill relating to IRA Plus accounts would be effective for taxable years beginning after December 31, 1996.

Penalty-Free IRA Withdrawals for Starting a Business, Long-Term Unemployment, and Post Secondary Education Expenses

The bill would permit penalty-free and tax-free withdrawals from an individual retirement arrangement (IRA) for starting a business of the IRA owner, starting a business of the spouse of the IRA owner, in the case of long-term unemployment of the IRA owner, for any reason, and for the post-secondary education expenses of the IRA owner, the spouse of the IRA owner, or a dependent child of the IRA owner or spouse. The provision would be effective for distributions after December 31, 1996.

II. DESCRIPTION OF THE BILL

A. Child tax credit for children under age 18 (title I)

Present Law

Present law does not provide tax credits based solely on the taxpayer's number of dependent children. Taxpayers with dependent children, however, generally are able to claim a personal exemption for each of these dependents. The total amount of personal exemptions is subtracted (along with certain other items) from adjusted gross income (AGI) in arriving at taxable income. The amount of each personal exemption is \$2,650 for 1997, and is adjusted annually for inflation. In 1997, the amount of the personal exemption is phased out for taxpayers with AGI in excess of \$121,200 for single taxpayers, \$151,500 for heads of household, and \$181,800 for married couples filing joint returns. These phaseout thresholds are adjusted annually for inflation.

Description of the Bill

The bill would allow taxpayers a non-refundable tax credit of \$500 for each qualifying child under the age of 18. The credit amount would not be indexed for inflation.

For taxpayers with AGI in excess of certain thresholds, the allowable child credit would be reduced by \$25 for each \$1,000 of AGI (or fraction thereof) in excess of the threshold. For married taxpayers filing joint returns, the threshold would be \$110,000. For taxpayers filing single or head of household returns, the threshold would be \$75,000. For married taxpayers filing separate returns, the threshold would be \$55,000. These thresholds would not be indexed for inflation.

Effective Date

The provision would be effective for taxable years beginning after December 31, 1996.

B. Capital gains provisions (title II)

1. 50-Percent Capital Gains Deduction for Individuals (Sec. 201 of the Bill)

Present Law

In general, gain or loss reflected in the value of an asset is not recognized for income tax purposes until a taxpayer disposes of the asset. On the sale or exchange of capital assets, the net capital gain is taxed at the same rate as ordinary income, except

that individuals are subject to a maximum marginal rate of 28 percent of the net capital gain. Net capital gain is the excess of the net long-term capital gain for the taxable year over the net short-term capital loss for the year. Gain or loss is treated as long-term if the asset is held for more than one year.

A capital asset generally means any property except (1) inventory, stock in trade, or property held primarily for sale to customers in the ordinary course of the taxpayer's trade or business, (2) depreciable or real property used in the taxpayer's trade or business, (3) specified literary or artistic property, (4) business accounts or notes receivable, or (5) certain U.S. publications. In addition, the net gain from the disposition of certain property used in the taxpayer's trade or business is treated as long-term capital gain. However, gain is not treated as capital gain to the extent of previous depreciation allowances (in the case of real property, generally one to the extent in excess of the allowances that would have been available under the straight-line method).

Prior to the enactment of the Tax Reform Act of 1986, individuals were allowed a deduction equal to 60 percent of net capital gain. The deduction resulted in a maximum effective tax rate of 20 percent on such gains.

Capital losses are generally deductible in full against capital gains. In addition, individuals may deduct capital losses against up to \$3,000 of ordinary income in each year. Capital losses in excess of the amount deductible are carried forward indefinitely. Prior to the Tax Reform Act of 1986, individuals were required to use two dollars of long-term capital loss to offset each dollar of ordinary income.

Description of the Bill

The bill would allow individuals a deduction equal to 50 percent of net capital gain for the taxable year. The bill would repeal the present-law maximum 28-percent rate. Thus, under the bill, the effective rate under the regular tax on the net capital gain of an individual in the highest (i.e., 39.6 percent) marginal rate bracket would be 19.8 percent.

Collectibles would not be allowed the capital gains deduction; instead a maximum rate of 28 percent would apply to the gain of an individual from the sale or exchange of collectibles held for more than one year.

The bill would reinstate the rule in effect prior to the 1986 Tax Reform Act that required two dollars of the long-term capital loss of an individual to offset one dollar of ordinary income. The \$3,000 limitation on the deduction of capital losses against ordinary income would continue to apply.

Effective Date

The provision would generally apply to taxable years ending after December 31, 1996.

For a taxpayer's taxable year that includes January 1, 1997, the 50-percent capital gains deduction would not apply to any amount properly taken into account before January 1, 1997. In the case of gain taken into account by a pass-through entity (i.e., a RIC, a REIT, a partnership, an estate or trust, or a common trust fund), the date taken into account by the entity would be the appropriate date for applying this rule.

The capital loss rule would apply to taxable years beginning after December 31, 1997, but would not apply to the carryover of capital losses sustained in taxable years beginning before January 1, 1998.

The bill would not affect the capital gains treatment of lump sum distributions grandfathered by the Tax Reform Act of 1986.

2. Indexing of Basis of Certain Assets for Purposes of Determining Gain (Sec. 202 of the Bill)

Present Law

Under present law, gain or loss from the disposition of any asset generally is the sales

price of the asset reduced by the taxpayer's adjusted basis in that asset. The taxpayer's adjusted basis generally is the taxpayer's cost in the asset adjusted for depreciation, depletion, and certain other amounts. No adjustment is allowed for inflation.

Description of the Bill

In general

The bill generally would provide for an inflation adjustment to (i.e., indexing of) the adjusted basis of certain assets (called "indexed assets") for purposes of determining gain (but not loss) upon a sale or other disposition of such assets by a taxpayer other than a C corporation. Assets held by trusts, estates, S corporations, regulated investment companies ("RICs"), real estate investment trusts ("REITs"), and partnerships are eligible for indexing, to the extent gain on such assets is taken into account by taxpayers other than C corporations.

Indexed assets

Assets eligible for the inflation adjustment generally would include common (but not preferred) stock of C corporations and tangible property that are capital assets or property used in a trade or business. To be eligible for indexing, an asset must be held by the taxpayer for more than three years.

Computation of inflation adjustment

The inflation adjustment under the provision would be computed by multiplying the taxpayer's adjusted basis in the indexed asset by an inflation adjustment percentage. The inflation adjustment percentage would be the percentage by which the gross domestic product deflator for the last calendar quarter ending before the disposition exceeds the gross domestic product deflator for the last calendar quarter ending before the asset was acquired by the taxpayer. The inflation adjustment percentage would be rounded to the nearest one-tenth of a percent. No adjustment would be made if the inflation adjustment is one or less.

Special entities

RICs and REITs

In the case of a RIC or a REIT, the indexing adjustments generally would apply in computing the taxable income and the earnings and profits of the RIC or REIT. The indexing adjustments, however, would not be applicable in determining whether a corporation qualifies as a RIC or REIT.

In the case of shares held in a RIC or REIT, partial indexing generally would be provided by the provision based on the ratio of the value of indexed assets held by the entity to the value of all its assets. The ratio of indexed assets to total assets would be determined quarterly (for RICs, the quarterly ratio would be based on a three-month average). If the ratio of indexed assets to total assets exceeds 80 percent in any quarter, full indexing of the shares would be allowed for that quarter. If less than 20 percent of the assets are indexed assets in any quarter, no indexing would be allowed for that quarter for the shares. Partnership interests held by a RIC or REIT would be subject to a look-through test for purposes of determining whether, and to what degree, the shares in the RIC or REIT are indexed.

A return of capital distribution by a RIC or REIT generally would be treated by a shareholder as allocable to stock acquired by the shareholder in the order in which the stock was acquired.

Partnership and S corporations, etc.

Under the bill, stock in an S corporation or an interest in a partnership or common trust fund would not be an indexed asset. Under the provision, the individual owner would receive the benefit of the indexing adjustment when the S corporation, partnership, or com-

mon trust fund disposes of indexed assets. Under the provision, any inflation adjustments at the entity level would flow through to the holders and result in a corresponding increase in the basis of the holder's interest in the entity. Where a partnership has a section 754 election in effect, a partner transferring his interest in the partnership would be entitled to any indexing adjustment that has accrued at the partnership level with respect to the partner and the transferee partner is entitled to the benefits of indexing for inflation occurring after the transfer.

The indexing adjustment would be disregarded in determining any loss on the sale of an interest in a partnership, S corporation or common trust fund.

Foreign corporations

Common stock of a foreign corporation generally would be an indexed asset if the stock is regularly traded on an established securities market. Indexed assets, however, would not include stock in a foreign investment company, a passive foreign investment company (including a qualified electing fund), a foreign personal holding company, or, in the hands of a shareholder who meets the requirements of section 1248(a)(2) (generally pertaining to 10-percent shareholders of controlled foreign corporations), any other foreign corporation. An American Depository Receipt (ADR) for common stock in a foreign corporation would be treated as common stock in the foreign corporation and, therefore, the basis in an ADR for common stock generally would be indexed.

Other rules

Improvements and contributions to capital

No indexing would be provided for improvements or contributions to capital if the aggregate amount of the improvements or contributions to capital during the taxable year with respect to the property or stock is less than \$1,000. If the aggregate amount of such improvements or contributions to capital is \$1,000 or more, each addition would be treated as a separate asset acquired at the close of the taxable year.

Suspension of holding period

No indexing adjustment would be allowed during any period during which there is a substantial diminution of the taxpayer's risk of loss from holding the indexed asset by reason of any transaction entered into by that taxpayer, or a related party.

Short sales

In the case of a short sale of an indexed asset with a short sale period in excess of three years, the bill would require that the amount realized be indexed for inflation for the short sale period.

Related parties

The bill would not index the basis of property for sales or dispositions between related persons, except to the extent the adjusted basis of property in the hands of the transferee is a substituted basis (e.g. gifts).

Collapsible corporations

Under the bill, indexing would not reduce the amount of ordinary gain that would be recognized in cases where a corporation is treated as a collapsible corporation (under Code sec. 341) with respect to a distribution or sale of stock.

Effective Date

The provision would apply to dispositions of property the holding period of which begins after December 31, 1996. The provision also would apply to a principal residence held by the taxpayer on January 1, 1997 (as if the holding period began on that date). An individual holding any indexed asset (other than a personal residence) on January 1, 1997, may elect to treat the indexed asset as hav-

ing been sold and reacquired for its fair market value.

3. Small Business Stock (Sec. 203 of the Bill) Present Law

The Revenue Reconciliation Act of 1993 provided individuals a 50-percent exclusion for the sale of certain small business stock acquired at original issue and held for at least five years. One-half of the excluded gain is a minimum tax preference.

The amount of gain eligible for the 50-percent exclusion by an individual with respect to any corporation is the greater of (1) ten times the taxpayer's basis in the stock or (2) \$10 million.

In order to qualify as a small business, when the stock is issued, the gross assets of the corporation may not exceed \$50 million. The corporation also must meet an active trade or business requirement.

Description of the Bill

Under the bill, the maximum rate of regular tax on the qualifying gain from the sale of small business stock by a taxpayer other than a corporation would remain at 14 percent. The minimum tax preference would be repealed.

The bill would increase the size of an eligible corporation from gross assets of \$50 million to gross assets of \$100 million. The bill would also repeal the limitation on the amount of gain an individual can exclude with respect to the stock of any corporation.

The bill would provide that certain working capital must be expended within 5 years (rather than two years) in order to be treated as used in the active conduct of a trade or business. No limit on the percent of the corporation's assets that are working capital would be imposed.

The bill would provide that if the corporation establishes a business purpose for a redemption of its stock, the redemption is disregarded in determining whether other newly issued stock could qualify as eligible stock.

Effective Date

The increase in the size of corporations whose stock is eligible for the exclusion would apply to stock issued after the date of the enactment of the bill. The remaining provisions would apply to stock issued after August 10, 1993 (the original effective date of the small business stock provision).

4. 28-Percent Corporate Alternative Tax for Capital Gains (Sec. 204 of the Bill) Present Law

Under present law, the net capital gain of a corporation is taxed at the same rate as ordinary income, and subject to tax at graduated rates up to 35 percent. Prior to the Tax Reform Act of 1986, the net capital gain of a corporation was subject to a maximum effective tax rate of 28 percent.

Description of the Bill

The bill would provide an alternative tax of 28 percent on the net capital gain of a corporation if that rate is less than the corporation's regular tax rate.

The bill would also provide an alternative rate of 21 percent on the gain from the sale or exchange of qualified small business stock (other than stock of a subsidiary corporation) held more than 5 years.

Effective Date

The provision would generally apply to taxable years ending after December 31, 1996. For a taxable year which includes January 1, 1997, the 28-percent rate would apply to the lesser of (1) the net capital gain for the taxable year or (2) the net capital gain taking into account only gain or loss properly taken into account for the portion of the taxable year after December 31, 1996.

The small business stock provision would apply to stock issued after the date of enactment.

5. Capital Loss Deduction on the Sale or Exchange of a Principal Residence (Sec. 205 of the Bill)

Present Law

Under present law, the sale or exchange of a principal residence is treated as a non-deductible personal loss.

Description of the Bill

The bill would provide that a loss from the sale or exchange of a principal residence would be treated as a deductible capital loss.

Effective Date

The provision would apply to sales and exchanges after December 31, 1996.

C. Estate and gift tax provisions (title III)

1. Increase Estate and Gift Tax Unified Credit (Sec. 301 of the Bill)

Present Law

A unified credit is available with respect to taxable transfers by gift and at death. Since 1987, the unified credit amount has been fixed at \$192,800, which effectively exempts a total of \$600,000 in cumulative taxable transfers from the estate and gift tax. The benefits of the unified credit (and the graduated estate and gift tax rates) are phased out by a 5-percent surtax imposed upon cumulative taxable transfers over \$10 million and not exceeding \$21,040,000.²

The unified credit was originally enacted in the Tax Reform Act of 1976. The unified credit has not been increased since 1987.

Description of the Bill

The bill would increase the present-law unified credit over an eight-year period beginning in 1997, from an effective exemption of \$600,000 to an effective exemption of \$1,000,000. The increase would be phased in as follows:

Decedents Dying and Gifts

Made in	Effective exemption
1997	\$650,000
1998	700,000
1999	750,000
2000	800,000
2001	850,000
2002	900,000
2003	950,000
2004 and thereafter	1,000,000

Conforming amendments to reflect the increased unified credit are made (1) to the general filing requirements for an estate tax return under section 6018(a), and (2) to the amount of the unified credit allowed under section 2102(c)(3) with respect to nonresident aliens with U.S. situs property who are residents of certain treaty countries.

Effective Date

The provision would apply to the estates of decedents dying, and gifts made, after December 31, 1996.

2. Estate Tax Exclusion for Qualified Family-Owned Businesses (Sec. 302 of the Bill)

Present Law

There are no special estate tax rules for qualified family-owned businesses. All taxpayers are allowed a unified credit in computing the taxpayer's estate and gift tax, which effectively exempts a total of \$600,000 in cumulative taxable transfers from the estate and gift tax (sec. 2010). An executor also may elect, under section 2032A, to value certain qualified real property used in farming or another qualifying closely-held trade or business at its current use value, rather than

its highest and best use value (up to a maximum reduction of \$750,000). In addition, an executor may elect to pay the Federal estate tax attributable to a qualified closely-held business in installments over, at most, a 14-year period (sec. 6166). The tax attributable to the first \$1,000,000 in value of a closely-held business is eligible for a special 4-percent interest rate (sec. 6601(j)).

Description of the Bill

The bill would provide special estate tax treatment for qualified "family-owned business interests" if such interests comprise more than 50 percent of a decedent's estate. Subject to certain requirements, the bill would exclude the first \$1.5 million of value in qualified family-owned business interests from a decedent's estate, and also would exclude 50 percent of the remaining value of qualified family-owned business interests. This new exclusion for qualified family-owned business interests would be provided in addition to the unified credit.

A qualified family-owned business interest would be defined as any interest in a trade or business (regardless of the form in which it is held) with a principal place of business in the United States if one family owns at least 50 percent of the trade or business, two families own 70 percent, or three families own 90 percent, as long as the decedent's family owns at least 30 percent of the trade or business. An interest in a trade or business would not qualify if any interest in the business (or a related entity) was publicly-traded at any time within three years of the decedent's death. An interest in a trade or business also would not qualify if more than 35 percent of the adjusted ordinary gross income of the business for the year of the decedent's death was personal holding company income (as defined in sec. 543). In the case of a trade or business that owns an interest in another trade or business (i.e., "tiered entities"), special look-through rules would apply. The value of a trade or business qualifying as a family-owned business interest would be reduced to the extent the business holds passive assets or excess cash or marketable securities.

To qualify for the beneficial treatment provided under the bill the decedent (or a member of the decedent's family) must have owned and materially participated in the trade or business for at least five of the eight years preceding the decedent's date of death. In addition, each qualified heir (or a member of the qualified heir's family) would be required to materially participate in the trade or business for at least five years of each eight-year period ending within ten years following the decedent's death.

The benefit of the exclusion for qualified family-owned business interests would be subject to recapture if, within 10 years of the decedent's death and before the qualified heir's death, one of the following "recapture events" occurs: (1) the qualified heir ceases to meet the material participation requirements; (2) the qualified heir disposes of any portion of his or her interest in the family-owned business, other than by a disposition to a member of the qualified heir's family or through a qualified conservation contribution; (3) the principal place of business of the trade or business ceases to be located in the United States; or (4) the qualified heir loses U.S. citizenship.

The portion of the reduction in estate taxes that is recaptured would depend upon the number of years that the qualified heir (or members of the qualified heir's family) materially participated in the trade or business between the date of the decedent's death and the date of the recapture event. If the qualified heir (or his or her family members) materially participated in the trade or

business after the decedent's death for less than six years, 100 percent of the reduction in estate taxes attributable to that heir's interest would be recaptured; if the participation was for at least six years but less than seven years, 80 percent of the reduction in estate taxes would be recaptured; if the participation was for at least seven years but less than eight years, 60 percent would be recaptured; if the participation was for at least eight years but less than nine years, 40 percent would be recaptured; and if the participation was for at least nine years but less than ten years, 20 percent of the reduction in estate taxes would be recaptured. In general, there would be no requirement that the qualified heir (or members of his or her family) continue to hold or participate in the trade or business more than 10 years after the decedent's death. As under present-law section 2032A, however, the 10-year recapture period could be extended for a period of up to two years if the qualified heir did not begin to use the property for a period of up to two years after the decedent's death.

In addition, the bill would coordinate the benefit for qualified family-owned business interests with the present-law benefits relating to special-use valuation (sec. 2032A) and the special 4-percent interest rate available for closely-held businesses (sec. 6601(j)). The bill would provide that any amount excluded from a decedent's estate under the qualified family-owned business provision would reduce the ceilings with respect to both section 2032A and section 6601(j). Thus, for example, if a decedent had \$100,000 of qualified family-owned business interests, the entire value of his qualified family-owned business property would be excluded from the estate; if the decedent's estate also qualified for treatment under 2032A or 6601(j), the executor could take a maximum reduction under section 2032A of \$650,000 (i.e., \$750,000 less \$100,000), and/or could use the special 4-percent rate provided in section 6601(j) with respect to the Federal estate tax liability attributable to the first \$900,000 in value of a qualifying business (i.e., \$1,000,000 less \$100,000).

Effective Date

The provision would be effective with respect to the estates of decedents dying after December 31, 1996.

3. Installment Payments of Estate Tax Attributable to Closely Held Businesses (Secs. 303-304 of the Bill)

Present Law

In general, the Federal estate tax is due within nine months of a decedent's death. Under Code section 6166, an executor generally may elect to pay the estate tax attributable to an interest in a closely held business in installments over, at most, a 14-year period. If the election is made, the estate may pay only interest for the first four years, followed by up to 10 annual installments of principal and interest. Interest generally is imposed at the rate applicable to underpayments of tax under section 6621 (i.e., the Federal short-term rate plus 3 percentage points). Under section 6601(j), however, a special 4-percent interest rate applies to the amount of deferred estate tax attributable to the first \$1,000,000 in value of the closely-held business.

To qualify for the installment payment election, the business must be an active trade or business and the value of the decedent's interest in the closely held business must exceed 35 percent of the decedent's adjusted gross estate. An interest in a closely held business includes: (1) any interest as a proprietor in a business carried on as a proprietorship; (2) any interest in a partnership carrying on a trade or business if the partnership has 15 or fewer partners, or if at least

²Thus, if a taxpayer has made cumulative taxable transfers exceeding \$21,040,000, his or her effective transfer tax rate is 55 percent under present law.

20 percent of the partnership's assets are included in determining the decedent's gross estate; or (3) stock in a corporation if the corporation has 15 or fewer shareholders, or if at least 20 percent of the value of the voting stock is included in determining the decedent's gross estate.

Description of the Bill

The bill would extend the period for which Federal estate tax installments could be made under section 6166 to a maximum period of 24 years. If the election were made, the estate could pay only interest for the first four years, followed by up to 20 annual installments of principal and interest. Under the bill, there would be no interest imposed on the amount of deferred estate tax attributable to the first \$1,000,000 in value of the closely held business. The interest rate imposed on the amount of deferred estate tax attributable to the value of the closely held business in excess of \$1,000,000 would remain as under present law (i.e., the Federal short-term rate plus 3 percentage points).

Effective Date

The provision would be effective for decedents dying after December 31, 1996.

D. IRA provisions (title IV)

1. Restoration of IRA Deduction for All Taxpayers (Sec. 401 of the Bill)

Present Law

Under present law, under certain circumstances, an individual is allowed to deduct contributions up to the lesser of \$2,000 or 100 percent of the individual's compensation (or earned income) to an individual retirement arrangement (IRA). The amounts held in an IRA, including earnings on contributions, generally are not included in taxable income until withdrawn.

The \$2,000 deduction limit is phased out over certain adjusted gross income (AGI) levels if the individual or the individual's spouse is an active participant in an employer-sponsored retirement plan. The phaseout is between \$25,000 and \$35,000 of AGI for single taxpayers and between \$40,000 and \$50,000 of AGI for married taxpayers. There is no phaseout of the deduction limit if the individual and the individual's spouse are not active participants in an employer-sponsored retirement plan.

Description of the Bill

The bill would increase the AGI limits applicable to deductible IRA contributions for active participants in 1997, 1998, 1999, and 2000. Thereafter, the bill would repeal the limits on IRA deductions for active participants in employer-sponsored retirement plans. Thus, under the bill, after 2000, an individual would be entitled to make a \$2,000 deductible IRA contribution without regard to whether the individual was an active participant in an employer-sponsored retirement plan.

In the case of married taxpayers filing a joint return, for years before 2001, the IRA deduction for active participants would be phased out between the following AGI amounts: for 1997, \$65,000 and \$75,000; for 1998, \$90,000 and \$100,000; for 1999, \$115,000 and \$125,000; and for 2000, \$140,000 and \$150,000.

In the case of single taxpayers, for years before 2001, the IRA deduction for active participants would be phased out between the following AGI amounts: for 1997, \$50,000 and \$60,000; for 1998, \$75,000 and \$85,000; for 1999, \$100,000 and \$110,000; and for 2000, \$125,000 and \$135,000.

The bill would provide that the IRA deduction limit for any individual is coordinated with the limit on elective deferrals. Thus, an individual's deductible contributions to an IRA and elective deferrals could not exceed the annual limit on elective deferrals.

Effective Date

The provision would be effective for taxable years beginning after December 31, 1996.

2. Deductible IRAs for Nonworking Spouses (Sec. 402 of the Bill)

Present Law

Within limits, an individual is allowed a deduction for contributions to an individual retirement arrangement ("IRA"). An individual generally is not subject to income tax on amounts held in an IRA, including earnings on contributions, until the amounts are withdrawn from the IRA.

The maximum deductible contribution that can be made to an IRA generally is the lesser of \$2,000 or 100 percent of an individual's compensation (earned income in the case of a self-employed individual). In the case of a married individual, a deductible contribution of up to \$2,000 may be made for each spouse (including, for example, a homemaker who does not work outside the home) if the combined compensation of both spouses is at least equal to the contributed amount.

The maximum permitted IRA deduction is phased out if the individual (or the individual's spouse) is an active participant in an employer-sponsored retirement plan. The phase-out range is from \$25,000 to \$35,000 of adjusted gross income for single taxpayers and from \$40,000 to \$50,000 for married taxpayers filing a joint return.

Description of the Bill

Under the bill, an individual would not be considered an active participant in an employer-sponsored retirement plan merely because the individual's spouse is such an active participant. Thus, the bill would permit a nonworking spouse to make a deductible IRA contribution of up to \$2,000 without regard to the present-law income phaseouts.

Effective Date

The provision would be effective for taxable years beginning after December 31, 1996.

3. Nondeductible Contributions to Tax-Free IRA Plus Accounts (Sec. 403 of the Bill)

Present Law

Under present law, under certain circumstances, an individual is allowed to deduct contributions up to the lesser of \$2,000 or 100 percent of the individual's compensation (or earned income) to an individual retirement arrangement (IRA). The amounts held in an IRA, including earnings on contributions, generally are not included in taxable income until withdrawn.

An individual may make nondeductible contributions (up to the \$2,000 or 100 percent of compensation limit) to an IRA to the extent the individual is not permitted to make deductible IRA contributions. Nondeductible contributions provide the same tax benefits as deferred annuities, that is, earnings are not includible in income until withdrawn. However, deferred annuities are not subject to contribution limits.

Distributions from IRAs are generally includible in income when withdrawn. Distributions prior to death, disability, or attainment of age 59½ are subject to an additional 10-percent tax. The 10-percent tax does not apply to distributions made in the form of an annuity.

Description of the Bill

The bill would permit taxpayers to make nondeductible contributions to new IRA Plus accounts. Generally, IRA Plus accounts would be treated in the same manner as and be subject to the same rules applicable to deductible IRAs. However, a number of special rules would apply.

Contributions to an IRA Plus would be nondeductible. The amount of nondeductible

contributions to an IRA Plus that could be made for any taxable year would be tied to the limits for deductible IRAs, so that the aggregate amount of contributions to an IRA Plus could not exceed the excess of (1) the IRA deduction limit for the year (determined without regard to the rule coordinating the IRA deduction limit with the elective deferral limit) over (2) the amount of IRA contributions actually deducted for the year.

Under the bill, any qualified distribution from an IRA Plus account would not be included in gross income and would not be subject to the 10-percent additional income tax on early withdrawals. A qualified distribution from an IRA Plus would include any payment or distribution (1) made on or after the date the IRA Plus owner attains age 59½, (2) made to a beneficiary of the IRA Plus owner after death, (3) on account of disability of the IRA Plus owner, or (4) which is a qualified special purpose distribution (i.e., a distribution for medical expenses; the costs of starting a business of the IRA Plus owner or the owner's spouse, long-term unemployment, and higher education expenses).

The bill provides that a distribution would not be treated as a qualified distribution if it is made within the 5-taxable year period beginning with the first taxable year for which the individual made a contribution to an IRA Plus account (or such individual's spouse made a contribution to an IRA Plus account). In addition, the bill provides that a distribution would not be treated as a qualified distribution if, in the case of a distribution attributable to a qualified rollover contribution, the distribution is made within the 5-taxable year period beginning with the taxable year in which the rollover contribution was made.

In the case of a distribution from an IRA Plus account that is not a qualified distribution, in applying the rules of section 72, the distribution would be treated as made from contributions to the IRA Plus account to the extent that such distribution, when added to all previous distributions from the IRA Plus account, does not exceed the aggregate amount of contributions to the IRA Plus account. Thus, nonqualified distributions from an IRA Plus account would not be included in income (and subject to the additional 10-percent tax on early withdrawals) until the IRA owner had withdrawn amounts in excess of all contributions to the IRA Plus account.

Rollover contributions would be permitted to an IRA Plus only to the extent such contributions consist of a payment or distribution from another IRA Plus or from an individual retirement plan. Such rollover contributions would not be taken into account in determining the contribution limit for a taxable year. The normal IRA rollover rules would otherwise govern the eligibility of withdrawals from IRA Plus accounts to be rolled over.

The bill would permit amounts withdrawn from IRAs to be transferred into an IRA Plus. The amount transferred would be includible in gross income in the year the withdrawal was made, except that amounts transferred to an IRA Plus before January 1, 1999, would be includible in income ratably over a 4-year period. The 10-percent early withdrawal tax would not apply to amounts transferred from an IRA to an IRA Plus account.

Under the bill, the excise tax on excess distributions from qualified retirement plans (sec. 4980A) would not apply to distributions from the IRA Plus account or to any qualified rollover contribution from an individual retirement plan to an IRA Plus account.

Effective Date

The provisions of the bill relating to IRA Plus accounts would be effective for taxable years beginning after December 31, 1996.

4. IRA Withdrawals for Business Startup, Long-Term Unemployment, and Post-Secondary Education Expenses (Secs. 404-406 of the Bill)

Present Law

Amounts withdrawn from an individual retirement arrangement ("IRA") are includable in income (except to the extent of any nondeductible contributions). In addition, a 10-percent additional tax applies to withdrawals from IRAs made before age 59½, unless the withdrawal is made on account of death or disability or is made in the form of annuity payments or is made for medical expenses that exceed 7.5 percent of adjusted gross income ("AGI") or is made for medical insurance (without regard to the 7.5 percent of AGI floor) if the individual has received unemployment compensation for at least 12 weeks, and the withdrawal is made in the year such unemployment compensation is received or the following year. If a self-employed individual is not eligible for unemployment compensation under applicable law, then, to the extent provided in regulations, a self-employed individual is treated as having received unemployment compensation for at least 12 weeks if the individual would have received unemployment compensation but for the fact that the individual was self-employed. The exception to the additional tax ceases to apply if the individual has been reemployed for at least 60 days.

Description of the Bill

The bill would permit withdrawals to be made income tax free and exempt from the 10-percent additional tax if made (1) for the business start-up expenses of the individual or the spouse of the individual; (2) in the event of long-term unemployment, for any reason; or (3) for the post-secondary education expenses of the individual, the spouse of the individual, or a dependent child of the individual or the individual's spouse.

For purposes of this provision, business start-up expenses include expenses associated with the establishment of the business that are incurred on or before the business start date and on or before the date which is one year after the business start date, such as start-up expenditures within the meaning of section 195(c), organizational expenses within the meaning of sections 248(b) and 709(b) and other expenses related to starting a business (e.g., purchasing a computer, software, inventory, etc.). No deduction otherwise allowable with respect to any business start-up expense will be allowed to the extent this provision applies to such expense. In addition, to the extent this provision applies to any portion of business start-up expenses which are properly chargeable to capital account, the basis of the property to which such expenses are chargeable will be reduced by the amount taken into account under this provision.

For purposes of this provision, long-term unemployment has the same meaning as under present law (i.e., the individual has received unemployment compensation for at least 12 weeks).

For purposes of this provision, post-secondary education expenses would be defined as the student's cost of attendance as defined in section 472 of the Higher Education Act of 1965 (generally, tuition, fees, room and board, and related expenses).

Effective Date

The provision would be effective for distributions after December 31, 1996.

S. 3. A bill to provide for fair and accurate criminal trials, reduce violent juvenile crime, promote accountability by juvenile criminals, punish and deter violent gang crime, reduce the fiscal burden imposed by criminal alien prisoners, promote safe citizen self-defense, combat the importation, production, sale, and use of illegal drugs, and for other purposes; to the Committee on the Judiciary.

THE OMNIBUS CRIME CONTROL ACT OF 1997

Mr. HATCH. Mr. President, this is a very important bill. We know juvenile crime is on the increase. Gang violence is on the increase. This bill would take care of both of those problems, and it does it in an intelligent, official, and decent way. I hope that our colleagues on the other side will look at it carefully. We will certainly work with them and with Senator BIDEN and others on the Judiciary Committee to try and make sure that we do the best we can.

This is an excellent bill. It would make immediate inroads into the problems of juvenile violence and crime and gang violence. I hope all of our colleagues will get behind this and support it.

Mr. President, this is a very important omnibus crime bill if we want to do something about crime in this society. In addition to what we have done in the past, this is an excellent Republican alternative to the violent crime that we have in the streets, the drugs permeating our society, and, of course, the many other difficulties that are literally making our society a less wonderful society to live in.

Mr. President, I ask unanimous consent that the remainder of my remarks be printed in the RECORD at this point.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

Mr. President, I rise today along with the distinguished Majority Leader and other Republicans to introduce S. 3, the Hatch-Lott Omnibus Crime Control Act of 1997 and S. 10, the Hatch-Sessions Violent and Repeat Juvenile Offender Act of 1997. Together, these two bills build on the successful Republican 104th Congress, in which we passed habeas corpus reform, truth-in-sentencing reform, prison litigation reform, federal mandatory victim restitution, and the toughest antiterrorism law in our nation's history. These initiatives continue the Republican commitment to enacting the kind of serious laws that the American people want, that the American people need, and that the American people deserve to continue the fight against crime, and in particular, crime committed by violent youths.

Each year, our nation's violent crime problem tops the list of concerns for the American people, and their concerns are valid. According to the Uniform Crime Reports, recently published by the FBI, there was vir-

tually no change in violent crime between 1994 and 1995. In fact, on average, one violent crime is committed every 18 seconds in this country.

This crisis is not limited to our major cities. In my home state of Utah, the number of violent crimes per 100,000 persons increased by eight percent in 1995, while the rate decreased by 12.8 percent in New York City that same year. In Utah, reported violent crimes increased by more than 10 percent, from 5,810 in 1994, to 6,415 in 1995. Property crimes in Utah increased by 17.9 percent, and murder by a depressing 35.7 percent during the same time period. Mr. President, we need to do something to curb this wave of violent crime affecting my State of Utah and every other State and community across America. The bill we introduce today will help law enforcement stem this tide of crime.

This legislation attacks the nation's crime problem on many fronts including: Initiatives to revive the faltering war on drugs; stepping up the fight on terrorism; strengthening juvenile justice reform; increasing personal security; encouraging sensible prison reform; continuing the fight against child pornography; improving criminal justice reform; and continuing support for the successful Violence Against Women Act.

REVIVING THE WAR ON DRUGS

This bill takes several steps toward reviving the war on drugs. First, it enhances drug penalties for drug traffickers. Republicans want to ensure that large-scale drug traffickers face punishment that is commensurate with the harm they inflict on society. Second, the bill addresses the increasing menace of street level drug traffickers. This bill lowers the quantity of cocaine in powder form that triggers the mandatory minimums under title 21. It also creates mandatory minimum penalties for methamphetamine traffickers and dealers.

S. 3 also makes a strong statement about the nation's new problem with drug legalization. California and Arizona recently passed initiatives legalizing marijuana for medicinal purposes. But there is no legitimate medicinal use for marijuana, and the use of marijuana and other Schedule I drugs still violates federal law. In order to discourage the medical community from violating federal drug laws, S. 3 requires that HMO's and other recipients of federal Medicare and Medicaid funds certify that none of their participating physicians prescribed marijuana or other Schedule I controlled substances for medical purposes. This bill also combats recent lax attitudes toward drug use by education. This bill requires that the FCC encourage public service programs to emphasize the importance of anti-drug abuse announcements and attack the pro-legalization movement. This bill will also reauthorize the Drug Czar with an emphasis on enforcement, prevention, interdiction and effective treatment for juveniles who use drugs.

FIGHTING TERRORISM

This legislation toughens the anti-terrorism initiatives that the Republican 104th Congress enacted. It demands bombing laws to ensure that all uses of a bomb to commit murder can be punished capitally. This bill also establishes a National Commission on Terrorism to examine a long-term strategy against terrorism. This legislation also makes it a federal offense to stockpile chemical weapons, and it tightens restrictions on human pathogens. This bill also makes it a federal offense to murder, or attempt to murder, athletes, guests, and spectators at Olympic games, and centralizes in the Attorney General federal authority for their security.

JUVENILE JUSTICE REFORM

The youth violence bill will ensure that violent and repeat juvenile offenders are treated as adults by authorizing US Attorneys to prosecute 14-year-olds for any federal felony that is a crime of violence or a serious drug trafficking offense. This legislation also confines juveniles prosecuted in the federal system for the length of their sentence. New federal penalties for offenses committed by criminal street gangs will create a sustained effort to target violent youth gang activity. Federal prosecutors will be able to charge gang leaders or members under this bill if they engage in two or more criminal gang offenses. It will also be a crime to recruit someone into a gang, or solicit their participation in a gang crime.

This legislation also will reform federal aid to State youth crime programs by eliminating needless federal mandates on state criminal justice systems that have stifled innovative state efforts to address violent youth crime. This bill also requires that states not exclude religious organizations from participating in juvenile rehabilitative programs. In an effort to encourage the states to undertake progressive responses to violent youth crime, this bill authorizes funding for a variety of programs, such as fingerprinting, DNA testing, and improved record keeping practices for juvenile offenders. The Juvenile Justice bill also fosters youth crime prevention that works by ensuring that there are 2,000 Boys & Girls Clubs by the year 2000, and by permitting some federal grant funds to be used to establish a role model speakers program.

PERSONAL SECURITY

Recent studies show that the adoption by more than 30 states of laws allowing citizens to carry firearms has had, and will have, a material and positive effect in preventing violent crime. S. 3 will empower current and retired law enforcement officers to carry firearms in other states, and will authorize states to enter into interstate compacts recognizing each other's citizen carry laws. It will also create an exception to federal firearm purchase waiting periods for persons protected under a protective order. Thus, for instance, no longer will a threatened and abused woman be forced to wait in fear for the right to protect herself.

SENSIBLE PRISON REFORM

American taxpayers should not be saddled with the burden of paying for the cost of incarcerating aliens convicted of crimes in this country. In an effort to lessen this burden, this legislation requires the Department of State to negotiate treaties with all foreign governments that receive U.S. aid. Under these treaties, receipt of American aid will be contingent upon foreign governments receiving and incarcerating their citizens and nationals who are convicted of crimes in the United States for a majority of their sentences.

This legislation also continues the authorization for the pilot project on privatization of federal prisons. It will also build on the Prison Litigation Reform Act enacted last Congress by amending and clarifying features of the PLRA. Provisions of this bill will also make it more difficult for prisoners to pursue their criminal careers while in prison by making it more difficult to conduct criminal activity by phone.

Importantly, this bill also eliminates inappropriate and counter-productive "incentives" of early release for federal inmates to get drug treatment. Further, our bill will require all federal prisoners to work, and impose no-frills prisons in the federal system.

CHILD PORNOGRAPHY

This legislation also builds on the advances made in the 104th Congress by requir-

ing the Secretary of State to renegotiate extradition treaties with foreign governments to ensure that child pornography offenses under federal law are extraditable offenses. It also modifies current federal law so that the statute of limitations is tolled when the federal child pornography laws are violated, in whole or in part, by persons beyond the jurisdiction of the United States.

CRIMINAL JUSTICE REFORM

S. 3 will improve public confidence in the criminal justice system by enhancing the accuracy of the trial process. The current exclusionary rule often unjustifiably bars use of probative evidence at trial. This law will amend the exclusionary rule to allow evidence to be admitted if law enforcement officers had an objectively reasonable belief that their conduct was lawful. Further, 18 U.S.C. §3501 provides that judges must admit a confession as long as it is voluntary. This bill will direct the Justice Department to ensure this provision is enforced. This bill also proposes various reforms to ensure fairness for both the defendant and the victim in criminal trials. These reforms to the criminal justice process that are critical if we are to prevent our cherished liberties from further devolving into merely a cynical shield for the guilty to avoid just punishment.

Mr. President, these bills alone will not solve our crime problem. That must be done community by community. Crime cannot thrive in a society that will not tolerate it. But by enacting these common sense reforms, we can signal our determination to build such a society. I urge my colleagues to support these bills.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

It is the sense of Congress that such case-by-case determinations rarely should be made.

(B) NONDELEGATION OF AUTHORITY.—The authority to make a determination under subparagraph (A) may not be delegated.

“(II) the need to preserve the availability of the property through the entry of the requested order outweighs the hardship on any party against whom the order is to be entered;

except that an order entered pursuant to subparagraph (B) shall be effective for a period not to exceed 90 days, unless extended by the court for good cause shown or unless an indictment or information described in this subparagraph has been filed.

“(B) TEMPORARY RESTRAINING ORDERS.—

“(i) IN GENERAL.—A temporary restraining order under this subsection may be entered upon application of the United States without notice or opportunity for a hearing when an information or indictment has not yet been filed with respect to the property, if the United States demonstrates that there is probable cause to believe that—

“(ii) EXPIRATION.—A temporary restraining order described in clause (i) shall expire not later than 10 days after the date on which the order is entered, unless—

“(I) the order is extended for good cause shown; or

Upon application of a person, other than the defendant or person acting in concert with the defendant or on behalf of the defendant, the court may restrain or stay the sale or disposition of the property pending the conclusion of any appeal of the criminal case giving rise to the forfeiture, if the applicant demonstrates that proceeding with the sale or disposition of the property will result in irreparable injury, harm, or loss to the applicant.

“(h) AUTHORITY OF ATTORNEY GENERAL.—With respect to property ordered forfeited under this section, the Attorney General may—

"(A)(i) the petitioner has a legal right, title, or interest in the property that is the subject of the hearing; and

"(ii) that right, title, or interest renders the order of forfeiture invalid in whole or in part because the right, title, or interest—

"(I) was vested in the petitioner rather than the defendant; or

"(II) was superior to any right, title, or interest of the defendant at the time of the commission of the acts which gave rise to the forfeiture of the property under this section; or

the court shall amend the order of forfeiture in accordance with its determination.

SEC. 1006. CELLULAR TELEPHONE INTERCEPTIONS.

Subsection 2511 of title 18, United States Code, is amended by inserting “, imprisoned not more than 1 year, or both” after “under this title”.

TITLE XI—VIOLENT AND REPEAT JUVENILE OFFENDERS

SEC. 1101. SHORT TITLE.

This title may be cited as the “Violent and Repeat Juvenile Offender Act of 1997”.

SEC. 1102. FINDINGS AND PURPOSES.

(a) FINDINGS.—Congress finds that—

(1) at the outset of the twentieth century, the States adopted 2 separate juvenile justice systems for violent and nonviolent offenders;

(2) violent crimes committed by juveniles, such as homicide, rape, and robbery, were an unknown phenomenon at that time, but the rate at which juveniles commit such crimes has escalated astronomically since that time;

(3) in 1994—

(A) the number of persons arrested overall for murder in the United States decreased by 5.8 percent, but the number of persons who are less than 15 years of age arrested for murder increased by 4 percent; and

(B) the number of persons arrested for all violent crimes increased by 1.3 percent, but the number of persons who are less than 15 years of age arrested for violent crimes increased by 9.2 percent, and the number of persons less than 18 years of age arrested for such crimes increased by 6.5 percent;

(4) from 1985 to 1996, the number of persons arrested for all violent crimes increased by 52.3 percent, but the number of persons under age 18 arrested for violent crimes rose by 75 percent;

(5) the number of juvenile offenders is expected to undergo a massive increase during the first 2 decades of the twenty-first century, culminating in an unprecedented number of violent offenders who are less than 18 years of age;

(6) the rehabilitative model of sentencing for juveniles, which Congress rejected for adult offenders when Congress enacted the Sentencing Reform Act of 1984, is inadequate and inappropriate for dealing with violent and repeat juvenile offenders;

(7) the Federal Government should encourage the States to experiment with progressive solutions to the escalating problem of juveniles who commit violent crimes and who are repeat offenders, including prosecuting all such offenders as adults, but should not impose specific strategies or programs on the States;

(8) an effective strategy for reducing violent juvenile crime requires greater collection of investigative data and other information, such as fingerprints and DNA evidence, as well as greater sharing of such information among Federal, State, and local agencies, including the courts, in the law enforcement and educational systems;

(9) data regarding violent juvenile offenders must be made available to the adult criminal justice system if recidivism by criminals is to be addressed adequately;

(10) holding juvenile proceedings in secret denies victims of crime the opportunity to attend and be heard at such proceedings, helps juvenile offenders to avoid accountability for their actions, and shields juvenile proceedings from public scrutiny and accountability;

(11) the injuries and losses suffered by the victims of violent crime are no less painful or devastating because the offender is a juvenile; and

(12) the investigation, prosecution, adjudication, and punishment of criminal offenses committed by juveniles is, and should

remain, primarily the responsibility of the States, to be carried out without interference from the Federal Government.

(b) **PURPOSES.**—The purposes of this title are—

(1) to reform juvenile law so that the paramount concerns of the juvenile justice system are providing for the safety of the public and holding juvenile wrongdoers accountable for their actions, while providing the wrongdoer a genuine opportunity for self reform;

(2) to revise the procedures in Federal court that are applicable to the prosecution of juvenile offenders;

Subtitle C—Juvenile Crime Control and Accountability

SEC. 1161. FINDINGS; DECLARATION OF PURPOSE; DEFINITIONS.

Title I of the Juvenile Justice and Delinquency Prevention Act of 1974 (42 U.S.C. 5601 et seq.) is amended to read as follows:

"TITLE I—FINDINGS AND DECLARATION OF PURPOSE

"SEC. 101. FINDINGS.

"Congress finds that—

"(1) during the past several years, the United States has experienced an alarming increase in arrests of adolescents for murder, assault, and weapons offenses;

"(2) in 1994, juveniles accounted for 1 in 5 arrests for violent crimes, including murder, robbery, aggravated assault, and rape, including 514 such arrests per 100,000 juveniles 10 through 17 years of age;

"(3) understaffed, overcrowded juvenile courts, prosecutorial and public defender offices, probation services, and correctional facilities no longer adequately address the changing nature of juvenile crime, protect the public, and correct youth offenders;

"(4) the juvenile justice system has proven inadequate to meet the needs of society, because insufficient sanctions are imposed on serious youth offenders and the needs of children, who may be at risk of becoming delinquents;

"(5) existing programs and policies have not adequately responded to the particular threat of drugs, alcohol abuse, violence, and gangs pose to the youth of the Nation;

"(6) demographic increases projected in the number of youth offenders require reexamination of the prosecution and incarceration policies for serious violent youth offenders;

"(7) State and local communities that experience directly the devastating failures of the juvenile justice system require assistance to deal comprehensively with the problems of juvenile delinquency;

"(8) Existing Federal programs have not provided the States with necessary flexibility, and have not provided coordination, resources, and leadership required to meet the crisis of youth violence.

"(9) Overlapping and uncoordinated Federal programs have created a multitude of Federal funding streams to State and local governments, that have become a barrier to effective program coordination, responsive public safety initiatives, and the provision of comprehensive services for children and youth.

"(10) Violent crime by juveniles constitutes a growing threat to the national welfare that requires an immediate and comprehensive governmental response, combining flexibility and coordinated evaluation.

"(11) Limited State and local resources are being wasted complying with the unnecessary Federal mandate that status offenders be desinstitutionalized. Some communities believe that curfews are appropriate for juveniles, and those communities should not be prohibited by the Federal Government from using confinement for status offenses as a means of dealing with delinquent behavior before it becomes criminal conduct.

"(12) Limited State and local resources are being wasted complying with the unnecessary Federal mandate that no juvenile be detained or confined in any jail or lockup for adults, because it can be feasible to separate adults and juveniles in 1 facility. This mandate is particularly burdensome for rural communities.

"(13) The role of the Federal Government should be to encourage and empower communities to develop and implement policies to protect adequately the public from serious juvenile crime as well as comprehensive programs to reduce risk factors and prevent juvenile delinquency.

S. 4. A bill to amend the Fair Labor Standards Act of 1938 to provide to private sector employees the same opportunities for time-and-a-half compensatory time off, biweekly work programs, and flexible credit hour programs as Federal employees currently enjoy to help balance the demands and needs of work and family, to clarify the provisions relating to exemptions of certain professionals from the minimum wage and overtime requirements of the Fair Labor Standards Act of 1938, and for other purposes; to the Committee on Labor and Human Resources.

THE FAMILY FRIENDLY WORKPLACE ACT

Mr. ASHCROFT. Mr. President, I am delighted to have the opportunity to file, in conjunction with Senators HUTCHISON, LOTT, NICKLES, CRAIG, COLLINS, ENZI, GRASSLEY, COATS, WARNER, HELMS, B. SMITH, and GRAMM, the Family Friendly Workplace Act. This is an important piece of legislation, which should free our families from inflexible work schedules in order to meet the competing demands of the workplace and their families.

This demand for our time, which stresses us and stretches us, has been recognized by people on both sides of the political aisle. As a matter of fact, the Clinton administration's Labor Department developed a report to the Nation and to the President called "Working Women Count." In order to do so, they surveyed hundreds of thousands of working women. And the conclusion of the report is as follows:

The number one issue women want to bring to the President's attention is the difficulty of balancing work and family obligations.

The Family Friendly Workplace Act is a way of helping people do just that—meet their responsibilities to their employers and meet their responsibilities to their families. Frankly, it is a way of doing it without taking a pay cut.

Now, some have suggested that the way to do this is to have a family leave policy that allows workers to simply take time off work without pay. Well, that really exacerbates some of the tension in most of our families, because we have financial tension as well as this social tension that stretches us between the workplace and the home place. And so, really, what we have in

the Family Friendly Workplace Act is the ability to have flexible working schedules at the option of the employee and at the request of the employee, when the employer will agree, that allows a person, for instance, to take time off on Friday afternoon and to make it up on Monday.

Most Americans don't realize it, but it is against the law for an employer to agree with his employee that the employee can take time off on Friday afternoon to see his daughter get an award at the local high school and to make up that same time on Monday. The strict laws about hours and overtime make it difficult for that to happen, make it impossible, make it illegal.

Those laws were developed in the 1930's. They put a lot of stress on American families. In the 1930's, we didn't have so many working mothers. One out of every 6 mothers of school-aged children worked in the 1930's, and well over 70 percent of them work in the 1990's. As we move to the next century, it is time for us to revamp our approach and to welcome the next century by accommodating these competing demands.

Flexible work arrangements have been available to Federal Government workers since 1978—in the 1970's, 1980's, and 1990's, Government workers have had a special privilege. The Federal program has been so successful that the President of the United States, by Executive order in 1993 extended it to parts of the Federal Government that had not yet had the benefits of that program. It is high time that the workers in the private sector of this country enjoy the same benefits of agreeing with their employers on flexible working arrangements at the option of the worker, never to be imposed by the employer, which would allow the worker to accommodate the competing needs and demands of family and the workplace.

Allowing workplace flexibility is a tremendous step forward. It has been asked for by the women of America as reflected in the Clinton administration document. It has been written about, like this Time Magazine article featuring the difficulties of Lori Lucas, a single mother, working full-time in Shrewsbury, Missouri. The President of the United States has talked about flextime and the need to have it, and it is time for us to deliver it to the American people—albeit 15 or more years after we delivered it to the workers in the Federal Government.

I believe that working women know what they need. Working Women Magazine and Working Mother magazines have endorsed it, and is time to have those flexible working arrangements. Working Women Magazine said in its support of this legislation, that it is time for Congress to give women what they want, and not what you Congress thinks they need.

Similarly, when parents spend time at work, they can never replace that

time with their families no matter how much overtime they may bring home. Sometimes people would like, instead of being paid time and a half for overtime, to take time and a half off sometime later in order to spend time with their families. That is another part of this bill—to allow people to take as compensation for overtime—compensatory time instead of money. While it would allow a worker to ask for the money, the worker would have a complete, unchallenged and unfettered right to be paid money for the overtime.

This bill is really designed to give workers choices and the opportunity to choose to be with their families instead of being forced to take their overtime in money. For some workers, there comes a point when no matter how much money they have, they simply want and need to be able to spend some time with their families.

I am delighted that I have been joined in this particular endeavor in developing this legislation by one of the individuals who is most careful regarding the rights, options and choices of individuals not only in the workplace but as American citizens. I would like to yield to the Senator from Texas, Senator HUTCHISON, who is the primary cosponsor of this legislation, the Family Friendly Workplace Act, and to call upon her for remarks.

The PRESIDING OFFICER (Mr. FRIST). The Senator from Texas is recognized.

Mrs. HUTCHISON. Thank you, Mr. President. I thank the Senator from Missouri for providing leadership on this very important issue. He was out there fighting for this issue from the first day he came to the Senate, and he has certainly demonstrated his commitment to family flexibility throughout his Government career.

I am reminded of the speech that I heard my friend, Congresswoman SUSAN MOLINARI, give this summer. Congresswoman MOLINARI is a working mom. She says what we need most as working moms in this country is more hours in the day. Senator ASHCROFT and I would like to provide more hours in the day. That is not an option for us. But we are going to do something that we think will be second best to producing more hours in a day for a working mom or a working dad who wants to work or is forced to work to make ends meet, either way, but yet also wants more time with his or her children.

This bill will primarily benefit the hourly employees in our country. Because salaried employees are presently exempt from many federal wage and hour laws, this is not as much an issue for them. They and their employers are able to work out flexible work arrangements. But in the hourly category, employers and employees do not have that option. They are not able to do what anybody would think in this country is common sense; and that is sit down and say, "Could I work 2 extra hours on Friday in order to take off at 3 o'clock

to go to the PTA meeting on Monday?" That is what Senator ASHCROFT and I would like to do with the Family Friendly Workplace Act that we have introduced today.

It is a fact that in two-thirds of the households in this country, both the mother and the father are working. In fact, 75 percent of the mothers of young children are now in the workplace. So we must address the ever-increasing demands on working moms and working dads—to allow them to have more time to do what they need to do to bring their families together and to keep them close-knit. This requires going to the PTA meetings, going to the afternoon basketball game, or to the soccer game, or whatever it is that will allow that family to bond together and maintain its strength, thereby strengthening our country. We all know that the family unit is the core strength of our nation, and if we allow that to deteriorate, then nothing else is going to matter. In the history of civilization, no country has ultimately survived where the family unit has deteriorated.

That is why we are looking for creative ways to help the working family—and in this case it is the hourly wage working families who are struggling the hardest to make ends meet—to be able to do what they need to do for their families while maintaining a good working relationship with their employers and preserving their family income.

The bill that Senator ASHCROFT and I are introducing today will relieve stress in the family by allowing the employer and the hourly employee to sit down and negotiate to, for example, take off two hours today and work an additional two hours the following week, or perhaps to work an extra hour every day and bank that time for use when a family need arises, or to work required overtime and have a choice about whether they take time-and-a-half compensation or time and a half hours because then they can bank that time and do even more with their families.

In fact, there was a poll conducted by Penn & Shoen and Associates that revealed that 75 percent of all employees would like to have the ability to choose between getting time-and-a-half in either wages or time. Fifty-seven percent would take time off instead of being paid, if the option were available.

So why not make these options available? The Family Friendly Workplace Act makes these options available, on a totally voluntary basis. There are strict requirements in this law that will keep employers from in any way requiring or coercing an employee to work and not take overtime pay. We want to make sure that does not happen. That is why the law is written very carefully to make sure that it could not happen, and that it will only give employees and employers the ability to voluntarily sit down and do what they think make sense for their schedules and needs.

Let me also mention that where there are union agreements in effect, this law will not affect those agreements. This legislation does not encroach on the collective bargaining of unions in any way. Rather, it would apply to employees who are not in unions who now are restricted by a wage-and-hour law that says you cannot have the option of working a couple of hours on Friday in order to take off at 3 o'clock on Monday. That is exactly what Senator ASHCROFT and I seek to enact with this legislation.

I commend Senator ASHCROFT for his leadership in this area. We are going to work with our colleagues on both sides of the aisle and on both sides of the Rotunda to enact this very important legislation. We must grant hourly wage employees who have families in this country and the same options that people on salaries and, indeed, that federal employees already have.

Thank you, Mr. President. I yield back to the Senator from Missouri.

Mr. ASHCROFT addressed the Chair.

The PRESIDING OFFICER. The Senator from Missouri.

Mr. ASHCROFT. Mr. President, I thank the Senator from Texas for her sensitivity on this issue and for her commitment to it. I know she is dedicated to helping resolve this. There is simply no reason why the Government of the United States should put a barrier between the employers and employees of America who want to resolve stresses and strengths. We should have laws that allow people to reach these judgments about flexibly and allocating time, with adequate protection which are enforcement mechanisms through the Department of Labor.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 4

“(2) The payment of overtime compensation or other additions to the compensation of an employee employed on a salary based on hours worked shall not be considered in determining if the employee is an exempt employee described in subsection (a)(1).”

Mr. JEFFORDS. Mr. President, I am pleased to rise in support of S. 4, the “Family Friendly Workplace Act of 1997.” This legislation is designed to address the very pressing and legitimate needs of working families for more flexibility in their workplaces.

We all know how difficult it is for working parents to balance the demands of work and family responsibilities. There are soccer games, parent-teacher conferences, and doctor's appointments that demand a few hours of time during the workweek. Our workplace laws should allow workers the flexibility to work a few extra hours one week, in order to take time off later when they need to for family or personal reasons.

Ironically, current law inhibits more flexible schedules and compensation programs. While this may come as a surprise, it is really not all that hard to understand why. The world of the workplace has undergone a revolution in the last 60 years.

In the 1930's, as the Roosevelt administration and the Congress sought to establish minimum wage and overtime standards, the last thing on their minds was finding free time for workers. With as much as one-third of the work force unemployed, the problem was far too much free time, not too little. The purpose of premium pay for overtime work was not to enrich already-employed workers, but to spread work to the unemployed, in effect reducing free time.

The story of a woman from Poultney, Vermont, near my home town, brought this home to me. She was employed as a school teacher in the midst of the Depression, and had the further good fortune to fall in love and get married to a man who was also employed. Upon her marriage, she quickly resigned from her job. When asked why decades later, she explained it was simply understood that you would not have two full-time jobs in one family.

Such taboos today are little more than an interesting historical footnote. With the rise of single parent families and two-parent families in which both spouses work, it is incredibly difficult to balance the demands of work and family. That difficulty is increased by the Fair Labor Standards Act [FLSA] which was not designed with today's circumstances in mind. The law's minimum wage and overtime protections are just as important today as they were when enacted, but the law needs to be adjusted to the workplace of the 21st century.

For example, the FLSA bars private employers from offering employees the choice of receiving overtime in the form of compensatory time off instead of cash wages. While Federal and public sector workers have had this option since 1985, private sector workers do not. Many employees do not necessarily want money as much as time to address family needs. A recent public opinion poll conducted by Penn & Schoen Associates found that workers strongly favor more flexibility in their work schedules. Seventy-five percent of those surveyed said they would prefer the option to choose to be compensated for overtime with compensatory time off or cash overtime.

Now some of my colleagues may be familiar with what seems to be a con-

tradictory poll conducted by Lake Research which found that nearly two-thirds of poll respondents opposed the policy we propose. Frankly, I would, too, if it was anything like what was described in the poll's question.

The Lake Research poll describes compensatory time off as the employer's decision. It is not. It describes bi-weekly scheduling as the employer's decision. It is not. Indeed, the poll's question concludes by saying: Employers could schedule you to work 60 hours one week and 20 hours the next, but you would not earn overtime pay. Do you support or oppose such a policy?

It comes as no surprise that most people would not support such a policy. As my colleagues know, you can structure a question on a poll to yield just about any result you want. This is a pretty good example of just that.

What is interesting to me is that even when faced with such a slanted presentation, one-third of the people either supported such a policy or were unsure. It stands to reason that when presented with the facts—that is, that each of these proposals is predicated on the employee's decision, not the employer's—three quarters of Americans support having the option of taking time off instead of cash.

This bill incorporates provisions which passed the House of Representatives last year that would allow the payment of overtime with compensatory time off at a rate of 1.5 hours for each hour worked over 40 in a workweek. Just like in the public sector, however, no employee could be forced to accept comp time off instead of being paid for overtime. A written agreement between the employer and the employee is required, and there are strong penalties against any employer who coerces, intimidates, or threatens workers into accepting such an agreement.

Not all employees want to work a traditional 8-hour day, 5 days a week, with no variation. Some employees would prefer to trade hours between weeks—e.g. work 45 hours one week, 35 hours the next and take every other Friday off—or shift to a schedule that compresses many hours at the front end of the week so that they can put together several days off later. However, companies would have to pay workers overtime for any hours over 40 in the first week, even if the employee would prefer to flex his or her schedule. Currently, only Federal workers can flex their schedules without their employer being subject to the overtime penalty.

S. 4 would remove this limitation and permit employers and employees to mutually agree on a flexible, biweekly schedule consisting of any combination of 80 hours over a 2-week period. As with the comp time provisions, nothing would be forced upon the employer or the employee. If they agreed on such schedules, the employee could trade hours over a 2-week period without violating the FLSA. Any hours in excess

of 80 hours would still be paid at 1.5 times the employee's regular rate of pay. If it's good enough for Federal workers, it's good enough for all workers.

Finally, this bill corrects a flexibility problem for salaried workers in both the private and the public sectors. In many instances, salaried employees who want to take a few hours off for personal or family reasons must choose between two equally undesirable options: either to use a portion of their paid leave, that is, vacation or sick leave, or take a full day off without pay. If the employer grants an employee a few hours of unpaid leave—or merely has a policy which permits it—all the salaried employees may lose their exempt status under the FLSA.

Thus, a policy that allows for a partial day of unpaid leave can convert an exempt worker to a nonexempt one who is then owed overtime, even if the worker has a six-figure income and is employed at the highest levels of the company. Multiply this over an entire salaried work force, and the liability to public and private employers soars into the billions of dollars.

This bizarre situation does not apply, however, if an employee is taking leave pursuant to the Family and Medical Leave Act of 1993 [FMLA]. This bill would merely extend this practice to accommodate the desire of many salaried employees to take time off for reasons other than family and medical leave, or for employees who work for small companies. In order to provide maximum flexibility to all salaried workers who wish to take partial day leave under any circumstances, this bill would clarify that salaried workers do not lose their exempt status under the FLSA as long as there has not been an actual reduction in pay. In effect, this provision would encourage the very type of leave that President Clinton feels needs to be accommodated in our workplace laws.

Mr. President, the Senate Committee on Labor and Human Resources and its Subcommittee on Employment and Training, chaired by Senator DEWINE, will thoroughly and deliverately review and debate these proposals in the coming weeks. I am hopeful that we will reach agreement on the need to provide workers with more flexibility in their work arrangements, and will pass legislation that will achieve this goal.

By Mr. ASHCROFT (for himself, Mr. MCCAIN, Mr. LOTT, Mr. ABRAHAM, Mr. ALLARD, Mr. BROWBACK, Mr. CHAFEE, Mr. COVERDELL, Mr. CRAIG, Mr. DEWINE, Mr. DOMENICI, Mr. ENZI, Mr. FAIRCLOTH, Mr. GRAMS, Mr. HAGEL, Mr. HATCH, Mr. HELMS, Mr. HUTCHINSON, Mr. KYL, Mr. MURKOWSKI, Mr. NICKLES, Mr. ROBERTS, Mr. SANTORUM, Mr. SESSIONS, Mr. SMITH, Mr. THOMAS, Mr. THURMOND, Mr. WARNER, Mr. COATS, Mr. LUGAR, Mr. GRAMM, Mr.

KEMPTHORNE, and Mrs. HUTCHISON):

S. 5. A bill to establish legal standards and procedures for product liability litigation, and for other purposes; to the Committee on Commerce, Science, and Transportation.

THE PRODUCT LIABILITY REFORM ACT OF 1997

Mr. ASHCROFT. Mr. President, let me quickly encapsulate this important piece of legislation for the American people.

Last year, in a bipartisan effort, we succeeded, and this year this bill is sponsored by a group of individuals including the chairman of the Commerce Committee, Senator MCCAIN, Senator LOTT, Senator COVERDELL, Senator MCCONNELL, Senator ABRAHAM, and Senator GRAMM, and I believe that we will again this year have a bipartisan approach. I have already spoken with a number of the people who were active in this measure—Senator GORTON, Senator ROCKEFELLER, Senator LIEBERMAN, and Senator DODD—about last year's approach. We again have introduced a similar bill. This is a step on the road of reforming the legal system to provide reason and rationality where the legal system, the tort system has been out of control.

Three years ago, for general aviation, the private airplane business, the small plane business, we passed a law which provided a framework of responsibility which put that part of the tort system back under control. People pooh-poohed the idea. They said, "It won't help; it won't work to pass such a law." But we are now again building such airplanes in the United States. There are 9,000 new jobs in that industry alone because we made that decision, and the quality of the airplanes is better than it has ever been before. We have not deprived anyone of the capacity to receive compensatory damages as a result of inferior products or defects in products, and we want to extend the tort reform effort which began with general aviation a step further.

The second step we took last year, in 1996, when we enacted securities law tort reform. And that law went into effect this last year. So it is now time for us, having done the general aviation portion of legal reform and tort reform and having moved from that to the securities law, to move to manufacturing generally in the product liability area. It is not an attempt to curtail compensatory damages. People who are injured should be compensated for their injuries. But it is an attempt to bring sanity and reason to an out-of-control tort system which is hurting the quality of our products, stifling innovation and making it very difficult for some industries to survive here. I need not tell most folks that they have already made these kinds of adjustments in the European Economic Community and, of course, by our competition in the Pacific Rim.

This is another step forward in tort reform, and I commend those who have agreed to help us in this respect. I look

forward to working with Senators on the other side of the aisle. The President of the United States has repeatedly reiterated his desire to sign a good bill in this respect and we will be fashioning a bill this year. The bill which we have signed is the conference report from last year's effort which passed both Houses of the Congress, and it will provide a place holder as we assemble good legislation this year which we can send to the President and urge him to sign.

Mr. President, I thank you for the opportunity to introduce these two measures, S. 4 and S. 5.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 5

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled.

SEC. 2. FINDINGS AND PURPOSES.

(a) FINDINGS.—The Congress finds that—

(1) our Nation is overly litigious, the civil justice system is overcrowded, sluggish, and excessively costly and the costs of lawsuits, both direct and indirect, are inflicting serious and unnecessary injury on the national economy;

(2) excessive, unpredictable, and often arbitrary damage awards and unfair allocations of liability have a direct and undesirable effect on interstate commerce by increasing

the cost and decreasing the availability of goods and services;

(3) the rules of law governing product liability actions, damage awards, and allocations of liability have evolved inconsistently within and among the States, resulting in a complex, contradictory, and uncertain regime that is inequitable to both plaintiffs and defendants and unduly burdens interstate commerce;

(4) as a result of excessive, unpredictable, and often arbitrary damage awards and unfair allocations of liability, consumers have been adversely affected through the withdrawal of products, producers, services, and service providers from the marketplace, and from excessive liability costs passed on to them through higher prices;

(5) excessive, unpredictable, and often arbitrary damage awards and unfair allocations of liability jeopardize the financial well-being of many individuals as well as entire industries, particularly the Nation's small businesses and adversely affects government and taxpayers;

(6) the excessive costs of the civil justice system undermine the ability of American companies to compete internationally, and serve to decrease the number of jobs and the amount of productive capital in the national economy;

(7) the unpredictability of damage awards is inequitable to both plaintiffs and defendants and has added considerably to the high cost of liability insurance, making it difficult for producers, consumers, volunteers, and nonprofit organizations to protect themselves from liability with any degree of confidence and at a reasonable cost;

(8) because of the national scope of the problems created by the defects in the civil justice system, it is not possible for the States to enact laws that fully and effectively respond to those problems;

(9) it is the constitutional role of the national government to remove barriers to interstate commerce and to protect due process rights; and

(10) there is a need to restore rationality, certainty, and fairness to the civil justice system in order to protect against excessive, arbitrary, and uncertain damage awards and to reduce the volume, costs, and delay of litigation.

(b) PURPOSES.—Based upon the powers contained in Article I, Section 8, Clause 3 and the Fourteenth Amendment of the United States Constitution, the purposes of this Act are to promote the free flow of goods and services and to lessen burdens on interstate commerce and to uphold constitutionally protected due process rights by—

(1) establishing certain uniform legal principles of product liability which provide a fair balance among the interests of product users, manufacturers, and product sellers;

(2) placing reasonable limits on damages over and above the actual damages suffered by a claimant;

(3) ensuring the fair allocation of liability in civil actions;

(4) reducing the unacceptable costs and delays of our civil justice system caused by excessive litigation which harm both plaintiffs and defendants; and

(5) establishing greater fairness, rationality, and predictability in the civil justice system.

SEC. 103. LIABILITY RULES APPLICABLE TO PRODUCT SELLERS, RENTERS, AND LESSORS.

(a) GENERAL RULE.—

(1) IN GENERAL.—In any product liability action, a product seller other than a manufacturer shall be liable to a claimant only if the claimant establishes—

(A) that—

(i) the product that allegedly caused the harm that is the subject of the complaint was sold, rented, or leased by the product seller;

(ii) the product seller failed to exercise reasonable care with respect to the product; and

(iii) the failure to exercise reasonable care was a proximate cause of harm to the claimant;

(B) that—

(i) the product seller made an express warranty applicable to the product that allegedly caused the harm that is the subject of the complaint, independent of any express warranty made by a manufacturer as to the same product;

(ii) the product failed to conform to the warranty; and

(iii) the failure of the product to conform to the warranty caused harm to the claimant; or

(C) that—

(i) the product seller engaged in intentional wrongdoing, as determined under applicable State law; and

(ii) such intentional wrongdoing was a proximate cause of the harm that is the subject of the complaint.

(2) REASONABLE OPPORTUNITY FOR INSPECTION.—For purposes of paragraph (1)(A)(ii), a product seller shall not be considered to have failed to exercise reasonable care with respect to a product based upon an alleged failure to inspect the product—

(A) if the failure occurred because there was no reasonable opportunity to inspect the product; or

(B) if the inspection, in the exercise of reasonable care, would not have revealed the aspect of the product which allegedly caused the claimant's harm.

(b) SPECIAL RULE.—

(1) IN GENERAL.—A product seller shall be deemed to be liable as a manufacturer of a product for harm caused by the product if—

(A) the manufacturer is not subject to service of process under the laws of any State in which the action may be brought; or

(B) the court determines that the claimant would be unable to enforce a judgment against the manufacturer.

(2) STATUTE OF LIMITATIONS.—For purposes of this subsection only, the statute of limitations applicable to claims asserting liability of a product seller as a manufacturer shall be tolled from the date of the filing of a complaint against the manufacturer to the date that judgment is entered against the manufacturer.

(c) RENTED OR LEASED PRODUCTS.—

(1) Notwithstanding any other provision of law, any person engaged in the business of renting or leasing a product (other than a person excluded from the definition of product seller under section 101(16)(B)) shall be subject to liability in a product liability action under subsection (a), but any person engaged in the business of renting or leasing a product shall not be liable to a claimant for the tortious act of another solely by reason of ownership of such product.

(2) For purposes of paragraph (1), and for determining the applicability of this title to any person subject to paragraph (1), the term "product liability action" means a civil action brought on any theory for harm caused by a product or product use.

(d) ACTIONS FOR NEGLIGENT ENTRUSTMENT.—A civil action for negligent entrustment shall not be subject to the provisions of this section, but shall be subject to any applicable State law.

(1) the determination of whether a person was intoxicated or was under the influence of intoxicating alcohol or any drug shall be made pursuant to applicable State law; and

(2) the term "drug" means any controlled substance as defined in the Controlled Substances Act (21 U.S.C. 802(6)) that was not legally prescribed for use by the claimant or that was taken by the claimant other than in accordance with the terms of a lawfully issued prescription.

SEC. 105. MISUSE OR ALTERATION.

(a) GENERAL RULE.—

(1) IN GENERAL.—In a product liability action, the damages for which a defendant is otherwise liable under Federal or State law shall be reduced by the percentage of responsibility for the claimant's harm attributable to misuse or alteration of a product by any person if the defendant establishes that such percentage of the claimant's harm was proximately caused by a use or alteration of a product—

(A) in violation of, or contrary to, a defendant's express warnings or instructions if

the warnings or instructions are adequate as determined pursuant to applicable State law; or

(B) involving a risk of harm which was known or should have been known by the ordinary person who uses or consumes the product with the knowledge common to the class of persons who used or would be reasonably anticipated to use the product.

(2) USE INTENDED BY A MANUFACTURER IS NOT MISUSE OR ALTERATION.—For the purposes of this Act, a use of a product that is intended by the manufacturer of the product does not constitute a misuse or alteration of the product.

(b) WORKPLACE INJURY.—Notwithstanding subsection (a), and except as otherwise provided in section 111, the damages for which a defendant is otherwise liable under State law shall not be reduced by the percentage of responsibility for the claimant's harm attributable to misuse or alteration of the product by the claimant's employer or any co-employee who is immune from suit by the claimant pursuant to the State law applicable to workplace injuries.

SEC. 106. UNIFORM TIME LIMITATIONS ON LIABILITY.

(a) STATUTE OF LIMITATIONS.—

(1) IN GENERAL.—Except as provided in paragraph (2) and subsection (b), a product liability action may be filed not later than 2 years after the date on which the claimant discovered or, in the exercise of reasonable care, should have discovered—

(A) the harm that is the subject of the action; and

(B) the cause of the harm.

(2) EXCEPTION.—A person with a legal disability (as determined under applicable law) may file a product liability action not later than 2 years after the date on which the person ceases to have the legal disability.

(b) STATUTE OF REPOSE.—

(1) IN GENERAL.—Subject to paragraphs (2) and (3), no product liability action that is subject to this Act concerning a product, that is a durable good, alleged to have caused harm (other than toxic harm) may be filed after the 15-year period beginning at the time of delivery of the product to the first purchaser or lessee.

(2) STATE LAW.—Notwithstanding paragraph (1), if pursuant to an applicable State law, an action described in such paragraph is required to be filed during a period that is shorter than the 15-year period specified in such paragraph, the State law shall apply with respect to such period.

(3) EXCEPTIONS.—

(A) A motor vehicle, vessel, aircraft, or train, that is used primarily to transport passengers for hire, shall not be subject to this subsection.

(B) Paragraph (1) does not bar a product liability action against a defendant who made an express warranty in writing as to the safety or life expectancy of the specific product involved which was longer than 15 years, but it will apply at the expiration of that warranty.

(C) Paragraph (1) does not affect the limitations period established by the General Aviation Revitalization Act of 1994 (49 U.S.C. 40101 note).

(c) TRANSITIONAL PROVISION RELATING TO EXTENSION OF PERIOD FOR BRINGING CERTAIN ACTIONS.—If any provision of subsection (a) or (b) shortens the period during which a product liability action could be otherwise brought pursuant to another provision of law, the claimant may, notwithstanding subsections (a) and (b), bring the product liability action not later than 1 year after the date of enactment of this Act.

SEC. 107. ALTERNATIVE DISPUTE RESOLUTION PROCEDURES.

(a) SERVICE OF OFFER.—A claimant or a defendant in a product liability action may, not later than 60 days after the service of—

(1) the initial complaint; or

(2) the applicable deadline for a responsive pleading;

whichever is later, serve upon an adverse party an offer to proceed pursuant to any voluntary, nonbinding alternative dispute resolution procedure established or recognized under the law of the State in which the product liability action is brought or under the rules of the court in which such action is maintained.

(b) WRITTEN NOTICE OF ACCEPTANCE OR REJECTION.—Except as provided in subsection (c), not later than 10 days after the service of an offer to proceed under subsection (a), an offeree shall file a written notice of acceptance or rejection of the offer.

(c) EXTENSION.—The court may, upon motion by an offeree made prior to the expiration of the 10-day period specified in subsection (b), extend the period for filing a written notice under such subsection for a period of not more than 60 days after the date of expiration of the period specified in subsection (b). Discovery may be permitted during such period.

SEC. 108. UNIFORM STANDARDS FOR AWARD OF PUNITIVE DAMAGES.

(a) GENERAL RULE.—Punitive damages may, to the extent permitted by applicable State law, be awarded against a defendant if the claimant establishes by clear and convincing evidence that conduct carried out by the defendant with a conscious, flagrant indifference to the rights or safety of others was the proximate cause of the harm that is the subject of the action in any product liability action.

(b) LIMITATION ON AMOUNT.—

(1) IN GENERAL.—The amount of punitive damages that may be awarded in an action described in subsection (a) may not exceed the greater of—

(A) 2 times the sum of the amount awarded to the claimant for economic loss and non-economic loss; or

(B) \$250,000.

(2) SPECIAL RULE.—Notwithstanding paragraph (1), in any action described in subsection (a) against an individual whose net worth does not exceed \$500,000 or against an owner of an unincorporated business, or any partnership, corporation, association, unit of local government, or organization which has fewer than 25 full-time employees, the punitive damages shall not exceed the lesser of—

(A) 2 times the sum of the amount awarded to the claimant for economic loss and non-economic loss; or

(B) \$250,000.

For the purpose of determining the applicability of this paragraph to a corporation, the number of employees of a subsidiary or wholly-owned corporation shall include all employees of a parent or sister corporation.

(3) EXCEPTION FOR INSUFFICIENT AWARD IN CASES OF EGREGIOUS CONDUCT.—

(A) DETERMINATION BY COURT.—If the court makes a determination, after considering each of the factors in subparagraph (B), that the application of paragraph (1) would result in an award of punitive damages that is insufficient to punish the egregious conduct of the defendant against whom the punitive damages are to be awarded or to deter such conduct in the future, the court shall determine the additional amount of punitive damages (referred to in this paragraph as the "additional amount") in excess of the amount determined in accordance with paragraph (1) to be awarded against the defendant in a separate proceeding in accordance with this paragraph.

(B) FACTORS FOR CONSIDERATION.—In any proceeding under paragraph (A), the court shall consider—

- (i) the extent to which the defendant acted with actual malice;
- (ii) the likelihood that serious harm would arise from the conduct of the defendant;
- (iii) the degree of the awareness of the defendant of that likelihood;
- (iv) the profitability of the misconduct to the defendant;
- (v) the duration of the misconduct and any concurrent or subsequent concealment of the conduct by the defendant;
- (vi) the attitude and conduct of the defendant upon the discovery of the misconduct and whether the misconduct has terminated;
- (vii) the financial condition of the defendant; and
- (viii) the cumulative deterrent effect of other losses, damages, and punishment suffered by the defendant as a result of the misconduct, reducing the amount of punitive damages on the basis of the economic impact and severity of all measures to which the defendant has been or may be subjected, including—

(I) compensatory and punitive damage awards to similarly situated claimants;

(II) the adverse economic effect of stigma or loss of reputation;

(III) civil fines and criminal and administrative penalties; and

(IV) stop sale, cease and desist, and other remedial or enforcement orders.

(C) REQUIREMENTS FOR AWARDING ADDITIONAL AMOUNT.—If the court awards an additional amount pursuant to this subsection, the court shall state its reasons for setting the amount of the additional amount in findings of fact and conclusions of law.

(D) PREEMPTION.—This section does not create a cause of action for punitive damages and does not preempt or supersede any State or Federal law to the extent that such law would further limit the award of punitive damages. Nothing in this subsection shall modify or reduce the ability of courts to order remittiturs.

(4) APPLICATION BY COURT.—This subsection shall be applied by the court and application of this subsection shall not be disclosed to the jury. Nothing in this subsection shall authorize the court to enter an award of punitive damages in excess of the jury's initial award of punitive damages.

(c) BIFURCATION AT REQUEST OF ANY PARTY.—

(1) IN GENERAL.—At the request of any party the trier of fact in any action that is subject to this section shall consider in a separate proceeding, held subsequent to the determination of the amount of compensatory damages, whether punitive damages are to be awarded for the harm that is the subject of the action and the amount of the award.

(2) INADMISSIBILITY OF EVIDENCE RELATIVE ONLY TO A CLAIM OF PUNITIVE DAMAGES IN A PROCEEDING CONCERNING COMPENSATORY DAMAGES.—If any party requests a separate proceeding under paragraph (1), in a proceeding to determine whether the claimant may be awarded compensatory damages, any evidence, argument, or contention that is relevant only to the claim of punitive damages, as determined by applicable State law, shall be inadmissible.

SEC. 109. LIABILITY FOR CERTAIN CLAIMS RELATING TO DEATH.

In any civil action in which the alleged harm to the claimant is death and, as of the effective date of this Act, the applicable State law provides, or has been construed to provide, for damages only punitive in nature, a defendant may be liable for any such damages without regard to section 108, but only during such time as the State law so pro-

vides. This section shall cease to be effective September 1, 1997.

SEC. 110. SEVERAL LIABILITY FOR NONECONOMIC LOSS.

(a) GENERAL RULE.—In a product liability action, the liability of each defendant for noneconomic loss shall be several only and shall not be joint.

(b) AMOUNT OF LIABILITY.—

(1) IN GENERAL.—Each defendant shall be liable only for the amount of noneconomic loss allocated to the defendant in direct proportion to the percentage of responsibility of the defendant (determined in accordance with paragraph (2)) for the harm to the claimant with respect to which the defendant is liable. The court shall render a separate judgment against each defendant in an amount determined pursuant to the preceding sentence.

(2) PERCENTAGE OF RESPONSIBILITY.—For purposes of determining the amount of noneconomic loss allocated to a defendant under this section, the trier of fact shall determine the percentage of responsibility of each person responsible for the claimant's harm, whether or not such person is a party to the action.

SEC. 111. WORKERS' COMPENSATION SUBROGATION.

(a) GENERAL RULE.—

(1) RIGHT OF SUBROGATION.—

(A) IN GENERAL.—An insurer shall have a right of subrogation against a manufacturer or product seller to recover any claimant's benefits relating to harm that is the subject of a product liability action that is subject to this Act.

(B) WRITTEN NOTIFICATION.—To assert a right of subrogation under subparagraph (A), the insurer shall provide written notice to the court in which the product liability action is brought.

(C) INSURER NOT REQUIRED TO BE A PARTY.—An insurer shall not be required to be a necessary and proper party in a product liability action covered under subparagraph (A).

(2) SETTLEMENTS AND OTHER LEGAL PROCEEDINGS.—

(A) IN GENERAL.—In any proceeding relating to harm or settlement with the manufacturer or product seller by a claimant who files a product liability action that is subject to this Act, an insurer may participate to assert a right of subrogation for claimant's benefits with respect to any payment made by the manufacturer or product seller by reason of such harm, without regard to whether the payment is made—

- (i) as part of a settlement;
- (ii) in satisfaction of judgment;
- (iii) as consideration for a covenant not to sue; or
- (iv) in another manner.

(B) WRITTEN NOTIFICATION.—Except as provided in subparagraph (C), an employee shall not make any settlement with or accept any payment from the manufacturer or product seller without written notification to the insurer.

(C) EXEMPTION.—Subparagraph (B) shall not apply in any case in which the insurer has been compensated for the full amount of the claimant's benefits.

(3) HARM RESULTING FROM ACTION OF EMPLOYER OR COEMPLOYEE.—

(A) IN GENERAL.—If, with respect to a product liability action that is subject to this Act, the manufacturer or product seller attempts to persuade the trier of fact that the harm to the claimant was caused by the fault of the employer of the claimant or any coemployee of the claimant, the issue of that fault shall be submitted to the trier of fact, but only after the manufacturer or product seller has provided timely written notice to the insurer.

(B) RIGHTS OF INSURER.—

(i) IN GENERAL.—Notwithstanding any other provision of law, with respect to an issue of fault submitted to a trier of fact pursuant to subparagraph (A), an insurer shall, in the same manner as any party in the action (even if the insurer is not a named party in the action), have the right to—

- (I) appear;
- (II) be represented;
- (III) introduce evidence;
- (IV) cross-examine adverse witnesses; and
- (V) present arguments to the trier of fact.

(ii) LAST ISSUE.—The issue of harm resulting from an action of an employer or coemployee shall be the last issue that is submitted to the trier of fact.

(C) REDUCTION OF DAMAGES.—If the trier of fact finds by clear and convincing evidence that the harm to the claimant that is the subject of the product liability action was caused by the fault of the employer or a coemployee of the claimant—

(i) the court shall reduce by the amount of the claimant's benefits—

- (I) the damages awarded against the manufacturer or product seller; and
- (II) any corresponding insurer's subrogation lien; and

(ii) the manufacturer or product seller shall have no further right by way of contribution or otherwise against the employer.

(D) CERTAIN RIGHTS OF SUBROGATION NOT AFFECTED.—Notwithstanding a finding by the trier of fact described in subparagraph (C), the insurer shall not lose any right of subrogation related to any—

- (i) intentional tort committed against the claimant by a coemployee; or
- (ii) act committed by a coemployee outside the scope of normal work practices.

(b) ATTORNEY'S FEES.—If, in a product liability action that is subject to this section, the court finds that harm to a claimant was not caused by the fault of the employer or a coemployee of the claimant, the manufacturer or product seller shall reimburse the insurer for reasonable attorney's fees and court costs incurred by the insurer in the action, as determined by the court.

TITLE II—BIOMATERIALS ACCESS ASSURANCE

SEC. 201. SHORT TITLE.

This title may be cited as the "Biomaterials Access Assurance Act of 1997".

SEC. 202. FINDINGS.

Congress finds that—

(1) each year millions of citizens of the United States depend on the availability of lifesaving or life enhancing medical devices, many of which are permanently implantable within the human body;

(2) a continued supply of raw materials and component parts is necessary for the invention, development, improvement, and maintenance of the supply of the devices;

(3) most of the medical devices are made with raw materials and component parts that—

(A) are not designed or manufactured specifically for use in medical devices; and

(B) come in contact with internal human tissue;

(4) the raw materials and component parts also are used in a variety of nonmedical products;

(5) because small quantities of the raw materials and component parts are used for medical devices, sales of raw materials and component parts for medical devices constitute an extremely small portion of the overall market for the raw materials and medical devices;

(6) under the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301 et seq.), manufacturers of medical devices are required to demonstrate that the medical devices are safe

and effective, including demonstrating that the products are properly designed and have adequate warnings or instructions;

(7) notwithstanding the fact that raw materials and component parts suppliers do not design, produce, or test a final medical device, the suppliers have been the subject of actions alleging inadequate—

(A) design and testing of medical devices manufactured with materials or parts supplied by the suppliers; or

(B) warnings related to the use of such medical devices;

(8) even though suppliers of raw materials and component parts have very rarely been held liable in such actions, such suppliers have ceased supplying certain raw materials and component parts for use in medical devices because the costs associated with litigation in order to ensure a favorable judgment for the suppliers far exceeds the total potential sales revenues from sales by such suppliers to the medical device industry;

(9) unless alternate sources of supply can be found, the unavailability of raw materials and component parts for medical devices will lead to unavailability of lifesaving and life-enhancing medical devices;

(10) because other suppliers of the raw materials and component parts in foreign nations are refusing to sell raw materials or component parts for use in manufacturing certain medical devices in the United States, the prospects for development of new sources of supply for the full range of threatened raw materials and component parts for medical devices are remote;

(11) it is unlikely that the small market for such raw materials and component parts in the United States could support the large investment needed to develop new suppliers of such raw materials and component parts;

(12) attempts to develop such new suppliers would raise the cost of medical devices;

(13) courts that have considered the duties of the suppliers of the raw materials and component parts have generally found that the suppliers do not have a duty—

(A) to evaluate the safety and efficacy of the use of a raw material or component part in a medical device; and

(B) to warn consumers concerning the safety and effectiveness of a medical device;

(14) attempts to impose the duties referred to in subparagraphs (A) and (B) of paragraph (13) on suppliers of the raw materials and component parts would cause more harm than good by driving the suppliers to cease supplying manufacturers of medical devices; and

(15) in order to safeguard the availability of a wide variety of lifesaving and life-enhancing medical devices, immediate action is needed—

(A) to clarify the permissible bases of liability for suppliers of raw materials and component parts for medical devices; and

(B) to provide expeditious procedures to dispose of unwarranted suits against the suppliers in such manner as to minimize litigation costs.

SEC. 204. GENERAL REQUIREMENTS; APPLICABILITY; PREEMPTION.

(a) GENERAL REQUIREMENTS.—

(1) IN GENERAL.—In any civil action covered by this title, a biomaterials supplier may raise any defense set forth in section 205.

(2) PROCEDURES.—Notwithstanding any other provision of law, the Federal or State court in which a civil action covered by this title is pending shall, in connection with a motion for dismissal or judgment based on a defense described in paragraph (1), use the procedures set forth in section 206.

(b) APPLICABILITY.—

(1) IN GENERAL.—Except as provided in paragraph (2), notwithstanding any other provision of law, this title applies to any civil action brought by a claimant, whether in a Federal or State court, against a manufacturer, seller, or biomaterials supplier, on the basis of any legal theory, for harm allegedly caused by an implant.

(2) EXCLUSION.—A civil action brought by a purchaser of a medical device for use in providing professional services against a manufacturer, seller, or biomaterials supplier for loss or damage to an implant or for commercial loss to the purchaser—

(A) shall not be considered an action that is subject to this title; and

(B) shall be governed by applicable commercial or contract law.

(c) SCOPE OF PREEMPTION.—

(1) IN GENERAL.—This title supersedes any State law regarding recovery for harm caused by an implant and any rule of procedure applicable to a civil action to recover damages for such harm only to the extent that this title establishes a rule of law applicable to the recovery of such damages.

SEC. 205. LIABILITY OF BIOMATERIALS SUPPLIERS.

(a) IN GENERAL.—

(1) EXCLUSION FROM LIABILITY.—Except as provided in paragraph (2), a biomaterials supplier shall not be liable for harm to a claimant caused by an implant.

(2) LIABILITY.—A biomaterials supplier that—

(A) is a manufacturer may be liable for harm to a claimant described in subsection (b);

(B) is a seller may be liable for harm to a claimant described in subsection (c); and

(C) furnishes raw materials or component parts that fail to meet applicable contractual requirements or specifications may be liable for a harm to a claimant described in subsection (d).

(b) LIABILITY AS MANUFACTURER.—

(1) IN GENERAL.—A biomaterials supplier may, to the extent required and permitted by any other applicable law, be liable for harm to a claimant caused by an implant if the biomaterials supplier is the manufacturer of the implant.

(2) GROUNDS FOR LIABILITY.—The biomaterials supplier may be considered the manufacturer of the implant that allegedly caused harm to a claimant only if the biomaterials supplier—

(A)(i) has registered with the Secretary pursuant to section 510 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360) and the regulations issued under such section; and

(ii) included the implant on a list of devices filed with the Secretary pursuant to section 510(j) of such Act (21 U.S.C. 360(j)) and the regulations issued under such section;

(B) is the subject of a declaration issued by the Secretary pursuant to paragraph (3) that states that the supplier, with respect to the implant that allegedly caused harm to the claimant, was required to—

(i) register with the Secretary under section 510 of such Act (21 U.S.C. 360), and the regulations issued under such section, but failed to do so; or

(ii) include the implant on a list of devices filed with the Secretary pursuant to section 510(j) of such Act (21 U.S.C. 360(j)) and the regulations issued under such section, but failed to do so; or

(C) is related by common ownership or control to a person meeting all the requirements described in subparagraph (A) or (B), if the court deciding a motion to dismiss in accordance with section 206(c)(3)(B)(i) finds, on the basis of affidavits submitted in accordance with section 206, that it is necessary to impose liability on the biomaterials supplier as a manufacturer because the related manufacturer meeting the requirements of subparagraph (A) or (B) lacks sufficient financial resources to satisfy any judgment that the court feels it is likely to enter should the claimant prevail.

(3) ADMINISTRATIVE PROCEDURES.—

(A) IN GENERAL.—The Secretary may issue a declaration described in paragraph (2)(B) on the motion of the Secretary or on petition by any person, after providing—

(i) notice to the affected persons; and

(ii) an opportunity for an informal hearing.

(B) DOCKETING AND FINAL DECISION.—Immediately upon receipt of a petition filed pursuant to this paragraph, the Secretary shall docket the petition. Not later than 180 days after the petition is filed, the Secretary shall issue a final decision on the petition.

(C) APPLICABILITY OF STATUTE OF LIMITATIONS.—Any applicable statute of limitations shall toll during the period during which a claimant has filed a petition with the Secretary under this paragraph.

(c) LIABILITY AS SELLER.—A biomaterials supplier may, to the extent required and permitted by any other applicable law, be liable as a seller for harm to a claimant caused by an implant if—

(1) the biomaterials supplier—

(A) held title to the implant that allegedly caused harm to the claimant as a result of purchasing the implant after—

(i) the manufacture of the implant; and

(ii) the entrance of the implant in the stream of commerce; and

(B) subsequently resold the implant; or

(2) the biomaterials supplier is related by common ownership or control to a person meeting all the requirements described in paragraph (1), if a court deciding a motion to dismiss in accordance with section 206(c)(3)(B)(ii) finds, on the basis of affidavits submitted in accordance with section 206, that it is necessary to impose liability on the biomaterials supplier as a seller because the related seller meeting the requirements of paragraph (1) lacks sufficient financial resources to satisfy any judgment that the court feels it is likely to enter should the claimant prevail.

(d) LIABILITY FOR VIOLATING CONTRACTUAL REQUIREMENTS OR SPECIFICATIONS.—A biomaterials supplier may, to the extent required and permitted by any other applicable law, be liable for harm to a claimant caused by an implant, if the claimant in an action shows, by a preponderance of the evidence, that—

(1) the raw materials or component parts delivered by the biomaterials supplier either—

(A) did not constitute the product described in the contract between the biomaterials supplier and the person who contracted for delivery of the product; or

(B) failed to meet any specifications that were—

(i) provided to the biomaterials supplier and not expressly repudiated by the biomaterials supplier prior to acceptance of delivery of the raw materials or component parts;

(ii)(I) published by the biomaterials supplier;

(II) provided to the manufacturer by the biomaterials supplier; or

(III) contained in a master file that was submitted by the biomaterials supplier to the Secretary and that is currently maintained by the biomaterials supplier for purposes of premarket approval of medical devices; or

(iii) included in the submissions for purposes of premarket approval or review by the Secretary under section 510, 513, 515, or 520 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360, 360c, 360e, or 360j), and received clearance from the Secretary if such specifications were provided by the manufacturer to the biomaterials supplier and were not expressly repudiated by the biomaterials supplier prior to the acceptance by the manufacturer of delivery of the raw materials or component parts; and

(2) such conduct was an actual and proximate cause of the harm to the claimant.

SEC. 206. PROCEDURES FOR DISMISSAL OF CIVIL ACTIONS AGAINST BIOMATERIALS SUPPLIERS.

(a) MOTION TO DISMISS.—In any action that is subject to this title, a biomaterials supplier who is a defendant in such action may, at any time during which a motion to dismiss may be filed under an applicable law, move to dismiss the action against it on the grounds that—

(1) the defendant is a biomaterials supplier; and

(2)(A) the defendant should not, for the purposes of—

(i) section 205(b), be considered to be a manufacturer of the implant that is subject to such section; or

(ii) section 205(c), be considered to be a seller of the implant that allegedly caused harm to the claimant; or

(B)(i) the claimant has failed to establish, pursuant to section 205(d), that the supplier furnished raw materials or component parts in violation of contractual requirements or specifications; or

(ii) the claimant has failed to comply with the procedural requirements of subsection (b).

(b) MANUFACTURER OF IMPLANT SHALL BE NAMED A PARTY.—The claimant shall be required to name the manufacturer of the implant as a party to the action, unless—

(1) the manufacturer is subject to service of process solely in a jurisdiction in which the biomaterials supplier is not domiciled or subject to a service of process; or

(2) an action against the manufacturer is barred by applicable law.

(c) PROCEEDING ON MOTION TO DISMISS.—The following rules shall apply to any proceeding on a motion to dismiss filed under this section:

(1) AFFIDAVITS RELATING TO LISTING AND DECLARATIONS.—

(A) IN GENERAL.—The defendant in the action may submit an affidavit demonstrating that defendant has not included the implant on a list, if any, filed with the Secretary pursuant to section 510(j) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(j)).

(B) RESPONSE TO MOTION TO DISMISS.—In response to the motion to dismiss, the claimant may submit an affidavit demonstrating that—

(i) the Secretary has, with respect to the defendant and the implant that allegedly caused harm to the claimant, issued a declaration pursuant to section 205(b)(2)(B); or

(ii) the defendant who filed the motion to dismiss is a seller of the implant who is liable under section 205(c).

(2) EFFECT OF MOTION TO DISMISS ON DISCOVERY.—

(A) IN GENERAL.—If a defendant files a motion to dismiss under paragraph (1) or (2) of subsection (a), no discovery shall be permitted in connection to the action that is the subject of the motion, other than discovery necessary to determine a motion to dismiss for lack of jurisdiction, until such time as the court rules on the motion to dismiss in accordance with the affidavits submitted by the parties in accordance with this section.

(B) DISCOVERY.—If a defendant files a motion to dismiss under subsection (a)(2)(B)(i) on the grounds that the biomaterials supplier did not furnish raw materials or component parts in violation of contractual requirements or specifications, the court may permit discovery, as ordered by the court. The discovery conducted pursuant to this subparagraph shall be limited to issues that are directly relevant to—

(i) the pending motion to dismiss; or

(ii) the jurisdiction of the court.

(3) AFFIDAVITS RELATING STATUS OF DEFENDANT.—

(A) IN GENERAL.—Except as provided in clauses (i) and (ii) of subparagraph (B), the court shall consider a defendant to be a biomaterials supplier who is not subject to an action for harm to a claimant caused by an implant, other than an action relating to liability for a violation of contractual requirements or specifications described in subsection (d).

(B) RESPONSES TO MOTION TO DISMISS.—The court shall grant a motion to dismiss any action that asserts liability of the defendant under subsection (b) or (c) of section 205 on the grounds that the defendant is not a manufacturer subject to such section 205(b) or seller subject to section 205(c), unless the claimant submits a valid affidavit that demonstrates that—

(i) with respect to a motion to dismiss contending the defendant is not a manufacturer, the defendant meets the applicable requirements for liability as a manufacturer under section 205(b); or

(ii) with respect to a motion to dismiss contending that the defendant is not a seller, the defendant meets the applicable requirements for liability as a seller under section 205(c).

(4) BASIS OF RULING ON MOTION TO DISMISS.—

(A) IN GENERAL.—The court shall rule on a motion to dismiss filed under subsection (a) solely on the basis of the pleadings of the parties made pursuant to this section and any affidavits submitted by the parties pursuant to this section.

(B) MOTION FOR SUMMARY JUDGMENT.—Notwithstanding any other provision of law, if the court determines that the pleadings and affidavits made by parties pursuant to this section raise genuine issues as concerning material facts with respect to a motion concerning contractual requirements and specifications, the court may deem the motion to dismiss to be a motion for summary judgment made pursuant to subsection (d).

(d) SUMMARY JUDGMENT.—

(1) IN GENERAL.—

(A) BASIS FOR ENTRY OF JUDGMENT.—A biomaterials supplier shall be entitled to entry of judgment without trial if the court finds there is no genuine issue as concerning any material fact for each applicable element set forth in paragraphs (1) and (2) of section 205(d).

(B) ISSUES OF MATERIAL FACT.—With respect to a finding made under subparagraph (A), the court shall consider a genuine issue of material fact to exist only if the evidence submitted by claimant would be sufficient to allow a reasonable jury to reach a verdict for the claimant if the jury found the evidence to be credible.

(2) DISCOVERY MADE PRIOR TO A RULING ON A MOTION FOR SUMMARY JUDGMENT.—If, under applicable rules, the court permits discovery prior to a ruling on a motion for summary judgment made pursuant to this subsection, such discovery shall be limited solely to establishing whether a genuine issue of material fact exists as to the applicable elements set forth in paragraphs (1) and (2) of section 205(d).

(3) DISCOVERY WITH RESPECT TO A BIOMATERIALS SUPPLIER.—A biomaterials supplier shall be subject to discovery in connection with a motion seeking dismissal or summary judgment on the basis of the inapplicability of section 205(d) or the failure to establish the applicable elements of section 205(d) solely to the extent permitted by the applicable Federal or State rules for discovery against nonparties.

(e) STAY PENDING PETITION FOR DECLARATION.—If a claimant has filed a petition for a declaration pursuant to section 205(b)(3)(A) with respect to a defendant, and the Secretary has not issued a final decision on the petition, the court shall stay all proceedings with respect to that defendant until such time as the Secretary has issued a final decision on the petition.

(f) MANUFACTURER CONDUCT OF PROCEEDING.—The manufacturer of an implant that is the subject of an action covered under this title shall be permitted to file and conduct a proceeding on any motion for summary judgment or dismissal filed by a biomaterials

supplier who is a defendant under this section if the manufacturer and any other defendant in such action enter into a valid and applicable contractual agreement under which the manufacturer agrees to bear the cost of such proceeding or to conduct such proceeding.

(g) ATTORNEY FEES.—The court shall require the claimant to compensate the biomaterials supplier (or a manufacturer appearing in lieu of a supplier pursuant to subsection (f)) for attorney fees and costs, if—

(1) the claimant named or joined the biomaterials supplier; and

(2) the court found the claim against the biomaterials supplier to be without merit and frivolous.

TITLE III—LIMITATIONS ON APPLICABILITY; EFFECTIVE DATE

SEC. 301. EFFECT OF COURT OF APPEALS DECISIONS.

A decision by a Federal circuit court of appeals interpreting a provision of this Act (except to the extent that the decision is overruled or otherwise modified by the Supreme Court) shall be considered a controlling precedent with respect to any subsequent decision made concerning the interpretation of such provision by any Federal or State court within the geographical boundaries of the area under the jurisdiction of the circuit court of appeals.

SEC. 302. FEDERAL CAUSE OF ACTION PRECLUDED.

The district courts of the United States shall not have jurisdiction pursuant to this Act based on section 1331 or 1337 of title 28, United States Code.

SEC. 303. EFFECTIVE DATE.

This Act shall apply with respect to any action commenced on or after the date of the enactment of this Act without regard to whether the harm that is the subject of the action or the conduct that caused the harm occurred before such date of enactment.

Mr. McCAIN. Mr. President, the Product Liability Reform Act of 1997 overhauls an unfair and inefficient product liability system for the benefit of American consumers and entrepreneurs. The text of this bill will be familiar to all Senators who are veterans of the 104th Congress: it is the conference report that Congress approved last year. Unfortunately, President Clinton vetoed that conference report, but I want to remind my colleagues that the President said in his veto statement "I support real common sense product liability reform." Well, Mr. President, we will soon again hold your words to task.

The introduction of this bill today, as one of the first 10 bills introduced in the Congress, is an indication of the importance of the legislation and the priority that we place on its consideration. The text of the Conference Report has been introduced because it is the last action Congress took on this matter.

Now members from both sides of the aisle will undertake bipartisan discussions and diverse viewpoints will be addressed. In the last Congress Senator GORTON and Senator ROCKEFELLER did an excellent job in developing a bipartisan consensus to pass this legislation. I appreciate their hard work and dedication. Their efforts will be called on again. Senator ASHCROFT has assumed the chairmanship of the subcommittee

with jurisdiction over this bill and I know he will be a valuable asset as this legislation advances.

As we address this important legislation I look forward to working with the President as well. The President's veto statement outlined some of his concerns with the conference report. In my opinion, many of those concerns can be addressed easily and directly. Other issues, such as reform of punitive damages and joint and several liability, will require meaningful discussions.

I am nevertheless hopeful that those negotiations will succeed. I am encouraged that the President has strongly indicated his support for meaningful product liability reform. I recall that in the first Presidential debate with Senator Dole, in October 1996, the President said, when discussing product liability, "we're going to eliminate frivolous lawsuits, I'll sign the bill." In that debate, the President reminded the public that he has supported tort reform in the past. In 1994, the President signed the General Aviation Revitalization Act which, by instituting a statute of repose, truly revitalized a withering industry and in the process created hundreds of high quality jobs.

As this legislation moves forward, I remind my colleagues that we must not let the perfect be the enemy of the good. Much is at stake. Federal liability legislation is urgently needed. The present system in the United States for resolving product liability actions is costly, slow, inequitable and unpredictable. I find it shocking that the system's transaction costs exceed the compensation paid to individuals who have sustained injury. These transaction costs are inevitably passed on to consumers through higher product prices. The inefficiency and unpredictability of the product liability system has also stifled innovation, kept beneficial products off the market, and has handicapped American firms as they compete in a global market.

Consumers who are legitimately injured suffer most from this broken system. Many consumers who are injured by defective products and are in need of compensation are unable to recover damages or must wait years to recover them. They are thrown into a product liability litigation system where identical cases can produce shockingly different results. Sadly, severely injured victims tend to receive far less than their actual economic losses, while those with minor injuries often are dramatically overcompensated. This legislation will help fix this broken system. I feel it is important to emphasize that this legislation will greatly benefit consumers and it will not bar the door to the court house or limit the compensatory damages that an injured plaintiff can receive.

The malfunctions of this system are particularly evident in the area of biomaterials where valuable life-saving products are kept from consumers. I was introduced to this issue when the Ransom family in Mesa, AZ wrote to

me about their daughter's desperate need for a specialized brain shunt. They were concerned this life-saving device may not be available for their daughter because companies were no longer willing to supply the raw materials necessary due to the high risk of being unjustifiably sued.

In the last Congress, Senator LIEBERMAN and I introduced legislation to address this problem. That legislation, the Biomaterials Access Assurance Act, became part of the product liability bill and was included in the Conference Report of the bill. In the closing weeks of the last Congress, Senator LIEBERMAN and I proposed a version of our bill that excluded breast implant litigation from its coverage. I expect the legislation advanced in this Congress will also contain that exclusion for breast implant litigation. I look forward to working closely with Senator LIEBERMAN on this matter.

I hope that bipartisan negotiations begin in earnest on The Product Liability Reform Act. It is my desire to have this legislation be the first bill reported in this Congress by the Committee on Commerce, Science, and Transportation.

Mr. ABRAHAM. Mr. President, I rise today in support of S. 5, a bill to reform product liability law. This legislation will significantly curb the epidemic of frivolous lawsuits that are diverting our Nation's resources away from productive activity and into transaction costs.

Our current legal system, under which we spend \$300 billion or 4½ percent of our gross domestic product each year, is not just broken, it is falling apart. This is a system in which plaintiffs receive less than half of every dollar spent on litigation-related costs. It is a system that forces necessary goods, such as pharmaceuticals that can treat a number of debilitating diseases and conditions, off the market in this country.

The bill I cosponsor today would do much to address these problems. It institutes caps on punitive damages, thereby limiting potential windfalls for plaintiffs without in any way interfering with their ability to obtain full recovery for their injuries. It provides product manufacturers with long-overdue relief from abusers of their products. And it protects these makers, and sellers, from being made to pay for all or most noneconomic damages when they are responsible for only a small percentage of them.

Last year, President Clinton chose to veto the bipartisan products liability bill that passed the Congress. For the sake of all Americans, I hope this year will be different.

Mr. ASHCROFT. Mr. President, today is an exciting day as I introduce, along with Senators MCCAIN, COVERDELL, MCCONNELL, and ABRAHAM, S. 5, the Product Liability Fairness Act of 1977.

Justice Holmes once wisely observed that a page of history is worth a vol-

ume of logic. With respect to the effort to enact product liability law, we have hundreds of pages of history and volumes of logic to support its enactment now.

The effort of the Federal Government to address product liability goes back almost two decades when President Ford established the Federal Inter-Agency Task Force on Product Liability. Although administration changed, President Carter did not abandon the effort, but enhanced it with resulting research that supports what we do today. President Carter chartered the drafting of the Model Uniform Product Liability Act, which tentatively was offered as a vehicle for state action.

Product liability legislation has been reported out of the Senate Commerce Committee seven times. Last Congress, legislation and a conference report containing many compromises and bipartisan agreements was voted upon favorably in each House. A bipartisan majority of the Senate approved the conference report on March 21, 1996.

The bill that we introduce today is that conference report. I appreciate that today's bill reflects a bill one that was vetoed by President Clinton. But, we are not here today to simply repeat history. We are here to make history and provide Americans with fair product liability legislation.

We are introducing the same bill as a "place marker" for discussions and a fair resolution of issues. The President's veto message suggested that he well may have been misinformed about the nature of the legislation passed by bipartisan majorities last year. Let us have discussions to clarify those matters so that the legislation is unequivocal in its meaning and purpose.

We are resolved to work with the White House to obtain the President's support. I take the President at his word when he said in the Presidential debate on October 6, 1996, "I signed a tort reform bill that dealt with civil aviation a couple of years ago. I proved that I will sign a reasonable tort reform."

It is interesting that the President referred to the General Aviation Revitalization Act of 1994, which he did sign on August 17, 1994. The aviation liability reform bill enacted a statute of repose for general aviation aircraft. In 1994, proponents of the bill said that it would produce jobs. It has. To date, over 9,000 new jobs, good jobs, have been created. Single engine aircraft are being manufactured in America again, and an endangered industry has been revitalized. President Clinton was right to support that bill.

What did opponents say in 1994 aviation bill? They said that no new jobs would be produced. And, they said that if planes were produced, they would be unsafe and, in hyperbole, suggested that they might be made of balsa wood. What actually happened? I already mentioned that 9,000 new jobs have been created. You should also know that the aircraft being made by Amer-

ican workers are the safest single engine aircraft produced in the history of this country.

Let us bring the results of the General Aviation Revitalization Act of 1994 to the broad segments of our country and industries.

We introduce this bill to stimulate job growth. We introduce this bill to remove the chilling effects that prevent the introduction of good and useful products. We introduce this bill to encourage new product development. On the other hand, it is our goal to assure that anyone that makes dangerous and defective products is appropriately sanctioned by our tort law.

From the perspective of many, this bill is a very modest one. From their perspective, there is a need to have liability reform in other crucial areas, such as: general punitive reform, medical liability reform, and volunteers' liability reform.

The principles contained in this bill are a good starting point to make the product liability laws in this nation fair for consumers who purchase defective products while placing the burden on those responsible for placing these products in the stream of commerce. It also ensures that those who misuse products, or use them while under the influence of drugs or alcohol, do not collect a windfall which becomes a burden for American consumers in the form of increased costs for products—useful products that are no longer available in the market, and the loss of jobs and greater opportunities.

This bill in no way limits compensatory damages. This bill would not affect the ability of plaintiffs to sue manufacturers or sellers of medical implants. It would, however, allow raw material suppliers to be dismissed from lawsuits if the generic raw material used in the medical device met contract specifications, and if the biomaterial supplier is not classified as either a manufacturer or seller of the implant.

Strong product liability reform is good for America. It ensures that consumers, injured by a product, will be fairly compensated. It will enhance American innovation, which is the best in the world, by treating responsible entrepreneurs fairly while treating the bad actors harshly and to the full extent of the law.

As chairman of the Consumer Affairs Subcommittee I am committed and look forward to working with this administration toward ending the 20-year study and painstaking endeavor to provide our Nation with sound and fair Federal product liability law. It took the European community about 6 years to accomplish this goal and create the European product liability directive. Japan enacted its first product liability reform law almost 2 years ago.

Our Nation, this Congress, and this administration should pull together and meet the challenge of our foreign competitors and enact fair and balanced product liability law. In that

spirit and for that purpose, we introduce S. 5.

By Mr. SANTORUM (for himself and Mr. SMITH):

S. 6. A bill to amend title 18, United States Code, to ban partial-birth abortions; to the Committee on the Judiciary.

THE PARTIAL-BIRTH BAN ACT OF
1997

Mr. SANTORUM. Mr. President, the agenda for the 105th Congress reflects a continuance of the very significant debate that occurred in the 104th Congress on the issue of partial birth abortion.

Four months ago, we debated and considered a presidential veto override on a bill to ban the partial birth abortion procedure. On a final vote, we came very close to banning this very gruesome procedure, and the number of colleagues who supported the override set the stage for consideration again this year.

A wide spectrum of individuals have coalesced around the effort to ban partial birth abortions. These varied individuals and groups have raised their voices in support of a ban both because of the brutality of partial birth abortions and because they recognize that this debate is not about Roe vs. Wade, the 1973 Supreme Court decision legalizing abortion. It is not about when a fetus becomes a baby. And it is certainly not about women's health. It is about infanticide, it is about killing a child as he or she is being born, an issue that neither Roe vs. Wade nor the subsequent Doe vs. Bolton decision addressed.

During the Senate debate last year, various traditionally pro-choice legislators voted in support of legislation to ban this particular procedure. Among them was a colleague who stated on the floor of the Senate, "In my legal judgement, the issue is not over a woman's right to choose within the constitutional context of Roe versus Wade. * * * The line of the law is drawn, in my legal judgement, when the child is partially out of the womb of the mother. It is no longer abortion; it is infanticide." He was joined in these sentiments by other like minded Senators.

This perspective is significant in that it suggests the scope of the tragedy that this procedure represents. And for those who may still be unclear what a partial birth abortion procedure is, it is this: a fully formed baby—in most cases a viable fetus of 23-26 weeks—is pulled from its mother until all but the head is delivered. Then, scissors are plunged into the base of the skull, a tube is inserted and the child's brains are suctioned out so that the head of the now-dead infant collapses and is delivered.

Partial birth abortion is tragic for the infant who loses his or her life in this brutal procedure. It is also a personal tragedy for the families who

choose the procedure, as it is for those who perform it—even if they aren't aware of it. But partial birth abortion is also a profound social tragedy. It rips through the moral cohesion of our public life. It cuts into our most deeply held beliefs about the importance of protecting and cherishing vulnerable human life. It fractures our sense that the laws of our country should reflect long-held, commonly accepted moral norms.

Yet this kind of tragedy—even as it calls forth and exposes our outrage—can be an unexpected catalyst for consensus, for new coalitions and configurations in our public life. The partial birth abortion debate moves us beyond the traditional lines of confrontation to hollow out a place in the public square where disparate individuals and groups can come together and draw a line that they know should not be crossed.

The stark tragedy of partial birth abortion can be the beginning of a significant public discussion where we define—or re-define—our first principles. Why is such a discussion important? Precisely because it throws into relief the fundamental truths around which a moral consensus is formed in this country. And, as John Courtney Murray reminds us in "We Hold These Truths, Catholic Reflections on the American Proposition", a public consensus which finds its expression in the law should be "an ensemble of substantive truths, a structure of basic knowledge, an order of elementary affirmations* * *".

If we do not have fundamental agreement about first principles, we simply cannot engage one another in civil debate. All we have is the confusion of different factions locked in their own moral universe. If we could agree publicly on just this one point—that partial birth abortion is not something our laws should sanction, and if we could then reveal the consensus—a consensus that I know exists—against killing an almost-born infant, we would have significantly advanced the discussion about what moral status and dignity we give to life in all its stages. Public agreement, codified by law, on this one prohibition gives us a common point of departure. It give us a common language even, because we agree, albeit in a narrow sense, on the meaning of fundamental terms such as life and death. And it is with this common point of departure and discourse—however narrow—that we gain a degree of coherence and unity in our public life and dialogue.

I truly believe that out of the horror and tragedy of partial birth abortions, we can find points of agreement across ideological, political and religious lines which enable us to work toward a life-sustaining culture. So, as hundreds of thousands of faithful and steadfast citizens come together to participate in this year's March for Life, let us remember that such a culture, the culture for which we hope and pray daily, might very well be achieved one argument at a time.

Mr. President, I am proud to have the opportunity to sponsor this legislation and to continue the very significant achievements of my colleague, Senator BOB SMITH. I look forward to continuing that effort in cooperation with Representative CHARLES CANADY, and I thank my colleagues for making this initiative a priority in our legislative agenda.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 6

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Partial-Birth Abortion Ban Act of 1997".

SEC. 2. PROHIBITION ON PARTIAL-BIRTH ABORTIONS.

(a) IN GENERAL.—Title 18, United States Code, is amended by inserting after chapter 73 the following:

"CHAPTER 74—PARTIAL BIRTH ABORTIONS

"Sec.

"1531. Partial-birth abortions prohibited.

"§ 1531. Partial-birth abortions prohibited

"(a) Whoever, in or affecting interstate or foreign commerce, knowingly performs a partial-birth abortion and thereby kills a human fetus or infant shall be fined under this title or imprisoned not more than two years, or both.

"(b) Subsection (a) does not apply to a partial-birth abortion that is necessary to save the life of a mother because her life is endangered by a physical disorder, physical injury, or physical illness, including a life-endangering physical condition caused by or arising from the pregnancy itself, if no other medical procedure would suffice for that purpose.

"(c) As used in this section—

"(1) the term 'partial-birth abortion' means an abortion in which the person performing the abortion partially vaginally delivers a living fetus before killing the infant and completing the delivery; and

"(2) the terms 'fetus' and 'infant' are interchangeable.

"(d) (1) Unless the pregnancy resulted from the plaintiff's criminal conduct or the plaintiff consented to the abortion, the father, and if the mother has not attained the age of 18 years at the time of the abortion, the maternal grandparents of the fetus or infant, may in a civil action obtain appropriate relief.

"(2) Such relief shall include—

"(A) money damages for all injuries, psychological and physical, occasioned by the violation of this section; and

"(B) statutory damages equal to three times the cost of the partial-birth abortion; even if the mother consented to the performance of an abortion.

"(e) A woman upon whom a partial-birth abortion is performed may not be prosecuted under this section for a conspiracy to violate this section, or an offense under section 2, 3, or 4 of this title based on a violation of this section."

(b) CLERICAL AMENDMENT.—The table of chapters for part I of title 18, United States Code, is amended by inserting after the item relating to chapter 73 the following new item:

"75. Partial-birth abortions 1531".

Mr. ABRAHAM. Mr. President, I rise today to cosponsor S. 6. In doing so I add my voice to the chorus calling for

an end to partial birth abortion. The bill we are considering is designed to outlaw medical procedures "in which the person performing the abortion partially delivers a living fetus before killing the fetus and completing the delivery." It is a narrowly drafted bill which specifically and effectively targets a rare but grisly and unnecessary practice.

I understand, Mr. President, that the American people are divided on many issues within the abortion debate. I am firmly pro-life. But in my view one need not resort to broad, ideological arguments in this case. Partial birth abortions occur only in the third trimester of pregnancy. They are never required to save the life, health, or child-bearing ability of the mother. They are unnecessary and regrettable.

We in this chamber failed to override the President's veto of this legislation during the last Congress. But I remain convinced that all of us can agree that this Nation can do without this particular, rare, and grisly procedure. I urge my colleagues to support this legislation.

By Mr. LOTT (for himself, Mr. THURMOND, Mr. SMITH, Mr. WARNER, Mr. KYL, Mr. COCHRAN, Mr. ABRAHAM, Mr. ALLARD, Mr. ASHCROFT, Mr. COVERDELL, Mr. CRAIG, Mr. DEWINE, Mr. DOMENICI, Mr. ENZI, Mr. FAIRCLOTH, Mr. GRAMS, Mr. HAGEL, Mr. HATCH, Mr. HELMS, Mrs. HUTCHISON, Mr. HUTCHINSON, Mr. INHOFE, Mr. MURKOWSKI, Mr. NICKLES, Mr. SESSIONS, and Mr. KEMPTHORNE):

S. 7. A bill to establish a U.S. policy for the deployment of a national missile defense system, and for other purposes; to the Committee on Armed Services.

THE NATIONAL MISSILE DEFENSE ACT OF 1997

Mr. LOTT. Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 7

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "National Missile Defense Act of 1997".

SEC. 2. NATIONAL MISSILE DEFENSE POLICY.

(a) NATIONAL MISSILE DEFENSE.—It is the policy of the United States to deploy by the end of 2003 a National Missile Defense system that—

(1) is capable of defending the territory of the United States against limited ballistic missile attack (whether accidental, unauthorized, or deliberate); and

(2) could be augmented over time to provide a layered defense against larger and more sophisticated ballistic missile threats if they emerge.

(b) COOPERATIVE TRANSITION.—It is the policy of the United States to seek a cooperative transition to a regime that does not feature an offense-only form of deterrence as the basis for strategic stability.

SEC. 3. NATIONAL MISSILE DEFENSE SYSTEM ARCHITECTURE.

(a) REQUIREMENT FOR DEVELOPMENT OF SYSTEM.—To implement the policy established in section 3(a), the Secretary of Defense shall develop for deployment a National Missile Defense (NMD) system which shall achieve an initial operational capability (IOC) by the end of 2003.

(b) ELEMENTS OF THE NMD SYSTEM.—The system to be developed for deployment shall include the following elements:

(1) INTERCEPTORS.—An interceptor system that optimizes defensive coverage of the continental United States, Alaska, and Hawaii against limited ballistic missile attack (whether accidental, unauthorized, or deliberate).

(2) GROUND-BASED RADARS.—Fixed ground-based radars.

(3) SPACE-BASED SENSORS.—Space-based sensors, including the Space and Missile Tracking System.

(4) BM/C³.—Battle management, command, control, and communications (BM/C³).

SEC. 4. IMPLEMENTATION OF NATIONAL MISSILE DEFENSE SYSTEM.

The Secretary of Defense shall—

(1) upon the enactment of this Act, promptly initiate required preparatory and planning actions that are necessary so as to be capable of meeting the initial operational capability (IOC) date specified in section 3(a);

(2) not later than the end of fiscal year 1999, conduct an integrated systems test which uses elements (including BM/C³ elements) that are representative of, and traceable to, the national missile defense system architecture specified in section 3(b);

(3) prescribe and use streamlined acquisition policies and procedures to reduce the cost and increase the efficiency of developing the system specified in section 3(a); and

(4) develop a national missile defense follow-on program that—

(A) leverages off of the national missile defense system specified in section 3(a); and

(B) could augment that system, if necessary, to provide for a layered defense.

SEC. 5. REPORT ON PLAN FOR NATIONAL MISSILE DEFENSE SYSTEM DEVELOPMENT AND DEPLOYMENT.

Not later than 120 days after the date of the enactment of this Act, the Secretary of Defense shall submit to Congress a report on the Secretary's plan for development and deployment of a national missile defense system pursuant to this Act. The report shall include the following matters:

(1) The Secretary's plan for carrying out this Act, including—

(A) a detailed description of the system architecture selected for development under section 3(b); and

(B) a discussion of the justification for the selection of that particular architecture.

(2) The Secretary's estimate of the amount of appropriations required for research, development, test, evaluation, and for procurement, for each of fiscal years 1998 through 2003 in order to achieve the initial operational capability date specified in section 3(a).

(3) A determination of the point at which any activity that is required to be carried out under this Act would conflict with the terms of the ABM Treaty, together with a description of any such activity, the legal basis for the Secretary's determination, and an estimate of the time at which such point would be reached in order to meet the initial operational capability date specified in section 3(a).

SEC. 6. POLICY REGARDING THE ABM TREATY.

(a) ABM TREATY NEGOTIATIONS.—In light of the findings in section 232 of the National

Defense Authorization Act for Fiscal Year 1996 (Public Law 102-106; 110 Stat. 228, 10 U.S.C. 2431 note) and the policy established in section 2, Congress urges the President to pursue, if necessary, high-level discussions with the Russian Federation to achieve an agreement to amend the ABM Treaty to allow deployment of the national missile defense system being developed for deployment under section 3.

(b) REQUIREMENT FOR SENATE ADVICE AND CONSENT.—If an agreement described in subsection (a) is achieved in discussions described in that subsection, the President shall present that agreement to the Senate for its advice and consent. No funds appropriated or otherwise available for any fiscal year may be obligated or expended to implement such an amendment to the ABM Treaty unless the amendment is made in the same manner as the manner by which a treaty is made.

(c) ACTION UPON FAILURE TO ACHIEVE NEGOTIATED CHANGES WITHIN ONE YEAR.—If an agreement described in subsection (a) is not achieved in discussions described in that subsection within one year after the date of the enactment of this Act, the President and Congress, in consultation with each other, shall consider exercising the option of withdrawing the United States from the ABM Treaty in accordance with the provisions of Article XV of that treaty.

SEC. 7. DEFINITIONS.

In this Act:

(1) ABM TREATY.—The term "ABM Treaty" means the Treaty Between the United States of America and the Union of Soviet Socialist Republics on the Limitation of Anti-Ballistic Missile Systems, and signed at Moscow on May 26, 1972, and includes the Protocols to that Treaty, signed at Moscow on July 3, 1974.

(2) LIMITED BALLISTIC MISSILE ATTACK.—The term "limited ballistic missile attack" refers to a limited ballistic missile attack as that term is used in the National Ballistic Defense Capstone Requirements Document, dated August 24, 1996, that was issued by the United States Space Command and validated by the Joint Requirements Oversight Council of the Department of Defense.

Mr. HELMS. Mr. President, the Defend America Act of 1997 is a vital piece of legislation—one which provides a clear and concise blueprint for protecting the American people from the growing threat of attack from ballistic missiles carrying nuclear, chemical, or biological warheads.

It is critical that the United States begin immediately the 8-year task of building and deploying a national missile defense. I am grateful to the distinguished majority leader, Mr. LOTT, for introducing this bill and I am honored to join him as a cosponsor.

Just over a year ago the Clinton administration vetoed the 1996 Defense Authorization Act. In his veto message, the President explicitly objected to the missile defense provisions of the act. At that time, along with others, I found it beyond belief that the administration could arrive at the decision to block the deployment of a national missile defense. I remember wondering, given the fact that North Korea is known to be developing a missile capable of striking United States cities, how such a decision could be made.

The chairman of the National Intelligence Council, Richard Cooper, testified before the House National Security

Committee on February 28, 1996, that ". . . North Korea is developing a missile, which we call the Taepo Dong 2, that could have a range sufficient to reach Alaska. The missile way also be capable of reaching some U.S. territories in the Pacific and the far western portion of the 2,000-km-long Hawaiian Island chain."

What Mr. Cooper did not add was the fact that nations can and have increased the ranges of their ballistic missiles by reducing payloads.

Mr. President, a September 29, 1995, article in the Washington Times reported that the Defense Intelligence Agency has estimated that the Taepo Dong 2 could, in fact, have a range of 4,650 miles and, with a smaller warhead, could reach 6,200 miles—approximately 10,000 km. Similarly, a September 11, 1995, article in a South Korean newspaper stated that Russia believes that once the Taepo Dong 2's inertial navigation system, warhead weight, and fuel injection devices are improved, the missile could reach over 9,600 kilometers. At those ranges, the Taepo Dong 2 could drop a nuclear or biological warhead on U.S. cities as far east as Denver or Minneapolis.

Mr. President, I ask unanimous consent that these two articles be printed in the RECORD.

Second, I cannot fathom why the Clinton administration objected to the deployment of a national missile defense in light of Red China's bellicose words and deeds. China fields of dozens of submarine-launched ballistic missiles, hundreds of warheads on heavy bombers, roughly 24 medium- and long-range ballistic missiles, and has several crash modernization initiatives in progress. Moreover, China intends to deploy, by the end of the century, four new types of ballistic missiles. Furthermore, the United States has very clear indications that Red China is at this moment pursuing MIRV-technology.

Mr. President, this is the same country, mind you, that flexed its military might by conducting live missile-firing exercises in the Strait of Taiwan in an obviously intentional effort to bully and cover a valued and longstanding ally of the United States. This is the same country that issued thinly-veiled threats this spring suggesting that nuclear weapons would be used against the United States if the United States intervened on behalf of Taiwan. Assistant Secretary of State Winston Lord acknowledged that Chinese officials had declared that the United States "wouldn't dare defend Taiwan because they—China—would rain nuclear bombs on Los Angeles."

Now, if this was not nuclear blackmail, it will do while the Clinton administration folds its hands until the first nuclear missile hits the West Coast of the United States. China's ability to hold the United States hostage to such threats is made possible by the fact that a band of latter-day Luddites here in Washington have con-

sistently refused even to consider building the very strategic missile defenses necessary to protect the American people from such an attack.

Mr. President, it is time for the defenders of the ABM Treaty to give up their pious devotion to an antiquated arms control theology, and to come to grips with the realities of the post-cold-war world. Dr. Henry Kissinger—the architect of the ABM Treaty—put it best when he recently wrote: "The end of the cold war has made * * * a strategy [of mutually assured destruction (MAD)] largely irrelevant. Barely plausible when there was only one strategic opponent, the theory makes no sense in a multipolar world of proliferating nuclear powers."

Dr. Kissinger went on to note specifically that MAD would not work against blackmail with nuclear weapons. Yet that is exactly what we faced when China blatantly threatened Los Angeles.

The truth of the matter is that no amount of policy reformulation by the Clinton administration can change the fact that the United States is vulnerable to nuclear-tipped missiles fielded by China, or any one else. Rectifying this dangerous deficiency requires leadership and action. It is an all the more pressing issue because the current course charted by the administration fails to recognize the inherent danger in China's pursuit of an advanced nuclear arsenal.

Mr. President, any further delay in the development of the United States of a flexible, cost-effective national missile defense is unconscionable. I am honored to be a cosponsor of the Defend America Act and urge Senators to support this legislation to ensure that the American people are protected from attack by ballistic missiles.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Times, Sept. 29, 1995]
NORTH KOREAN MISSILE COULD REACH UNITED STATES, INTELLIGENCE WARNS

(By Bill Gertz)

The Western United States could be within range of North Korea's longest-range missile armed with nuclear, chemical or biological warheads by the year 2000, according to U.S. and foreign intelligence assessments.

Sen. Jon Kyl, Arizona Republican, said new information indicates North Korea's Taepo Dong-2 missile, still under development, is an intercontinental ballistic missile (ICBM) capable of hitting U.S. cities and demonstrates the need for rapidly building a national missile defense.

A South Korean intelligence official, quoting a Russian assessment said the Taepo Dong-2 will be deployed by 2000 with a maximum range of 6,200 miles once warhead modifications and technical improvements are made, the newspaper Seoul Shinmun reported Sept. 11.

Mr. Kyl, a member of the Senate Intelligence Committee, said he investigated the report and found it "not inconsistent with some information that I have."

"The bottom line is that if the information is even close to the truth, it presents for the first time a very serious and relatively quick challenge to U.S. sovereignty," he said.

The Defense Intelligence Agency (DIA) estimates the Taepo Dong-2 will have a range of about 4,650 miles and confirmed that with a smaller warhead it could reach 6,200 miles, a Pentagon source said.

Information on the North Korean ICBM comes as a House and Senate conference committee is working on provisions of the fiscal 1996 defense authorization about whether the Pentagon should move ahead quickly with deployment of a national missile defense that could defend against such North Korean missiles.

"Given the time it takes to develop and deploy an effective national missile-defense system, overlaid on that intelligence information, it is clear we have to begin now if we are to avoid a 'missile-defense gap,'" Mr. Kyl said.

"In this case it would be real," he said, referring to the issue of the United States lagging behind the Soviet Union in strategic missiles. The missile-gap debate surfaced during the 1960 presidential election campaign and was later proved to have been unfounded.

Mr. Kyl said the intelligence report also counters claims by administration officials that national missile defenses are not needed because there is no immediate threat to the United States.

A DIA statement said the press information about the Taepo Dong-2 was "factual. . . . Clearly the successful deployment of these longer-range missiles would present a new dimension to the challenges to United States and regional interests."

One DIA computer simulation of the Taepo Dong-2 put the range of the missile at between 2,666 miles and 3,720 miles.

But according to South Korean intelligence, Russian missile experts believe the range of the Taepo Dong-2 could be extended to at least 6,000 miles after technical problems are solved, the Seoul newspaper reported.

The Russians told South Korea the greater range could be achieved if the guidance mechanism is improved, the warhead weight is decreased and fuel-injection technology is advanced.

The Pentagon's Ballistic Missile Defense Organization drew up charts showing the targets a long-range Taepo Dong-2 could hit. They include all major U.S. cities on the West Coast, in Arizona, Colorado, Kansas and just short of Chicago. It also could reach all the major European capitals.

A U.S. intelligence official said current North Korean missile technology is "Scud technology" with rudimentary guidance and control mechanisms.

"It will take a lot longer than the year 2000 to get to that point," he said of long-range missile capability. "Although there is no question they would like to achieve that."

But other intelligence officials said China is secretly helping the North Korean long-range missile project and a group of up to 200 North Korean missile engineers has undergone training in China.

As for the range of the Taepo Dong, the CIA report says only that its two versions will have ranges shorter and greater than 1,860 miles, respectively.

The accuracy of the missile is so poor that U.S. analysis see it as only useful for firing weapons of mass destruction—nuclear, chemical or biological warheads. The Pentagon says North Korea has covertly developed enough nuclear fuel for four or five nuclear devices. The CIA says it has aggressive chemical and biological warfare programs.

SOUTH KOREA

U.S. REPORTEDLY WITHIN NEW NORTH MISSILE RANGE

[Report by Pak Chae-pom]

[FBIS Translated Text] The new Taepodong missile No. 2 that North Korea is

developing is believed to have a maximum range of 10,000 km—which means that the U.S. mainland would be within its range—and will be ready for actual deployment around 2000.

According to an ROK intelligence official on 10 September, the assessment is based on a Russian-source intelligence on North Korea's ground-to-ground missiles.

The data Russia handed over to the ROK reveal that North Korea is continuing the research and development of Taepodong No. 1 and No. 2 at a missile test site in Sanumtong and that it recently conducted a missile engine test.

A computer simulated test by the U.S. Defense Intelligence Agency estimated that the Taepodong No. 2 has a 4,300 to 6,000-km range, but the Russian authorities projected that when some technical problems are solved, the range could be expanded to over 9,600 km.

The Russian source analyzed that the safety of the inertial navigation system, adjustment of the warhead weight, and fuel injection device are the technologies North Korea needs to improve.

North Korea's Taepodong No. 2 is reportedly a two-stage missile with a 16-meter Taepodong No. 1 attached on a 16.2-meter thruster and a 1,000-kg warhead on the thruster.

An intelligence official said: "Irrespective of the recent economic setback, North Korea is speeding up the development of Taepodong No. 2 and other long-range weapons to block the support from the neighboring countries in case of an emergency on the Korean peninsula."

S. 8. A bill to reauthorize and amend the Comprehensive Environmental Response, Liability, and Compensation Act of 1980, and for other purposes; to the Committee on Environment and Public Works.

SUPERFUND CLEANUP ACCELERATION ACT OF 1997

Mr. CHAFEE. Mr. President, Senator SMITH from New Hampshire and I have been working on this not only this year, but in past years also. I think after 7 years, it is time to fix this program. Tens of billions of dollars have been spent with very modest results, as far as cleanups go. This bill, which Senator SMITH and I have submitted, addresses the so-called brownfields problem, for example.

What are brownfields? They are contaminated sites, usually within our cities, which can be cleaned up relatively quickly and inexpensively and can be returned to productive industrial commercial use, thereby generating jobs and revenue.

In this legislation, we deal with who will have to pay. Obviously, this is where the intense legal arguments have occurred, where you need to hire a hall because there are so many lawyers involved.

We eliminate the unfairness of joint and several liability at most sites, and we replace it with proportional allocations where each polluter pays its fair share.

We eliminate from liability anyone who legally sent waste to a municipal landfill.

We eliminate small businesses and persons whose share was less than 1

percent and persons who sent less than 200 pounds or 110 gallons.

In deciding how clean the cleanup ought to be, we take into consideration, what is the future use of the site going to be? Is it going to be for a children's playground, or is it going to be for a parking lot that is paved? Obviously, it makes a difference as to how clean the site should be cleaned up.

Mr. President, this bill is not written in concrete. Senator ABRAHAM, for example, is deeply concerned that we do not include here within our legislation tax incentives for brownfields cleanup in empowerment zones and in enterprise communities. Senator ABRAHAM, who is deeply concerned about our inner cities and the jobs that will flow from it if these sites within the inner cities are cleaned up, believes there should be some tax incentives provided. We have not done that because of a cost problem, but we have assured Senator ABRAHAM we will work with him to try to come up with the result that he seeks. I want to commend Senator ABRAHAM for the work that he has done on this and the intense concern he has shown throughout the process of formulating this legislation.

Mr. President, now I would like to turn it over to Senator SMITH who has labored so hard in this vineyard, not only this year but last year. I do not think anybody in this Senate knows more about this legislation or has worked harder on it than Senator SMITH from New Hampshire.

Mr. BOB SMITH addressed the Chair.

The PRESIDING OFFICER. The Senator from New Hampshire is recognized.

Mr. BOB SMITH. Thank you, Mr. President. I thank my distinguished colleague and chairman of the Environment and Public Works Committee for his kind remarks. He, too, has been deeply involved in this issue. We have spent a lot of hours on this.

I am just very excited about the fact that this is in the top 10 legislative initiatives that the majority leader and the Republican Party have, and I welcome the opportunity to make a few remarks here.

It is a tribute to Senator LOTT and to Senator CHAFEE that they have made this a priority. It is the right thing to do, Mr. President, because I share with the American people the belief that our children ought to be able to drink clean water and breathe clean air and live in safe homes so they do not have to worry about environmental pollution, most specifically not having to live next to the stigma of a so-called Superfund site that never gets cleaned up.

We have some very good environmental laws on the books in this country—the Clean Air Act, the Safe Drinking Water Act, and others—but there are a few that do not fit that category, that have failed. Superfund is one of those laws. It is up to this committee and to the Senate, I think, to take the leadership here and to try to make those corrections.

To achieve meaningful reform—and I mean reform—we have to cut transaction costs. That is goal No. 1. The second goal is to reduce the time necessary to complete cleanup at these sites. The third goal is to inject some common sense into our cleanup program to reach sensible levels that protect our children and our environment.

The bill we introduce today will accomplish each and every one of those goals. It improves the serious problem of brownfields, which our colleague, Senator CHAFEE, has already mentioned. Senator ABRAHAM of Michigan is very much involved in this issue. We commend his leadership and look forward to working with him on the brownfields portion of this bill.

But we provide \$60 million in new funding each year for States and localities for grants and loan programs to spur the cleanup and the redevelopment of these sites.

I welcome the initiative on the part of our colleagues on the other side of our aisle on brownfields. It enhances the role of States by allowing them to take responsibility for conducting Superfund cleanups and increases citizen participation. It reinjects common sense back into the cleanup process by taking the future use of the site into consideration when cleanup remedies are elected.

It promotes the use of innovative technology to ensure that the citizenry can have the benefit of the most up-to-date scientific approaches to cleanup and eliminates potential liability for tens of thousands of average citizens, small businesses, schools, churches, the Boy Scouts, Girl Scouts, and others who have been caught up in this Superfund liability net. It caps the liability of municipalities and other entities that owned or operated municipal sites and did so legally.

Finally, it reduces litigation by creating a fair-share allocation process at multiparty sites where the trust fund will pick up the cost of the defunct or insolvent parties in wastes that cannot be attributed to a viable party.

Thus, Mr. President, what this bill does, in a nutshell, is it stops paying lawyers and starts paying for cleanup. I think that is a tremendous improvement over current law. So the discussions over the past 2 years, which Senator CHAFEE has mentioned, which I have been involved in with the administration, Administrator Browner, and my colleagues on the other side of the aisle, have been productive. We have learned a lot. We are ready to roll up our sleeves again and get it done. We were very close to an agreement last time. We look forward to working with our colleagues and with the President of the United States to get it done in a bipartisan way.

As the Chairman of the Senate Subcommittee on Superfund, Waste Control and Risk Assessment, I am here today, along with Senator CHAFEE, the Chairman of the Environment Committee, to introduce some commonsense

legislation to put the Superfund law back on track toward achieving its original goal of protecting our Nation's children from environmental pollutants in the quickest practical manner possible.

I would like to thank the Republican Leader, Senator LOTT and all of the members of the Republican Conference who have co-sponsored our legislation—The Superfund Cleanup Acceleration Act—for recognizing the importance of improving the Superfund program. By making this one of the "top 10" Senate priorities for the 105th Congress, I believe we have demonstrated our strong commitment toward protecting our environment, improving environmental laws, and preserving the health of our Nation's children.

Before I describe our legislation, I would like to take a few minutes to talk about Superfund and how we find ourselves here today.

The history of Superfund is long and somewhat checkered. The program was created in 1980 to clean up abandoned hazardous waste sites, and at that time, it was anticipated that this program would clean up around 400 sites nationwide. Begun with the best of intentions, the program has not performed the way it should. So far Superfund has cost our Nation more than \$40 billion dollars, yet, only 125 out of a total of around 1,300 sites have been removed from the Superfund list over the last 16 years. Superfund has become the classic example of a Federal program awash in redtape, litigation and gold plated spending.

The problems in Superfund are many. First, the Superfund liability scheme allows the Environmental Protection Agency to hold any potentially responsible party liable for the entire cleanup cost at a site—irrespective of the type of contamination, when the material was disposed of, or whether the activity was legal. This is simply unfair and, not surprisingly, results in enormous litigation costs with 30 to 70 percent of every dollar spent on lawyers.

Because of the fear of Superfund liability, many of our Nation's inner cities contain abandoned or underutilized properties—dubbed Brownfields—which lay fallow because private developers and municipalities don't want to be dragged into Superfund's litigation quagmire. In order to spur economic redevelopment, we must place a priority on fixing this problem.

Superfund sets out unrealistic cleanup goals which frequently ignore common sense in considering the future use of the site. All too often, sites that are destined to become industrial parks or parking lots are required to be cleaned to standards compatible with school playgrounds. We need to reinject common sense back into this program so that we protect real people from real risks, not hypothetical people from hypothetical risks. We must also recognize that the States, which are much better able to understand the concerns and needs of residents who live near

these sites, should have the lead in determining how these sites are going to be cleaned up, and when.

Because I am also the Chairman of the Armed Services Subcommittee on Strategic Forces, which funds the Department of Energy cleanup program, I am keenly aware that the real costs of Superfund are not limited solely to the private sector. Not only are there more than 155 Federal facilities on the Superfund list, but these sites represent the most complex and costly cleanup challenges in the program. The inability to create commonsense cleanup plans results in billions of dollars of additional liability to Federal agencies—costs that ultimately come from the taxes we all pay. In a period of budget deficits and declining resources, we need to do a better job of making cleanup decisions.

While Superfund was created with the hope of quickly dealing with the serious problem of toxic waste sites endangering our citizens, it is evident that Superfund has proceeded at a snail's pace and that most sites are still not cleaned up. I commend Carol Browner, the Administrator of the EPA, for recognizing this fact, and for instituting a series of administrative reforms in the last year—reforms that reflect changes that I, and other Republicans have advocated for many years.

Although I applaud the administration for making these changes, I believe it is too soon to declare victory in the effort to make Superfund work better. While improvements have been made in some areas, it is far too early to determine their true or lasting effect. I certainly do not agree with some in the Administration that feel that the administrative reforms have corrected all the problems of Superfund. The fact remains that even with the administrative reforms, too much money is spent on litigation, sites aren't being cleaned up fast enough, and children are being needlessly exposed to toxic contaminants.

Rather than reform Superfund on a piecemeal basis, as some may suggest, it is clear that comprehensive legislation is necessary to correct Superfund's deeper problems. The bill we have introduced will address those problems in a top-to-bottom fashion so that we can clean up all of these waste sites as quickly as possible.

To achieve meaningful Superfund reform, it is necessary to meet three goals. The first is to cut the transaction costs of the program. That means cutting out the lawyers and ensuring that every dollar meant for cleanup goes to cleanup. The second goal is to reduce the time necessary to complete cleanup at these sites. Currently, it takes more than 12 years to clean up a site. We can do better than that. The last goal is to inject common sense into our cleanup program to reach sensible levels that protect our children and protect the environment.

The bill we are introducing today will accomplish each of these goals.

Our legislation improves the serious problem of brownfields by providing \$60 million in new funding each year to States and localities for grant and loan programs to spur the cleanup and redevelopment of these sites;

It enhances the roll of States by allowing them to take primary responsibility for conducting Superfund cleanups.

It increases citizen participation by setting up Citizen Response Organizations to improve coordination between citizens, government and responsible parties.

It reinjects common sense back into the cleanup process by taking the future use of the site into consideration when cleanup remedies are selected.

It promotes the use of innovative technologies to insure that the citizenry can have the benefit of the most-up-to-date scientific approaches to cleanup.

It eliminates potential liability from tens of thousands of average citizens, small businesses, schools, churches, and others who are currently caught in the Superfund liability net.

It caps the liability of municipalities and other entities that owned or operated municipal waste sites.

And finally, it reduces litigation by creating a fair-share allocation process at multi-party sites where the Trust fund will pick up the cost of defunct or insolvent parties, or wastes that cannot be attributed to a viable party.

Among the significant issues we have focused on is the issue of brownfields. As many of my colleagues may know, there are a variety of bills that have been introduced by Senator ABRAHAM, Senator LIEBERMAN, Senator LAUTENBERG and others which attempt to take a crack at this issue.

Many of the brownfield bills that have been introduced rely on tax credits or tax deductions to promote the cleanup of these sites. While the issue of tax credits does not fall within the jurisdiction of the Environment Committee, as this bill progresses toward passage, it is my intention to work with my colleagues to find common ground and provide additional support for these areas.

Liability has always been one of the most contentious issues in the Superfund reform debate. My position has been clear from the beginning. I believe that retroactive liability is fundamentally unfair and if I had my way, I would repeal it. Some of my colleagues see things differently. It is important to understand that the bill we are introducing represents many hours of intense discussions and all the parties involved will recognize some of their positions. The bill does not go as far as I would like. Equally, it asks that the other side to take a step forward as well. We each must take this step to improve a system which is not helping our citizens the way it should.

Over the last 2 years, my staff and that of Senator CHAFEE have been engaged in bi-partisan discussions with

Democrats and the Clinton administration. These discussions were long and sometimes pointed, but the participants in these negotiations understood that the Superfund program has flaws which need to be corrected.

While there is general agreement that cleanups should occur faster, and that there are too many lawyers in the system, there are many ideas about how to correct these problems. The discussions over the past 2 years have been productive and on many issues we are close to agreement. We look forward to working with our colleagues and the with the President to craft a bipartisan solution to the problems of Superfund.

The bill we introduce today incorporates many good ideas from our bipartisan negotiations. It represents a significant step away from where we started last Congress, and I believe it deserves, and will receive, bipartisan support.

Much has been said about the Republican and Democratic positions on the environment. I urge my colleagues to move beyond the rhetoric and the posturing of the last election and examine the real situation. The bill we are introducing today will speed cleanups, take lawyers out of the system, inject common sense back into the process, and protect children much faster from toxic exposure than under current law. This should not merely be a top-10 priority on the Republican agenda, but it should be a top ten item on our shared agenda. I urge all of my colleagues to join with us to reform this program this year.

I thank you, Mr. President. I thank my colleague.

Mr. CHAFEE addressed the Chair.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. CHAFEE. Mr. President, I want to stress the comments that Senator SMITH made about a bipartisan approach.

As I mentioned before, this is legislation that we worked on. We believe it is very, very good legislation. We are not saying it is the end all and be all. Obviously, in our committee we will have hearings on it. All the members of the committee will have a chance to have their views expressed.

We look forward to contributions from the members of the Democratic Party who are part of our Environment Committee. It is our hope that when we come forward with a bill to present on this floor finally for consideration by the body, that it will come out unanimously from our committee, will have the support of the administration, and will fulfill the desires of all of us that this legislation become law.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

TITLE IV—SELECTION OF REMEDIAL ACTIONS

SEC. 401. DEFINITIONS.

Section 101 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9601) (as amended by section 105(a)) is amended by adding at the end the following:

“(41) ACTUAL OR PLANNED OR REASONABLY ANTICIPATED FUTURE USE OF THE LAND AND WATER RESOURCES.—The term ‘actual or planned or reasonably anticipated future use of the land and water resources’ means—

“(A) the actual use of the land, surface water, and ground water at a facility on the date of submittal of the proposed remedial action plan; and

“(B)(i) with respect to land—

“(I) the use of land that is authorized by the zoning or land use decisions formally adopted, at or prior to the time of the initiation of the facility evaluation, by the local land use planning authority for a facility and the land immediately adjacent to the facility; and

“(II) any other reasonably anticipated use that the local land use authority, in consultation with the community response organization (if any), determines to have a substantial probability of occurring based on recent (as of the time of the determination) development patterns in the area in which the facility is located and on population projections for the area; and

“(ii) with respect to water resources, the future use of the surface water and ground water that is potentially affected by releases from a facility that is reasonably anticipated, by the governmental unit that regulates surface or ground water use or surface or ground water use planning in the vicinity of the facility, on the date of submission of the proposed remedial action plan.

“(42) SUSTAINABILITY.—The term ‘sustainability’, for the purpose of section

121(a)(1)(B)(ii), means the ability of an ecosystem to continue to function within the normal range of its variability absent the effects of a release of a hazardous substance.”.

SEC. 402. SELECTION AND IMPLEMENTATION OF REMEDIAL ACTIONS.

Section 121 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9621) is amended—

(1) by striking the section heading and subsections (a) and (b) and inserting the following:

“SEC. 121. SELECTION AND IMPLEMENTATION OF REMEDIAL ACTIONS.

“(a) GENERAL RULES.—

“(1) SELECTION OF COST-EFFECTIVE REMEDIAL ACTION THAT PROTECTS HUMAN HEALTH AND THE ENVIRONMENT.—

“(A) IN GENERAL.—The Administrator shall select a cost-effective remedial action that achieves the goals of protecting human health and the environment as stated in subparagraph (B), and complies with other applicable Federal and State laws in accordance with subparagraph (C) on the basis of a facility-specific risk evaluation in accordance with section 131 and in accordance with the criteria stated in subparagraph (D) and the requirements of paragraph (2).

“(B) GOALS OF PROTECTING HUMAN HEALTH AND THE ENVIRONMENT.—

“(i) PROTECTION OF HUMAN HEALTH.—A remedial action shall be considered to protect human health if, considering the expected exposures associated with the actual or planned or reasonably anticipated future use of the land and water resources and on the basis of a facility-specific risk evaluation in accordance with section 131, the remedial action achieves a residual risk—

“(I) from exposure to nonthreshold carcinogenic hazardous substances, pollutants, or contaminants such that cumulative lifetime additional cancer from exposure to hazardous substances from releases at the facility range from 10^{-4} to 10^{-6} for the affected population; and

“(II) from exposure to threshold carcinogenic and noncarcinogenic hazardous substances, pollutants, or contaminants at the facility, that does not exceed a hazard index of 1.

“(ii) PROTECTION OF THE ENVIRONMENT.—A remedial action shall be considered to be protective of the environment if the remedial action—

“(I) protects ecosystems from significant threats to their sustainability arising from exposure to releases of hazardous substances at a site; and

“(II) does not cause a greater threat to the sustainability of ecosystems than a release of a hazardous substance.

“(iii) PROTECTION OF GROUND WATER.—A remedial action shall prevent or eliminate any actual human ingestion of drinking water containing any hazardous substance from the release at levels—

“(I) in excess of the maximum contaminant level established under the Safe Drinking Water Act (42 U.S.C. 300f et seq.); or

“(II) if no such maximum contaminant level has been established for the hazardous substance, at levels that meet the goals for protection of human health under clause (i).

“(C) COMPLIANCE WITH FEDERAL AND STATE LAWS.—

“(i) SUBSTANTIVE REQUIREMENTS.—

“(I) IN GENERAL.—Subject to clause (iii) and subparagraphs (A) and (D) and paragraph (2), a remedial action shall—

“(aa) comply with the substantive requirements of all promulgated standards, requirements, criteria, and limitations under each Federal law and each State law relating to the environment or to the siting of facilities (including a State law that imposes a more

stringent standard, requirement, criterion, or limitation than Federal law) that is applicable to the conduct or operation of the remedial action or to determination of the level of cleanup for remedial actions; and

“(bb) comply with or attain any other promulgated standard, requirement, criterion, or limitation under any State law relating to the environment or siting of facilities, as determined by the State, after the date of enactment of the Superfund Cleanup Acceleration Act of 1997, through a rulemaking procedure that includes public notice, comment, and written response comment, and opportunity for judicial review, but only if the State demonstrates that the standard, requirement, criterion, or limitation is of general applicability and is consistently applied to remedial actions under State law.

“(II) IDENTIFICATION OF FACILITIES.—Compliance with a State standard, requirement, criterion, or limitation described in subclause (I) shall be required at a facility only if the standard, requirement, criterion, or limitation has been identified by the State to the Administrator in a timely manner as being applicable to the facility.

“(III) PUBLISHED LISTS.—Each State shall publish a comprehensive list of the standards, requirements, criteria, and limitations that the State may apply to remedial actions under this Act, and shall revise the list periodically, as requested by the Administrator.

“(IV) CONTAMINATED MEDIA.—Compliance with this clause shall not be required with respect to return, replacement, or disposal of contaminated media or residuals of contaminated media into the same media in or very near then-existing areas of contamination onsite at a facility.

“(ii) PROCEDURAL REQUIREMENTS.—Procedural requirements of Federal and State standards, requirements, criteria, and limitations (including permitting requirements) shall not apply to response actions conducted onsite at a facility.

“(iii) WAIVER PROVISIONS.—

“(I) DETERMINATION BY THE PRESIDENT.—The Administrator shall evaluate and determine if it is not appropriate for a remedial action to attain a Federal or State standard, requirement, criterion, or limitation as required by clause (i).

“(II) SELECTION OF REMEDIAL ACTION THAT DOES NOT COMPLY.—The Administrator may select a remedial action at a facility that meets the requirements of subparagraph (B) but does not comply with or attain a Federal or State standard, requirement, criterion, or limitation described in clause (i) if the Administrator makes any of the following findings:

“(aa) IMPROPER IDENTIFICATION.—The standard, requirement, criterion, or limitation, which was improperly identified as an applicable requirement under clause (i)(I)(aa), fails to comply with the rulemaking requirements of clause (i)(I)(bb).

“(bb) PART OF REMEDIAL ACTION.—The selected remedial action is only part of a total remedial action that will comply with or attain the applicable requirements of clause (i) when the total remedial action is completed.

“(cc) GREATER RISK.—Compliance with or attainment of the standard, requirement, criterion, or limitation at the facility will result in greater risk to human health or the environment than alternative options.

“(dd) TECHNICALLY IMPRACTICABILITY.—Compliance with or attainment of the standard, requirement, criterion, or limitation is technically impracticable.

“(ee) EQUIVALENT TO STANDARD OF PERFORMANCE.—The selected remedial action will attain a standard of performance that is equivalent to that required under a standard,

requirement, criterion, or limitation described in clause (i) through use of another approach.

“(ff) INCONSISTENT APPLICATION.—With respect to a State standard, requirement, criterion, limitation, or level, the State has not consistently applied (or demonstrated the intention to apply consistently) the standard, requirement, criterion, or limitation or level in similar circumstances to other remedial actions in the State.

“(gg) BALANCE.—In the case of a remedial action to be undertaken under section 104 or 136 using amounts from the Fund, a selection of a remedial action that complies with or attains a standard, requirement, criterion, or limitation described in clause (i) will not provide a balance between the need for protection of public health and welfare and the environment at the facility, and the need to make amounts from the Fund available to respond to other facilities that may present a threat to public health or welfare or the environment, taking into consideration the relative immediacy of the threats presented by the various facilities.

“(III) PUBLICATION.—The Administrator shall publish any findings made under subclause (II), including an explanation and appropriate documentation.

“(D) REMEDY SELECTION CRITERIA.—In selecting a remedial action from among alternatives that achieve the goals stated in subparagraph (B) pursuant to a facility-specific risk evaluation in accordance with section 131, the Administrator shall balance the following factors, ensuring that no single factor predominates over the others:

“(i) The effectiveness of the remedy in protecting human health and the environment.

“(ii) The reliability of the remedial action in achieving the protectiveness standards over the long term.

“(iii) Any short-term risk to the affected community, those engaged in the remedial action effort, and to the environment posed by the implementation of the remedial action.

“(iv) The acceptability of the remedial action to the affected community.

“(v) The implementability and technical feasibility of the remedial action from an engineering perspective.

“(vi) The reasonableness of the cost.

“(2) TECHNICAL IMPRACTICABILITY.—

“(A) MINIMIZATION OF RISK.—If the Administrator, after reviewing the remedy selection criteria stated in paragraph (1)(D), finds that achieving the goals stated in paragraph (1)(B) is technically impracticable, the Administrator shall evaluate remedial measures that mitigate the risks to human health and the environment and select a technically practicable remedial action that will most closely achieve the goals stated in paragraph (1) through cost-effective means.

“(B) BASIS FOR FINDING.—A finding of technical impracticability may be made on the basis of a determination, supported by appropriate documentation, that, at the time at which the finding is made—

“(i) there is no known reliable means of achieving at a reasonable cost the goals stated in paragraph (1)(B); and

“(ii) it has not been shown that such a means is likely to be developed within a reasonable period of time.

“(3) PRESUMPTIVE REMEDIAL ACTIONS.—A remedial action that implements a presumptive remedial action issued under section 132 shall be considered to achieve the goals stated in paragraph (1)(B) and balance adequately the factors stated in paragraph (1)(D).

“(4) GROUND WATER.—

“(A) IN GENERAL.—The Administrator or the preparer of the remedial action plan shall select a cost effective remedial action

for ground water that achieves the goals of protecting human health and the environment as stated in paragraph (1)(B) and with the requirements of this paragraph, and complies with other applicable Federal and State laws in accordance with subparagraph (C) on the basis of a facility-specific risk evaluation in accordance with section 131 and in accordance with the criteria stated in subparagraph (D) and the requirements of paragraph (2). If appropriate, a remedial action for ground water shall be phased, allowing collection of sufficient data to evaluate the effect of any other remedial action taken at the site and to determine the appropriate scope of the remedial action.

“(B) CONSIDERATIONS FOR GROUND WATER REMEDIAL ACTION.—A decision regarding a remedial action for ground water shall take into consideration—

“(i) the actual or planned or reasonably anticipated future use of ground water and the timing of that use; and

“(ii) any attenuation or biodegradation that would occur if no remedial action were taken.

“(C) UNCONTAMINATED GROUND WATER.—A remedial action shall protect uncontaminated ground water that is suitable for use as drinking water by humans or livestock if the water is uncontaminated and suitable for such use at the time of submission of the proposed remedial action plan. A remedial action to protect uncontaminated ground water may utilize natural attenuation (which may include dilution or dispersion, but in conjunction with biodegradation or other levels of attenuation necessary to facilitate the remediation of contaminated ground water) so long as the remedial action does not interfere with the actual or planned or reasonably anticipated future use of the uncontaminated ground water.

“(D) CONTAMINATED GROUND WATER.—

“(i) IN GENERAL.—In the case of contaminated ground water for which the actual or planned or reasonably anticipated future use of the resource is as drinking water for humans or livestock, if the Administrator determines that restoration of some portion of the contaminated ground water to a condition suitable for the use is technically practicable, the Administrator shall seek to restore the ground water to a condition suitable for the use.

“(ii) DETERMINATION OF RESTORATION PRACTICABILITY.—In making a determination regarding the technical practicability of ground water restoration—

“(I) there shall be no presumption of the technical practicability; and

“(II) the determination of technical practicability shall, to the extent practicable, be made on the basis of projections, modeling, or other analysis on a site-specific basis without a requirement for the construction or installation and operation of a remedial action.

“(iii) DETERMINATION OF NEED FOR AND METHODS OF RESTORATION.—In making a determination and selecting a remedial action regarding restoration of contaminated ground water the Administrator shall take into account—

“(I) the ability to substantially accelerate the availability of ground water for use as drinking water beyond the rate achievable by natural attenuation; and

“(II) the nature and timing of the actual or planned or reasonably anticipated use of such ground water.

“(iv) RESTORATION TECHNICALLY IMPRACTICABLE.—

“(I) IN GENERAL.—A remedial action for contaminated ground water having an actual or planned or reasonably anticipated future use as a drinking water source for humans or livestock for which attainment of the levels

described in paragraph (1)(B)(iii) is technically impracticable shall be selected in accordance with paragraph (1)(D)(2).

“(II) NO INGESTION.—Selected remedies may rely on point-of-use treatment or other measures to ensure that there will be no ingestion of drinking water at levels exceeding the requirement of paragraph (1)(B)(iii) (I) or (II).

“(III) INCLUSION AS PART OF OPERATION AND MAINTENANCE.—The operation and maintenance of any treatment device installed at the point of use shall be included as part of the operation and maintenance of the remedy.

“(E) GROUND WATER NOT SUITABLE FOR USE AS DRINKING WATER.—Notwithstanding any other evaluation or determination of the potential suitability of ground water for drinking water use, ground water that is not suitable for use as drinking water by humans or livestock because of naturally occurring conditions, or is so contaminated by the effects of broad-scale human activity unrelated to a specific facility or release that restoration of drinking water quality is technically impracticable or is physically incapable of yielding a quantity of 150 gallons per day of water to a well or spring, shall be considered to be not suitable for use as drinking water.

“(F) OTHER GROUND WATER.—Remedial action for contaminated ground water (other than ground water having an actual or planned or reasonably anticipated future use as a drinking water source for humans or livestock) shall attain levels appropriate for the then-current or reasonably anticipated future use of the ground water, or levels appropriate considering the then-current use of any ground water or surface water to which the contaminated ground water discharges.

“(5) OTHER CONSIDERATIONS APPLICABLE TO REMEDIAL ACTIONS.—A remedial action that uses institutional and engineering controls shall be considered to be on an equal basis with all other remedial action alternatives.”;

(2) by redesignating subsection (c) as subsection (b);

(3) by striking subsection (d); and

(4) by redesignating subsections (e) and (f) as subsections (c) and (d), respectively.

SEC. 403. REMEDY SELECTION METHODOLOGY.

Title I of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9601 et seq.) (as amended by section 201(a)) is amended by adding at the end the following:

“SEC. 131. FACILITY-SPECIFIC RISK EVALUATIONS.

“(a) USES.—

“(1) IN GENERAL.—A facility-specific risk evaluation shall be used to—

“(A) identify the significant components of potential risk posed by a facility;

“(B) screen out potential contaminants, areas, or exposure pathways from further study at a facility;

“(C) compare the relative protectiveness of alternative potential remedies proposed for a facility; and

“(D) demonstrate that the remedial action selected for a facility is capable of protecting human health and the environment considering the actual or planned or reasonably anticipated future use of the land and water resources.

“(2) COMPLIANCE WITH PRINCIPLES.—A facility-specific risk evaluation shall comply with the principles stated in this section to ensure that—

“(A) actual or planned or reasonably anticipated future use of the land and water resources is given appropriate consideration; and

“(B) all of the components of the evaluation are, to the maximum extent practicable,

scientifically objective and inclusive of all relevant data.

“(b) RISK EVALUATION PRINCIPLES.—A facility-specific risk evaluation shall—

“(1) be based on actual information or scientific estimates of exposure considering the actual or planned or reasonably anticipated future use of the land and water resources to the extent that substituting such estimates for those made using standard assumptions alters the basis for decisions to be made;

“(2) be comprised of components each of which is, to the maximum extent practicable, scientifically objective, and inclusive of all relevant data;

“(3) use chemical and facility-specific data and analysis (such as bioavailability, exposure, and fate and transport evaluations) in preference to default assumptions when—

“(A) such data and analysis are likely to vary by facility; and

“(B) facility-specific risks are to be communicated to the public or the use of such data and analysis alters the basis for decisions to be made; and

“(4) use a range and distribution of realistic and scientifically supportable assumptions when chemical and facility-specific data are not available, if the use of such assumptions would communicate more accurately the consequences of the various decision options.

“(c) RISK COMMUNICATION PRINCIPLES.—The document reporting the results of a facility-specific risk evaluation shall—

“(1) contain an explanation that clearly communicates the risks at the facility;

“(2) identify and explain all assumptions used in the evaluation, any alternative assumptions that, if made, could materially affect the outcome of the evaluation, the policy or value judgments used in choosing the assumptions, and whether empirical data conflict with or validate the assumptions;

“(3) present—

“(A) a range and distribution of exposure and risk estimates, including, if numerical estimates are provided, central estimates of exposure and risk using—

“(i) the most scientifically supportable assumptions or a weighted combination of multiple assumptions based on different scenarios; or

“(ii) any other methodology designed to characterize the most scientifically supportable estimate of risk given the information that is available at the time of the facility-specific risk evaluation; and

“(B) a statement of the nature and magnitude of the scientific and other uncertainties associated with those estimates;

“(4) state the size of the population potentially at risk from releases from the facility and the likelihood that potential exposures will occur based on the actual or planned or reasonably anticipated future use of the land and water resources; and

“(5) compare the risks from the facility to other risks commonly experienced by members of the local community in their daily lives and similar risks regulated by the Federal Government.

“(d) REGULATIONS.—Not later than 18 months after the date of enactment of this section, the Administrator shall issue a final regulation implementing this section that promotes a realistic characterization of risk that neither minimizes nor exaggerates the risks and potential risks posed by a facility or a proposed remedial action.

“SEC. 132. PRESUMPTIVE REMEDIAL ACTIONS.

“(a) IN GENERAL.—Not later than 1 year after the date of enactment of this section, the Administrator shall issue a final regulation establishing presumptive remedial actions for commonly encountered types of facilities with reasonably well understood contamination problems and exposure potential.

“(b) PRACTICABILITY AND COST-EFFECTIVENESS.—Such presumptive remedies must have been demonstrated to be technically practicable and cost-effective methods of achieving the goals of protecting human health and the environment stated in section 121(a)(1)(B).

“(c) VARIATIONS.—The Administrator may issue various presumptive remedial actions based on various uses of land and water resources, various environmental media, and various types of hazardous substances, pollutants, or contaminants.

“(d) ENGINEERING CONTROLS.—Presumptive remedial actions are not limited to treatment remedies, but may be based on, or include, institutional and standard engineering controls.”.

SEC. 404. REMEDY SELECTION PROCEDURES.

Title I of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9601 et seq.) (as amended by section 403) is amended by adding at the end the following:

“SEC. 133. REMEDIAL ACTION PLANNING AND IMPLEMENTATION.

“(a) IN GENERAL.—

“(1) BASIC RULES.—

“(A) PROCEDURES.—A remedial action with respect to a facility that is listed or proposed for listing on the National Priorities List shall be developed and selected in accordance with the procedures set forth in this section.

“(B) NO OTHER PROCEDURES OR REQUIREMENTS.—The procedures stated in this section are in lieu of any procedures or requirements under any other law to conduct remedial investigations, feasibility studies, record of decisions, remedial designs, or remedial actions.

“(C) LIMITED REVIEW.—In a case in which the potentially responsible parties prepare a remedial action plan, only the work plan, facility evaluation, proposed remedial action plan, and final remedial design shall be subject to review, comment, and approval by the Administrator.

“(D) DESIGNATION OF POTENTIALLY RESPONSIBLE PARTIES TO PREPARE WORK PLAN, FACILITY EVALUATION, PROPOSED REMEDIAL ACTION, AND REMEDIAL DESIGN AND TO IMPLEMENT THE REMEDIAL ACTION PLAN.—In the case of a facility for which the Administrator is not required to prepare a work plan, facility evaluation, proposed remedial action, and remedial design and implement the remedial action plan—

“(i) if a potentially responsible party or group of potentially responsible parties—

“(I) expresses an intention to prepare a work plan, facility evaluation, proposed remedial action plan, and remedial design and to implement the remedial action plan (not including any such expression of intention that the Administrator finds is not made in good faith); and

“(II) demonstrates that the potentially responsible party or group of potentially responsible parties has the financial resources and the expertise to perform those functions, the Administrator shall designate the potentially responsible party or group of potentially responsible parties to perform those functions; and

“(ii) if more than 1 potentially responsible party or group of potentially responsible parties—

“(I) expresses an intention to prepare a work plan, facility evaluation, proposed remedial action plan, and remedial design and to implement the remedial action plan (not including any such expression of intention that the Administrator finds is not made in good faith); and

“(II) demonstrates that the potentially responsible parties or group of potentially responsible parties has the financial resources and the expertise to perform those functions,

the Administrator, based on an assessment of the various parties' comparative financial resources, technical expertise, and histories of cooperation with respect to facilities that are listed on the National Priorities List, shall designate 1 potentially responsible party or group of potentially responsible parties to perform those functions.

“(E) APPROVAL REQUIRED AT EACH STEP OF PROCEDURE.—No action shall be taken with respect to a facility evaluation, proposed remedial action plan, remedial action plan, or remedial design, respectively, until a work plan, facility evaluation, proposed remedial action plan, and remedial action plan, respectively, have been approved by the Administrator.

“(F) NATIONAL CONTINGENCY PLAN.—The Administrator shall conform the National Contingency Plan regulations to reflect the procedures stated in this section.

“(2) USE OF PRESUMPTIVE REMEDIAL ACTIONS.—

“(A) PROPOSAL TO USE.—In a case in which a presumptive remedial action applies, the Administrator (if the Administrator is conducting the remedial action) or the preparer of the remedial action plan may, after conducting a facility evaluation, propose a presumptive remedial action for the facility, if the Administrator or preparer shows with appropriate documentation that the facility fits the generic classification for which a presumptive remedial action has been issued and performs an engineering evaluation to demonstrate that the presumptive remedial action can be applied at the facility.

“(B) LIMITATION.—The Administrator may not require a potentially responsible party to implement a presumptive remedial action.

“(b) REMEDIAL ACTION PLANNING PROCESS.—

“(1) IN GENERAL.—The Administrator or a potentially responsible party shall prepare and implement a remedial action plan for a facility.

“(B) a discussion of the potentially viable remedies that are considered to be reasonable under section 121(a), the respective capital costs, operation and maintenance costs, and estimated present worth costs of the remedies, and how the remedies balance the factors stated in section 121(a)(1)(D);

“(C) a description of the remedial action to be taken;

“(D) a description of the facility-specific risk-based evaluation under section 131 and a demonstration that the selected remedial action will satisfy sections 121(a) and 132; and

of the work plan, the Administrator, the State, or the local community response organization.

“(D) FORWARDING OF COMMENTS.—If comments are submitted to the Administrator, the State, or the community response organization, the Administrator, State, or community response organization shall forward the comments to the preparer of the work plan.

“(E) NOTICE OF DISAPPROVAL.—If the Administrator does not approve a work plan, the Administrator shall—

“(i) identify to the preparer of the work plan, with specificity, any deficiencies in the submission; and

“(ii) require that the preparer submit a revised work plan within a reasonable period of time, which shall not exceed 90 days except in unusual circumstances, as determined by the Administrator.

“(4) FACILITY EVALUATION.—

“(A) IN GENERAL.—The Administrator (or the preparer of the facility evaluation) shall conduct a facility evaluation at each facility to characterize the risk posed by the facility by gathering enough information necessary to—

“(i) assess potential remedial alternatives, including ascertaining, to the degree appropriate, the volume and nature of the contaminants, their location, potential exposure pathways and receptors;

“(ii) discern the actual or planned or reasonably anticipated future use of the land and water resources; and

“(iii) screen out any uncontaminated areas, contaminants, and potential pathways from further consideration.

trator for approval and provide a copy to the local library.

“(B) PUBLICATION.—After receipt of the proposed remedial action plan, or in a case in which the Administrator is preparing the remedial action plan, after the completion of the remedial action plan, the Administrator shall cause to be published in a newspaper of general circulation in the area where the facility is located and posted in other conspicuous places in the local community a notice announcing that the proposed remedial action plan is available for review at the local library and that comments concerning the remedial action plan can be submitted to the Administrator, the State, and the community response organization.

“(C) AVAILABILITY OF COMMENTS.—If comments are submitted to a State or the community response organization, the State or community response organization shall make the comments available to the preparer of the proposed remedial action plan.

“(D) HEARING.—The Administrator shall hold a public hearing at which the proposed remedial action plan shall be presented and public comment received.

“(E) REMEDY REVIEW BOARDS.—

“(i) ESTABLISHMENT.—Not later than 60 days after the date of enactment of this section, the Administrator shall establish and appoint the members of 1 or more remedy review boards (referred to in this subparagraph as a “remedy review board”), each consisting of independent technical experts within Federal and State agencies with responsibility for remediating contaminated facilities.

“(ii) SUBMISSION OF REMEDIAL ACTION PLANS FOR REVIEW.—Subject to clause (iii), a proposed remedial action plan prepared by a potentially responsible party or the Administrator may be submitted to a remedy review board at the request of the person responsible for preparing or implementing the remedial action plan.

“(iii) NO REVIEW.—The Administrator may preclude submission of a proposed remedial action plan to a remedy review board if the Administrator determines that review by a remedy review board would result in an unreasonably long delay that would threaten human health or the environment.

“(iv) RECOMMENDATIONS.—Not later than 180 days after receipt of a request for review (unless the Administrator, for good cause, grants additional time), a remedy review board shall provide recommendations to the Administrator regarding whether the proposed remedial action plan is—

“(I) consistent with the requirements and standards of section 121(a);

“(II) technically feasible or infeasible from an engineering perspective; and

“(III) reasonable or unreasonable in cost.

“(v) REVIEW BY THE ADMINISTRATOR.—

“(ii) allow the preparer submitting a remedial design a reasonable time (which shall not exceed 90 days except in unusual circumstances, as determined by the Administrator) in which to submit a revised remedial design.

“(c) ENFORCEMENT OF REMEDIAL ACTION PLAN.—

“(I) NOTICE OF SIGNIFICANT DEVIATION.—If the Administrator determines that the implementation of the remedial action plan has

deviated significantly from the plan, the Administrator shall provide the implementing party a notice that requires the implementing party, within a reasonable period of time specified by the Administrator, to—

“(A) comply with the terms of the remedial action plan; or

“(B) submit a notice for modifying the plan.

“(2) FAILURE TO COMPLY.—

“(A) CLASS ONE ADMINISTRATIVE PENALTY.—In issuing a notice under paragraph (1), the Administrator may impose a class one administrative penalty consistent with section 109(a).

“(B) fundamentally alters the interpretation of sources of risk at the facility;

“(C) fundamentally alters the scope of protection to be achieved by the selected remedial action;

“(D) fundamentally alters the performance of the selected remedial action; or

“(E) delays the completion of the remedy by more than 180 days.

“(2) MAJOR MODIFICATIONS.—

“(A) IN GENERAL.—If the Administrator or other implementing party proposes a major modification to the plan, the Administrator or other implementing party shall demonstrate that—

“(ii) that the revised remedy will continue to satisfy section 121(a).

“(B) NOTICE AND COMMENT.—The Administrator shall provide the implementing party, the community response organization, and the local community notice of the proposed major modification and at least 30 days’ opportunity to comment on any such proposed modification.

“(C) PROMPT ACTION.—At the end of the comment period, the Administrator shall promptly approve or disapprove the proposed modification and order implementation of the modification in accordance with any reasonable and relevant requirements that the Administrator may specify.

“(3) MINOR MODIFICATIONS.—Nothing in this section modifies the discretionary authority of the Administrator to make a minor modification of a record of decision or remedial action plan to conform to the best science and engineering, the requirements of this Act, or changing conditions at a facility.”

SEC. 405. COMPLETION OF PHYSICAL CONSTRUCTION AND DELISTING.

Title I of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9601 et seq.) (as amended by section 404) is amended by adding at the end the following:

“SEC. 134. COMPLETION OF PHYSICAL CONSTRUCTION AND DELISTING.

“(a) IN GENERAL.—

“(1) PROPOSED NOTICE OF COMPLETION AND PROPOSED DELISTING.—Not later than 180 days after the completion by the Administrator of physical construction necessary to implement a response action at a facility, or not later than 180 days after receipt of a notice of such completion from the implementing party, the Administrator shall publish a

notice of completion and proposed delisting of the facility from the National Priorities List in the Federal Register and in a newspaper of general circulation in the area where the facility is located.

“(2) PHYSICAL CONSTRUCTION.—For the purposes of paragraph (1), physical construction necessary to implement a response action at a facility shall be considered to be complete when—

“(A) construction of all systems, structures, devices, and other components necessary to implement a response action for the entire facility has been completed in accordance with the remedial design plan; or

“(B) no construction, or no further construction, is expected to be undertaken.

“(3) COMMENTS.—The public shall be provided 30 days in which to submit comments on the notice of completion and proposed delisting.

“(4) FINAL NOTICE.—Not later than 60 days after the end of the comment period, the Administrator shall—

“(A) issue a final notice of completion and delisting or a notice of withdrawal of the proposed notice until the implementation of the remedial action is determined to be complete; and

“(B) publish the notice in the Federal Register and in a newspaper of general circulation in the area where the facility is located.

“(5) FAILURE TO ACT.—If the Administrator fails to publish a notice of withdrawal within the 60-day period described in paragraph (4)—

“(A) the remedial action plan shall be deemed to have been completed; and

“(B) the facility shall be delisted by operation of law.

“(6) EFFECT OF DELISTING.—The delisting of a facility shall have no effect on—

“(A) liability allocation requirements or cost-recovery provisions otherwise provided in this Act;

“(B) any liability of a potentially responsible party or the obligation of any person to provide continued operation and maintenance;

“(C) the authority of the Administrator to make expenditures from the Fund relating to the facility; or

“(D) the enforceability of any consent order or decree relating to the facility.

“(7) FAILURE TO MAKE TIMELY DISAPPROVAL.—The issuance of a final notice of completion and delisting or of a notice of withdrawal within the time required by subsection (a)(3) constitutes a nondiscretionary duty within the meaning of section 310(a)(2).

“(b) CERTIFICATION.—A final notice of completion and delisting shall include a certification by the Administrator that the facility has met all of the requirements of the remedial action plan (except requirements for continued operation and maintenance).

“(c) FUTURE USE OF A FACILITY.—

“(1) FACILITY AVAILABLE FOR UNRESTRICTED USE.—If, after completion of physical construction, a facility is available for unrestricted use and there is no need for continued operation and maintenance, the potentially responsible parties shall have no further liability under any Federal, State, or local law (including any regulation) for remediation at the facility, unless the Administrator determines, based on new and reliable factual information about the facility, that the facility does not satisfy section 121(a).

“(2) FACILITY NOT AVAILABLE FOR ANY USE.—If, after completion of physical construction, a facility is not available for any use or there are continued operation and maintenance requirements that preclude use of the facility, the Administrator shall—

“(A) review the status of the facility every 5 years; and

“(B) require additional remedial action at the facility if the Administrator determines, after notice and opportunity for hearing, that the facility does not satisfy section 121(a).

“(3) FACILITIES AVAILABLE FOR RESTRICTED USE.—The Administrator may determine that a facility or portion of a facility is available for restricted use while a response action is under way or after physical construction has been completed. The Administrator shall make a determination that uncontaminated portions of the facility are available for unrestricted use when such use would not interfere with ongoing operations and maintenance activities or endanger human health or the environment.

“(d) OPERATION AND MAINTENANCE.—The need to perform continued operation and maintenance at a facility shall not delay delisting of the facility or issuance of the certification if performance of operation and maintenance is subject to a legally enforceable agreement, order, or decree.

“(e) CHANGE OF USE OF FACILITY.—

“(1) PETITION.—Any person may petition the Administrator to change the use of a facility described in subsection (c) (2) or (3) from that which was the basis of the remedial action plan.

“(2) GRANT.—The Administrator may grant a petition under paragraph (1) if the petitioner agrees to implement any additional remedial actions that the Administrator determines are necessary to continue to satisfy section 121(a), considering the different use of the facility.

“(3) RESPONSIBILITY FOR RISK.—When a petition has been granted under paragraph (2), the person requesting the change in use of the facility shall be responsible for all risk associated with altering the facility and all costs of implementing any necessary additional remedial actions.”

SEC. 406. TRANSITION RULES FOR FACILITIES CURRENTLY INVOLVED IN REMEDY SELECTION.

Title I of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9601 et seq.) (as amended by section 405) is amended by adding at the end the following:

“SEC. 135. TRANSITION RULES FOR FACILITIES INVOLVED IN REMEDY SELECTION ON DATE OF ENACTMENT.

“(a) NO RECORD OF DECISION.—

“(1) OPTION.—In the case of a facility or operable unit that, as of the date of enactment of this section, is the subject of a remedial investigation and feasibility study (whether completed or incomplete), the potentially responsible parties or the Administrator may elect to follow the remedial action plan process stated in section 133 rather than the remedial investigation and feasibility study and record of decision process under regulations in effect on the date of enactment of this section that would otherwise apply if the requesting party notifies the Administrator and other potentially responsible parties of the election not later than 90 days after the date of enactment of this section.

“(2) SUBMISSION OF FACILITY EVALUATION.—In a case in which the potentially responsible parties have or the Administrator has made an election under subsection (a), the potentially responsible parties shall submit the proposed facility evaluation within 180 days after the date on which notice of the election is given.

“(b) REMEDY REVIEW BOARDS.—

“(1) AUTHORITY.—A remedy review board established under section 133(b)(5)(E) (referred to in this subsection as a ‘remedy review board’) shall have authority to consider a petition under paragraph (3) or (4) of this subsection.

“(2) GENERAL PROCEDURE.—

“(A) COMPLETION OF REVIEW.—The review of a petition submitted to a remedy review board under this subsection shall be completed not later than 180 days after the receipt of the petition unless the Administrator, for good cause, grants additional time.

“(B) COSTS OF REVIEW.—All reasonable costs incurred by a remedy review board, the Administrator, or a State in conducting a review or evaluating a petition for possible objection shall be borne by the petitioner.

“(C) DECISIONS.—At the completion of the 180-day review period, a remedy review board shall issue a written decision including responses to all comments submitted during the review process with regard to a petition.

“(D) OPPORTUNITY FOR COMMENT AND MEETINGS.—In reviewing a petition under this subsection, a remedy review board shall provide an opportunity for all interested parties, including representatives of the State and local community in which the facility is located, to comment on the petition and, if requested, to meet with the remedy review board under this subsection.

“(E) REVIEW BY THE ADMINISTRATOR.—

“(i) IN GENERAL.—The Administrator shall have final review of any decision of a remedy review board under this subsection.

“(ii) STANDARD OF REVIEW.—In conducting a review of a decision of a remedy review board under this subsection, the Administrator shall accord substantial weight to the remedy review board's decision.

“(iii) REJECTION OF DECISION.—Any determination to reject a remedy review board's decision under this subsection must be approved by the Administrator or the Assistant Administrator for Solid Waste and Emergency Response.

“(F) JUDICIAL REVIEW.—A decision of a remedy review board under subparagraph (C) and the Administrator's review of such a decision shall be subject to the limitations on judicial review under section 113(h).

“(G) CALCULATIONS OF COST SAVINGS.—

“(i) IN GENERAL.—A determination with respect to relative cost savings and whether construction has begun shall be based on operable units or distinct elements or phases of remediation and not on the entire record of decision.

“(ii) ITEMS NOT TO BE CONSIDERED.—In determining the amount of cost savings—

“(I) there shall not be taken into account any administrative, demobilization, remobilization, or additional investigation costs of the review or modification of the remedy associated with the alternative remedy; and

“(II) only the estimated cost savings of expenditures avoided by undertaking the alternative remedy shall be considered as cost savings.

“(3) CONSTRUCTION NOT BEGUN.—

“(A) PETITION.—In the case of a facility or operable unit with respect to which a record of decision has been signed but construction has not yet begun prior to the date of enactment of this section and which meet the criteria of subparagraph (B), the implementor of the record of decision may file a petition with a remedy review board not later than 90 days after the date of enactment of this section to determine whether an alternate remedy under section 133 should apply to the facility or operable unit.

“(B) CRITERIA FOR APPROVAL.—Subject to subparagraph (C), a remedy review board shall approve a petition described in subparagraph (A) if—

“(i) the alternative remedial action proposed in the petition satisfies section 121(a);

“(ii) (I) in the case of a record of decision with an estimated implementation cost of between \$5,000,000 and \$10,000,000, the alternative remedial action achieves cost savings

of at least 25 percent of the total costs of the record of decision; or

“(II) in the case of a record of decision valued at a total cost greater than \$10,000,000, the alternative remedial action achieves cost savings of \$2,500,000 or more;

“(iii) in the case of a record of decision involving ground water extraction and treatment remedies for substances other than dense, nonaqueous phase liquids, the alternative remedial action achieves cost savings of \$2,000,000 or more; or

“(iv) in the case of a record of decision intended primarily for the remediation of dense, nonaqueous phase liquids, the alternative remedial action achieves cost savings of \$1,000,000 or more.

“(C) CONTENTS OF PETITION.—For the purposes of facility-specific risk assessment under section 131, a petition described in subparagraph (A) shall rely on risk assessment data that were available prior to issuance of the record of decision but shall consider the actual or planned or reasonably anticipated future use of the land and water resources.

“(D) INCORRECT DATA.—Notwithstanding subparagraph (B) and (C), a remedy review board may approve a petition if the petitioner demonstrates that technical data generated subsequent to the issuance of the record of decision indicates that the decision was based on faulty or incorrect information.

“(4) ADDITIONAL CONSTRUCTION.—

“(A) PETITION.—In the case of a facility or operable unit with respect to which a record of decision has been signed and construction has begun prior to the date of enactment of this section and which meets the criteria of subparagraph (B), but for which additional construction or long-term operation and maintenance activities are anticipated, the implementor of the record of decision may file a petition with a remedy review board within 90 days after the date of enactment of this section to determine whether an alternative remedial action should apply to the facility or operable unit.

“(B) CRITERIA FOR APPROVAL.—Subject to subparagraph (C), a remedy review board shall approve a petition described in subparagraph (A) if—

“(i) the alternative remedial action proposed in the petition satisfies section 121(a); and

“(ii) (I) in the case of a record of decision valued at a total cost between \$5,000,000 and \$10,000,000, the alternative remedial action achieves cost savings of at least 50 percent of the total costs of the record of decision;

“(II) in the case of a record of decision valued at a total cost greater than \$10,000,000, the alternative remedial action achieves cost savings of \$5,000,000 or more; or

“(III) in the case of a record of decision involving monitoring, operations, and maintenance obligations where construction is completed, the alternative remedial action achieves cost savings of \$1,000,000 or more.

(C) INCORRECT DATA.—Notwithstanding subparagraph (B), a remedy review board may approve a petition if the petitioner demonstrates that technical data generated subsequent to the issuance of the record of decision indicates that the decision was based on faulty or incorrect information, and the alternative remedial action achieves cost savings of at least \$2,000,000.

“(D) MANDATORY REVIEW.—A remedy review board shall not be required to entertain more than 1 petition under subparagraph (B)(ii)(III) or (C) with respect to a remedial action plan.

“(5) DELAY.—In determining whether an alternative remedial action will substantially delay the implementation of a remedial action of a facility, no consideration shall be given to the time necessary to review a peti-

tion under paragraph (3) or (4) by a remedy review board or the Administrator.

“(6) OBJECTION BY THE GOVERNOR.—

Mr. ABRAHAM. Mr. President, I would like to join the others on the Senate floor here today to congratulate Senator CHAFEE and Senator SMITH on the introduction of their Superfund reform legislation. As an original cosponsor of this legislation, I support their efforts to speed the clean-up of polluted sites across this country.

And while this legislation has provisions targeting those sites currently on the national priority list, I should point out it also has provisions to speed the remediation of less seriously contaminated sites—so-called brownfields.

I am someone who is deeply concerned about brownfields and the economic and environmental damage they impose on communities.

First, Senator CHAFEE, thank you very much for agreeing to speak with me on this very important issue. As the Senator knows, last year I introduced legislation along with Senator LIEBERMAN which would provide tax incentives for the remediation of brownfields. This legislation is very important to communities across the country, and I intend to reintroduce similar legislation this Congress. It is my understanding that the bill introduced today focuses, in part, on our brownfields problem.

Mr. CHAFEE. The Senator from Michigan is correct. The focus of the Environment and Public Works Committee will extend beyond the National Priorities List to include solutions to our national brownfields problem. And while my committee does not have jurisdiction over tax measures, I recognize the leadership exerted by Senator ABRAHAM to address the problem of brownfields and I hope to work with him on a variety of solutions to the environmental problems faced by this Nation's communities.

Mr. ABRAHAM. I thank the Senator and I yield the floor.

By Mr. NICKLES (for himself,
Mr. GREGG, Mr. WARNER, Mr.

LOTT, Mr. ALLARD, Mr. ASHCROFT, Mr. COVERDELL, Mr. CRAIG, Mr. DOMENICI, Mr. ENZI, Mr. FAIRCLOTH, Mr. GORTON, Mr. GRAMS, Mr. HAGEL, Mr. HATCH, Mr. HELMS, Mrs. HUTCHISON, Mr. HUTCHINSON, Mr. KYL, Mr. MURKOWSKI, Mr. ROBERTS, Mr. SESSIONS, Mr. SMITH, Mr. THOMAS, Mr. THURMOND, Mr. COATS, and Mr. KEMPTHORNE):

S. 9. A bill to protect individuals from having their money involuntarily collected and used for politics by a corporation or labor organization; to the Committee on Rules and Administration.

THE PAYCHECK PROTECTION ACT

Mr. NICKLES. Madam President, this bill, the Paycheck Protection Act, sponsored by myself, Senators GREGG, LOTT, INHOFE, HUTCHISON from Texas, COCHRAN, ROBERTS, HAGEL, SMITH from New Hampshire, and KEMPTHORNE, deals with making sure that no one is compelled to contribute to political campaigns with which they disagree. Senator FORD made an eloquent speech on campaign finance reform. I don't disagree with everything he said. I just disagree with parts of it.

Campaign reform is an issue a lot of us are going to be dealing with this year. It is important, in my opinion, Madam President, that we encourage people to participate in campaigns. We want more people all across the country to participate in the electoral process. It is a sad day when only half of the people vote in a Presidential election. Madam President, it is very important that nobody be compelled to contribute to a campaign with which they disagree. You might think, well, wait a minute, how in the world in 1997, in this day and age, would anybody be compelled to contribute to a campaign with which they disagree? But it happens. Unfortunately, Madam President, every week millions of Americans are having money taken out of their paycheck to contribute to candidates that they may well disagree with, but they didn't have a voice, a choice, or an option.

Madam President, that is wrong. I will tell you that the origin of the bill we are introducing came from a town meeting that I had, where an individual—a union member—stood up in a town meeting and said, "I really resent the fact that my money is taken from me, without my vote, without my voice, without my option, and given to candidates and parties which I totally oppose." I said, "I agree with you. We will try to remedy that."

That should not happen in America. That is something that sounds like it might happen in some totalitarian state where moneys or assets are confiscated and some corrupt politician would use it against their will. It is happening today. Millions of Americans are finding part of their paychecks taken from them without their voice or choice and used for political purposes with which they disagree.

Madam President, this bill, the Paycheck Protection Act, which is sponsored by several of us, basically is very simple. It says that no individual, no employee working for a corporation, would be compelled to contribute to a political organization without their express consent. As a matter of fact, it says that no deduction from their wages would be used for political purposes unless they give prior written consent.

Consent is the big issue. If we are going to have campaign reform, I am going to tell my colleague, this is going to have to be part of the package.

This is America. No one should be compelled to contribute to political purposes for which they disagree. And that applies for an individual where maybe their company has a PAC (political action committee), and maybe the board of directors or the officers say, "We want everybody to contribute." They can say what they want, but they cannot compel. No one should be compelled to contribute to a political organization, a political action committee, or to a labor organization against their will for political purposes. It is that simple.

As Thomas Jefferson said, "To compel a man to furnish funds for the propagation of ideas he disbelieves or abhors . . . is sinful and tyrannical."

We're not talking about nickels and dimes here, but untold millions of dollars in partisan political campaigns and propaganda. Since such funds are not required to be disclosed, it is impossible to determine the exact amount of this spending. However, estimates of this under-the-radar spending is somewhere between \$300 million and \$1 billion for this most recent election.

The way it is now, an employee paying dues to a labor organization has no choice over whether or not that labor organization can collect the money for politics. The only choice these employees have in the matter is to ask for a refund of the portion dues which is to be used for politics. This refund process is so lengthy and burdensome that it is next to impossible for someone to get their money back. Furthermore, for an employee to exercise their right to a refund of such dues, they are required to give up their right to vote in the labor organization that they are still required to pay for representing them. This is taxation without representation.

The Supreme Court has consistently ruled that employees paying dues to a labor organization cannot be forced to also pay for the activities outside the core representational activities, such as costs associated with political activities. The Clinton administration, however, has kept employees in the dark regarding the minimal rights they do have. One of the first acts of this administration was to repeal the very regulations to carry out the Supreme Court's decision, which protected employees forced to pay for politics.

People are recognizing the wrong brought upon Americans who have been given no choice in supporting causes for which they oppose. Even the administration's own National Labor Relations Board [NLRB], which has strong labor organization sentiments, recently ruled dues-paying employees are in the least entitled to information setting forth the percentage of those dues not related to collective bargaining activities. While this is a step in the right direction, more needs to be done.

The Paycheck Protection Act protects employees from having their money involuntarily taken from them and used for politics. The act protects stockholders and employees of a corporation from having, as a condition of employment, dues, initiation fees, or other payments for politics taken from them without the separate, prior, written, voluntary authorization. Similarly, the act protects employees paying dues to a labor organization from having such dues, initiation fees, or other payments taken from them which are used for politics.

Mr. President, this act furthers the basic civil right spoken of by Thomas Jefferson. It does so by requiring that individuals not be compelled to fund or support activities outside the legitimate scope of the employer or labor organization. This bill pro-worker, pro-labor organization, and most importantly, pro-American.

I look forward to a broad bipartisan support for this bill.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 10. A bill to reduce violent juvenile crime, promote accountability by juvenile criminals, punish and deter violent gang crime, and for other purposes; to the Committee on the Judiciary.

VIOLENT AND REPEAT JUVENILE OFFENDER ACT
OF 1997

Mr. ASHCROFT. Mr. President, earlier today Senator HATCH introduced S. 10, the Violent and Repeat Offender Act of 1997. Senators LOTT DOMENICI, SESSIONS, and I worked with him in developing the bill. While not perfect, the bill does take the initial steps in dealing with the epidemic of violent juvenile crime sweeping the Nation.

Mr. President, the face of crime in America is indeed changing. Throughout our history, one thing has been clear: Government's first responsibility is to keep the citizenry safe. John Jay wrote in *The Federalist*, No. 3 "Among the many objects to which a wise and free people find it necessary to direct their attention, that of providing for their safety seems to be first."

The murderers, robbers, rapists, and drug dealers of yesteryear were typically adults. Now they are typically juveniles. As the age of these criminal predators becomes younger and younger with each passing year, so does the age of their victims.

Last Wednesday afternoon, 12-year-old Darryl Dayan Hall was abducted at gunpoint from the Southeast Washington area by three teenagers of a gang known as the Simple City Crew. This is the same gang that opened gunfire at a crowded community swimming pool in June 1993, wounding six children. This past Saturday, police found Darryl's frozen body. He had been shot once in the back of the head and at least once in the body.

The three teenagers who are now charged with Darryl's murder have had numerous prior brushes with the law. One of Darryl's assailants was charged as a juvenile with possession of PCP in 1995 and then was released—as is too often the case—promising not to run afoul of the law again. Another of Darryl's assailants was, and is, on probation following his juvenile conviction last spring for possession of PCP with intent to distribute. Darryl's third assailant was charged as a juvenile just last month with carrying a deadly weapon.

Mr. President, from 1984 to 1994, the number of juveniles murdered in this

country increased 82 percent. In 1994, one of every five juveniles murdered were killed by another juvenile. The rate at which juveniles 14 to 17 years old were arrested for murder grew by 22 percent from 1990 to 1994 and the problem is going to get worse, much worse.

Congress, over the last three decades, has established 131 separate Federal programs—administered by 16 different departments and agencies—to serve delinquent and at-risk youth, according to a report issued by GAO last March. Conservative estimates of Federal appropriations used for these at-risk and delinquent youth programs was more than \$4 billion in fiscal year 1995.

Despite this ongoing massive expenditure, the Federal Government has failed to meet its responsibility of providing public safety in this arena because it has not focused on holding juveniles accountable for their actions, it must focus on the problem of rising juvenile violence. We have a new category of offenders that deserve a new category of responses. We have criminals in our midst—young criminals.

The juvenile offenders of today will become the career offenders of tomorrow, if Government continues to fail to recognize that America has an acute social illness that cannot be cured with money spent solely on social programs. This legislation takes a commonsense approach in dealing with the epidemic of juvenile violence. It would help States restore safety in urban, suburban, and rural communities.

This legislation would provide \$2.5 billion in new incentive grants for States to enact certain accountability-based reforms to their juvenile justice systems. This legislation would authorize funding for various programs, including trying violent juveniles as adults; establishing the ability of States to collect juvenile criminal records, fingerprints, and photographs, and to share that criminal history information within the State, with other States, and with the Federal Government; and establishing the Serious Habitual Offender Comprehensive Action Program [SHOCAP]. In addition, religious organizations would be permitted to participate in rehabilitative programs.

Serious, violent, and repeat juvenile offenders must be held responsible for their crimes. Today we are living with a juvenile justice system that was created around the time of the silent film. We are living with a juvenile justice system that reprimands the crime victim for being at the wrong place at the wrong time, and then turns around and hugs the juvenile terrorist, whispering ever so softly into his ear, "Don't worry, the State will cure you."

The juvenile justice system's primary goal is to treat and rehabilitate the juvenile offender. Such a system can handle runaways, truants, and other status offenders; but it is ill-equipped to deal with those who commit serious, violent, and repeat juvenile crime.

The criminal justice system, not the juvenile justice system, can emphasize that adult criminal acts have real consequences. The purpose of the criminal justice system is to punish, that is, to hold defendants accountable.

This legislation would provide financial assistance to States to help them reform their juvenile system. A State would be eligible to receive Federal funds if the State agrees to enact legislation that would provide for the adult prosecution—as a matter of law or prosecutorial discretion—of juveniles 14 or older who commit a violent crime, such as murder, forcible rape, armed robbery and assault with a deadly weapon; an offense involving a controlled substance; or an offense involving possession of a firearm or a destructive device.

Punishment of dangerous juvenile offenders as adults is an effective tool in fighting violent juvenile crime. For example, Jacksonville, FL State Attorney Harry Shorstein instituted a program to prosecute and incarcerate such offenders in 1992. Two years later, arrests for juveniles dropped from 7,184 to 5,475. While juvenile arrests increased for the Nation, Jacksonville's arrest rate decreased by 30 percent.

States need to create and maintain juvenile criminal records. Typically, State statutes seal juvenile criminal records and expunge these records when the juvenile reaches age 18. The time has come to discard anachronistic ideas that crimes, no matter how heinous, by juveniles must be kept confidential.

Our laws view juveniles through the benevolent prism of kids gone astray. It should view them as young criminals who know that they can commit crimes, repeatedly as juveniles because their juvenile records are kept hidden under the veil of secrecy. These young criminals know that when they reach their 18th birthday, they can begin their second career as adult criminals with an unblemished record. In rhetoric we are protecting juveniles from the stigma of a record but in reality we are coddling criminals. We must separate rhetoric from reality by lifting the veil of secrecy.

Law enforcement officers need to know the prior juvenile criminal records of individuals to assist them in criminal investigations and apprehension.

Law enforcement is in desperate need of access to juvenile criminal records, according to Police Chief David G. Walchak, who is also president of the International Association of Chiefs of Police. The police chief says, "Current juvenile records (both arrest and adjudication) are inconsistent across the states, and are usually unavailable to the various programs' staff who work with youthful offenders." The police chief further states that "There are only 26 states that even allow law enforcement access to juvenile records."

In the words of Chief Walchak, "If we [law enforcement] don't know who the

youthful offenders are, we can't appropriately intervene." It is that simple. As juvenile gangs spread from urban to suburban to rural areas, as they travel from State to State, the veil of secrecy draped over their criminal history records undermines law enforcement efforts.

This legislation would also provide money to States to create, maintain, and share juvenile criminal records, and to share those records with other Federal, State, and local law enforcement agencies. Strengthening law enforcement should be a top priority.

School officials need access to juvenile criminal records to assist them in providing for the best interests of all students. Students are vulnerable in unsafe school environments. The decline in school safety can be attributed to laws that protect dangerous students rather than innocent students. While visiting with school officials in Sikeston, MO, a teacher told me that a student came to school wearing an electronic monitoring ankle bracelet. The student told the teacher, "You don't know if I'm a murderer or a rapist and I ain't gonna tell you." That student was brutally honest. No one had any knowledge of what he had done and, more important, no way of finding out.

If schools know the identity of a violent juvenile, they can respond to misbehavior by imposing stricter sanctions, assigning particular teachers, or having the student's locker near a teacher's doorway entrance so that the teacher can monitor his conduct during the changing of class periods. In short, this bill would allow school officials to take measures that could prevent violence at schools.

For purposes of adult sentencing, adult courts need to know if a convicted felon has a history of criminal behavior. According to the 1991 Survey of Inmates in State Correctional Facilities, nearly 40 percent of prison inmates had a prior record as a juvenile. That is approximately 4 in 10 prison inmates. This legislation will not enable criminals to masquerade as neophytes before the criminal justice system.

The bill allows State and local governments to use Federal funds to implement the Serious Habitual Offenders Comprehensive Action Program [SHOCAP].

SHOCAP is a multiagency crime analysis and case management process for identifying and targeting the violent and hard-core juvenile offenders in a community.

SHOCAP targets these serious habitual offenders for most intensive social supervisory interventions, the most intensive accountability in school attendance and discipline, and the most investigation and prosecution when they commit a crime.

The OJJDP conducted five test pilots of SHOCAP. Oxnard, CA was one of the selected sites. SHOCAP was implemented in 1983. Oxnard found that less than 2 percent of all juveniles arrested

in that community were responsible for 35 percent of felonies by juveniles. Four years later, Oxnard's violent crime dropped 38 percent. Illinois and Florida both have recently established statewide SHOCAP's. This bill would allow all jurisdictions to use Federal funds to implement SHOCAP.

Reforms are necessary at the Federal level as well. This legislation would make it easier for Federal prosecutors to try juveniles as adults. Under the bill, U.S. attorneys would have discretion to decide whether to try as adults juveniles 14 years or older who are alleged to have committed an act which if committed by an adult would be a felony. This would eliminate juvenile transfer hearings that leave the transfer decision to juvenile court judges.

Federal juvenile court proceedings would be open to the general public. When imposing a sentence, the district court would be allowed to consider the juvenile's entire prior juvenile records. In any case in which a juvenile is tried as an adult, access to the record of the offenses of the juvenile shall be made available in the same manner as is applicable to adult defendants. And in those cases in which the juvenile was adjudicated delinquent in Federal juvenile delinquency proceedings, the U.S. attorney would be allowed to release such records to law enforcement authorities of any jurisdiction and to school officials.

When the act committed by the juvenile is heinous, the punishment will be weighed accordingly. If tried and sentenced as an adult, the juvenile would be subject to the death penalty as an adult. In addition, the death penalty would be lowered from age 18 to 16.

The Government should mount a counterattack on gang violence. This legislation targets violent youth gangs, like the notorious Simple City Crew in the District. There would be new Federal penalties for offenses committed by criminal street gangs. Gangs are no longer concentrated in the big cities, they are now in rural towns. The bill would also provide \$100 million to hire assistant U.S. attorneys to prosecute juvenile criminal street gangs.

We must challenge this culture of violence and restore the culture of personal responsibility. It is high time to consider hardheaded and sensible juvenile justice policies. Where possible we must give second chances. Where necessary we must punish severely. This is a first step to restore justice to a nation that has grown weary of injustice.

In sum, this legislation would send a clear, cogent, and convincing message: serious acts have serious consequences.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

SEC. 2. FINDINGS AND PURPOSES.

(a) **FINDINGS.**—Congress finds that—

(1) at the outset of the twentieth century, the States adopted 2 separate juvenile justice systems for violent and nonviolent offenders;

(2) violent crimes committed by juveniles, such as homicide, rape, and robbery, were an unknown phenomenon at that time, but the rate at which juveniles commit such crimes has escalated astronomically since that time;

(3) in 1994—

(A) the number of persons arrested overall for murder in the United States decreased by 5.8 percent, but the number of persons who are less than 15 years of age arrested for murder increased by 4 percent; and

(B) the number of persons arrested for all violent crimes increased by 1.3 percent, but the number of persons who are less than 15 years of age arrested for violent crimes increased by 9.2 percent, and the number of persons less than 18 years of age arrested for such crimes increased by 6.5 percent;

(4) from 1985 to 1996, the number of persons arrested for all violent crimes increased by

52.3 percent, but the number of persons under age 18 arrested for violent crimes rose by 75 percent;

(5) the number of juvenile offenders is expected to undergo a massive increase during the first 2 decades of the twenty-first century, culminating in an unprecedented number of violent offenders who are less than 18 years of age;

(6) the rehabilitative model of sentencing for juveniles, which Congress rejected for adult offenders when Congress enacted the Sentencing Reform Act of 1984, is inadequate and inappropriate for dealing with violent and repeat juvenile offenders;

(7) the Federal Government should encourage the States to experiment with progressive solutions to the escalating problem of juveniles who commit violent crimes and who are repeat offenders, including prosecuting all such offenders as adults, but should not impose specific strategies or programs on the States;

(8) an effective strategy for reducing violent juvenile crime requires greater collection of investigative data and other information, such as fingerprints and DNA evidence, as well as greater sharing of such information among Federal, State, and local agencies, including the courts, in the law enforcement and educational systems;

(9) data regarding violent juvenile offenders must be made available to the adult criminal justice system if recidivism by criminals is to be addressed adequately;

(10) holding juvenile proceedings in secret denies victims of crime the opportunity to attend and be heard at such proceedings, helps juvenile offenders to avoid accountability for their actions, and shields juvenile proceedings from public scrutiny and accountability;

(11) the injuries and losses suffered by the victims of violent crime are no less painful or devastating because the offender is a juvenile; and

(12) the investigation, prosecution, adjudication, and punishment of criminal offenses committed by juveniles is, and should remain, primarily the responsibility of the States, to be carried out without interference from the Federal Government.

(b) **PURPOSES.**—The purposes of this Act are—

(1) to reform juvenile law so that the paramount concerns of the juvenile justice system are providing for the safety of the public and holding juvenile wrongdoers accountable for their actions, while providing the wrongdoer a genuine opportunity for self reform;

(2) to revise the procedures in Federal court that are applicable to the prosecution of juvenile offenders;

(3) to address specifically the problem of violent crime and controlled substance offenses committed by youth gangs; and

(4) to encourage and promote, consistent with the ideals of federalism, adoption of policies by the States to ensure that the victims of crimes of violence committed by juveniles receive the same level of justice as do victims of violent crimes that are committed by adults.

SEC. 3. SEVERABILITY.

If any provision of this Act, an amendment made by this Act, or the application of such provision or amendment to any person or circumstance is held to be unconstitutional, the remainder of this Act, the amendments made by this Act, and the application of the provisions of such to any person or circumstance shall not be affected thereby.

TITLE III—JUVENILE CRIME CONTROL AND ACCOUNTABILITY

SEC. 301. FINDINGS; DECLARATION OF PURPOSE; DEFINITIONS.

Title I of the Juvenile Justice and Delinquency Prevention Act of 1974 (42 U.S.C. 5601 et seq.) is amended to read as follows:

“TITLE I—FINDINGS AND DECLARATION OF PURPOSE

“SEC. 101. FINDINGS.

“Congress finds that—

“(1) during the past several years, the United States has experienced an alarming increase in arrests of adolescents for murder, assault, and weapons offenses;

“(2) in 1994, juveniles accounted for 1 in 5 arrests for violent crimes, including murder, robbery, aggravated assault, and rape, including 514 such arrests per 100,000 juveniles 10 through 17 years of age;

“(3) understaffed, overcrowded juvenile courts, prosecutorial and public defender offices, probation services, and correctional facilities no longer adequately address the changing nature of juvenile crime, protect the public, and correct youth offenders;

“(4) the juvenile justice system has proven inadequate to meet the needs of society, because insufficient sanctions are imposed on serious youth offenders and the needs of children, who may be at risk of becoming delinquents;

“(5) existing programs and policies have not adequately responded to the particular threat of drugs, alcohol abuse, violence, and gangs pose to the youth of the Nation;

“(6) demographic increases projected in the number of youth offenders require reexamination of the prosecution and incarceration policies for serious violent youth offenders;

“(7) State and local communities that experience directly the devastating failures of the juvenile justice system require assistance to deal comprehensively with the problems of juvenile delinquency;

“(8) Existing Federal programs have not provided the States with necessary flexibil-

ity, and have not provided coordination, resources, and leadership required to meet the crisis of youth violence.

“(9) Overlapping and uncoordinated Federal programs have created a multitude of Federal funding streams to State and local governments, that have become a barrier to effective program coordination, responsive public safety initiatives, and the provision of comprehensive services for children and youth.

“(10) Violent crime by juveniles constitutes a growing threat to the national welfare that requires an immediate and comprehensive governmental response, combining flexibility and coordinated evaluation.

“(11) Limited State and local resources are being wasted complying with the unnecessary Federal mandate that status offenders be desinstitutionalized. Some communities believe that curfews are appropriate for juveniles, and those communities should not be prohibited by the Federal Government from using confinement for status offenses as a means of dealing with delinquent behavior before it becomes criminal conduct.

“(12) Limited State and local resources are being wasted complying with the unnecessary Federal mandate that no juvenile be detained or confined in any jail or lockup for adults, because it can be feasible to separate adults and juveniles in 1 facility. This mandate is particularly burdensome for rural communities.

“(13) The role of the Federal Government should be to encourage and empower communities to develop and implement policies to protect adequately the public from serious juvenile crime as well as comprehensive programs to reduce risk factors and prevent juvenile delinquency.

“(14) A strong partnership among law enforcement, local government, juvenile and family courts, schools, businesses, philanthropic organizations, families, and the religious community, can create a community environment that supports the youth of the Nation in reaching their highest potential and reduces the destructive trend of juvenile crime.

“SEC. 102. PURPOSE AND STATEMENT OF POLICY.

“(a) IN GENERAL.—The purposes of this Act are—

“(1) to protect the public and to hold juveniles accountable for their acts;

“(2) to empower States and communities to develop and implement comprehensive programs that support families and reduce risk factors and prevent serious youth crime and juvenile delinquency;

“(3) to provide for the thorough and ongoing evaluation of all federally funded programs addressing juvenile crime and delinquency;

“(4) to provide technical assistance to public and private nonprofit entities that protect public safety, administer justice and corrections to delinquent youth, or provide services to youth at risk of delinquency, and their families;

“(5) to establish a centralized research effort on the problems of youth crime and juvenile delinquency, including the dissemination of the findings of such research and all related data;

“(6) to establish a Federal assistance program to deal with the problems of runaway and homeless youth;

“(7) to assist State and local governments in improving the administration of justice for juveniles;

“(8) to assist the State and local governments in reducing the level of youth violence;

“(9) to assist State and local governments in promoting public safety by supporting juvenile delinquency prevention and control activities;

“(10) to encourage and promote programs designed to keep in school juvenile delinquents expelled or suspended for disciplinary reasons;

“(11) to assist State and local governments in promoting public safety by encouraging accountability through the imposition of meaningful sanctions for acts of juvenile delinquency;

“(12) to assist State and local governments in promoting public safety by improving the extent, accuracy, availability and usefulness of juvenile court and law enforcement records and the openness of the juvenile justice system;

“(13) to assist State and local governments in promoting public safety by encouraging the identification of violent and hardcore juveniles and transferring such juveniles out of the jurisdiction of the juvenile justice system and into the jurisdiction of adult criminal court;

“(14) to assist State and local governments in promoting public safety by providing resources to States to build or expand juvenile detention facilities;

“(15) to provide for the evaluation of federally assisted juvenile crime control programs, and training necessary for the establishment and operation of such programs;

“(16) to ensure the dissemination of information regarding juvenile crime control programs by providing a national clearinghouse; and

“(17) to provide technical assistance to public and private nonprofit juvenile justice and delinquency prevention programs.

“(b) STATEMENT OF POLICY.—It is the policy of Congress to provide resources, leadership, and coordination—

“(1) to combat youth violence and to prosecute and punish effectively violent juvenile offenders; and

“(2) to improve the quality of juvenile justice in the United States.

By Mr. DASCHLE (for himself, Mr. FORD, Mr. GLENN, Mr. LEVIN, Ms. MIKULSKI, Mr. REID, Ms. MOSELEY-BRAUN, Mr. DURBIN, Mr. WELLSTONE, Mr. KERRY, and Mr. LAUTENBERG):

S. 11. A bill to reform the Federal election campaign laws applicable to Congress; to the Committee on Rules and Administration.

CONGRESSIONAL ELECTION CAMPAIGN SPENDING LIMIT AND REFORM ACT OF 1997

Mr. LEVIN. Mr. President, this Congress faces no more important task in these first few months than passing legislation to reform the campaign finance system. We just witnessed the most expensive campaign in the history of our country. According to the Washington Post, both major political party committees raised over \$880 million in 1995 and 1996. That is estimated to be a 73 percent increase since the last Presidential election cycle.

The increase in "soft" money raised by the parties during that same period was threefold—a 300 percent increase in "soft" money raised by the parties. The Washington Post again estimates that "soft" money contributions for 1995 and 1996 for Democrats was about \$122 million, "soft" money contributions for Republicans was about \$141 million. For a system that was supposed to eliminate contributions from

corporations and unions, we have seen corporations and unions contribute or spend millions of dollars to aid in the election or defeat of congressional and Presidential candidates.

For a system that was supposed to cap contributions from individuals at no more than \$25,000 a year to national political parties and individual campaigns combined, we have seen hundreds of contributions from individuals to both parties that equal or exceed \$100,000. For a system that was supposed to require that campaign advertisements be paid for with money subject to the contribution restrictions of our campaign finance laws, we have seen probably hundreds of commercials, many of which had a significant impact on the outcome of elections in which they were run, hundreds of commercials paid for with unregulated, unrestricted, undisclosed, so-called "soft" money.

For the vast majority of these ads, the public does not know the basic facts of who contributed to the payments for these ads or how much was spent to air them. For years, we have pretended that we actually have had somewhat meaningful restrictions on campaign contributions. But with this past election cycle, the facade has fallen and we are faced with the naked truth that this system is wide open.

That is why I am joining with Senator DASCHLE today in sponsoring his proposal for campaign finance reform which would eliminate or rein in many of the worst loopholes in the current system including the raising and spending of unregulated or "soft" money, independent expenditures by national parties, and campaign ads which masquerade as so-called issue ads.

Senator DASCHLE's bill is a comprehensive response to the problem and on balance it is an achievable and meaningful reform proposal. Senator DASCHLE has incorporated in his bill several provisions that I authored dealing with issue ads and independent expenditures by parties. The approach that my provision in this bill takes with respect to so-called issue ads is to redefine "express advocacy" to include any advertising broadcast on radio or television 90 days before a primary or general election which specifically mentions a candidate.

The Supreme Court has tried to draw a bright line in defining "express advocacy" by applying it only to those ads which include certain magic phrases like "Vote for Mrs. X" or "Defeat Mr. Y." Such a test though leaves out ads which target a specific candidate and do not use the magic words that deliver the same message—for example, an ad that says, "Write to candidate Z and let him know how you feel" about an issue, which the ad has just strongly advocated or attacked.

Now, my approach would treat any broadcast ad, any broadcast ad that appears within 90 days of an election in which a candidate is explicitly men-

tioned as "express advocacy" and payable therefore out of regulated funds. The approach which my provision takes with respect to independent expenditures by a party is to require a party to choose between making coordinated expenditures on behalf of a candidate or making independent expenditures. A party would not be allowed to have it both ways. And that is because it is impossible, practically speaking, for a national party to be truly independent from a candidate if it is also engaged in coordinated expenditures on that candidate's behalf. To argue otherwise defies common sense. It is one way or the other. If there is a coordinated campaign on the candidate's behalf, it is kind of hard to argue that that same national party can engage in coordinated expenditures relative to that campaign.

We should not delay the consideration of campaign finance reform legislation, but we can always find a reason not to do it. This year there is a new reason. I have heard the suggestion that we should put off consideration of campaign finance reform until the hearings before the Governmental Affairs Committee on campaign finance irregularities are finished, but the argument for delay has been used in one form or another for many, many Congresses and our job now is to show the American people that we can do it and we can do it now.

The typical sophisticated analysis of the likelihood of campaign finance reform is that any reform is virtually impossible. "It will not happen," you hear among those so-called well-informed folks. "The gap simply cannot be bridged," some people say.

We witnessed the end of the cold war 5 years ago. No one ever thought that was going to end. If we can achieve the end of the nuclear arms race, we surely can achieve the end of the money race in the American campaign system. I think most of us—and I, surely—want to be part of that effort. I want to do whatever it takes to facilitate action now. That is why I will be introducing in the next few days a more limited form of campaign finance reform to address certain limited, specific, but extensive abuses. Then, if we come to log-gerheads over a comprehensive approach with more limited bills being offered as backups, there will be no excuse to not tackle at least some of the more pressing problems.

Let me take a minute, Mr. President, to show you how out of kilter this system has become. There's an article in today's Roll Call about the treatment of the Business Roundtable by the Republican Party. Now the Business Roundtable, which is an organization of the biggest and most influential corporations in America, doesn't need me or anybody else, probably, to stand up for it. I am sure it can handle itself quite adequately when it is picked on. But when you have the Republican Party calling in 24 CEO's of companies who are members of the Business

Roundtable to begin the "process of behavior modification" according to the persons who spoke to Roll Call, you've got a serious problem.

According to Roll Call,

Still angry that big business failed to adequately bankroll their campaigns and counter the AFL-CIO's onslaught of attack ads last fall, the Republicans want the BRT (Business Roundtable) to purge Democrats from its staff of nine directors.

"You have to fix the problem. You have to fix the Business Roundtable," one Republican source said, according to Roll Call, "explaining that the GOP leadership is urging the prestigious organization of corporate bigwigs to purge its staff."

The article goes on.

The lawmakers are also urging the CEOs of some 200 corporations that comprise the BRT to dump their Democratic lobbyists, hire Republicans, and significantly increase the percentage of PAC contributions that go to GOP candidates.

Later on, the article says,

If the Republicans can get the BRT to change its ways the payoff could be big. Just as Willie Sutton robbed banks because "that's where the money is," the GOP Congressional leaders realize that BRT members could handily boost Republican election efforts if the BRT would agree to fund issue-advocacy campaigns in future elections.

What a sad state of affairs, Mr. President. Congressional leaders, according to this article, are trying to pressure a private organization as to whom its members should employ to lobby their offices, the amount of support these corporations should give to their party activities and how they should spend their money to influence elections on issue ads. And it is all done with what seems to be a threat—a "do this or else" attitude.

The Wall Street Journal, reporting on this CEO meeting, suggests that the threat is more explicit than implied. The Wall Street Journal of January 9, 1997, reported:

Companies that want to have it both ways, vows one top GOP strategist, no longer will be involved in Republican decision-making "or invited to our cocktail parties."

And this action is not because the Business Roundtable did not contribute to Republican candidates. No, according to the Wall Street Journal, the BRT gave twice as much to Republicans as they did to Democrats—\$25 million to Republicans and only \$11 million to Democrats. It is not enough that the BRT members already give to Republicans, they "should give a bigger percentage to the Republicans" than they are now giving, according to Haley Barbour, the Republican Party Chairman.

This is punishment, Mr. President, to be imposed on an organization by party and Congressional leaders. That is the message behind this action—no money, no access—and it looks awful. That is how far we have come in this scramble for campaign money, and that is why we have to make the effort now to get going on campaign finance reform.

Mr. President, I ask unanimous consent the two articles I referred to be printed in the RECORD.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the materials were ordered to be printed in the RECORD, as follows:

GOP TO REBUKE COMPANIES FOR BIPARTISAN DONATIONS

By Helene Cooper

WASHINGTON—Republican leaders are adopting a tough post-election strategy: “Don’t get mad, get even.” And the foe this time isn’t the Democrats or organized labor. It’s Corporate America.

Annoyed that big business has been hedging its bets by giving lots of money to the Democrats as well as to the Republicans, the GOP says the Business Roundtable, a group of 200 chief executives from the nation’s biggest companies, is about to receive an ultimatum: Stop donating so much to the Democrats and become more involved in partisan politics, or be denied access to Republicans in Congress.

GOP House leaders are expected to deliver the message tonight at a dinner meeting with some 20 chief executives of Business Roundtable companies. Scheduled to attend are Speaker Newt Gingrich, Majority Leader Dick Armey, Rep. Tom DeLay of Texas and Rep. John Boehner of Ohio, among others. Corporate bigwigs expected at the meeting include Don Fites, chief executive officer of Caterpillar Inc. who is chairman of the Business Roundtable, and John Snow, chief executive of CSX Corp.

Republican Party Chairman Haley Barbour, who is spearheading the drive, accuses the business group of “sitting on its hands” during the past election campaign; he calls America’s big CEOs ineffectual in the battle against Democrats and organized labor. “If their view is going to be neutral when the left tries to undo their agenda,” Mr. Barbour says in an interview, “they need to paint up a big billboard that says, ‘We don’t fight.’”

Companies that want to have it both ways, vows one top GOP strategist, no longer will be involved in Republican decision-making “or invited to our cocktail parties.”

The GOP strategy is a high-risk one. While Business Roundtable companies gave more than \$11.04 million to the Democrats during the 1996 election cycle, as of figures from Dec. 2 they gave more than double that amount—\$25.76 million—to Republicans, according to the Center for Responsive Politics, a Washington-based public-interest group that monitors campaign spending.

Republican leaders insist they aren’t selling access. But their strategy comes at a time when the GOP is gearing up to investigate Democratic fund raising and has criticized the Clinton administration for cozying up to wealthy Asians and Asian-Americans who have donated heavily to the Democratic Party.

But Mr. Barbour isn’t worried about alienating the GOP’s longtime corporate backers. “The best way to be friends is to be upfront with them,” he says. Roundtable companies, he adds, “should give a bigger percentage to the Republicans” than they now are giving.

Mr. Barbour has been sounding the anti-Business Roundtable drumbeat with increasing ferocity, calling the group inefficient and

incompetent in numerous interviews. And Business Roundtable members say he has suddenly become unavailable when they call to talk about the problem.

"I've been unable to connect with Haley," Caterpillar's Mr. Fites said in a letter to Roundtable members two weeks ago. "When I do reach him, I want to explain" that the Business Roundtable, as a group, doesn't give money to political candidates, Mr. Fites said.

But Business Roundtable companies do, and therein lies the problem for Republicans, who have long thought of Corporate America as their own private money machine. Lately though, big companies have been hedging their bets more than before, and giving substantial money to the Democrats as well. With a Democratic administration, that is expected to continue.

Telecommunication giants AT&T Corp., MCI Communications Corp. and Sprint Corp., along with their political-action groups, for example, rewarded the Democrats in Congress and the Clinton administration for being sympathetic to their cause during the telecommunication-legislation fight. They spread out their huge contributions almost equally, giving \$1.74 million to the Democrats and \$1.98 million to Republicans. Eastman Kodak Co., which is counting on the Clinton administration to push its trade complaint against Fuji Photo film Co. of Japan, gave the Democrats \$40,711 in the 1996 cycle, and \$39,000 to the Republicans.

Adding to the GOP's corporate-money complaints was the huge, albeit losing, \$35 million campaign by organized labor to elect a Democratic Congress. When GOP strategists tried to counter the attack, forming a group called the Coalition, the business-led group raised just \$5 million. In addition, the Business Roundtable declined to join. "We do not solicit or spend money on behalf of candidates for political office," the group's spokeswoman, Johanna Schneider, said.

"We've got the labor unions giving 99% to Democrats, and then the Business Roundtable turns around and says they're neutral?" says one top GOP strategist. "If they're neutral, then they should pack up their belongings and move out of town. Washington is a partisan town."

Republicans say they are drawing up a list of corporations that will be warned to shape up or ship out of the GOP decisionmaking circle. Those in the GOP doghouse include Anheuser-Busch Cos., which isn't a member of the Business Roundtable, but which, along with its PAC, gave \$442,057 to the Democrats while giving \$395,700 to the Republicans; and UAL Corp.'s United Airlines, which, along with its PAC, gave \$265,007 to Democrats and \$148,145 to Republicans.

While clearly concerned, corporate CEOs are also annoyed. "Quite frankly, I'm puzzled by this entire situation," the Business Roundtable's Mr. Fites says in his letter to fellow top dogs. "It is counterproductive to the large number of mutual goals that the roundtable shares with the Republican congressional leadership. I'm also concerned that these unfounded attacks could drive a wedge between roundtable members and congressional Republicans that will not serve either side well."

GOP PRESSURES BUSINESS GROUP TO DUMP
THEIR DEM LOBBYISTS

(By Amy Keller)

Republican leaders are calling it "behavior modification." One source described the plan as "shooting elephants."

Either way, the Congressional GOP is turning up the heat on one of its key allies: the Business Roundtable.

Still angry that big business failed to adequately bankroll their campaigns and counter the AFL-CIO's onslaught of attack ads last fall, the Republicans want the BRT to purge Democrats from its staff of nine directors.

"You have to fix the problem. You have to fix the Business Roundtable," one Republican source said, explaining that the GOP leadership is urging the prestigious organization of corporate bigwigs to purge its staff.

The lawmakers are also urging the CEOs of some 200 corporations that comprise the BRT to dump their Democratic lobbyists, hire Republicans, and significantly increase the percentage of PAC contributions that go to GOP candidates.

Outgoing Republican National Committee Chairman Haley Barbour has been scolding corporate America for weeks for "not [lifting] a finger in that battle" against labor and other liberal groups, and on Jan. 9, Republican lawmakers hosted a dinner meeting with two dozen BRT Members to begin the "process of behavior modification," sources told Roll Call.

The CEO summit was run by top GOP leaders, including Senate Majority Leader Trent Lott (Miss), Republic Conference Chairman John Boehner (Ohio), and others. The BRT selected 24 CEOs—"friends of the Republican side," like Caterpillar Inc. CEO Donald Fites and BRT chairman and Allied Signal Inc. CEO Lawrence Bossidy—to attend the closed-door meeting.

One top GOP leadership aid described the CEO summit as a "good conversation," and said both sides walked out "with a better understanding" and a "commitment" to work together.

But other Republican sources say the business group remains under intense scrutiny. One sore spot, sources said, is BRT president Sam Maury, whom Republicans are attacking as a Democratic operative.

As one senior GOP staffer put it: "We don't feel Sam Maury fits our definition of" someone who would "work well on the Republican team."

Maury is a lawyer and former US Steel executive who joined the BRT in 1982, becoming its number-two man the following year and moving up to executive director of the entire organization in 1993.

Maury did not return calls seeking comment, and a spokeswoman for the BRT also declined to comment on the matter.

But Maury's not the only one who should be sent packing, Republicans say.

It's the view of GOP House and Senate leaders that the CEOs of America's big companies have delegated too much decision-making authority to Washington operatives with Democratic loyalties. According to the GOP leadership, corporations that want to maintain their ties with GOP leaders, and be players in policy debates, need to hire Republican lobbyists. One aide said the leaders are encouraging businesses to call them if they need help in this move—and that they'll be happy to make hiring "suggestions."

It's their choice if they want to be part of our team," he added.

Other incidents have also soured the GOP's relationship with the BRT, Republicans say. For example, lawmakers are still sore over the way the BRT handled an ad campaign promoting the GOP budget in 1995.

The BRT's \$10 million ad campaign, which funded the commercials on MTV and other networks to build public support for the budget reconciliation bill, was viewed by Republicans as "tepid" at best, and GOP sources said they have reason to believe that Maury was coordinating the campaign with the White House.

Johanna Schneider, spokeswoman for the BRT, defended her organization's reputation.

The BRT was founded in 1972 by CEOs who were "committed to improving public policy," and that's the role of the BRT, not funding campaigns, she told Roll Call.

The BRT "does not have a PAC," she said, and therefore does not contribute to campaigns. And, she said, individual companies that have PACs make those decisions on an individual basis.

"I think we've been successful in adding to the public dialogue," said Schneider. But Schneider insists that the BRT doesn't, and won't have anything to do with funding campaigns.

So why are they being targeted?

The behemoth corporations are, in some ways, easier to go after. As one GOP supporter pointed out: "It's much easier to go out and shoot elephants than to shoot ants."

If the Republicans can get the BRT to change its ways the payoff could be big. Just as Willie Sutton robbed banks because "that's where the money is," the GOP Congressional leaders realize that BRT members could handily boost Republican election efforts if the BRT would agree to fund issue-advocacy campaigns in future elections.

And while no one expects to see 100 percent, or even 90 percent, of corporate PAC money go exclusively to Republicans—60 or 70 percent would be nice, they say.

While some in the business community say they are angered by the GOP's tactics, others are downplaying the tongue-lashing.

Said one corporate source: "They wanted businesses to stop and review what they did in light of what labor did * * *. Just a reminder that things have changed. A reminder to take a look. . . take a good look at what you did. Look at it collectively, and look at what other people on the other side of the issues did."

Steve Stockmeyer, spokesman for the National Association of Business PAC, wasn't at the recent meeting of CEOs and Congressional leaders, but he told Roll Call that he has sympathies on both sides.

"The Republican leadership is wise to seek out allies and ask them to be more consistent allies," said Stockmeyer, though he did say that the GOP approach has been rather "hamhanded."

"Republicans haven't had 40 years to learn how to be subtle," Stockmeyer said. He also noted that it would be native for Republicans to expect the business community to consistently support Republicans, though he admitted businesses should do more.

"It will never be monolithic to the degree that labor was * * *. Business is too pragmatic," he observed.

As for the push to hire Republican lobbyists, Wright Andrews, the former president of the American League of Lobbyists, told Roll Call that he believes it is "wrong, wrong, wrong for either Democrats or Republicans to say, 'We only want to work with our former staffers.'"

"It's not their job to decide," he said.

As Republicans strive to become a permanent majority on Capitol Hill, many say they expect an influx of GOP lobbyists to be a natural progression. They simply hope that the increased pressure will "speed up the process" of that turnover, one source said.

Still, another source with solid GOP connections expressed reservations about just how far Republican lawmakers can push their argument.

"You don't start a game of this nature if you don't have a game plan that takes you to the end of the game," he said, remarking that GOP leaders must remember that in the end, they need corporate America as much as it needs them.

Mr. LEVIN. Mr. President, I could not agree more with something Senator DASCHLE said earlier today, when

he urged us to enact campaign finance reform within the first 100 days of this Congress. The public is looking at us with greater scrutiny in this area than they have ever looked before. We have been down this road before, and I have walked down this road with colleagues, often on a bipartisan basis.

The likelihood is we cannot get anything done in this area unless we act on a bipartisan basis. But act we must. That is what the public is telling us, and I believe the mood they are in will hold us accountable if we fail that charge.

I thank the Chair and yield the floor.

By Mr. DASCHLE (for himself, Mr. KENNEDY, Ms. MOSELEY-BRAUN, Ms. MIKULSKI, Mr. DODD, Mr. REID, Mr. DORGAN, Mrs. MURRAY, Mr. FORD, Mr. ROCKEFELLER, Mr. INOUE, Mr. KERRY, Mr. LEVIN, Mr. CLELAND, Mr. JOHNSON, Mr. BREAU, Mr. TORRICELLI, Mr. DURBIN, Mr. GLENN, Mrs. BOXER, Mr. WELLSTONE, and Mr. BRYAN):

S. 12. A bill to improve education for the 21st century; to the Committee on Finance.

EDUCATION FOR THE 21ST CENTURY ACT

Mr. KENNEDY. Mr. President, I give my strong support to the "Education for the 21st Century Act" introduced today by Senator DASCHLE on one of our principle democratic leadership initiatives.

Education must continue to be a top priority in this Congress. We need to do more to make college accessible and affordable for all students, to modernize school classrooms, to help communities build new school facilities and repair old ones, and to help all children learn to read so that they can read to learn.

It is not enough to maintain current spending levels for education. Modest increases are essential to meet rising enrollments and inflation.

Too often, college is priced out of reach for many families. From 1980 to 1990, the cost of college rose by 126 percent, while family income increased by only 73 percent. To meet that rising cost, students are going deeper and deeper into debt. In the 1990s, students have borrowed more in student loans than in the three preceding decades combined.

In 1996 alone, students borrowed \$30 billion—a 65-percent increase since 1993. Since 1988, borrowing in the Federal student loan program has increased by more than 100 percent, while starting salaries for college graduates failed to increase at all. Eighty percent of young adults with student loans make under \$20,000 in their first year of repayment, barely enough to support the average repayment.

Communities are struggling to repair decrepit facilities, let alone build modern classrooms. Fourteen million children in a third of the Nation's schools are learning in sub-standard class-

rooms. Half the schools have unsatisfactory conditions. Forty-six percent of schools report insufficient electrical wiring for computers and communications equipment. The repair bill alone is estimated at \$112 billion.

And while all this is happening, enrollments are at an all-time high of 52 million students, and thus are continuing to rise.

Forty percent of all children are now reading below their basic grade level. Many parents do not read to their children and with their children, even though we know that when parent involvement is high, student reading scores are also high.

Technology is a powerful tool for improving schools and encouraging economic growth. Computers enable teachers to spend more time with students and teach more effective lessons. By the year 2000, 60 percent of all jobs in the Nation will require skills in computer and network use. According to a recent GAO study, one in every four schools does not have sufficient computers to meet its needs. Only 9 percent of classrooms are connected to the Internet.

Clearly, we are not prepared to meet the challenges of the next century. We have to do better, and the Education for the 21st Century Act will help us to meet the pressing needs of communities, schools, and families.

The Act includes four separate titles: The Higher Education Affordability Act, which includes President Clinton's \$1,500 Hope Tuition Tax Credit, the \$10,000 tuition tax deduction, and the restoration of the tax deduction for student loan interest; The Educational Facilities Improvement Act; The America Reads Challenge Act, which includes The Parents as First Teachers Act and The Challenging America's Young Readers Act; and The Investing in Technology in the Classroom Act.

The Hope Tax Credit will make at least 2 years of community college affordable for every student. The bill provides a \$1,500 a year refundable tax credit for net tuition payments during the first 2 years of college after high school for full-time students. Part-time students may receive \$750 per year. The tax benefit is phased out for single persons between \$50,000 and \$70,000 in adjusted gross income, and phased out for couples between \$80,000 and \$100,000. Only students who have a cumulative "B" average from high school, or its equivalent, qualify for the credit. Pell grants and the tax credit are additive, up to the value of the net tuition paid.

The \$10,000 tax deduction will be available to all families with incomes below \$100,000. The bill provides an above-the-line deduction of up to \$10,000 per taxpayer per year for net tuition expenses. The deduction is available for all college and graduate schools, and the income limits are the same as those provided under the Hope Tax Credit.

The bill also restores the deduction for interest on student loans that was

available before the Tax Reform Act of 1986. Unlike the previous deduction, this bill provides an above-the-line deduction. The income limits are the same as those provided under the Hope Tax Credit.

The Educational Facilities Improvement Act instructs the Federal Government to pay up to 50 percent of the interest costs on State and local bonds to finance school repair, renovation, modernization and construction. Twenty percent of the funds will go directly from the Secretary of Education to the 100 poorest school districts under a formula based on the number of poor children. The remainder of the funds will be awarded to States to provide assistance to State or local bond authorities.

The America Reads Challenge Act includes two components: The Parents as First Teachers Act and the Challenge America's Young Readers Act. The Parents as First Teachers Act—recognizing that parents are the best first teachers—will support national and regional parent networks that disseminate information on helping parents help their children to read. It will also fund programs to expand successful programs and activities that help parents increase the reading skills of their children.

The Challenging America's Young Readers Act will help State and local organizations help children learn to read by the third grade. Programs funded by this act will provide 30,000 reading specialists and volunteer coordinators to run tutoring assistance programs outside regular school hours to more than 3 million children.

My hope is that these proposals will receive the bipartisan support they deserve, so they can be in place for the beginning of the next academic year this fall. Improving education or opportunities for education is clearly one of our highest national priorities. Few things which this Congress does will matter more to the country's future. Investing in education is investing in a stronger America here at home and around the world, and I look forward to working with my colleagues on both sides of the aisle to enact these important measures.

Mr. BREAU. Mr. President, I would like to make a few remarks about S. 12, the Education for the 21st Century Act, and our efforts to improve elementary and secondary educational opportunities for our Nation's children, as well as make higher education more accessible for adults.

Quality education is necessary not only for the future of our children and our families, but for the future of our Nation. A better educated workforce is essential to compete in the global economy and to maintain a strong democracy. Every Member of this body knows that a high school diploma is worth far less in today's marketplace than a generation ago. According to the U.S. Bureau of Labor Statistics, 60 percent of all jobs created between 1992 and 2005 will require education beyond

high school. Modern society has little room for those who cannot read, write, and compute effectively; solve problems; and continually learn new technologies and skills.

The Education for the 21st Century Act includes a number of important initiatives that, if enacted, will make educational opportunities more accessible for Americans: The HOPE Scholarship, the tax deduction for higher education expenses, the student loan interest deduction, and the technology literacy and America Reads initiatives. Another area of concern that S. 12 addresses is the declining physical condition of our Nation's schools.

According to a June 1996 report by the U.S. General Accounting Office, nationwide, about a third of public elementary and secondary schools have at least one building needing extensive repair, and about 60 percent need extensive repair, overhaul, or replacement of at least one major building feature. Nationwide, about 58 percent of schools have at least one unsatisfactory environmental condition (i.e., lighting, heating, ventilation, indoor air quality, acoustics for noise control, and physical security). Nationwide, 21 percent of schools need to spend over the national average (\$1.7 million) to bring their facilities into "good condition."

Although a national problem, it is mirrored in every State. In my own State of Louisiana, about 38 percent of public elementary and secondary schools have at least one building needing extensive repair. Fifty-six percent of Louisiana schools have at least one unsatisfactory environmental condition. Twenty-three percent of Louisiana schools need to spend over the national average to bring their facilities into "good condition." Sixty-five percent of Louisiana schools lack telephone lines for computer modems.

It is important that we help schools, libraries, and local governments bring advanced telecommunications to millions who otherwise cannot participate in the new information age. Computer services like the Internet give young people in the most poor and remote communities access to the same information available in the best libraries and institutions in the country and the world. Unfortunately, many States and local governments have had to cut back on investment in education because of budget problems and limits on debt capacity.

Some have argued that the proper role of Government is to try to solve everyone's problems from cradle to grave—to create programs to protect citizens from everything, even themselves, because, as they say, "Government knows best." Others argue that Government has no role at all in helping people, other than getting out of the way and offer only a survival of the fittest solution. My colleagues let me suggest that the better role for Government to play is one that equips the American people with the means to solve their own problems.

Some want to abandon the public schools, not make them better—as if removing the most motivated students and parents will somehow increase the drive to improve schools for everyone else. Others say education reform is a question of more resources and better management. Still others say an education system for the 21st century should be defined by its results and schools exist only if they attract students and satisfy parents; they serve everyone; and they operate on the premise that all students can succeed.

Whatever your point of view, the task of making education work falls to all of us. If we have learned anything over the past decades, it is there is no quick fix. This proposal will not transform our schools overnight. However, over time, it will be a meaningful step toward improving the lives and futures of families in Louisiana and throughout this Nation. I believe we should explore, and I am exploring, other ideas and options to help State and local governments address their infrastructure needs.

Mr. President, I hope my colleagues will favorably consider this legislation. As we move through the 105th Congress and consider all of the various proposals to produce a balanced federal budget, we must be mindful that our intent is to provide, not deny, American families the means and the opportunity to take part in our global economy.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 12

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Education for the 21st Century Act".

SEC. 2. FINDINGS.

Congress finds as follows:

(1) Quality public education is necessary not only for the future of our children and our families, but for the future of America. A better educated citizenry and workforce are essential to compete in the global economy and to maintain a strong democracy.

(2) The investment America makes today in the education of its people will determine the future of the Nation. In order to promote growth and prosperity in our economy, and ensure individual opportunity, America must maintain education as a national priority.

(3) Strong leadership in education is needed more than ever. Schools are facing the challenge of educating more highly skilled workers to meet the demands of a modern economy. The Bureau of Labor Statistics estimates that 60 percent of all jobs created between 1992 and 2005 will require more than a high school education.

(4) Mounting evidence suggests that far more rigorous levels of academic achievement will be required to equip American students for the 21st century workplace. Employers will demand increasingly sophisticated levels of literacy, communication, mathematical, and technological skills. Sixty percent of all jobs will require computer skills.

(5) Literacy is a crucial element of academic success. However, in 1994, 40 percent of 4th grade students failed to attain the basic level of reading on the National Assessment of Educational Progress. Seventy percent did not attain the proficient level. Students who are not reading at grade-level are very unlikely to graduate from high school. One-on-one tutoring is a key component of bringing students up to reading grade-level.

(6) Students are learning in decrepit school buildings. According to 2 recent Government Accounting Office reports, 14,000,000 children in a third of the Nation's schools are learning in substandard classrooms. Half of the schools have at least 1 unsatisfactory environmental condition, such as poor air quality.

(7) College costs are rising. College tuition has risen in private colleges and universities and in State institutions as State appropriations have eroded. From 1985 to 1994, the average cost of attending college rose by 30 percent after adjusting for inflation. During the same period, the median income increased by only 1 percent.

(8) Meeting the challenge of the next century will require the involvement of all Americans, including public officials, educators, parents, business and community leaders, and students. Encouraging active participation by all segments of communities is essential for the success of students in the 21st century.

TITLE I—TAX INCENTIVES FOR HIGHER EDUCATION

TITLE II—EDUCATIONAL FACILITIES IMPROVEMENT

SEC. 201. SHORT TITLE.

This title may be cited as the “Educational Facilities Improvement Act”.

SEC. 202. PROVISION OF ASSISTANCE FOR CONSTRUCTION AND RENOVATION OF EDUCATIONAL FACILITIES.

Title XII of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 8501 et seq.) is amended—

(1) by repealing sections 12002 and 12003;

(2) by redesignating sections 12001 and 12004 through 12013, as sections 12101 and 12102 through 12111, respectively;

(3) by inserting after the title heading the following:

“SEC. 12001. FINDINGS.

“The Congress finds the following:

“(1) The General Accounting Office performed a comprehensive survey of the Nation’s public elementary and secondary school facilities, and found severe levels of disrepair in all areas of the United States.

“(2) The General Accounting Office concluded more than 14,000,000 children attend schools in need of extensive repair or replacement. Seven million children attend schools with life safety code violations. Twelve million children attend schools with leaky roofs.

“(3) The General Accounting Office found the problem of crumbling schools transcends demographic and geographic boundaries. At 38 percent of urban schools, 30 percent of rural schools, and 29 percent of suburban schools, at least 1 building is in need of extensive repair or should be completely replaced.

“(4) The condition of school facilities has a direct affect on the safety of students and teachers, and on the ability of students to learn.

“(5) Academic research has proven a direct correlation between the condition of school facilities and student achievement. At Georgetown University, researchers found students assigned to schools in poor condition can be expected to fall 10.9 percentage points below those in buildings in excellent condition. Similar studies have demonstrated up to a 20 percent improvement in test scores when students were moved from a poor facility to a new facility.

“(6) The General Accounting Office found most schools are not prepared to incorporate modern technology into the classroom. Forty-six percent of schools lack adequate electrical wiring to support the full-scale use of technology. More than a third of schools lack the requisite electrical power. Fifty-six percent of schools have insufficient phone lines for modems.

“(7) The Department of Education reported that elementary and secondary school enrollment, already at a record high level, will continue to grow during the period between 1996 and 2000, and that in order to accommodate this growth, the United States will need to build an additional 6,000 schools over this time period.

“(8) The General Accounting Office found it will cost \$112,000,000,000 just to bring schools up to good, overall condition, not including the cost of modernizing schools so the schools can utilize 21st century technology, nor including the cost of expansion to meet record enrollment levels.

“(9) State and local financing mechanisms have proven inadequate to meet the challenges facing today’s aging school facilities. Large numbers of local educational agencies have difficulties securing financing for school facility improvement.

“(10) The Federal Government can support elementary and secondary school facilities, and can leverage additional funds for the improvement of elementary and secondary school facilities.

“SEC. 12002. PURPOSE.

“The purpose of this title is to help State and local authorities improve the quality of education at their public schools through the provision of Federal funds to enable the State and local authorities to meet the cost associated with the improvement of school facilities within their jurisdictions.

“PART A—GENERAL INFRASTRUCTURE IMPROVEMENT GRANT PROGRAM”;

TITLE III—AMERICA READS CHALLENGE

SEC. 301. FINDINGS.

Congress finds as follows:

(1) With the proper support and teaching, all children can learn to read at grade-level by the end of the 3d grade.

(2) Students who are not reading at grade-level are very unlikely to graduate from high school.

(3) Reading is a fundamental skill for learning, but in 1994, 40 percent of 4th grade students failed to attain the basic level of reading on the National Assessment of Education Progress. Seventy percent of 4th graders did not attain the proficient level of reading.

(4) Parents are the best first teachers. Parents can help to increase their children's reading levels, for example, by reading with their child 30 minutes a day. Evidence shows that greater parental support of children's literacy success makes a significant difference.

(5) One-on-one tutoring is a key component of bringing students up to reading at grade-level.

(6) Pre-school preparation and family involvement is widely recognized to improve student performance. Preparing children to learn, both through parent involvement and through pre-school preparation, plays a crucial role in preventing students from falling behind.

**TITLE IV—INVESTING IN TECHNOLOGY
FOR THE CLASSROOMS**

Subtitle A—Sense of the Senate

SEC. 401. FINDINGS.

Congress finds as follows:

(1) Technology in the schools is a central component of preparing students for the 21st century.

(2) Equipping schools with technology is no longer a luxury. It is a necessity. By the year 2000, 60 percent of all jobs in the Nation will require skills in computer and network use.

(3) Technology in the classroom improves students' mastery of basic skills, test scores, writing, and engagement in school. With these gains come decreases in dropout rates and decreases in attendance and discipline problems.

(4) Not enough students have access to computers, distance learning, and telecommunications technologies. A 1995 Government Accounting Report estimates that 10,000,000 students, and 1 school in every 4 schools, do not have sufficient computers to meet their needs.

(5) Of the 5,800,000 computers in United States schools, many are older models that do not have the power to perform advanced functions such as those involving video and the Internet.

(6) Only 9 percent of all instructional rooms including classrooms, laboratories, and library media, have connections to the Internet.

(7) The Federal Government began a new commitment to funding education technology by investing an additional \$200,000,000 in subpart 2 of part A of title III of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 6841 et seq.) in fiscal year 1997. Although such investment is an important investment, it is not sufficient to meet the technology needs of schools and school children in the 21st century.

SEC. 402. SENSE OF THE SENATE.

It is the Sense of the Senate that it is in the Nation's best interest for the Federal Government to invest at least \$1,800,000,000 in additional funding for education technology programs between fiscal years 1998 and 2002.

SEC. 424. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to carry out this subtitle \$5,000,000 for fiscal year 1998 and such sums as may be necessary for each of the 4 succeeding fiscal years.

By Mr. DASCHLE (for himself, Ms. MIKULSKI, Mr. KENNEDY, Mr. BREAUX, Mr. DODD, Mrs. MURRAY, Mr. INOUE, Mr. JOHNSON, Ms. MOSELEY-BRAUN, Mr. ROCKEFELLER, Mr. DURBIN, Mr. KERRY, and Mr. GLENN):

S. 13. A bill to provide access to health insurance coverage for uninsured children and pregnant women; to the Committee on Finance.

CHILDREN'S HEALTH COVERAGE ACT OF 1997

Mr. BREAUX. Mr. President, I rise today in support of the Children's Health Coverage Act of 1997, a bill designed to expand health insurance for an estimated 10 million American children who have no health insurance. Last year, when Congress passed the Kassebaum/Kennedy bill, it took a big step towards increasing the availability of private health insurance coverage for certain children. While the Kassebaum/Kennedy legislation will increase access to the health insurance market for many people, there are still too many low-income working families in this country who are unable to afford coverage even though it may be more readily available to them.

According to a 1994 GAO report, 14.2 percent of all children are uninsured, the highest rate in any industrialized country. In Louisiana alone there are 254,952 children without health insurance. Nine out of ten of these children live in families with working parents. These parents go to work every day to earn a living and provide for their families. Some might say that providing for one's family should include health insurance but when you've got food to buy and rent to pay, health insurance to many parents is an unaffordable luxury. Perhaps even more troubling is that the number of uninsured children is expected to grow as employers con-

tinue to cut back on dependant coverage, leaving many working parents unable to afford insurance for their families. While Medicaid has picked up some of these children and will continue to do so, these expansions won't be enough to completely offset the loss in private coverage in this country.

Mr. President, an important lesson we have learned in recent years is that big government mandates won't work. But I believe expanding coverage of children is a necessary next step to follow up on the significant progress we made last year. We should build on the momentum from Kassebaum/Kennedy bill to help low-income working families buy health insurance they need for their children. Basic primary and preventive care services that insurance provides are critical to a child's healthy development, and like all kinds of preventive care, it's cheaper than treating a child once he or she gets sick. As we all know, uninsured children are more likely to get care in an emergency room at later stages in their illness and are more likely to require an expensive hospital stay.

This bill is a market-based plan that will provide tax credits to help working families buy the health insurance they need. Our goal is to stimulate a competitive market for children's health plans which are relatively inexpensive but have a big economic payoff. I am hopeful that Democrats and Republicans will be able to work together on this issue because it's in everyone's interest that our nation's children have the health care and health insurance they need since they are the future of this country. For the future of a healthy America, we need healthy kids now.

Ms. MIKULSKI. Mr. President, I am honored to join the Senate Minority Leader in cosponsoring the Children's Health Coverage Act of 1997. This bill will help uninsured working families purchase health insurance for their children and will build on the success of last year's Kassebaum-Kennedy health care reform legislation. It makes the health of all America's children a national priority. It takes the Democratic health care agenda one more step.

Our country has failed to meet the health care needs of America's children. The United States has the highest rate of uninsured children of any industrialized country. In my home State of Maryland, nearly 1 in 5 children is uninsured. That's almost 200,000 kids in Maryland alone. This is a disgrace for a country as bountiful as ours is. We say children are our priority. We need to put in the lawbooks the values we hold in our hearts. That makes good policy and good sense.

These are the children of working families. Their parents may both be working 40-hour a week jobs. Jobs that put them over the poverty level but offer no benefits. This problem is pervasive. Nine out of ten children without insurance live in families with

working parents. Two thirds of uninsured children live in families with incomes above the poverty line. The problem cuts across class and race.

As I travel through my own State, working parents tell me how they worry about their children not having health insurance. They are afraid that they won't be able to take them to the doctor when they get really sick. With this bill, American parents won't have to fear for their children. This legislation meets the peace of mind test.

I want to make sure children's health care needs are met comprehensively and equitably. This bill stands up and challenges what is wrong with our health care system. It affirms our need to develop human capital as well as economic capital. It's about getting our priorities straight and putting families first. I salute the Minority Leader for moving this important issue forward.

Ms. MOSELEY-BRAUN. Mr. President, I rise today to offer my support as an original cosponsor of the Children's Health Coverage Act of 1997—S. 13. Vice President Hubert Humphrey may have summed it up best when he concluded that "the moral test of government is how that government treats those who are in the dawn of life, the children; those who are in the twilight of life, the elderly; and those who are in the shadows of life—the sick, the needy, and the handicapped."

Well, Mr. President, the Children's Health Coverage Act is our test for the 105th Congress and how this Congress will respond to the need to care for our children, who are in the dawn of their life; 10.5 million children have no health insurance coverage. The GAO conclusion that children without insurance are less likely to grow up to be healthy, and productive adults may be the most telling fact. If we know the effect being uninsured has on our children's ability to contribute to society, how can we not respond?

The ultimate guarantee of our children's health would be to make comprehensive health insurance coverage more readily available either through a private or public source. In the interim however, the Children's Health Coverage Act will make a number of important steps to improve the health of our children. First, enhancing health coverage for pregnant women will make our children healthy on the front-end through enhanced prenatal care. In 1993, almost 200,000 children were born to women who received either no prenatal care or prenatal care after the first trimester of their pregnancy. Good prenatal care can reduce rates of low-weight births and infant mortality, thus preventing avoidable disabilities.

Next, the Children's Health Coverage Act will not erode existing health coverage for children. Children are losing private health insurance coverage faster than any other group. In many cases, Medicaid has been the safety-net preventing children from becoming un-

insured. S. 13 will stimulate the market for private children's health coverage and deter employers from dropping their contributions toward the coverage of their employees.

Finally, the Children's Health Coverage Act makes the next logical step from the improvements made in the Kennedy-Kassebaum health care bill, by tackling the issue of insurance affordability. The right to buy insurance that you cannot afford really is not access at all. Millions of Americans were given more flexibility by making insurance more portable and ending "job lock." However, if the ability to pay your premiums severely restricts the options, have we truly ended "job lock."

Mr. President, caring for our children is critical to the success and the survival of this nation. However, we must not be content with only meeting the physiological needs of our children. We must also adopt a holistic approach to meeting the needs of our children. A significant number of our children have special health care needs. There are also many children who have special educational, financial, and social needs.

During the "Stand for Children" rally in June of last year, five core principles were espoused that are essential to safeguarding our children. These principles are to give our children a Head start, a fair start, a safe start, a moral start, and a healthy start. These are fundamental principles that should govern our nation's agenda towards children. The Children's Health Coverage Act is a very good step toward ensuring a healthy start for our children. I hope that my colleagues can join me in supporting this important legislation.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 14. A bill to provide for retirement savings and security, and for other purposes; to the Committee on Finance.

RETIREMENT SECURITY ACT OF 1997

Mr. KENNEDY. Mr. President, today I join with the distinguished Minority Leader, Senator DASCHLE, in co-sponsoring legislation important for the future of working families in this country. One of this Congress's highest priorities should be pension reform.

The Treasury now spends \$66 billion a year in tax subsidies to encourage pension coverage, but working families are not getting full value for this money. 56 percent of the workforce is not currently covered by any private pension plan. The situation is worse for employees of small businesses. Eighty-five percent of those employed by firms with fewer than 25 workers have no pension coverage. For low-wage workers, the situation is worst of all. More than 26 million employees—80 percent—who earn under \$15,000 a year are not covered by a pension plan. Forty-one million employees who earn less than \$30,000 a year do not participate in a retirement plan—60 percent.

Women make up an excessive portion of the working population that is not covered by a pension plan. Employees covered by union agreements are nearly twice as likely to have a pension, but women are half as likely to hold these jobs. More than eight million women who work for small firms have no access to pension coverage.

Low-wage women are especially hard-hit. Sixty percent of those earning under \$15,000 a year are women. Nearly sixteen million women who earn less than \$15,000 a year are not participating in a pension plan—80 percent. Twenty-three million women earning less than \$30,000 a year don't participate in a retirement plan—nearly 60 percent.

Women are more than twice as likely as men to hold part-time jobs, with no pension coverage. Women make up more than half the workforce in industries with the lowest rates of pension coverage—such as the service and retail industries. In those industries with higher rates of access to pensions—mining, durable manufacturing, and communications—women make up just one-fourth of the workforce.

We must change these figures. I am proud to join in sponsoring the Retirement Security Act that Senator DASCHLE is introducing today to deal with these serious problems.

This bill will make real progress in expanding access to pensions for all working families. It will facilitate retirement savings by millions of Americans, by enabling workers to ask their employers to set aside savings from paychecks and deposit the savings directly into retirement accounts. This "pension checkoff" is a simple, practical step to make the private pension system more accessible to all workers. The bill will also provide tax incentives for low-wage employees to set aside money for retirement. Families

on the lower rungs of the economic ladder deserve a secure income when they retire. This bill will reform the tax laws to make them more beneficial to low-income workers. No one who works for a living should have to retire in poverty.

The bill advances other important goals as well. It strengthens the security of the pension system, so that the benefits families rely on will be there when they retire. It will stop employers from forcing employees to invest their retirement contributions in the employer's stock, against the workers' wishes. It will provide closer monitoring of pension plan terminations, to prevent companies from raiding employee pensions.

The bill also promotes pension portability. The checkoff system will allow employees to continue saving for retirement even if they change jobs or leave the labor market for a time. Wherever they go, they can take their pension plan with them. In addition, the bill makes it easier for employees to roll over their retirement accounts to a new employer's plan.

The bill will remove the most significant obstacles to pension coverage for women. It builds on the efforts of Senator MOSELEY-BRAUN and Senator BOXER in the last Congress to improve pension benefits for surviving spouses. It will also enable spouses to contribute to IRAs. The pension checkoff system will benefit millions of working women whose employers do not provide pension plans.

I commend Senator DASCHLE for the leadership he has shown in introducing this important bill. At a time when Social Security is facing tremendous budget pressure, it is essential that the private pension system be accessible and affordable to every working family. I look forward to working with colleagues on both sides of the aisle to pass this necessary legislation.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

SEC. 209. DEVELOPMENT OF ADDITIONAL REMEDIES.

(a) FINDINGS.—The Congress finds that—

(1) the provisions of this Act, like many of those proposed by the President and recently signed into law, are designed to expand retirement savings;

(2) this goal can be achieved in part by simplifying the pension system and reducing administrative costs of maintaining pension plans for all employers;

(3) such simplification can benefit not only the implementation and ongoing administration of pension plans but also the correction

of problems that arise in the operation of such plans;

(4) the Secretary of the Treasury has commendably already acted to develop programs intended to facilitate such corrections; and

(5) efficient correction serves participants and beneficiaries not only by fulfilling the law's requirements regarding pension plans but also by directing funds into plans rather than toward correction efforts and by encouraging employers to continue to sponsor support for such plans.

(b) SENSE OF CONGRESS.—It is the sense of the Congress that the Secretary of the Treasury should—

(1) review existing correction mechanisms to determine whether modifications might facilitate additional utilization by sponsors, improve voluntary compliance, and hasten the correction of pension plans,

(2) consider whether additional means of addressing nonregious violations should be explored,

(3) make whatever legislative recommendations, if any, appear necessary to fulfill these goals, and

(4) remain cognizant that the Congress, as well as the Secretary, considers the continuing security of retirement savings for workers, retirees, and beneficiaries of fundamental importance.

S. 15. A bill to control youth violence, crime, and drug abuse, and for other purposes; to the Committee on the Judiciary.

THE YOUTH VIOLENCE, CRIME AND DRUG ABUSE CONTROL ACT OF 1997

Mr. BIDEN. Mr. President, today I rise to introduce—along with Senator DASCHLE, Senator LEAHY, and many other Senators—legislation which will be a key cornerstone of the Senate Democrats anti-crime, anti-drug focus for the new Congress.

Our thrust is clear and straight-forward:

We must continue the successes of the 1994 Biden crime law.

And, at the same time, we must take up the new challenge of confronting crime and drug abuse among our youth with a commonsense strategy balancing tough sanctions, certain punishment and protecting literally millions of kids from the criminals and drug pushers who can target any kid from any family whose parents are at work when the school day ends.

We must continue the success of the 1994 crime law.

While I give the credit first and foremost to the police officers on our Nation's streets, the verdict from the FBI's national crime statistics is that since the 1994 crime law, violent crime is down and down significantly:

1996 is projected to have the lowest murder toll since 1988—and a murder rate that is lowest since 1971;

1996 is projected to have the lowest violent crime total since 1990; and

the murder rate for wives, ex-wives and girlfriends at the hands of their "intimates" fell to an 18-year low in 1994—and is lower still in 1995.

This is a record of success which should convince the Senate to extend the 1994 crime law.

Adding 25,000 more police by extending the 100,000 cops program for two more years.

Extending the Violence Against Women Act funding to shelter 400,000 more battered women and their children and continuing to help States arrest and prosecute batterers. Providing an additional \$5 billion to build up to 80,000 more prison cells for violent criminals—we also propose to give States greater flexibility with these dollars to speed the prosecution of violent criminals and increase the use of drug testing. Provide \$1 billion to extend such proven law enforcement programs as the Byrne anti-drug grants to State and local law enforcement. And, extend the crime law trust fund to fund all these initiatives from the cost-savings from downsizing the Federal Government—without increasing the Federal budget deficit.

The bottom line—this bill calls on the full Senate to continue the successes of the 1994 Biden crime law.

But, this legislation does not stop there. In the face of rising teen drug abuse and rising youth violence—despite some recent hopeful news—we must undertake a comprehensive effort to target these problems. This legislation offers just such a comprehensive effort:

First, we propose to reform the juvenile justice system to crack down on violent youth by:

Making some key changes to Federal law that respond to legitimate concerns which create the pressure to take the unwise step of prosecuting kids in our overburdened adult courts. Specifically, providing greater access to juveniles records and raising the mandatory release age for juveniles from 21 to 26—so juveniles will face up to 11 years

in prison even if they are prosecuted as juveniles.

Providing \$1 billion to help States build prisons for violent juveniles as well as additional prosecutors and other improvements to State juvenile justice systems (including certain, graduated punishment for first-time and minor juvenile offenders).

Creating special juvenile "gun" courts where juvenile gun offenders are tried and sentenced on an expedited basis.

These are essential to controlling juvenile crime because, as every mother knows, immediate and certain punishment is the key to disciplining kids.

Second, we must target one of the primary sources of youth violence—street gangs.

We propose aggressive steps to:

Target gang paraphernalia by boosting the penalties for criminals who arm themselves with bullet-proof body armor and deadly accurate laser-sighting devices. And, as Senator LEAHY has identified, we must make some commonsense reforms to speed law enforcement access to the numeric pagers so often used by youth gang criminals.

Create a new crime of interstate franchise spread of street gangs—a step which better targets Federal law enforcement resources than simply federalizing ever more State crimes and encroaching upon the State's traditional handling of juvenile crime.

Cracking down on street gangs also means that we should increase the penalties for witness intimidation, a favored tactic of criminal street gangs. This is a proposal outlined by the President just this weekend.

Third, we must redouble our efforts to treat and prevent youth drug abuse.

For the past several months, you have heard me modify one of the key arguments of the President's 1992 campaign by stating—"it's drugs, stupid, it's drugs."

This statement is—unfortunately—necessary in the face of rising drug abuse among our children. While drug abuse among adults is holding steady, all the surveys tell us that more and more children are falling prey to drugs.

We propose a multi-prong response, because drugs need to be fought not only in our communities, but also in our scientific laboratories where important breakthroughs are being made into medicines to treat drug addiction—we propose additional funding for the Federal Medications Development Program and to provide incentives to the private sector to develop new medicines to treat heroin and cocaine addiction.

We must also expand drug courts to cover 50,000 children—a vast improvement on the no drug testing, no treatment, and no threat of punishment system which typifies too many juvenile courts today.

As I proposed last year, we must tighten controls on the club drug—ketamine—that is popular with too many children today.

Funding drug treatment for 600,000 drug-addicted children is also key—particularly as our Nation stands on the edge of a baby-boomerang wave that will mean more teenagers—and more teen addicts.

Reauthorizing the drug director's office as well as the Safe & Drug-Free Schools Program which is the core of Federal drug prevention efforts are two other necessary steps.

In addition, and in response to the recent passage of so-called medical marijuana initiatives, we seek a measure which should be supported even by their proponents—a simple study to determine if drug abuse among children rises in these two States.

Fourth, we call for a renewed effort to prevent youth violence.

No where has the crime policy debate been subject to more distortions and misunderstandings than on a goal all of us should share—let's prevent kids from getting involved in crime, violence and drugs in the first place.

To get past all the misunderstanding, we propose to call upon the prestigious, non-partisan National Academy of Sciences to answer the questions—can we prevent youth crime? And, if so, how do we do so in the most efficient way possible?

Let me repeat a challenge I offered last week—I will live by the results of this study, if those who oppose prevention efforts will as well. If the national academy says we can't figure out this task, so be it, I will not seek appropriations for any funds we authorize through this legislation. But, if the national academy of sciences says that we can, I challenge all to support full funding for these crime prevention efforts.

But, in the meantime, it seems to me that we do know at least one thing about preventing youth crime and drug abuse—my mom summarized what we know in the simple phrase used by mothers everywhere: "Idle hands are the devil's workshop."

This refers to the commonsense notion that if we can just get kids off the streets and into supervised programs during the after school hours when kids are likely to be the victims of gangs and criminals or the customers of drug pushers—if we can just do that simply thing, with boys and girls clubs or many other proven efforts, we can make important in-roads against drug abuse and crime among children.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

SEC. 215. CERTAIN PUNISHMENT AND GRADUATED SANCTIONS FOR YOUTH OFFENDERS.

(a) FINDINGS AND PURPOSES.—

(1) FINDINGS.—Congress finds that—

(A) youth violence constitutes a growing threat to the national welfare requiring immediate and comprehensive action by the Federal Government to reduce and prevent youth violence;

(B) the behavior of youth who become violent offenders often follow a progression, beginning with aggressive behavior in school, truancy, and vandalism, leading to property crimes and then serious violent offenses;

(C) the juvenile justice systems in most States are ill-equipped to provide meaningful sanctions to minor, nonviolent offenders because most of their resources are dedicated to dealing with more serious offenders;

(D) in most States, some youth commit multiple, nonviolent offenses without facing any significant criminal sanction;

(E) the failure to provide meaningful criminal sanctions for first time, nonviolent offenders sends the false message to youth that they can engage in antisocial behavior without suffering any negative consequences and that society is unwilling or unable to restrain that behavior;

(F) studies demonstrate that interventions during the early stages of a criminal career can halt the progression to more serious, violent behavior; and

(G) juvenile courts need access to a range of sentencing options so that at least some level of sanction is imposed on all youth offenders, including status offenders, and the severity of the sanctions increase along with the seriousness of the offense.

(2) PURPOSES.—The purposes of this section are to provide assistance to State and local juvenile courts to expand the range of sentencing options for first time, nonviolent offenders and to provide a selection of graduated sanctions for more serious offenses.

(b) DEFINITIONS.—In this section—

(1) the term "first time offender" means a juvenile against whom formal charges have not previously been filed in any Federal or State judicial proceeding;

(2) the term "nonviolent offender" means a juvenile who is charged with an offense that does not involve the use of force against the person of another; and

(3) the term "status offender" means a juvenile who is charged with an offense that would not be criminal if committed by an adult (other than an offense that constitutes a violation of a valid court order or a violation of section 922(x) of title 18, United States Code (or similar State law)).

(c) GRANT AUTHORIZATION.—

(1) IN GENERAL.—The Attorney General may make grants in accordance with this section to States, State courts, local courts, units of local government, and Indian tribes, for the purposes of—

(A) providing juvenile courts with a range of sentencing options such that first time juvenile offenders, including status offenders such as truants, vandals, and juveniles in violation of State or local curfew laws, face at least some level of punishment as a result of their initial contact with the juvenile justice system; and

(B) increasing the sentencing options available to juvenile court judges so that juvenile offenders receive increasingly severe sanctions—

(i) as the seriousness of their unlawful conduct increases; and

(ii) for each additional offense.

(c) APPLICATIONS.—

(1) ELIGIBILITY.—In order to be eligible to receive a grant under this section, the chief executive of a State, unit of local government, or Indian tribe, or the chief judge of a local court, shall submit an application to the Attorney General in such form and containing such information as the Attorney General may reasonably require.

Mr. LEAHY. Mr. President, I am pleased to join with Senator DASCHLE and other Democratic Senators in introducing S. 15, the Youth Violence, Crime and Drug Abuse Control Act.

Unfortunately, we need to look no further than today's headlines to see how badly we need this legislation. Over the past week, the chilling story has unfolded about Darryl Hall, a 12-year-old boy violently abducted on his way home from school in our Nation's Capital and then found dead and frozen

with a gunshot to the back of his head. Three youths have been arrested, and the police suspect this heinous crime was the work of a gang. We must put a stop to the brutality of children killing children.

We all want to protect the children of this country from becoming victims of crime, from joining gangs, and from becoming drug addicts. This is not a partisan issue. Gang members do not ask their new recruits whether they are Republican or Democrat. Criminals do not ask before they strike whether their victim is Republican or Democrat. We in Congress need to make every effort to work together to get a handle on this problem.

The Democratic crime initiative we are introducing today builds on and continues the proven elements of the 1994 crime bill and takes the next steps to confront the problems of youth crime, drug abuse and gang violence. Our bill targets youthful offenders for certain punishment when they commit violent acts and offers helpful treatment when they need it. Although the number of juveniles arrested for violent crimes dipped in 1995, these numbers remain at unacceptable levels: sixty-four percent more juveniles were arrested for violent crimes in 1995 than in 1987.

Concern about the spread of gangs—the violence, the drug dealing and other criminal activity that gangs leave in their wake—has spread from our large cities to rural American towns. Indeed, one of the major factors responsible for the increases in juvenile crime over the past decade is the growth of criminal street gangs across this country. Although places such as Los Angeles or New York City first spring to mind when the word “gang” is mentioned, gangs are spreading across State boundaries and are problems today in many rural areas, as well as in urban centers.

In my days as a prosecutor, gangs were unheard of in Vermont. Unfortunately, this is no longer the case. Just last month, the Vermont Corrections Commissioner reported significant increases in gang activity occurring in Vermont's prisons. There are also reports that franchises of the “los solidos” gang have set up shop in Rutland, and the “la familia” gang has moved into St. Johnsbury.

Gangs violate the law, corrupt our youth, and disturb the tranquility of our streets. They are a problem we all now face, and they are a driving force in the crime wave which this Congress and the Federal Government must address, in partnership with our States and communities and with law enforcement authorities at all levels.

What do we propose to do about it? First, we hope to work constructively with our colleagues from the other side of the aisle to deal with the problems of gangs and youth violence. We were able to do that in 1994. Senator BIDEN, who was then chairman of the Senate Judiciary Committee, worked tire-

lessly to ensure passage of the 1994 crime law. The Democratic youth violence bill we introduce today has been crafted under the leadership of Senator DASCHLE and reflects the contributions of Senators BIDEN, KOHL, FEINSTEIN, KENNEDY, and others.

This Democratic leadership bill builds on the successes of the 1994 crime law, which is putting 100,000 cops on our Nation's streets and increased prevention and intervention efforts to keep children safe from crime and drugs. Specifically, our bill will:

Expand the community oriented policing [cops] program to put 25,000 more cops on the beat;

Continue the Violence Against Women Act by providing \$600 million to prosecute batterers, shelter 400,000 battered women and their children and continue the national domestic violence hotline; and

Provide \$5 billion to build prisons so that States requiring serious violent offenders to serve at least 85 percent of their sentences will be better able to house criminals.

The Democratic crime bill also looks to the future with new laws and programs to crack down on violent youth and gang violence. These measures target the use of “gang paraphernalia”, the spread of gang “franchises”, the intimidation of witnesses, and reform of the juvenile justice system, with more protection for the victims of juvenile crime.

Specifically, our bill would increase the penalties for illegally using “gang paraphernalia” such as body armor and laser sighting devices. Police officers use kevlar vests to protect their lives and hence our public safety. When criminals use kevlar vests, they do so to ensure their escape and enjoy the fruits of their crime. Under this bill, they would get more time when they are caught using such body armor in the commission of a crime.

The bill also makes it easier for law enforcement to use clone beepers to investigate gang activity. Beepers are how gang members and drug dealers keep in touch with each other. One tool law enforcement uses to investigate these criminals is a “clone beeper”, which displays the same numbers displayed on the beepers of targeted criminals. This bill will permit law enforcement to get a clone beeper with the same kind of court order they already use to get information on the numbers dialed to or from a telephone. This is not to be confused with wiretap order to eavesdrop on what people say; clone beepers only give information on the numbers displayed on the beeper. The bill will speed up the process for law enforcement to get “clone beepers.”

Our bill would double the penalty for using physical violence or threatening physical violence against witnesses, victims or informants. Nothing undermines our system of justice more than scaring people away from providing information that helps the police, pros-

ecutors, judges and juries from finding the truth.

The bill would create a new federal crime for expanding gangs across State borders and increase penalties for using firearms to commit drug trafficking crimes and crimes of violence.

We also propose several needed changes in the juvenile justice system to respond to the need to crack down on violent youth with the full force of the law. This means increasing the incarceration periods for juvenile offenders so that they may be incarcerated until the age of 26 instead of mandatory release at the age of 21, streamlining procedures for prosecuting violent juveniles as adults, and building more prisons to incarcerate juvenile offenders. In addition, our bill creates new juvenile gun and drug courts to speed prosecution and sentencing for drug abuse and weapons violations.

The bill also improves the rights of victims of violent juvenile crime. Whether the perpetrator of a violent crime is an adult or a juvenile, the victim should have the opportunity to speak to the sentencing judge and be entitled to restitution.

Drugs have had a devastating affect on our society. It is clear that no solution to the juvenile crime problem will work if it does not address the role that drug abuse and drug trafficking play in creating unsafe environments for our children. For this reason, the Democratic crime bill includes measures to prevent and treat youth drug addiction. These measures include:

Providing \$200 million investment in research and development of medicines to treat heroin and cocaine addiction; and

Extending the drug courts program to force more than 500,000 adult and juvenile drug offenders to engage in a rigorous drug testing and drug treatment—or face certain imprisonment.

We also protect children from becoming the victims of crime, with programs that would keep children like Darryl Hall in safer environments. These measures include:

Extending the Safe and Drug Free Schools Program; and

Creating after-school “safe havens” where children are protected from drugs, gangs and crime in supervised and productive environments.

In Vermont, we have a very successful program called “Kids 'N Kops” that brings school-age children and our law enforcement officers together in a fun and constructive way. Last spring, the attorney general attended an annual event in Vermont celebrating this program and urged that the program be replicated elsewhere in the country. This bill would help make that a reality.

Youth crime has many causes, and no one bill can solve them all. But that should not paralyze us from taking sensible steps, in partnership with states and communities of all sizes and in all regions of the Nation, to begin turning the tables on youth crime and

drug abuse. This bill proposes a balanced approach combining strong, targeted law enforcement measures with the prevention efforts that law enforcement officers on the front lines tell us are necessary to make a dent in the problem.

In the final stages, the 1994 crime bill was passed over vigorous partisan obstacles and objections, and crime bills often spark some of our most partisan debates. But this time, we truly have the opportunity to pass a bipartisan bill with the active support of a president who is making youth crime prevention a priority in his second term and who supports the thrust of what we are proposing in this package. We have come forward with balanced, commonsense solutions to youth crime. We should debate and refine this bill as we go along, but these are not suggestions that should divide us along party lines.

We look forward to working with the administration, our Republican colleagues and the Department of Justice—which has demonstrated its ability to move effectively in implementing anti-crime initiatives—in bringing these proposals to Congress' front burner for debate and prompt action.

Mr. BREAUX. Mr. President, I am pleased to be an original cosponsor of this Democratic leadership bill—the youth violence, crime, and drug abuse bill.

Crime ranks among the highest concerns of all Americans, no matter what their race or social background. Louisiana is no exception. In a recent poll, 86 percent of Louisianians said crime is a serious problem, ranking it as the No. 1 problem in our State. The city of New Orleans is experiencing a murder rate that is eight times higher than the national average. People want us and their local governments and State governments to do something about this problem.

The Federal Bureau of Investigation recently released statistics showing that serious and violent crime dropped nationwide in the first half of last year. It is good news, certainly, that violent crime in this country has gone down; but the bad news is that juvenile crime is on the increase. Youth crimes, particularly homicides perpetrated with guns, have skyrocketed. The average cost of incarcerating a juvenile for just 1 year is somewhere between \$23,000 and \$64,000. I strongly support this Democratic legislation because it focuses directly on juveniles, punishes violent youthful offenders, and provides more access to treatment and prevention programs.

We must continue the success of the COPS Program and put 25,000 more cops on the beat. We must create a new Federal crime targeting the interstate franchising spread of criminal street gangs and other changes aimed at gang violence, such as increasing the penalties for witness intimidation. We must extend the drug court program to force some 500,000 drug offenders to engage in rigorous drug testing and treat-

ment, or face imprisonment and, finally, we must continue to provide funds to arrest and prosecute batterers and shelter 400,000 battered women. Mr. President, this bill includes all of these provisions, and I would urge my colleagues to support it.

For the sake of generations to come, it is time that we attack crime with a renewed vigor. Today's juvenile criminal becomes tomorrow's adult criminal. We must pass this legislation.

By Mr. DASCHLE (for himself, Mr. HARKIN, Mr. JOHNSON, Mr. DORGAN, Mr. CONRAD, Mr. KERREY, Mr. BAUCUS, Mr. BINGAMAN, Mr. KOHL, Mr. FEINGOLD, Mr. LEAHY, and Mr. WELLSTONE):

TITLE II—MARKET ACCESS FOR UNITED STATES MEAT PRODUCTS

SEC. 201. SHORT TITLE.

This title may be cited as the "Meat Products Market Access Act of 1997".

Subtitle A—Identification of Countries

SEC. 211. FINDINGS; PURPOSES.

(a) FINDINGS.—Congress makes the following findings:

(1) The export of meat and meat products is of vital importance to the economy of the United States.

(2) In 1995, agriculture was the largest positive contributor to the United States merchandise trade balance with a trade surplus of \$25,800,000,000.

(3) The growth of exports of United States meat and meat products should continue to be an important factor in improving the United States merchandise trade balance.

(4) Increasing exports of meat and meat products will increase farm income in the United States, thereby protecting family farms and contributing to the economic well-being of rural communities in the United States.

(5) Although the United States efficiently produces high-quality meat and meat products, United States producers cannot realize their full export potential because many foreign countries deny fair and equitable market access to United States agricultural products.

(6) The Foreign Agricultural Service estimates that United States agricultural exports are reduced by \$4,700,000,000 annually due to unjustifiable imposition of sanitary and phytosanitary measures that deny or limit market access to United States products.

(7) The denial of fair and equitable market access for United States meat and meat products impedes the ability of United States farmers to export their products, thereby harming the economic interests of the United States.

(b) PURPOSES.—The purposes of this subtitle are—

(1) to reduce or eliminate foreign unfair trade practices and to remove constraints on fair and open trade in meat and meat products;

(2) to ensure fair and equitable market access for exports of United States meat and meat products; and

(3) to promote free and fair trade in meat and meat products.

SEC. 212. IDENTIFICATION OF COUNTRIES THAT DENY MARKET ACCESS.

(a) IDENTIFICATION REQUIRED.—Chapter 8 of title I of the Trade Act of 1974 is amended by adding at the end the following:

"SEC. 183. IDENTIFICATION OF COUNTRIES THAT DENY MARKET ACCESS FOR MEAT AND MEAT PRODUCTS.

"(a) IN GENERAL.—Not later than the date that is 30 days after the date on which the annual report is required to be submitted to Congressional committees under section 181(b), the United States Trade Representative (hereafter in this section referred to as the "Trade Representative") shall identify—

"(1) those foreign countries that—

"(A) deny fair and equitable market access to United States meat and meat products, or

"(B) apply standards for the importation of meat and meat products from the United States that are not related to public health concerns or cannot be substantiated by reliable analytical methods; and

"(2) those foreign countries identified under paragraph (1) that are determined by the Trade Representative to be priority foreign countries.

"(b) SPECIAL RULES FOR IDENTIFICATIONS.—

"(1) CRITERIA.—In identifying priority foreign countries under subsection (a)(2), the

Trade Representative shall only identify those foreign countries—

“(A) that engage in or have the most onerous or egregious acts, policies, or practices that deny fair and equitable market access to United States meat and meat products,

“(B) whose acts, policies, or practices described in subparagraph (A) have the greatest adverse impact (actual or potential) on the relevant United States products, and

“(C) that are not—

“(i) entering into good faith negotiations, or

“(ii) making significant progress in bilateral or multilateral negotiations,

to provide fair and equitable market access to United States meat and meat products.

“(2) CONSULTATION AND CONSIDERATION REQUIREMENTS.—In identifying priority foreign countries under subsection (a)(2), the Trade Representative shall—

“(A) consult with the Secretary of Agriculture and other appropriate officers of the Federal Government, and

“(B) take into account information from such sources as may be available to the Trade Representative and such information as may be submitted to the Trade Representative by interested persons, including information contained in reports submitted under section 181(b) and petitions submitted under section 302.

“(3) FACTUAL BASIS REQUIREMENT.—The Trade Representative may identify a foreign country under subsection (a)(1) only if the Trade Representative finds that there is a factual basis for the denial of fair and equitable market access as a result of the violation of international law or agreement, or the existence of barriers, referred to in subsection (d)(3).

“(4) CONSIDERATION OF HISTORICAL FACTORS.—In identifying foreign countries under paragraphs (1) and (2) of subsection (a), the Trade Representative shall take into account—

“(A) the history of meat and meat products trade relations with the foreign country, including any previous identification under subsection (a)(2), and

“(B) the history of efforts of the United States, and the response of the foreign country, to achieve fair and equitable market access for United States meat and meat products.

“(C) REVOCATIONS AND ADDITIONAL IDENTIFICATIONS.—

“(1) AUTHORITY TO ACT AT ANY TIME.—If information available to the Trade Representative indicates that such action is appropriate, the Trade Representative may at any time—

“(A) revoke the identification of any foreign country as a priority foreign country under this section, or

“(B) identify any foreign country as a priority foreign country under this section.

“(2) REVOCATION REPORTS.—The Trade Representative shall include in the semiannual report submitted to the Congress under section 309(3) a detailed explanation of the reasons for the revocation under paragraph (1) of the identification of any foreign country as a priority foreign country under this section.

“(d) FAIR AND EQUITABLE MARKET ACCESS.—For purposes of this section, a foreign country denies fair and equitable market access if the foreign country effectively denies access to a market for a product through the use of laws, procedures, practices, or regulations which—

“(1) violate provisions of international law or international agreements to which both the United States and the foreign country are parties, or

“(2) constitute discriminatory nontariff trade barriers.

“(e) PUBLICATION.—The Trade Representative shall publish in the Federal Register a list of foreign countries identified under subsection (a) and shall make such revisions to the list as may be required by reason of the action under subsection (c).

“(f) ANNUAL REPORT.—The Trade Representative shall, not later than the date by which countries are identified under subsection (a), transmit to the Committee on Ways and Means and the Committee on Agriculture of the House of Representatives and the Committee on Finance and the Committee on Agriculture, Nutrition, and Forestry of the Senate, a report on the actions taken under this section during the 12 months preceding such report, and the reasons for such actions, including a description of progress made in achieving fair and equitable market access for United States meat and meat products.”

(b) CLERICAL AMENDMENT.—The table of contents for the Trade Act of 1974 is amended by inserting after the item relating to section 182 the following:

“Sec. 183. Identification of countries that deny market access for meat and meat products.”

SEC. 213. INVESTIGATIONS.

(a) INVESTIGATION REQUIRED.—Subparagraph (A) of section 302(b)(2) of the Trade Act of 1974 (19 U.S.C. 2412(b)(2)) is amended by inserting “or 183(a)(2)” after “section 182(a)(2)” in the matter preceding clause (i).

(b) CONFORMING AMENDMENT.—Subparagraph (D) of section 302(b)(2) of such Act is amended by inserting “concerning intellectual property rights that is” after “any investigation”.

SEC. 214. AUTHORIZED ACTIONS BY UNITED STATES TRADE REPRESENTATIVE.

Section 301(c)(1) of the Trade Act of 1974 (19 U.S.C. 2411(c)(1)) is amended—

(1) by striking “or” at the end of subparagraph (C);

(2) by striking the period at the end of subparagraph (D)(iii)(II) and inserting “; or”; and

(3) by adding at the end the following:

“(E) with respect to an investigation of a country identified under section 183(a)(1), to request that the Secretary of Agriculture (who, upon receipt of such a request, shall direct the Food Safety and Inspection Service of the Department of Agriculture to review certifications for the facilities of such country that export meat and other agricultural products to the United States.”

Subtitle B—Review of Third Country Meat Directive

SEC. 221. FINDINGS.

Congress makes the following findings:

(1) The European Union's Third Country Meat Directive has been used to decertify more than 400 United States facilities exporting beef and pork products to the European Union even though United States health inspection procedures are equivalent to those provided for in the Third Country Meat Directive.

(2) An effect of the decertifications is to prohibit the importation of United States beef and pork products into the European Union.

(3) As a result of the decertifications, the highly competitive United States pork industry loses as much as \$60,000,000 each year from trade with European Union countries.

(4) In July 1987 and November 1990, at the request of affected United States industries, the United States initiated investigations under section 301 of the Trade Act of 1974 into the European Union's administration of the Third Country Meat Directive and sought resolution of the meat and pork trade problems through the dispute settlement

process established under the General Agreement on Tariffs and Trade.

(5) The United States Trade Representative preliminarily concluded on October 10, 1992, that the European Union's administration of the Third Country Meat Directive created a burden on and restricted United States commerce.

(6) Bilateral talks, initiated as a result of that finding, resulted in an Exchange of Letters in which the United States and the European Union concluded that the meat inspection systems of the United States and the European Union provided “equivalent safeguards against public health risks” and agreed to take steps to resolve remaining differences regarding meat inspection.

(7) Even though the United States terminated the section 301 investigation as a result of the Exchange of Letters, the United States determined that the practices under investigation would have been actionable if an acceptable agreement had not been reached.

(8) United States meat and pork producers have displayed consistent interest in exporting products to the European Union and have undertaken substantial investment to take the steps specified by the Exchange of Letters.

(9) The European Union has failed to acknowledge changes in plant safety and inspection procedures undertaken in the United States specifically at the European Union's request and has not fulfilled its obligation to inspect and relist United States producers who have taken the steps specified by the Exchange of Letters.

(10) The actions of the European Union in conducting United States plant inspections places the European Union in violation of commitments made in the Exchange of Letters.

(11) The European Union, in addition to being a party to the Exchange of Letters, is a signatory to GATT 1994 and to the Agreement on the Application of Sanitary and Phytosanitary Measures, which requires that meat and pork inspection procedures under Department of Agriculture regulations be treated as equivalent to inspection procedures required by the European Union under the Third Country Meat Directive.

(12) Whenever a foreign country is not satisfactorily implementing an international trade measure or agreement, the United States Trade Representative is required under section 306(b)(1) of the Trade Act of 1974 (19 U.S.C. 2416(b)(1)) to determine the actions to be taken under section 301(a) of such Act.

SEC. 223. DEFINITIONS.

SEC. 225. REQUEST FOR DISPUTE SETTLEMENT.

If the United States Trade Representative determines under section 224 that the European Union has failed to implement satisfactorily its obligations under the Exchange of Letters, the Agreement on the Application of Sanitary and Phytosanitary Measures, or any other agreement, the United States Trade Representative shall promptly request proceedings on the matter under the formal dispute settlement procedures applicable to the agreement.

SEC. 226. REVIEW OF CERTAIN MEAT FACILITIES.

(a) **REVIEW BY FOOD SAFETY AND INSPECTION SERVICE.**—If the United States Trade Representative determines pursuant to section 224 that the European Union has failed to implement satisfactorily its obligations under the Exchange of Letters, the Agreement on the Application of Sanitary and Phytosanitary Measures, or any other Agreement, the United States Trade Representative shall request the Secretary of Agriculture (who, upon receipt of the request, shall) direct the Food Safety and Inspection Service of the Department of Agriculture to review certifications for European Union facilities that import meat and other agricultural products into the United States.

SEC. 2. FINDINGS AND PURPOSES.

(a) **FINDINGS.**—Congress finds that—

(1) increasing international competition, technological advances, and structural changes in the economy of the United States present new challenges to private firms and public policymakers in creating a skilled workforce with the ability to adapt to change and progress;

(2) a substantial number of workers in the United States lose jobs due to the constantly changing world and national economies rather than cyclical downturns, with more than 2,000,000 full-time workers permanently displaced annually due to plant closures, production cutbacks, and layoffs;

(3) the current response of the Federal Government to dislocation and structural employment is a patchwork of categorical programs, with varying eligibility requirements and different sets of services and benefits;

(4) the lack of coherence among existing Federal job training programs creates administrative and regulatory obstacles that hamper the efforts of individuals who are seeking new jobs or reemployment;

(5) enacted in 1944, the Servicemen’s Readjustment Act of 1944, (commonly known as the “G.I. Bill of Rights”), helped millions of World War II veterans and, later, Korean and Vietnam War veterans, finance college educations and assisted in building the middle class of the United States;

(6) restructuring the current job training system, with respect to dislocated and disadvantaged workers, in a manner that is conceptually similar to the G.I. Bill of Rights will help millions of workers in the United States to become more competitive in today’s dynamic world economy, in which most of the workers—

(A) can expect to move to new jobs a number of times, voluntarily or by layoff; and

(B) must upgrade their skills continuously;

(7) success in this ever-changing environment depends, in part, on an individual’s effective management of the individual’s career based on personal choice and reliable information;

(8) there is insufficient job market information and assistance regarding access to job training opportunities that lead to good employment opportunities;

(9) only a small fraction of individuals eligible for current Federal job training are now served, and by removing obstacles and layers of administrative costs, more funds will be made available to individuals to enable such individuals to receive the job training of their choice; and

(10) while the Federal Government proceeds to create a new marketplace for job training, the Federal Government must also maintain a commitment to providing intensive services to assist individuals who are economically disadvantaged adults.

(b) **PURPOSES.**—The purposes of this Act are to—

(1) enhance the choices available to dislocated workers, and economically disadvantaged adults, who want to upgrade their work skills and learn new skills to compete in a changing economy;

(2) enable individuals to make choices that are best for the careers of such individuals;

(3) consolidate job training programs and provide a simple voucher system that relies on individual choice and provides high quality job market information;

(4) allow an individual to tailor job training and education to the personal needs of such individual so that such individual may remain in long-term employment yet have the means to be flexible when necessary; and

(5) create a system that provides timely and reliable information to individuals to use to assist such individuals in making the best choices with respect to the use of vouchers for job training.

By Mr. LAUTENBERG (for himself, Mr. BAUCUS, Mr. REID, Mr. MOYNIHAN, Mr. GRAHAM, Mrs. BOXER, Mr. WYDEN, Mr. LEVIN, Mr. TORRICELLI, Mr. BREAUX, and Mr. KENNEDY):

S. 18. A bill to assist the States and local governments in assessing and remediating brownfield sites and encouraging environmental cleanup programs, and for other purposes; to the Committee on Environmental and Public Works.

THE BROWNFIELDS AND ENVIRONMENTAL CLEANUP ACT OF 1997

Mr. LAUTENBERG. Madam President, today along with Senators DASCHLE, BAUCUS, MOYNIHAN, GRAHAM, HARRY REID, BOXER, WYDEN, LEVIN, TORRICELLI, SARBANES, and BREAUX, I am introducing the Brownfields and Environmental Cleanup Act of 1997. This legislation is designed to foster the cleanup of potentially thousands of toxic waste sites across this country, and just as importantly this bill is about jobs, about revenue, and economic opportunity, because it will help turn abandoned industrial sites into engines of economic development.

Madam President, I have been interested for a long time now in the issue of these abandoned, underutilized and contaminated industrial sites, commonly known as brownfields. Our Nation's great industrial tradition was the lifeblood of our Nation's economy. But this industrial tradition also entailed tremendous environmental costs. Sites were contaminated, and then when the manufacturers, the companies left, the legacy remained behind. Today, decaying industrial plants define the skyline and contaminate the land in many of our urban areas. Their rusting frames, like aging skyscrapers, are a silent reminder of those manufacturers that left, taking inner-city jobs and often inner-city hope with them.

Yet, Madam President, in these foul fields may lie the seeds of urban revitalization, and I continue to feel as I did when I introduced similar legislation in 1993 and 1996, that a brownfields cleanup program can spur significant economic development and create jobs. This type of cleanup initiative makes good environmental sense and good business sense. To appreciate, one need only look at a few of the brownfields success stories from across the States. Now, these are sites again that do not qualify as a Superfund site because they are not toxic enough, but they lie there and they contaminate not only the aesthetics of the area but also the opportunity for jobs and for business investment.

A pilot project in Cleveland resulted in \$3.2 million in private investment, a

\$1 million increase on the local tax base, and more than 170 new jobs. In Elizabeth, NJ, a former municipal landfill will be turned by the fall of 1998 into a major mall with 5,000 employees.

Madam President, the potential for job creation across the country is enormous, and every revitalized brownfields may represent for someone a field of dreams, especially to an unemployed urban worker.

While fostering jobs, brownfield cleanup also means that dangerous contaminants are removed from our environment, and the scars of decades of neglected industrial waste which disfigure our cities and suburbs and even rural areas may be finally allowed to heal. The Superfund Program provides Federal authority to assist in cleaning up abandoned waste sites that pose the most serious threats. However, there are in this country of ours 100,000 of these brownfield sites that do not fall under Superfund because of lower levels of contamination.

What do we do? We can't just watch them keep these communities from revitalizing themselves. The risks posed by many of these sites may be relatively low and others even nonexistent, because brownfields are abandoned or underutilized industrial or commercial sites where expansion or redevelopment is complicated by real or even perceived, not really factually established, environmental contamination. But their full economic use is being stymied because there is no ready mechanism for getting them evaluated or, if necessary, cleaned up, even when the owner of the property is ready, willing and eager to do so.

In addition, prospective purchasers and developers are reluctant to get involved in transactions with these properties because of their concern, however minimal, they might potentially create enormous environmental liability.

The challenge is to turn these abandoned properties into thriving businesses that can generate needed jobs and act as a catalyst for economic development.

My legislation would provide financial assistance in the form of grants to local and State governments to inventory and evaluate brownfields sites. This would enable interested parties to know what would be required to clean the site and what reuse would best suit the property.

My bill would also provide grants to State and local governments to establish and capitalize low-interest loan programs. These funds would be loaned to current owners, prospective purchasers and municipalities to facilitate voluntary cleanup actions where traditional lending mechanisms are just not available. The minimum seed money involved in the program would leverage substantial economic payoffs, as well as turning lands which may be of negative worth into assets for the future.

The bill also would limit the potential liability of innocent buyers of

these properties, and it would set a standard to gauge when parties couldn't have reasonably known that the property was contaminated. So there is no hidden liability in there. There is no sudden surprise for someone who conscientiously and innocently made an investment, and suddenly they find they are liable for far, far more than their initial investment.

Madam President, cleaning up brownfields will mean a safer environment and more jobs for places that badly need them. It will also send a message to those who want to invest in our urban areas that they don't have to leave the inner city in search of open space. They can build right there in our downtowns, the places that already have the services, the infrastructure and the people to do the job.

There has been bipartisan interest, Madam President, in addressing brownfields, both in the Senate and in the other body on the other side of the Capitol. I am hopeful we can move this legislation forward in a cooperative way with support of Members on both sides of the aisle.

I ask unanimous consent that a copy of the bill, a section-by-section analysis and a letter of endorsement from the Regional Planning Association, the country's oldest planning organization, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SEC. 2. FINDINGS AND PURPOSES.

(a) FINDINGS.—Congress finds that—

(1) past uses of land in the United States for industrial and commercial purposes have created many sites throughout the United States that have environmental contamination;

(2) Congress and the governments of States and political subdivisions of States have enacted laws to—

(A) prevent environmental contamination; and

(B) carry out response actions to correct past instances of environmental contamination;

(3) many sites are minimally contaminated, do not pose serious threats to human health or the environment, and can be satisfactorily remediated expeditiously with little government oversight;

(4) promoting the assessment, cleanup, and redevelopment of contaminated sites could lead to significant environmental and economic benefits, particularly in any case in which a cleanup can be completed quickly and during a period of time that meets short-term business needs;

(5) the private market demand for sites affected by environmental contamination frequently is reduced, often because of uncertainties regarding liability or potential cleanup costs of innocent landowners and prospective purchasers under Federal law;

(6) the abandonment or underutilization of brownfield sites impairs the ability of the Federal Government and the governments of States and political subdivisions of States to provide economic opportunities for the people of the United States, particularly the unemployed and economically disadvantaged;

(7) the abandonment or underuse of brownfield sites also results in the inefficient use of public facilities and services, as well as land and other natural resources, and extends conditions of blight in local communities;

(8) cooperation among Federal agencies, departments and agencies of States and political subdivisions of States, local community development organizations, and current owners and prospective purchasers of brownfield sites is required to accomplish timely response actions and the redevelopment or reuse of brownfield sites;

(9) there is a need to provide financial incentives and assistance to inventory and assess certain brownfield sites and facilitate the cleanup of the sites so that the sites may be redeveloped for beneficial uses; and

(10) there is a need for a program to—

(A) encourage cleanups of brownfield sites; and

(B) facilitate the establishment and enhancement of programs by States and local governments to foster cleanups of brownfield sites through capitalization of loan programs.

(b) PURPOSES.—The purposes of this Act are to create new business and employment opportunities through the economic redevelopment of brownfield sites that generally do not pose a serious threat to human health or the environment and to stimulate the assessment and cleanup of brownfield sites by—

(1) encouraging States and local governments to provide for the assessment and cleanup of brownfield sites that may not be remediated under other environmental laws (including regulations) in effect on the date of enactment of this Act;

(2) encouraging local governments and private parties, including local community development organizations, to participate in programs, such as State cleanup programs, that facilitate expedited response actions that are consistent with business needs at brownfield sites;

(3) directing the Administrator of the Environmental Protection Agency to establish programs that provide financial assistance to—

(A) facilitate site assessments of certain brownfield sites;

(B) encourage cleanup of appropriate brownfield sites through capitalization of loan programs; and

(C) encourage workforce development in areas adversely affected by contaminated properties; and

(4) reducing transaction costs and paperwork, and preventing needless duplication of effort and delay at all levels of government.

SECTION-BY-SECTION SUMMARY OF THE BROWNFIELDS AND ENVIRONMENTAL CLEANUP ACT OF 1997

Section 1 states the short title: the “Brownfields and Environmental Cleanup Act of 1997.”

Section 2(a) makes 10 findings summarizing the brownfields problem, and affirming a need for financial incentives and assistance to redevelop brownfield sites; and (b) states the purpose of the bill: economic redevelopment of the sites.

TITLE I—BROWNFIELD REMEDIATION AND ENVIRONMENTAL CLEANUP

Section 101 presents 19 definitions of terms used in the bill.

Section 102 Inventory and Assessment Grant Program. The bill directs EPA to establish a program of grants to local governments to inventory brownfield sites within their jurisdictions, and to conduct site characterizations of sites targeted for cleanup under a state cleanup program. It sets eight requirements of what the grant application must contain, and establishes the criteria EPA is to use in deciding whether to approve a grant. EPA may attach conditions to the grant award, and may terminate the grant if the conditions are violated. Grants may not exceed \$200,000.

Section 103. Grants for Revolving Loan Programs. The bill directs EPA to establish a grant program for state and local governments to capitalize loan programs for site cleanup. The loan fund is to be used by the local or state entity to make loans to finance brownfield cleanups by the owner or a prospective purchaser of an affected site. The grant application must demonstrate the government’s ability to manage a revolving loan program and oversee loans they grant under the program. Twelve factors to be considered by EPA in determining whether to award a grant are laid out. A loan program grant to a local or State applicant shall not exceed \$500,000.

Section 104 authorizes \$25 million to be appropriated from the Superfund for each of fiscal years 1997 through 2001 for the programs provided for in sections 101 and 102.

Section 105 requires EPA to submit an annual report to the congressional authorizing committees describing the achievements of each program, including the number of applications received and approved, and detailing the allocation of assistance among the states and local governments.

Section 106 limits how funds may be used. No grant may be used to pay fines or penalties to a state or the federal government, or for federal cost-sharing requirements. Nor may it be used to relieve a state or local government of its cleanup responsibility under state law at affected sites.

Section 107. Statutory Construction. The section states that nothing in this title is intended to affect the liability of response authorities of any other law, including the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA, or the Superfund Act), the Solid Waste Disposal Act, the Federal Water Pollution Control Act, and the Safe Drinking Water Act.

Section 108 authorizes EPA to promulgate regulations to carry out the Act.

Section 109 specifies that \$10 million of the section 104 appropriation shall be for the section 101 site characterization program each year, and \$15 million shall be for the section 102 economic redevelopment assistance program. The appropriations shall remain available until expended.

TITLE II—PROSPECTIVE PURCHASERS

Section 201(a). Liability Limitation. The bill amends section 107 of CERCLA, exempting a bona fide prospective purchaser from liability provided he does not impede the performance of response actions or natural resource restoration at a facility.

Section 1201(b). Windfall Lien. The bill further amends section 107 to give the United States a lien on the facility when a response action has been carried out at the facility and there are unrecovered response costs for which the prospective purchaser is not liable. Alternatively, the United States may obtain from the appropriate responsible party a lien on other property or other assurances of payment. The lien shall not be for

more than the increase in fair market value of the property attributable to the response action.

Section 201(c) amends section 101 of CERCLA to define "bona fide prospective purchaser." The definition requires that: all disposal of hazardous substances occurred before the person acquired the facility; the purchaser made all appropriate inquiry into its previous ownership and uses; the person provided proper notice regarding the discovery of hazardous substances at the facility; he exercised appropriate care; he provided full cooperation, assistance, and facility access to those conducting the response action; and there is no family or business relationship with a potentially responsible party at the facility.

TITLE III—INNOCENT LANDOWNERS

Section 301(a) amends section 101(35) of CERCLA clarifying the exception from liability of innocent landowners. The requirements that such a person make "all appropriate inquiry" is satisfied if he has an environmental site assessment conducted within the 180 days preceding the acquisition of the property "Environmental site assessment" means one conducted in accordance with the American Society of Testing and Materials (ASTM) standard for a Phase I environmental site assessment (Standard E1527-94), or an alternative standard issued by the President. To be treated as having made "all appropriate inquiry," a person must: (1) maintain a compilation of the information gathered in the course of the site assessment; (2) exercise appropriate care by stopping on-going releases, preventing threatened future releases, and limiting human and natural resource exposure to hazardous substances; and (3) provide full cooperation assistance, and facility access to persons conducting response actions at the facility. For the purposes of this subsection and 101(35) (the definition of "contractual relationship"), the term "contamination" means an existing release, a past release, or the threat of a release.

The court shall take into account any specialized knowledge of the defendant, the relationship of the purchase price to the value of the property if uncontaminated, commonly known information about the property, the obviousness of the presence of contamination at the property, and the ability to detect the contamination. EPA shall issue or designate standards and practices that satisfy these requirements. The bill identifies 10 factors for EPA to consider in issuing the standards:

1. Conduct of an inquiry by an environmental professional.
2. Interviews with past and present owners, operators, and occupants of the facility.
3. A review of historical sources, such as chain of title documents, aerial photographs, building department records, and land use records.
4. A search for recorded environmental liens, filed under Federal, state, or local law.
5. A review of Federal, state, and local government records (such as waste disposal records), underground storage tank records, and hazardous waste handling, generation, treatment, disposal, and spill records.
6. A visual inspection of the facility, and adjoining properties.
7. Any specialized knowledge or experience on the part of the defendant.
8. The relationship of the purchase price to the value of the property if uncontaminated.
9. Commonly known or reasonably ascertainable information about the property.
10. The obviousness of the presence of contamination, and the ability to detect it by appropriate investigation.

In the case of a property for residential or similar use purchased by a nongovernmental

or noncommercial entity, a site inspection and title search are sufficient to satisfy the requirements.

Section 301(b) authorizes EPA to issue regulations to carry out section 301, and gives it the authority to clarify or interpret all terms.

REGIONAL PLAN ASSOCIATION,

Newark, NJ, January 20, 1997.

Senator FRANK LAUTENBERG,

Hart Office Building, Washington, DC.

Re: Brownfields and Environmental Cleanup Act of 1997.

DEAR SENATOR LAUTENBERG: As Director of the New Jersey Office of Regional Plan Association, I am happy to support your proposed Brownfields and Environmental Cleanup Act. RPA is the country's oldest private, non profit regional planning organization charged with improving transportation, environmental conservation and economic development in the 31-county New York, New Jersey and Connecticut metropolitan area. RPA has been a leading force in brownfields redevelopment in New Jersey, having successfully coordinated the award-winning OENJ brownfields Model Redevelopment Project in Elizabeth, and overseeing the Legislative and Regulatory Reform committee of the EPA Brownfields Pilot Project in Newark.

The proposed Brownfields and Environmental Cleanup Act of 1997 will go a long way towards stimulating redevelopment of the region's abandoned, contaminated land. In particular, the provisions for local site characterization grants and site cleanup loans will provide an important incentive for local governments to prioritize and implement redevelopment of critical sites within their municipalities. The liability limitations under Section 201 are also important incentives at the federal level to encourage prospective purchasers to invest in brownfields redevelopment. Some of these provisions are being discussed at the State level in New Jersey. The passage of federal legislation will greatly assist our efforts to promote brownfields cleanup nationwide.

I am grateful for this opportunity to support your far-reaching legislation, and wish you the best of luck in its speedy passage.

Sincerely,

LINDA P. MORGAN,

Director.

S. 19. A bill to provide funds for child care for low-income working families, and for other purposes; to the Committee on Labor and Human Resources

WORKING FAMILIES CHILD CARE ACT OF 1997

Mr. DODD. Mr. President, I rise today to introduce the Working Families Child Care Act of 1997.

Mr. President, balancing the daunting responsibilities of work with the responsibilities of raising children is always a difficult task. It is especially challenging when so many parents today are working outside the home and are forced to depend on child care.

Not surprisingly, these challenges are especially acute for low income, working families. In fact according to a national child care study, when compared to all other income groups, the working poor are the least likely to receive assistance with child care costs—

even though it consumes a disproportionate share of their income—24 percent, compared to 6 percent for middle income families.

What's more, it's a constant struggle for low income families to remain self sufficient without child care assistance. In a survey of families on a waiting list in one community, it was found that of those paying for child care, 71 percent faced serious debt or bankruptcy.

Currently, in 38 States and the District of Columbia the working poor are on waiting lists to receive child care. Georgia has 41,000 on its waiting list; Texas 36,000; Illinois 20,000; Alabama 20,000. Most of the States which don't have a waiting list either don't keep one, are expecting to create one in the future, or currently are experiencing a brief respite.

In my own State of Connecticut, new openings for child care assistance were frozen in November 1993. When new slots became available, for only two days this past summer, 5,500 applications were received.

During the last Congress, we intensely debated the issue of child care—in the larger context of welfare reform legislation. The original welfare legislation in January 1995 cut funds for child care and eliminated critically important health and safety standards.

In the 104th Congress I continued to fight for child care, offering amendments to increase funding and ensure quality. While I disagreed with the final welfare reform bill, I am pleased that many of these amendments succeeded and that in the end, the final bill included child care funding of \$14.2 billion over 6 years and restored rigorous health and safety standards.

However, while the bill we passed made significant and crucial strides in providing child care for welfare recipients—there is still work to be done.

The bill I am proposing today will address the issue of child care for low income working families and make it easier for them to access adequate child care assistance.

First, this legislation restores \$1.4 billion in child care funding.

According to a recent CBO report, even if states meet the work requirements of the welfare bill they will still be short \$1.4 billion for money needed to continue serving certain low income working families. These aren't new recipients we're talking about, but instead families who were receiving child care assistance prior to passage of welfare reform legislation.

The legislation I am introducing today will prevent working parents from losing child care assistance simply as a result of the welfare reform bill.

Second, it begins to address the shortage of assistance for working families, by raising the authorization for child care subsidies for low income working families from \$1 billion per year to \$2 billion per year.

And finally, it authorizes \$500 million per year through 2002 to help communities meet supply shortages in areas such as infant care and school age care.

Even when subsidies are available, child care can be difficult to obtain. According to the National Academy of Sciences, there is "Consistent evidence of a relatively low supply of care for infants, for school age children, for children with disabilities and special health care needs and for parents with unconventional or shifting work hours."

What's more, a 1995 GAO study based in Michigan found a shortage of infant and special needs child care in inner cities and a shortage of all types of child care in rural areas. So, we're not simply talking about financial assistance for child care, but whether child care actually exists.

This shortage of child care is a problem for both working families and welfare recipients who want to become self-sufficient. How can we expect someone to make the difficult transition from welfare to work when they cannot find an adequate provider for an infant or are forced to have a 6, 7 or 8 year old spend hours alone at home when the school day ends?

This lack of supervision can have a devastating long-term impact. One study found that children who start to take care of themselves in elementary school are significantly more likely to report high use of alcohol by the eighth grade. Eighth graders left home alone for 11 or more hours a week report significantly greater use of cigarettes, alcohol, and marijuana than children not left home alone. We know all this, and yet only one third of the schools in low income neighborhoods offer school age child care, compared with 52 percent in more affluent areas.

For those struggling to make the difficult journey to self-sufficiency, the lack of available child care before 9, after 5, and on weekends can be an enormous problem. What's worse, such arrangements put the safety of a child in question.

The reality is that nearly 1 in 5 full time workers—14.3 million—work non-standard hours. More than 1 in 3 are women. However, only 10 percent of child care centers and 6 percent of family day care provide care on weekends. Yet one third of working mothers with incomes below poverty and one fourth of mothers with income above poverty, but below \$25,000, work on weekends.

An additional supply problem is that head start and other prekindergarten programs are part day and part year. As a result, they often do not meet the needs of parents who work full time. Less than 30 percent of Head Start programs operate on a full-time, full-year basis.

Simply put, child care funds need to be available to make these programs accessible for working parents. In my view, we as a nation have a solemn commitment to guarantee that children will not be left to fend for them-

selves while their parents are working to put food on the table.

Child care is one of the most important ingredients for helping poor working families achieve and maintain economic security. Like parents in any community and of any financial background, low income families need to know that when they go to work, their children will receive the care and assistance they need.

The bill I am introducing today will make it easier for low income, working families to balance the responsibilities of work and caring for their children. I urge all my colleagues to join together in supporting this legislation—for the good of America's children.

S. 19

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) **SHORT TITLE.**—This Act may be cited as the "Working Families Child Care Act of 1997".

(b) **TABLE OF CONTENTS.**—The table of contents for this Act is as follows:

Sec. 1. Short title; table of contents.

Sec. 2. Findings.

Sec. 3. Assistance for low-income working families.

Sec. 4. Grants for child care supply shortages.

Sec. 5. Report on access to child care by low-income working families.

Sec. 6. Effective date.

SEC. 2. FINDINGS.

Congress makes the following findings:

(1) Availability and affordability of quality child care is a major obstacle for working parents who struggle to remain self-sufficient.

(A) Compared to all other income groups, the working poor are the least likely to receive assistance with their child care costs.

(B) Low-income families spend 24 percent of their household income on child care, whereas middle-income families spend 6 percent of their household income on child care.

(C) 38 States have waiting lists for child care for the working poor. Among those States, Georgia has 41,000 individuals on its waiting list, Texas has 36,000 individuals on its waiting list, and Illinois and Alabama each have 20,000 individuals on their waiting lists.

(D) One survey of low-income families on a waiting list for subsidized child care found that of those families paying for child care out of their own funds, 71 percent faced serious debt or bankruptcy.

(E) Half of the States and the District of Columbia, even before the enactment of the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (Public Law 104-193, 110 Stat. 2105) during the 104th Congress, increased the proportion of child care slots or dollars going to families on welfare, rather than to working poor families.

(2) The Congressional Budget Office estimates that there will be \$1,400,000,000 less expenditures of child care funds for working poor families as a result of the States implementing the work requirements imposed under the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (Public Law 104-193, 110 Stat. 2105).

(3) Important types of child care are not available in certain States including infant care, school-age care, care for children with disabilities and special health care needs, and child care for parents with unconventional or shifting work hours.

(A) A 1995 State study by the Comptroller General of the United States found a shortage of child care for infants and children with special needs in inner cities, and a shortage of all types of child care in rural areas.

(B) Only 1/3 of the schools in low-income neighborhoods offer school-age child care, compared with 52 percent of schools in more affluent areas offering such care.

(C) Eighth-graders who are left home alone for 11 or more hours a week report significantly greater use of cigarettes, alcohol, and marijuana than eighth-graders who are not left home alone.

(D) Existing child care arrangements do not accommodate the work schedules of many working women. According to a 1995 statistic published by the Department of Labor, 14,300,000 workers, nearly 1 in 5 full-time workers work nonstandard hours, and more than 1 in 3 of those workers are women.

(E) Only 10 percent of child care centers and 6 percent of family day care providers offer child care on weekends. Yet 1/3 of working mothers with annual incomes below the poverty level and 1/4 of mothers with annual incomes above the poverty level but below \$25,000 work on weekends.

(F) Less than 30 percent of Head Start programs operate on a full-time, full-year basis.

SEC. 3. ASSISTANCE FOR LOW-INCOME WORKING FAMILIES.

Section 658B of the Child Care Development Block Grant Act of 1990 (42 U.S.C. 9858) is amended to read as follows:

"SEC. 658B. FUNDING OF GRANTS.

"(a) **AUTHORIZATION OF APPROPRIATIONS.**—Except as provided in subsection (b), there is authorized to be appropriated to carry out this subchapter \$2,000,000,000 for each of fiscal years 1997 through 2002.

"(b) **APPROPRIATION.**—The Secretary shall pay, from funds in the Treasury not otherwise appropriated, \$1,400,000,000 for fiscal years 1997 through 2002, through the awarding of grants to States under this subchapter for the purpose of providing child care services for families who have left the State program of assistance under part A of title IV of the Social Security Act because of employment, families that are at risk of becoming dependent on such assistance program, and low-income working families described in section 658E(c)(3)(D). Funds shall be paid under this subsection to the States in the same manner, and subject to the same requirements and limitations, as funds are paid to the States under section 418 of the Social Security Act (42 U.S.C. 618)."

SEC. 4. GRANTS FOR CHILD CARE SUPPLY SHORTAGES.

(a) **GRANTS FOR CHILD CARE SUPPLY SHORTAGES.**—Section 658E(c)(3) of the Child Care Development Block Grant Act of 1990 (42 U.S.C. 9858c(c)(3)) is amended by adding at the end the following:

"(E) **CHILD CARE SUPPLY SHORTAGES.**—
