ADDITIONAL STATEMENTS

HONORING ARGONNE-WEST SCIENTISTS

● Mr. KEMPTHORNE. Mr. President, I rise today to give recognition to four very important individuals involved in the advancement of engineering and science relating to nuclear activities for our country, and specifically within the State of Idaho. I would like to commend Douglas C. Crawford, H. Peter Planchon, John I. Sackett and Bobby R. Seidel on their various efforts in this area which have warranted top awards from the American Nuclear Society.

These four scientists, all employees of the Argonne National Laboratory-West, have made tremendous advances in terms of the science involving the safe generation of nuclear power. For example, Dr. Douglas Crawford was awarded the Young Member Engineering Achievement Award which recognizes a series of experiments on reactor fuels. Dr. Crawford has become a widely recognized expert in the handling, management, and treatment of plutonium. He is also the manager of the Engineering Division's Materials Technology Section at Argonne-West.

Dr. H. Peter Planchon, who serves as an Associate Director of the Engineering Division, received the American Nuclear Society's Seaborg Medal which is awarded for outstanding long-term individual excellence in nuclear investigation and study. Dr. Planchon developed reactor modeling and experiments which have led to the use of passive response to accidents in sodium-cooled reactors. His work and efforts were demonstrated in a 1986 experiment in which Experimental Breeder Reactor—II, at the time operating at full power, was exposed to accident conditions. The reactor safely shut itself down without operator intervention. Thanks to Dr. Planchon's efforts, subsequent tests have shown that simplified nuclear plants could be safely designed for the future.

Dr. John Sackett's contributions to fast reactor technology, resulting in new and better approaches to plant protection and safety, have earned him great recognition and the honor of receiving the Walker Cislser Medal. This medal is a special award which recognizes outstanding scientific or engineering research achievements in the design and development of the fast breeder reactor as applied to electric power generation. Dr. Sackett's efforts truly are outstanding scientific achievements which have led to better plant operation. He currently serves as the Deputy Associate Laboratory Director for Argonne-West.

And finally, the American Nuclear Society's Public Communications
