AGRICULTURAL EXPORT BENEFIT
CALIFORNIA

HON. WILLIAM M. THOMAS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1997

Mr. THOMAS. Mr. Speaker, California is famous as the home of the motion picture industry, Disneyland, beaches, and an overwhelming tourist industry. It may surprise you to learn, however, that agriculture is actually California's No. 1 industry. Since California is also the home of numerous international ports, the combination of agriculture and international trade creates the backbone of California's economy. As such, it is a priority to foster growth in agricultural exports by supporting U.S. efforts to decrease barriers to trade with foreign countries.

For the last 50 years California has held the title as the Nation's No. 1 agricultural State. California's agricultural industry is important to the Nation as well as to the economic well being of our local communities. Agricultural exports account for over half of California's total agricultural products which brings \$22 billion into the California economy every year. Thus, over half of the revenues earned by the sale of California's agricultural products were generated by California growers' ability to enter and compete competitively in foreign markets. For some products, such as the sale of cotton in my district, exports account for 75 percent of the \$1 billion in total sales revenues.

Agriculture provides 1 in every 10 jobs in the State. These jobs serve as the underlying force behind California's economic strength. According to the California Department of Food and Agriculture's 1995 Crop Report, "for every \$1 billion in export sales, 27,000 jobs are created in the state". By this approximation, agricultural exports helped the total California economy by creating 124,000 jobs, and these jobs, on average, pay more than non-export related jobs. In my district, Kern County's \$350 million in exports sales creates almost 10,000 jobs, which does not include indirect economic benefits.

Given the direct relationship between agricultural exports and employment levels, it is important that we work to increase exports by encouraging free trade and maintaining strong working relationships with our trading partners. Although exports already represent a large portion of California's agricultural sales, they remain the area of greatest potential growth for the industry. While overseas markets are growing, our domestic market has reached a stagnant growth rate. The global marketplace is where the action is, due to the fact that there are about 6 billion consumers beyond our Nation's borders. In just the last 6 years, U.S. agricultural exports have increased by 50 percent.

New trade agreements that open and liberalize trade allow California farmers access to those 6 billion consumers in the global market. I mentioned how successful cotton has been

for California and my district. Consider if other agricultural products also succeeded in expanding through free trade. For example, as the leading dairy producing county in the Nation, Tulare County in my district is well positioned to seize a lion's share of the growing world dairy demand if only fair and free trade can be achieved. Other major agricultural products found in California, such as pistachios, almonds, grapes, and stone fruits, stand to gain from the ability to enter foreign markets if given an equal footing with producers from other countries.

We must plan for future growth by working with our trading partners to open market access, allowing California farmers the opportunity to sell even more goods in the global market. Expansion of agricultural exports has always been my priority. As the Representative of an agricultural district I am proud that the success of California's farmers and ranchers helps build America's economy while feeding millions. Since the implementation of NAFTA 3 years ago, agricultural exports to our NAFTA trading partners have increased by 13 percent. Trade liberalization under NAFTA will continue to bolster the economic forces that are promoting trade growth. As we work to further reduce barriers to trade, we can look forward to great increases in our agricultural exports. Creating a free market is in our best interest, and I urge this Congress to do its best to continue to support free trade.

A GROWING TREND

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1997

Mr. GINGRICH. Mr. Speaker, I would like to call attention to a growing trend in America: Democrats who have switched to the Republican Party. These officials were tired of the same old liberal social philosophies which characterize the Democrat Party as the party of higher taxes, bigger government, and moral permissiveness. A classic example of this liberal thinking was the Clinton administration's proposed takeover of the health care industry, a scheme which had Democrats running for cover in the 1994 mid-term elections, when 9 million more people voted Republican than in 1990 and the Republicans took control of Congress for the first time in 40 years.

The Republican National Party has added 18 new elected officials to its ranks within the past week. Since Bill Clinton and ALBERT GORE were elected in 1992, 349 elected Democrat officials have now joined the GOP.

Last Thursday, North Dakota State Representative Michael Brandenburg switched to the Republican Party, saying, "I knew I had to make the change to stay true to myself and my own beliefs."

On Friday of last week, Topeka, Kansas City Councilman Vince Cook renounced his affiliation with the Democrat Party and joined the Republicans. "Nationally, regionally, and locally, it [the Democrat Party] has been associated with fund raising irregularities, political patronage, and professional and personal scandals," said Cook. Clearly, the growing campaign fund raising scandals surrounding the 1996 Clinton/Gore Campaign is fueling the flight from the Democrat Party.

Last Saturday in New Jersey, Evesham Mayor Gus Tamburro joined the Republican Party and endorsed Governor Christie Whitman, saying, "Under Christie Whitman's leadership we have reaped the benefits of jobs, tax cuts, and economic growth. That's why I switched parties."

On Monday of this week, 13 elected Democrats in Texas switched to the Republican Party at a ceremony hosted by Governor George Bush. Among those Texans who abandoned the Democratic Party was Presiding Judge of the Court of Criminal Appeals, Michael J. McCormick. To date, 90 elected Democrats have joined the GOP in Texas alone since 1992.

In New York this week, Liberty Town Supervisor Richard Martinkovic changed his party affiliation and stated, "I join the Republican Party today and look forward to working with all elected officials . . . to serve the people, not be served."

And finally, in my home State of Georgia, State Representative Scott Tolbert announced his decision to join the GOP. Tolbert gives Republicans 79 seats in the 180-seat State House of Representatives, the highest number since Reconstruction. At a ceremony in Jefferson, GA, Tolbert commented, "After watching the Democrat Party in action, I knew I had to make a change."

I welcome each of these 18 new members to the Republican Party. The door to our party remains open to all who are committed to the ideals of smaller, smarter government with lower taxes and more freedom for the American people.

PERSONAL EXPLANATION

HON. BOB CLEMENT

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1997

Mr. CLEMENT. Mr. Speaker, on rollcall vote No. 512, I was unavoidably detained on official business. Had I been present, I would have voted "aye," and I ask unanimous consent that this statement be placed in the appropriate portion of the RECORD.

RECOGNITION OF THE WEBB
SCHOOL'S 75TH ANNIVERSARY

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 21, 1997

Mr. BROWN of California. Mr. Speaker, I rise today to recognize the 75th anniversary of the Webb School.

Founded in 1922 by Thompson and Vivian Webb in Claremont, CA, the school has maintained a tradition of academic excellence throughout its history.

Though initially an all male school, the Vivian Webb School for girls was opened in the fall of 1984. The school now also includes the Raymond Alf Museum. Founded after a student's discovery of a fossil of a previously unknown prehistoric pig, it is the only museum of paleontology located on a high school campus. The museum houses over 80,000 specimens, 90 percent of which were collected by
