

hit the playing fields with the same passion that has motivated children and lovers of the game for years.

So too will the youth of Cuba.

Their determination and effort will be directed to the game.

They will be absorbed in the pitching and power hitters of their opponents not their politics.

The Baltimore Orioles exhibition in Havana will allow the people of both countries to share their passions for the game and perhaps highlight what the people of our nations have in common and not the differences that divide them.

It comes as no surprise to me that Peter Angelos and the Baltimore Orioles have led the effort to see this game become a reality and on behalf of the State of Maryland I want to thank Peter Angelos for his vision for baseball.

A vision broader than the game itself which removes the barriers for all who share a love for the great game of baseball.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. JONES) is recognized for 5 minutes.

(Mr. JONES of North Carolina addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

BALTIMORE ORIOLES-CUBA EXHIBITION BASEBALL GAMES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland (Mr. CARDIN) is recognized for 5 minutes.

Mr. CARDIN. Mr. Speaker, I want to follow the comments of the gentleman from Maryland (Mr. HOYER) and the gentleman from Maryland (Mr. CUMMINGS) in really congratulating the Baltimore Orioles and Peter Angelos for arranging for a game between the Baltimore Orioles and the Cuban national team.

As the gentleman from Maryland (Mr. HOYER) indicated, baseball really speaks an international language. This is going to be good for our Nation and good for the people of Cuba. None of the economic proceeds will go to the government of Cuba. Peter Angelos has really, I think, done a favor for this Nation. I support this game. It has nothing to do about politics. It is a game. Two countries whose identity is deeply rooted in their national pastime. I think a fan who was quoted in the Miami Herald recently had the right outlook for this game when he said, "They should play it. It's a game after all."

I would also like to quote from one of the real great diplomats in baseball, one of the great Earls, the Earl of Baltimore, Earl Weaver, the famous manager of the Baltimore Orioles. I think he had the game of baseball right when he said, in baseball you can't sit on a lead and run a few plays into the line and just kill the clock. Earl once said, you got to throw the ball over the

plate and give the other man his chance. That is why baseball is the greatest game of them all, and now we are going to be able to have a good will game, two good will games between the Cuban national team and the Baltimore Orioles.

Mr. Speaker, let the games begin.

I am thrilled at the likelihood of an historic sports exchange with Cuba in the very near future

I am sure many of you have heard the news of a goodwill game between the Cuban national team and Maryland's beloved Baltimore Orioles. I commend Orioles owner Peter Angelos for his hard work to make this dream a reality.

I am here tonight to express my strong support for this initiative and to urge the U.S. Congress to join all of us here tonight in supporting this worthy endeavor.

I want to say from the outset that any proceeds from this exchange will not go to the Cuban Government. The proceeds will go to support baseball and other activities related to sports in our two countries.

Indeed, supporting this initiative has nothing to do with politics. That may seem strange here in Washington where it is our job in many respects to see the world through a political prism.

But this is one time, thankfully, when it is to our advantage to see an exchange between two countries, not as a political event, but simply as a game—America's game and Cuba's game. These are two countries whose identity is deeply rooted to their national pastime.

I think a fan quoted in the Miami Herald recently had the right outlook for this game when he said, "They should just play. It's a game after all."

It is indeed a game after all. A bat and a ball, two teams, a field and the undivided attention of two nations. That is all, Mr. Speaker, and that should be enough for now.

Perhaps we should heed the diplomatic words of one of the world's great Earls—the Earl of Baltimore. Earl Weaver's famous comment about America's pastime is the reason why this game is such a wonderful idea and opportunity for both nations:

In baseball "you can't sit on a lead and run a few plays into the line and just kill the clock," Earl once said. "You've got to throw the ball over the plate and give the other man his chance. That's why baseball is the greatest game of them all."

Wherever it might be played, baseball is the best game around. So Mr. Speaker, let the games begin.

THE DEBT DOWN PAYMENT ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kansas (Mr. MORAN) is recognized for 5 minutes.

Mr. MORAN of Kansas. Mr. Speaker, I am pleased to be here this evening and particularly with the distinguished gentleman from Ohio (Mr. KASICH), the chairman of the Committee on the Budget, in the Chamber this evening. I would like to point out a few facts to my colleagues.

I know that these are issues of importance to all of us, and I think it is useful to be reminded that as of March

1, the first day of this month, 1999, the Federal national debt was \$5.62 trillion. That debt is increasing. In fact, it increased in 1999 by \$95 billion in all of our trust funds. The total interest that we paid last year on the national debt was almost 15 percent of the total budget, about \$243 billion.

Mr. Speaker, now is the optimum time to take the steps necessary to reduce the national debt. Our economy, although not necessarily the Kansas economy, is strong and Federal revenues stand ready for debt reduction. On the very near horizon, however, we face a challenge of financing the retirement of the baby boom generation. If we can get our fiscal house in order now, we can meet this challenge. But if we delay, our children will face the dual burden of servicing a large national debt, along with facing the liabilities to Social Security and Medicare. We do not have surpluses as far out as we can see.

Mr. Speaker, as the chart indicates, the national debt grows, and by the year 2040, because of that generation of retirees, the national debt increases to 200 percent of the gross domestic product. We need to take advantage of this opportunity to begin the process of paying down our national debt. Paying down the debt can lower interest rates. Student loans, car loans, home mortgages and farm debts can all be less burdensome with lower interest rates that the borrowing from the Federal Government would generate.

Last week, the gentleman from Mississippi (Mr. PICKERING) and I introduced H.R. 948, the Debt Down Payment Act, and I spent some time on the floor, explaining this legislative attempt to my colleagues. This bill establishes a 10-year plan for reducing the debt held by the public. It would reduce it by \$2.4 trillion; an average annual payment on the debt of \$240 billion; no new spending; saves \$729 billion in interest payments over 10 years. \$729 billion. And it removes the Social Security trust fund from the revenues that we calculate our surplus to provide some honesty, not only to the American people but especially to ourselves.

This bill establishes a gradually reduced limit for public debt held over the next 10 years, and by the year 2000, this debt limit would be lowered to \$3.5 trillion, requiring a first year debt reduction of \$100 billion.

Our Nation's most respected economists remind us of the importance of paying down the national debt and the opportunity that provides to shore up Social Security.

In just 13 years, payment from the Social Security trust fund will exceed the incoming revenue to the Social Security trust fund. By reducing debt today, we can do something that will make it easier to meet the needs of the next generation's retirement, and by removing the Social Security trust fund revenues from the annual surplus
