TRIBUTE TO PATRICIA J. KOLL

• Mr. KOHL. Mr. President, I rise today to pay tribute to one of Wisconsin's premier educators. Dr. Patricia J. Koll is retiring this May after a distinguished 31-year career with the University of Wisconsin-Oshkosh.

Born and raised in Wisconsin, Patricia has excelled in the field of Education. Working as a professor of education and assistant vice chancellor, she has authored numerous books and received many accolades for her work. She was honored in both 1991 and 1992 with the Wisconsin Teacher Educator of the Year Award. She has also been a recipient of the University of Wisconsin-Oshkosh John McN Rosebush award, the university's highest award for scholarly excellence.

Patricia has been an instrumental part of education development in the state. She has served as president of both the Wisconsin Association for Supervision and Curriculum Development and the Northern Wisconsin chapter of the American Society for Training and Development. In addition, she has worked with many school districts providing invaluable leadership experience and expertise.

Patricia's dedication and talent have been enormous assets to the University of Wisconsin-Oshkosh and the Oshkosh community. Her talents will be sorely missed by her colleagues. However, we wish Patricia all the best for her retirement.●

RECOGNIZING LIBERTY ELEMENTARY SCHOOL IN MARYSVILLE, WA.

• Mr. GORTON. Mr. President, this week's Innovation in Education Award recipient is a remarkable school, Liberty Elementary, in Marysville, Washington. With help from school staff and led by Principal Paula Jones, Liberty Elementary's students have made outstanding advances in their reading performance.

Historically, this school has not shown great success in student standardized test results. To improve those results, the school's staff researched proven "best practices" for improving student reading. The staff eventually selected a program called "Success For All" that focuses on early intervention and personal attention to promote literacy.

Liberty Elementary's parents and staff recognized that in order for this program to succeed, they needed to be closely involved. So the parents and staff established "Family Fun Night" each month to educate families on the importance of reading, the benefits of education reform, and how to feel more comfortable as active partners in their children's education. Liberty's staff attends these family activities without extra compensation. The staff has also teamed up with local businesses to help

acknowledge outstanding participation and achievement by students and parents.

Two years ago, Liberty teachers, parents, and students decided to refocus their efforts on reading. Now 80% of the students are reading at current grade level and above—a tremendous increase of 58%. Students at Liberty are now proud and successful readers thanks to the hard work of the Liberty staff and the support from their devoted parents and community.

What is noteworthy about Liberty is that the students became better readers because the community became more involved with its children. This Innovation in Education award is another example of how local communities really do know best. Local educators and parents work with our children every day and know what needs improvement. They deserve our support and should have more decision-making authority over how federal education dollars are to be spent. Educators from Washington state and from across the country need and deserve more flexibility and more control over their classrooms. Liberty Elementary and schools like it are the reasons why I will fight to return that power to our local schools where it belongs.●

MAY 1—GUILLAIN-BARRÉ SYNDROME AWARENESS DAY

• Mr. KENNEDY. Mr. President, communities across America will observe Guillain-Barré Syndrome Awareness Day this Saturday, May 1. Guillain-Barré Syndrome, or GBS, is a paralyzing disorder that can strike any person, regardless of age, gender, or background. Victims often face months of hospital care and long-term disabilities can result.

For many years the GBS Foundation International has been renowned for its worldwide leadership in the battle against GBS, and I welcome this opportunity to commend the Foundation for all it has done. The Foundation, established in 1980, provides an effective support network for patients and their families. It also provides educational materials, funds medical research, and conducts symposia.

GBS Awareness Day is an important part of educating the public about this potentially catastrophic disease. In Massachusetts, for example, the chapter of the Foundation in Boston is coordinating an event for the entire New England area that will include a fund-raising walk around the New England Rehabilitation Hospital in Woburn, followed by a video presentation and seminars on the medical and psychological aspects of the disease.

One of the most disturbing developments in the battle against GBS is the recent scientific research linking this disease to infection by a common food-borne pathogen known as *Campylobacter*, which is the most common bacterial cause of food-borne illness in the United States. These bac-

teria frequently contaminate raw chicken. Unfortunately, *Campylobacter* is also one of a growing number of bacteria that are developing resistance to the antibiotic drugs commonly used to treat the diseases they cause, and these drug-resistant bacteria are now a major public health threat.

The health and safety of the American people is one of our top priorities in Congress. Microbial contamination of food is an increasing problem. The association of GBS with *Campylobacter* infection demonstrates that food-borne illness is a serious national challenge. We need to take more effective action against these threats to families and communities. An important priority of this Congress is to act on legislation that will enhance the nation's ability to deal with contaminated food and antimicrobial-resistant organisms.

We in Congress also need to do more to support research into all aspects of the prevention, treatment, and cure of GBS. I welcome GBS Awareness Day this year as an opportunity for all of us in Congress and across the country to become more actively involved in meeting this important public health challenge.●

25TH ANNIVERSARY OF ASSOCIATION OF MAPPING SENIORS

• Ms. MIKULSKI. Mr. President, I rise today to congratulate the Association of Mapping Seniors (AMS) on the 25th Anniversary of their founding.

The AMS is a distinguished organization of former employees at mapping and imagery agencies like the National Imagery and Mapping Agency (NIMA). Their important work has been invaluable to both our national policy makers, and our national security.

Mr. President, the data produced by these dedicated Americans has been key to understanding our world and making it safer. Mapping and imagery not only help us support our men and women in uniform, but also help us develop our cultural understanding of ourselves in terms of population, growth, religious and economic clusters, and more. I want to commend each and every member of the AMS for their indispensable service to our country, our community, and our culture.

I am also proud to note that Maryland has been home to many devoted members of this important organization. As many of my colleagues know, I am a strong and unyielding supporter of federal employees, and these men and women are no exception. I want to thank them, Mr. President, for their outstanding service to our country, and to honor them in celebration of the 25th Anniversary of the Association of Mapping Seniors.●

RECOGNITION OF FAMILIES FOR HOME EDUCATION

• Mr. BOND. Mr. President, I rise today in recognition of Families for
