

ballistic missile arsenal. The stolen information also includes classified design information for enhanced radiation weapons, commonly known as the neutron bomb, which neither the United States nor any other Nation has yet deployed. The People's Republic of China has obtained classified information on the following United States thermonuclear warheads, as well as a number of associated reentry vehicles, the hardened shell that protects the thermonuclear warhead during reentry."

Might I add, this Cox Committee was a bipartisan committee, Democrats and Republicans in the House of Representatives, and clearly demonstrates, for example:

"The People's Republic of China has stolen United States design information and other classified information for neutron bomb warheads. China has stolen classified U.S. information about the neutron bomb from a U.S. national weapons laboratory. The United States learned of the theft of this classified information on the neutron bomb in 1996," and practically nothing was done.

"The Select Committee judges that if the People's Republic of China were successful in stealing nuclear test codes, computer models and data from the United States, it could further accelerate its nuclear development. By using such stolen codes and data in conjunction with the high performance computers already acquired by the People's Republic of China, the PRC could diminish its needs for further nuclear testing to evaluate weapons and proposed design changes."

The small warheads that we talk about, multiple warheads, will make it possible for the People's Republic of China to develop and deploy missiles with multiple reentry vehicles. Multiple reentry vehicles increase the effectiveness of a ballistic missile force by multiplying the number of warheads, and a single missile can carry as many as tenfold.

Multiple reentry vehicles also can help to counter missile defenses. For example, multiple reentry vehicles make it easier for the People's Republic of China to deploy penetration aids with its ICBM warheads in order to defeat antimissile defenses.

At the beginning of the 1990s, the People's Republic of China had only one or two silo-based ICBMs capable of attacking, attacking the United States. Since then, the People's Republic of China has deployed up to two dozen additional silo-based ICBMs capable of attacking the United States. That is 24 additional silo-based ICBMs; has upgraded its silo-based missiles and has continued development of three mobile ICBM systems and associated modern thermonuclear warheads, something they never had.

Even though the United States discovered in 1995, in 1995, that is almost four years ago, that the People's Republic of China had stolen design infor-

mation on the W-88 Trident D-5 warhead and technical information on a number of U.S. thermonuclear warheads, the White House has informed in response to specific interrogatories propounded by the committee that the President was not briefed about the counterintelligence failures until 1998.

Madam Speaker, this is just a disgrace, and unless something happens, we should not be here today discussing anything else until our national security is protected.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. BECERRA) is recognized for 5 minutes.

(Mr. BECERRA addressed the House. His remarks will appear hereafter in the Extensions of Remarks.)

WHY I BECAME A REPUBLICAN

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Florida (Mrs. FOWLER) is recognized for 5 minutes.

Mrs. FOWLER. Madam Speaker, I became a Republican because of the party's long-held principles. The Republican Party was founded on two fundamental issues: free land and abolishing slavery. Since that day, the party embraced the role of leader and never shied away from taking the challenge of taking an unpopular and difficult stance. From striving successfully to abolishing slavery to being the vanguard in the struggle for women's right to vote, the Republican Party has constantly forced all Americans to re-evaluate the role of individuals and the role of the government.

□ 2030

The Republican party has always believed in individuals. We have an abiding faith in the idea that individuals and local communities can accomplish more than a distant Federal Government, a government that tends to become large, bloated, and wasteful, as ours has.

As the great Republican statesman, Abraham Lincoln, said, "The legitimate object of government is to do for a community of people whatever they need to have done but cannot do at all, or cannot so well do, for themselves in their separate and individual capacities. In all that people can individually do as well for themselves, government ought not to interfere."

There is an important role for the government. Imagine an individual trying to build a freeway alone. But it is a role that should be limited.

Republicans believe the most effective government is closest to the people. After all, who knows more about educating our children, us and our child's teacher, or a distant bureaucracy across the country in Washington, D.C.?

I chose the Republican party because I believe that each American citizen

can be trusted. I believe that they know best and that they will make the best decision for themselves, and they will make the wisest choices. Whether it is how to spend their hard-earned money or how to spend their time, they should be in charge.

The Republican party's economic policies of lower taxes and less government have reduced interest rates and sent the stock market soaring, yet inflation has remained stable. Thanks to these smart policies, every one of us is enjoying the largest sustained peacetime expansion ever.

Our commonsense agenda and leadership has produced a healthy and strong economy. Job opportunities have increased significantly, unemployment is down, the budget is balanced, and because of our welfare reform, tens of thousands have moved from the welfare rolls to the payrolls.

I have to say, while I firmly believe that all issues are women's issues, and I resist the popular tendency to view women as a monolithic group in politics or anything else, I still must emphasize the Republican party's accomplishments with regard to women in politics.

I want to take Members back to 1896, when it was the Republican party who became the first major party to officially favor Women's Suffrage. That year Senator A.A. Sargent, a Republican from California, introduced a proposal in the Senate to give women the right to vote. It was defeated four times by a Democratic Senate, and it was not until the Republicans would gain control of Congress that it was finally passed in May of 1919.

The first woman to serve in Congress was a Republican, Jeanette Rankin of Montana.

In 1940, the Republican party became the first major political party to endorse an Equal Rights Amendment for women in its platform.

In 1953, Republican President Eisenhower appointed the first woman Secretary of the Department of Health, Education, and Welfare, and the first woman ambassador to a major power.

In 1964, Republicans were the first major American party to nominate a woman for president, Senator Margaret Chase Smith of Maine.

In 1981, Republican President Reagan appointed the first woman Supreme Court Justice and the first woman U.S. representative to the United Nations.

In 1983, Republican President Reagan had three women serving concurrently in his cabinet, the first time in the history of this country.

Currently, Republican women chair a record seven House subcommittees and three Senate subcommittees. I serve as a deputy majority whip, along with two other women, and as a newly elected Vice Chairman of the Republican conference, I am now the highest ranking woman in the House elected leadership. The gentlewoman from Ohio (Ms. DEBORAH PRYCE) serves as Conference Secretary.
