

TRIBUTE TO BRAD CURREY, JR.

HON. MICHAEL G. OXLEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, September 27, 1999

Mr. OXLEY. Mr. Speaker, the strength of our republic lies in the participation of all people, exercising their individual liberty by making their voices heard. One person can make a difference that can benefit us all.

Congress is, and should be composed of 535 laymen. We each have expertise in something, but on the wide array of issues with which we deal, we need a lot more information, a lot of educating—or we can make some mistakes. The two concepts—one person making a difference, and Congress needing solid information on a wide variety of topics—are combined in the career of a man named Brad Currey, Jr.

Brad Currey retires at the end of this year as Chairman, President, and CEO of the Rock-Tenn Company in Norcross, Georgia. Brad always says that Rock-Tenn's value is based on the unique competence of its people; with those people, he built one of the country's largest manufacturers and converters of 100 percent recycled paperboard. Their products are all around us, but we rarely recognize them: cereal boxes, bookcovers, overnight express mail envelopes, and countless other items.

During his career with Rock-Tenn, Brad demonstrated why a "special interest group" is not necessarily a bad thing. He has helped Congress refine an important part of environmental policy, especially in the area of recycling. In doing so, he and his colleagues in the 100 percent paper recycling industry helped remind us of the broad power Congress has to affect the way business is done.

A few years back, we grappled with what was referred to at the time as the "solid waste crisis." Legislation was introduced and considered in the Commerce Committee to help spur the recycling markets. We certainly did not know all that we needed to know about recycling, and few people in environmental organizations or the lobbying community had an expert background in it, either. Brad Currey recognized that the future of his paper recycling industry was about to be decided in Congress. He called on his industry colleagues, many of whom were owners and operators of small family-run recycled paper companies, and convinced them of the need to make their voice heard in the debate on solid waste and recycled issues. From that point, the story takes on a more "inside Washington" character: they chose a name for themselves, the Paper Recycling Coalition (PRC), and hired a consulting firm to guide them through the legislative and regulatory process.

Thanks to Brad and his colleagues, I have learned more about the recycled paper industry and its presence in Ohio and around the country. I have also learned more about the issues that affect them, and recognized that their collective voice was valuable in crafting the nation's recycling policies. They created a more visible identity for the recycled paper industry, and they did it without arm-twisting or crass tactics. They did it with information.

From what I have heard from his friends, inserting the paper recycling industry in the policymaking process is just one of many Brad

Currey accomplishments. As Brad gets ready to retire, I want to thank him for his guidance and assure him that he has made a difference—he has had a positive impact on the policy process. Like Brad, I hope others will see that they too can make a difference. One willing, dedicated person can have a positive influence on policies that benefit the nation as a whole. Operating forthrightly and with integrity, they can inform us, and help to make our policies sounder. That is an important contribution, and, perhaps, the most vital lesson Brad leaves behind: it is about the people. People like Brad Currey.

PERSONAL EXPLANATION

HON. ROBERT A. WEYGAND

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, September 27, 1999

Mr. WEYGAND. Mr. Speaker, on Friday, September 24, 1999, I was not present for rollcall votes Nos. 444, 445, 446, and 447. Had I been present I would have voted "aye" on rollcall vote 444, "aye" on rollcall vote 445, "no" on rollcall vote 446, and "aye" on rollcall vote 447.

TRIBUTE TO ALLEN FUNT

HON. SAM FARR

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 27, 1999

Mr. FARR of California. Mr. Speaker, I rise today to honor a man who with boundless energy and enthusiasm spread laughter throughout the nation with his long-running TV show "Candid Camera." Allen Funt died at his home in Pebble Beach on September 5, 1999 at the age of 84.

Born on September 16, 1914 in New York, Allen attended Cornell University graduating with a bachelor of arts degree in fine arts. As an undergraduate student, Allen was a scholar of human nature and conducted psychology experiments which began his interest in people's reactions. Mr. Funt also worked as an assistant for an Eleanor Roosevelt radio show from which he began to engender ideas about combining spontaneous reactions of people with radio. During World War II, Allen was enlisted in the Army and served in the Army Signal Corps where he continued to study his idea about combining spontaneous reactions and radio as he experimented with location recording and concealment techniques. After leaving the Army, Allen founded "Candid Microphone" on ABC in 1948. In 1960, CBS picked up the show for a 7-year run and for the year 1960–1961 it was the seventh-best rated show in the nation. CBS now airs "Candid Camera" with Allen's son, Peter Funt, as the host.

For half a century Allen Funt loved to make people smile. He was a visionary who pioneered what has become an entire programming genre, but who also genuinely cared about people and appreciated the healing power of laughter. In the late 1960's, Allen donated his entire Candid Camera film library to the psychology department of his alma mater, Cornell University, in order to share his in-

sights into the human psyche and his work with the students. After settling in the Monterey peninsula in 1978, Allen held fundraisers to support Carmel schools in the 1980's and donated "Candid Camera" tapes to hospitals and the homes of the terminally ill as well as started the "Laughter Therapy Foundation."

Allen Funt was truly a remarkable man who will be fondly remembered for his ingenuity and enthusiasm. His appreciation of laughter's power to heal provided for 52 years of good comedy for the entire nation. Allen will be missed by the countless numbers of people he touched both personally and through his "Candid Camera" show around the world.

DR. TERRY STRAETER: A
COMMUNITY SERVANT

HON. BOB FILNER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 27, 1999

Mr. FILNER. Mr. Speaker, I am honored to rise today to express my admiration and thanks to a leader in San Diego. Dr. Terry Straeter has been a part of our community and given of himself for many years. I am honored to have been invited to participate in an important event to be held this week at the National Air and Space Museum to pay tribute to this innovative and dedicated man.

Dr. Straeter got his start at the National Aeronautics and Space Administration during the 1970s, a time when our missions to the moon were coming to an end and NASA was once again looking to "push the envelope" in space exploration. Serving at the Langley Research Center in Hampton, Virginia, Terry was performing much of the important research that would lead to more and more innovation.

But then, San Diego got lucky. Terry went into the private sector, holding several posts with General Dynamics, eventually coming to beautiful San Diego to lead a group of tremendously dedicated men and women serving at Marconi Information Systems and Marconi Integrated Systems. And quite frankly, Mr. Speaker, our community has not been the same since Terry and his lovely wife Jinny arrived.

Terry is a strong supporter of our United Way campaign. He takes precious moments of his day to work with kids and help them to understand how important our free market economy is by participating in Junior Achievement. He has reached out to those children whose lives are affected by the daily challenges of diabetes by serving as the Corporate Recruitment Chairman of the 1998 Juvenile Diabetes Foundation's "Walk to Cure Diabetes." And all the while running one of the most successful and innovative high technology companies in our city, the State of California, and indeed, within our nation.

I am proud to offer my congratulations to Dr. Terry Straeter on this important occasion when we will honor him in a glowing tribute at the National Air and Space Museum. Terry, we appreciate you and we thank you for your service.
