

they are free to ravage our neighborhoods and our communities, our children's playgrounds, and our schools. I say, if they are going to do the crime, they need to do the time.

Project Exile finally focuses prosecution on criminals rather than laying the blame on firearms. Laws on guns only affect law-abiding citizens. Criminals, by their very nature, do not obey laws. We need common sense enforcement of existing law.

For decades, the anti-second amendment lobby has attacked gun manufacturers and law-abiding citizens, demanding laws and restrictions that further impede the inalienable rights of Americans to protect themselves, their loved ones, and their property. The anti-second amendment lobby has used a series of lies and half truths to spew a message and strike fear in the hearts of America.

David Kopel recently wrote an excellent piece in the April 17 issue of the *National Review*. He listed many of the prominent lies of the anti-gun crowd.

I believe it is critical in any debate that we discuss the merits of any issue based on fact, not on myth. Today I want to correct some of the misinformation that is out there so that we can base our decisions on fact alone.

The first myth is that, up to 17 children are killed every day in gun violence. I agree that even one child killed by a gun is one too many. Parents who choose to have guns in their home need to be cautious, conscientious, and aware of the gun, where it is, and absolutely certain that no child has access to it.

However, this statistic that 17 children die of gun violence every day is not exactly a fact. For that to be true, one has to include 18- and 19-year-olds as well as even some young adults. Nearly all of the deaths that are counted in this statistic are members of gangs, those in the act of committing a crime, or, unfortunately, those committing suicide. The actual gun death rate for children under the age of 14 is less than the rate of children who drown in swimming pool accidents.

The second lie is the so-called gun-show loophole. If any individual is engaged in the business of selling firearms, no matter where the sale takes place, whether it be in a store, his home, or a gun show, the seller must file a government registration form on every buyer and clear the sale through the FBI's National Instant Check System.

1800

To hear the President and Vice President say it, and other anti-second amendment people, one would think that 98 percent of crimes occur with guns that were bought at gun shows. In reality, according to the 1997 National Institute of Justice study, only 2 percent of guns used in crimes were purchased at gun shows.

The third lie is that the average citizen is committing many of these gun

crimes out there and that Americans are too ill tempered to be trusted with guns. But as my colleagues might guess, the facts tell a different picture. Seventy-five percent of murderers have adult criminal records. And a large portion of the other 25 percent have arrests and convictions as juveniles that are sealed under the cloak of youth of-fender protections, or they are actually teenagers when they kill.

Another interesting note is that 90 percent of adult murderers have adult criminal records. Why do we pretend, when we discover that criminals commit crimes, why do we pretend to be shocked? Over 99 percent of the gun owners in America responsibly use the guns that they have for hunting or protection. Why does the liberal anti-second amendment crowd want to continue placing burden upon burden on the 99 percent of gun owners who are law-abiding citizens?

With the passage of Project Exile: The Safe Streets and Neighborhoods Act, we are trying to protect law-abiding citizens from these hardened gun-shooting criminals, criminals who have no respect for life nor for any other individual. Americans for too long have been held hostage by the thugs and drug dealers, the robbers and the gang members, and the lawless and the outlaw. We must reclaim our streets and reclaim our communities and reclaim our American heritage. We need to move forward with other important legislation like this.

WORKER COMPENSATION FOR NATIONAL LABORATORY EMPLOYEES

The SPEAKER pro tempore (Mr. FOSSELLA). Under a previous order of the House, the gentleman from New Mexico (Mr. UDALL) is recognized for 5 minutes.

Mr. UDALL of New Mexico. Mr. Speaker, I rise today to talk about the issue of worker compensation. Today, the administration, Secretary Richardson, President Clinton, and Vice President GORE announced a worker compensation program for workers at the national laboratories all across this country.

This has been a very sad chapter in the history of the United States. Workers have worked at these nuclear establishments and plants for many years, and they have been injured as a result, many of them have been injured, the Department now acknowledges, as a result of occupational exposures. The Department has decided to turn over a new leaf, and I applaud their position on that; and I rise today to put a piece of legislation in the hopper to deal with this situation.

In New Mexico, about 3 weeks ago, I attended a hearing in my district where workers came forward. They talked about how patriotic they were; they talked about how they were serving their country for many, many years and, as a result of their work,

they believed they came down with cancers, with beryllium disease, with asbestosis, with a variety of other illnesses. They were very heart-wrenching stories.

Today, I introduce a piece of legislation that will be comprehensive legislation. It will deal with all of these injuries that occurred and that were talked about at Los Alamos. It is comprehensive in the sense that it will cover beryllium, it will cover radiation, it will cover asbestos, and it will cover chemicals that these workers were exposed to.

The legislation provides that the workers will be able to come forward, very similar to the Workmen's Compensation program that is in place for the Federal Government. They will be able to demonstrate their exposure and what the illness was.

My legislation will also provide that during the 180-day period, while their claim is pending, that they will be able to get health care for free at the nearest Veterans Hospital.

And the burden is on the Government, because many of these individuals came forward and talked about how they had worked their whole life, and they knew there were exposures; but then, at the end of their period of time, they asked for their records and there were no records. Their records were lost. So under those circumstances, we clearly have to put the burden on the Government.

So I would urge my colleagues today, while my bill is specifically directed to New Mexico, I know there are many other colleagues around the country that have this same situation in their district. There are Democrats and Republicans. All areas of the United States are represented. So I think this is a great issue for us to join together in a bipartisan way and craft a solution to this problem at the national level.

The reason I think it is so important is that these workers were true patriots. They were people that loved their country and cared about their country and worked for it at a very crucial time for us, so we need now to do something for them.

COMMEMORATION OF THE LIFE OF HERMAN B. WELLS

The SPEAKER pro tempore (Mrs. WILSON). Under a previous order of the House, the gentleman from Indiana (Mr. PEASE) is recognized for 5 minutes.

Mr. PEASE. Madam Speaker, I rise today to commemorate the life of Herman B. Wells, the 12th president of Indiana University, and the only person to serve that institution on three different occasions as its chief executive officer.

In 1937, he was appointed acting president. From 1938 to 1962, he was president; in 1968 he was interim president; and from 1968 to 2000 he served as chancellor. He died in Bloomington on March 18 and was buried the next week
