

## TRIBUTE TO ROBERT F. SCHUELER

**HON. ROB PORTMAN**

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 4, 2000*

Mr. PORTMAN. Mr. Speaker, today I honor Robert F. Schueler, a dear friend and community leader who recently passed away. Bob was a faithful member of St. Saviour Church in Rossmoyne, and is survived by Virginia (Ginny), his wife of over 29 years.

Bob dedicated much of his life to public service. Since December 1, 1973, he served tirelessly as Blue Ash's Ward 4 council representative. He also served as Blue Ash's mayor from 1987 to 1991 and as vice mayor from 1985 to 1987. He was a council representative for the city of Reading for several years prior to 1973, an active member and past president of the Blue Ash Civil League, and president of the Blue Ash Republican Club. Bob was also active with the St. Patrick Council Knights of Columbus, as the president of the Hamilton County Republican Party, and as the ward chairman for Blue Ash.

Bob lived in, served, and represented Blue Ash for nearly 30 years. All of us in the Greater Cincinnati Area will remember his full devotion and service to our community.

SPACE DAY AND ITS IMPORTANCE  
TO COLORADO**HON. MARK UDALL**

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 4, 2000*

Mr. UDALL of Colorado. Mr. Speaker, I want to call attention to two important causes for celebration and reflection. First, today is Space Day. Here in Washington, Senator John Glenn, Sally Ride, NASA director Daniel Goldin, and others will gather to celebrate the achievements and opportunities that we have all realized through the exploration of space. The celebration also includes Space Day's third annual Webcast devoted to space, science, math, and technology, in which children all over the world will be able to participate. Space Day activities will also take place in Colorado and other states throughout the country.

This week is also the tenth anniversary of the launch of NASA's Hubble Space Telescope. Although its early life was marked by controversy, the Hubble has become one of the most important astronomical study missions ever attempted. In 1993, shuttle astronauts installed lenses—made by Ball Aerospace, in my district in Colorado—to correct the telescope's near-sighted vision. Since that time, Hubble's images have been nothing less than remarkable. Hubble itself has circled the Earth 58,000 times, made 271,000 observations, and generated 2,651 scientific papers. It has fulfilled its scientific missions to determine the age of the universe within a certain range, provide proof that massive black holes exist, and detect the farthest objects in the universe.

Not only has the Hubble telescope made these extraordinary discoveries, but its images

have also helped to broaden the appeal of space to all Americans. Pictures of exploding stars and a comet hitting Jupiter are just some that have engaged our imaginations and changed the way we think about the universe.

I'm proud to note that Colorado and its 2d Congressional District in particular has played a significant role in this nation's space endeavor. But it has truly been a national endeavor, one that has benefited all Americans. I hope we will all take a moment today—Space Day—to reflect on how the advancement of science and space concerns us all.

## PERSONAL EXPLANATION

**HON. DENNIS MOORE**

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 4, 2000*

Mr. MOORE. Mr. Speaker, due to the failure of my pager to operate properly, I inadvertently was absent from three rollcall votes on May 2, 2000.

Had I been present, I would have voted "aye" on the following three roll calls: Rollcall No. 133: H. Con. Res. 295, regarding human rights and oppression in Vietnam; rollcall No. 134: H. Con. Res. 304, condemning Belarus; rollcall No. 135: requiring continued Endangered Species Act reports.

## COAST GUARD GETS AN A

**HON. MICHAEL BILIRAKIS**

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 4, 2000*

Mr. BILIRAKIS. Mr. Speaker, the Government Performance Project (GPP) is aimed at expanding the public's understanding of management challenges facing the government. The GPP rates federal agencies on five areas: managing for results, financial management, human resources, information technology and, where appropriate, capital management. The grades are assigned by a team of scholars and journalists and are based on a survey and interviews with agency officials.

The GPP issued its second annual report earlier this year, and twenty federal agencies received an average grade of B-minus. In the two years that the project has been underway, only two agencies have received A's for their performance: the Coast Guard and the Social Security Administration. I want to commend these agencies, particularly the Coast Guard, for their outstanding performance.

No agency has more wholeheartedly committed itself to results-based government than has the Coast Guard. It has been working to improve its quality management for over ten years and has overhauled its strategic planning and capital asset management. Today, the Coast Guard represents one of the taxpayers' best investments, and as a result of its efforts, it has received numerous Hammer Awards.

I want to take this opportunity to salute the hardworking men and women of the United States Coast Guard.

## INTRODUCTION OF THE "QUALIFIED PERSONAL SERVICE CORPORATIONS CLARIFICATION ACT OF 2000"

**HON. WALLY HERGER**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 4, 2000*

Mr. HERGER. Mr. Speaker, during consideration of the 1986 Tax Act, Congress made a decision that enabled certain Qualified Professional Service Corporations to retain use of the cash accounting method for tax purposes.

I am introducing legislation today that is intended to ensure that companies currently eligible to use cash accounting are able to continue doing so. This is required due to state of the art changes in the type and delivery of those professional services required for developing and implementing the vital water, transportation, infrastructure, communications, and environmental projects upon which our citizens and our economy depend.

RECOGNIZING CAMP SUNSHINE  
DURING THEIR ANNUAL VISIT  
TO WASHINGTON**HON. SAXBY CHAMBLISS**

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 4, 2000*

Mr. CHAMBLISS. Mr. Speaker, I would like to recognize a very special group of young people visiting our Nation's Capital today, Camp Sunshine. Camp Sunshine is an organization in Georgia dedicated to children with cancer from all over the State. Julianne and I have been blessed to know this fine group over the years.

I would like to thank you, Mr. Speaker, and each of my colleagues who take the time each year to visit with these special kids. It is always a treat for me to host their visit to Washington each year and visit with them in Georgia each summer. They are indeed a very special group of bright, well-rounded young people. It is truly an honor for me to be involved with a special organization like Camp Sunshine.

My friends visiting this year include Russell Conover, Sarah Corbitt, Brad Doty, Anthony Grant, Jamaal Grayson, Tony Jones, Adam Kessler, Stephanie Kruse, Barbara Little, Joseph McConnell, Wesley Robbins, Job Steffins, Holli Tanner, Shanna Thomson, Joey Tripp, Michelle Winn, Matthew Winslow, Casimiro Ybarra, Jennifer Johnson, Ashley Palmer, Keenan Duron, and Camp Sunshine's Executive Director, Sally Hale. I would also like to send my best to Wesley Robbins and Barbara Little, who were unable to make the trip.

We had an exciting day at the Capitol, and I look forward to many more visits in the future from Camp Sunshine.
