## ENVIRONMENTAL ISSUES

### HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 24, 2001*

Mr. MARKEY. Mr. Speaker, Oliver Wendell Holmes once said "Pretty much all the honest truth telling in the world is done by children." I believe we here in Congress could certainly learn something about energy, the environment, and the Arctic National Wildlife Refuge from a young girl named Sophie Brown of Anchorage, Alaska, the subject of the following thoughtful and thought-provoking "Letter to the Editor" from her mother, published in the Anchorage Daily News on April 5, 2001:

CHILDREN PUT EARTH BEFORE PARENTS' SUVs  
(By Barbara Brown)

I pulled the car into the driveway, walked toward the door of the house, and Sophie threw open the storm door and shouted, "How do you feel about drilling in the Arctic National Wildlife Refuge?"

"Hold on," I said, "let me pull the car into the garage."

"But this is important," she insisted. "Yes or no?"

Just another pleasant "welcome home" in the Wiepking-Brown household.

One evening, Tim was talking about something over the dinner table, and I must have become distracted because next thing I knew, he was discussing scientists and cannibalism in Papua New Guinea.

"Cannibalism?" I said, really confused. "What are you talking about?"

Sophie piped up: "It's the slow, deadly spread of mad cow disease."

By this point, I was really feeling disconnected. "What slow, deadly spread of mad cow disease?" I asked. And Sophie pointed to Newsweek magazine. "The Slow, Deadly Spread of Mad Cow Disease" was right there, on the cover.

"You read the article?" Tim asked, incredulous.

"Yes," Sophie said. "We're discussing mad cow disease in school."

Tim loves this about Sophie. He loves discussing current events. In school, he'd had a lot of trouble with reading until they introduced newspapers in his classroom. He went from nonreader to the boy everyone wanted on the current-events team.

But back to ANWR. In Sophie's class, all the kids were opposed to drilling except one boy who thought the money might help education in the affected communities. I wondered if they'd seen pictures of cute little caribou. I asked, "Was it because of the caribou?"

"Some," Sophie said, "but we know about the differences of opinion between the groups of people there; we know about how much oil they might find there. Mostly, it's because of the Earth, the wilderness."

One friend of mine said her daughter's class is ready to die on its swords to defend the refuge. Ask the children, and they want to keep it safe from drilling. Is it because they're so young, so naive, so limited in understanding? Is it because they're not paying the bills? Talk to them—they're well-versed in the facts. It's just the way they assign priorities: Kids put the Earth into the equation.

Tim went looking for a car recently and was considering a sport utility. In horror, Sophie shouted, "No, not an SUV! They are terribly wasteful of the Earth's resources!"

Don't ask me where she read that—probably the same places you have. It's just that kids don't let it slide by, don't let it fall away under considerations of image, size, power and, oh yes, by the way, it isn't very fuel-efficient.

So she sees SUVs on the road and she asks, "Are those people selfish, or do they just not know better?" She used to ask the same thing about people she saw littering.

I hear on the radio that 75 percent of Americans are worried about global warming, but the United States won't agree to a treaty to try to control it. Our president says it would be too hazardous for our economy.

Every day, everyone evaluates, decides what priority to assign things and then makes up his or her mind. But for older people, the Earth wasn't and isn't a thing to worry about. It's just "there," like adding zero to both sides of an equation. Other things—costs, duration, employment statistics, capitalization, demographics—those are all factors to be considered. The Earth? It just keeps rotating around the sun. You've seen one tree, you've seen them all. Or, you see no trees, there's nothing there.

Find me a kid who doesn't know about recycling. Find me a kid who doesn't know why he or she recycles, why it's important. OK, maybe they are just little do-gooders, but they're little do-gooders entirely different from the way little kids used to be. While my mom told people to turn their lights off for the war effort, these kids turn lights off "for the Earth."

Once, many years ago, a summer roommate said to me, "If the U.S. uses most of the Earth's resources, then if conditions are going to improve for the rest of the world, we would have to end up using less, right?"

I thought so. "Well," he decided, "I don't want to use less of anything. So I guess the rest of the world can't improve."

I am eager to see the world these children make. Oh, I know that some may grow up to think that recycling aluminum cans is a pain in the neck or that they want as big a gas guzzler as the next guy. All those "other" factors may outweigh their desire for wilderness, for conservation, for clean air and water.

But right now—bet on it—children are putting the Earth first. Even if that changes—even if they put the Earth second or third or fourth—we can be sure they'll never forget about putting the Earth in the equation. How will they feel if we don't leave them much Earth to worry about?

Barbara Brown lives and writes in Anchorage.

## TRIBUTE TO BEVERLY K. ABBOTT

### HON. ANNA G. ESHOO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 24, 2001*

Ms. ESHOO. Mr. Speaker, I rise today to honor a distinguished Californian, Beverly K. Abbott, on the occasion of her retirement from the San Mateo County Mental Health Services Agency.

In January 1968 Beverly Abbott entered into public service as a social worker. A dedicated champion of the mentally ill, she devoted twelve years to Marin County's Division of Community Health, eight of which were spent as Director. Beverly Abbott revolutionized the Department during her tenure, increasing the budget from \$5,000,000 to \$12,000,000.

In 1985, Beverly Abbott took the helm at the San Mateo County Mental Health Services Agency. Under her stewardship, the Mental Health Division has been transformed from a traditional, clinic-based mental health facility to a dynamic organization with a broad array of residential and rehabilitation options. Today the Agency offers a wide selection of contact services, designed to involve families and clients in the administration and evaluation of the service delivery system.

In 1994, the San Mateo Mental Health Division led the State of California by implementing the first fully integrated mental health service system for persons funded by Medi-Cal (MEDICAID).

Beverly Abbott has taken a leadership role in a number of prestigious organizations, including the American College of Mental Health Administration where she served as President-Elect and President from 1995 to 1999.

She has worked tirelessly to provide uncompromising assistance to all residents of San Mateo County. Beverly Abbott's life of leadership is instructive to us all. Her dedication to the ideals of democracy and community service stand tall. It is fitting that she is being honored upon the occasion of her retirement from the San Mateo County Mental Health Services Agency, and I ask my colleagues, Mr. Speaker, to join me in honoring this great and good woman whom I am proud to call my friend. We are a better county, a better country and a better people because of her.

## NATIONAL DEPRESSIVE AND MANIC-DEPRESSIVE ASSOCIATION

### HON. PATRICK J. KENNEDY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, April 24, 2001*

Mr. KENNEDY of Rhode Island. Mr. Speaker, I submit the attached testimony that was given by Lydia Lewis of the National Depressive and Manic Depressive Association to the House Appropriations Subcommittee on Labor, Health, and Human Services and Education for the RECORD.

## NATIONAL DEPRESSIVE AND MANIC-DEPRESSIVE ASSOCIATION, CHICAGO

(Statement on Fiscal Year 2002 Budget, National Institutes of Health and National Institute of Mental Health—Submitted to the House Appropriations Subcommittee on Labor, Health and Human Services, and Education, March 21, 2001)

Good afternoon. Chairman Regula, Ranking Member Obey, and distinguished members of the Subcommittee, thank you for the opportunity to testify today. My name is Lydia Lewis, and I am the Executive Director of the National Depressive and Manic-Depressive Association (National DMDA). We are pleased to have this opportunity to testify on fiscal year 2002 funding for mental health research supported by the National Institutes of Health (NIH) and the National Institute of Mental Health (NIMH).

National DMDA has been gratified to see the overall NIH budget increase over the past three years, including last year's nearly \$2.5 billion increase, and we urge the continued full funding of these research priorities in order to maintain an active, progressive research agenda. We fully support President Bush's 2002 budget request of a \$2.8 billion increase above the 2001 funding level for NIH,
