

The president himself must make the argument, or all else is in vain. If he is unwilling to risk his political capital and his presidency to undo the damage of the past eight years, then in the fire next time his name will be linked with that of his predecessor, and there it will stay forever.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. NELSON of Florida. Mr. President, I ask unanimous consent the order for the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NELSON of Florida. Mr. President, I ask consent I be given 10 minutes to address the Senate.

The PRESIDING OFFICER. Without objection, it is so ordered.

OFF-SHORE DRILLING

Mr. NELSON of Florida. Mr. President, I rise today to express my strong opposition to oil and gas exploration off the coast of Florida. Specifically, the issue at hand is the sale of Lease Sale 181. I am certainly not alone. There are 16 million Floridians who join in this opposition. Senator BOB GRAHAM as well, Florida State elected officials, certainly the legislature of Florida and most of the Florida congressional delegation opposes any drilling in Lease Sale 181.

Lease Sale 181 may not be included in the current moratorium on lease sales off the coast of Florida, but in the hearts of all Floridians it is part of the moratorium. Moreover, there has never been a production drilling rig actually producing off the coast of Florida because Floridians unequivocally oppose offshore drilling because of the threat it presents to the State's greatest natural and economic resource: our coastal environment.

Florida's coastal waters provide an irreplaceable link in the life cycle of many species, both marine and terrestrial. Florida's beaches, fisheries, and wildlife draw millions of tourists each year from around the globe, supporting our State's largest industry, tourism. Florida's commercial fishing industry relies on these estuaries as nurseries for the most commercially harvested fish. Nearly 90 percent of the reef fish resources of the Gulf of Mexico are caught on the West Florida Shelf and contribute directly to Florida's economy.

Oil spills would be devastating to Florida's beaches, coastal waters, reefs, and fisheries. The chronic pollution and discharges from drilling would detrimentally effect the shallow, clean water marine communities found on the Florida outer continental shelf. For these reasons, I cannot sit back and watch as my State, one of our nation's environmental jewels, is degraded.

I know some may have differing views because other issues or concerns consume their constituents; and I respect those views. However, in Florida the environment and tourism are of paramount importance. The beaches, the abundant fisheries, and the pristine waters make Florida what it is today; and the people of Florida want it to stay that way. Just as drilling in the Arctic National Wildlife Refuge would not solve the administration's claimed energy crisis, drilling in Lease Sale 181 will not either. Increased conservation and increased fuel efficiency in our cars would do more to meet our country's energy needs than drilling in Lease Sale 181. For these reasons, I must adamantly object to and vigorously oppose the sale of Lease Sale 181; and I hope the rest of this body listens to the pleas of Floridians.

All of the oil and gas that would come out of this proposed lease sale would only give about 2 months worth of energy for the country. That is simply not a viable tradeoff for the damage it would do to our economy and our environment. We are not willing to make that tradeoff in Florida. As a matter of fact, as you talk about drilling in the Arctic National Wildlife Refuge, isn't it interesting. If you put it into the context of all the barrels of oil that are projected to be pumped from that wildlife refuge, that energy consumption could be replaced if we but increased all new vehicles in their energy efficiency by 3 miles per gallon. That puts the crisis in context.

Conservation is considerably important. The use of research and development to produce more energy-efficient appliances, more energy-efficient automobiles—there is no reason why this country that has the technological prowess cannot produce a car that is economical and that will get 80 miles per gallon. We have that within our grasp. Think what that would do to our energy consumption.

As a matter of fact, when you look at the uses of energy by this Nation, the transportation sector is the sector that consumes most of that energy. Just think what future energy-efficient automobiles could do for us.

But that is a subject of larger proportions. Today, I rise on behalf of a State that has ecologically pristine beaches and the need to be kept just that way. This proposed lease sale for oil and gas drilling clearly jeopardizes the future economy and ecology of Florida.

Thank you, Mr. President. I yield the floor. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. VOINOVICH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

SENATE BUDGET RESOLUTION

Mr. VOINOVICH. Mr. President, just prior to the Easter recess, the Senate completed action on the fiscal year 2002 budget resolution. I voted in favor of final passage of the budget resolution, recognizing that it does not reflect everything that I wanted. However, I am thankful the Senate-passed resolution does contain a fair amount of what President Bush had originally proposed in his budget plan.

Nevertheless, it is my hope that when the Senate does go to conference with the House—which has passed a more stringent budget resolution—the end result will yield a budget resolution more in-tune with the President's more responsible package.

As it was originally put forward, I felt the Bush budget plan provided much of the fiscal responsibility I have long sought from Washington prior to, and since, becoming a Member of the Senate. Specifically, it restrains the growth of spending, reduces the debt as fast as is prudent, and allows for meaningful tax cuts. This is what I like to refer to as a "three-legged stool" approach. For this package to work, however, we have to insist on a balanced approach, because fiscal responsibility, like a three-legged stool, cannot stand if one leg is significantly longer or shorter than the others.

Unfortunately, if we characterized the Senate budget resolution as a three-legged stool, it would be rather wobbly right now since under the Senate budget resolution, discretionary spending increases at 8 percent, and that is double the amount the President suggested.

People often forget the President's proposal increased spending by a modest 4 percent at a time when inflation is approximately 2.8 percent, meaning it contains a real increase of 1.2 percent. In contrast, the Senate budget resolution, in real terms, results in a spending increase of 5.2 percent. That is a 333-percent higher rate of growth than what the President proposes.

These increases may sound like small numbers in the grand scheme of things, or in the Senate, but do not be fooled. It adds up to tens and hundreds of billions of dollars in more spending over time.

If we continue to spend money at this rate, we will have less resources to address important national needs, such as reforming Social Security, reforming Medicare, or providing a prescription drug benefit.

Indeed, according to calculations by the Concord Coalition, the Senate budget resolution includes new and expanded entitlement spending that is going to cost \$600 billion over 10 years, and discretionary spending that may total \$240 billion over 10 years.

Coupled with the resulting increased interest cost of \$550 billion, this package of amendments to the budget resolution could reduce the on-budget surplus by \$1.4 trillion over 10 years.

I say to my colleagues, enough is enough. We have to stop this rampant
