

miles per gallon on the highway. The braking system recharges its batteries and that is why city driving gets better mpg. In 2002 and 2003 Ford and DaimlerChrysler will release, respectively, a hybrid version of its popular Escape and the Durango. These manufacturers are expecting the hybrid SUV's (sport utility vehicles) to deliver twenty-percent better gas mileage than comparable nonhybrid models.

The Federal Fleet Report (FFR) for FY 1999, reports that the Federal fleet has increased 1.32% with an operating cost of 2.10 billion dollars. Mr. Speaker, by mandating that 10% of the Federal fleet be comprised of hybrid-electric or high-efficiency vehicles powered by alternative sources of energy (sources other than gasoline and diesel), will, not only lower our overall consumption of gasoline, but will save the tax-payers of our great Nation millions of dollars in the cost of gasoline. Additionally, these hybrid and high-efficiency vehicles are reported to be more environmentally friendly than our conventional vehicles.

Our colleagues, on both sides of the aisle, are promoting the use of alternative sources of energy to power our vehicles, heat our homes, and to run our lights. Now we have the opportunity to lead by example starting with the Federal vehicle fleet. The Federal Government must seize this opportunity to conserve our resources and to promote environmentally friendly vehicles, and we should do it today.
