

The resolution was agreed to.

A motion to reconsider was laid on the table.

ADJOURNMENT TO MONDAY, JUNE
25, 2001

Mr. ARMEY. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet at 12:30 p.m. on Monday next for morning hour debates.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

DISPENSING WITH CALENDAR
WEDNESDAY BUSINESS ON
WEDNESDAY NEXT

Mr. ARMEY. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

PERMISSION FOR COMMITTEE ON
INTERNATIONAL RELATIONS TO
HAVE UNTIL 5 P.M. FRIDAY,
JUNE 22, 2001, TO FILE REPORT
ON H.R. 1954, ILSA EXTENSION
ACT OF 2001

Mr. ARMEY. Mr. Speaker, I ask unanimous consent that the Committee on International Relations have until 5 p.m. tomorrow, June 22, to file a report on H.R. 1954.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

WISHING BASEBALL GAME PAR-
TICIPANTS GOOD HEALTH AND
FELLOWSHIP

Mr. ARMEY. Mr. Speaker, I ask unanimous consent that all Members of this body join me in a fervent prayer that all our happy warriors tonight from both sides of the aisle complete their evening's activities without mortal damage to any of our participants and that they all walk away happy and in good fellowship.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER
PRO TEMPORE

The Speaker pro tempore (Mr. KIRK). The Chair will entertain 1-minute requests.

CURRENT ENERGY PROBLEM

(Mr. OSBORNE asked and was given permission to address the House for 1

minute and to revise and extend his remarks.)

Mr. OSBORNE. Mr. Speaker, I would like to discuss our current energy problem. It has taken more than 20 years to develop; and obviously, there is no quick solution. But I guess the good news is that we have a plan, where before we had none. It provides for the conservation of energy, exploration and development of new energy sources; and it presents a plan for alternative fuels.

I would like to just briefly mention the Gasoline Access and Stability Act, which has recently been introduced and I think can be part of the solution. This has been sponsored by the House leadership and the entire Nebraska delegation has signed on. This act reduces 45 blends of gasoline to 3.

Currently, our refineries have to shut down totally when a new blend is introduced, and they have to clear their pipes. This is very time consuming and expensive. This bill would require 2 percent oxygenated fuel in the summer and 2.7 percent oxygenated fuel in the winter. The benefits would reduce green house gas emissions by 25 to 30 percent, save motorists up to 12 cents per gallon of gasoline, protect consumers from price spikes, and certainly reduce our independence on foreign oil.

NUCLEAR ENGINEERING
EDUCATION

(Mr. KNOLLENBERG asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KNOLLENBERG. Mr. Speaker, I rise today to urge support for H.R. 2126, the Department of Energy University Nuclear Science and Engineering Act, which was introduced by the gentleman from Illinois (Mrs. BIGGERT), and I am proud to be an original co-sponsor.

The crisis in California has awakened our Nation to the lack of energy supply that confronts us. Nuclear power currently provides 20 percent of America's electricity. Interestingly, it provides 30 percent of California's electricity; and it is an obvious answer, I believe, to our energy needs.

The nuclear science and engineering programs in our universities are crucial to this research in that they provide the critical foundation for our nuclear industry.

□ 1830

Currently support for nuclear science and engineering programs is at a 35-year low. H.R. 2126 authorizes a critical investment of roughly \$240 million over 5 years from the Department of Energy.

Mr. Speaker, this modest investment will ensure that nuclear power will be able to meet California's needs and this Nation's demands. It is imperative that this crucial piece of legislation receives our support.

CONGRESS NEEDS TO PASS BUSH
ENERGY PLAN

(Mrs. BIGGERT asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BIGGERT. Mr. Speaker, we have been hearing a lot about how big oil and big energy companies are picking on California. We are told they are gouging their citizens and only price controls can stop this. Has anyone asked the question, Why California? Why are the big oil and energy companies not picking on Illinois, Pennsylvania, Ohio or New York?

Maybe it is because they are not picking on anyone at all. Energy costs are high across the country, but energy prices are higher in California because that State has prevented through burdensome regulations the construction of new power plants for the last 10 years. The prices that the rest of the country is paying are high because we are trying to meet today's needs with yesterday's energy infrastructure, and it is not working.

Our energy demands have increased 47 percent over the past 30 years, and yet we have half as many oil refineries, static pipeline capacity and 20 times as many mandated gasoline blends.

Low prices throughout the 1980s and 1990s have lulled American consumers and producers into a belief that low prices will always be here. But we know now that is not true.

President Bush has proposed the first comprehensive energy plan in a decade that will increase efficiency, improve how our energy is delivered, diversify our energy sources, protect the environment and assist low-income Americans through these current price increases.

I suggest we get off the rhetorical high horse and get to work passing this energy plan.

SPECIAL ORDERS

The SPEAKER pro tempore (Mr. KIRK). Under the Speaker's announced policy of January 3, 2001, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

TROPICAL STORM ALLISON

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GREEN) is recognized for 5 minutes.

Mr. GREEN of Texas. Mr. Speaker, I rise to share some more stories on the devastation left in my hometown of Houston by Tropical Storm Allison. From Tuesday, June 5, when landfall was made through Sunday, June 10, when the rains began to taper off and the water began to recede, it is now estimated that over \$4 billion of damage was done by this seemingly minor tropical storm. It also cost 23 lives in the Houston area. Of course this storm not
