

this will happen in the other States if we are not careful. The solution to our current energy crisis is simple, choice and competition, not more regulation and price controls like the discharge petition that the Democrats are talking about.

Governor Davis, with the support of environmentalists and government control advocates, raised barriers and actively sought to prohibit the construction of new power plants. Now the Democrats in Washington want to make the Gray Davis approach to energy the national approach to our energy here in Washington.

Mr. Speaker, it is clear what the results will be if they achieve their goal. What is happening in California will happen in the rest of the country. Blackouts will roll from California all of the way to the eastern seaboard. From family to farmer, all Americans will be affected. We do not want this to happen.

We need to have choice and competition. Let there not be a reoccurrence. Let us take the right approach to energy, and work to increase production, reduce regulation and encourage conservation.

IT IS TIME TO PASS A REAL PATIENTS' BILL OF RIGHTS

(Mr. DAVIS of Illinois asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DAVIS of Illinois. Mr. Speaker, emergency room nurses are in town, and I commend and congratulate them for the outstanding work they do. This is also a great time to pass a real Patients' Bill of Rights, one like the Ganske-Dingell bill that ensures that medical decisions come before business decisions, one that ensures that doctors and patients and nurses have the opportunity to decide what kind of treatment there ought to be. It ensures that external review of individuals who do not have a self-interest are the ones making the decisions and recommendations.

Mr. Speaker, it is not like the bill that was introduced yesterday, that allows HMOs to do their own reviewing, to have their own internal reviews to determine whether or not what they are doing is good and right. That is like having the fox guard the chicken house.

Mr. Speaker, if we want to be real, we will pass the Ganske-Dingell bill for real patients' rights.

AMERICA HAS RESPONSIBILITY TO MEET MORE OF OUR OWN ENERGY NEEDS

(Mr. BRADY of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BRADY of Texas. Mr. Speaker, even though President Bush inherited the energy problem, I appreciate that

he is shooting straight with the American people about what it will take to have reliable, affordable and environmentally clean energy for our country.

America, we do have the responsibility to meet more of our own energy needs. Common sense tells us we will need a balanced game plan based on conservation, on new technology and new supply. There are no shortcuts, no Band-Aids, no steps that we can skip.

The discharge petition Members see today is more Hollywood theatrics, more Band-Aids, and we simply cannot afford it. If we work together, Republican and Democrat, CEO and environmentalist, we are capable, and we can achieve energy independence.

Mr. Speaker, this issue is more than economics, it is one of national security. As long as America relies on OPEC and foreign countries for more than half of our daily energy needs, we are vulnerable. And there is no need why the most prosperous Nation in the world cannot take responsibility for our own energy needs. It is time for America to take responsibility for America's energy.

THE PHARMACEUTICAL INDUSTRY IS AT IT AGAIN

(Mr. SANDERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SANDERS. Mr. Speaker, the pharmaceutical industry is at it again. This industry which has spent \$200 million in the last 3 years to defeat all efforts to lower the cost of prescription drugs, this industry which has 300 paid lobbyists here on Capitol Hill, continues to charge the American people by far the highest prices in the world for the same exact prescription drugs.

Mr. Speaker, American women should not have to go over the Canadian border to buy tamoxifen, a breast cancer drug, for one-tenth the price that it is charged in the United States. Seniors should not have to go to Mexico or Europe to pick up the same drugs for a fraction of the price.

Mr. Speaker, in a globalized economy, prescription drug distributors and pharmacists should be able to purchase and sell FDA safety-approved medicine at the same prices as in other countries. The passage of reimportation will lower the cost of medicine in this country by 30 to 50 percent. Let us pass the Sanders-Crowley-DeLauro amendment in the agriculture appropriations bill, which will allow Americans to get fair prices for their prescription drugs.

AMERICA NEEDS TO BE NET EXPORTER OF POWER, NOT NET IMPORTER

(Mr. SHIMKUS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHIMKUS. Mr. Speaker, to my colleagues out West, I want to remind

them the best way to get to a most efficient market is allow the market to work. If this country wants low-cost, reliable electricity, we must have a diverse energy portfolio. We must have coal, nuclear, hydro, renewables, and expand our base load generating capacity. If we want low-cost fuel, we need to drill for it and transport it and refine it. States need to be net exporters, not net importers of power generation. Our country needs to be a net exporter of power, not a net importer of power.

Mr. Speaker, I applaud the State of Illinois and Governor Ryan for passing and signing the Empower Illinois Act, which will incentivize clean coal technology and generation in southern Illinois, and I applaud my colleague, the gentleman from Virginia (Mr. BOUCHER) and the gentleman from Kentucky (Mr. WHITFIELD), and support the Need Act which will do the same thing with a national energy policy, that we will push through the Committee on Energy and Commerce on the floor of the House later on this fall.

CONGRESS NEEDS TO TAKE A STAND AGAINST PRICE GOUGING

(Mr. DEFAZIO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DEFAZIO. Mr. Speaker, from the other side of the aisle we hear platitudes about choice, which consumers do not want, and competition, which does not exist. For months, the mounting evidence of manipulation in the energy markets has been piling up and piling up while the Bush administration, and their hand-picked appointees to the Federal Energy Regulatory Commission, have taken a hands-off attitude. After all, it is some of their most generous campaign contributors, many of whom are based in Texas, who are making obscene amounts of money by manipulating the energy markets.

Mr. Speaker, we would not want to offend them just to help consumers. A month ago it turned out Reliant Energy of Texas had tied its energy traders to the plant operators and had them shut down the plant to drive up the price.

Duke Energy employees have stated that they were told to sabotage the plant and throw away the repair parts to drive up the price of energy on the west coast.

The reaction on that side of the aisle is, oh, let us not make this a partisan issue. Oh, let us be nice.

Mr. Speaker, consumers are being fleeced. It is time for real action. Sign the discharge petition, and this Congress will take a stand for consumers against the price gouging.

SOLVING ENERGY PROBLEMS

(Mr. HAYWORTH asked and was given permission to address the House
