

Federal funding and creating valuable public/private partnerships. The added benefit in providing this kind of assistance is that it will spur further community and economic development by building local partnerships.

Reducing parental anxiety about child care means that parents can become more reliable and productive workers. An evaluation of California's welfare-to-work program found that mothers participating in the program were twice as likely to drop out during the first year if they expressed dissatisfaction with the child care provider or facility they were using.

Let me share with you an example from my state of Connecticut. In the Hill neighborhood of New Haven, one of the most underserved areas of the city, there are more than 2,500 children under the age of five, but just 200 licensed child care spaces, including family care.

LULAC Head Start has been serving the Hill neighborhood since 1983, operating a part-day, early childhood program out of a cramped and poorly lit church basement. This basement program could no longer be licensed by the state and recently closed. The 54 children being served were moved to another location which is overcrowded.

Thanks to a collaboration between the Hill Development Corporation, LULAC Head Start and the New Haven Child Development Program, low-income families in the Hill community will have more access to affordable and high-quality child care services.

A new facility, the Hill Parent Child Center, is under construction and will provide multicultural child care, school readiness, and Head Start services for 172 low-income children in New Haven.

Fortunately for this Hill Community, Connecticut has a new child care financing program. Connecticut multi-Cities Local Initiatives Support Corporation and the National Child Care Initiative joined forces with the State of Connecticut to design a program to finance the development of child care facilities.

Unfortunately, there are many more children in New Haven and other parts of Connecticut as well as across the Nation who still need child care. Sadly, most States do not have a child care financing system in place.

We should do all we can to ensure that safe, affordable, quality child care is available for more families, particularly low-income families, so that we can truly leave no child behind. When the economic situation of families improve, distressed communities become revitalized.

Expanding the supply of quality child care is an important step in investing in the needs of families with young children.

I hope that you will join with Senator DEWINE and me in supporting this legislation to ensure that parents have as many choices as possible in selecting child care while they work. It is

hard enough for low-income families to make ends meet without the additional anxiety of poor choices of care for their children.

I ask unanimous consent that a brief summary of the legislation be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE CHILD CARE FACILITIES FINANCING ACT
THE PROBLEM

Many low-income communities face a severe shortage of child care and equipment.

Child care providers in low-income areas often lack the access to capital and management expertise to expand the capacity and the quality of their programs.

A lack of affordable child care threatens the ability of low-income parents to find and maintain stable employment.

Quality child care can really make a difference in a child's ability to start school ready to learn.

THE SOLUTION

The Child Care Facilities Financing Act authorizes \$50 million annually to fund grants to non-profit intermediaries to enhance the ability of home- and center-based child care providers to serve their communities. Funds will be used to provide:

Financial assistance by intermediaries, in the form of loans, grants, and interest subsidies, for the acquisition, construction, or improvement of facilities for home- and center-based child care and technical assistance to improve business management and entrepreneurial skills to ensure long-term viability of child care providers.

The Child Care Facilities Financing Act requires that the federal investment be matched, dollar for dollar, by funds from the private sector, stimulating valuable public/private partnerships.

BUILDING ON A PROVEN MODEL

The Child Care Facilities Financing Act draws from the community development model—using small, seed-money investments to leverage existing community resources.

Tested in communities across the nation, this approach has been proven to be successful in expanding child care capacity:

In New Haven, Connecticut, the Local Initiatives Support Corporation (LISC) established the Community Investment Collaborative for Kids—closing on \$3.6 million in public-private financing to construct a new 10 room, 171 child Head Start and child care center on a vacant lot in a low-income neighborhood.

The Ohio Community Development Finance Fund offers stable resources for planning, technical assistance and funding for the development of expanded quality child care space. It leverages \$26.11 for every \$1.00 in public funding and has touched the lives of over 13,000 Ohio children. Wonder World, an urban child car center in Akron, Ohio, was operating in a dingy and poorly lit space of an old church. Despite these conditions the center had a waiting list. With help from the Ohio Community Development Finance Fund, a new eight room child care facility was constructed serving approximately 200 children.

ENERGY AND WATER DEVELOPMENT APPROPRIATIONS ACT 2002

On July 19, 2001, the Senate amended and passed H.R. 2311, as follows:

Resolved, That the bill from the House of Representatives (H.R. 2311) entitled “An Act making appropriations for energy and water development for the fiscal year ending September 30, 2002, and for other purposes.”, do pass with the following amendment:

Strike out all after the enacting clause and insert:

That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the fiscal year ending September 30, 2002, for energy and water development, and for other purposes, namely:

TITLE I

DEPARTMENT OF DEFENSE—CIVIL

DEPARTMENT OF THE ARMY

CORPS OF ENGINEERS—CIVIL

The following appropriations shall be expended under the direction of the Secretary of

the Army and the supervision of the Chief of Engineers for authorized civil functions of the Department of the Army pertaining to rivers and harbors, flood control, beach erosion, and related purposes.

GENERAL INVESTIGATIONS

For expenses necessary for the collection and study of basic information pertaining to river and harbor, flood control, shore protection, and related projects, restudy of authorized projects, miscellaneous investigations, and, when authorized by laws, surveys and detailed studies and plans and specifications of projects prior to construction, \$152,402,000, to remain available until expended, of which not less than \$500,000 shall be used to conduct a study of Port of Iberia, Louisiana, and of which such sums as are necessary shall be used by the Secretary of the Army to conduct and submit to Congress a study that examines the known and potential environmental effects of oil and gas drilling activity in the Great Lakes (including effects on the shorelines and water of the Great Lakes): Provided, That during the fiscal years 2002 and 2003, no Federal or State permit or lease shall be issued for oil and gas slant, directional, or offshore drilling in or under 1 or more of the Great Lakes (including in or under any river flowing into or out of the lake): Provided further, That using \$100,000 of the funds provided herein for the States of Maryland, Virginia, Pennsylvania and the District of Columbia, the Secretary of the Army, acting through the Chief of Engineers, is directed to conduct a Chesapeake Bay shoreline erosion study, including an examination of management measures that could be undertaken to address the sediments behind the dams on the lower Susquehanna River: Provided further, That the Secretary of the Army, using \$100,000 of the funds provided herein, is directed to conduct studies for flood damage reduction, environmental protection, environmental restoration, water supply, water quality and other purposes in Tuscaloosa County, Alabama, and shall provide a comprehensive plan for the development, conservation, disposal and utilization of water and related land resources, for flood damage reduction and allied purposes, including the determination of the need for a reservoir to satisfy municipal and industrial water supply needs: Provided further, That within the funds provided herein, the Secretary may use \$300,000 for the North Georgia Water Planning District Watershed Study, Georgia.

CONSTRUCTION, GENERAL

For the prosecution of river and harbor, flood control, shore protection, and related projects authorized by laws; and detailed studies, and plans and specifications, of projects (including those for development with participation or under consideration for participation by States, local governments, or private groups) authorized or made eligible for selection by law (but such studies shall not constitute a commitment of the Government to construction), \$1,570,798,000, to remain available until expended, of which such sums as are necessary for the Federal share of construction costs for facilities under the Dredged Material Disposal Facilities program shall be derived from the Harbor Maintenance Trust Fund, as authorized by Public Law 104-303; and of which such sums as are necessary pursuant to Public Law 99-662 shall be derived from the Inland Waterways Trust Fund, for one-half of the costs of construction and rehabilitation of inland waterways projects, including rehabilitation costs for the Lock and Dam 12, Mississippi River, Iowa; Lock and Dam 24, Mississippi River, Illinois and Missouri; Lock and Dam 3, Mississippi River, Minnesota; and London Locks and Dam, and Kanawha River, West Virginia, projects; and of which funds are provided for the following projects in the amounts specified:
